³ To preserve the ruler from the contamination of their example, and the risk of their revenge.

PART V.

1. 1. A fighting chariot has no cross-board to assist its occupants in bowing ; in a war chariot the

Part V contains forty-eight paragraphs, which may be arranged in ten chapters.

Ch. 1. 1-10, relates to carriages, especially to war chariots, and the use of them with their banners and other things in an expedition. 2. 10, gives the rules in avenging the deaths of a father, brother, and friend. 3. 11, shows the responsibility of ministers and officers generally in maintaining the defence and the cultivation

banner is fully displayed ; in a chariot of peace it is kept folded round the pole. 2. A recorder should carry with him in his carriage his implements for writing¹; his subordinates the (recorded) words (of former covenants and other documents). 3. When there is water in front, the flag with the green bird² on it should be displayed. 4. When there is (a cloud of) dust in front, that with the screaming kites. 5. For chariots and horsemen, that with wild geese in flight³. 6. For a body of troops, that with a tiger's (skin). 7. For a beast of prey, that with a leopard's (skin). 8. On the march the (banner with the) Red Bird should be in front; that with the Dark Warrior behind; that with the Azure Dragon on the left; and that with the White Tiger on the right; that

of their country. 4. 12-14, relates to sacrifices,—the sacrificers, their robes, the victims, &c. 5. 15-21, gives rules about avoiding the mention of certain names. 6. 22-27, is on the subject of divination,—of divining, especially, about the days for contemplated undertakings. 7. 28-33, describes the yoking the horses to a ruler's chariot, his taking his seat, and other points. 8. 34, 35, is about the strap which the driver handed to parties who wished to mount the carriage. 9. 36, gives three prohibitive rules:—about a visitor's carriage; a woman riding in a carriage; and dogs and horses. 10. 37-48, relates various rules about driving out, for the ruler and people generally.

¹ The original character denotes what is now used for 'pencils;' but the ordinary pencil had not yet been invented.

² Some kind of water-bird.

³ A flock of geese maintains a regular order in flying, and was used to symbolise lines of chariots and horsemen. Khung Ying-tâ observes that chariots were used in the field before cavalry, and that the mention of horsemen here looks like the close of the Kâu dynasty. One of the earliest instances of riding on horseback is in the 30 Kwan under the year B. C. 517.

with the Pointer of the Northern Bushel should be reared aloft (in the centre of the host):—all to excite and direct the fury (of the troops)¹. 9. There are rules for advancing and retreating; there are the various arrangements on the left and the right, each with its (proper) officer to look after it.

2. 10. With the enemy who has slain his father, one should not live under the same heaven. With the enemy who has slain his brother, one should never have his sword to seek (to deal vengeance). With the enemy who has slain his intimate friend, one should not live in the same state (without seeking to slay him).

3. 11. Many ramparts in the country round and near (a capital) are a disgrace to its high ministers and great officers². Where the wide and open country is greatly neglected and uncultivated, it is a disgrace to the officers (in charge of it).

4. 12. When taking part in a sacrifice, one should not show indifference. 13. When sacrificial robes are worn out, they should be burnt: sacrificial vessels in the same condition should be buried, as should the tortoise-shell and divining stalks, and a victim that has died. 14. All who take part with the ruler in a sacrifice must themselves remove the stands (of their offerings).

¹ 'The Red Bird' was the name of the seven constellations of the southern quarter of the Zodiac; 'the Dark Warrior' embraced those of the northern; 'the Azure Dragon,' those of the eastern; and 'the Tiger,' those of the western. These flags would show the direction of the march, and seem to suggest that all heaven was watching the progress of the expedition.

² As showing that they had not been able to keep invaders at a distance.

5. 15. When the ceremony of wailing is over¹, a son should no longer speak of his deceased father by his name. The rules do not require the avoiding of names merely similar in sound to those not to be spoken. When (a parent had) a double name, the avoiding of either term (used singly) is not required. 16. While his parents (are alive), and a son is able to serve them, he should not utter the names of his grandparents; when he can no longer serve his parents (through their death), he need not avoid the names of his grandparents. 17. Names that would not be spoken (in his own family) need not be avoided (by a great officer) before his ruler; in the great officer's, however, the names proper to be suppressed by the ruler should not be spoken. 18. In (reading) the books of poetry and history, there need be no avoiding of names, nor in writing compositions. 19. In the ancestral temple there is no such avoiding. 20. Even in his presence, a minister need not avoid the names improper to be spoken by the ruler's wife. The names to be avoided by a wife need not be unspoken outside the door of the harem. The names of parties for whom mourning is worn (only) nine months or five months are not avoided². 21. When one is crossing the boundaries (of a state), he should ask what are its prohibitory laws; when he has fairly entered it, he should ask about its customs; before entering the door (of a house), he should ask about the names to be avoided in it.

¹ After the burial. Till then they would not allow themselves to think of the departed as dead.

² As, in the first place, for uncles; and in the second, for cousins and grand-uncles.

6. 22. External undertakings should be commenced on the odd days, and internal on the even¹. 23. In all cases of divining about a day, whether by the tortoise-shell or the stalks, if it be beyond the decade, it is said, 'on such and such a distant day,' and if within the decade, 'on such and such a near day.' For matters of mourning a distant day is preferred; for festive matters a near day². 24. It is said, 'For the day we depend on thee, O great Tortoise-shell, which dost give the regular indications; we depend on you, O great Divining Stalks, which give the regular indications.' 25. Divination by the shell or the stalks should not go beyond three times. 26. The shell and the stalks should not be both used on the same subject³. 27. Divination by the shell is called p'ü; by the stalks, shih. The two were the methods by which the ancient sage kings made the people believe in seasons and days, revere spiritual beings, stand in awe of their laws and orders; the methods (also) by which they made them determine their perplexities and settle their misgivings. Hence it is said, 'If you doubted, and have consulted the stalks, you need not (any longer) think that you will do wrong. If the day (be clearly indicated), boldly do on it (what you desire to do).'

7. 28. When the ruler's carriage is about to have the horses put to it, the driver should stand before

¹ The odd days are called 'strong,' as belonging to the category of yang; the even days 'weak,' as of the category of yin.

² 'A distant day' gave a longer period for cherishing the memory of the departed; 'a near day' was desired for festive celebrations, because at them the feeling of 'respect' was supposed to predominate.

³ To reverse by the one the indication of the other.

them, whip in hand. 29. When they are yoked, he will inspect the linch pin, and report that the carriage is ready. 30. (Coming out again), he should shake the dust from his clothes, and mount on the right side, taking hold of the second strap¹. He should (then) kneel in the carriage². 31. Holding his whip, and taking the reins separately, he will drive the horses on five paces, and then stop. 32. When the ruler comes out and approaches the carriage, the driver should take all the reins in one hand, and (with the other) hand the strap to him. The attendants should then retire out of the way. 33. They should follow quickly as the carriage drives on. When it reaches the great gate, the ruler will lay his hand on that of the driver (that he may drive gently), and, looking round, will order the warrior for the seat on the right to come into the carriage³. In passing through the gates (of a city) or village, and crossing the water-channels, the pace must be reduced to a walk.

8. 34. In all cases it is the rule for the driver to hand the strap (to the person about to mount the carriage). If the driver be of lower rank (than himself) that other receives it. If this be not the case, he should not do so⁴. 35. If the driver be of the lower rank, the other should (still) lay his own

¹ In a carriage the ruler occupied the seat on the left side; the driver avoided this by mounting on the right side. Each carriage was furnished with two straps to assist in mounting; but the use of one was confined to the chief occupant.

² But only till the ruler had taken his seat.

³ This spearman occupied the seat on the right; and took his place as they were about to pass out of the palace precincts.

⁴ That is, I suppose, he wishes the driver to let go the strap that he may take hold of it himself.

hand on his (as if to stop him). If this be not the case (and the driver will insist on handing it), the other should take hold of the strap below (the driver's hand).

9. 36. A guest's carriage does not enter the great gate; a woman does not stand up in her carriage; dogs and horses are not taken up to the hall¹.

10. 37. Hence², the ruler bows forward to his cross-board to (an old man of) yellow hair; he dismounts (and walks on foot) past the places of his high nobles (in the audience court)³. He does not gallop the horses of his carriage in the capital; and should bow forward on entering a village. 38. When called by the ruler's order, though through a man of low rank, a great officer, or (other) officer, must meet him in person. 39. A man in armour does not bow, he makes an obeisance indeed, but it is a restrained obeisance. 40. When the carriage of a deceased ruler is following at his interment, the place on the left should be vacant. When (any of his ministers on other occasions) are riding in (any of) the ruler's carriages, they do not presume to leave the seat on the left vacant, but he who occupies it should bend forward to the cross-board⁴. 41. A charioteer

¹ The carriage halted outside in testimony of the guest's respect. A man stood up in the carriage; a woman, as weaker, did not do so. For horses, see the rules in Part IV, 5. Dogs were too insignificant to be taken up.

² We do not see the connexion indicated by the 'hence.'

³ Leaving the palace, he walks past those places to his carriage. Returning, he dismounts before he comes to them.

⁴ The first sentence of this paragraph has in the original only four characters; as P. Zottoli happily renders them in Latin, 'Fausti currus vacante sinistra;' but they form a complete

driving a woman should keep his left hand advanced (with the reins in it), and his right hand behind him¹. 42. When driving the ruler of a state, (the charioteer) should have his right hand advanced, with the left kept behind and the head bent down. 43. The ruler of a state should not ride in a one-wheeled carriage². In his carriage one should not cough loudly, nor point with his hand in an irregular way. 44. Standing (in his carriage) one should look (forward only) to the distance of five revolutions of the wheels. Bending forward, he should (do so only till he) sees the tails of the horses. He should not turn his head round beyond the (line of the) naves. 45. In the (streets of the) capital one should touch the horses gently with the brush-end of the switch. He should not urge them to their speed. The dust should not fly beyond the ruts. 46. The ruler of a state should bend towards the cross-board when he meets a sacrificial victim, and dismount (in passing) the ancestral temple. A great officer or (other) officer should descend (when he comes to) the ruler's gate, and bend forward to the ruler's horses³. 47.

sentence. The left seat was that of the ruler in life, and was now left vacant for his spirit. Khung Ying-tâ calls the carriage in question, 'the Soul Carriage' (hẁăn k'ü). A ruler had five different styles of carriage, all of which might be used on occasions of state; as in the second sentence.

¹ The woman was on the driver's left, and they were thus turned from each other as much as possible.

² Common so long ago as now, but considered as beneath a ruler's dignity. So, Wang Tâo. See also the Khang-hsi dictionary under 奇 (k'î).

³ The text says that the ruler should dismount before a victim, and bow before the temple. The verbal characters have been misplaced, as is proved by a passage of the commentary on the

(A minister) riding in one of the ruler's carriages must wear his court robes. He should have the whip in the carriage with him, (but not use it). He should not presume to have the strap handed to him. In his place on the left, he should bow forward to the cross-board. 48. (An officer) walking the ruler's horses should do so in the middle of the road. If he trample on their forage, he should be punished, and also if he look at their teeth, (and go on to calculate their age).

Official Book of *K'âu*, where one part is quoted. The *K'ien-lung* editors approve of the alteration made in the version above.

SECTION II. PART I.

1. 1. When a thing is carried with both hands, it should be held on a level with the heart ; when with one hand, on a level with the girdle. 2. An article belonging to the son of Heaven should be held higher than the heart ; one belonging to a ruler of a state, on a level with it ; one belonging to a Great officer, lower than it ; and one belonging to an (inferior)

This Part I contains thirty-three paragraphs, which have been arranged in sixteen chapters.

Ch. 1. 1-5, describes the manner of carrying things belonging to superiors, and standing before them. 2. 6, relates to the not calling certain parties by their names. 3. 7, 8, to designations of themselves to be avoided or used by certain other parties. 4. 9, prescribes modesty in answering questions. 5. 10, 11, gives rules about the practice of ceremonies in another state. 6. 12, is a rule for an orphan son. 7. 13, 14, is for a son in mourning for his father, and other points. 8. 15-17, describes certain offences to be punished, and things to be avoided in the palace ; and in private. 9. 18, shows us a superior man in building, preparing for sacrifice, and cognate matters ; 10. 19-21, a great or other officer, leaving his own state to go to another, and in that other ; 11. 22, 23, officers in interviews with one another and with rulers. 12. 24-26, gives the rules for the spring hunting ; for bad years ; and for the personal ornaments of a ruler, and the music of officers. 13. 27, is about the reply of an officer to a question of his ruler ; 14. 28, about a great officer leaving his state on his own business. 15. 29, tells how parties entreat a ruler, and others, not to abandon the state. 16. 30-33, gives rules relating to the king : his appellations, designations of himself, &c.

officer should be carried lower still. 3. When one is holding an article belonging to his lord, though it may be light, he should seem unable to sustain it. In the case of a piece of silk, or a rank-symbol of jade, square or round, he should keep his left hand over it. He should not lift his feet in walking, but trail his heels like the wheels of a carriage. 4. (A minister) should stand (with his back) curved in the manner of a sounding-stone¹, and his girdle-pendants hanging down. Where his lord has his pendants hanging at his side, his should be hanging down in front; where his lord has them hanging in front, his should descend to the ground. 5. When one is holding any symbol of jade (to present it), if it be on a mat, he leaves it so exposed; if there be no mat, he covers it with (the sleeve of) his outer robe².

2. 6. The ruler of a state should not call by their names his highest ministers, nor the two noble ladies of her surname, who accompanied his wife to the harem³. A Great officer should not call in that way an officer who had been employed by his father, nor

¹ The sounding-stone which the writer had in mind could not have been so curved as it is ordinarily represented to be in pictures, or the minister must have carried himself as Scott in his 'Fortunes of Nigel,' ch. 10, describes Andrew the Scrivener.

² P. Zottoli translates this paragraph by:—'*Deferens gemmas, si eae habent sustentaculum, tunc apertam indues diploidem; si non habent sustentaculum, tunc clausam.*' The text is not easily construed; and the commentaries, very diffuse, are yet not clear.

³ When a feudal prince married, two other states, of the same surname as the bride, sent each a daughter of their ruling house to accompany her to the new harem. These are 'the noble ladies' intended here.

the niece and younger sister of his wife (members of his harem)¹. (Another) officer should not call by name the steward of his family, nor his principal concubine².

3. 7. The son of a Great officer (of the king, himself equal to) a ruler, should not presume to speak of himself as 'I, the little son³.' The son of a Great officer or (other) officer (of a state) should not presume to speak of himself as 'I, the inheriting son, so-and-so⁴.' They should not so presume to speak of themselves as their heir-sons do. 8. When his ruler wishes an officer to take a place at an archery (meeting), and he is unable to do so, he should decline on the ground of being ill, and say, 'I, so-and-so, am suffering from carrying firewood⁵.'

4. 9. When one, in attendance on a superior man, replies to a question without looking round to see (if any other be going to answer), this is contrary to rule⁶.

5. 10. A superior man⁷, in his practice of cere-

¹ The bride (what we may call the three brides in the preceding note) was accompanied by a niece and a younger sister to the harem.

² This would be the younger sister of the wife, called in the text 'the oldest concubine.'

³ So the young king styled himself during mourning.

⁴ The proper style for the orphan son of such officer was, 'I, the sorrowing son.'

⁵ Mencius on one occasion (I. ii. 2. 1) thus excused himself for not going to court. The son of a peasant or poor person might speak so; others, of higher position, adopted the style in mock humility.

⁶ The action of 3ze-lû in Analects 9, 5. 4, is referred to as an instance in point of this violation of rule.

⁷ The 'superior man' here must be an officer, probably the

monies (in another state), should not seek to change his (old) customs. His ceremonies in sacrifice, his dress during the period of mourning, and his positions in the wailing and weeping, will all be according to the fashions of his former (state). He will carefully study its rules, and carry them exactly into practice.

11. (But) if he (or his descendants) have been away from the state for three generations, and if his dignity and emoluments be (still) reckoned to him (or his representative) at the court, and his outgoings and incomings are announced to the state, and if his brothers or cousins and other members of his house be still there, he should (continue to) send back word about himself to the representative of his ancestor. (Even) after the three generations, if his dignity and emoluments be not reckoned to him in the court, and his outgoings and incomings are (no longer) announced in the state, it is only on the day of his elevation (to official rank) that he should follow the ways of his new state.

6. 12. A superior man, when left an orphan, will not change his name. Nor will he in such a case, if he suddenly become noble, frame an honorary title for his father¹.

7. 13. When occupied with the duties of mourning, and before the interment of (a parent), (a son) should study the ceremonies of mourning; and after

head of a clan or family. Does not the spirit of this chapter still appear in the unwillingness of emigrants from China to forget their country's ways, and learn those of other countries?

¹ The honorary title properly belonged to men of position, and was intended as a condensed expression of their character and deeds. A son in the position described would be in danger of styling his father from his own new standpoint.

the interment, those of sacrifice. When the mourning is over, let him resume his usual ways, and study the pieces of music. 14. When occupied with the duties of mourning, one should not speak of music. When sacrificing, one should not speak of what is inauspicious. In the ruler's court, parties should not speak of wives and daughters.

8. 15. For one to have to dust his (collection of) written tablets, or adjust them before the ruler, is a punishable offence; and so also is it to have the divining stalks turned upside down or the tortoise-shell turned on one side, before him¹. 16. One should not enter the ruler's gate, (carrying with him) a tortoise-shell or divining stalks, a stool or a staff, mats or (sun-)shades, or having his upper and lower garments both of white or in a single robe of fine or coarse hempen cloth². Nor should he do so in rush sandals, or with the skirts of his lower garment tucked in at his waist, or in the cap worn in the shorter periods of mourning. Nor, unless announcement of it has been made (and permission given), can one take in the square tablets with the written (lists of articles for a funeral), or the frayed sackcloth, or the coffin and its furniture³. 17. Public affairs should not be privately discussed.

9. 18. When a superior man, (high in rank), is about to engage in building, the ancestral temple should

¹ These things indicated a want of due preparation and care.

² All these things were, for various reasons, considered inauspicious.

³ A death had in this case occurred in the palace, and the things mentioned were all necessary to prepare for the interment; but still they could not be taken in without permission asked and granted.

have his first attention, the stables and arsenal the next, and the residences the last. In all preparations of things by (the head of) a clan, the vessels of sacrifice should have the first place; the victims supplied from his revenue, the next; and the vessels for use at meals, the last. Those who have no revenue from lands do not provide vessels for sacrifice. Those who have such revenue first prepare their sacrificial dresses. A superior man, though poor, will not sell his vessels of sacrifice; though suffering from cold, he will not wear his sacrificial robes; in building a house, he will not cut down the trees on his grave-mounds.

10. 19. A Great or other officer, leaving his state¹, should not take his vessels of sacrifice with him across the boundary. The former will leave his vessels for the time with another Great officer, and the latter his with another officer. 20. A Great or other officer, leaving his state², on crossing the boundary, should prepare a place for an altar, and wail there, looking in the direction of the state. He should wear his upper garment and lower, and his cap, all of white; remove his (ornamental) collar, wear shoes of untanned leather, have a covering of white (dog's-fur) for his cross-board, and leave his horses' manes undressed. He should not trim his nails or beard, nor make an offering at his (spare) meals. He should not say to any one that he is not chargeable with guilt, nor have any of his women approach him. After three months he will return to his usual dress. 21. When a Great or other officer has an interview with the ruler of the state (to whom he has been sent),

¹ And expecting to return.

² This is in case of exile.

if the ruler be condoling with him on the toils of his journey, he should withdraw on one side to avoid (the honour), and then bow twice with his head to the ground. If the ruler meet him (outside the gate) and bow to him, he should withdraw on one side to avoid (the honour), and not presume to return the bow.

11. 22. When Great or other officers are having interviews with one another, though they may not be equal in rank, if the host reverence (the greater worth of) the guest, he should first bow to him; and if the guest reverence the (greater worth of the) host, he should first bow. 23. In all cases but visits of condolence on occasion of a death, and seeing the ruler of one's state, the parties should be sure to return the bow, each of the other. When a Great officer has an interview with the ruler of (another) state, the ruler should bow in acknowledgment of the honour (of the message he brings); when an officer has an interview with a Great officer (of that state), the latter should bow to him in the same way. When two meet for the first time in their own state, (on the return of one from some mission), the other, as host, should bow in acknowledgment (of the service). A ruler does not bow to a (simple) officer; but if it be one of a different state, he should bow to his bow. A Great officer should return the bow of any one of his officers, however mean may be his rank. Males and females do (? not) bow to one another¹.

¹ The text says that they do bow to one another; but it is evident that *K'ang Khang-K'ang* understood it as saying the very opposite. *Lû Teh-ming* had seen a copy which had the character for 'not.'

12. 24. The ruler of a state, in the spring hunting, will not surround a marshy thicket, nor will Great officers try to surprise a whole herd, nor will (other) officers take young animals or eggs. 25. In bad years, when the grain of the season is not coming to maturity, the ruler at his meals will not make the (usual) offering of the lungs¹, nor will his horses be fed on grain. His special road will not be kept clean and swept², nor even at sacrifices will his musical instruments be suspended on their stands. Great officers will not eat the large grained millet; and (other) officers will not have music (even) at their drinkings. 26. Without some (sad) cause, a ruler will not let the gems (pendent from his girdle) leave his person, nor a Great officer remove his music-stand, nor an (inferior) officer his lutes.

13. 27. When an officer presents anything to the ruler of his state, and another day the ruler asks him, 'Where did you get that?' he will bow twice with his head to the ground, and afterwards reply³.

14. 28. When a Great officer wishes to go beyond the boundaries (of the state) on private business, he must ask leave, and on his return must present some offering. An (inferior) officer in similar cir-

¹ The offering here intended was to 'the father of cookery;' see the first note on p. 80. Such offering, under the K'âu dynasty, was of the lungs of the animal which formed the principal dish. It was not now offered, because it was not now on the ground, even the ruler not indulging himself in such a time of scarcity.

² The road was left uncared for that vegetables might be grown on it, available to the poor at such a time.

³ The offering must have been rare and valuable. The officer had turned aside at the time of presenting it to avoid any compliment from his ruler.

cumstances, must (also) ask leave, and when he comes back, must announce his return. If the ruler condole with them on their toils, they should bow. If he ask about their journey, they should bow, and afterwards reply.

15. 29. When the ruler of a state (is proposing to) leave it, they should (try to) stop him, saying, 'Why are you leaving the altars of the spirits of the land and grain?' (In the similar case of) a Great officer, they should say, 'Why are you leaving your ancestral temple?' In that of an (inferior) officer, they should say, 'Why are you leaving the graves (of your ancestors)?' A ruler should die for his altars; a Great officer, with the host (he commands); an inferior officer, for his charge.

16. 30. As ruling over all, under the sky, (the king) is called 'The son of Heaven¹.' As receiving at court the feudal princes, assigning (to all) their different offices, giving out (the laws and ordinances of) the government, and employing the services of the able, he styles himself, 'I, the one man².' 31. When he ascends by the eastern steps, and presides at a sacrifice, if it be personal to himself and his family³, his style is, 'I, so-and-so, the filial king;' if it be external to himself⁴, 'I, so-and-so, the inheriting king.' When he visits the feudal princes⁵, and sends to make announcement (of his

¹ Meaning, 'Heaven-sonned; constituted by Heaven its son, its firstborn.'

² An expression of humility as used by himself, 'I, who am but a man;' as used of him, 'He who is the one man.'

³ In the ancestral temple.

⁴ At the great sacrifices to Heaven and Earth.

⁵ On his tours of inspection.

presence) to the spirits (of their hills and streams), it is said, 'Here is he, so-and-so, who is king by (the grace of) Heaven.' 32. His death is announced in the words, 'The king by (the grace of) Heaven has fallen¹.' In calling back (his spirit), they say, 'Return, O son of Heaven².' When announcement is made (to all the states) of the mourning for him, it is said, 'The king by (the grace of) Heaven has gone far on high³.' When his place is given to him in the ancestral temple, and his spirit-tablet is set up, he is styled on it, 'the god⁴.' 33. The son of Heaven, while he has not left off his mourning, calls himself, 'I, the little child.' While alive, he is so styled; and if he die (during that time), he continues to be so designated.

¹ A great landslide from a mountain is called pǎng, which I have rendered 'has fallen.' Like such a disaster was the death of the king.

² This ancient practice of calling the dead back is still preserved in China; and by the people generally. There are many references to it in subsequent Books.

³ The body and animal soul went downward, and were in the grave; the intelligent soul (called 'the soul and spirit,' 'the essential breath') went far on high. Such is the philosophical account of death; more natural is the simple style of the text.

⁴ The spirit-tablet was a rectangular piece of wood, in the case of a king, a cubit and two inches long, supposed to be a resting-place for the spirit at the religious services in the temple. Kǎng says that the deceased king was now treated as 'a heavenly spirit,'—he was now deified. P. Zottoli translates the character here—Tí—by imperator; but there was in those times no 'emperor' in China.

PART II.

1. 1. The son of Heaven has his queen, his help-mates, his women of family, and his ladies of honour. (These) constituted his wife and concubines¹.

2. 2. The son of Heaven appoints the officers of Heaven's institution², the precedence among them belonging to the six grandees:—the Grand-governor; the Grand-minister of the ancestral temple; the Grand-historiographer; the Grand-minister of prayers; the Grand-minister of justice; and the Grand-diviner. These are the guardians and superintendents of the six departments of the statutes. 3. The five (administrative) officers of the son of Heaven are:—the minister of instruction; the minister of war; the

Part II consists of twenty-one paragraphs, which are distributed in eight chapters.

Ch. 1. 1, describes the members of the royal harem. 2. 2-6, relates to the various ministers and officers appointed by the king, with their departments and duties. 3. 7-10, gives the names and titles, applied to, and used by, the chiefs of regions, provinces, and of the barbarous tribes. 4. 11-16, is about audiences, meetings, and covenants, and the designations of the princes and others in various circumstances. 5. 17, is about the demeanour of the king and others. 6. 18, 19, is about the inmates of the harems, and how they designated themselves. 7. 20, is about the practice of sons or daughters, and various officers, in designating themselves. 8. 21, is about certain things that should not be said of the king, of princes, and of superior men.

¹ See the very different translation of this paragraph by P. Zottoli in his *Cursus*, iii. p. 653. It is confessed out of place here, should belong to paragraph 18, and is otherwise incomplete.

² So described, as 'Powers that be ordained' by the will of Heaven, equally with the king, though under him these grandees are not all in the *K'au Kwan*.

minister of works; the minister of offices; and the minister of crime. These preside over the multitude in (each of) their five charges. 4. The six treasuries of the son of Heaven are under the charge of the superintendent of the land; the superintendent of the woods; the superintendent of the waters; the superintendent of the grass; the superintendent of articles of employment; and the superintendent of wares. These preside over the six departments of their charges. 5. The six manufactures of the son of Heaven are under the care of (the superintendents of) the workers in earth; the workers in metal; the workers in stone; the workers in wood; the workers in (the skins of) animals; and the workers in twigs. These preside over the six departments of stores. 6. When the five officers give in their contributions, they are said to 'present their offerings'.

3. 7. Chief among the five officers are the presidents², to whom belong the oversight of quarters (of the kingdom). In any message from them transmitted to the son of Heaven, they are styled 'ministers of the son of Heaven.' If they are of the same surname as he, he styles them 'paternal uncles;' if of a different surname, 'maternal uncles.' To the feudal princes, they designate themselves, 'the ancients of the son of Heaven.' Outside (their own states), they are styled 'duke;' in their states, 'ruler.' 8. The head prince in each

¹ Who are the five officers here? Those of paragraph 3? or the feudal dukes, marquises, earls, counts, and barons? Both views have their advocates. The next paragraph favours the second view.

² Such presidents were the dukes of Kâu and Shão, at the commencement of the Kâu dynasty.

of the nine provinces, on entering the state of the son of Heaven, is styled 'pastor.' If he be of the same surname as himself, the son of Heaven calls him 'my paternal uncle;' if he be of a different surname, 'my maternal uncle.' Outside (his own state) he is called 'marquis;' in it, 'ruler.' 9. The (chiefs) among (the wild tribes of) the Í on the east, the Tí on the north, the Zung on the west, and the Man on the south, however great (their territories), are called 'counts.' In his own territories each one calls himself, 'the unworthy one;' outside them, 'the king's ancient.' 10. Any of the princelets of their various tracts¹, on entering the state of the son of Heaven, is styled, 'Such and such a person.' Outside it he is called 'count,' and calls himself 'the solitary.'

4. 11. When the son of Heaven stands with his back to the screen with axe-head figures on it, and the princes present themselves before him with their faces to the north, this is called *k'in* (the autumnal audience). When he stands at the (usual) point (of reception) between the door and the screen, and the dukes have their faces towards the east, and the feudal princes theirs towards the west, this is called *Kháo* (the spring audience)². 12. When feudal princes see one another at a place and time not agreed on beforehand, the interview is called 'a meeting.' When they do so in some open place agreed on beforehand, it is called 'an assembly.'

¹ It is held, and I think correctly, that these princelets were the chiefs of the wild tribes.

² There were other audiences called by different names at the other two seasons.

When one prince sends a great officer to ask about another, it is called 'a message of friendly inquiry.' When there is a binding to mutual faith, it is called 'a solemn declaration.' When they use a victim, it is called 'a covenant.' 13. When a feudal prince is about to be introduced to the son of Heaven, he is announced as 'your subject so-and-so, prince of such-and-such a state.' He speaks of himself to the people as 'the man of little virtue.' 14. If he be in mourning (for his father), he is styled 'the rightful eldest son, an orphan;' if he be taking part at a sacrifice in his ancestral temple, 'the filial son, the prince of such-and-such a state, the prince so-and-so.' If it be another sacrifice elsewhere, the style is, 'so-and-so, prince of such-and-such a state, the distant descendant.' 15. His death is described by the character hung (disappeared). In calling back (his spirit), they say, 'Return, sir so-and-so.' When he has been interred and (his son) is presented to the son of Heaven, the interview, (though special), is said to be 'of the same kind as the usual interviews.' The honorary title given to him is (also) said to be 'after the usual fashion.' 16. When one prince sends a message to another, the messenger speaks of himself as 'the ancient of my poor ruler.'

5. 17. The demeanour of the son of Heaven should be characterised by majesty; of the princes, by gravity; of the Great officers, by a regulated composure; of (inferior) officers, by an easy alertness; and of the common people, by simplicity and humility.

6. 18. The partner of the son of Heaven is called

‘the queen;’ of a feudal prince, ‘the helpmate;’ of a Great officer, ‘the attendant;’ of an (inferior) officer, ‘the serving woman;’ and of a common man, ‘the mate’¹. 19. A duke and (one of) the feudal princes had their helpmate, and their honourable women, (which) were their mates and concubines. The helpmate called herself, before the son of Heaven, ‘the aged servant;’ and before the prince (of another state), ‘the small and unworthy ruler.’ To her own ruler she called herself ‘the small maid.’ From the honourable women downwards, (each member of the harem) called herself ‘your handmaid.’

7. 20. To their parents, sons and daughters called themselves by their names. A Great officer of any of the states, entering the state of the son of Heaven, was called ‘the officer of such-and-such (a state),’ and styled himself ‘your subsidiary minister.’ Outside (his own state), he was called ‘sir;’ and in that state, ‘the ancient of our poor ruler.’ A messenger (to any state) called himself ‘so-and-so.’

8. 21. The son of Heaven should not be spoken of as ‘going out (of his state)’². A feudal prince should not be called by his name, while alive. (When either of these things is done), it is because the superior man³ will not show regard for wickedness. A prince who loses his territory is named, and also one who extinguishes (another state ruled by) lords of the same surname as himself.

¹ Here should come in paragraph 1.

² All the states are his. Wherever he may flee, he is still in what is his own land.

³ This ‘superior man’ would be an upright and impartial historiographer, superior to the conventions of his order.

PART III.

1. 1. According to the rules of propriety for a minister, he should not remonstrate with his ruler openly. If he have thrice remonstrated and is still not listened to, he should leave (his service). In the service of his parents by a son, if he have thrice remonstrated and is still not listened to, he should follow (his remonstrance) with loud crying and tears.

2. When a ruler is ill, and has to drink medicine, the minister first tastes it. The same is the rule for a son and an ailing parent. The physic of a doctor, in whose family medicine has not been practised for three generations at least, should not be taken.

2. 3. In comparing (different) men, we can only do so when their (circumstances and conditions) are of the same class.

Part III contains twenty paragraphs, which may be comprised in eleven chapters.

Ch. 1. 1, 2, contains the rules for a minister and a son in remonstrating with a ruler or parent; and also in seeing about their medicine when ill. 2. 3, gives the rule in making comparisons. 3. 4, 5, gives the rules to be observed in asking about the age and wealth of different parties from the king downwards. 4. 6-10, is about sacrifices: those of different parties, the sacrificial names of different victims, &c. 5. 11, 12, gives the terms in which the deaths of different men, and of animals, are described. 6. 13, 14, gives the names of near relatives, when they are sacrificed to, and when they are alive. 7. 15, tells how different parties should look at others. 8. 16, 17, is about executing a ruler's orders, and things to be avoided in the conduct of business. 9. 18, is about great entertainments. 10. 19, is about presents of introduction. 11. 20, contains the language used in sending daughters to different harems.

3. 4. When one asks about the years of the son of Heaven, the reply should be—'I have heard that he has begun to wear a robe so many feet long¹.' To a similar question about the ruler of a state, the reply should be—'He is able to attend to the services in the ancestral temple, and at the altars of the spirits of the land and grain,' if he be grown up; and, if he be still young, 'He is not yet able to attend to the services in the ancestral temple, and at the altars of the spirits of the land and grain.' To a question about the son of a Great officer, the reply, if he be grown up, should be—'He is able to drive;' and, if he be still young, 'He is not yet able to drive.' To a question about the son of an (ordinary) officer, the reply, if he be grown up, should be—'He can manage the conveying of a salutation or a message;' and, if he be still young, 'He cannot yet manage such a thing.' To a question about the son of a common man, the reply, if he be grown up, should be—'He is able to carry (a bundle of) firewood;' and, if he be still young, 'He is not yet able to carry (such a bundle).' 5. When one asks about the wealth of the ruler of a state, the reply should be given by telling the extent of his territory, and the productions of its hills and lakes. To a similar question about a Great officer, it should be said, 'He has the lands allotted to him, and is supported by the labour (of his people). He needs not to borrow the vessels or dresses for his sacrificial occasions.' To the

¹ This would seem to imply that the king was still young.

same question about an (ordinary) officer, the reply should be by giving the number of his carriages; and to one about a common man, by telling the number of the animals that he keeps.

4. 6. The son of Heaven sacrifices (or presents oblations) to Heaven and Earth¹; to the (spirits presiding over the) four quarters; to (the spirits of) the hills and rivers; and offers the five sacrifices of the house,—all in the course of the year. The feudal princes present oblations, each to (the spirit presiding over) his own quarter; to (the spirits of) its hills and rivers; and offer the five sacrifices of the house,—all in the course of the year. Great officers present the oblations of the five sacrifices of the house,—all in the course of the year. (Other) officers present oblations to their ancestors². 7. There should be no presuming to resume any sacrifice which has been abolished (by proper authority)³, nor to abolish any which has been so established. A sacrifice which it is not proper to offer, and which yet is offered, is called a licentious sacrifice. A licentious sacrifice brings no blessing. 8. The son of Heaven uses an ox of one colour, pure and unmixed; a feudal prince, a fatted ox; a Great officer, an ox selected for the occasion; an (ordinary) officer, a sheep or a pig. 9. The son of an inferior

¹ There were various sacrifices to Heaven and also to Earth. The great ones were—that to Heaven at the winter solstice, and that to Earth at the summer solstice. But all the sacrifices to Heaven and Earth were confined to the king.

² The king offered all the sacrifices in this paragraph. The other parties only those here assigned to them, and the sacrifices allowed to others of inferior rank. The five sacrifices of the house will come before the reader in Book IV and elsewhere.

³ The 'proper authority' would be the statutes of each dynasty.

member of the harem cannot offer the sacrifice (to his grandfather or father); if (for some reason) he have to do so, he must report it to the honoured son, (the head of the family). 10. According to the rules for all sacrifices in the ancestral temple, the ox is called 'the creature with the large foot;' the pig, 'the hard bristles;' a sucking-pig, 'the fatling;' a sheep, 'the soft hair;' a cock, 'the loud voice;' a dog, 'the soup offering;' a pheasant, 'the wide toes;' a hare, 'the clear seer;' the stalks of dried flesh, 'the exactly cut oblations;' dried fish, 'the well-considered oblation;' fresh fish, 'the straight oblation.' Water is called 'the pure cleanser;' spirits, 'the clear cup;' millet, 'the fragrant mass;' the large-grained millet, 'the fragrant (grain);' the sacrificial millet, 'the bright grain;' paddy, 'the admirable vegetable;' scallions, 'the rich roots;' salt, 'the saline, briny substance;' jade, 'the admirable jade;' and silks, 'the exact silks.'

5. 11. The death of the son of Heaven is expressed by pǎng (has fallen); of a feudal prince, by hung (has crashed); of a Great officer, by ȝû (has ended); of an (ordinary) officer, by pû lû (is now unsalaried); and of a common man, by sze (has deceased). (The corpse) on the couch is called shih (the laid-out); when it is put into the coffin, that is called kîû (being in the long home). 12. (The death of) a winged fowl is expressed by hsiang (has fallen down); that of a quadruped, by ȝhze (is disorganised). Death from an enemy in fight is called ping (is slain by the sword).

6. 13. In sacrificing to them, a grandfather is

called 'the sovereign grandfather;' a grandmother, 'the sovereign grandmother;' a father, 'the sovereign father;' a mother, 'the sovereign mother;' a husband, 'the sovereign pattern.' 14. While (they are) alive, the names of father (fû), mother (mû), and wife (khi) are used; when they are dead, those of 'the completed one (khâo),' 'the corresponding one (pî),' and 'the honoured one (pin).' Death in old age is called 'a finished course (jû);' an early death, 'being unsalaried (pû lû).'

7. 15. The son of Heaven does not look at a person above his collar or below his girdle; the ruler of a state looks at him a little lower (than the collar); a Great officer, on a line with his heart; and an ordinary officer, not from beyond a distance of five paces. In all cases looks directed above to the face denote pride, and below the girdle grief; directed askance, they denote villainy.

8. 16. When the ruler orders (any special business) from a Great officer or (other) officer, he should assiduously discharge it; in their offices speaking (only) of the official business; in the treasury, of treasury business; in the arsenals, of arsenal business; and in the court, of court business. 17. At court there should be no speaking about dogs and horses. When the audience is over, and one looks about him, if he be not attracted by some strange thing, he must have strange thoughts in his mind. When one keeps looking about him after the business of the court is over, a superior man will pronounce him uncultivated. At court the conversation should be according to the rules of propriety;

every question should be so proposed, and every answer so returned.

9. 18. For great entertainments¹ there should be no consulting the tortoise-shell, and no great display of wealth.

10. 19. By way of presents of introduction, the son of Heaven uses spirits of black millet; feudal princes, their symbols of jade; a high minister, a lamb; a Great officer, a goose; an (ordinary) officer, a pheasant; a common man, a duck. Lads should bring their article, and withdraw. In the open country, in the army, they do not use such presents;—a tassel from a horse's breast, an archer's armband, or an arrow may serve the purpose. For such presents women use the fruits of the hovenia dulcis, or of the hazel tree, strings of dried meat, jujube dates, and chestnuts.

11. 20. In presenting a daughter for (the harem of) the son of Heaven it is said, 'This is to complete the providers of sons for you;' for that of the ruler of a state, 'This is to complete the providers of your spirits and sauces;' for that of a Great officer, 'This is to complete the number of those who sprinkle and sweep for you.'

¹ Instead of 'for great entertainments,' P. Zottoli has 'summo sacrificio;' but the *Khien-lung* editors decide in favour of the meaning which I have followed.

BOOK II. THE THAN KUNG.

SECTION I. PART I.

1. At the mourning rites for Kung-t Kung-ze, Than Kung (was there), wearing the mourning cincture for the head. Kung-ze had passed over his grandson, and appointed one of his (younger) sons as his successor (and head of the family). Than Kung said (to himself), 'How is this? I never heard of such a thing;' and he hurried to 3ze-fû Po-ze at the right of the door, and said, 'How is it that Kung-ze passed over his grandson, and made a (younger) son his successor?' Po-ze replied, 'Kung-ze perhaps has done in this, like others, according to the way of antiquity. Anciently, king Wăn passed over his eldest son Yî-khâu, and appointed king Wû; and the count of Wei passed over his grandson Tun, and made Yen, his (own) younger brother, his successor. Kung-ze perhaps did also in this according to the way of antiquity.' 3ze-yû asked Confucius (about the matter), and he said, 'Nay, (the rule is to) appoint the grandson¹.'

On the name and divisions of this Book, see the Introduction, pp. 17, 18.

¹ Important as showing the rule of succession to position and property. We must suppose that the younger son, who had been made the head of the family, was by a different mother, and one whose position was inferior to that of the son, the proper heir who was dead. Of course the succession should have descended

2. In serving his father, (a son) should conceal (his faults), and not openly or strongly remonstrate with him about them; should in every possible way wait on and nourish him, without being tied to definite rules; should serve him laboriously till his death, and then complete the mourning for him for three years. In serving his ruler, (a minister) should remonstrate with him openly and strongly (about his faults), and make no concealment (of them); should in every possible way wait on and nourish him, but according to definite rules; should serve him laboriously till his death, and should then wear mourning for him according to rule for three years. In serving his master, (a learner) should have nothing to do with openly reproving him or with concealing (his faults); should in every possible way wait upon and serve him, without being tied to definite rules; should serve him laboriously till his death, and mourn for him in heart for three years¹.

3. *K'î Wû-ze* had built a house, at the bottom of the western steps of which was the grave of the *Tû* family. (The head of that) asked leave to bury (some member of his house) in it, and leave was granted to him to do so. (Accordingly) he entered the house (with the coffin), but did not dare to wail (in the usual fashion). *Wû-ze* said to him, 'To bury in the same grave was not the way of antiquity. It was begun by the duke of *K'âu*, and has not been

in the line of the rightful heir. *Po-ze* evaded the point of *Than Kung's* question; but Confucius did not hesitate to speak out the truth. On other matters which the paragraph might suggest we need not enter.

¹ On differences in the services rendered to a parent, a ruler, and a master or instructor.

changed since. I have granted you the great thing, and why should I not grant the less?' (With this) he ordered him to wail¹.

4. When 3ze-shang's mother died, and he did not perform any mourning rites for her, the disciples of (his father) 3ze-sze asked him, saying, 'Did your predecessor, the superior man, observe mourning for his divorced mother?' 'Yes,' was the reply. (And the disciples went on), 'Why do you not make Pâi also observe the mourning rites (for his mother)?' 3ze-sze said, 'My progenitor, a superior man, never failed in pursuing the right path. When a generous course was possible, he took it and behaved generously; and when it was proper to restrain his generosity, he restrained it. But how can I attain to that? While she was my wife, she was Pâi's mother; but when she ceased to be my wife, she was no longer his mother.' It was in this way that the Khung family came not to observe mourning for a divorced mother; the practice began from 3ze-sze².

5. Confucius said, 'When (the mourner) bows to (the visitor), and then lays his forehead to the ground,

¹ This Wû-ze was a great-grandson of Kî Yû, the third son (by an inferior wife) of duke Kwang of Lû (B.C. 693-662), and the ancestor of the Kî-sun, one of the three famous families of Lû. It would appear that he had appropriated to himself the burying-ground of the Tû family.

² 3ze-shang, by name, Pâi, was the son of 3ze-sze, and great-grandson of Confucius. What is related here is important as bearing on the question whether Confucius divorced his wife or not. If I am correct in translating the original text by 'your predecessor, the superior man,' in the singular and not in the plural, and supposing that it refers to Confucius, the paragraph has been erroneously supposed to favour the view that he did divorce his wife.

this shows the predominance of courtesy. When he lays his forehead to the ground, and then bows (to his visitor), this shows the extreme degree of his sorrow. In the three years' mourning, I follow the extreme (demonstration)¹.

6. When Confucius had succeeded in burying (his mother) in the same grave (with his father) at Fang, he said, 'I have heard that the ancients made graves (only), and raised no mound over them. But I am a man, who will be (travelling) east, west, south, and north. I cannot do without something by which I can remember (the place).' On this, he (resolved to) raise a mound (over the grave) four feet high. He then first returned, leaving the disciples behind. A great rain came on; and when they rejoined him, he asked them what had made them so late. 'The earth slipped,' they said, 'from the grave at Fang.' They told him this thrice without his giving them any answer. He then wept freely, and said, 'I have heard that the ancients did not need to repair their graves.'

7. Confucius was wailing for 3ze-lû in his courtyard. When any came to condole with him, he bowed to them. When the wailing was over, he made the messenger come in, and asked him all about (3ze-lû's death). 'They have made him into pickle,' said the

¹ In the former case the mourner first thought of his visitor; in the latter, of his dead and his own loss. The bow was made with the hands clasped, and held very low, the head being bowed down to them. They were then opened, and placed forward on the ground, on each side of the body, while the head was stretched forward between them, and the forehead made to touch the ground. In the second case the process was reversed.

messenger; and forthwith Confucius ordered the pickle (in the house) to be thrown away¹.

8. 3ǎng-ze said, 'When the grass is old² on the grave of a friend, we no (longer) wail for him.'

9. 3ze-sze said, 'On the third day of mourning, when the body is put into the coffin, (a son) should exercise sincerity and good faith in regard to everything that is placed with it, so that there shall be no occasion for repentance³. In the third month when the body is interred, he should do the same in regard to everything that is placed with the coffin in the grave, and for the same reason. Three years are considered as the extreme limit of mourning; but though (his parents) are out of sight, a son does not forget them. Hence a superior man will have a life-long grief, but not one morning's trouble (from without); and thus on the anniversary of a parent's death, he does not listen to music.'

10. Confucius, being quite young when he was left fatherless, did not know (his father's) grave. (Afterwards) he had (his mother's) body confined in the street of Wû-fû. Those who saw it all thought that it was to be interred there, so carefully was (everything done), but it was (only) the coffining. By inquiring of the mother of Man-fû of 3âu, he succeeded

¹ 3ze-lû had died in peculiar circumstances in the state of Wei, through his hasty boldness, in B.C. 480. It was according to rule that the Master should wail for him. The order about the pickled meat was natural in the circumstances.

² The characters in the text imply that a year had passed since the friend's death.

³ The graveclothes and coverlet. The things placed in the grave with the coffin were many, and will by-and-by come before the reader at length.

in burying it in the same grave (with his father) at Fang¹.

11. When there are mourning rites in the neighbourhood, one should not accompany his pestle with his voice². When there is a body shrouded and coffined in his village, one should not sing in the lanes². For a mourning cap the ends of the ties should not hang down.

12. (In the time of Shun) of Yü they used earthenware coffins³; under the sovereigns of Hsiâ, they surrounded these with an enclosure of bricks. The people of Yin used wooden coffins, the outer and inner. They of K'âu added the surrounding curtains and the feathery ornaments. The people of K'âu buried those who died between 16 and 19 in the coffins of Yin; those who died between 12 and 15 or between 8 and 11 in the brick enclosures of Hsiâ; and those who died (still younger), for whom no mourning is worn, in the earthenware enclosures of the time of the lord of Yü.

13. Under the sovereigns of Hsiâ they preferred what was black. On great occasions (of mourning), for preparing the body and putting it into the coffin, they used the dusk; for the business of war, they used black horses in their chariots; and the victims which they used were black. Under the Yin dynasty they preferred what was white. On occa-

¹ This paragraph is generally discredited. The *K'ien-lung* editors say it is not to be relied on.

² These two rules are in Book I, i. Pt. iv, 43, page 89.

³ In a still earlier time, according to the third Appendix of the *Yi* (vol. xvi, p. 385), they merely covered the body on the ground with faggots.

sions of mourning, for coffining the body, they used the midday; for the business of war they used white horses; and their victims were white. Under the *Kâu* dynasty they preferred what was red. On occasions of mourning, they coffined the body at sunrise; for the business of war they used red horses, with black manes and tails; and their victims were red.

14. When the mother of duke Mû of Lû¹ died, he sent to ask ǰǎng-ze² what (ceremonies) he should observe. ǰǎng-ze said, 'I have heard from my father that the sorrow declared in the weeping and wailing, the feelings expressed in the robe of sackcloth with even or with frayed edges, and the food of rice made thick or in congee, extend from the son of Heaven to all. But the tent-like covering (for the coffin) is of (linen) cloth in Wei, and of silk in Lû.'

15. Duke Hsien of ǰin, intending to put to death his heir-son Shǎn-shǎng, another son, *K'ung-r*, said to the latter, 'Why should you not tell what is in your mind to the duke?' The heir-son said, 'I cannot do so. The ruler is happy with the lady *K'î* of Lî. I should (only) wound his heart.' 'Then,' continued the other, 'Why not go away?' The heir-son replied, 'I cannot do so. The ruler says that I wish to murder him. Is there any state where the (sacredness) of a father is not recognised? Where should I go to obviate this charge?' (At the same time) he sent a man to take leave (for him) of Hû

¹ Duke Mû was marquis of Lû from B.C. 409 to 376.

² This was not the disciple of Confucius, but his son, also named Shǎn like him; but the characters for the names are different.

Tû, with the message, 'I was wrong in not thinking (more) of your words, my old friend, and that neglect is occasioning my death. Though I do not presume to grudge dying, yet our ruler is old, and his (favourite) son is (quite) young. Many difficulties are threatening the state, and you, old Sir, do not come forth (from your retirement), and consult for (the good of) our ruler. If you will come forth and do this, I will die (with the feeling that I) have received a (great) favour from you.' He (then) bowed twice, laying his head to the ground, after which he died (by his own hand). On this account he became (known in history as) 'the Reverential Heir-son¹.'

16. There was a man of Lû, who, after performing in the morning the ceremony which introduced the 25th month of his mourning, began to sing in the evening. 3ze-lû laughed at him, (but) the Master said, 'Yû, will you never have done with your finding fault with people? The mourning for three years is indeed long.' When 3ze-lû went out, the Master said, 'Would he still have had to wait long? In another month (he might have sung, and) it would have been well.'

17. Duke Kwang of Lû fought a battle with the men of Sung at Shăng-*khiû*. Hsien Păn-fû was driving, and Pû Kwo was spearman on the right. The horses got frightened, and the carriage was broken, so that the duke fell down². They handed the strap

¹ The marquis of Jin, who is known to us as duke Hsien, ruled from B.C. 676 to 651. Infatuated by his love for a barbarian captive from among the Lî, he behaved recklessly and unnaturally to his children already grown up. One very tragical event is the subject of this paragraph.

² The text would seem to say here that the army of the duke

of a relief chariot (that drove up) to him, when he said, 'I did not consult the tortoise-shell (about the movement).' Hsien Pân-fû said, 'On no other occasion did such a disaster occur; that it has occurred to-day is owing to my want of courage.' Forthwith he died (in the fight). When the groom was bathing the horses, a random arrow was found (in one of them), sticking in the flesh under the flank; and (on learning this), the duke said, 'It was not his fault;' and he conferred on him an honorary name. The practice of giving such names to (ordinary) officers began from this.

18. Ǵǻng-ǵze was lying in his chamber very ill. Yo-kǻng Ǵze-khun was sitting by the side of the couch; Ǵǻng Yüan and Ǵǻng Shǻn were sitting at (their father's) feet; and there was a lad sitting in a corner holding a torch, who said, 'How beautifully coloured and bright! Is it not the mat of a Great officer?' Ǵze-khun (tried to) stop him, but Ǵǻng-ǵze had heard him, and in a tone of alarm called him, when he repeated what he had said. 'Yes,' said Ǵǻng-ǵze, 'it was the gift of Kí-sun, and I have not been able to change it. Get up, Yüan, and change the mat.' Ǵǻng Yüan said, 'Your illness is extreme. It cannot now be changed. If you happily survive till the morning, I will ask your leave and reverently change it.' Ǵǻng-ǵze said, 'Your love of me is not equal to his. A superior man loves another on grounds of virtue; a little man's love of another is seen in his indulgence of him. What do I seek for?

was defeated; but the victory was with the duke. See the Ǵo Kwan, under B.C. 684, and there was a different reading, to which Lî Teh-ming refers on the passage, that leaves us free to translate as I have done.

I want for nothing but to die in the correct way.' They then raised him up, and changed the mat. When he was replaced on the new one, before he could compose himself, he expired.

19. When (a father) has just died, (the son) should appear quite overcome, and as if he were at his wits' end; when the corpse has been put into the coffin, he should cast quick and sorrowful glances around, as if he were seeking for something and could not find it; when the interment has taken place, he should look alarmed and restless, as if he were looking for some one who does not arrive; at the end of the first year's mourning, he should look sad and disappointed; and at the end of the second year's, he should have a vague and unreliable look.

20. The practice in *K'ü-lü* of calling the (spirits of the dead¹) back with arrows took its rise from the battle of Shǎng-hsing². That in *Lü* of the women making their visits of condolence (simply) with a band of sackcloth round their hair took its rise from the defeat at *Hû-thâi*³.

21. At the mourning for her mother-in-law, the Master instructed (his niece), the wife of Nan-kung Tháo⁴, about the way in which she should tie up her hair with sackcloth, saying, 'Do not make it very high, nor very broad. Have the hair-pin of hazel-wood, and the hair-knots (hanging down) eight inches.'

22. Mǎng Hsien-ze, after the service which ended

¹ See p. 108, par. 32; p. 112, par. 15; and often, farther on.

² In B. c. 638. See the 30 *Kwan* of that year.

³ See in the 30 *Kwan*, under B. c. 569.

⁴ This must have been the Nan Yung of the *Analects*, V, 1, 2.

the mourning rites, had his instruments of music hung on their stands, but did not use them; and when he might have approached the inmates of his harem, he did not enter it. The Master said, 'Hsien-ze is a degree above other men¹.'

23. Confucius, after the service at the close of the one year's mourning, in five days more (began to) handle his lute, but brought no perfect sounds from it; in ten days he played on the organ and sang to it².

24. Yü-ze, it appears, after the service of the same period of mourning, wore shoes of (white) silk, and had ribbons of (white) silk for his cap-strings³.

¹ The sacrificial service on the final putting off of the mourning dress, and to which reference is here made, was called *than* (禫). It will come several times before us hereafter. It is celebrated at the end of the 'three years' mourning' for a parent; that is, at the end of twenty-seven months from the death: see the Introduction, p. 49. Wang Sû of the Wei dynasty contended that the mourning was put off at the end of twenty-five months, and the editors of the Khang-hsi dictionary rather approve of his decision: see their note under the character *than*. I do not think the controversy as to the exact time when the mourning ceased can be entirely cleared up. Confucius praised Hsien-ze, because he could not forget his grief, when the outward sign of it was put off.

² The sacrificial service here is called by a different name from *than*; it is *hsiang* (祥); and in mourning for parents there was 'the small *hsiang*,' at the end of the first year, and 'the great *hsiang*,' at the end of the second. The character here probably denotes the mourning for one year, which is not continued beyond that time. Music was not used during any of the period of mourning; and it is doing violence to the text to take *hsiang* here as equivalent to *than*.

³ In condemnation of Yü-ze (see Analects, I, 2), as quick to forget his grief.

25. There are three deaths on which no condolence should be offered:—from cowardice; from being crushed (through heedlessness); and from drowning¹.

26. When 3ze-lû might have ended his mourning for his eldest sister, he still did not do so. Confucius said to him, 'Why do you not leave off your mourning?' He replied, 'I have but few brothers, and I cannot bear to do so.' Confucius said, 'When the ancient kings framed their rules, (they might have said that) they could not bear (to cease mourning) even for (ordinary) men on the roads.' When 3ze-lû heard this, he forthwith left off his mourning.

27. Thái-kung was invested with his state, (and had his capital) in Ying-~~k~~iû; but for five generations (his descendants, the marquises of K'hi) were all taken back and buried in Kâu. A superior man has said, 'For music, we use that of him from whom we sprang; in ceremonies, we do not forget him to whom we trace our root.' The ancients had a saying, that a fox, when dying, adjusts its head in the direction of the mound (where it was whelped); manifesting thereby (how it shares in the feeling of) humanity.

28. When the mother of Po-yü died, he kept on wailing for her after the year. Confucius heard him, and said, 'Who is it that is thus wailing?' The disciples said, 'It is Li.' The Master said, 'Ah! (such a demonstration) is excessive.' When Po-yü heard it, he forthwith gave up wailing².

¹ The third death here must be supplemented, as I have done the second.

² Compare paragraph 4, and the note on it. Li, designated Po-yü, was the son of Confucius, and it has been supposed that his mother had been divorced, so that his protracted wailing for her gave

29. Shun was buried in the wilderness of 3kang-wû, and it would thus appear that the three ladies of his harem were not buried in the same grave with him¹. Kí Wû-ze said, 'Burying (husband and wife) in the same grave appears to have originated with the duke of K'âu.'

PART II.

1. At the mourning rites for 3ǎng-ze, his body was washed in the cook-room².

2. During the mourning for nine months³ one should suspend his (musical) studies. Some one has said, 'It is permissible during that time to croon over the words (of the pieces).'

3. When 3ze-kang was ill, he called (his son), Shǎn-hsiang, and addressed him, saying, 'We speak of the end of a superior man, and of the death of

occasion to the rebuke of his father. But while his father was alive, a son did not wail for his mother beyond the year. The passage does not prove that Confucius had divorced his wife, but the contrary; though he might have shown more sympathy with his son's sorrow.

¹ From the first part of the Shû King we know that Shun married the two daughters of Yáo. The mention of 'three' wives here has greatly perplexed the commentators. Where 3hang-wû was is also much disputed.

² The proper place for the operation was the principal chamber. There is only conjecture to account for the different place in the case of 3ǎng-ze.

³ In relationships of the third degree: as by a man for a married aunt or sister, a brother's wife, a first cousin, &c.; by a wife, for her husband's grand-parents, uncles, &c.; by a married woman, for her uncle and uncle's wife, a spinster aunt, brothers, sisters, &c. See Appendix at the end of this Book.

a small man. I am to-day, perhaps, drawing near to my end (as a superior man).'

4. ǰǰǰǰ said, 'May not what remains in the cupboard suffice to set down (as the offerings) by (the corpse of) one who has just died?'

5. ǰǰǰǰ said, 'Not to have places (for wailing) in cases of the five months' mourning¹ is a rule which sprang from the ways in small lanes.' When ǰǰǰǰ wailed for his sister-in-law, he made such places, and his wife took the lead in the stamping. When Shǎn-hsiang wailed for Yen-sze, he also did the same.

6. Anciently, (all) caps were (made) with the seams going up and down them; now the (mourning cap) is made with the seams going round. Hence to have the mourning cap different from that worn on felicitous occasions is not the way of antiquity².

7. ǰǰǰǰ said to ǰǰǰǰ, '*Khi*, when I was engaged in the mourning for my parents, no water or other liquid entered my mouth for seven days.' ǰǰǰǰ said, 'With regard to the rules of ceremony framed by the ancient kings, those who would go beyond them should stoop down to them, and those who do not reach them should stand on tip-toe to do so. Hence, when a superior man is engaged in mourning for his parents, no water or other liquid

¹ In relationships of the fourth degree: as by a man for his grand-uncle and his wife, a spinster grand-aunt, a second cousin, &c.; by a wife for her husband's aunt, brother or sister, &c.; by a married woman, for her spinster aunt, married sister, &c. See Appendix.

² This paragraph does not seem to contain any lessons of censure or approval, but simply to relate a fact.

enters his mouth for three days, and with the aid of his staff he is still able to rise.'

8. 3ǎng-ze said, 'If, in cases coming under the five months' mourning, none be worn when the death is not heard of till after the lapse of that time, then when brethren are far apart there would be no wearing of mourning for them at all; and would this be right?'

9. On the mourning rites for Po-káo, before the messenger from Confucius could arrive, Zan-ze had taken it on him, as his substitute, to present a parcel of silks and a team of four horses. Confucius said, 'Strange! He has only made me fail in showing my sincerity in the case of Po-káo¹.'

10. Po-káo died in Wei, and news of the event was sent to Confucius. He said, 'Where shall I wail for him? For brethren, I wail in the ancestral temple; for a friend of my father, outside the gate of the temple; for a teacher, in my chamber; for a friend, outside the door of the chamber; for an acquaintance, in the open country, (some distance off). (To wail) in the open country would in this case be too slight (an expression of grief), and to do so in the bed-chamber would be too great a one. But it was by 3hze that he was introduced to me. I will wail for him in 3hze's.' Accordingly he ordered 3ze-kung to act as presiding mourner on the occa-

¹ We know almost nothing of the Po-káo (the eldest son, Káo) here. From the next paragraph it does not appear that his intimacy with Confucius had been great. Zan-ze had taken too much on himself. Perhaps the gift was too great, and sympathy cannot well be expressed by proxy. The parcel of silks contained five pieces.

sion, saying to him, 'Bow to those who come because you have a wailing in your house, but do not bow to those who come (simply) because they knew Po-káo.'

11. ǰǎng-ǰze said, 'When one during his mourning rites falls ill, and has to eat meat and drink spirits, there must be added the strengthening flavours from vegetables and trees;' meaning thereby ginger and cinnamon.

12. When ǰze-hsiâ was mourning for his son, he lost his eyesight. ǰǎng-ǰze went to condole with him, and said, 'I have heard that when a friend loses his eyesight, we should wail for him.' Thereupon he wailed, and ǰze-hsiâ also wailed, and said, 'O Heaven, and I have no guilt!' ǰǎng-ǰze was angry, and said, 'Shang, how can you say that you have no guilt?'

'I and you served the Master between the *Kû* and the *Sze*¹; and (after his death) you retired, and grew old in the neighbourhood of the Western Ho, where you made the people compare you with the Master. This was one offence.

'When you mourned for your parents, you did so in such a way that the people heard nothing of it. This was a second offence.

'When you mourned for your son, you did it in such a way that you have lost your eyesight. This is a third offence. And how do you say that you have no guilt?'

¹ These were two streams of *Lû*, near which was the home of Confucius. I thought of this passage when I crossed at least one of them on my way to *K'ü-fû*, 'the city of Confucius,' about twelve years ago.

3ze-hsiâ threw down his staff, and bowed, saying, 'I was wrong, I was wrong. It is a long time since I left the herd, and lived apart here.'

13. When a man stops during the daytime in his inner (chamber), it is allowable to come and ask about his illness. When he stops outside during the night, it is allowable to come and condole with him. Hence a superior man, except for some great cause¹, does not pass the night outside (his chamber); and unless he is carrying out a fast or is ill, he does not day and night stop inside.

14. When Kão 3ze-kão was engaged with the mourning for his parents, his tears flowed (silently) like blood for three years, and he never (laughed) so as to show his teeth. Superior men considered that he did a difficult thing.

15. It is better not to wear mourning at all than not to have it of the proper materials and fashion. When wearing the sackcloth with the edges even (for a mother), one should not sit unevenly or to one side, nor should he do any toilsome labour, (even) in the nine months' mourning².

16. When Confucius went to Wei, he found the mourning rites going on for a man with whom he had formerly lodged. Entering the house, he wailed for him bitterly; and when he came out, he told 3ze-kung to take out the outside horses of his carriage, and present them as his gift. 3ze-kung said, 'At the mourning for any of your disciples, you have

¹ 'A great cause:'—such as danger from enemies, or death and the consequent mourning, which, especially in the case of a father's death, required the son thus to 'afflict himself.'

² The whole of this paragraph seems overstrained and trivial.

never taken out those horses (for such a purpose); is it not excessive to do so for a man with whom you (merely) lodged?' The Master said, 'I entered a little ago, and wailed for him; and I found (the mourner) so dissolved in grief that my tears flowed (with his). I should hate it, if those tears were not (properly) followed. Do it, my child¹.'

17. When Confucius was in Wei, there was (a son) following his (father's) coffin to the grave. After Confucius had looked at him, he said, 'How admirably did he manage this mourning rite! He is fit to be a pattern. Remember it, my little children.' 3ze-kung said, 'What did you, Master, see in him so admirable?' 'He went,' was the reply, 'as if he were full of eager affection. He came back (looking) as if he were in doubt.' 'Would it not have been better, if he had come back hastily, to present the offering of repose?' The Master said, 'Remember it, my children. I have not been able to attain to it.'

18. At the mourning rites for Yen Yüan, some of the flesh of the sacrifice at the end of (? two) years was sent to Confucius, who went out and received it. On re-entering he played on his lute, and afterwards ate it².

19. Confucius was standing (once) with his dis-

¹ We are willing to believe this paragraph, because it shows how the depths of Confucius' sympathy could be stirred in him. He was not in general easily moved.

² This paragraph has occasioned a good deal of discussion. The text does not make it clear whether the sacrifice was that at the end of one, or that at the end of two years. Why did Confucius play on his lute? and was he right in doing so?

ciples, having his hands joined across his breast, and the right hand uppermost. They also all placed their right hands uppermost. He said to them, 'You do so from your wish to imitate me, but I place my hands so, because I am mourning for an elder sister.' On this they all placed their left hands uppermost (according to the usual fashion).

20. Confucius rose early (one day), and with his hands behind him, and trailing his staff, moved slowly about near the door, singing—

'The great mountain must crumble ;
The strong beam must break ;
The wise man must wither away like a plant.'

Having thus sung, he entered and sat down opposite the door. 3ze-kung had heard him, and said, 'If the great mountain crumble, to what shall I look up? If the strong beam break, (on what shall I lean)¹? If the wise man wither like a plant, whom shall I imitate? The Master, I am afraid, is going to be ill.' He then hastened into the house. The Master said, '3hze, what makes you so late? Under the sovereigns of Hsiâ, the body was dressed and coffined at the top of the steps on the east, so that it was where the deceased used to go up (as master of the house). The people of Yin performed the same ceremony between the two pillars, so that the steps for the host were on one side of the corpse, and those for

¹ The original of this supplement has dropt out of the text. It is found in the 'Narratives of the School ;' and in a Corean edition of the LĪ KĪ.

the guest on the other. The people of K'âu perform it at the top of the western steps, treating the deceased as if he were a guest. I am a man (descended from the house) of Yin¹, and last night I dreamt that I was sitting with the offerings to the dead by my side between the two pillars. Intelligent kings do not arise; and what one under heaven is able to take me as his Master? I apprehend I am about to die.' With this he took to his bed, was ill for seven days, and died.

21. At the mourning rites for Confucius, the disciples were in perplexity as to what dress they should wear. 3ze-kung said, 'Formerly, when the Master was mourning for Yen Yüan, he acted in other respects as if he were mourning for a son, but wore no mourning dress. He did the same in the case of 3ze-lû. Let us mourn for the Master, as if we were mourning for a father, but wear no mourning dress².'

22. At the mourning for Confucius, Kung-hsi K'ih made the ornaments of commemoration. As the adornments of the coffin, there were the wall-like curtains, the fan-like screens, and the cords at its sides, after the manner of K'âu. There were the flags with their toothed edges, after the manner of Yin; and there were the flag-staffs bound with white silk, and

¹ It is well known that the Khung family was a branch of the ducal house of Sung, the lords of which were the representatives of the royal house of Shang. The Khungs were obliged to flee from Sung, and take refuge in Lû in the time of the great-grandfather of Confucius.

² It is doubtful whether this advice was entirely followed as regards the matter of the dress.

long streamers pendent from them, after the manner of Hsiâ¹.

23. At the mourning for 3ze-kang, Kung-ming Î made the ornaments of commemoration. There was a tent-like pall, made of plain silk of a carnation colour, with clusters of ants at the four corners, (as if he had been) an officer of Yin².

24. 3ze-hsiâ asked Confucius, saying, 'How should (a son) conduct himself with reference to the man who has killed his father or mother?' The Master said, 'He should sleep on straw, with his shield for a pillow; he should not take office; he must be determined not to live with the slayer under the same heaven. If he meet with him in the market-place or the court, he should not have to go back for his weapon, but (instantly) fight with him.'

'Allow me to ask,' said (the other), 'how one should do with reference to the man who has slain his brother?' 'He may take office,' was the reply, 'but not in the same state with the slayer; if he be sent on a mission by his ruler's orders, though he may then meet with the man, he should not fight with him.'

'And how should one do,' continued 3ze-hsiâ, 'in the case of a man who has slain one of his paternal cousins?' Confucius said, 'He should not take the lead (in the avenging). If he whom it chiefly concerns is able to do that, he should support him from behind, with his weapon in his hand.'

¹ See the full description of a coffin and hearse with all its ornaments in Book XIX.

² In honour of the Master, though 3ze-kang himself could not claim to be descended from the kings of Yin.

25. At the mourning rites for Confucius, his disciples all wore their head-bands of sackcloth, when they went out. For one of their own number, they wore them in the house (when condoling), but not when they went out.

26. Keeping (the ground about) their graves clear of grass was not a practice of antiquity¹.

27. 3ze-lû said, 'I heard the Master say that in the rites of mourning, exceeding grief with deficient rites is better than little demonstration of grief with superabounding rites; and that in those of sacrifice, exceeding reverence with deficient rites is better than an excess of rites with but little reverence.'

28. 3äng-ze having gone on a visit of condolence to Fû-hsiâ, the chief mourner had already presented the sacrifice of departure, and removed the offerings. He caused the bier, however, to be pushed back to its former place, and made the women come down (again), after which (the visitor) went through his ceremony. The disciples who accompanied 3äng-ze asked him if this proceeding were according to rule, and he said, 'The sacrifice at starting is an unimportant matter. And why might he not bring (the bier) back, and let it rest (for a while)?'

The disciples further asked the same question of 3ze-yû, who said, 'The rice and precious shell are put into the mouth of the corpse under the window (of the western chamber); the slighter dressing is

¹ Some would interpret this sentence as if it were—'changing the grave' (易 and not 易); but the *K'ien-lung* editors say that this practice, originating in geomancy, arose in the time of 3in, and was unknown during the Han dynasty.

done inside the door, and the more complete one at (the top of) the eastern steps; the coffining takes place at the guests' place; the sacrifice at starting in the courtyard; and the interment at the grave. The proceedings go on in this way to what is more remote, and hence in the details of mourning there is a constant advance and no receding.' When Ǻng-ze heard of this reply, he said, 'This is a much better account than I gave of the going forth to offer the sacrifice of departure.'

29. Ǻng-ze went on a visit of condolence, wearing his fur robe over the silk one, while Ǻe-yû went, wearing the silk one over his fur. Ǻng-ze, pointing to him, and calling the attention of others, said, 'That man has the reputation of being well versed in ceremonies, how is it that he comes to condole with his silk robe displayed over his fur one?' (By-and-by), when the chief mourner had finished the slighter dressing of the corpse, he bared his breast and tied up his hair with sackcloth, on which Ǻe-yû hastened out, and (soon) came back, wearing his fur robe over the silk, and with a girdle of sackcloth. Ǻng-ze on this said, 'I was wrong, I was wrong. That man was right.'

30. When Ǻe-hsiâ was introduced (to the Master) after he had put off the mourning (for his parents), a lute was given to him. He tried to tune it, but could hardly do so; he touched it, but brought no melody from it. He rose up and said, 'I have not yet forgotten my grief. The ancient kings framed the rules of ceremony, and I dare not go beyond them?' When a lute was given to Ǻe-kang in the same circumstances, he tried to tune it, and easily

did so; he touched it, and brought melody from it. He rose up and said, 'The ancient kings framed the rules of ceremony, and I do not dare not to come up to them.'

31. At the mourning rites for Hui-ze, who had been minister of Crime, Ze-yü (went to condole), wearing for him a robe of sackcloth, and a headband made of the product of the male plant. Wän-ze (the brother of Hui-ze), wishing to decline the honour, said, 'You condescended to be the associate of my younger brother, and now further condescend to wear this mourning; I venture to decline the honour.' Ze-yü said, 'It is in rule;' on which Wän-ze returned and continued his wailing. Ze-yü then hastened and took his place among the officers (of the family); but Wän-ze also declined this honour, and said, 'You condescended to be the associate of my younger brother, and now further condescend to wear for him this mourning, and to come and take part in the mourning rites; I venture to decline the honour.' Ze-yü said, 'I beg firmly to request you to allow me (to remain here).'

Wän-ze then returned, and supporting the rightful son to take his position with his face to the south, said, 'You condescended to be the associate of my younger brother, and now you further condescend to wear this mourning for him, and to come and take part in the rites; dare Hû but return to his (proper) place?' Ze-yü on this hastened to take his position among the guests¹.

¹ The object of Ze-yü in all the movements detailed here is supposed to have been to correct some irregularity in the pro-

32. At the mourning rites for the general Wăn-ze, when the first year's mourning was at an end, there came a man from Yüeh¹ on a visit of condolence. The chief mourner, wearing the long robe (assumed on the completion of the first year's mourning), and the cap worn before that, wailed for him in the ancestral temple, with the tears running from his eyes and the rheum from his nose. 3ze-yü saw it, and said, 'The son of the general Wăn is not far from being (a master of ceremonies). In his observances at this time, for which there is no special rule, his proceeding is correct.'

33. The giving of the name in childhood², of the designation at the capping, of the title of elder uncle or younger uncle at fifty, and of the honorary title after death, was the practice of the K'áu dynasty.

The wearing of the sackcloth head-bands and girdles, to express the real (feeling of the heart); the digging a hole in the middle of the apartment (over which) to wash (the corpse); taking down the (tiles of the) furnace, and placing them at the feet (of it)³; and at the interment pulling down (part of the wall on the west of the door of) the ancestral temple, so as to pass by the upper side (of the altar to the spirit)

ceedings on the occasion. K'äng Hsüan thinks that Wăn-ze was supporting a grandson, instead of Hû, his deceased brother's rightful son, to be the principal mourner, and consequently to succeed Hui-ze as his representative and successor. Hui-ze and Wăn-ze (called Mei-mâu) were of the state of Wei.

¹ A distant state, south of Wû, on the seaboard.

² Three months after birth.

³ To show the deceased had no more occasion for food, and to keep the feet straight, so that the shoes might be put on at the dressing of the corpse.

of the way, and issue by the great gate ;—these were the practices of the Yin dynasty, and the learners (in the school of Confucius) followed them.

34. When the mother of 3ze-liû died, (his younger brother) 3ze-shih asked for the means (to provide what was necessary for the mourning rites). 3ze-liû said, 'How shall we get them?' 'Let us sell (the concubines), the mothers of our half-brothers,' said the other. 'How can we sell the mothers of other men to bury our mother?' was the reply; 'that cannot be done.'

After the burial, 3ze-shih wished to take what remained of the money and other things contributed towards their expenses, to provide sacrificial vessels; but 3ze-liû said, 'Neither can that be done. I have heard that a superior man will not enrich his family by means of his mourning. Let us distribute it among the poor of our brethren.'

35. A superior man said, 'He who has given counsel to another about his army should die with it when it is defeated. He who has given counsel about the country or its capital should perish with it when it comes into peril.'

36. Kung-shû Wăn-ze ascended the mound of Hsiâ, with Kû Po-yü following him. Wăn-ze said, 'How pleasant is this mound! I should like to be buried here when I die.' Kû Po-yü said, 'You may find pleasure in such a thought, but allow me (to go home) before (you say any more about it)¹.'

37. There was a man of Pien who wept like a

¹ Was there anything more than a joke in this reply of Po-yü? The commentators make it out to be a reproof of Wăn-ze for wishing to appropriate for his grave the pleasant ground of another.

child on the death of his mother. Confucius said, 'This is grief indeed, but it would be difficult to continue it. Now the rules of ceremony require to be handed down, and to be perpetuated. Hence the wailing and leaping are subject to fixed regulations.'

38. When the mother of Shu-sun Wû-shû died, and the slighter dressing had been completed, the bearers went out at the door (of the apartment) with the corpse. When he had himself gone out at the door, he bared his arms, throwing down also his cap, and binding his hair with sackcloth. 3ze-yû said (in derision), 'He knows the rules¹!'

39. (When a ruler was ill), the high chamberlain supported him on the right, and the assigner of positions at audiences did so on the left. When he died these two officers lifted (the corpse)².

40. There are the husband of a maternal cousin and the wife of a maternal uncle;—that these two should wear mourning for each other has not been said by any superior man. Some one says, 'If they have eaten together from the same fireplace, the three months' mourning³ should be worn.'

41. It is desirable that affairs of mourning should be gone about with urgency, and festive affairs in a

¹ He should have made his preparations before, and not have had to throw down his cap on the ground.

² The text of this paragraph would make the assisting parties to be the chief diviner and the chief archer. The translation is according to an emendation of it from the *Kâu LĪ*.

³ Worn in relationships of the fifth degree: as by a man for his great-grand-uncle and his wife, a spinster great-grand-aunt, the son of a mother's brother or sister, &c.; by a wife for her husband's great-great-grand-parents, &c. See Appendix.

leisurely way. Hence, though affairs of mourning require urgency, they should not go beyond the prescribed rules; and though festive affairs may be delayed, they should not be transacted negligently. Hurry therefore (in the former) becomes rudeness, and too much ease (in the latter) shows a small man. The superior man will conduct himself in them as they severally require.

42. A superior man is ashamed¹ to prepare (beforehand) all that he may require in discharging his mourning rites. What can be made in one or two days, he does not prepare (beforehand).

43. The mourning worn for the son of a brother should be the same as for one's own son: the object being to bring him still nearer to one's self. An elder brother's wife and his younger brother do not wear mourning for each other: the object being to maintain the distance between them. Slight mourning is worn for an aunt, and an elder or younger sister, (when they have been married); the reason being that there are those who received them from us, and will render to them the full measure of observance.

PART III.

1. When (the Master) was eating by the side of one who had mourning rites in hand, he never ate to the full.

2. Ǵǵǵǵze was standing with (another) visitor by the side of the door (of their house of entertainment), when a companion (of the other) came hurrying out.

¹ Lest he should seem not to be wishing individuals to live long.

'Where are you going?' said ǰǎng-ze; and the man replied, 'My father is dead, and I am going to wail for him in the lane.' 'Return to your apartment,' was the reply, 'and wail for him there.' (The man did so), and ǰǎng-ze made him a visit of condolence, standing with his face to the north.

3. Confucius said, 'In dealing with the dead, if we treat them as if they were entirely dead, that would show a want of affection, and should not be done; or, if we treat them as if they were entirely alive, that would show a want of wisdom, and should not be done. On this account the vessels of bamboo (used in connexion with the burial of the dead) are not fit for actual use; those of earthenware cannot be used to wash in; those of wood are incapable of being carved; the lutes are strung, but not evenly; the pandean pipes are complete, but not in tune; the bells and musical stones are there, but they have no stands. They are called vessels to the eye of fancy; that is, (the dead) are thus treated as if they were spiritual intelligences¹.'

¹ The *K'ien-lung* editors say on this:—'To serve the dead as he served the living is the highest reach of a son's feeling. But there is a difference, it is to be presumed, between the ways of spirits and those of men. In the offerings put down immediately after death, there is an approach to treating the deceased as if he were still a (living) man. But at the burial the treatment of him approaches to that due to a (disembodied) spirit. Therefore the dealing with the dead may be spoken of generally as something between that due to a man and that due to a spirit,—a manifestation of the utmost respect without any familiar liberty.' We should like to have something still more definite. Evidently the subject was difficult to those editors, versed in all Chinese lore, and not distracted by views from foreign habits and ways of thinking. How much more difficult must it be for a foreigner to place

4. Yû-ze asked ǰǰng-ze if he had ever questioned the Master about (an officer's) losing his place. 'I heard from him,' was the reply, 'that the officer in such a case should wish to become poor quickly, (just as) we should wish to decay away quickly when we have died.' Yû-ze said, 'These are not the words of a superior man.' 'I heard them from the Master,' returned ǰǰng-ze. Yû-ze repeated that they were not the words of a superior man, and the other affirmed that both he and ǰze-yû had heard them. 'Yes, yes,' said Yû-ze, 'but the Master must have spoken them with a special reference.' ǰǰng-ze reported Yû-ze's words to ǰze-yû, who said, 'How very like his words are to those of the Master! Formerly, when the Master was staying in Sung, he saw that Hwan, the minister of War, had been for three years having a stone coffin made for himself without its being finished, and said, "What extravagance! It would be better that when dead he should quickly decay away." It was with reference to Hwan, the minister of War, that he said, "We should wish to decay away quickly when we die." When Nan-kung K'ing-shû returned (to the state), he made it a point to carry his treasures with him in his carriage when he went to court, on which the Master said, "Such an amount of property! It would have been better for him, when he lost his office, to make haste to become poor." It was with reference to Nan-kung K'ing-shû that he said that

himself 'en rapport' with the thoughts and ways of men, so far removed from him in time and in mental training! The subject of these vessels, which yet were no vessels, will come up again.

"We should work to become poor quickly, when we have lost office."

Ǻng-ze reported these words of 3ze-yû to Yû-ze, who said, 'Yes, I did say that these were not the words of the Master.' When the other asked him how he knew it, he said, 'The Master made an ordinance in *Kung-tû* that the inner coffin should be four inches thick, and the outer five. By this I knew that he did not wish that the dead should decay away quickly. And formerly, when he had lost the office of minister of Crime in *Lû*, and was about to go to *King*, he first sent 3ze-hsiâ there, and afterwards Zan Yû. By this, I knew that he did not wish to become poor quickly¹.'

5. When *Kwang-ze* of *Khân* died, announcement of the event was sent to *Lû*. They did not want to wail for him there, but duke Mû² called *Hsien-ze*, and consulted him. He said, 'In old times, no messages from Great officers, not even such as were accompanied by a bundle of pieces of dried meat, went out beyond the boundaries of their states. Though it had been wished to wail for them, how could it have been done? Nowadays the Great officers share in the measures of government throughout the middle states. Though it may be wished not to wail for one, how can it be avoided? I have heard, moreover, that there are two grounds for the wailing; one from love, and one from fear.' The duke said, 'Very well; but how is the thing to be managed in this

¹ Confucius sent those two disciples, that he might get their report of *King* (or *Khû*), and know whether he might himself go and take office there as he wished to do.

² B. C. 409-377.

case?' Hsien-ze said, 'I would ask you to wail for him in the temple of (a family of) a different surname;' and hereon the duke and he wailed for K'wang-ze in (the temple of) the Hsien family.

6. Kung Hsien said to 3ǎng-ze, 'Under the sovereigns of the Hsiâ dynasty, they used (at burials) the vessels which were such only to the eye of fancy, intimating to the people that (the dead) had no knowledge. Under the Yin they used the (ordinary) sacrificial vessels, intimating to the people that (the dead) had knowledge. Under the K'âu we use both, intimating to the people that the thing is doubtful.' 3ǎng-ze replied, 'It is not so! What are vessels (only) to the eye of fancy are for the shades (of the departed); the vessels of sacrifice are those of men; how should those ancients have treated their parents as if they were dead?'

7. An elder brother of Kung-shû Mû, by the same mother but a different father, having died, he asked 3ze-yû (whether he should go into mourning for him), and was answered, 'Perhaps you should do so for the period of nine months.'

A brother, similarly related to Tî Î, having died, he consulted 3ze-hsiâ in the same way, and was answered, 'I have not heard anything about it before, but the people of Lû wear the one year's mourning in such a case.' Tî Î did so, and the present practice of wearing that mourning arose from his question¹.

8. When 3ze-sze's mother died in Wei, Liû Zo said to him, 'You, Sir, are the descendant of a sage.

¹ Confucius gives a decision against mourning at all in such a case, excepting it were exceptional,—in the 'Narratives of the School,' chapter 10, article 1.

From all quarters they look to you for an example in ceremonies; let me advise you to be careful in the matter.' 3ze-sze said, 'Of what have I to be careful? I have heard that when there are certain ceremonies to be observed, and he has not the necessary means for them, a superior man does not observe them, and that neither does he do so, when there are the ceremonies, and he has the means, but the time is not suitable; of what have I to be careful¹?'

9. Hsien-ze So said, 'I have heard that the ancients made no diminution (in the degrees of mourning on any other ground); but mourned for every one above and below them according to his relationship. Thus Wăn, the earl of Thăng, wore the year's mourning for Măng-hû, who was his uncle, and the same for Măng Phî, whose uncle he was.'

10. Hâu Mû said, 'I heard Hsien-ze say about the rites of mourning, that (a son) should certainly think deeply and long about them all, and that (for instance) in buying the coffin he should see that, inside and outside, it be (equally) well completed. When I die, let it be so also with me².'

11. 3ăng-ze said, 'Until the corpse has its ornaments put on it, they curtain off the hall; and after the slighter dressing the curtain is removed.' Kung-liang-ze said, 'Husband and wife are at first all in

¹ 3ze-sze's mother, after his father's death, had married again into the Shû family of Wei. What mourning was 3ze-sze now to wear for her? Liû Zo seems to have apprehended that he would be carried away by his feelings and would do more than was according to rule in such a case. 3ze-sze's reply to him is not at all explicit.

² This record is supposed to be intended to ridicule Hâu Mû for troubling himself as he did.

confusion¹, and therefore the hall is curtained off. After the slighter dressing, the curtain is removed.'

12. With regard to the offerings to the dead at the time of the slighter dressing, 3ze-yû said that they should be placed on the east (of the corpse). 3ăng-ze said, 'They should be placed on the west, on the mat there at the time of the dressing.' The placing the offerings on the west at the time of the slighter dressing was an error of the later times of Lû.

13. Hsien-ze said, 'To have the mourning robe of coarse dolichos cloth, and the lower garment of fine linen with a wide texture, was not (the way of) antiquity.'

14. When 3ze-phû died, the wailers called out his name Mieh². 3ze-kão said, 'So rude and uncultivated are they!' On this they changed their style.

15. At the mourning rites for the mother of Tû *Khiáo* no one was employed in the house to assist (the son in the ceremonies), which was accounted a careless omission.

16. The Master said, 'As soon as a death occurs, (the members of the family) should change their lamb-skin furs and dark-coloured caps, though they may do nothing more.' The Master did not pay a visit of condolence in these articles of dress.

17. 3ze-yû asked about the articles to be provided for the mourning rites, and the Master said, 'They should be according to the means of the family.'

¹ Settling places for the wailers, &c. But this explanation is deemed unsatisfactory.

² The name was used only in calling the spirit back immediately after death; the wailing was a subsequent thing.

3ze-yû urged, 'How can a family that has means and one that has not have things done in the same way?' 'Where there are means,' was the reply, 'let there be no exceeding the prescribed rites. If there be a want of means, let the body be lightly covered from head to foot, and forthwith buried, the coffin being simply let down by means of ropes. Who in such a case will blame the procedure?'

18. Păn, superintendent of officers' registries, informed 3ze-yû of his wish to dress his dead on the couch. 'You may,' said 3ze-yû. When Hsien-ze heard of this, he said, 'How arrogant is the old gentleman! He takes it on himself to allow men in what is the proper rule¹.'

19. At the burial of his wife, duke Hsiang of Sung² placed (in the grave) a hundred jars of vinegar and pickles. 3ăng-ze said, 'They are called "vessels only to the eye of fancy," and yet he filled them!'

20. After the mourning rites for Măng Hsien-ze, the chief minister of his family made his subordinates return their money-offerings to all the donors. The Master said that such a thing was allowable.

21. About the reading of the list of the material contributions (towards the service of a funeral), 3ăng-

¹ On death, the body was lifted from the couch, and laid on the ground. When there was no response to the recalling of the spirit, it was returned to the couch and dressed. A practice seems to have arisen of slightly dressing it on the ground, which Păn did not wish to follow. 3ze-yû ought to have told him that his proposal was according to rule; whereas he expressed his permission of it,—a piece of arrogance, which Hsien-ze condemned.

² Hsiang died in B. C. 637.

ze said, 'It is not an ancient practice; it is a second announcement (to the departed) ¹!'

22. When *Khǎng-ze Káo* was lying ill, *Khing Í* went in to see him, and asked his (parting) commands, saying, 'Your disease, Sir, is severe. If it should go on to be the great illness, what are we to do?' *Ze-káo* said, 'I have heard that in life we should be of use to others, and in death should do them no harm. Although I may have been of no use to others during my life, shall I do them any harm by my death? When I am dead, choose a piece of barren ground, and bury me there.'

23. *Ze-hsiâ* asked the Master (how one should deport himself) during the mourning for the ruler's mother or wife, (and the reply was), 'In sitting and stopping with others, in his conversation, and when eating and drinking, he should appear to be at ease ².'

24. When a stranger-visitor arrived, and had nowhere to lodge, the Master would say, 'While he is alive, let him lodge with me. Should he die, I will see to his coffin ³.'

25. *Kwo-ze Káo* ⁴ said, 'Burying means hiding

¹ The contributions had been announced by the bier, as if to the departed, and a record of them made. To read the list, as is here supposed, as the procession was about to set forth, was a vain-glorious proceeding, which *Ǵǵng-ze* thus derided.

² The supplements in this paragraph are from the 'Narratives of the School.' Some contend that the whole should be read as what *Ze-hsiâ* said, and that the Master gave him no reply, disapproving of his sentiments.

³ This paragraph, like the preceding, appears in rather a different form in the 'Narratives of the School.'

⁴ *Kwo-ze Káo* was the same as the *Khǎng-ze Káo* of par. 22. *Kwo* was the surname, and *Khǎng* the posthumous title. It is difficult to decide between *Kwo-ze Káo* and *Kwo Ze-káo*.

away; and that hiding (of the body) is from a wish that men should not see it. Hence there are the clothes sufficient for an elegant covering; the coffin all round about the clothes; the shell all round about the coffin; and the earth all round about the shell. And shall we farther raise a mound over the grave and plant it with trees?’

26. At the mourning for Confucius, there came a man from Yen to see (what was done), and lodged at 3ze-hsiâ's. 3ze-hsiâ said to him, ‘If it had been for the sage's conducting a burial, (there would have been something worthy to see); but what is there to see in our burying of the sage? Formerly the Master made some remarks to me, saying, “I have seen some mounds made like a raised hall; others like a dyke on a river's bank; others like the roof of a large house; and others in the shape of an axe-head.” We have followed the axe-shape, making what is called the horse-mane mound. In one day we thrice shifted the frame-boards, and completed the mound. I hope we have carried out the wish of the Master.’

27. Women (in mourning) do not (change) the girdle made of dolichos fibre.

28. When new offerings (of grain or fruits) are presented (beside the body in the coffin), they should be (abundant), like the offerings on the first day of the moon.

29. When the interment has taken place, everyone should make a change in his mourning dress.

30. The gutters of the tent-like frame over the coffin should be like the double gutters of a house.

31. When a ruler succeeds to his state, he makes

his coffin, and thereafter varnishes it once a year, keeping it deposited away.

32. Calling the departed back ; plugging the teeth open ; keeping the feet straight ; filling the mouth ; dressing the corpse ; and curtaining the hall :— these things are set about together. The uncles and elder cousins give their charges to those who are to communicate the death (to friends).

33. The (soul of a deceased) ruler is called back in his smaller chambers, and the large chamber ; in the smaller ancestral temples and in the great one ; and at the gate leading to the court of the external audience, and in the suburbs all round.

34. Why do they leave the offerings of the mourning rites uncovered ? May they do so with the flesh of sacrifice¹?

35. When the coffining has taken place, in ten days after, provision should be made for the materials (for the shell), and for the vessels to the eye of fancy.

36. The morning offerings should be set forth (beside the body) at sunrise ; the evening when the sun is about to set.

37. In mourning for a parent, there is no restriction to (set) times for wailing. If one be sent on a mission, he must announce his return (to the spirits of his departed).

38. After the twelfth month of mourning, the (inner) garment should be of white silk, with a yellow

¹ This short paragraph is difficult to construe. The *K'ien-lung* editors seem to approve of another interpretation of it ; but even that is not without its difficulties. The flesh of sacrifice, it is said, left uncovered, would become unfit for use or to be sold.

lining, and having the collar and the edges of the cuffs of a light purple. The waist-band should be of dolichos cloth; the shoes of hempen string, without the usual ornaments at the points; and the ear-plugs of horn. The lining of the deer's-fur (for winter) should be made broader and with longer cuffs, and a robe of thin silk may be worn over it¹.

39. When (a parent's) corpse has been coffined, if the son hear of mourning going on for a cousin at a distance, he must go (to condole), though the relationship would only require the three months' mourning. If the mourning be for a neighbour, who is not a relative, he does not go.

At (the mourning) for an acquaintance, he must pay visits of condolence to all his brethren, though they might not have lived with him. *

40. The coffin of the son of Heaven is fourfold. The hides of a water-buffalo and a rhinoceros, overlapping each other, (form the first), three inches in thickness. Then there is a coffin of Î wood², and there are two of the Rottlera. The four are all complete enclosures. The bands for the (composite) coffin are (five); two straight, and three cross; with a double wedge under each band (where it is on the edge).

¹ The outer sackcloth remained unchanged; but inside it was now worn this robe of white silk, a good deal ornamented. Inside this and over the deer's-fur in winter might be worn another robe of thin silk, through which the fur was seen. Inside the fur was what we should call the shirt, always worn.

² Tracing the Î tree, through the dictionaries from synonym to synonym, we come at last to identify it with the 'white aspen;' whether correctly or not I do not know.

The shell is of cypress wood, in pieces six cubits long, from the trunk near the root.

41. When the son of Heaven is wailing for a feudal prince, he wears the bird's-(head) cap¹, a headband of sackcloth, and black robes. Some one says, 'He employs an officer to wail for him.' While so engaged, he has no music at his meals.

42. When the son of Heaven is put into his coffin it is surrounded with boards plastered over, and (rests on the hearse), on whose shafts are painted dragons, so as to form a (kind of) shell. Then over the coffin is placed a pall with the axe-heads figured on it. This being done, it forms a plastered house. Such is the rule for (the confining of) the son of Heaven².

43. It is only at the mourning rites for the son of Heaven that the feudal princes are arranged for the wailing according to their different surnames.

44. Duke Âi of Lû eulogised Khung K'hiû in the words, 'Heaven has not left the old man, and there is no one to assist me in my place. Oh! Alas! Nî-fû³!'

45. When a state had lost a large tract of terri-

¹ This cap, it is said, was of leather, of the dark colour of a male sparrow's head. Hence its name.

² See Book XIX.

³ Confucius' death took place on the 18th of the fourth month of duke Âi's 16th year, B. C. 479. The eulogy is given somewhat differently in the *30 Kwan* under that year: 'Compassionate Heaven vouchsafes me no comfort, and has not left me the aged man, to support me, the One man, on my seat. Dispirited I am, and full of distress. Woe is me! Alas! O Nî-fû. There is no one now to be a rule to me!' K'hiû was Confucius' name, and Kung-nî his designation! After this eulogy, Nî-fû was for a time his posthumous title.

tory with its cities, the highest and other ministers, and the Great and other officers, all wailed in the grand ancestral temple, in mourning caps, for three days; and the ruler (for the same time) had no full meal with music. Some one says, 'The ruler has his full meals and music, but wails at the altar to the spirit of the land.'

46. Confucius disliked those who wailed in the open fields¹.

47. (A son) who has not been in office should not presume to give away anything belonging to the family. If he should have to do so², he ought to have the order of his father or elder brother for the act.

48. When the (ordinary) officers³ are all entered, then (the chief mourner and all the others) fall to their leaping, morning and evening.

49. After the service on the conclusion of the twenty-fourth month of mourning, the plain white cap is assumed. In that month the service on leaving off mourning is performed, and after another month (the mourners) may take to their music⁴.

50. The ruler may confer on any officer the small curtain (as a pall for his father's coffin).

¹ It was the rule to mourn in the open country for an acquaintance. See p. 134. There must have been some irregularity in the practice adverted to.

² That is, supposing him to have been in office; though some suppose that the necessity might arise, even in the case of a son who had not been in office.

³ Of course the higher officers must also be there. This refers to the mourning rites for a ruler.

⁴ See the note on page 130. It is difficult, notwithstanding all the references to it, to say definitely in what month the than sacrifice was performed.

SECTION II. PART I.

1. (At the funeral of) a ruler's eldest son by his acknowledged wife, who has died under age, there are three (small) carriages (with the flesh of sacrifice to be put in the grave). At that of an eldest son by one of his concubines, dying under age, there is one such carriage; as at the funeral of the eldest rightful son of a Great officer in the same circumstances¹.

2. At the mourning rites for a feudal lord, his chief officers who had received their appointments directly from him, carried their staffs.

3. When a Great officer of a state was about to be buried, its ruler (went to) condole with (his son) in the hall where the coffin was. When it was

¹ This refers to a strange custom which was practised at the burial of men of rank, or of others who were treated as such, as in the cases here. 'The carriages employed in it,' says Ying-tâ, 'were very small. When the funeral car was about to set off from the temple, and all to be done at the grave was arranged, they took portions of the bodies which had supplied the offerings put down by the coffin, broke them in small pieces, wrapped them up, and placed them in these carriages, to be conveyed after the car. At the grave the little bundles were placed one by one, inside the outer shell at its four corners.' The number of these small carriages varied according to the rank of the deceased. We shall find the practice mentioned again and again. It is not easy for a foreigner fully to understand it, and I have found great haziness in the attempts of native scholars to explain it. 'The eldest sons' would have died between sixteen and nineteen.

being taken out, he ordered some one to draw the (bier-carriage) for him. This moved on for three paces and stopped; in all for three times; after which the ruler retired. The same proceeding was gone through, when the bier entered the ancestral temple, and also at the place of (special) grief¹.

4. Men of fifty, who had no carriage, did not make visits of condolence beyond the boundaries (of their states).

5. When K'î Wû-ze was lying ill in his chamber, K'iao K'û entered and appeared before him without taking off the mourning with its even edges (which he happened to wear). 'This practice,' said he, 'has nearly fallen into disuse. But it is only at the gate of the ruler that an officer should take off such mourning as I have on.' Wû-ze replied, 'Is it not good that you should act thus²? A superior man illustrates the smallest points (of propriety).'

At the mourning rites for Wû-ze, Ǵǵng Tien leant against his gate and sang³.

6. If a Great officer pay a visit of condolence

¹ Where visitors had been lodged during the mourning rites, outside the great gate.

² Wû-ze was the posthumous title of K'î-sun Suh, the principal minister of Lî in the time of duke Hsiang (B.C. 572-543). He was arrogant, and made other officers pay to him the same observances as to the ruler; but he was constrained to express his approval of the bold rectitude of K'iao.

³ This is added by the writer, and implies a condemnation of Ǵǵng Tien, who did not know how to temper his censure of the minister, as K'iao K'û had done. But there must be an error in the passage. Tien (the father of Ǵǵng Shǵn) could have been but a boy when Wû-ze died.

(to an ordinary officer), and he arrive when (the latter) is occupied with the business of the occasion, an apology is made (for not coming to the gate to receive him).

7. When one has paid a visit of condolence, he should not on the same day show manifestations of joy¹.

8. A wife should not go beyond the boundaries of the state on a visit of condolence.

9. On the day when he has made a visit of condolence, one should not drink spirits nor eat flesh.

10. When one pays a visit of condolence, and the arrangements for the funeral are going on, he should take hold of the ropes (attached to the car). Those who follow to the grave should take hold of those attached to the coffin.

11. During the mourning rites, if the ruler send a message of condolence, there must be some one to acknowledge it, by bowing to the messenger. A friend, or neighbour, or even a temporary resident in the house, may perform the duty. The message is announced in the words:—‘Our unworthy ruler wishes to take part in your (sad) business.’ The chief mourner responds:—‘We acknowledge your presence with his message².’

12. When a ruler meets a bier on the way, he must send some one to present his condolences (to the chief mourner).

¹ Or it may be, ‘should not have music;’ toning one of the characters differently.

² It is supposed that the deceased had left no son to preside at the mourning rites.

13. At the mourning rites for a Great officer, a son by an inferior wife should not receive the condolences¹.

14. On the death of his wife's brother who was the successor of their father, (the husband) should wail for him in (the court of) the principal chamber². He should appoint his (own) son to preside (on the occasion). With breast unbared and wearing the cincture instead of the cap, he wails and leaps. When he enters on the right side of the gate, he should make some one stand outside it, to inform comers of the occasion of the wailing; and those who were intimate (with the deceased) will enter and wail. If his own father be in the house, the wailing should take place (before) his wife's chamber. If (the deceased) were not the successor of his father, the wailing should take place before a different chamber.

15. If a man have the coffin of a parent in his hall, and hear of mourning going on for a cousin of the same surname at a distance, he wails for him in a side apartment. If there be no such apartment, he should wail in the court on the right of the gate. If the deceased's body be in the same state, he should go to the place, and wail for him there.

16. When 3ze-kang died, 3äng-ze was in mourning for his mother, and went in his mourning dress

¹ But if there be no son by the wife proper, the oldest son by an inferior wife may receive the condolences. See the *Khien-lung* editors in loc.

² For some reason or other he has not gone to the house of the deceased, to wail for him there.

to wail for him. Some one said, 'That dress of sackcloth with its even edges is not proper for a visit of condolence.' ㄆㄤˋ-ㄓㄟ replied, 'Am I condoling (with the living)?'

17. At the mourning rites for Yü Zo, duke Táo¹ came to condole. ㄆㄤˋ-yü received him, and introduced him by (the steps on) the left².

18. When the news was sent from K'hi of the mourning for the king's daughter who had been married to the marquis, duke Kwang of Lü wore the nine months' mourning for her. Some have said, 'She was married from Lü³'; therefore he wore the same mourning for her as for a sister of his own.' Others have said, 'She was his mother's mother, and therefore he wore it.'

19. At the mourning rites for duke Hsien of Jin, duke Mû of K'hi sent a messenger to present his condolences to Hsien's son K'hung-r (who was then an exile), and to add this message:—'I have heard that a time like this is specially adapted to the

¹ B. C. 467-431. Yü Zo had been a disciple of Confucius, and here we find the greater follower of the sage, ㄆㄤˋ-yü, present and assisting at the mourning rites for him.

² That is, the prince went up to the hall by the steps on the east, set apart for the use of the master and father of the house. But the ruler was master everywhere in his state, as the king was in his kingdom. An error prevailed on this matter, and ㄆㄤˋ-yü took the opportunity to correct it.

³ That is, she had gone from the royal court to Lü, and been married thence under the superintendence of the marquis of that state, who also was of the royal surname. This was a usual practice in the marriage of kings' daughters; and it was on this account the lord of the officiating state wore mourning for them. The relationship assigned in the next clause is wrong; and so would have been the mourning mentioned, if it had been correct.

losing of a state, or the gaining of a state. Though you, my son, are quiet here, in sorrow and in mourning, your exile should not be allowed to continue long, and the opportunity should not be lost. Think of it and take your measures, my young son.' *Khung-r* reported the words to his maternal uncle Fan, who said, 'My son, decline the proffer. An exile as you are, nothing precious remains to you; but a loving regard for your father is to be considered precious. How shall the death of a father be told? And if you take advantage of it to seek your own profit, who under heaven will be able to give a good account of your conduct? Decline the proffer, my son.'

On this the prince replied to his visitor:—'The ruler has kindly (sent you) to condole with his exiled servant. My person in banishment, and my father dead, so that I cannot take any share in the sad services of wailing and weeping for him;—this has awakened the sympathy of the ruler. But how shall the death of a father be described? Shall I presume (on occasion of it) to think of any other thing, and prove myself unworthy of your ruler's righteous regard?' With this he laid his head to the ground, but did not bow (to the visitor); wailed and then arose, and after he had risen did not enter into any private conversation with him.

3ze-hsien reported the execution of his commission to duke Mû, who said, 'Truly virtuous is this prince *Khung-r*. In laying his forehead on the ground and not bowing (to the messenger), he acknowledged that he was not his father's successor, and therefore he did not complete the giving of thanks. In wailing before he rose, he showed how

he loved his father. In having no private conversation after he arose, he showed how he put from him the thought of gain¹.

20. The keeping the curtain up before the coffin with the corpse in it was not a custom of antiquity. It originated with the wailing of *King Kiang* for *Mû-po*².

21. The rites of mourning are the extreme expression of grief and sorrow. The graduated reduction of that expression in accordance with the natural changes (of time and feeling) was made by the superior men, mindful of those to whom we owe our being³.

22. Calling (the soul) back is the way in which love receives its consummation, and has in it the mind which is expressed by prayer. The looking for it to return from the dark region is a way of seeking for it among the spiritual beings. The turning the face to the north springs from the idea of its being in the dark region.

23. Bowing to the (condoling) visitor, and laying the forehead on the ground are the most painful demonstrations of grief and sorrow. The laying the forehead in the ground is the greatest expression of the pain (from the bereavement).

¹ Fully to understand this paragraph, one must know more particulars of the history of *Khung-r*, and his relations with his father and the duke of *K'in*, than can be given here in a note. He became the ablest of the five chiefs of the *K'un K'hiu* period.

² This was a prudish action of the young widow, but it changed an old custom and introduced a new one.

³ This has respect to the modifications adopted in regulating the mourning rites for parents.

24. Filling the mouth with rice uncooked and fine shells arises from a feeling which cannot bear that it should be empty. The idea is not that of giving food; and therefore these fine things are used.

25. The inscription¹ forms a banner to the eye of fancy. Because (the person of) the deceased can no longer be distinguished, therefore (the son) by this flag maintains the remembrance of him. From his love for him he makes this record. His reverence for him finds in this its utmost expression.

26. The first tablet for the spirit (with this inscription on it) serves the same purpose as that (subsequently) placed in the temple, at the conclusion of the mourning rites. Under the Yin dynasty the former was still kept. Under the *K'au*, it was removed¹.

27. The offerings to the unburied dead are placed in plain unornamented vessels, because the hearts

¹ This inscription contained the surname, name, and rank of the deceased. It was at first written, I suppose, on a strip of silk, and fastened up under the eaves above the steps on the east. In the meantime a tablet of wood called *K'ung*, the first character in the next paragraph, and for which I have given 'The first tablet for the spirit,' was prepared. The inscription was transferred to it, and it was set up on or by the coffin, now having the body in it, and by and by it was removed to the east of the coffin pit, where it remained till after the interment.

The observances in this paragraph and the next remain substantially the same at the present day. 'The bier,' writes Wang Tháo, 'is placed in the apartment, and the tablet with the inscription, as a resting-place for the spirit, is set up, while the offerings are set forth near it morning and evening. After the interment this tablet is burned, and the permanent tablet (神主) is made, before which the offerings are presented at the family sacrifices from generation to generation. Thus "the dead are served as the living have been."'

of the living are full of unaffected sorrow. It is only in the sacrifices (subsequent to the interment), that the principal mourner does his utmost (in the way of ornament). Does he know that the spirit will enjoy (his offerings)? He is guided only by his pure and reverent heart.

28. Beating the breast (by the women), and leaping (by the men) are extreme expressions of grief. But the number of such acts is limited. There are graduated rules for them.

29. Baring the shoulders and binding up the hair (with the band of sackcloth) are changes, (showing) the excited feeling which is a change in the grief. The removal of the (usual) ornaments and elegancies (of dress) has manifold expression, but this baring of the shoulders and the sackcloth band are the chief. But now the shoulders are quite bared, and anon they are covered (with a thin garment);—marking gradations in the grief.

30. At the interment they used the cap of plain white (silk), and the headband of dolichos fibre; thinking these more suitable for their intercourse with (the departed) now in their spirit-state. The feeling of reverence had now arisen. The people of Kâu use the pien cap at interments; those of Yin used the hsü¹.

¹ The 'Three Rituals Explained' (三禮通釋), ch. 238, give the figures of these caps thus:—

31. The gruel of the chief mourner (the son), the presiding wife¹, and the steward of the family (of a Great officer) is taken by them at the order of the ruler lest they should get ill.

32. On returning (from the grave) to wail, (the son) should ascend the hall (of the ancestral temple);—returning to the place where (the deceased) performed his rites. The presiding wife should enter the chamber;—returning to the place where he received his nourishment.

33. Condolences should be presented (to the son) when he returns (from the grave) and is wailing, at which time his grief is at its height. He has returned, and (his father) is not to be seen; he feels that he has lost him. (His grief is) then most intense. Under the Yin, they presented condolences immediately at the grave; under the K'áu, when the son had returned and was wailing. Confucius said, 'Yin was too blunt; I follow K'áu.'

34. To bury on the north (of the city), and with the head (of the dead) turned to the north, was the common practice of the three dynasties:—because (the dead) go to the dark region.

35. When the coffin has been let down into the grave, the chief mourner presents the (ruler's) gifts (to the dead in the grave²), and the officer of prayer (returns beforehand) to give notice of the sacrifice of repose³ to him who is to personate the departed.

¹ This would be the wife of the deceased, or the wife of his son.

² These were some rolls of purplish silks, sent by the ruler as his parting gifts, when the hearse-car reached the city gate on its way to the grave.

³ Where was the spirit of the departed now? The bones and

36. When he has returned and wailed, the chief mourner with the (proper) officer inspects the victim. (In the meantime other) officers have set out a stool and mat with the necessary offerings on the left of the grave¹. They return, and at midday the sacrifice of repose is offered².

37. The sacrifice is offered on the day of interment; they cannot bear that the departed should be left a single day (without a place to rest in).

38. On that day the offerings, (previously) set forth (by the coffin), are exchanged for the sacrifice of repose. The (continuous) wailing is ended, and they say, 'The business is finished.'

39. On that day the sacrifices of mourning were exchanged for one of joy. The next day the service of placing the spirit-tablet of the departed next to that of his grandfather was performed.

40. The change to an auspicious sacrifice took place on that day, and the placing the tablet in its place on the day succeeding:—(the son) was unable

flesh had returned to the dust, but the soul-spirit might be anywhere (魂魄氣無所不之 [= 至]). To afford it a resting-place, the permanent tablet was now put in the shrine, and this sacrifice of repose (虞 [= 安] 祭) was offered, so that the son might be able to think that his father was never far from him. For a father of course the personator was a male; for a mother, a female; but there are doubts on this point.

¹ For the spirit of the ground.

² If the grave were too far distant to allow all this to be transacted before midday, then the sacrifice was performed in the chamber where the coffin had rested. So says Wang Tháo on the authority of Zǎn Yì-shǎng (任翼聖).

to bear that (the spirit of the departed) should be a single day without a resting-place.

41. Under the Yin, the tablet was put in its place on the change of the mourning at the end of twelve months; under the *Kâu*, when the (continuous) wailing was over. Confucius approved the practice of Yin.

42. When a ruler went to the mourning rites for a minister, he took with him a sorcerer with a peach-wand, an officer of prayer with his reed-(brush), and a lance-bearer,—disliking (the presence of death), and to make his appearance different from (what it was at any affair of) life¹. In the mourning rites it is death that is dealt with, and the ancient kings felt it difficult to speak of this².

43. The ceremony in the mourning rites of (the coffined corpse) appearing in the court (of the ancestral temple) is in accordance with the filial heart of the deceased. He is (supposed to be) grieved at leaving his chamber, and therefore he is brought to the temple of his fathers, and then (the coffin) goes on its way.

Under the Yin, the body was thus presented and then coffined in the temple; under the *Kâu* the interment followed immediately after its presentation (in the coffin).

44. Confucius said, 'He who made the vessels

¹ When visiting a minister when alive, the ruler was accompanied by the lance-bearer, but not by those other officers;—there was the difference between life and death.

² I suspect that the sorcerer and exorcist were ancient superstitions, not established by the former kings, but with which they did not care to interfere by saying anything about them.

which are so (only) in imagination, knew the principles underlying the mourning rites. They were complete (to all appearance), and yet could not be used. Alas! if for the dead they had used the vessels of the living, would there not have been a danger of this leading to the interment of the living with the dead?’

45. They were called ‘vessels in imagination,’ (the dead) being thus treated as spiritual intelligences. From of old there were the carriages of clay and the figures of straw,—in accordance with the idea in these vessels in imagination. Confucius said that the making of the straw figures was good, and that the making of the (wooden) automaton was not benevolent.—Was there not a danger of its leading to the use of (living) men?

PART II.

1. Duke Mû¹ asked 3ze-sze whether it was the way of antiquity for a retired officer still to wear the mourning for his old ruler. ‘Princes of old,’ was the reply, ‘advanced men and dismissed them equally according to the rules of propriety; and hence there was that rule about still wearing mourning for the old ruler. But nowadays princes advance men as if they were going to take them on their knees, and dismiss them as if they were going to push them into an abyss. Is it not good if (men so treated) do not head rebellion? How should there be the observance of that rule about still wearing mourning (for old rulers)?’

¹ Of Lû, B. C. 409-377.

2. At the mourning rites for duke Tào¹, Kî Kào-ze asked Măng K'ing-ze what they should eat (to show their grief) for the ruler. K'ing-ze replied, 'To eat gruel is the general rule for all the kingdom.' (The other said), 'It is known throughout the four quarters that we three ministers² have not been able to live in harmony with the ducal house. I could by an effort make myself emaciated; but would it not make men doubt whether I was doing so in sincerity? I will eat rice as usual.'

3. When Sze-thû K'ing-ze of Wei died, Ze-hsiâ made a visit of condolence (to his house); and, though the chief mourner had not completed the slight dressing (of the corpse), he went in the head-band and robe of mourning. Ze-yû paid a similar visit; and, when the chief mourner had completed the slight dressing, he went out, put on the bands, returned and wailed. Ze-hsiâ said to him, 'Did you ever hear (that) that (was the proper method to observe)?' 'I heard the Master say,' was the reply, 'that until the chief mourner had changed his dress, one should not assume the mourning bands³.'

4. Jǎng-ze said, 'An-ze may be said to have known well the rules of propriety;—he was humble and reverent.' Yû Zo said, 'An-ze wore the same (robe of) fox-fur for thirty years. (At the burial of

¹ B. C. 467-431.

² The heads of the Kung-sun, Shû-sun, and Kî-sun families; whose power Confucius had tried in vain to break.

³ In this case Ze-yû was correct, according to rule, following the example of the chief mourner. Sze-thû was a name of office, —the ministry of Instruction; but it had become in this case the family name; from some ancestor of K'ing-ze, who had been minister of Instruction.

his father), he had only one small carriage (with the offerings to be put into the grave¹); and he returned immediately from the grave (without showing the usual attentions to his guests). The ruler of a state has seven bundles of the offerings, and seven such small carriages for them, and a Great officer five. How can it be said that An-ze knew propriety?' ǰǎng-ze replied, 'When a state is not well governed, the superior man is ashamed to observe all ceremonies to the full. Where there is extravagance in the administration of the state, he shows an example of economy. If the administration be economical, he shows an example of (the strict) observance of all rules.'

5. On the death of the mother of Kwo K'ao-ze, he asked ǰze-kang, saying, 'At the interment, when (all) are at the grave, what should be the places of the men and of the women?' ǰze-kang said, 'At the mourning rites for Sze-thû K'ing-ze, when the Master directed the ceremonies, the men stood with their faces to the west and the women stood with theirs to the east.' 'Ah!' said the other, 'that will not do;' adding, 'All will be here to see these mourning rites of mine. Do you take the sole charge of them. Let the guests be the guests, while I (alone) act as the host. Let the women take their places behind the men, and all have their faces towards the west².'

¹ See the note on paragraph 1, page 161. An-ze was the chief minister of K'hi.

² 'The master' here would seem to be Confucius; and yet he died before Sze-thû K'ing-ze. There are other difficulties in parts of the paragraph.

6. At the mourning for Mû-po (her husband), Kíng Kíang wailed for him in the daytime, and at that for Wăn-po (her son), she wailed for him both in the daytime and the night. Confucius said, 'She knows the rules of propriety¹.'

At the mourning for Wăn-po, Kíng Kíang (once) put her hand on the couch (where his body lay), and without wailing said, 'Formerly, when I had this son, I thought that he would be a man of worth. (But) I never went with him to the court (to see his conduct there); and now that he is dead, of all his friends, the other ministers, there is no one that has shed tears for him, while the members of his harem all wail till they lose their voices. This son must have committed many lapses in his observance of the rules of propriety!'

7. When the mother of Kí Khang-ze died, (her body was laid out with) her private clothes displayed. Kíng Kíang (Khang-ze's grand-uncle's wife) said, 'A wife does not dare to see her husband's parents without the ornament (of her upper robes); and there will be the guests from all quarters coming;—why are her under-clothes displayed here?' With this she ordered them to be removed.

8. Yû-ze and Ze-yû were standing together when they saw (a mourner) giving all a child's demonstrations of affection. Yû-ze said, 'I have never understood this leaping in mourning, and have long wished to do away with it. The sincere feeling (of sorrow) which appears here is right, (and

¹ It is said, 'She mourned for her husband according to propriety; for her son according to her feelings.'

should be sufficient).’ 3ze-yû replied, ‘In the rules of propriety, there are some intended to lessen the (display of) feeling, and there are others which purposely introduce things (to excite it). To give direct vent to the feeling and act it out as by a short cut is the way of the rude Zung and Tî. The method of the rules is not so. When a man rejoices, he looks pleased; when pleased, he thereon sings; when singing, he sways himself about; swaying himself about, he proceeds to dancing; from dancing, he gets into a state of wild excitement¹; that excitement goes on to distress; distress expresses itself in sighing; sighing is followed by beating the breast; and beating the breast by leaping. The observances to regulate all this are what are called the rules of propriety.

‘When a man dies, there arises a feeling of disgust (at the corpse). Its impotency goes on to make us revolt from it. On this account, there is the wrapping it in the shroud, and there are the curtains, plumes (and other ornaments of the coffin), to preserve men from that feeling of disgust. Immediately after death, the dried flesh and pickled meats are set out (by the side of the corpse). When the interment is about to take place, there are the things sent and offered (at the grave); and after the interment, there is the food presented (in the sacrifices of repose). The dead have never been seen to partake of these things. But from

¹ Evidently there is a lacuna in the text here; there should be some mention of stamping. Many of the critics have seen this, especially the *Khien-lung* editors; and various additions have been proposed by way of correction and supplement.

the highest ages to the present they have never been neglected;—all to cause men not to revolt (from their dead). Thus it is that what you blame in the rules of propriety is really nothing that is wrong in them.'

9. Wû made an incursion into *Khăn*, destroying the (places of) sacrifice, and putting to death those who were suffering from a pestilence (which prevailed). When the army retired, and had left the territory, Phî, the Grand-administrator of *Khăn*, was sent to the army (of Wû). Fû *Khâi* (king of Wû) said to his internuncius Î, 'This fellow has much to say. Let us ask him a question.' (Then, turning to the visitor), he said, 'A campaign must have a name. What name do men give to this expedition?' The Grand-administrator said, 'Anciently, armies in their incursions and attacks did not hew down (trees about the) places of sacrifice; did not slay sufferers from pestilence; did not make captives of those whose hair was turning. But now, have not you in this campaign slain the sufferers from pestilence? Do they not call it the sick-killing expedition?' The king rejoined, 'If we give back your territory, and return our captives, what will you call it?' The reply was, 'O ruler and king, you came and punished the offences of our poor state. If the result of the campaign be that you now compassionate and forgive it, will the campaign be without its (proper) name¹?'

¹ This incursion must be that mentioned in the 30 *Kwan* under B. C. 494. Various corruptions and disruptions of the text of the paragraph have to be rectified, however; and the interpretation is otherwise difficult.

10. Yen Ting¹ deported himself skilfully during his mourning. Immediately after the death (of his father), he looked grave and restless, as if he were seeking for something, and could not find it. When the coffining had taken place, he looked expectant, as if he were following some one and could not get up with him. After the interment he looked sad, and as if, not getting his father to return (with him), he would wait for him².

11. 3ze-kang asked, saying, 'The Book of History says, that Káo 3ung for three years did not speak; and that when he did his words were received with joy³. Was it so?' Kung-nt replied, 'Why should it not have been so? Anciently, on the demise of the son of Heaven, the king, his heir, left everything to the chief minister for three years.'

12. When Kih Táo-3ze died⁴, before he was buried, duke Phing was (one day) drinking along with the music-master Kwang and Lí Thiáo. The bells struck up; and when Tû Khwái, who was coming in from outside, heard them, he said, 'Where is the music?' Being told that it was in the (principal) apartment, he entered it; and having ascended the steps one by one, he poured out a cup of spirits, and said, 'Kwang, drink this.' He then poured out another, and said, 'Thiáo, drink this.' He poured out a third cup; and kneeling in the hall, with his face to the north, he drank it himself, went down the steps, and hurried out.

¹ An officer of Lú.

² Compare above, paragraph 17, p. 137 et al.

³ See vol. iii, p. 113. The Shû is not quoted exactly.

⁴ This was in B. C. 533. Kih Táo-3ze was a great officer of Jin. See the story in the 3o Kwan under that year.

Duke Phing called him in again, and said, 'Khwâi, just now I thought you had something in mind to enlighten me about, and therefore I did not speak to you. Why did you give the cup to Kwang?' 'On the days (*Kiâ-*)*ze* and (*Kt-*)*máo*,' was the reply, 'there should be no music; and now *Kih Táo-ze* is (in his coffin) in his hall, and this should be a great *ze* or *máo* day. Kwang is the grand music-master, and did not remind you of this. It was on this account that I made him drink.'

'And why did you give a cup to *Thiáo*?' *Tû Khwâi* said, '*Thiáo* is your lordship's favourite officer; and for this drinking and eating he forgot the fault you were committing. It was on this account I made him drink.'

'And why did you drink a cup yourself?' *Khwâi* replied, 'I am (only) the cook; and neglecting my (proper work of) supplying you with knives and spoons, I also presumed to take my part in showing my knowledge of what should be prohibited. It was on this account that I drank a cup myself.'

Duke Phing said, 'I also have been in fault. Pour out a cup and give it to me.' *Tû Khwâi* then rinsed the cup, and presented it. The duke said to the attendants, 'When I die, you must take care that this cup is not lost.' Down to the present day, (at feasts in *3in*), when the cups have been presented all round, they then raise up this cup, and say, 'It is that which *Tû* presented.'

13. When *Kung-shû Wăn-ze* died, his son *Shû* begged the ruler (of the state) to fix his honorary title, saying, 'The sun and moon have brought the time;—we are about to bury him. I beg that you will fix the title, for which we shall change his name.'

The ruler said, 'Formerly when our state of Wei was suffering from a severe famine, your father had gruel made, and gave it to the famishing ;—was not this a proof of how kind he was? Moreover, in a time of trouble¹, he protected me at the risk of his own life ;—was not this a proof of how faithful he was? And while he administered the government of Wei, he so maintained the regulations for the different classes, and conducted its intercourse with the neighbouring states all round, that its altars sustained no disgrace ;—was not this a proof of how accomplished he was? Therefore let us call him "The Faithful, Kind, and Accomplished."' "

14. Shih Tâi-kung died, leaving no son by his wife proper, and six sons by concubines. The tortoise-shell being consulted as to which of them should be the father's successor, it was said that by their bathing and wearing of their girdle-pendants the indication would be given. Five of them accordingly bathed and put on the girdle-pendants with their gems. Shih Kht-ze, however, said, 'Whoever, being engaged with the mourning rites for a parent, bathed his head or his body, and put on his girdle-pendants?' and he declined to do either, and this was considered to be the indication. The people of Wei considered that the tortoise-shell had shown a (true) knowledge.

15. Kăn 3ze-kü having died in Wei, his wife and the principal officer of the family consulted together

¹ This was in B. C. 512. Twice in the Analects (XIV, 14, 19) Kung-shuh Wân-ze, 'Kung-shu, the accomplished,' is mentioned. Whether he received the long honorary title given in the conclusion of this paragraph is considered doubtful.

about burying some living persons (to follow him). When they had decided to do so, (his brother), *Khân 3ze-khang* arrived¹, and they informed him about their plan, saying, 'When the master was ill, (he was far away) and there was no provision for his nourishment in the lower world; let us bury some persons alive (to supply it).' 3ze-khang said, 'To bury living persons (for the sake of the dead) is contrary to what is proper. Nevertheless, in the event of his being ill, and requiring to be nourished, who are so fit for that purpose as his wife and steward? If the thing can be done without, I wish it to be so. If it cannot be done without, I wish you two to be the parties for it.' On this the proposal was not carried into effect.

16. 3ze-lû said, 'Alas for the poor! While (their parents) are alive, they have not the means to nourish them; and when they are dead, they have not the means to perform the mourning rites for them.' Confucius said, 'Bean soup, and water to drink, while the parents are made happy, may be pronounced filial piety. If (a son) can only wrap the body round from head to foot, and inter it immediately, without a shell, that being all which his means allow, he may be said to discharge (all) the rites of mourning.'

17. Duke Hsien of Wei having (been obliged to) flee from the state, when he returned², and had

¹ *Khân 3ze-khang* was one of the disciples of Confucius, mentioned in the *Analects* I, 10; VII, 25. It is difficult to follow the reasoning of the wife and steward in justification of their proposals.

² Duke Hsien fled from Wei in B.C. 559, and returned to it in 547.

reached the suburbs (of the capital), he was about to grant certain towns and lands to those who had attended him in his exile before entering. Liû Kwang said, 'If all had (remained at home) to guard the altars for you, who would have been able to follow you with halter and bridle? And if all had followed you, who would have guarded the altars? Your lordship has now returned to the state, and will it not be wrong for you to show a partial feeling?' The intended allotment did not take place.

18. There was the grand historiographer of Wei, called Liû Kwang, lying ill. The duke said¹, 'If the illness prove fatal, though I may be engaged at the time in sacrificing, you must let me know.' (It happened accordingly, and, on hearing the news), the duke bowed twice, laying his head to the ground, and begged permission from the personator of the dead, saying, 'There was the minister Liû Kwang,—not a minister of mine (merely), but a minister of the altars of the state. I have heard that he is dead, and beg leave to go (to his house).' On this, without putting off his robes, he went; and on the occasion presented them as his contribution (to the mourning rites). He also gave the deceased the towns of *Khiû-shih* and *Hsien-fan-shih* by a writing of assignment which was put into the coffin, containing the words:—'For the myriads of his descendants, to hold from generation to generation without change.'

19. When *Khân Kan-hsi* was lying ill, he assembled his brethren, and charged his son *Jun-êi*,

¹ The same duke Hsien of Wei. *Khân Hào* and others condemn his action in this case. Readers may not agree with them.

saying, 'When I am dead, you must make my coffin large, and make my two concubines lie in it with me, one on each side.' When he died, his son said, 'To bury the living with the dead is contrary to propriety; how much more must it be so to bury them in the same coffin!' Accordingly he did not put the two ladies to death.

20. Kung Sui died in *K'ui*; and on the next day, which was *Zăn-wû*, the sacrifice of the previous day was notwithstanding repeated (in the capital of *Lû*). When the pantomimes entered, however, they put away their flutes. Kung-nî said, 'It was contrary to rule. When a high minister dies, the sacrifice of the day before should not be repeated¹.'

21. When the mother of *K'î Khang-ze* died, Kung-shû Zo was still young. After the dressing², Pan asked leave to let the coffin down into the grave by a mechanical contrivance. They were about to accede, when Kung-ên *Kiâ* said, 'No. According to the early practice in Lu, the ducal house used (for this purpose) the arrangement looking like large stone pillars, and the three families that like large wooden columns. Pan, you would, in the case of another man's mother, make trial of your ingenuity;—could you not in the case of your own mother do so? Would that distress you? Bah!' They did not allow him to carry out his plan³.

¹ See this incident in the Chinese Classics, V, i, pp. 301, 302, where the account of it is discussed in a note.

² This must be the greater dressing.

³ Pan and Zo were probably the same man; but we know that Pan lived at a later period. The incident in this paragraph therefore is doubted.

22. During the fight at Lang¹, Kung-shu Zü-zǎn saw (many of) the men, carrying their clubs on their shoulders, entering behind the shelter of the small wall, and said, 'Although the services required of them are distressing, and the burdens laid on them heavy, (they ought to fight); but though our superiors do not form (good) plans, it is not right that soldiers should not be prepared to die. This is what I say.' On this along with Wang Í, a youth, (the son) of a neighbour, he went forward, and both of them met their death.

The people of Lû wished to bury the lad Wang Í not as one who had died prematurely, and asked Kung-ní about the point. He said, 'As he was able to bear his shield and spear in the defence of our altars, may you not do as you wish, and bury him as one who has not died prematurely?'

23. When 3ze-lû was going away from Lû, he said to Yen Yüan, 'What have you to send me away with?' 'I have heard,' was the reply, 'that, when one is leaving his state, he wails at the graves (of his fathers), and then takes his journey, while on his return to it, he does not wail, but goes to look at the graves, and (then) enters (the city).' He then said to 3ze-lû, 'And what have you to leave with me here?' 'I have heard,' was the reply, 'that, when you pass by a grave, you should bow forward to the cross-bar, and, when you pass a place of sacrifice, you should dismount.'

24. Shang Yang, director of Works (in *K'û*), and

¹ The fight at Lang is mentioned in the *K'un K'hiu* under B. C. 484. 3o's description of the battle gives the incident mentioned here, but somewhat differently.

*Khăn K'hi-k'î*¹ were pursuing the army of Wû, and came up with it. The latter said to Shang Yang, 'It is the king's² business. It will be well for you to take your bow in hand.' He did so, and *K'hi-k'î* told him to shoot, which he did, killing a man, and returning immediately the bow to its case. They came up with the enemy again, and being told as before to shoot, he killed other two men; whenever he killed a man, he covered his eyes. Then stopping the chariot, he said, 'I have no place at the audiences; nor do I take part in the feasts. The death of three men will be sufficient for me to report.' Confucius said, 'Amidst his killing of men, he was still observant of the rules of propriety³.'

25. The princes were engaged in an invasion of *K'hin*, when duke Hwan of *Zhào* died at their meeting⁴. The others asked leave to (see) the plugging of his teeth with the jade, and they were made to enshroud (his corpse)⁵.

Duke Hsiang being in attendance at the court of King, king Khang died⁶. The people of King said to him, 'We must beg you to cover (the corpse

¹ *K'hi-k'î* was a son of the king of *K'ho*, and afterwards became king Phing. *K'ho*, in B. C. 534, reduced *Khăn* to be a dependency of itself, and put it under *K'hi-k'î*, who became known as *K'hi-k'î* of *Khăn*.

² 'The king's business;' that is, the business of the count of *K'ho*, who had usurped the title of king.

³ It is not easy to discover the point of Confucius' reply. Even *Ze-lû* questioned him about it (as related in the Narratives of the School), and got an answer which does not make it any clearer.

⁴ In B. C. 578.

⁵ Probably by the marquis of *Shin*—duke Wăn—as 'lord of Meetings and Covenants.'

⁶ In B. C. 545.

with your gift of a robe).' The men of Lû (who were with him) said, 'The thing is contrary to propriety.' They of *Khû*, however, obliged him to do what they asked; and he first employed a sorcerer with his reed-brush to brush (and purify) the bier. The people of *King* then regretted what they had done¹.

26. At the mourning rites for duke *Khăng* of *Thăng*², *Ze-shû King-shû* was sent (from Lû) on a mission of condolence, and to present a letter (from duke *Âi*), *Ze-fû Hui-po* being assistant-commissioner. When they arrived at the suburbs (of the capital of *Thăng*), because it was the anniversary of the death of *Î-po*, (*Hui-po*'s uncle), *King-shû* hesitated to enter the city. *Hui-po*, however, said, 'We are on government business, and should not for the private affair of my uncle's (death) neglect the duke's affairs.' They forthwith entered.

PART III.

1. Duke *Âi* sent a message of condolence to *Khwâi Shang*, and the messenger met him (on the way to the grave). They withdrew to the way-side, where *Khwâi* drew the figure of his house, (with the coffin in it), and there received the condolences³.

Žang-ze said, '*Khwâi Shang*'s knowledge of the

¹ *King* was another name for *Khû*. Duke *Hsiang* went from Lû in B.C. 545; and it was in the spring of the next year, probably, that the incident occurred. The sorcerer and his reed-brush were used when a ruler went to the mourning for a minister (see Part i. 42), so that *Khû* intending to humiliate Lû was itself humiliated.

² Duke *Khăng* of *Thăng* died in B.C. 539.

³ This must have been a case for which the rule is given in Part i. 12.

rules of ceremony was not equal to that of the wife of *Khí* Liang. When duke *Kwang* fell on *Kü* by surprise at *Thui*, *Khí* Liang met his death. His wife met his bier on the way, and wailed for him bitterly. Duke *Kwang* sent a person to convey his condolences to her; but she said, 'If his lordship's officer had been guilty of any offence, then his body should have been exposed in the court or the market-place, and his wife and concubines apprehended. If he were not chargeable with any offence, there is the poor cottage of his father. This is not the place where the ruler should demean himself to send me a message¹.'

2. At the mourning rites for his young son *Tun*, duke *Âi* wished to employ the (elm-juice) sprinklers, and asked *Yû Zo* about the matter, who said that it might be done, for his three ministers even used them. *Yen Liû* said, 'For the son of Heaven dragons are painted on (the shafts of) the funeral carriage, and the boards surrounding the coffin, like the shell, have a covering over them. For the feudal princes there is a similar carriage (without the painted dragons), and the covering above. (In both cases) they prepare the elm-juice, and therefore employ sprinklers. The three ministers, not employing (such a carriage), and yet employing the sprinklers, thus appropriate a ceremony which is not suitable for them; and why should your lordship imitate them²?'

¹ See the *So Kwan*, under B.C. 550, the twenty-third year of duke *Hsiang*. The name of the place in the text (*To*, read *Thui* by *K'ang Hsüan*) seems to be a mistake. See the *Khang-hsi* dictionary on the character *To* (奪).

² There is a good deal of difficulty and difference of opinion in

3. After the death of the mother of (his son, who became) duke Táo, duke Âi wore for her the one year's mourning with its unfrayed edges. Yû Zo asked him, if it was in rule for him to wear that mourning for a concubine. 'Can I help it?' replied the duke. 'The people of Lô will have it that she was my wife.'

4. When Kî 3ze-káo buried his wife, some injury was done to the standing corn, which Shăn-hsiang told him of, begging him to make the damage good. 3ze-káo said, 'The Măng has not blamed me for this, and my friends have not cast me off. I am here the commandant of the city. To buy (in this manner a right of) way in order to bury (my dead) would be a precedent difficult to follow¹.'

5. When one receives no salary for the official duties which he performs², and what the ruler sends to him is called 'an offering,' while the messenger charged with it uses the style of 'our unworthy ruler;' if such an one leave the state, and afterwards the ruler dies, he does not wear mourning for him.

6. At the sacrifice of Repose a personator of the

the interpretation of this paragraph. According to the common view, the funeral carriage used by the king and princes was very heavy, and difficult to drag along. To ease its transit, a juice was prepared from the elm bark, and sprinkled on the ground to make it slippery. But this practice was because of the heaviness of the carriage; and was not required in the case of lighter conveyances.

¹ This Kî 3ze-káo was Káo K'ái, one of the disciples of Confucius. Shăn-hsiang was the son of 3ze-kang; see paragraph 3, page 132.

² Such was 3ze-sze in Lô, and Mencius in K'hi. They were 'guests,' not ministers. Declining salary, they avoided the obligations incurred by receiving it.

dead is appointed, and a stool, with a mat and viands on it, is placed (for him). When the wailing is over, the name of the deceased is avoided. The service of him as living is over, and that for him in his ghostly state has begun. When the wailing is over, the cook, with a bell having a wooden clapper, issues an order throughout the palace, saying, 'Give up disusing the names of the former rulers, and henceforth disuse (only) the name of him who is newly deceased.' This was done from the door leading to the chambers to the outer gate.

7. When a name was composed of two characters they were not avoided when used singly. The name of the Master's mother was *Kǎng-3âi*. When he used *3âi*, he did not at the same time use *Kǎng*; nor *3âi*, when he used *Kǎng*.

8. When any sad disaster occurred to an army, (the ruler) in plain white robes wailed for it outside the *Khû* gate¹. A carriage conveying the news of such disaster carried no cover for buff-coats nor case for bows.

9. When the (shrine-)apartment of his father was burned, (the ruler) wailed for it three days. Hence it is said, 'The new temple took fire;' and also, 'There was a wailing for three days².'

10. In passing by the side of mount *Thái*, Confucius came on a woman who was wailing bitterly by a grave. The Master bowed forward to the cross-bar, and hastened to her; and then sent

¹ The *Khû* (arsenal or treasury gate) was the second of the palace gates, and near the ancestral temple. Hence the position selected for the wailing.

² See the *Khün Khiû*, under B. C. 588.

3ze-lû to question her. 'Your wailing,' said he, 'is altogether like that of one who has suffered sorrow upon sorrow.' She replied, 'It is so. Formerly, my husband's father was killed here by a tiger. My husband was also killed (by another), and now my son has died in the same way.' The Master said, 'Why do you not leave the place?' The answer was, 'There is no oppressive government here.' The Master then said (to the disciples), 'Remember this, my little children. Oppressive government is more terrible than tigers.'

11. In Lû there was one *Kâu Făng*¹, to whom duke Âi went, carrying an introductory present, and requesting an interview, which, however, the other refused. The duke said, 'I must give it up then.' And he sent a messenger with the following questions:—'(Shun), the lord of Yü, had not shown his good faith to the people, and yet they put confidence in him. The sovereign of Hsiâ had not shown his reverence for the people, and yet the people revered him:—what shall I exhibit that I may obtain such things from the people?' The reply was:—'Ruins and graves express no mournfulness to the people, and yet the people mourn (amidst them). The altars of the spirits of the land and grain and the ancestral temples express no reverence to the people, and yet the people revere them. The kings of Yin made their solemn proclamations, and yet the people began to rebel; those of *Kâu* made their covenants, and the people began to distrust them. If there be not the heart

¹ This *Kâu Făng* must have been a worthy who had withdrawn from public life.

observant of righteousness, self-consecration, good faith, sincerity, and guilelessness, though a ruler may try to knit the people firmly to him, will not all bonds between them be dissolved ?'

12. While mourning (for a father), one should not be concerned about (the discomfort of) his own resting-place¹, nor, in emaciating himself, should he do so to the endangering of his life. He should not be the former;—he has to be concerned that (his father's spirit-tablet) is not (yet) in the temple. He should not do the latter, lest (his father) should thereby have no posterity.

13. Kĭ-ze of Yen-ling² had gone to Kĕi; and his eldest son having died, on the way back (to Wû), he buried him between Ying and Po. Confucius (afterwards) said, 'Kĭ-ze was the one man in Wû most versed in the rules of propriety, so I went and saw his manner of interment. The grave was not so deep as to reach the water-springs. The grave-clothes were such as (the deceased) had ordinarily worn. After the interment, he raised a mound over the grave of dimensions sufficient to cover it, and high enough for the hand to be easily placed on it. When the mound was completed, he bared his left arm;

¹ Referring, I think, to the discomfort of the mourning shed. But other interpretations of the paragraph are to be found in Kĕn Hào's work, and elsewhere.

² This Kĭ-ze is better known as Kĭ Kĕ (季札), a brother of the ruler of Wû. Having declined the state of Wû, he lived in the principality of Yen-ling. He visited the northern states Lû, Kĕi, Jin, and the others, in B.C. 515; and his sayings and doings in them are very famous. He was a good man and able, whom Confucius could appreciate. Ying and Po were two places in Kĕi.

and, moving to the right, he went round it thrice, crying out, "That the bones and flesh should return again to the earth is what is appointed. But the soul in its energy can go everywhere; it can go everywhere." And with this he went on his way.' Confucius (also) said, 'Was not *K'î-jze* of Yen-ling's observance of the rules of ceremony in accordance with (the idea of them)?'

14. At the mourning rites for the duke Khâu of *K'û-lü*¹, the ruler of Hsü sent Yung *K'ü* with a message of condolence, and with the articles to fill the mouth of the deceased. 'My unworthy ruler,' said he, 'hath sent me to kneel and put the jade for a marquis which he has presented into your (deceased) ruler's mouth. Please allow me to kneel and do so.' The officers of *K'ü* replied, 'When any of the princes has deigned to send or come to our poor city, the observances have been kept according to their nature, whether simple and easy, or troublesome and more difficult; but such a blending of the easy and troublesome as in your case, we have not known.' Yung *K'ü* replied, 'I have heard that in the service of his ruler one should not forget that ruler, nor be oblivious of his ancestral (rules). Formerly, our ruler, king *K'ü*, in his warlike operations towards the west, in which he crossed the Ho, everywhere used this style of speech. I am a plain, blunt man, and do not presume to forget his example².'

¹ Khâu should probably be Ting. Duke Khâu lived after the period of the *K'îun K'hiû*, during which the power of Hsü had been entirely broken.

² Here was Yung *K'ü*, merely a Great officer, wishing to do what only a prince could do, according to the rules of propriety.

15. When the mother of 3ze-sze died in Wei, and news of the event was brought to him, he wailed in the ancestral temple. His disciples came to him and said, 'Your mother is dead, after marrying into another family¹; why do you wail for her in the temple of the Khung family?' He replied, 'I am wrong, I am wrong.' And thereon he wailed in one of the smaller apartments of his house.

16. When the son of Heaven died, three days afterwards, the officers of prayer² were the first to assume mourning. In five days the heads of official departments did so; in seven days both males and females throughout the royal domain; and in three months all in the kingdom.

The foresters examined the trees about the various altars, and cut down those which they thought suitable for the coffins and shell. If these did not come up to what was required, the sacrifices were abolished, and the men had their throats cut³.

17. During a great dearth in *K'hi*, *K'hiên* Áo had food prepared on the roads, to wait the approach of hungry people and give to them. (One day), there came a famished man, looking as if he could

He defends himself on the ground that the lords of Hsü claimed the title of King. The language of the officers of *K'hi* shows that they were embarrassed by his mission.

¹ Literally, 'The mother of the Shû family is dead,' but the interpretation of the text is disputed. The *K'hiên-lung* editors and many others question the genuineness of the whole paragraph.

² The officers of prayer were divided into five classes; the first and third of which are intended here. See the Official Book of *K'áu*, ch. 25.

³ Great efforts are made to explain away this last sentence.

hardly see, his face covered with his sleeve, and dragging his feet together. *Khien Ao*, carrying with his left hand some rice, and holding some drink with the other, said to him, 'Poor man! come and eat.' The man, opening his eyes with a stare, and looking at him, said, 'It was because I would not eat "Poor man come here's" food, that I am come to this state.' *Khien Ao* immediately apologised for his words, but the man after all would not take the food and died.

When *Jäng-ze* heard the circumstances, he said, 'Was it not a small matter? When the other expressed his pity as he did, the man might have gone away. When he apologised, the man might have taken the food.'

18. In the time of duke Ting of *Kû-lü*¹, there occurred the case of a man killing his father. The officers reported it; when the duke, with an appearance of dismay, left his mat and said, 'This is the crime of unworthy me!' He added, 'I have learned how to decide on such a charge. When a minister kills his ruler, all who are in office with him should kill him without mercy. When a son kills his father, all who are in the house with him should kill him without mercy. The man should be killed; his house should be destroyed; the whole place should be laid under water and reduced to a swamp. And his ruler should let a month elapse before he raises a cup to his lips.'

¹ This duke Ting became ruler of *Kû* in B.C. 613. Some interpret the paragraph as if it said that all the officers, as well as the whole family of a regicide or parricide, should be killed with him. But that cannot be, and need not be, the meaning.

19. (The ruler of) 3in having congratulated Wăn-ze on the completion of his residence, the Great officers of the state went to the house-warming¹. Kang Láo said, 'How elegant it is, and lofty! How elegant and splendid! Here will you have your songs! Here will you have your wailings! Here will you assemble the representatives of the great families of the state!' Wăn-ze replied, 'If I can have my songs here, and my wailings, and assemble here the representatives of the great families of the state, (it will be enough). I will then (only) seek to preserve my waist and neck to follow the former Great officers of my family to the Nine Plains.' He then bowed twice, laying his head also on the ground.

A superior man will say (of the two), that the one was skilful in the expression of his praise and the other in his prayer.

20. The dog kept by Kung-ní having died, he employed 3ze-kung to bury it, saying, 'I have heard that a worn-out curtain should not be thrown away, but may be used to bury a horse in; and that a worn-out umbrella should not be thrown away, but may be used to bury a dog in. I am poor and have no umbrella. In putting the dog into the grave, you can use my mat; and do not

¹ It is doubtful how this first sentence should be translated. Most naturally we should render Hsien-wăn-ze of 3in having completed his house, but binomial honorary titles were not yet known; and the view seems to be correct that this Wăn-ze was Káo Wú, a well-known minister of 3in. The 'Nine Plains' below must have been the name of a burying-place used by the officers of 3in. There seems to be an error in the name in the text, which is given correctly in paragraph 25.

let its head get buried in the earth. When one of the horses of the ruler's carriage dies, it is buried in a curtain (in good condition)¹.

21. When the mother of K'î-sun died, duke Âi paid a visit of condolence to him. (Soon after) ǰǎng-ǰze and ǰze-kung arrived for the same purpose; but the porter declined to admit them, because the ruler was present. On this they went into the stable, and adjusted their dress more fully. (Shortly) they entered the house, ǰze-kung going first². The porter said to him, 'I have already announced your arrival;' and when ǰǎng-ǰze followed, he moved on one side for him. They passed on to the inner place for the droppings from the roof, the Great officers all moving out of their way, and the duke descending a step and bowing to them. A superior man has said about the case, 'So it is when the toilet is complete! Immediately its influence extends far³.'

22. A man-at-arms at the Yang gate (of the capital of Sung) having died, ǰze-han, the superintendent of Works, went to (his house), and wailed for him bitterly. The men of ǰin who were in Sung as spies returned, and reported the thing to

¹ The concluding sentence is found also in the 'Narratives of the School,' and may have been added to the rest by the compiler of this 'Than Kung. We are not prepared for the instance which Confucius gives of his poverty; but perhaps we like him better for keeping a dog, and seeing after its burial.

² Because he was older than ǰǎng-ǰze.

³ This concluding sentence is much objected to; seeming, as it does, to attribute to their toilet what was due to the respectful demeanour of the two worthies, and their established reputation. But the text must stand as it is.

the marquis of 3in, saying, 'A man-at-arms at the Yang gate having died, 3ze-han wailed for him bitterly, and the people were pleased; (Sung), we apprehend, cannot be attacked (with success).'

When Confucius heard of the circumstances, he said, 'Skilfully did those men do their duty as spies in Sung. It is said in the Book of Poetry,—

"If there was any mourning among the people,
I did my utmost to help them."

Though there had been other enemies besides 3in, what state under the sky could have withstood one (in the condition of Sung)¹?

23. At the mourning rites for duke K'wang of Lû, when the interment was over, (the new ruler) did not enter the outer gate with his girdle of dolichos cloth. The ordinary and Great officers, when they had finished their wailing, also did not enter in their sackcloth².

24. There was an old acquaintance of Confucius, called Yüan Zang. When his mother died, the Master assisted him in preparing the shell for the coffin. Yüan (then) got up on the wood, and said, 'It is long since I sang to anything;' and (with this he struck the wood), singing:—

'It is marked like a wild cat's head;

It is (smooth) as a young lady's hand which you hold.'

The Master, however, made as if he did not hear, and passed by him.

¹ The whole narrative here is doubted. See the Shih, I. iii. Ode 10. 4. The reading of the poem, but not the meaning, is different from the text. The application is far-fetched.

² The time was one of great disorder; there may have been reasons for the violations of propriety, which we do not know.

The disciples who were with him said, 'Can you not have done with him?' 'I have heard,' was the reply, 'that relations should not forget their relationship, nor old acquaintances their friendship¹.'

25. *Kào Wăn-ze* and *Shû-yü* were looking about them at the Nine Plains², when *Wăn-ze* said, 'If these dead could arise, with whom would I associate myself?' *Shû-yü* asked, 'Would it be with *Yang Khû-fû*³?' 'He managed by his course,' was the reply, 'to concentrate in himself all the power of *Ûin*, and yet he did not die a natural death. His wisdom does not deserve to be commended.'

'Would it be with uncle *Fan*⁴?' *Wăn-ze* said, 'When he saw gain in prospect, he did not think of his ruler; his virtue does not deserve to be commended⁴. I think I would follow *Wû-ze* of *Sui*⁵. While seeking the advantage of his ruler, he did not forget himself; and while consulting for his own advantage, he was not forgetful of his friends.'

The people of *Ûin* thought that *Wăn-ze* knew men. He carried himself in a retiring way, as if he could not bear even his clothes. His speech

¹ We have another instance of Confucius's relations with *Yüan Zang* in the *Analects*, XIV, 46. He was evidently 'queer,' with a sort of craze. It gives one a new idea of Confucius to find his interest in, and kindly feeling for, such a man.

² See paragraph 19 and note.

³ Master of duke *Hsiang* B.C. 627-621, and an important minister afterwards.

⁴ See in paragraph 19, Part i. But scant measure is dealt here to 'uncle *Fan*.'

⁵ *Wû-ze* of *Sui* had an eventful life, and played an important part in the affairs of *Ûin* and *K'in* in his time. See a fine testimony to him in the *30 Kwan*, under B.C. 546.

was low and stuttering, as if he could not get his words out. The officers whom he advanced to responsible charges in the depositories of 3in were more than seventy. During his life, he had no contentions with any of them about gain, and when dying he required nothing from them for his sons.

26. Shû-kung Phî instructed (his son) 3ze-liû (in the rules of ceremony); and when he died, 3ze-liû's wife, who was a plain, blunt woman, wore for him the one year's mourning and the headband with its two ends tied together. (Phî's brother), Shû-kung K'hien spoke to 3ze-liû about it, and requested that she should wear the three months' mourning and the simple headband; saying, 'Formerly, when I was mourning for my aunts and sisters, I wore this mourning, and no one forbade it.' When he withdrew, however, (3ze-liû) made his wife wear the three months' mourning and the simple headband¹.

27. There was a man of K'häng, who did not go into mourning on the death of his elder brother. Hearing, however, that 3ze-kão was about to become governor of the city, he forthwith did so. The people of K'häng said, 'The silkworm spins

¹ Shû-kung Phî was the first of a branch of the Shû-sun clan, descended from the ruling house of Lî. The object of the paragraph seems to be to show, that 3ze-liû's wife, though a plain simple woman, was taught what to do, by her native feeling and sense, in a matter of ceremony, more correctly than the two gentlemen, mere men of the world, her husband and his uncle. The paragraph, however, is not skilfully constructed, nor quite clear. K'häng Hsüan thought that 3ze-liû was Phî's son, which, the K'hien-lung editors say, some think a mistake. They do not give definitely their own opinion.

its cocoons, but the crab supplies the box for them; the bee has its cap, but the cicada supplies the strings for it. His elder brother died, but it was 3ze-káo who made the mourning for him¹.

28. When Yo K'ang, 3ze-kun's mother, died, he was five days without eating. He then said, 'I am sorry for it. Since in the case of my mother's death, I could not eat according to my feelings, on what occasion shall I be able to do so?'

29. In a year of drought duke Mû² called to him Hsien-ze, and asked him about it. 'Heaven,' said he, 'has not sent down rain for a long time. I wish to expose a deformed person in the sun (to move its pity), what do you say to my doing so?' 'Heaven, indeed,' was the reply, 'does not send down rain; but would it not be an improper act of cruelty, on that account to expose the diseased son of some one in the sun?'

'Well then,' (said the duke), 'I wish to expose in the sun a witch; what do you say to that?' Hsien-ze said, 'Heaven, indeed, does not send down rain; but would it not be wide of the mark to hope anything from (the suffering of) a foolish woman, and by means of that to seek for rain³?'

¹ The 3ze-káo here was the same as Káo K'ái; see the note on paragraph 4. The incident here shows the influence of his well-known character. He is the crab whose shell forms a box for the cocoons, and the cicada whose antennae form the strings for the cap.

² 'Duke Mû and Hsien-ze;' see Section I. Part iii. 5.

³ In the 3o Kwan, under B. C. 639, duke Hsi of Lû makes a proposal about exposing a deformed person and a witch like that which is recorded here. Nothing is said, however, about changing the site of the market. Reference is made, however, to that

‘What do you say then to my moving the market-place elsewhere?’ The answer was, ‘When the son of Heaven dies, the market is held in the lanes for seven days; and it is held in them for three days, when the ruler of a state dies. It will perhaps be a proper measure to move it there on account of the present distress.’

30. Confucius said, ‘The people of Wei, in burying husband and wife together (in the same grave and shell), leave a space between the coffins. The people of Lû, in doing the same, place them together;—which is the better way.

APPENDIX TO BOOK II.

THE reader will have been struck by the many references in the *Than Kung* to the degrees and dress of mourning; and no other subject occupies so prominent a place in many of the books of the *Lî Kî* that follow. It is thought well, therefore, to introduce here, by way of appendix to it, the following passage from a very valuable paper on ‘Marriage, Affinity, and Inheritance in China,’ contributed, on February 8th, 1853, to the China Branch of the Royal Asiatic Society, by Mr. W. H. Medhurst, jun., now Sir Walter H. Medhurst. The information and subjoined illustrative tables were taken by him mainly from the *Ritual and Penal Code of China*, a preliminary chapter of which is devoted to the subject of ‘The Dress of Mourning:’—

‘The ideas of the Chinese as to nearness of kin, whether by

practice in a work of Tung Kung-shu (second century, B.C.), of which Wang Tháo ventures to give a geomantic explanation. The narrative in the text is probably taken from the *30 Kwan*, the compiler having forgotten the time and parties in the earlier account.

blood or marriage, differ widely from our own. They divide relationships into two classes, *Nêi k'hin* (內親) and *Wâi yin* (外因), terms analogous to our "consanguinity" and "affinity," but conveying, nevertheless, other associations than those which we attach to these words. The former (*Nêi k'hin*) comprehends all kindred derived from common stock with the individual, but only by descent through the male line; the latter (*Wâi yin*) includes what the Chinese designate *mû tang* (母黨), *k'hi tang* (妻黨), and *nü tang* (女黨), three terms best translated, perhaps, by "mother's kin," "wife's kin," and "daughter's kin," and understood by them to mean a mother's relatives, relatives of females received into one's kindred by marriage, and members of families into which one's kinswomen marry. Thus, for example, a first cousin twice removed, lineally descended from the same great-great-grandfather through the male line, is a *nêi-k'hin* relative; but a mother's parents, wife's sister, and a sister's husband or child, are all equally *wâi-yin* kindred. The principle on which the distinction is drawn appears to be, that a woman alienates herself from her own kin on marriage, and becomes a part of the stock on which she is grafted; and it will be necessary to keep this principle distinctly in mind in perusing any further remarks that may be made, as otherwise it will be found impossible to reconcile the many apparent contradictions in the theory and practice of the Chinese Code.

'The indication of the prohibited degrees (in marriage) depends then upon a peculiar genealogical disposition of the several members of a family with respect to the mourning worn for deceased relatives; and this I shall now proceed to explain. The Ritual prescribes five different kinds of mourning, called *wû fû* (五服), to be worn for all relatives within a definite proximity of degree, graduating the character of the habit in proportion to the nearness of kin. These habits are designated by certain names, which by a species of metonymy come to be

applied to the relationships themselves, and are used somewhat as we apply the terms "1st degree," "2nd degree," and so on; and plans, similar to our genealogical tables, are laid down, showing the specific habit suitable for each kinsman. The principal one of these tables, that for a married or unmarried man, comprises cousins twice removed, that is, derived by lineal descent from a common great-great-grandfather, that ancestor himself, and all relatives included within the two lines of descent from him to them; below the individual, it comprehends his own descendants (in the male line) as far as great-great-grandchildren, his brother's as far as great-grandchildren, his cousin's as far as grandchildren, and the children of his cousin once removed. In this table *nêi-k'hin* relationships will alone be found; mourning is worn for very few of the *wâi-yin*, and these, though actually, that is, in our eyes, ties of consanguinity, and deserving far more consideration than many for which a deeper habit is prescribed, are classed among the very lowest degrees of mourning.

'Six tables are given in the Ritual to which the five habits are common; they prescribe the mourning to be worn by

- 1st, A man for his kinsmen and kinswomen;
- 2nd, A wife for her husband's kinsfolk;
- 3rd, A married female for her own kinsfolk;
- 4th, A man for his mother's kinsfolk;
- 5th, A man for his wife's kinsfolk;
- 6th, A concubine for her master's kinsfolk.

'A seventh table is given, exhibiting the mourning to be worn for step-fathers and fathers by adoption, and for step- and foster-mothers, &c.; but I have not thought it necessary to encumber my paper by wandering into so remote a portion of the field.

'To render these details more easily comprehensible, I shall class the relationships in each table under their appropriate degrees of mourning, and leave the reader to examine the tables at his leisure. It need only be borne

in mind, that, excepting where otherwise specified, the relationship indicated is male, and only by descent through the male line, as, for example, that by "cousin" a father's brother's son alone is meant, and not a father's sister's son or daughter.

'The five kinds of mourning, the names of which serve, as has been said, to indicate the degrees of relationship to which they belong, are:—

1st, *Kan-jui* (斬衰), nominally worn for three years, really for twenty-seven months;

2nd, *Ze-jui* (齊衰), worn for one year, for five months, or for three months;

3rd, *Tâ-kung* (大功), worn for nine months;

4th, *Hsiào-kung* (小功), worn for five months;

5th, *Sze-mâ* (緦麻), worn for three months.

'The character of each habit, and the relatives for whom it is worn, are prescribed as follows:—

'1st, *Kan-jui* indicates relationships of the first degree. The prescribed habit for it is composed of the coarsest hempen fabric, and left unhemmed at the borders. It is worn:—

'By a man, for his parents; by a wife, for her husband, and husband's parents; and by a concubine, for her master.

'2nd, *Ze-jui* indicates relationships of the second degree. The prescribed habit for it is composed of coarse hempen fabric, with hemmed borders. It is worn for one year:—

'By a man, for his grandparents; uncle; uncle's wife; spinster aunt; brother; spinster sister; wife; son (of wife or concubine); daughter-in-law (wife of first-born); nephew; spinster niece; grandson (first-born son of first-born); by a wife, for her husband's nephew, and husband's spinster niece; by a married woman, for her parents, and grandparents; and by a concubine, for her master's wife; her master's parents; her master's sons (by wife or other concubine), and for sons. It is worn for five months:—

'By a man, for his great-grandparents; and by a married woman, for her great-grandparents. It is worn for three months :—

'By a man, for his great-great-grandparents; and by a married woman, for her great-great-grandparents.

'3rd, Tâ-kung indicates relationships of the third degree. The prescribed habit for it is composed of coarse cotton fabric¹. It is worn :—

'By a man, for his married aunt; married sister; brother's wife; first cousin; spinster first cousin; daughter-in-law (wife of a younger son, or of a son of a concubine); nephew's wife; married niece; and grandson (son of a younger son, or of a concubine's son); by a wife, for her husband's grandparents; husband's uncle; husband's daughter-in-law (wife of a younger son, or of a concubine's son); husband's nephew's wife; husband's married niece; and grandson; by a married woman, for her uncle; uncle's wife; spinster aunt; brother; sister; nephew; spinster niece; and by a concubine, for her grandson.

'4th, Hsiào-kung indicates relationships of the fourth degree. The habit prescribed for it is composed of rather coarse cotton fabric. It is worn :—

'By a man, for his grand-uncle; grand-uncle's wife; spinster grand-aunt; father's first cousin; father's first cousin's wife; father's spinster first cousin; married female first cousin; first cousin once removed; spinster female first cousin once removed; second cousin; spinster female second cousin; grand-daughter-in-law (wife of first-born of first-born son); grand-nephew; spinster grand-niece; mother's parents; mother's brother; mother's

¹ In the very brief account of this preliminary chapter in the Penal Code, given by Sir George Staunton, in his translation of the Code (page lxxv), he gives for the material 'coarse' linen cloth. The Chinese character is simply 'cloth.' I suppose the material originally was linen; but since the use of cotton, both of native and foreign manufacture, has increased in China, it is often substituted for linen. I have seen some mourners wearing linen, and others wearing cotton.

sister¹; by a wife, for her husband's aunt; husband's brother; husband's brother's wife; husband's sister; husband's second cousin; spinster female second cousin of husband; husband's grand-nephew; and spinster grand-niece of husband; by a married woman, for her spinster aunt; married sister; first cousin; and married niece; and by a concubine, for her master's grand-parents.

'5th, Sze-mâ indicates relationships of the fifth degree. The prescribed dress for it is composed of rather fine cotton cloth. It is worn :—

'By a man, for his great-grand-uncle; great-grand-uncle's wife; spinster great-grand-aunt; married grand-aunt; grandfather's first cousin; grandfather's first cousin's wife; spinster first cousin of grandfather; married female first cousin of father; father's first cousin once removed; wife of father's first cousin once removed; father's spinster first cousin once removed; first cousin's wife; married female first cousin once removed; first cousin twice removed; spinster first cousin twice removed; married female second cousin; second cousin once removed; spinster second cousin once removed; grand-daughter-in-law (wife of son of a younger son, or of son of a concubine); grand-nephew's wife; married grand-niece; third cousin; spinster third cousin; great-grandson; great-grand-nephew; spinster great-grand-niece; great-great-grandson; aunt's son; mother's brother's son; mother's sister's son; wife's parents; son-in-law; daughter's child: by a wife, for her husband's great-great-grand-parents; husband's great-grand-parents; husband's grand-uncle; husband's spinster grand-aunt; father-in-law's first cousin; father-in-law's first cousin's wife; spinster first cousin of father-in-law; female first cousin of husband; husband's second cousin's wife; married female second cousin of husband; husband's second cousin once removed; husband's

¹ These names and others farther on, printed with spaced letters, all belong to the Wâi-yin relationships.

spinster second cousin once removed ; grand-daughter-in-law (wife of own or a concubine's grandson) ; husband's grand-nephew's wife ; husband's married grand-niece ; husband's third cousin ; spinster third cousin of husband ; great-grandson ; great-grand-daughter-in-law ; husband's great-grand-nephew ; spinster great-grand-niece of husband ; and great-great-grandson : and by a married woman, for her grand-uncle ; spinster grand-aunt ; father's first cousin ; spinster first cousin of father ; spinster first cousin ; second cousin ; spinster second cousin.'

TABLE No. 8.
Mourning worn by a Concubine for her Mother's Kinfolk.

BOOK III. THE ROYAL REGULATIONS¹.

SECTION I.

1. According to the regulations of emolument and rank framed by the kings, there were the duke; the marquis; the earl; the count; and the baron²:—in all, five gradations (of rank). There were (also), in the feudal states, Great officers³ of the highest grade,—the ministers; and Great officers of the lowest grade; officers of the highest, the middle, and the lowest grades:—in all, five gradations (of office).

2. The territory of the son of Heaven amounted to 1000 li square; that of a duke or marquis to 500 li square; that of an earl to 70 li square; and that of a count or baron to 50 li square⁴. (Lords) who could not number 50 li square, were not

¹ See the Introduction, chapter iii, pages 18–20.

² Most sinologists have adopted these names for the Chinese terms. Callery says, 'Les ducs, les marquis, les comtes, les vicomtes, et les barons.' See the note on Mencius, V, i, 2, 3, for the meaning given to the different terms.

³ 'Great officers' are in Chinese Tâ Fû, 'Great Sustainers.' The character fû (夫) is different from that for 'officer,' which follows. The latter is called shih (士), often translated 'scholar,' and is 'the designation of one having a special charge.' Callery generally retains the Chinese name Tâ Fû, which I have not liked to do.

⁴ A li is made up of 360 paces. At present 27.8 li = 10 English miles, and one geographical li = 1458.53 English feet. The territories were not squares, but when properly measured, 'taking the length with the breadth,' were equal to so many li square. The Chinese term rendered 'territory' is here (田), meaning 'fields;' but it is not to be supposed that that term merely denotes 'ground that could be cultivated,' as some of the commentators maintain.

admitted directly to (the audiences of) the son of Heaven. Their territories were called 'attached,' being joined to those of one of the other princes.

3. The territory assigned to each of the ducal ministers of the son of Heaven was equal to that of a duke or marquis; that of each of his high ministers was equal to that of an earl; that of his Great officers to the territory of a count or baron; and that of his officers of the chief grade to an attached territory.

4. According to the regulations, the fields of the husbandmen were in portions of a hundred acres¹. According to the different qualities of those acres, when they were of the highest quality, a farmer supported nine individuals; where they were of the next, eight; and so on, seven, six, and five. The pay of the common people, who were employed in government offices², was regulated in harmony with these distinctions among the husbandmen.

5. The officers of the lowest grade in the feudal states had an emolument equal to that of the husbandmen whose fields were of the highest quality; equal to what they would have made by tilling the fields. Those of the middle grade had double that of the lowest grade; and those of the highest grade double that of the middle. A Great officer of the lowest grade had double that of an officer of the highest. A high minister had four times that of

¹ The mǎu is much less than an English acre, measuring only 733½ square yards. An English acre is rather more than 6 mǎu.

² But held their appointments only from the Head of their department, and were removable by him at pleasure, having no commission from the king, or from the ruler of the state in which they were.

a Great officer; and the ruler had ten times that of a high minister. In a state of the second class, the emolument of a minister was three times that of a Great officer; and that of the ruler ten times that of a minister. In small states, a high minister had twice as much as a Great officer; and the ruler ten times as much as a minister.

6. The highest minister, in a state of the second class, ranked with the one of the middle grade in a great state; the second, with the one of the lowest grade; and the lowest, with a Great officer of the highest grade. The highest minister in a small state ranked with the lowest of a great state; the second, with the highest Great officer of the other; and the lowest, with one of the lower grade.

7. Where there were officers of the middle grade and of the lowest, the number in each was three times that in the grade above it¹.

8. Of the nine provinces embracing all within the four seas², a province was 1000 li square, and there were established in it 30 states of 100 li (square) each; 60 of 70 li; 120 of 50 li:—in all, 210 states. The famous hills and great meres were not included in the investitures³. The rest of the

¹ Some of the critics think that this sentence is out of place, and really belongs to paragraph 5 of next section. As the text stands, and simple as it appears, it is not easy to construe.

² The expression 'the four seas' must have originated from an erroneous idea that the country was an insular square, with a sea or ocean on each side. The explanation of it in the *R Ya* as denoting the country surrounded by 'The 9 *Î*, the 8 *Ti*, the 7 *Zung*, and the 6 *Man*,' was an attempt to reconcile the early error with the more accurate knowledge acquired in the course of time. But the name of 'seas' cannot be got over.

³ That is, these hills and meres were still held to belong to all

ground formed attached territories and unoccupied lands of the eight provinces (apart from that which formed the royal domain), each contained (the above) 210 states¹.

9. Within the domain² of the son of Heaven there were 9 states of 100 li square; 21 of 70 li; and 63 of 50 li:—in all, 93 states. The famous hills and great meres were not assigned³. The rest of the ground served to endow the officers, and to form unoccupied lands.

10. In all, in the nine provinces, there were 1773 states, not counting in (the lands of) the officers of the chief grade of the son of Heaven, nor the attached territories in the feudal states.

SECTION II.

1. (The contributions from) the first hundred li (square) of the son of Heaven served to supply (the needs of) the (various) public offices; (those from the rest of) the thousand li were for his own special use⁴.

2. Beyond his thousand li, chiefs of regions were appointed. Five states formed a union, which had

the people, and all had a right to the game on the hills and the fish of the waters. The princes could not deny to any the right of access to them; though I suppose they could levy a tax on what they caught.

¹ This statement must be in a great degree imaginary, supposing, as it does, that the provinces were all of the same size. They were not so; nor are the eighteen provinces of the present day so.

² The character in the text here is different from that usually employed to denote the royal domain.

³ The term is different from the 'invested' of the previous paragraph. The tenures in the royal domain were not hereditary.

⁴ Such seems to be the view of the *K'ien-lung* editors. Callery translates the paragraph substantially as I have done.

a President. Ten formed a combination, which had a Leader. Thirty formed a confederation, which had a Director. Two hundred and ten formed a province, which had a Chief. In the eight provinces there were eight Chiefs, fifty-six Directors, one hundred and sixty-eight Leaders, and three hundred and thirty-six Presidents. The eight Chiefs, with those under them, were all under the two Ancients of the son of Heaven. They divided all under the sky between them, one having charge of the regions on the left and the other of those on the right, and were called the two (Great) Chiefs¹.

3. All within the thousand li (of the royal domain) was called the Tien (or field Tenure). Outside that domain there were the ʒhâi (or service territories) and the Liû (or territory for banished persons).

4. The son of Heaven had three dukes², nine high ministers², twenty-seven Great officers, and eighty-one officers of the chief grade.

5. In a great state there were three high ministers³, all appointed by the son of Heaven; five Great

¹ Of these two great chiefs, we have an instance in the dukes of K'âu and Shão, at the rise of the K'âu dynasty, the former having under his jurisdiction all the states west of the Shen river, and the other, all east of it. But in general, this constitution of the kingdom is imaginary.

² Compare the Shû V, xx. The three dukes (Kung) were the Grand Tutor, Grand Assistant, and Grand Guardian. The nine ministers were the Prime Minister, the Ministers of Instruction, Religion, War, Crime, and Works, with the Junior Tutor, Junior Assistant, and Junior Guardian added. The six ministers exist still, substantially, in the six Boards. The titles of the three Kung and their Juniors also still exist.

³ These appear to have been the Ministers of Instruction, War, and Works. The first had also the duties of Premier, the second those of minister of Religion, and the third those of minister of Crime.

officers of the lower grade ; and twenty-seven officers of the highest grade. In a state of the second class there were three high ministers, two appointed by the son of Heaven and one by the ruler ; five Great officers of the lower grade ; and twenty-seven officers of the highest grade. In a small state there were two high ministers, both appointed by the ruler ; five Great officers of the lower grade ; and twenty-seven officers of the highest grade.

6. The son of Heaven employed his Great officers as the Three Inspectors,—to inspect the states under the Chiefs of Regions¹. For each state there were three Inspectors.

7. Within the domain of the son of Heaven the princes enjoyed their allowances ; outside it they had their inheritances².

8. According to the regulations, any one of the three ducal ministers might wear one additional symbol of distinction,—that of the descending dragon³.

¹ The *K'ien-lung* editors think that this was a department first appointed by the Han dynasty, and that the compilers of this Book took for it the name of 'the Three Inspectors,' from king Wû's appointment of his three brothers to watch the proceedings of the son of the last sovereign of Yin, in order to give it an air of antiquity. Was it the origin of the existing Censorate?

² Outside the royal domain, the feudal states were all hereditary. This is a fact of all early Chinese history. In the domain itself the territories were appanages rather than states. Yet they were in some sense hereditary too. The descendants of all who had served the country well, were not to be left unprovided for. Compare Mencius I, ii, 5, 3.

³ See the *Shih*, Part I, xv, Ode 6. 1, with the note in my edition of 'the Chinese Classics.' The old symbols of distinction gave rise to 'the Insignia of Civil and Military Officers' of the present dynasty, called *K'iu phin* (九品). See Williams' Dictionary, p. 698. This paragraph is in the expurgated edition

But if such an addition were made (to his eight symbols), it must be by special grant. There were only nine symbols (in all). The ruler of a state of the second class wore only seven of them, and the ruler of a small state only five.

9. The high minister of a great state could not wear more than three of the symbols, and the ministers below him only two. The high ministers of a small state, and Great officers of the lowest class, wore only one.

10. The rule was that the abilities of all put into offices over the people should first be discussed. After they had been discussed with discrimination, the men were employed. When they had been (proved) in the conduct of affairs, their rank was assigned; and when their position was (thus) fixed, they received salary.

11. It was in the court that rank was conferred, the (already existing) officers being (thus) associated in the act¹. It was in the market-place that punishment was inflicted; the multitude being (thus) associated in casting the criminals off. Hence, neither the ruler, nor (the head of) a clan, would keep a criminal who had been punished about him; a Great officer would not maintain him; nor would an officer, meet-

of the *Lî Kî*, used by Callery, and he gives for it, unfortunately, the following version:—‘Il est de règle que les trois ministres (qui d’habitude n’appartiennent qu’au 8^e ordre de dignitaires), en montant un degré portent l’habit des dragons en broderie. Si, après cela, il y a lieu de leur accorder de nouvelles récompenses, on leur donne des objets de valeur, car on ne va pas au delà du 9^e ordre.’

¹ The presence of the officers generally would be a safeguard against error in the appointments, as they would know the individuals.

ing him on the road, speak to him. Such men were sent away to one of the four quarters, according to the sentence on each. They were not allowed to have anything to do with affairs of government, to show that there was no object in allowing them to live¹.

12. In their relation to the son of Heaven, the feudal princes were required to send every year a minor mission to the court, and every three years a greater mission; once in five years they had to appear there in person.

13. The son of Heaven, every five years, made a tour of Inspection through the fiefs².

14. In the second month of the year, he visited those on the East, going to the honoured mountain of Tái. There he burnt a (great) pile of wood, and announced his arrival to Heaven; and with looks directed to them, sacrificed to the hills and rivers. He gave audience to the princes; inquired out those who were 100 years old, and went to see them: ordered the Grand music-master to bring him the poems (current in the different states)³, that he might see the manners of the people; ordered the superintendents of markets to present (lists of prices), that he might see what the people liked and disliked, and whether they were set on extravagance and loved

¹ It has been said that these were rules of the Yin or Shang dynasty. The *K'ien-lung* editors maintain that they were followed by all the three feudal dynasties.

² Compare vol. iii, pp. 39, 40.

³ These would include ballads and songs. Perhaps 'Grand music-master' should be in the plural, meaning those officers of each state. Probably these would have given them to the king's Grand music-master.

what was bad; he ordered the superintendent of rites to examine the seasons and months, and fix the days, and to make uniform the standard tubes, the various ceremonies, the (instruments of) music, all measures, and (the fashions of) clothes. (Whatever was wrong in these) was rectified.

15. Where any of the spirits of the hills and rivers had been unattended to, it was held to be an act of irreverence, and the irreverent ruler was deprived of a part of his territory. Where there had been neglect of the proper order in the observances of the ancestral temple, it was held to show a want of filial piety, and the rank of the unfilial ruler was reduced. Where any ceremony had been altered, or any instrument of music changed, it was held to be an instance of disobedience, and the disobedient ruler was banished. Where the statutory measures and the (fashion of) clothes had been changed, it was held to be rebellion, and the rebellious ruler was taken off. The ruler who had done good service for the people, and shown them an example of virtue, received an addition to his territory and rank.

16. In the seventh month, (the son of Heaven) continued his tour, going to the south, to the mountain of that quarter¹, observing the same ceremonies as in the east. In the eighth month, he went on to the west, to the mountain of that quarter², observing the

¹ Mount Hăng; in the present district of Hăng-shan, dept. Hăng-kâu, Hu-nan.

² Mount Hwa; in the present district of Hwa-yin, dept. Thung-kâu, Shen-hsi.

same ceremonies as in the south. In the eleventh month, he went on to the north, to the mountain of that quarter¹, observing the same ceremonies as in the west. (When all was done), he returned (to the capital), repaired (to the ancestral temple) and offered a bull in each of the fanes, from that of his (high) ancestor to that of his father².

17. When the son of Heaven was about to go forth, he sacrificed specially, but with the usual forms, to God, offered the Í sacrifice at the altar of the earth, and the 3hào in the fane of his father³. When one of the feudal princes was about to go forth, he offered the Í sacrifice to the spirits of the land, and the 3hào in the fane of his father.

18. When the son of Heaven received the feudal princes, and there was no special affair on hand, it was (simply) called an audience. They examined their ceremonies, rectified their punishments, and made uniform what they considered virtuous; thus giving honour to the son of Heaven⁴.

19. When the son of Heaven gave (an instrument of) music to a duke or marquis, the presentation was

¹ Mount Hăng; in the present district of K'ü-yang, dept. Ting-kâu, Kih-lí.

² I have followed here the view of Khung Ying-tá. It seems to me that all the seven fanes of the son of Heaven were under one roof, or composed one great building, called 'the Ancestral Temple.' See p. 224.

³ The meaning of the names of the different sacrifices here is little more than guessed at.

⁴ The second sentence of this paragraph is variously understood.

preceded by a note from the signal box¹; when giving one to an earl, count, or baron, the presentation was preceded by shaking the hand-drum. When the bow and arrows were conferred on a prince, he could proceed to execute the royal justice. When the hatchet and battle-axe were conferred, he could proceed to inflict death. When a large libation-cup was conferred, he could make the spirits from the black millet for himself. When this cup was not conferred, he had to depend for those spirits (as a gift) from the son of Heaven.

20. When the son of Heaven ordered a prince to institute instruction, he proceeded to build his schools; the children's², to the south of his palace, on the left of it; that for adults, in the suburbs. (The college of) the son of Heaven was called (the palace of) Bright Harmony, (and had a circlet of water). (That of) the princes was called the Palace with its semicircle of water.

¹ A representation of the signal box is here given (1). The note was made by turning the upright handle, which then struck on some arrangement inside. The hand-drum is also represented (2). It was merely a sort of rattle; only that the noise was

made by the two little balls striking against the ends of the drum. It is constantly seen and heard in the streets of Chinese cities at the present day, in the hands of pedlers and others.

² That is, the children of the princes; but an impulse was thus given to the education of children of lower degree.

21. When the son of Heaven was about to go forth on a punitive expedition, he sacrificed specially, but with the usual forms, to God ; offered the Í sacrifice at the altar of the Earth, and the 3háo in the fane of his father. He offered sacrifice also to the Father of War (on arriving) at the state which was the object of the expedition. He had received his charge from his ancestors, and the complete (plan) for the execution of it in the college. He went forth accordingly, and seized the criminals ; and on his return he set forth in the college his offerings, and announced (to his ancestors) how he had questioned (his prisoners), and cut off the ears (of the slain)¹.

22. When the son of Heaven and the princes had no (special) business in hand, they had three huntings² in the year. The first object in them was to supply the sacrificial dishes with dried flesh ; the second, to provide for guests and visitors ; and the third, to supply the ruler's kitchen.

23. Not to hunt when there was no (special) business in the way was deemed an act of irreverence³. To hunt without observing the rules (for hunting) was deemed cruelty to the creatures of Heaven.

24. The son of Heaven did not entirely surround (the hunting ground)⁴ ; and a feudal prince did not

¹ Compare paragraph 17, and vol. iii, pp. 392, 393.

² The huntings were in spring, summer, and winter, for each of which there was its proper name. In autumn the labours of the field forbade hunting.

³ Irreverence, in not making provision for sacrifices ; disrespect, in not providing properly for guests.

⁴ He left one opening for the game. This paragraph contains some of the rules for hunting.

take a (whole) herd by surprise. When the son of Heaven had done killing, his large flag was lowered; and when the princes had done, their smaller flag. When the Great officers had done, the auxiliary carriages were stopped¹; and after this, the common people fell a hunting (for themselves).

25. When the otter sacrificed its fish², the foresters entered the meres and dams. When the wolf sacrificed its prey, the hunting commenced. When the dove changed into a hawk, they set their nets, large and small. When the plants and trees began to drop their leaves, they entered the hills and forests (with the axe). Until the insects had all withdrawn into their burrows, they did not fire the fields. They did not take fawns nor eggs. They did not kill pregnant animals, nor those which had not attained to their full growth. They did not throw down nests³.

26. The chief minister determined the expenditure of the states, and it was the rule that he should do so at the close of the year. When the five kinds of grain had all been gathered in, he then determined the expenditure;—according to the size of each territory, as large or small, and the returns of the year, as abundant or poor. On the average of thirty years he determined the expenditure, regulating the outgoing by the income.

¹ These were light carriages used in driving and keeping the game together.

² See the next Book, where all these regulations are separately mentioned.

³ The Chinese have a reputation for being callous in the infliction of punishment and witnessing suffering; and I think they are so. But these rules were designed evidently to foster kindness and sympathy.

27. A tenth of the (year's) expenditure was for sacrifices. During the three years of the mourning rites (for parents), the king did not sacrifice (in person), excepting to Heaven, Earth, and the Spirits of the land and grain; and when he went to transact any business, the ropes (for his chariot) were made of hemp (and not of silk)¹. A tithe of three years' expenditure was allowed for the rites of mourning. When there was not sufficient for the rites of sacrifice and mourning, it was owing to lavish waste; when there was more than enough, the state was described as affluent. In sacrifices there should be no extravagance in good years, and no niggardliness in bad.

28. If in a state there was not accumulated (a surplus) sufficient for nine years, its condition was called one of insufficiency; if there was not enough for six years, one of urgency. If there was not a surplus sufficient for three years, the state could not continue. The husbandry of three years was held to give an overplus of food sufficient for one year; that of nine years, an overplus sufficient for three years. Going through thirty years (in this way), though there might be bad years, drought, and inundations, the people would have no lack or be reduced to (eating merely) vegetables, and then the son of Heaven would every day have full meals and music at them.

SECTION III.

I. The son of Heaven was encoffined on the seventh day (after his death), and interred in the seventh month. The prince of a state was en-

¹ Such is the meaning of the text here given by the *K'ien-lung* editors. It is found also in the *Khang-hsî* dictionary, under the character 越, called in this usage hwo.

coffined on the fifth day, and interred in the fifth month. A Great officer, (other) officers, and the common people were encoffined on the third day, and interred in the third month. The mourning rites of three years (for parents) extended from the son of Heaven to all.

2. The common people let the coffin down into the grave by ropes, and did not suspend the interment because of rain. They raised no mound, nor planted trees over the grave. That no other business should interfere with the rites of mourning was a thing extending from the son of Heaven to the common people.

3. In the mourning rites they followed (the rank of) the dead; in sacrificing to them, that of the living. A son by a concubine did not (preside at) the sacrifices¹.

4. (The ancestral temple of) the son of Heaven embraced seven fanes (or smaller temples); three on the left and three on the right, and that of his great ancestor (fronting the south):—in all, seven. (The temple of) the prince of a state embraced five such fanes: those of two on the left, and two on the right, and that of his great ancestor:—in all, five. Great officers had three fanes:—one on the left, one on the right, and that of his great ancestor:—in all, three. Other officers had (only) one. The common people presented their offerings in their (principal) apartment².

¹ Even though he might attain to higher rank than the son of the wife proper, who represented their father.

² The technical terms (as they may be called) in the text make it impossible to translate this paragraph concisely, so as to make it intelligible to a foreign reader unacquainted with the significance of

5. The sacrifices in the ancestral temples of the son of Heaven and the feudal princes were that of

those terms. The following ground-plan of an ancestral temple of a king of *K'au* is given in the plates of the *K'ien-lung* edition of the *Lî K'Ī*:—after *K'ū Hsf.* I introduce it here with some condensations.

Entering at the gate on the south, we have, fronting us, at the northern end, the fane of the grand ancestor to whom, in the distant past, the family traced its line. South of his fane, on the right and left, were two fanes dedicated to kings Wăn and Wû, father and son, the joint founders of the dynasty. The four below them, two on each side, were dedicated to the four kings preceding the reigning king, the sacrificer. At the back of each fane was a comparatively dark apartment, called *khin* (寢), where the spirit tablet was kept during the intervals between the

spring, called *Y o* ; that of summer, called *T t* ; that of autumn, called *K h a n g* ; and that of winter, called *K h a n g*¹.

6. The son of Heaven sacrificed to Heaven and Earth ; the princes of the states, to the (spirits of the) land and grain ; Great officers offered the five sacrifices (of the house). The son of Heaven sacrificed to all the famous hills and great streams under the sky, the five mountains² receiving (sacrificial) honours like the honours paid (at court) to the three ducal ministers, and the four rivers² honours like those paid to the princes of states ; the princes sacrificed to the famous hills and great streams which were in their own territories.

7. The son of Heaven and the feudal lords sacrificed to the ancient princes who had no successors to

sacrifices. When a sacrifice was offered, the tablet was brought out and placed in the centre of a screen, in the middle of the fane. As the line lengthened, while the tablets of the grand ancestor and joint ancestors always remained untouched, on a death and accession, the tablet of the next oldest occupant was removed and placed in a general apartment for the keeping of all such tablets, and that of the newly deceased king was placed in the father's fane, and the other three were shifted up, care being always taken that the tablet of a son should never follow that of his father on the same side. The number of the lower fanes was maintained, as a rule, at four. Those on the east were called *K á o* (昭), and on the west *M ú* (穆), the names in the text here. See the Chinese Classics, I, pp. 266, 267, and the note there.

¹ The names of some of these sacrifices and their order are sometimes given differently.

² For four of these mountains, see pages 217, 218, notes. The fifth was that of the centre, mount Sung, in the present district of Sung, department Ho-nan, Ho-nan. The four rivers were the *K i a n g*, the *H w á i*, the *H o*, and the *K í*.

preside over the sacrifices to them, and whose possessions now formed part of the royal domain or of their respective states.

8. The son of Heaven offered the spring sacrifice apart and by itself alone, but his sacrifices of all the other seasons were conducted on a greater scale in the fane of the high ancestor. The princes of the states who offered the spring sacrifice omitted that of the summer; those who offered that of the summer omitted that of the autumn; those who sacrificed in autumn did not do so in winter; and those who sacrificed in winter did not do so in spring¹.

In spring they offered the sacrifice of the season by itself apart; in summer, in the fane of the high ancestor²; in autumn and winter both the sacrifices were there associated together.

9. In sacrificing at the altars to the spirits of the land and grain, the son of Heaven used in each case a bull, a ram, and a boar; the princes, (only) a ram and a boar. Great and other officers, at the sacrifices in their ancestral temples, if they had lands, sacrificed an animal; and, if they had no lands, they only presented fruits. The common people, in the spring, presented scallions; in summer, wheat; in autumn, millet; and in winter, rice unhulled. The scallions were set forth with eggs; the wheat with

¹ The princes who omitted one sacrifice in the year would probably be absent in that season, attending at the royal court. They paid that attendance in turns from the several quarters.

² If in this summer service the seasonal and the sacrifice in the fane of the high sacrifice were associated together, the rule for the princes was the same as for the king. There was the ordinary associate sacrifice, and 'the great;' about which the discussions and different views have been endless.

fish ; the millet with a sucking-pig ; and the rice with a goose.

10. Of the bulls used in sacrificing to Heaven and Earth, the horns were (not larger than) a cocoon or a chestnut¹. Those of the one used in the ancestral temple could be grasped with the hand ; those of the ox used for (feasting) guests were a foot long.

Without sufficient cause, a prince did not kill an ox, nor a Great officer a sheep, nor another officer a dog or a pig, nor a common person eat delicate food.

The various provisions (at a feast) did not go beyond the sacrificial victims killed ; the private clothes were not superior to the robes of sacrifice ; the house and its apartments did not surpass the ancestral temple.

11. Anciently, the public fields were cultivated by the united labours of the farmers around them, from the produce of whose private fields nothing was levied. A rent was charged for the stances in the market-places, but wares were not taxed. Travellers were examined at the different passes, but no duties were levied from them. Into the forests and plains at the foot of mountains the people went without hindrance at the proper seasons. None of the produce was levied from the fields assigned to the younger sons of a family, nor from the holy fields. Only three days' labour was required (by the state) from the people in the course of a year. Fields and residences in the hamlets, (when once assigned), could

¹ The victims must all have been young animals ; 'to show,' says Wang Tháo, 'that the sincerity of the worshipper is the chief thing in the view of Heaven.'

not be sold. Ground set apart for graves could not be sought (for any other purpose)¹.

12. The minister of Works with his (various) instruments measured the ground for the settlements of the people. About the hills and rivers, the oozy ground and the meres, he determined the periods of the four seasons. He measured the distances of one spot from another, and commenced his operations in employing the labour of the people. In all his employment of them, he imposed (only) the tasks of old men (on the able-bodied), and gave (to the old) the food-allowance of the able-bodied.

13. In all their settlements, the bodily capacities of the people are sure to be according to the sky and earthly influences, as cold or hot, dry or moist. Where the valleys are wide and the rivers large, the ground was differently laid out; and the people born in them had different customs. Their temperaments,

¹ Compare Mencius III, i, 3, 6-9, et al.; II, i, 5, 2-4; I, i, 3, 3, 4; III, i, 3, 15-17; with the notes. I give here also the note of P. Callery on the first sentence of this paragraph:—'Sous les trois premières dynasties, époque éloignée où il y avait peu de terrains cultivés dans l'empire, le gouvernement concédait les terres incultes par carrés équilatères ayant 900 mâu, ou arpents, de superficie. Ces carrés, qu'on nommait *3ing* (井), d'après leur analogie de tracé avec le caractère *3ing*, "a well," étaient divisés en neuf carrés égaux de 100 mâu chacun, au moyen de deux lignes médianes que deux autres lignes coupaient à angle droit à des distances égales. Il résultait de cette intersection de lignes une sorte de damier de trois cases de côté, ayant huit carrés sur la circonférence, et un carré au milieu. Les huit carrés du pourtour devenaient la propriété de huit colons; mais celui du centre était un champ de réserve dont la culture restait bien à la charge des huit voisins, mais dont les produits appartenaient à l'empereur.'

as hard or soft, light or grave, slow or rapid, were made uniform by different measures; their preferences as to flavours were differently harmonised; their implements were differently made; their clothes were differently fashioned, but always suitably. Their training was varied, without changing their customs; and the governmental arrangements were uniform, without changing the suitability (in each case).

14. The people of those five regions—the Middle states, and the Zung, Î, (and other wild tribes round them)—had all their several natures, which they could not be made to alter. The tribes on the east were called Î. They had their hair unbound, and tattooed their bodies. Some of them ate their food without its being cooked. Those on the south were called Man. They tattooed their foreheads, and had their feet turned in towards each other. Some of them (also) ate their food without its being cooked. Those on the west were called Zung. They had their hair unbound, and wore skins. Some of them did not eat grain-food. Those on the north were called Tî. They wore skins of animals and birds, and dwelt in caves. Some of them also did not eat grain-food.

The people of the Middle states, and of those Î, Man, Zung, and Tî, all had their dwellings, where they lived at ease; their flavours which they preferred; the clothes suitable for them; their proper implements for use; and their vessels which they prepared in abundance. In those five regions, the languages of the people were not mutually intelligible, and their likings and desires were different. To make what was in their minds apprehended, and to communicate their likings and desires, (there were officers),—in the

east, called transmitters; in the south, representationists; in the west, Tî-tîs¹; and in the north, interpreters.

15. In settling the people, the ground was measured for the formation of towns, and then measured again in smaller portions for the allotments of the people. When the division of the ground, the cities, and the allotments were thus fixed in adaptation to one another, so that there was no ground unoccupied, and none of the people left to wander about idle, economical arrangements were made about food; and its proper business appointed for each season. Then the people had rest in their dwellings, did joyfully what they had to do, exhorted one another to labour, honoured their rulers, and loved their superiors. This having been secured, there ensued the institution of schools.

SECTION IV.

1. The minister of Instruction defined and set forth the six ceremonial observances²:—to direct and control the nature of the people; clearly illustrated the seven lessons (of morality)³ to stimulate their virtue; inculcated uniformity in the eight objects of government², to guard against all excess; taught the

¹ I cannot translate Tî-tî. It was the name of a region (Williams says, 'near the Koko-nor'), the people of which had a reputation for singing.

² See the last paragraph of these Regulations, at the end of next Section.

³ It has become the rule, apparently with all sinologists, to call the minister in the text here, Sze Thû, by the name of 'The minister

sameness of the course (of duty) and virtue, to assimilate manners; nourished the aged, to secure the completion of filial piety; showed pity to orphans and solitaries, to reach those who had been bereaved; exalted men of talents and worth, to give honour to virtue; and dealt summarily with the unworthy, to discountenance wickedness.

2. He commanded that, throughout the districts¹, there should be marked and pointed out to him those who were disobedient to his lessons. (This having been done), the aged men were all assembled in the school², and on a good day archery was practised and places were given according to merit. (At the same time) there was a feast, when places were given according to age. The Grand minister of Instruction³ conducted thither the eminent scholars of the state and along with them superintended the business.

of Instruction.' Callery describes him as 'Le ministre qui a dans ses attributions l'instruction publique et les rites.' And this is correct according to the account of his functions here, in the *Kâu Lî*, and in the *Shû* (V, xx, 8); but the characters (司徒) simply denote 'superintendent of the multitudes.' This, then, was the conception anciently of what government had to do for the multitudes,—to teach them all moral and social duties, how to discharge their obligations to men living and dead, and to spiritual beings. The name is now applied to the president and vice-president of the board of Revenue.

¹ That is, the six districts embraced in the royal domain, each nominally containing 12,500 families.

² The great school of the district. The aged men would be good officers retired from duty, and others of known worth.

³ Here we have 'the Grand minister of Instruction;' and it may be thought we should translate the name in the first paragraph in the plural. No doubt, where there is no specification of 'the grand,' it means the board or department of Education.

If those (who had been reported to him) did not (now) change, he gave orders that they who were noted as continuing disobedient in the districts on the left should be removed to those on the right, and those noted on the right to the districts on the left. Then another examination was held in the same way, and those who had not changed were removed to the nearest outlying territory. Still continuing unchanged, they were removed, after a similar trial, to the more distant territory. There they were again examined and tried, and if still found defective, they were cast out to a remote region, and for all their lives excluded from distinction.

3. Orders were given that, throughout the districts, the youths who were decided on as of promising ability should have their names passed up to the minister of Instruction, when they were called 'select scholars.' He then decided which of them gave still greater promise, and promoted them to the (great) college¹, where they were called 'eminent scholars².' Those who were brought to the notice of the minister were exempted from services in the districts; and those who were promoted to the (great) school, from all services under his own department, and (by and by) were called 'complete scholars².'

4. The (board for) the direction of Music gave all honour to its four subjects of instruction³, and

¹ This would be the college at the capital.

² Have we not in these the prototypes of the 'Flowering Talents' (Hsiû Shai 秀才) and 'Promoted Men' (K'ü Z'an 舉人) of to-day?

³ In the text these are called 'the four Arts' and 'the four Teachings;' but the different phrases seem to have the same meaning.

arranged the lessons in them, following closely the poems, histories, ceremonies, and music of the former kings, in order to complete its scholars. The spring and autumn were devoted to teaching the ceremonies and music; the winter and summer to the poems and histories¹. The eldest son of the king and his other sons, the eldest sons of all the feudal princes, the sons, by their wives proper, of the high ministers, Great officers, and officers of the highest grade, and the eminent and select scholars from (all) the states, all repaired (to their instruction), entering the schools according to their years.

5. When the time drew near for their quitting the college, the smaller and greater assistants², and the inferior director of the board, put down those who had not attended to their instructions, and reported them to the Grand director, who in turn reported them to the king. The king ordered the three ducal ministers, his nine (other) ministers, the Great officers, and the (other) officers, all to enter the school (and hold an examination). If this did not produce the necessary change; the king in person inspected the school; and if this also failed, for three days he took no full meal nor had music, after which the (culprits) were cast out to the remote regions. Sending them to those of the west was called 'a (temporary) expul-

¹ The *K'ien-lung* editors say that 'in spring and autumn the temperature is equable and the bodily spirits good, well adapted for the practice of ceremonies and moving in time to the music, whereas the long days of summer and long nights of winter are better adapted for the tasks of learning the poems and histories.'

² The smaller assistants of the Grand director of Music were eighteen, and the greater four. See the *K'au Li*, XVII, 21. Their functions are described in XXII, 45-53.

sion;’ to the east, ‘a temporary exile.’ But all their lives they were excluded from distinction.

6. The Grand director of Music, having fully considered who were the most promising of the ‘completed scholars,’ reported them to the king, after which they were advanced to be under the minister of War, and called ‘scholars ready for employment’¹.

7. The minister of War gave discriminating consideration (to the scholars thus submitted to him), with a view to determine the offices for which their abilities fitted them. He then reported his decisions concerning the best and ablest of them to the king, to have that judgment fixed². When it was, they were put into offices. After they had discharged the duties of these, rank was given them; and, their positions being thus fixed, they received salary.

8. When a Great officer was dismissed as incompetent from his duties, he was not (again) employed in any office to the end of his life. At his death, he was buried as an (ordinary) officer.

¹ Exactly the name to the candidates of to-day who have succeeded at the triennial examinations at the capital; ‘the Metropolitan Graduates,’ as Mayers (page 72) calls them.

² It is strange to find the minister of War performing the services here mentioned, and only these. The *K’ien-lung* editors say that the compilers of this Book had not seen the *K’au Lî* nor the *Shû*. It has been seen in the Introduction, pages 4, 5, how the *K’au Lî* came to light in the reign of *Wû*, perhaps fifty years after this Book was made, and even then did not take its place among the other restored monuments till the time of *Liû Hsin*. To make the duties here ascribed to the minister of War (literally, ‘Master of Horse,’ 司馬) appear less anomalous, *K’ang* and other commentators quote from the *Shû* (V, xx, 14) only a part of the account of his functions.

9. If any expedition of war were contemplated, orders were given to the Grand minister of Instruction to teach the scholars the management of the chariot and the wearing of the coat of mail.

10. In the case of all who professed any particular art, respect was had to their strength. If they were to go to a distant quarter, they had to display their arms and legs, and their skill in archery and charioteering was tested. All who professed particular arts for the service of their superiors, such as prayer-makers, writers, archers, carriage-drivers, doctors, diviners, and artizans,—all who professed particular arts for the service of their superiors, were not allowed to practise any other thing, or to change their offices; and when they left their districts, they did not take rank with officers. Those who did service in families (also), when they left their districts, did not take rank with officers.

11. The minister of Crime adapted the punishments (to the offences for which they were inflicted), and made the laws clear in order to deal with criminal charges and litigations. He required the three references as to its justice (before the infliction of a capital punishment)¹. If a party had the intention, but there were not evidence of the deed, the charge was not listened to. Where a case appeared as doubtful, it was lightly dealt with; where it might be pardoned, it was (still) gravely considered.

12. In all determining on the application of any of the five punishments², it was required to decide

¹ See the *K'âu Lî*, XXXVII, 45, 46.

² Branding; cutting off the nose; cutting off the feet; castration; death. See vol. iii, p. 40.

according to the judgment of Heaven. Inadvertent and redeemable offences were determined by (the circumstances of) each particular case¹.

13. When hearing a case requiring the application of any of the five punishments, (the judge) was required to have respect to the affection between father and son², or the righteousness between ruler and minister³ (which might have been in the mind of the defendant), to balance his own judgment. He must consider the gravity or lightness (of the offence), and carefully try to fathom the capacity (of the offender) as shallow or deep, to determine the exact character (of his guilt). He must exert his intelligence to the utmost, and give the fullest play to his generous and loving feeling, to arrive at his final judgment. If the criminal charge appeared to him doubtful, he was to take the multitude into consultation with him; and if they also doubted, he was to pardon the defendant. At the same time he was to examine analogous cases, great and small, and then give his decision.

14. The evidence in a criminal case having thus been all taken and judgment given, the clerk reported it all to the director (of the district), who heard it and reported it to the Grand minister of Crime. He also heard it in the outer court⁴, and then reported it to the king, who ordered the three ducal ministers,

¹ Vol. iii, pp. 260-263. The compilers in this part evidently had some parts of the Shû before them.

² Which might make either party conceal the guilt of the other.

³ Which might in a similar way affect the evidence.

⁴ The text says, 'Under the Zizyphus trees.' These were planted in the outer court of audience, and under them the different ministers of the court had their places.

with the minister and director, again to hear it. When they had (once more) reported it to the king, he considered it with the three mitigating conditions¹, and then only determined the punishment.

15. In all inflictions of punishments and fines, even light offenders (that were not doubtful) were not forgiven. Punishment may be compared to the body. The body is a complete thing ; when once completed, there cannot be any subsequent change in it². Hence the wise man will do his utmost (in deciding on all these inflictions).

16. Splitting words so as to break (the force of) the laws ; confounding names so as to change what had been definitely settled ; practising corrupt ways so as to throw government into confusion : all guilty of these things were put to death. Using licentious music ; strange garments ; wonderful contrivances and extraordinary implements, thus raising doubts among the multitudes : all who used or formed such things were put to death. Those who were persistent in hypocritical conduct and disputatious in hypocritical speeches ; who studied what was wrong, and went on to do so more and more, and whoever increasingly followed what was wrong so as to bewilder the multitudes : these were put to death. Those

¹ Callery gives for this, 'qui pardonne trois fois.' The conditions were—ignorance, mistake, forgetfulness.

² There is here a play upon the homophonous names of different Chinese characters, often employed, as will be pointed out, in the *Lî Kî*, and in which the scholars of Han set an example to future times. Callery frames a French example of the reasoning that results from it: 'Un saint est un ceint ; or, la ceinture signifiant au figuré la continence, il s'ensuit que la vertu de continence est essentielle à la sainteté !'

who gave false reports about (appearances of) spirits, about seasons and days, about consultings of the tortoise-shell and stalks, so as to perplex the multitudes: these were put to death. These four classes were taken off, and no defence listened to.

17. All who had charge of the prohibitions for the regulation of the multitudes¹ did not forgive transgressions of them.

Those who had rank-tokens, the long or the round, and gilt libation-cups were not allowed to sell them in the market-places; nor were any allowed to sell robes or chariots, the gift of the king; or vessels of an ancestral temple; or victims for sacrifice; or instruments of war; or vessels which were not according to the prescribed measurements; or chariots of war which were not according to the same; or cloth or silk, fine or coarse, not according to the prescribed quality, or broader or narrower than the proper rule; or of the illegitimate colours, confusing those that were correct²; or cloth, embroidered or figured; or vessels made with pearls or jade; or clothes, or food, or drink, (in any way extravagant); or grain which was not in season, or fruit which was unripe; or wood which was not fit for the axe; or birds, beasts, fishes, or reptiles, which were not fit to be killed. At the frontier gates, those in charge of the prohibitions, examined travellers, forbidding such as wore strange clothes, and taking note of such as spoke a strange language.

18. The Grand recorder had the superintendence of

¹ These would be, especially, the superintendents of the markets.

² The five correct colours were—black, carnation, azure, white, and yellow.

ceremonies. He was in charge of the tablets of record, and brought before the king what (names) were to be avoided¹, and what days were unfavourable (for the doing of particular affairs)¹. The son of Heaven received his admonitions with reverence².

19. (The office of) the accountants³ prepared the complete accounts of the year to be submitted to the son of Heaven which were reverently received by the chief minister. The Grand director of Music, the Grand minister of Crime, and the (chief) superintendent of the markets, these three officers, followed with the completed accounts of their departments to be submitted to the son of Heaven. The Grand minister of Instruction, the Grand minister of War, and the Grand minister of Works, reverently received the completed accounts of their several departments from their various subordinates, and examined them, then presenting them to the son of Heaven. Those subordinates then reverently received them after being so examined and adjudicated on. This being done, the aged were feasted and the royal sympathy shown to the husbandmen. The business of the year was concluded, and the expenditure of the states was determined.

¹ See pages 93, 180, et al.

² Some of the functions here belonged to the assistant recorder, according to the *K'âu Lî*, but the two were of the same department.

³ This office was under the board of the chief minister, and consisted of sixty-two men of different grades under the *K'âu* dynasty (the *K'âu Lî*, I, 38; their duties are described in Book VI). It is not easy to understand all the text of the rest of the paragraph, about the final settlement of the accounts of the year.

SECTION V.

1. In nourishing the aged, (Shun), the lord of Yü, used the ceremonies of the drinking entertainment; the sovereigns of Hsiâ, those at entertainments (after) a reverent sacrifice or offering¹; the men of Yin, those of a (substantial) feast; and the men of K'âu cultivated and used all the three.

2. Those of fifty years received their nourishment in the (schools of the) districts; those of sixty, theirs in the (smaller school of the) state; and those of seventy, theirs in the college. This rule extended to the feudal states. An old man of eighty made his acknowledgment for the ruler's message, by kneeling once and bringing his head twice to the ground. The blind did the same. An old man of ninety employed another to receive (the message and gift for him).

3. For those of fifty the grain was (fine and) different (from that used by younger men). For those of sixty, flesh was kept in store. For those of seventy, there was a second service of savoury meat. For those of eighty, there was a constant supply of delicacies. For those of ninety, food and drink were never out of their chambers. Wherever they wandered (to another place), it was required that savoury meat and drink should follow them.

¹ The commentators make this to have been a Barmecide feast, merely to show respect for the age; and Callery, after them, gives for the text: 'La dynastie des Hsiâ faisait servir un repas qu'on ne mangeait point.' But Ying-tâ's authorities adduced to support this view do not appear to me to bear it out. See the commencing chapter of Book X, Section ii, where all this about nourishing the aged is repeated.

4. After sixty, (the coffin and other things for the mourning rites) were seen to be in readiness, (once) in the year ; after seventy, once in the season ; after eighty, once in the month ; and after ninety, every day they were kept in good repair. But the bandages, sheet, and coverlets and cases (for the corpse) were prepared after death.

5. At fifty, one begins to decay ; at sixty, he does not feel satisfied unless he eats flesh ; at seventy, he does not feel warm unless he wears silk ; at eighty, he does not feel warm unless there be some one (to sleep) with him ; and at ninety, he does not feel warm even with that.

6. At fifty, one kept his staff always in his hand in his family ; at sixty, in his district ; at seventy, in the city ; at eighty, (an officer) did so in the court. If the son of Heaven wished to put questions to (an officer) of ninety, he went to his house, and had rich food carried after him.

7. At seventy, (an officer) did not wait till the court was over (before he retired) ; at eighty, he reported every month (to the ruler's messenger) that he was still alive ; at ninety, he (had delicate food sent) regularly to him every day.

8. At fifty, a (common) man was not employed in services requiring strength ; at sixty, he was discharged from bearing arms along with others ; at seventy, he was exempted from the business of receiving guests and visitors ; and at eighty, he was free from the abstinences and other rites of mourning.

9. When one was fifty, he received the rank (of a
[27] R

Great officer)¹; at sixty, he did not go in person to the college; at seventy, he retired from the service of the government; and in mourning, he used only the dress of sackcloth (without adopting the privations of the mourning rites).

10. (Shun), the lord of Yü, nourished the aged (who had retired from the service) of the state in (the school called) the higher hsiang, and the aged of the common people (and officers who had not obtained rank) in (the school called) the lower hsiang. The sovereigns of Hsiâ nourished the former in (the school called) the hsü on the east, and the latter in (that called) the hsü on the west. The men of Yin nourished the former in the school of the right, and the latter in that of the left. The men of K'âu entertained the former in (the school called) the eastern k'iao, and the latter in (what corresponded to) the hsiang of Yü. This was in the suburb of the capital on the west².

11. The lord of Yü wore the hwang cap in sacri-

¹ See Book X, Section ii, 1. This was, say the *K'ien-lung* editors, a lesson against forwardness in seeking office and rank, as retirement at seventy was a lesson against cleaving to these too long.

² It is wearisome to try and thread one's way through the discussions about the schools, called by all these different names. One thing is plain, that there were the lower schools which boys entered when they were eight, and the higher schools into which they passed from these. But in this paragraph these institutions are mentioned not in connexion with education, but as they were made available for the assembling and cherishing of the aged. They served various purposes. A school-room with us may do the same, occasionally; it was the rule in ancient China that the young should be taught and the old ministered to in the same buildings.

ficing (in the ancestral temple), and the white robes in nourishing the aged. The sovereigns of Hsiâ used the shâu cap in sacrificing, and the upper and lower dark garments of undress in nourishing the aged. During the Yin, they used the hsü cap in sacrificing, and the upper and lower garments, both of white thin silk, in nourishing the aged. During the K'âu dynasty, they used the mien cap in sacrificing, and the dark-coloured upper and lower garments in nourishing the aged.

12. The kings of the three dynasties¹, in nourishing the old, always had the years of those connected with them brought to their notice. Where (an officer) was eighty, one of his sons was free from all duties of government service ; where he was ninety, all the members of his family were set free from them. In cases of parties who were disabled or ill, and where the attendance of others was required to wait upon them, one man was discharged from those duties (for the purpose). Parties mourning for their parents had a discharge for three years. Those mourning for one year or nine months had a discharge for three months. Where an officer was about to move to another state, he was discharged from service for three months beforehand. When one came from another state, he was not required to take active service for a round year.

13. One who, while quite young, lost his father was called an orphan ; an old man who had lost his sons was called a solitary. An old man who had lost his wife was called a pitiable (widower); an old woman who had lost her husband was called a poor

¹ Hsiâ, Shang or Yin, and K'âu.

(widow). These four classes were the most forlorn of Heaven's people, and had none to whom to tell their wants; they all received regular allowances.

14. The dumb, the deaf, the lame, such as had lost a member, pigmies, and mechanics, were all fed according to what work they were able to do.

15. On the roads, men took the right side and women the left; carriages kept in the middle. A man kept behind another who had a father's years; he followed one who might be his elder brother more closely, but still keeping behind, as geese fly after one another in a row. Friends did not pass by one another, when going the same way. (In the case of an old and a young man, carrying burdens,) both were borne by the younger; and if the two were too heavy for one, he took the heavier. A man with grey hair was not allowed to carry anything, though he might do it with one hand.

16. An officer of superior rank, of the age of sixty or seventy, did not walk on foot. A common man, at that age, did not go without flesh to eat.

17. A Great officer, (having land of his own), was not permitted to borrow the vessels for sacrifice; nor to make vessels for his own private use before he had made those for sacrifice.

18. A space of one lí square contained fields amounting to 900 mǎu¹. Ten lí square were equal to 100 spaces of one lí square, and contained 90,000 mǎu. A hundred lí square were equal to 100 spaces of ten lí square, and contained 9,000,000 mǎu. A

¹ See note as to the size of the mǎu on page 218.

thousand *l*t square were equal to 100 spaces of 100 *l*t square, and contained 900,000,000 *mâu*.

19. From mount Hăng¹ to the southernmost point of the Ho was hardly 1000 *l*t. From that point to the Kiang was hardly 1000 *l*t. From the Kiang to mount Hăng in the south was more than 1000 *l*t. From the Ho on the east to the eastern sea was more than 1000 *l*t. From the Ho on the east to the same river on the west was hardly 1000 *l*t; and from that to the Moving Sands² was more than 1000 *l*t. (The kingdom) did not pass the Moving Sands on the west, nor mount Hăng on the south. On the east it did not pass the eastern sea, nor on the north did it pass (the other) mount Hăng. All within the four seas, taking the length with the breadth, made up a space of 3000 *l*t square, and contained eighty trillions of *mâu*³.

20. A space of 100 *l*t square contained ground to the amount of 9,000,000 *mâu*. Hills and mounds, forests and thickets, rivers and marshes, ditches and canals, city walls and suburbs, houses, roads, and

¹ See notes on pages 217, 218. I have said below '(the other) mount Hăng;' but the names, or characters for the names, of the two mountains are different in Chinese.

² What is now called the desert of Gobi.

³ As it is in the text = $80 \times 10000 \times 100000 \times 10000 \times 100000$ *mâu*. A translator, if I may speak of others from my own experience, is much perplexed in following and verifying the calculations in this and the other paragraphs before and after it. The K'ien-lung editors and Wang Tháo use many pages in pointing out the errors of earlier commentators, and establishing the correct results according to their own views, and I have thought it well to content myself with simply giving a translation of the text.

lanes took up one third of it, leaving 6,000,000 mǎu.

21. Anciently, according to the cubit of *Kâu*, eight cubits formed a pace. Now, according to the same, six cubits and four inches make a pace. One hundred ancient mǎu were equal to 146 of the present day and thirty paces. One hundred ancient lǐ were equal to 121 of the present day, sixty paces, four cubits, two inches and two-tenths.

22. A space of 1000 lǐ square contained 100 spaces of 100 lǐ square each. In this were constituted thirty states of 100 lǐ square, leaving what would have been enough for other seventy of the same size. There were also constituted sixty states of 70 lǐ square, twenty-nine of 100 lǐ square, and forty spaces of 10 lǐ square; leaving enough for forty states of 100 lǐ square, and sixty spaces of 10 lǐ square. There were also constituted a hundred and twenty states of 50 lǐ square, and thirty of 100 lǐ square, leaving enough for ten of the same size, and sixty spaces of 10 lǐ square.

The famous hills and great meres were not included in the fiefs; and what remained was assigned for attached territories and unoccupied lands. Those unappropriated lands were taken to reward any of the princes of acknowledged merit, and what was cut off from some others (because of their demerit) became unappropriated land.

23. The territory of the son of Heaven, amounting to 1000 lǐ square, contained 100 spaces of 100 lǐ square each. There were constituted nine appanages of 100 lǐ square, leaving ninety-one spaces of the same size. There were also constituted twenty-one

appanages of 70 *li* square, ten of 100 *li*, and twenty-nine spaces of 10 *li* square; leaving enough for eighty of 100 *li* square, and seventy-one of 10 *li*. There were further constituted sixty-three appanages of 50 *li* square, fifteen of 100 *li*, and seventy-five spaces of 10 *li*, while there still remained enough for sixty-four appanages of 100 *li* square, and ninety-six spaces of 10 *li* each.

24. The officers of the lowest grade in the feudal states received salary sufficient to feed nine individuals; those of the second grade, enough to feed eighteen; and those of the highest, enough for thirty-six. A Great officer could feed 72 individuals; a minister, 288; and the ruler, 2880.

In a state of the second class, a minister could feed 216; and the ruler, 2160.

A minister of a small state could feed 144 individuals; and the ruler, 1440.

In a state of the second class, the minister who was appointed by its ruler received the same emolument as the minister of a small state.

25. The Great officers of the son of Heaven acted as 'the three inspectors.' When they were inspecting a state, their salary was equal to one of its ministers, and their rank was that of a ruler of a state of the second class. Their salaries were derived from the territories under the chiefs of regions¹.

26. The chiefs of regions, on occasion of their appearing at the court of the son of Heaven, had cities assigned them for purification² within his domain like those of his officers of the chief grade.

¹ See page 212, paragraph 2, and note 1, page 213.

² The text says, 'Cities for bathing and washing the hair;'

27. The (appointed) heir-sons¹ of the feudal princes inherited their states. Great officers (in the royal domain) did not inherit their rank. They were employed as their ability and character were recognised, and received rank as their merit was proved. Till their rank was conferred (by the king), (the princes) were in the position of his officers of the chief grade, and so they ruled their states. The Great officers of the states did not inherit their rank and emoluments.

28. The six ceremonial observances were :—capping; marrying; mourning rites; sacrifices; feasts; and interviews. The seven lessons (of morality) were :—(the duties between) father and son; elder brother and younger; husband and wife; ruler and minister; old and young; friend and friend; host and guest. The eight objects of government were :—food and drink; clothes; business (or, the profession); maintenance of distinctions; measures of length; measures of capacity; and definitely assigned rules².

but preparing by mental exercises for appearing before the king is also intimated by the phrase.

¹ A son, generally the eldest son by the wife proper, had to be recognised by the king before he could be sure of succeeding to his father.

² See page 230, paragraph 1.

BOOK IV. THE YÜEH LING

OR

PROCEEDINGS OF GOVERNMENT IN THE DIFFERENT MONTHS.

SECTION I. PART I.

1. In the first month of spring the sun is in Shih, the star culminating at dusk being ʒhan, and that culminating at dawn Wei¹.

2. Its days are *kîâ* and *yî*².

¹ In this month the conjunction of the sun and moon took place in Shih or α Markab Pegasi. ʒhan is a constellation embracing Betelgeuse, Bellatrix, Rigel, γ , δ , ϵ , ζ , η , of Orion; and Wei is ϵ , μ , of Scorpio. Shih is called in the text Ying Shih, 'the Building Shih,' because this month was the proper time at which to commence building.

² *Kîâ* and *yî* are the first two of the 'ten heavenly stems,' which are combined with the 'twelve earthly branches,' to form the sixty binomial terms of 'the cycle of sixty,' that was devised in a remote antiquity for the registration of successive days, and was subsequently used also in the registration of successive years. The origin of the cycle and of the names of its terms is thus far shrouded in mystery; and also the application of those terms to the various purposes of divination. The five pairs of the stems correspond, in the jargon of mysterious speculation, to the five elements of wood, fire, earth, metal, and water, and, as will be seen in this Book, to the seasons of spring, summer, the intermediate centre, autumn, and winter. Whether there be anything more in this short notice than a declaration of this fact, or any indication of the suitability of 'the days' for certain 'undertakings' in them, as even the *Khien-lung* editors seem to think, I cannot say.

3. Its divine ruler is Thái Hào, and the (attending) spirit is Kâu-mang¹.
4. Its creatures are the scaly².
5. Its musical note is K'io, and its pitch-tube is the Thái 3hâu³.
6. Its number is eight⁴; its taste is sour; its smell is rank.

¹ Thái Hào, 'the Grandly Bright,' is what is called 'the dynastic designation' of Fû-hsî and his line. By the time that the observances described in this Book had come into use, Fû-hsî and other early personages had been deified (帝), and were supposed to preside over the seasons of the year. To him as the earliest of them was assigned the presidency of the spring, and the element of wood, the phenomena of vegetation being then most striking. He was the 'divine ruler' of the spring, and sacrificed to in its months; and at the sacrifices there was associated with him, as assessor, an inferior personage called Kâu-mang (literally, 'curling fronds and spikelets'), said to have been a son of Sháo Hào, another mythical sovereign, founder of the line of K'in Thien (金天氏). But Sháo Hào was separated from Thái Hào by more than 1000 years. The association at these sacrifices in the spring months of two personages so distant in time from each other as Fû-hsî and Kâu-mang, shows how slowly and irregularly the process of deification and these sacrifices had grown up.

² The character for which I have given 'creatures' is often translated by 'insects;' but fishes, having scales, must form a large portion of what are here intended. 'The seven (zodiacal) constellations of the east,' says Wú K'ăng, 'make up the Azure Dragon, and hence all moving creatures that have scales belong to (the element of) wood.'

³ K'io is the name of the third of the five musical notes of the Chinese scale, corresponding to our B (?); and Thái 3hâu is the name of one of the twelve tubes by which, from a very early date, music was regulated. The Thái 3hâu, or 'Great Pipe,' was the second of the tubes that give the 'six upper musical accords.'

⁴ The 'number' of wood is three, which added to five, the

7. Its sacrifice is that at the door¹, and of the parts of the victim the spleen has the foremost place¹.

8. The east winds resolve the cold. Creatures that have been torpid during the winter begin to move. The fishes rise up to the ice. Otters sacrifice fish. The wild geese make their appearance².

9. The son of Heaven occupies the apartment on the left of the *K'ing Yang* (Fane); rides in the carriage with the phoenix (bells), drawn by the azure-dragon (horses), and carrying the green flag; wears the green

'number' of earth, gives eight, the 'number' of the months of spring; but this, to me at least, is only a jargon.

¹ This was one of the sacrifices of the house; see paragraph 6, page 116, and especially the seventh paragraph of Book XX. As the door is the place of exodus, it was the proper place for this sacrifice in the spring, when all the energies of nature begin to be displayed afresh. Among the five viscera,—the heart, the liver, the spleen, the lungs, and the kidneys,—the spleen corresponds to the element of earth, and therefore it was made prominent in this service, in the season when the earth seems to open its womb beneath the growing warmth of the year.

² These are all phenomena of the spring. The third of them is differently expressed in Hwai-nan 3ze, the T'aoist grandson of the founder of the Han dynasty (see Book V of his works), and in the Hsiâ Hsiâo K'ang, showing that this text of the *Lî K'î* was taken from Lü P'ü-wei, if the whole Book were not written by him. They read 魚陟負水, which Professor Douglas renders, 'Fish mount (to the surface of) the water, bearing on their backs pieces of ice.' But the meaning of the longer text is simply what I have given. Ying-tâ says, 'Fishes, during the intense cold of winter, lie close at the bottom of the water, attracted by the greater warmth of the earth; but, when the sun's influence is felt, they rise and swim near to the ice.' 負冰 = 'with their backs near to the ice.' What is said about the otter is simply a superstitious misinterpretation of its habit of eating only a small part of its prey, and leaving the rest on the bank. The geese come from the south on the way to their quarters during the warmer season in the north.

robes, and the (pieces of) green jade (on his cap and at his girdle pendant). He eats wheat and mutton. The vessels which he uses are slightly carved, (to resemble) the shooting forth (of plants)¹.

¹ The *Khing Yang* ('Green and Bright') was one of the principal divisions in the Hall of Distinction of Book XII. We must suppose that the sovereign went there (among other purposes) to give out the first day of the month, and did so in the apartment indicated, and in the style and robes and ornaments of the text, in the first month of spring. The ancient Shun, it is said, set the example of the carriage with bells, whose tinkling was supposed to resemble the notes of the *lwan*, a bird at which we can only guess, and which has been called the phoenix, and the argus pheasant. Horses above eight feet high were called dragon steeds. The predominating green colour suits the season and month; but what made wheat and mutton then peculiarly suitable for the royal mat, I do not know the fancies of Tâoism sufficiently to be able to understand.

In the plates to the *Khien-lung* edition of our classic, the following rude ground-plan of the structure is given to illustrate the various references to it in this Book:—

10. In this month there takes place the inauguration of spring. Three days before this ceremony, the Grand recorder informs the son of Heaven, saying, 'On such and such a day is the inauguration of the spring. The energies of the season are fully seen in wood.' On this the son of Heaven devotes himself to self-purification, and on the day he leads in person the three ducal ministers, his nine high ministers, the feudal princes (who are at court), and his Great officers, to meet the spring in the eastern suburb¹;

The building is made to consist of nine large apartments or halls; three fronting the different points of the compass, and one in the centre; making nine in all. That in the centre was called 'The Grand Apartment of the Grand Fane;' south from it was 'The Ming Thang Grand Fane;' on the east 'The K'ing Yang Grand Fane;' on the west 'The Jung Yang Grand Fane;' and on the north 'The Hsüan Thang Grand Fane.'

In the second month of the seasons, the king went the round of the Grand Fanes. The four corner apartments were divided into two each, each one being named from the Grand Fane on the left or right of which it was. Commencing with the half on the left of the K'ing Yang Fane, the king made the circuit of all the others and of the Fanes, returning to the other half on the right of the Hsüan Thang Fane in the twelfth month. The Grand Apartment in the centre was devoted to the imaginary season of the centre, between the sixth and seventh months, or the end of summer and beginning of autumn.

¹ We are not told what the ceremonies in the inauguration of the spring were. The phrase *li k'un* (立春) is the name of the first of the twenty-four terms into which the Chinese year is divided, dating now from the sun's being in the fifteenth degree of Aquarius. K'ang Hsüan thought that the meeting of the spring in the eastern suburb was by a sacrifice to the first of 'the five planetary gods,' corresponding to Jupiter, 'the Azure T'i, called Ling-wei-jang' (靈威仰). But where he found that name, and what is its significance, is a mystery; and the whole doctrine

and on their return, he rewards them all in the court¹.

11. He charges his assistants² to disseminate (lessons of) virtue, and harmonise the governmental orders, to give effect to the expressions of his satisfaction and bestow his favours; down to the millions of the people. Those expressions and gifts thereupon proceed, every one in proper (degree and direction).

12. He also orders the Grand recorder to guard the statutes and maintain the laws, and (especially) to observe the motions in the heavens of the sun and moon, and of the zodiacal stars in which the conjunctions of these bodies take place, so that there should be no error as to where they rest and what they pass over; that there should be no failure in the record of all these things, according to the regular practice of early times.

13. In this month the son of Heaven on the first (hsin)³ day prays to God for a good year; and afterwards, the day of the first conjunction of the sun and moon having been chosen, with the handle and share of the plough in the carriage, placed between the man-at-arms who is its third occupant and the driver, he conducts his three ducal ministers, his nine high ministers, the feudal princes and his Great officers, all with their own hands to plough the field of

of five planetary T'is is held to be heresy, and certainly does not come from the five King.

¹ This rewarding, it is understood, was that mentioned in paragraph 15, p. 217.

² These assistants are supposed to be the 'three ducal ministers.'

³ This took and takes place on the first hsin (辛) day, the first day commencing with that character, the eighth of the 'stems.'

God. The son of Heaven turns up three furrows, each of the ducal ministers five, and the other ministers and feudal princes nine¹. When they return, he takes in his hand a cup in the great chamber, all the others being in attendance on him and the Great officers, and says, 'Drink this cup of comfort after your toil.'

14. In this month the vapours of heaven descend and those of the earth ascend. Heaven and earth are in harmonious co-operation. All plants bud and grow.

15. The king gives orders to set forward the business of husbandry. The inspectors of the fields are ordered to reside in the lands having an eastward exposure, and (see that) all repair the marches and divisions (of the ground), and mark out clearly the paths and ditches. They must skilfully survey the mounds and rising grounds, the slopes and defiles, the plains and marshes, determining what the different lands are suitable for, and where the different grains will grow best. They must thus instruct and lead on the people, themselves also engaging in the tasks. The business of the fields being thus ordered, the guiding line is first put in requisition, and the husbandry is carried on without error².

16. In this month orders are given to the chief director of Music to enter the college, and practise the dances (with his pupils)³.

¹ The services described here are still performed, in substance, by the emperors of China and their representatives throughout the provinces. The field is generally called 'the imperial field,' through error. The grain produced by it was employed in the sacrifices or religious services of which God (Shang Tî) was the object, and hence arose the denomination.

² Compare vol. iii, pp. 320-322, 370-373.

³ 'The chief director of Music' would be the same as the Tâ

17. The canons of sacrifice are examined and set forth, and orders are given to sacrifice to the hills and forests, the streams and meres, care being taken not to use any female victims¹.

18. Prohibitions are issued against cutting down trees.

19. Nests should not be thrown down; unformed insects should not be killed, nor creatures in the womb, nor very young creatures, nor birds just taking to the wing, nor fawns, nor should eggs be destroyed.

20. No congregating of multitudes should be allowed, and no setting about the rearing of fortifications and walls².

21. Skeletons should be covered up, and bones with the flesh attached to them buried.

22. In this month no warlike operations should be undertaken; the undertaking of such is sure to be followed by calamities from Heaven. The not undertaking warlike operations means that they should not commence on our side³.

Sze Yo of the *K'áu Lî*, Book XXII. There were dances of war (wan), and dances of peace (wân); but neither is in the text. But either term may include both classes of dancing. Callery translates by 'faire des évolutions.'

¹ Not to destroy the life unborn. At 'the great sacrifices,' those to Heaven and Earth, and in the ancestral temple, only male victims were used, females being deemed 'unclean.' The host of minor sacrifices is intended here.

² Such operations would interfere with the labours of husbandry.

³ War is specially out of time in the genial season of spring; but a state, when attacked, must, and might, defend itself even then.

23. No change in the ways of heaven is allowed ; nor any extinction of the principles of earth ; nor any confounding of the bonds of men¹.

24. If in the first month of spring the governmental proceedings proper to summer were carried out, the rain would fall unseasonably, plants and trees would decay prematurely, and the states would be kept in continual fear. If the proceedings proper to autumn were carried out, there would be great pestilence among the people ; boisterous winds would work their violence ; rain would descend in torrents ; orach, fescue, darnel, and southernwood would grow up together. If the proceedings proper to winter were carried out, pools of water would produce their destructive effects, snow and frost would prove very injurious, and the first sown seeds would not enter the ground².

PART II.

1. In the second month of spring, the sun is in Khwei, the star culminating at dusk being Hû, and that culminating at dawn Kien-hsing³.

2. Its days are *kiâ* and *yî*. Its divine ruler is Thái Hào, the attending spirit is Kâu-mang. Its

¹ Compare what is said in the fifth Appendix to the Yî King, paragraph 4 (vol. xvi, pp. 423, 424). The next paragraph is the sequel of this.

² Such government would be comparable to the inversion of the seasons in the course of nature. Compare Proverbs xxvi. 1.

³ The constellation Khwei contains β (Mirac), δ , ϵ , ζ , μ , ν , π of Andromeda, and some stars of Pisces. Hû or Hû Kih contains δ , ϵ , η , κ , of Canis Major ; and δ , ω , of Argo ; and Kien-hsing ν , ξ , π , ρ , σ , of Sagittarius' head.

creatures are the scaly. Its musical note is *K'io*, and its pitch-tube is the *K'ia Kung*¹.

3. Its number is eight; its taste is sour; its smell is rank. Its sacrifice is that at the door, and of the parts of the victim the spleen has the foremost place.

4. The rain begins to fall². The peach tree begins to blossom. The oriole sings. Hawks are transformed into doves³.

5. The son of Heaven occupies the *K'ing Yang* Grand Fane⁴; rides in the carriage with the phoenix bells, drawn by the azure dragon-(horses), and bearing the green flag. He is dressed in the green robes, and wears the azure gems. He eats wheat

¹ *K'ia Kung*, 'the double tube,' is the second tube of the six lower accords.

² Literally, 'There commence the rains.' 'The rains' is now the name of the second of the twenty-four terms (February 15 to March 4).

³ This is the converse of the phenomenon in page 277, paragraph 3. Both are absurd, but the natural rendering in the translation is the view of K'ang, Ying-tâ, K'ao Yü (the glossarist of Hwâi-nan 3ze), and the *K'ien-lung* editors. Seeking for the actual phenomenon which gave rise to the superstitious fancy, Professor Douglas renders the corresponding sentence of the Hsiâ K'ang by 'hawks become crested hawks,' and thinks that the notice is based on the appearance of the hawks when 'the rearing instinct becomes excessive, and birds of prey become excited.' It may be so, but this meaning cannot be brought out of the text, and should not be presented as that of the writer of the Book.

⁴ See the note on p. 252. The three apartments (two of them subdivided) on the east of the Hall of Distinction, all received the general designation of *K'ing Yang*, 'the Green and Bright,' as characteristic of the season of Spring. It was now the second month of that season, and the king takes his place in the principal or central apartment, 'the Grand Fane.'

and mutton. The vessels which he uses are slightly carved, (to resemble) the bursting forth (of nature).

6. In this month, they keep both the young buds and those more advanced from being disturbed; they nourish both the young animals and those not fully grown; they especially watch over all orphans.

7. The fortunate day is chosen, and orders are given to the people to sacrifice at their altars to the spirits of the ground¹.

8. Orders are given to the (proper) officers to examine the prisons; to remove fetters and handcuffs; that there shall be no unregulated infliction of the bastinado; and that efforts shall be made to stop criminal actions and litigations.

9. In this month the swallow makes its appearance². On the day of its arrival, the son of Heaven sacrifices to the first match-maker with a bull, a ram, and a boar. He goes to do so in person, with his queen and help-mates, attended by his nine ladies of honour. Peculiar courtesy is shown to those whom he has (lately) approached. Bow-cases have been brought, and a bow and arrows are given to each before (the altar of) the first match-maker.

10. In this month day and night are equal³. Thunder utters its voice, and the lightning begins

¹ The sacrifice here was not that to Earth, which it was competent to the king alone to offer; nor to the spirits of the territories of the different states. It was offered by the people generally to the spirits presiding over their fields.

² The swallow is 'the dark-coloured bird,' of the third sacrificial ode of the Shang dynasty; see vol. iii, p. 307.

³ The vernal equinox.

to be seen. Insects in their burrows are all in motion, opening their doors and beginning to come forth.

11. Three days before the thunder¹, a bell with a wooden tongue is sounded, to give notice to all the people. 'The thunder,' it is said, 'is about to utter its voice. If any of you be not careful of your behaviour, you shall bring forth children incomplete; there are sure to be evils and calamities.'

12. At the equinox they make uniform the measures of length and capacity; the weight of 30 catties, the steelyard, and the weight of 120 catties. They correct the peck and bushel, the steelyard weights and the bushel-scraper².

13. In this month few of the husbandmen remain in their houses in the towns. They repair, however, their gates and doors, both of wood and wattles; and put their sleeping apartments and temples all in good repair. No great labours, which would interfere with the work of husbandry, should be undertaken³.

14. In this month (the fishermen) should not let the streams and meres run dry, nor drain off all the water from the dams and ponds, (in order to catch all the fish), nor should (the hunters) fire the hills and forests.

¹ We are not told how they knew this third day.

² A catty (*k'in*) at present = 1½ lb. avoirdupois. The *k'hün*, or 30 catties, = 40 lbs. av.; and the *shih*, or 120 catties, = 160 lbs. av.; see Williams' Commercial Guide, pp. 278-231. The *tâu* (or peck, in use in the market) contains 10 catties of dry, cleaned rice, and measures 316 cubic *hün*, or inches; and the *hû*, or bushel, = 5 *tâu*. The bushel-scraper is a piece of wood or roller used to level the top of the *hû*. But see Williams, pp. 281, 282.

³ Compare vol. iii, pp. 368-373.

15. The son of Heaven at this time offers a lamb (to the ruler of cold), and opens the (reservoirs of) ice. Before (using it generally), they offer some in their principal apartment or in the ancestral temple¹.

16. On the first ting day² orders are given to the chief director of Music to exhibit the civil dances and unfold the offerings of vegetables³ (to the inventor of music). The son of Heaven, at the head of the three ducal ministers, his nine high ministers, the feudal princes (at court), and his Great officers, goes in person to see the ceremony. On the second ting² day orders are given again to the same chief to enter the college, and practise music (with his pupils).

17. In this month at the (smaller) services of supplication⁴ they do not use victims. They use offerings of jade, square and round, and instead (of victims) skins and pieces of silk.

18. If in this second month of spring the governmental proceedings proper to autumn were observed,

¹ Compare vol. iii, page 445. Where there was an ancestral temple, the ice would be presented there. The people who had no such temple might present it before the spirit-tablets of their deceased in their principal apartment, where these were set up.

² The fourth and fourteenth cycle days.

³ The offerings were small and scanty in this month, fruits not yet being ready for such a use. Cress and tussel-pondweed are mentioned among the vegetables which were presented on this occasion.

⁴ The received text here means not 'services of supplication,' but sacrifices. That which I have adopted is found in 3hâi Yung, and is approved by the *Khien-lung* editors. It is a necessary alteration, for in paragraphs 9 and 15 we have instances of victims used this month at sacrifices. The change in the text is not great in Chinese, the character 祈 for 祀.

there would be great floods in the states; cold airs would be constantly coming; and plundering attacks would be frequent. If those of winter were observed, the warm and genial airs would be insufficient; the wheat would not ripen; and raids and strifes would be rife among the people. If those of summer were observed, there would be great droughts among the people; the hot airs would come too early; and caterpillars and other insects would harm the grain¹.

PART III.

1. In the last month of spring, the sun is in Wei, the constellation culminating at dusk being *K'ih-hsing*, and that culminating at dawn *K'hien-niû*².

2. Its days are *kîâ* and *yî*. Its divine ruler is *Thâi Hâo*, and the attending spirit is *Kâu-mang*. Its creatures are the scaly. Its musical note is the *K'io*, and its pitch-tube is the *Kû Hsien*³. Its number is eight. Its taste is sour. Its smell is rank.

3. Its sacrifice is that at the door, and of the parts of the victim the spleen has the foremost place.

¹ Before this and the corresponding paragraphs in the Parts of the Book that follow, we must always understand paragraph 23 of the last Part, of which these concluding paragraphs are supposed to be the natural sequence.

² Wei is the seventeenth of the twenty-eight Chinese constellations (longitude in 1800, 44° 8' 17'') corresponding to *Musca borealis*. *K'ih-hsing* is understood to be α (Alphard) of *Hydra*, and small stars near it. *K'hien-niû* corresponds to certain stars (ϵ , μ , ν) in the neck of *Aquila*.

³ *Kû Hsien*, 'the lady bathes,' is the third of the tubes that give the six upper musical accords.

4. The *Elaeococca* begins to flower¹. Moles are transformed into quails². Rainbows begin to appear. Duckweed begins to grow.

5. The son of Heaven occupies the apartment on the right of the *K'ing Yang* (Fane); rides in the carriage with the phoenix bells, drawn by the azure dragon-(horses), and bearing the green flag. He is dressed in the green robes, and wears the azure gems. He eats wheat and mutton. The vessels which he uses are slightly carved, (to resemble) the bursting forth (of nature).

6. In this month the son of Heaven presents robes yellow as the young leaves of the mulberry tree to the ancient divine ruler (and his queen)³.

7. Orders are given to the officer in charge of the boats to turn a boat bottom up. Five times he does so, and five times he turns it back again, after which he reports that it is ready for the son of Heaven, who

¹ This would probably be the *Elaeococca vernicia*, or *Aleurites cordata*.

² This statement, perhaps, arose from seeing quails running about among the mole-hills. The *K'ien-lung* editors say that the quails fly at night, and in the day keep hidden among the grass; but they seem to admit the transformation. Professor Douglas explains the error from a want of recognition of the migration of quails.

³ Callery translates this by:—'L'empereur offre de la belle jaune de céréales (aux empereurs anciens et modernes qui l'ont précédé),' following a different reading for the article offered. The general view is what I have followed. The offering is supposed to have been in connexion with a sacrifice preparatory to the silkworm season. The rearing of silkworms was due, it was supposed, to Hsü-ling, the wife of the Yellow Ti. He is the 'Ancient T'í' intended here, I suppose. The name is not to be taken as in the plural. See the *Khang-hsü* dictionary on the character *shü* (壽).

then gets into it for the first time (this spring). He offers a snouted sturgeon (which he has caught) in the rear apartment of the ancestral temple, and also prays that the wheat may yield its produce¹.

8. In this month the influences of life and growth are fully developed; and the warm and genial airs diffuse themselves. The crooked shoots are all put forth, and the buds are unfolded. Things do not admit of being restrained.

9. The son of Heaven spreads his goodness abroad, and carries out his kindly promptings. He gives orders to the proper officers to distribute from his granaries and vaults, giving their contents to the poor and friendless, and to relieve the needy and destitute; and to open his treasuries and storehouses, and to send abroad through all the nation the silks and other articles for presents, thus stimulating the princes of states to encourage the resort to them of famous scholars and show courtesy to men of ability and virtue.

10. In this month, he charges the superintendents of works, saying, 'The rains of the season will be coming down, and the waters beneath will be swelling up. Go in order over the states and visit the towns, inspecting everywhere the low and level grounds. Put the dykes and dams in good repair, clear the ditches and larger channels, and open all paths, allowing no obstruction to exist.'

¹ The five times repeated inspection of the boat does seem rather ridiculous. We must regard the king's taking to the boat as an encouragement to the fishermen, as his ploughing was to the husbandmen. The long-snouted sturgeon has always been called 'the royal sturgeon.' How the praying for a good wheat harvest seems to be connected with this ceremony I do not know.

11. The nets used in hunting animals and birds, hand nets, archers' disguises, and injurious baits should not (in this month) issue from (any of) the nine gates¹.

12. In this month orders are given to the foresters throughout the country not to allow the cutting down of the mulberry trees and silk-worm oaks. About these the cooing doves clap their wings, and the crested birds light on them². The trays and baskets with the stands (for the worms and cocoons) are got ready. The queen, after vigil and fasting, goes in person to the eastern fields to work on the mulberry trees. She orders the wives and younger women (of the palace) not to wear their ornamental dresses, and to suspend their woman's-work, thus stimulating them to attend to their business with the worms. When this has been completed, she apports the cocoons, weighs out (afterwards) the silk, on which they go to work, to supply the robes for the solstitial and other great religious services, and for use in the ancestral temple. Not one is allowed to be idle.

13. In this month orders are given to the chiefs of works, to charge the workmen of their various departments to inspect the materials in the five store-houses:—those of iron and other metals; of skins

¹ 'On each side of the wall of the royal city,' says Lû Tien (early in the Sung dynasty), 'there were three gates.' Wû K'ang says, 'The three gates on the south were the chief gates. Generally, such things as are mentioned here might issue from the other gates, but not from these; but in this month they could not issue from any of the nine.' Other explanations of 'the nine gates' have been attempted. The 'baits' (or medicines) were used to attract and to stupefy.

² Perhaps the hoopoe.

and hides and sinews; of horn and ivory; of feathers, arrows and wood (for bows); and of grease, glue, cinnabar, and varnish. (They are to see) that all these things be good. The workmen then labour at their several tasks. (The chiefs) inspect their work, and daily give them their orders. They must not produce anything contrary to what the time requires; nor can they practise a licentious ingenuity, which would dissipate the minds of their superiors.

14. In the end of this month a fortunate day is chosen for a grand concert of music. The son of Heaven, at the head of the three ducal ministers, the nine high ministers, the feudal princes (at court), and his great officers, goes in person to witness it.

15. In this month they collect the large, heavy bulls, and fiery stallions, and send them forth to the females in the pasture grounds. They number and make a list of the animals fit for victims, with the foals and calves.

16. Orders are given for the ceremonies against pestilence throughout the city; at the nine gates (also) animals are torn in pieces in deprecation (of the danger):—to secure the full development of the (healthy) airs of the spring¹.

17. If, in this last month of spring, the governmental

¹ Compare Analects X, 10, 2. The ceremonies there referred to were the same as those here, carried out in the villages and, indeed, throughout the land. Diseases prevailing were attributed by superstition to the action of evil spirits, and ridiculous measures adopted to drive them away. Confucius and others, even the government itself, gave countenance to these, seeing, perhaps, that in connexion with them the natural causes of disease would be in a measure dispelled.

proceedings proper to winter were observed, cold airs would constantly be prevailing; all plants and trees would decay; and in the states there would be great terrors. If those proper to summer were observed, many of the people would suffer from pestilential diseases; the seasonable rains would not fall; and no produce would be derived from the mountains and heights. If those proper to autumn were observed, the sky would be full of moisture and gloom; excessive rains would fall early; and warlike movements would be everywhere arising.

SECTION II. PART I.

1. In the first month of summer, the sun is in Pĭ; the constellation culminating at dusk being Yĭ, and that culminating at dawn Wû-nü¹.

2. Its days are ping and ting².

3. Its divine ruler is Yen Tĭ, and the (attending) spirit is Kû-yung³.

4. Its creatures are the feathered.

5. Its musical note is Kih, and its pitch-tube is the Kung Lü⁴.

6. Its number is seven⁵. Its taste is acrid. Its smell is that of things burning.

¹ Pĭ is the name for the Hyades, or, more exactly, of six stars in Hyades, with μ and ν of Taurus; it is the nineteenth of the Chinese constellations. Yĭ is crater. Wû-nü is not so well identified. Williams says that it is 'a star near the middle of Capricorn,' but others say in Hercules. The *R* Yâ makes it the same as Hsü-nü (須女). Probably it was a star in the constellation Nü of Aquarius.

² The third and fourth stem characters of the cycle.

³ Yen Tĭ ('the blazing Tĭ') is the dynastic designation of Shān Nāng, generally placed next to Fû-hsĭ in Chinese chronology, and whose date cannot be assigned later than the thirty-first century B.C. Kû-yung in one account is placed before Fû-hsĭ; in a second, as one of the ministers of Hwang Tĭ; and in a third, as a son of K'wan-hsü (B.C. 2510-2433). He was 'the Director of Fire,' and had the presidency of summer.

⁴ Kih is the fourth of the notes of the Chinese scale, and Kung Lü ('the middle Spine') the third of the tubes that give the six lower accords.

⁵ The number of fire is 2, which + 5, that of earth, = 7.

7. Its sacrifice is that at the furnace¹; and of the parts of the victim the lungs have the foremost place.

8. The green frogs croak. Earth-worms come forth. The royal melons grow². The sow-thistle is in seed.

9. The son of Heaven occupies the apartment on the left of the Ming Thang (Grand Fane); rides in the vermilion carriage, drawn by the red horses with black tails, and bearing the red flag. He is dressed in the red robes, and wears the carnation jade. He eats beans and fowls. The vessels which he uses are tall, (to resemble) the large growth (of things).

10. In this month there takes place the inauguration of summer. Three days before this ceremony, the Grand recorder informs the son of Heaven, saying, 'On such-and-such a day is the inauguration of summer. The energies of the season are most fully seen in fire.' On this the son of Heaven devotes himself to self-purification; and on the day, at the head of the three ducal ministers, the nine high ministers, and his Great officers, he proceeds to meet the summer in the southern suburbs. On their return, rewards are distributed. He grants to the feudal princes (an increase of) territory. Congratulations and gifts proceed, and all are joyful and pleased.

11. Orders are also given to the chief master of

¹ It was natural that they should sacrifice here in the summer. 'The lungs' is the fourth of the five viscera, and 'metal' the fourth of the five elements; but 'fire subdues metal.' This is supposed to account for the prominence given to the lungs in this sacrifice.

² According to Williams this is the 'common cucumber.'

music to teach the practice of ceremonies and music together.

12. Orders are given to the Grand Peace-maintainer¹ to recommend men of eminence, allow the worthy and good to have free course and bring forward the tall and large. His conferring of rank and regulation of emolument must be in accordance with the position (of the individual).

13. In this month what is long should be encouraged to grow longer, and what is high to grow higher. There should be no injuring or overthrowing of anything; no commencing of works in earth; no sending forth of great multitudes (on expeditions); no cutting down of large trees.

14. In this month the son of Heaven begins to wear thin dolichos cloth.

15. Orders are given to the foresters throughout the country to go forth over the fields and plains, and, for the son of Heaven, to encourage the husbandmen, and stimulate them to work, and not let the season slip by unimproved.

Orders are (also) given to the minister of Instruction to travel in order through the districts to the borders, charging the husbandmen to work vigorously, and not to rest in the towns.

16. In this month they chase away wild animals to prevent them from doing harm to any of the

¹ The 'Grand Peace-maintainer' (大尉) was a title under the *K'in* dynasty, and instituted by it, of the Minister of War. The functions of the latter, as described in the last Book, page 234, are in harmony with what is said here. The occurrence of the name bears out the attributing of this Book to Lū Pū-wei.

(growing) grain ; but they should not have a great hunting.

17. When the husbandmen present (the first-fruits of) their wheat, the son of Heaven tastes it along with some pork, first offering a portion in the apartment behind (the hall of the) ancestral temple.

18. In this month they collect and store up the various medicinal herbs. Delicate herbs (now) die ; it is the harvest time (even) of the wheat. They decide cases for which the punishments are light ; they make short work of small crimes, and liberate those who are in prison for slight offences¹.

19. When the work with the silk-worms is over, the queen presents her cocoons ; and the tithe-tax of cocoons generally is collected, according to the number of mulberry trees ; for noble and mean, for old and young there is one law. The object is with such cocoons to provide materials for the robes to be used at the sacrifices in the suburbs and in the ancestral temple.

20. In this month the son of Heaven (entertains his ministers and princes) with strong drink and with (much) observance of ceremony and with music².

¹ There does not appear to be any connexion between the first sentence of this paragraph and the remainder of it. The medicinal herbs are collected while all their vigour is in them. For the things in the second sentence the 'summer heats' make a premature harvest ; and this seems to lead to the third topic,—the saving those charged with slight offences from the effects of that heat in confinement.

² The *K'ien-lung* editors have a note here, which is worth quoting, to the effect that as the great solstitial sacrifices and the seasonal sacrifices of the ancestral temple do not appear in this Book, the drinking here was at court entertainments.

21. If, in this first month of summer, the proceedings proper to autumn were observed, pitiless rains would be frequent; the five esculent plants¹ would not grow large, and in all the borders people would have to enter the places of shelter. If those proper to winter were observed, all plants and trees would wither early, and afterwards there would be great floods, destroying city and suburban walls. If those proper to spring were observed, there would be the calamity of locusts, violent winds would come, and plants in flower would not go on to seed.

PART II.

1. In the second month of summer the sun is in the eastern 3ing, the constellation culminating at dusk being Khang, and that culminating at dawn Wei².

2. Its days are ping and ting. Its divine ruler is Yen Ti, and the (attending) spirit is *K'û-yung*. Its creatures are the feathered. Its musical note is *K'ih*, and its pitch-tube is *Sui Pin*³.

3. Its number is seven. Its taste is acrid. Its smell is that of things burning. Its sacrifice is that at the furnace; and of the parts of the victim the lungs have the foremost place.

4. The (period of) slighter heat arrives; the praying mantis is produced; the shrike begins to give its notes; the mocking-bird ceases to sing⁴.

¹ Hemp or flax, millet, rice, bearded grain, and pulse.

² 3ing comprehends γ, ε, ζ, λ, μ, ν, Gemini; Khang, ι, κ, λ, μ, ρ, Virgo; and Wei corresponds to α, Aquarius, and ε, θ, Pegasus.

³ *Sui Pin*, 'the flourishing Guest,' is the fourth of the tubes that give the six upper musical accords.

⁴ This is here 'the inverted Tongue.' The *Khang-hsi* dictionary

5. The son of Heaven occupies the Ming Thang Grand Fane; rides in the vermilion carriage, drawn by the red horses with black tails, and bearing the red flag. He is dressed in the red robes, and wears the carnation gems. He eats beans and fowls. The vessels which he uses are tall, (to resemble) the large growth (of things).

6. They encourage the (continued) growth of what is strong and beautiful¹.

7. In this month orders are given to the music-masters to put in repair the hand-drums, smaller drums, and large drums; to adjust the lutes, large and small, the double flutes, and the pan-pipes; to teach the holding of the shields, pole-axes, lances, and plumes; to tune the organs, large and small, with their pipes and tongues; and to put in order the bells, sonorous stones, the instrument to give the symbol for commencing, and the stopper².

8. Orders are given to the (proper) officers to pray for the people and offer sacrifice to the (spirits of the) hills, streams, and all springs. (After that) comes the great summer sacrifice for rain to God, when all

says it is the same as 'the hundred Tongues;' the Chinese mocking-bird.

¹ K'ü Hsî would remove this paragraph to the thirteenth of the last Part. It seems to me to be in its proper place.

² See vol. iii, p. 324. The stopper is represented thus:—

It was made to sound by a metal rod drawn along the spinous back. I have seen a similar instrument, used for the same purpose, brought from Madras.

the instruments of music are employed. Then orders are given throughout all the districts to sacrifice to the various princes, high ministers, and officers who benefited the people; praying that there may be a good harvest of grain¹.

9. The husbandmen present (the first-fruits of) their millet; and in this month the son of Heaven partakes of it along with pullets, and with cherries set forth beside them, first offering a portion in the apartment behind the ancestral temple.

10. The people are forbidden to cut down the indigo plant to use it in dyeing²,

11. Or to burn wood for charcoal, or to bleach cloth in the sun.

12. The gates of cities and villages should not be shut³, nor should vexatious inquiries be instituted at the barrier gates or in the markets.

¹ The first and last of the three sacrificial services in the paragraph were subsidiary to the second, the great praying for rain to God by the sovereign; the motive is not mentioned in the text, but only he could conduct a service to God. Callery renders:—*'En même temps l'empereur invoque le ciel avec grand appareil (afin d'obtenir de la pluie), et cette cérémonie est accompagnée de grande musique.'* All Chinese commentators admit that the performer was the sovereign. K'ang Khang-k'hang says: 'For this sacrifice to God, they made an altar (or altars) by the side of the (grand altar in the) southern suburb, and sacrificed to the five essential (or elemental) gods with the former rulers as their assessors.' But the K'ien-lung editors insist on the text's having 'God,' and not 'five gods,' and that the correct view is that the sacrifice was to the one God dwelling in the bright sky, or, as Williams renders the phrase, 'the Shang Tí of the glorious heaven.'

² The plant would not yet be fully fit for use.

³ Every facility should be afforded for the circulation of air during the summer heats.

13. Leniency should be shown to prisoners charged (even) with great crimes, and their allowance of food be increased¹.

14. Impregnated mares are collected in herds by themselves, and the fiery stallions are tied up. The rules for the rearing of horses are given out.

15. In this month the longest day arrives. The influences in nature of darkness and decay and those of brightness and growth struggle together; the tendencies to death and life are divided². Superior men give themselves to vigil and fasting. They keep retired in their houses, avoid all violent exercise, restrain their indulgence in music and beautiful sights, eschew the society of their wives, make their diet spare, use no piquant condiments, keep their desires under rule, and maintain their spirits free from excitement. The various magistrates keep things quiet and inflict no punishments³;—to bring about that state of settled quiet in which the influence of darkness and decay shall obtain its full development.

16. Deer shed their horns. Cicadas begin to sing. The midsummer herb is produced. The tree hibiscus flowers⁴.

17. In this month fires should not be lighted (out of doors) in the southern regions (of the country).

¹ The leniency would be seen in the lightening of their fetters for one thing,—in consequence of the exhaustion produced by the season.

² Decay begins to set in, while growth and vigour seek to maintain their hold.

³ The *Khien-lung* editors approve a reading here, which means, instead of 'no punishments,' 'no rash or hurried action.'

⁴ The 'tree hibiscus' is the 'hibiscus syriacus.' The 'half-summer herb' is medicinal. It is 'white, with round seeds, and of a hot and pungent taste.'

18. People may live in buildings high and bright. They may enjoy distant prospects. They may ascend hills and heights. They may occupy towers and lofty pavilions¹.

19. If, in the second month of summer, the governmental proceedings of winter were observed, hail and cold would injure the grain; the roads would not be passable; and violent assaults of war would come. If the proceedings proper to spring were observed, the grains would be late in ripening; all kinds of locusts would continually be appearing; and there would be famine in the states. If those proper to autumn were observed, herbs and plants would drop their leaves; fruits would ripen prematurely; and the people would be consumed by pestilence.

PART III.

1. In the third month of summer the sun is in Liû, the constellation culminating at dusk being Kwo, and that culminating at dawn Khwei².

2. Its days are ping and ting. Its divine ruler is Yen Ti, and the (assisting) spirit is K'kû-yung. Its musical note is Kih, and its pitch-tube is Lin Kung³.

¹ At the beginning of this paragraph there should be—'In this month.'

² Liû comprehends δ , ϵ , ζ , η , θ , ρ , σ , and ω Hydræ; Hwo is the same as Hsin, the fifth of the Chinese zodiacal constellations comprehending Antares, σ , τ , and two c. 2584, 2587, Scorpio; Khwei (as stated above, p. 257) comprehends β (Mirac), δ , ϵ , ζ , μ , ν , π of Andromeda, and some stars of Pisces.

³ The fourth of the tubes that give the six lower musical accords.

3. Its number is seven. Its taste is acrid. Its smell is that of things burning. Its sacrifice is that at the furnace; and of the parts of the victim the lungs have the foremost place.

4. Gentle winds begin to blow. The cricket takes its place in the walls. (Young) hawks learn to practise (the ways of their parents)¹. Decaying grass becomes fire-flies.

5. The son of Heaven occupies the apartment on the right of the Ming Thang (Fane); rides in the vermilion carriage, drawn by the red horses with black tails, and bearing the red flag. He is dressed in the red robes, and wears the carnation gems. He eats beans and fowls. The vessels which he uses are tall, (to resemble) the large growth (of things).

6. Orders are given to the master of the Fishermen to attack the alligator, to take the gavia, to present the tortoise, and to take the great turtle².

7. Orders are given to the superintendent of the Meres to collect and send in the rushes available for use.

8. In this month orders are given to the four

¹ Compare what is said about hawks in paragraph 4, page 258. 'Here,' says Wang Thao, 'we have the turtle-doves transformed back to hawks, showing that the former notice was metaphorical.' What is said about the fire-flies is, of course, a mistaken fancy.

² The first of these animals—the *k'iao*—is, probably, the alligator or crocodile; it was taken only after a struggle or fight. The second—the *tho*—had a skin used in making drums; and its flesh, as well as that of the fourth—the *yüan*—was used in making soup.

inspectors¹ to make a great collection over all the districts of the different kinds of fodder to nourish the sacrificial victims; and to require all the people to do their utmost towards this end;—to supply what is necessary for (the worship of) God (who dwells in) the great Heaven, and for the spirits of the famous hills, great streams, and four quarters, and for the sacrifices to the Intelligences of the ancestral temple, and at the altars to the spirits of the land and grain; that prayer may be made for blessing to the people.

9. In this month orders are given by the officers of women's (work), on the subject of dyeing². (They are to see) that the white and black, the black and green, the green and carnation, the carnation and white be all according to the ancient rules, without error or change; and that their black, yellow, azure, and carnation be all genuine and good, without any presumptuous attempts at imposition. These furnish the materials for the robes used at the sacrifices in the suburbs and the ancestral temple; for flags and their ornaments; and for marking the different degrees of rank as high or low.

10. In this month the trees are luxuriant; and orders are given to the foresters to go among the hills and examine the trees, and see that the people do not cut any down or lop their branches³.

¹ Of hills, forests, rivers, and meres.

² We find full details of the number and duties of the superintendents of women's work, with its tailoring, dyeing, and other things, in the *Kâu Lî*, Books I and VII.

³ The *Khien-lung* editors say that this was to let the process of growth have its full course; and, besides, that wood cut down in spring and summer will be found full of insects.

11. There should not be any work in earth¹ (now) undertaken; nor any assembling of the princes of the states; nor any military movements, causing general excitement. There should be no undertaking of (such) great affairs, which will disturb the nourishing growth that is proceeding, nor any issuing of orders to be hereafter carried into effect. All these things will interfere with the business of husbandry, (which is specially dear to) the Spirits². The floods are now great and overflow the roads; husbandry (dear to) the Spirits has to take in hand its various tasks. The curse of Heaven will come on the undertaking of great affairs (at this time).

¹ Such as building walls and fortifications, or laying out the ground.

² The text is—'will interfere with the business of Shǎn Nǎng (妨神農之事).' How is it that 'husbandry' has here the epithet of Shǎn, or 'spiritual,' 'mysterious,' applied to it? The *K'ien-lung* editors say:—'Zhāi Yung (our second century) makes Shǎn Nǎng to be Yen Tî (the divine ruler of the summer). K'ang made the name to be that of "the spirit of the ground." K'ao Yü (second century) took it as a name for the minister of Husbandry. To some extent each of these views might be admitted, but none of them is very certain. Looking carefully at the text it simply says that no great undertakings should be allowed to interfere with husbandry. That it does not plainly say husbandry, but calls it the Shǎn husbandry, is from a sense of its importance, and therefore making it out to be Spirit-sanctioned. Heaven produced the people, and the grain to nourish them; is not sowing and reaping the business of Heaven? When a ruler knows this, he feels that he is under the inspection of Heaven in his reverent regard of the people, and the importance which he attaches to husbandry. He will not dare lightly to use the people's strength, so as to offend against Heaven.' I have tried to bring out their view in my version.

12. In this month the ground lies steaming and wet beneath the heats, for great rains are (also) continually coming. They burn the grass lying cut upon the ground¹ and bring the water over it. This is as effectual to kill the roots as hot water would be; and the grass thus serves to manure the fields of grain and hemp, and to fatten the ground which has been but just marked out for cultivation.

13. If, in the last month of summer, the governmental proceedings proper to spring were observed, the produce of grain would be scanty and fail; in the states there would be many colds and coughs; and the people would remove to other places. If the proceedings proper to autumn were observed, even the high grounds would be flooded; the grain that had been sown would not ripen; and there would be many miscarriages among women. If those proper to winter were observed, the winds and cold would come out of season; the hawks and falcons would prematurely attack their prey; and all along the four borders people would enter their places of shelter.

SUPPLEMENTARY SECTION.

1. Right in the middle (between Heaven and Earth, and the other elements) is earth.
2. Its days are wû and 𠄎1.
3. Its divine ruler is Hwang T1; and the (attending) spirit is Hâu-thû.

¹ Compare what is said on the duties of those who cut the grass, as is here assumed to be done, in the *Kâu Lî*, Book XXXVII, paragraphs 80, 81 (薙氏).

4. Its creature is that without any natural covering but the skin.

5. Its musical note is *Kung*, and its pitch-tube gives the *kung* note from the tube *Hwang Kung*.

6. Its number is five. Its taste is sweet. Its smell is fragrant.

7. Its sacrifice is that of the middle court ; and of the parts of the victim the heart has the foremost place.

8. The son of Heaven occupies the Grand apartment of the Grand fane ; rides in the great carriage drawn by the yellow horses with black tails, and bearing the yellow flag ; is clothed in the yellow robes, and wears the yellow gems. He eats panicked millet and beef. The vessels which he uses are round, (and made to resemble) the capacity (of the earth)¹.

¹ I have called this a supplementary section. It is dropt in, in all its brevity, without mention of any proceedings of government, between the end of summer and the beginning of autumn. It has all the appearance of an after-thought, suggested by the superstitious fancies of the compiler. Callery says on it :—

‘This passage can only be comprehended by help of the intimate affinities which Chinese philosophers have attributed to the different beings of nature. According to them, the four seasons are related to the four cardinal points : spring to the east, summer to the south, autumn to the west, and winter to the north. Each of the cardinal points is related to an element : the east to wood, the south to fire, the west to metal, and the north to water. But as there is a fifth element, that of earth, and the four cardinal points have no reason for being distinguished as they are, but that there is a point in the middle between them, which is still the earth, it follows from this that the earth ought to have its place in the midst of the four seasons, that is, at the point of separation

between summer and autumn. Here a difficulty presented itself. The bamboo flutes to which the Chinese months are referred being but twelve, where shall be found the musical affinities of the earth? But the Chinese philosopher did not find himself embarrassed. See how he reasoned. The sound of the first flute, that is, of the longest and largest, is the strongest and most grave, and, like a bass, harmonizes with all the other sounds more acute. So the earth, likewise, is the most important of all the elements; it extends towards all the cardinal points, and intervenes in the products of each season. Hence the earth ought to correspond to the sound of the first flute! These affinities extend to colours, tastes, and a crowd of other categories.'

The *K'ien-lung* editors say:—

'Speaking from the standpoint of Heaven, then the earth is in the midst of Heaven; that is, (the element of) earth. Speaking from the standpoint of the Earth, then wood, fire, metal, and water are all supported on it. The manner in which the way of Earth is affected by that of Heaven cannot be described by reference to one point, or one month. Speaking from the standpoint of the heavenly stems, then wû and k'î occupy the middle places, and are between the stems for fire and metal, to convey the system of mutual production. Speaking from the standpoint of the "earthly branches," the k'h'ăn, hsü, k'h'âu, and wî occupy the corners of the four points; wood, fire, metal, and water, all turn to earth. This is what the idea of reciprocal ending, and that of elemental flourishing, arise from. This may be exhibited in the several points, and reckoned by the periods of days. The talk about the elements takes many directions, but the underlying principle comes to be the same!'

I shall be glad if my readers can understand this.

SECTION III. PART I.

1. In the first month of autumn, the sun is in Yî; the constellation culminating at dusk being *Kien-hsing*, and that culminating at dawn Pî¹.

2. Its days are *käng* and *hsin*.

3. Its divine ruler is *Sháo Hào*, and the (attending) spirit is *Zû-shâu*².

4. Its creatures are the hairy.

5. Its musical note is *Shang*; its pitch-tube is *Î 3eh*³.

6. Its number is nine. Its taste is bitter. Its smell is rank.

7. Its sacrifice is that at the gate; and of the parts of the victim the liver has the foremost place.

8. Cool winds come; the white dew descends⁴; the cicada of the cold chirps⁵. (Young) hawks at this

¹ Yî corresponds to Crater. *Kien-hsing* comprehends stars in *Sagittarius* (see page 257). Pî corresponds to the *Hyades*.

² *Sháo Hào* follows *Hwang Tî*, whose eldest son he was, as the fourth in the list of the five Tî, or divine rulers (B.C. 2594). His capital was at *K'ü-fâu*, the city of Confucius; and I have seen, at a little distance from it, perhaps the only pyramid in China, which is in memory of him, and said to be on or near his grave. His personal appellation is *Kin-thien* (金天), or *Thien-kin*, the element to which he and his reign are assigned being *kin*, or metal. *Zû-shâu* was one of his sons.

³ *Î 3eh*, 'the equalization of the Laws,' is the tube giving the fifth of the upper musical accords.

⁴ White dew is a name for hoar-frost.

⁵ This cicada (Williams thinks the *cicada viridis*) is called

time sacrifice birds, as the first step they take to killing (and eating) them¹.

9. The son of Heaven occupies the apartment on the left of the *3ung-kang* (Fane); rides in the war chariot, drawn by the white horses with black manes, and bearing the white flag. He is clothed in the white robes, and wears the white jade. He eats hemp-seeds and dog's flesh. The vessels which he uses are rectangular, and going on to be deep².

10. In this month there takes place the inauguration of autumn. Three days before the ceremony, the Grand recorder informs the son of Heaven, saying, 'On such-and-such a day is the inauguration of the autumn. The character of the season is fully seen in metal.' On this the son of Heaven devotes himself to self-adjustment; and on the day he leads in person the three ducal ministers, the nine high ministers, the princes of states (at court), and his Great officers, to meet the autumn in the western suburb, and on their return he rewards the general-in-chief, and the military officers in the court.

11. The son of Heaven also orders the leaders and commanders to choose men and sharpen weapons, to select and exercise those of distinguished merit, and

'the dumb.' Now it begins to chirp. Its colour is 'green and red.'

¹ Compare what is said about the otter, page 251.

² *3ung-kang* is made out to mean, 'all bright,' and the apartment was on the west; with mystical reference to the maturity and gathering of all things in the autumn, or season of the west. The vessels were rectangular, having sharp corners in harmony with the sharp weapons made of metal, to which element the season of autumn is referred; and they were deep, to resemble the deep bosom of the earth, to which things now begin to return.

to give their entire trust only to men whose services have been proved ;—thereby to correct all unrighteousness. (He instructs them also) to make enquiries about and punish the oppressive and insolent;—thereby making it clear whom he loves and whom he hates, and giving effect to (the wishes of) the people, even the most distant from court.

12. In this month orders are given to the proper officers to revise the laws and ordinances, to put the prisons in good repair, to provide handcuffs and fetters, to repress and stop villainy, to maintain a watch against crime and wickedness, and to do their endeavour to capture criminals. Orders are (also) given to the managers (of prisons) to look at wounds, examine sores, inspect broken members, and judge particularly of dislocations. The determination of cases, both criminal and civil, must be correct and just. Heaven and earth now begin to be severe ;—there should be no excess in copying that severity, or in the opposite indulgence¹.

13. In this month the husbandmen present their grain. The son of Heaven tastes it, while still new, first offering some in the apartment at the back of the ancestral temple.

14. Orders are given to all the officers to begin their collecting and storing the contributions (from

¹ For this last sentence Callery has :—‘(Ce mois-ci) la nature commençant à devenir rigoureuse, on ne doit pas augmenter (ses rigueurs par l’application de châtimens trop sévères).’ Wang Tháo takes an opposite view. I think I have got the thought that was in the compiler’s mind. See the note of the *K’hien-lung* editors with reference to the advocacy of it by commentators of ‘the Brief Calendar of Hsiâ.’

the husbandmen); to finish the embankments and dykes; to look to the dams and fillings up in preparation for the floods, and also to refit all houses; to strengthen walls and enclosures; and to repair city and suburban walls.

15. In this month there should be no investing of princes, and no appointment of great ministers. There should be no dismemberment of any territory, no sending out on any great commission, and no issuing of great presents.

16. If, in this first month of autumn, the proceedings of government proper to winter were observed, then the dark and gloomy influence (of nature) would greatly prevail; the shelly insects would destroy the grain; and warlike operations would be called for. If the proceedings proper to spring were observed, there would be droughts in the states; the bright and growing influence would return; and the five kinds of grain would not yield their fruit. If the proceedings proper to summer were observed, there would be many calamities from fire in the states; the cold and the heat would be subject to no rule; and there would be many fevers among the people.

PART II.

1. In the second month of autumn the sun is in *K'io*, the constellation culminating at dusk being *Khien-niû*, and that culminating at dawn *3ze-hsf*¹.

2. Its days are *kǎng* and *hsin*. Its divine ruler

¹ *K'io* corresponds to α (Spica) and ζ of Virgo; *Khien-niû* (see on page 262) to certain stars in the neck of Aquila; and *3ze-hsf* is said to be λ Orion.

is Sháo Háo, and the (attending) spirit is Zû-sháu. Its insects are the hairy. Its musical note is Shang, and its pitch-tube is Nan Lü¹.

3. Its number is nine. Its taste is bitter. Its smell is rank. Its sacrifice is that of the gate; and of the parts of the victim the liver has the foremost place.

4 Sudden and violent winds come. The wild geese arrive². The swallows return (whence they came)³. Tribes of birds store up provisions (for the future)³.

5. The son of Heaven occupies the Jung-kang Grand Fane; rides in the war chariot, drawn by the white horses with black manes, and bearing the white flag. He is clothed in the white robes, and wears the white gems. He eats hemp-seed and dog's flesh. The vessels which he uses are rectangular or cornered, and rather deep.

6. In this month they take especial care of the

¹ Nan Lü, 'the southern spine,' is the tube that gives the fifth of the lower musical accords.

² The wild geese are now returning to their winter quarters, from which they had come in the first month of spring; see page 251. So with the swallows, who had appeared in the second month of spring; see page 259.

³ This sentence is hardly translatable or intelligible. Some would read as in paragraph 95 of 'the Brief Calendar of Hsiâ' (丹鳥羞白鳥), translated by Professor Douglas: 'The red birds (i. e. fire-flies) devour the white birds (i. e. mosquitoes),' which he ingeniously supports by a reference to the habits of the fire-fly from Chambers' Encyclopædia. But his translation of hsiû by 'devour' is inadmissible. Wang Tháo says that this view is 'chisseling.' 'Sparrows and other birds,' he says, 'now collect seeds of grapes and trees, and store them in their nests and holes against the time of rain and snow.'

decaying and old ; give them stools and staves, and distribute supplies of congee for food.

7. Orders are given to the superintendent of robes to have ready the upper and lower dresses with their various ornaments. For the figures and embroidery on them there are fixed patterns. Their size, length, and dimensions must all be according to the old examples. For the caps and girdles (also) there are regular rules.

8. Orders are given to the proper officers to revise with strict accuracy (the laws about) the various punishments. Beheading and (the other) capital executions must be according to (the crimes) without excess or defect. Excess or defect out of such proportion will bring on itself the judgment (of Heaven).

9. In this month orders are given to the officers of slaughter and prayer to go round among the victims for sacrifice, seeing that they are entire and complete, examining their fodder and grain, inspecting their condition as fat or thin, and judging of their looks. They must arrange them according to their classes. In measuring their size, and looking at the length (of their horns), they must have them according to the (assigned) measures. When all these points are as they ought to be, God will accept the sacrifices¹.

10. The son of Heaven performs the ceremonies against pestilence, to secure development for the (healthy) airs of autumn.

11. He eats the hemp-seed (which is now pre-

¹ K'ang says here : ' And if God accept them, of course there is no other spirit that will not do so.'

sented) along with dog's flesh, first offering some in the apartment at the back of the ancestral temple.

12. In this month it is allowable to rear city and suburban walls, to establish cities and towns, to dig underground passages and grain-pits, and to repair granaries, round and square.

13. Orders are given to the proper officers to be urgent with the people, and (to finish) receiving their contributions and storing them. They should do their best to accumulate (large) stores of vegetables and other things.

14. They should (also) stimulate the wheat-sowing. (The husbandmen) should not be allowed to miss the proper time for the operation. Any who do so shall be punished without fail.

15. In this month day and night are equal. The thunder begins to restrain its voice. Insects stop up the entrances to their burrows. The influence to decay and death gradually increases. That of brightness and growth daily diminishes. The waters begin to dry up.

16. At the equinox, they make uniform the measures of length and capacity; equalise the steelyards and their weights; rectify the weights of 30 and 120 catties; and adjust the pecks and bushels.

17. In this month they regulate and reduce the charges at the frontier gates and in the markets, to encourage the resort of both regular and travelling traders, and the receipt of goods and money; for the convenience of the business of the people. When merchants and others collect from all quarters, and come from the most distant parts, then the resources (of the government) do not fail. There is no want

of means for its use; and all things proceed prosperously.

18. In commencing great undertakings, there should be no opposition to the great periods (for them) as defined (by the motion of the sun). They must be conformed to the times (as thereby marked out), and particular attention paid to the nature of each¹.

19. If in this second month of autumn the proceedings proper to spring were observed, the autumnal

¹ Callery translates this paragraph by: 'Toute personne ayant une chose importante à accomplir ne doit pas se mettre en opposition avec les grands principes (yin et yang); il doit se conformer au temps (propre à agir; mais il doit aussi) bien examiner la nature même de l'entreprise.' He appends to this the following note:—'Les deux principes yin et yang auxquels se rapportent tous les êtres, ayant tour-à-tour la prédominance dans certaines époques de l'année, le temps convenable pour une chose quelconque est celui auquel prédomine le principe dont cette chose dépend par son affinité naturelle. Ainsi, par exemple, les travaux de terrassement et de construction conviennent en automne, parce que le principe yin dont ils dépendent est en progrès pendant l'automne. Néanmoins, de ce que cette époque de l'année est favorable sous ce point de vue, il ne s'ensuit pas que toute entreprise de construction faite en automne soit avantageuse en elle-même; une foule de circonstances peuvent la rendre ruineuse, et c'est à l'entrepreneur de bien l'examiner, abstraction faite de la saison.'

The text rendered by Callery, 'les deux principes (yin et yang),' is simply *tâ shû*, 'the grand numbers,' the meaning of which I have endeavoured to bring out by the supplements in my version. The yin and yang are not mentioned in the text of the paragraph. They are simply a binomial phrase for the course of nature, with special reference to the weather and its conditions, as regulated by the action of the sun on the earth in the course of the seasons.

rains would not fall ; plants and trees would blossom ; and in the states there would be alarms. If those proper to summer were observed, there would be droughts in the states ; insects would not retire to their burrows ; and the five grains would begin to grow again. If those proper to winter were observed, calamities springing from (unseasonable) winds would be constantly arising ; the thunder now silent would be heard before its time ; and plants and trees would die prematurely.

PART III.

1. In the last month of autumn the sun is in Fang, the constellation culminating at dusk being Hsü¹, and that culminating at dawn Liü.

2. Its days are käng and hsin. Its divine ruler is Sháo Hào, and the (attending) spirit is 3û-shâu. Its creatures are the hairy. Its musical note is Shang, and its pitch-tube is Wû Yî².

3. Its number is nine. Its taste is bitter. Its smell is rank. Its sacrifice is that at the gate ; and of the parts of the victim the liver has the foremost place.

4. The wild geese come ; (and abide) like guests³.

¹ Fang comprehends β, δ, π, ρ Scorpio. Hsü corresponds to β Aquarius ; and Liü comprehends δ, ε, ζ, η, θ, ρ, σ, φ Hydra.

² Wû Yî, 'the unwearied,' is the tube giving the sixth upper musical accord.

³ The addition of guests here is a difficulty. It is said on the previous month that 'the wild geese come ;' are these here the same as those, or are they others,—the younger birds, as some suppose, which had waited after the former, and still found it necessary to remain on their passage to recruit their strength ?

Small birds enter the great water and become mollusks¹. Chrysanthemums show their yellow flowers. The *khai* sacrifice larger animals, and kill (and devour) the smaller².

5. The son of Heaven occupies the apartment on the right of the *Jung-kang* (Fane); rides in the war chariot, drawn by the white horses with black manes, and bearing the white flags; is dressed in the white robes, and wears the white jade. He eats hemp-seeds and dog's flesh. The vessels which he uses are rectangular, cornered, and rather deep.

6. In this month the orders are renewed and

¹ Professor Douglas has made it more than probable that the 'small birds' here are sand-pipers. What is said about them, however, will not admit of his version, that they 'go into the sea or lakes for crustaceae.' His 'crustaceae' should be 'mollusks.' According to all rules of Chinese composition, what he renders 'for' must be taken verbally, = 'to become.' It is not merely the Chinese 'commentators,' who consider the sentence to mean, 'Sparrows go into the sea and become crustaceae (? mollusks);' it is what the text says. It is indeed an absurd statement, but a translator is not responsible for that. The *Khien-lung* editors observe that there is no mention here of the little birds being 'transformed,' as in the paragraph about the 'hawks' on page 258, and hence they argue that we cannot understand the notice here metaphorically. They accept the fact (?). The marine *Ko*, which is mentioned here, as figured in the plates of the *Păn Zhào Kang-mû*, is the *Calyptroidea Trochita*.

² Compare what is said about the otter, page 251. Professor Douglas argues that the *khai* is the polecat. But this identification cannot yet be received as certain. The *khai* is 'dog-footed,' 'hunts in troops,' and has 'a voice like that of the dog.' In Japanese plates it is not at all like 'the polecat.' An English naturalist, to whom I submitted a Japanese work illustrative of the *Shih King*, many years ago, has written over the *khai*, 'a wild dog or wolf.'

strictly enjoined, charging the various officers (to see) that noble and mean all exert themselves in the work of ingathering, in harmony with the storing of heaven and earth. They must not allow anything to remain out in the fields.

7. Orders are also given to the chief minister, after the fruits of husbandry have all been gathered in, to take in hand the registers of the produce of the different grains (from all the country), and to store up the produce that has been gathered from the acres of God in the granary of the spirits; doing this with the utmost reverence and correctness¹.

8. In this month the hoar-frost begins to fall; and all labours cease (for a season).

9. Orders are given to the proper officers, saying, 'The cold airs are all coming, and the people will not be able to endure them. Let all enter within their houses (for a time).'

10. On the first ting day orders are given to the chief Director of music to enter the college, and to practise (with his pupils) on the wind instruments.

11. In this month an announcement is made to the son of Heaven that the victims for the great sacrifice to God, and the autumnal sacrifice in the ancestral temple² are fit and ready.

¹ 'This,' says Hsü Sze-jäng (Ming dynasty), 'is the great rule of making provision for the sustenance of men and for serving spiritual beings,—two things demanding the utmost inward reverence and outward reverential vigour.' I suppose that the 'spirit-granary' contained the grain for all governmental sacrifices, as well as that gathered from 'the acres of God,' and to be used specially in sacrifices to Him.

² This paragraph gives great trouble to the *K'ien-lung* editors; but we need not enter on their discussions.

12. The princes of the states are assembled, and orders given to the officers of the various districts (in the royal domain). They receive the first days of the months for the coming year¹, and the laws for the taxation of the people by the princes, both light and heavy, and the amount of the regular contribution to the government, which is determined by the distance of the territories and the nature of their several productions. The object of this is to provide what is necessary for the suburban sacrifices and those in the ancestral temple. No private considerations are allowed to have place in this.

13. In this month the son of Heaven, by means of hunting, teaches how to use the five weapons of war, and the rules for the management of horses.

14. Orders are given to the charioteers and the seven (classes of) grooms² to see to the yoking of the several teams, to set up in the carriages the flags and various banners³, to assign the carriages according to the rank (of those who were to occupy them), and to arrange and set up the screens outside (the royal tent). The minister of Instruction, with his baton

¹ This last month of autumn, the ninth from the first month of spring, was the last month of the year with the dynasty of Shín, when it was high time to give out the calendar for the months of the next year.

² The sovereign's horses were divided into six classes, and every class had its own grooms, with one among them who had the superintendence of the rest. See a narrative in the *So Kwan*, under the eighteenth year of duke *Kháng*.

³ Two of these insignia are mentioned in the text;—the *Śing*, which was only a pennant, and the *Káo*, a large banner with a tortoise and serpent intertwined. No doubt the meaning is, 'the various banners.'

stuck in his girdle, addresses all before him with his face to the north.

15. Then the son of Heaven, in his martial ornaments, with his bow in one hand, and the arrows under the armpit of the other, proceeds to hunt. (Finally), he gives orders to the superintendent of Sacrifices, to offer some of the captured game to (the spirits of) the four quarters.

16. In this month the plants and trees become yellow and their leaves fall, on which the branches are cut down to make charcoal.

17. Insects in their burrows all try to push deeper, and from within plaster up the entrances. In accordance with (the season), they hurry on the decision and punishment of criminal cases, wishing not to leave them any longer undealt with. They call in emoluments that have been assigned incorrectly, and minister to those whose means are insufficient for their wants.

18. In this month the son of Heaven eats dog's flesh and rice, first presenting some in the apartment at the back of the ancestral temple.

19. If, in this last month of autumn, the proceedings proper to summer were observed, there would be great floods in the states; the winter stores would be injured and damaged; there would be many colds and catarrhs among the people. If those proper to winter were observed, there would be many thieves and robbers in the states; the borders would be unquiet; and portions of territory would be torn from the rest. If those proper to spring were observed, the warm airs would come; the energies of the people would be relaxed and languid; and the troops would be kept moving about.

SECTION IV. PART I.

1. In the first month of winter the sun is in Wei, the constellation culminating at dusk being Wei, and the constellation culminating at dawn *K'ih-hsing*¹.

2. Its days are the *zăn* and *kwei*.

3. Its divine ruler is *Kwan-hsü*, and the (attending) spirit is *Hsüan-ming*².

4. Its creatures are the shell-covered.

5. Its musical note is *Yü*, and its pitch-tube is *Ying Kung*³.

6. Its number is six. Its taste is salt. Its smell is that of things that are rotten.

7. Its sacrifice is that at (the altar of) the path, and

¹ Wei (尾) comprehends ϵ , μ Scorpio; Wei (危, as on page 272) corresponds to stars in Aquarius and Pegasus. *K'ih Hsing* (as on p. 262) corresponds to stars in Hydra.

² *Kwan-hsü* is the dynastic designation of the grandson of Hwang Tî, the commencement of whose reign is assigned in B.C. 2510. He is known also by the personal designation of *K'ao-yang*, from the name of his second capital. Among the elements his reign is assigned to water, and thence to the north; and hence the designation of his minister as *Hsüan-ming*, 'the dark and mysterious,' who was called *Hsiü* (脩) and *Hsi* (熙), and is said to have been a son of *Sh'ao H'ao*.

³ *Yü* is the fifth of the notes of the scale; and *Ying Kung*, 'the responsive tube,' the name of the last of the tubes giving the six lower musical accords.

among the parts of the victim the kidneys have the foremost place¹.

8. Water begins to congeal. The earth begins to be penetrated by the cold. Pheasants enter the great water and become large mollusks². Rainbows are hidden and do not appear.

9. The son of Heaven occupies the apartment on the left of the Hsüan Thang (Fane); rides in the dark-coloured carriage, drawn by the iron black horses, and bearing the dark-coloured flag; is dressed in the black robes, and wears the dark-coloured jade. He eats millet and sucking-pig. The vessels which he uses are large and rather deep.

10. In this month there takes place the inauguration of winter. Three days before this ceremony, the Grand recorder informs the son of Heaven, saying, 'On such-and-such a day is the inauguration of winter. The character of the season is fully seen in

¹ This altar was outside the gate leading to the ancestral temple, on the west of it. Many say that here was the 'well' supplying the water used for the temple, and would read 井 (井) for hsing (行).

² The 'great water' here is said in the 'Narratives of the States' (Book XV) to be the Hwâi. The 𪚩 is said to be a large species of the 𪚩, into which small birds are transformed (p. 292). Of course the transmutation of the pheasants into these is absurd. Professor Douglas has found in a Chinese Encyclopædia a statement that 𪚩 is sometimes an equivalent of 蒲蘆 (蒲蘆), 'sweet flags and rushes.' The 蘆, however, is sometimes read lô, and said to have the same sound and meaning as 螺, 'a spiral univalve;' but the great objection to Professor Douglas' view is the meaning he puts on the 爲, as pointed out on p. 292. The text cannot be construed as he proposes.

water.' On this the son of Heaven devotes himself to self-adjustment; and on the day of the inauguration he leads in person the three ducal ministers, the nine high ministers, and his Great officers to meet the winter in the northern suburbs. On his return he rewards (the descendants of) those who died in the service (of the kingdom), and shows his compassion to orphans and widows.

11. In this month orders are given to the Grand recorder to smear with blood the tortoise-shells and divining stalks¹, and by interpreting the indications of the former and examining the figures formed by the latter, to determine the good and evil of their intimations. (In this way) all flattery and partizan-ship in the interpretation of them (will become clear), and the crime of the operators be brought home. No concealment or deceit will be allowed.

12. In this month the son of Heaven sets the example of wearing furs.

13. Orders are issued to the proper officers in the words:—'The airs of heaven are ascended on high, and those of earth have descended beneath. There is no intercommunion of heaven and earth. All is shut up and winter is completely formed.'

14. Orders are given to all the officers to cover up carefully the stores (of their departments). The minister of Instruction is also ordered to go round (among the people and see) that they have formed their stores, and that nothing is left ungathered.

15. The city and suburban walls are put in good

¹ See in Mencius, I, 7, 4, on the consecration of a bell by smearing parts of it with blood.

repair; the gates of towns and villages are looked after; bolts and nuts are put to rights; locks and keys are carefully attended to; the field-boundaries are strengthened; the frontiers are well secured; important defiles are thoroughly defended; passes and bridges are carefully seen after; and narrow ways and cross-paths are shut up.

16. The rules for mourning are revised; the distinctions of the upper and lower garments are defined; the thickness of the inner and outer coffins is decided on; with the size, height and other dimensions of graves. The measures for all these things are assigned, with the degrees and differences in them according to rank.

17. In this month orders are given to the chief Director of works to prepare a memorial on the work of the artificers; setting forth especially the sacrificial vessels with the measures and capacity (of them and all others), and seeing that there be no licentious ingenuity in the workmanship which might introduce an element of dissipation into the minds of superiors; and making the suitability of the article the first consideration. Every article should have its maker's name engraved on it, for the determination of its genuineness. When the production is not what it ought to be, the artificer should be held guilty and an end be thus put to deception.

18. In this month there is the great festivity when they drink together, and each of the stands bears half its animal roasted¹.

¹ Wang Tháo understands this paragraph as meaning that at this season all, both high and low, feast in expression and augmentation of their joy. The characters will bear this inter-

19. The son of Heaven prays for (a blessing on) the coming year to the Honoured ones of heaven; sacrifices with an ox, a ram, and a boar at the public altar to the spirits of the land, and at the gates of towns and villages; offers the sacrifice three days after the winter solstice with the spoils of the chase to all ancestors, and at the five (household) sacrifices;—thus cheering the husbandmen and helping them to rest from their toils¹.

20. The son of Heaven orders his leaders and commanders to give instruction on military opera-

pretation. The *k'ang*, of the text however, has also the meaning which appears in the translation; though on that view the statement is not so general. See the 'Narratives of the States,' I, ii. 8.

¹ The most common view seems to be that we have here the various parts of one sacrificial service, three days after the winter solstice, called *k'â* (蜡), in the time of *K'âu*, and *lâ* (臘), in that of *K'ien*. While the son of Heaven performed these services, it must have been at different places in the capital I suppose, analogous and modified services were celebrated generally throughout the kingdom.

There is no agreement as to who are intended by 'the Honoured ones of heaven.' Many hold that they are 'the six Honoured ones,' to whom Shun is said to have sacrificed in the second part of the *Shû King*. But the *K'ien-lung* editors contend that the want of 'six' is a fatal objection to this view. *K'iao Yü*, supposing the six Honoured ones to be meant, argued that 'heaven, earth, and the four seasons' were intended by them,—those seasons co-operating with heaven and earth in the production of all things; but the same editors show, from the passages in the *Shû*, that heaven can in no sense be included among the six Honoured ones. They do not say, however, who or what is intended by the designation in the text. The *lâ* in the paragraph is taken in a pregnant sense, as if it were *lieh* (獵, and not 臘), meaning 'to sacrifice with the spoils of the chase.'

tions, and to exercise (the soldiers) in archery and chariot-driving, and in trials of strength.

21. In this month orders are given to the superintendent of waters and the master of fishermen to collect the revenues from rivers, springs, ponds, and meres, taking care not to encroach in any way on any among the myriads of the people, so as to awaken a feeling of dissatisfaction in them against the son of Heaven. If they do this, they shall be punished for their guilt without forgiveness.

22. If, in the first month of winter, the proceedings of government proper to spring were observed, the cold that shuts up all beneath it would not do so tightly; the vapours of the earth would rise up and go abroad; many of the people would wander away and disappear. If those proper to summer were observed, there would be many violent winds in the states; winter itself would not be cold; and insects would come forth again from their burrows. If those proper to autumn were observed, the snow and hoarfrost would come unseasonably; small military affairs would constantly be arising; and incursions and loss of territory would occur.

PART II.

1. In the second month of winter the sun is in *Tâu*, the constellation culminating at dusk being the eastern *Pi*, and that culminating at dawn *Kăn*¹.

¹ *Tâu* comprehends ζ, λ, μ, σ, τ, φ of Sagittarius; the eastern *Pi*, the fourteenth of the Chinese constellations, consists of Algenib or γ Pegasus, and α of Andromeda; *Kăn* is the last of the constellations, and contains β, γ, δ, and ε of Corvus.

2. Its days are zăn and kwei. Its divine ruler is Kwan-hsü, and the (attending) spirit is Hsüan-ming. Its creatures are the shell-covered. Its musical note is Yü, and its pitch-tube is Hwang Kung¹.

3. Its number is six. Its taste is salt. Its smell is that of things that are rotten. Its sacrifice is that at (the altar of) the path, and of the parts of the victim the kidneys have the foremost place.

4. The ice becomes more strong. The earth begins to crack or split. The night bird ceases to sing. Tigers begin to pair².

5. The son of Heaven occupies the Grand Fane Hsüan Thang; rides in the dark-coloured carriage, drawn by the iron black horses, and bearing the dark-coloured flag. He is dressed in the black robes, and wears the dark-coloured gems of jade. He eats millet and sucking-pig. The vessels which he uses are large and rather deep.

6. All things relating to the dead are revised and regulated³.

7. Orders are given to the proper officer to the following effect⁴:—‘There should nothing be done in

¹ See page 281, paragraph 5.

² ‘The earth begins to crack;’ some say from the increasing intensity of the cold; others from the warmth which has begun to return. The returning warmth is indicated by the undivided line with which Fŭ, the hexagram of the eleventh month, commences—

‘The night bird’ sings during the night till the dawn; ‘a hill bird, like a fowl.’

³ See paragraph 16, page 299. The paragraph may be inadvertently introduced here.

⁴ ‘The proper officer’ here is said to be ‘the minister of Instruction,’ or ‘the officer of the People.’

works of earth; care should be taken not to expose anything that is covered, nor to throw open apartments and houses, and rouse the masses to action;—that all may be kept securely shut up. (Otherwise) the genial influences of earth will find vent, which might be called a throwing open of the house of heaven and earth. In this case all insects would die; and the people be sure to fall ill from pestilence, and various losses would ensue.' This charge is said to be giving full development to the (idea of the) month.

8. In this month orders are given to the Director of the eunuchs to issue afresh the orders for the palace, to examine all the doors, inner and outer, and look carefully after all the apartments. They must be kept strictly shut. All woman's-work must be diminished, and none of an extravagant nature permitted. Though noble and nearly related friends should come to visit the inmates, they must all be excluded.

9. Orders are given to the Grand superintendent of the preparation of liquors to see that the rice and other glutinous grains are all complete; that the leaven-cakes are in season; that the soaking and heating are cleanly conducted; that the water be fragrant; that the vessels of pottery be good; and that the regulation of the fire be right. These six things have all to be attended to, and the Grand superintendent has the inspection of them, to secure that there be no error or mistake.

10. The son of Heaven issues orders to the proper officers to pray and sacrifice to (the spirits presiding over) the four seas, the great rivers (with

their) famous sources, the deep tarns, and the meres, (all) wells and springs¹.

11. In this month, if the husbandmen have any productions in the fields, which they have not stored or collected, or if there be any horses, oxen or other animals, which have been left at large, any one may take them without its being inquired into.

12. If there be those who are able to take from the hills and forests, marshes and meres, edible fruits², or to capture game by hunting, the wardens and foresters should give them the necessary information and guidance. If there be among them those who encroach on or rob the others, they should be punished without fail.

13. In this month the shortest day arrives. The principle of darkness and decay (in nature) struggles with that of brightness and growth³. The elements of life begin to move. Superior men give themselves to self-adjustment and fasting. They keep retired in their houses. They wish to be at rest in their

¹ Winter is the season in which the element of water predominates, and it was in virtue of this that the dynasty of Shih professed to rule. The Khwăn-lun mountains (Koulkun), between the desert of Gobi and Thibet, are the source of the Hwang Ho; Yüan-min, the source of the Kiang; Thung-po, that of the Hwái; the Kĭ grew out of the Yen, rising from the hill of Wang-wū. See Chinese Classics, vol. iii, pp. 127-140.

² Hazel-nuts and chestnuts are given as examples of the former; and the water-caltrops and Euryale ferox, or 'cock's head,' of the latter.

³ This description of the month is well illustrated by the lines of Fû, the hexagram of it referred to above,—; the lowest line representing the principle of light and growth, which just found readmission in the year, and is seeking to develop itself.

persons; put away all indulgence in music and beautiful sights; repress their various desires; give repose to their bodies and all mental excitements. They wish all affairs to be quiet, while they wait for the settlement of those principles of darkness and decay, and brightness and growth.

14. Rice begins to grow. The broom-sedge rises up vigorously¹. Worms curl². The moose-deer shed their horns³. The springs of water are (all) in movement.

15. When the shortest day has arrived, they fell trees, and carry away bamboos, (especially) the small species suitable for arrows.

16. In this month offices in which there is no business may be closed, and vessels for which there is no use may be removed.

17. They plaster (and repair) the pillars and gateways (of the palace), and the courtyard (within), and also doors and other gateways; rebuilding (also all) prisons, to co-operate with the tendency of nature to shut up and secure (the genial influences at this season).

18. If in this second month of winter the proceedings of government proper to summer were observed,

¹ This is called by Dr. Williams 'a species of iris.' The roots are made into brooms.

² This is a fancy. The commentators say that the worms curl and twist, with their heads turned downwards, as if seeking to return to the warmth beneath the surface.

³ The shedding of the horns in winter shows that the mî here, (麋), is a species of the elk or moose-deer, and different from the lû (鹿), which sheds its horns in the sixth month. The mî is described as being fond of the water, and as large as a small ox.

there would be droughts in the states; vapours and fogs would shed abroad their gloom, and thunder would utter its voice. If those proper to autumn were observed, the weather would be rainy and slushy; melons and gourds would not attain their full growth; and there would be great wars in the states. If those proper to spring were observed, locusts would work their harm; the springs would all become dry; and many of the people would suffer from leprosy and foul ulcers.

PART III.

1. In the third month of winter the sun is in Wû-nü, the constellation culminating at dusk being Lâu, and that culminating at dawn Tî¹.

2. Its days are zăn and kwei. Its divine ruler is Kwan-hsü, and the (attendant) spirit is Hsüan-ming. Its creatures are the shell-covered. Its musical note is Yü, and its pitch-tube is Tâ Lü².

3. Its number is six. Its taste is salt. Its smell is that of things that are rotten. Its sacrifice is that at (the altar of) the path; and the part of the victim occupying the foremost place is the kidneys.

4. The wild geese go northwards. The magpie begins to build. The (cock) pheasant crows³. Hens hatch.

¹ Wû-nü, as in paragraph 1, page 268. Lâu corresponds to α, β, γ, ι in the head of Aries; Tî, to α, β, δ, ι, μ, ν Libra.

² Tâ Lü is the first of the tubes giving the six lower musical accords.

³ As is said in the Shih, II, v, 3, 5:—

‘Crows the pheasant at the dawn,
And his mate is to him drawn.’

5. The son of Heaven occupies the apartment on the right of the Hsüan Thang (Fane); rides in the dark-coloured carriage, drawn by the iron-black horses, and bearing the dark-coloured flag. He is dressed in the black robes, and wears the dark-coloured gems of jade. He eats millet and sucking-pig. The vessels which he uses are large and rather deep.

6. He issues orders to the proper officers to institute on a great scale all ceremonies against pestilence, to have (animals) torn in pieces on all sides, and (then) to send forth the ox of earth, to escort away the (injurious) airs of the cold¹.

7. Birds of prey fly high and rapidly².

8. They now offer sacrifices all round to (the spirits of) the hills and rivers, to the great ministers of the (ancient) deified sovereigns, and to the spirits of heaven (and earth)³.

9. In this month orders are given to the master of the Fishermen to commence the fishers' work. The son of Heaven goes in person (to look on). He partakes of the fish caught, first presenting some in the apartment at the back of the ancestral temple⁴.

¹ Compare par. 16, p. 266. The 'ox of earth' is still seen in China.

² This evidently is one of the natural phenomena of the season, and should belong to paragraph 4. The translation of the first two characters by 'Birds of prey' is sufficiently close and exact.

³ The *Khien-lung* editors point out the difficulties in explaining the three sacrifices here referred to, and seem to think they were practices of *Khin*, about which we have little information. 'The great ministers of the Tî' in the second member were probably those mentioned at the commencement of each season. They supplement the concluding member, as I have done, from Lü's *Khun Khiû*.

⁴ Compare paragraphs 7, p. 263; 17, p. 271. In paragraph 7,

10. The ice is now abundant ; thick and strong to the bottom of the waters and meres. Orders are given to collect it, which is done, and it is carried into (the ice-houses).

11. Orders are given to make announcement to the people to bring forth their seed of the five grains. The husbandmen are ordered to reckon up the pairs which they can furnish for the ploughing ; to repair the handles and shares of their ploughs ; and to provide all the other instruments for the fields.

12. Orders are given to the chief director of Music to institute a grand concert of wind instruments ; and with this (the music of the year) is closed¹.

13. Orders are given to the four Inspectors² to collect and arrange the faggots to supply the wood and torches for the suburban sacrifices, those in the ancestral temple, and all others.

14. In this month the sun has gone through all his mansions ; the moon has completed the number of her conjunctions ; the stars return to (their places) in the heavens. The exact length (of the year) is nearly completed, and the year will soon begin again. (It is said), 'Attend to the business of your husbandmen. Let them not be employed on anything else.'

15. The son of Heaven, along with his ducal and

p. 263, the sovereign gets himself into a boat, a thing now impossible through the ice. Fish are in their prime condition in winter and spring.

¹ Compare paragraph 16, p. 261, et al. Wind instruments were supposed to suit the quiet and meditateness of autumn and winter, better than the drums and dances of the other seasons.

² 'The four Inspectors.' Compare paragraph 8, p. 277. Some read thien (田) for sze (四), 'Inspectors of the fields.'

other high ministers and his Great officers, revises the statutes for the states, and discusses the proceedings of the different seasons ; to be prepared with what is suitable for the ensuing year.

16. Orders are given to the Grand recorder to make a list of the princes of the states according to the positions severally assigned to them¹, and of the victims required from them to supply the offerings for the worship of God dwelling in the great heaven, and at the altars of (the spirits of) the land and grain. Orders were also given to the states ruled by princes of the royal surname to supply the fodder and grain for the (victims used in the worship of the) ancestral temple. Orders are given, moreover, to the chief minister to make a list of (the appanages of) the various high ministers and Great officers, with the amount of the land assigned to the common people, and assess them with the victims which they are to contribute to furnish for the sacrifices to (the spirits presiding over) the hills, forests, and famous streams. All the people under the sky, within the nine provinces, must, without exception, do their utmost to contribute to the sacrifices:—to God dwelling in the great heaven ; at the altars of the (spirits of the) land and grain ; in the ancestral temple and the apartment at the back of it ; and of the hills, forests, and famous streams.

17. If, in the last month of winter, the governmental proceedings proper to autumn were observed, the white dews would descend too early ; the shelly crea-

¹ As being of the same surname as the royal house, or otherwise ; the degree of their rank ; the size of their territory.

tures would appear in monstrous forms¹; throughout the four borders people would have to seek their places of shelter. If those proper to spring were observed, women with child and young children would suffer many disasters; throughout the states there would be many cases of obstinate disease; fate would appear to be adverse. If those proper to summer were observed, floods would work their ruin in the states; the seasonable snow would not fall, the ice would melt, and the cold disappear.

¹ This is the proper force of the characters. Wang Tháo interprets them as meaning that the creatures would bore through dykes and boats, so that the former would let the water through and the latter sink.

BOOK V. THE QUESTIONS OF ǞǺǺǺǺǺ¹.

SECTION I.

1. ǞǺǺǺǺǺ asked, 'If a ruler dies and a son and heir is born (immediately after), what course should be adopted?'

Confucius said, 'The high nobles², Great officers and (other) officers, following the chief (minister), who takes charge of the government for the time, (should collect) at the south of the western steps, with their faces towards the north³. (Then) the Grand officer of prayer, in his court robes and cap, bearing in his hands a bundle of rolls of silk, will go up to the topmost step, and (there), without ascending the hall, will order the wailing to cease. Mournfully clearing his voice three times⁴, he will make announcement (to the spirit of the deceased ruler), saying, "The son of such and such a lady has been born. I venture to announce the fact." He will then go up, and place the silks on a stool on the east of the body in the coffin⁵, wail, and descend. All the relatives of the deceased who are there (at the mourning), the high nobles, the Great and other

¹ See the introduction, pp. 21, 22.

² These were also ministers; see paragraph 4, page 213.

³ The usual place was at the eastern steps.

⁴ To call the attention of the spirit of the deceased.

⁵ The rolls of silk were, I suppose, the introductory present proper on an interview with a superior.

officers, (with the women) in the apartments, all will wail, but without the leaping. When this burst of sorrow is over, they will return to their (proper) places, and proceed forthwith to set forth the mourning offerings to the dead. The minor minister will ascend, and take away the bundle of silks¹.

2. 'On the third day, all the relatives, high nobles, Great and other officers, should take their places as before, with their faces to the north. The Grand minister, the Grand master of the ancestral temple, and the Grand officer of prayer, should all be in their court-robes and caps. The master for the child² will carry the child in his arms on a mat of sackcloth. The officer of prayer will precede, followed by the child, and the minister and master of the temple will come after. Thus they will enter the door (of the apartment where the coffin is), when the wailers will cease. The child has been brought up by the western steps³, and is held in front of the coffin with his face to the north, while the officer of prayer stands at the south-east corner of it. Mournfully clearing his voice three times, he will say, "So and So, the son of such and such a lady, and we, his servants, who follow him, presume to appear before you." The boy is (then made) to do obeisance, with his forehead on the ground, and to wail. The officer of prayer, the minister, the officer of the temple, all the relatives, the high nobles, with the Great and other officers,

¹ And bury it in the court between the two flights of stairs.

² Thus early is it made to appear that the child is put under a master; P. Zottoli translates the name by 'secundus magister.'

³ The child had been brought by the master from the women's apartments, and carried to the court, that he might thus go up again to the hall by these steps.

will wail and leap¹, leaping three times with each burst of grief. (Those who had gone up to the hall then) descend, and go back to their proper places on the east; where all bare the left arm and shoulder. The son (in the arms of his bearer is made) to leap, and (the women) in the apartments also leap. Thrice they will do so, leaping three times each time. (The bearer for the son) will cover up his sackcloth², walk with a staff, (ascend and) set forth the offerings by the dead, and then quit the scene. The Grand minister will charge the officer of prayer and the recorder to announce the name all round, at the five altars of the house, and at those (to the spirits) of the hills and streams³.

3. ŠĀng-sze asked, 'If the son and heir have been born after the burial (of the) ruler, what course should be followed?'

Confucius said, 'The Grand minister and the Grand master of the ancestral temple will follow the Grand officer of prayer, and announce the fact before the spirit tablet (of the deceased ruler)⁴. Three months after they will give the name in the same place, and announce it all round⁵, and also at the altars to (the

¹ A most expressive indication of the sorrow proper to the occasion.

² The breast and shoulder of the child had also been bared.

³ The 'five household altars' are those at which the sacrifices were offered in the palace or house, often mentioned in the last Book.

⁴ The characters of the text, 'in the shrine temple of the father,' denote the special shrine or smaller temple assigned to the father in the great ancestral temple; but that was not assigned till after all the rites of mourning were over. The characters here denote the spirit tablet which had been before the burial set up over the coffin, and which was now removed to a rear apartment. P. Zottoli simply has 'coram tabellâ.'

⁵ At the courts of the sovereign and of the other princes.

spirits of) the land and grain, in the ancestral temple, and (at the altars of) the hills and streams.'

4. Confucius said, 'When princes of states are about to go to the (court of the) son of Heaven, they must announce (their departure) before (the shrine of) their grandfather, and lay their offerings in that of their father¹. They then put on the court cap, and go forth to hold their own court. (At this) they charge the officer of prayer and the recorder to announce (their departure) to the (spirits of the) land and grain, in the ancestral temple, and at the (altars of the) hills and rivers. They then give (the business of) the state in charge to the five (subordinate) officers², and take their journey, presenting the offerings to the spirits of the road³ as they set forth. All the announcements should be completed in five days. To go beyond this in making them is contrary to rule. In every one of them they use a victim and silks. On the return (of the princes) there are the same observances.'

5. 'When princes of states are about to visit one another, they must announce (their departure) before

¹ The characters here are the same as in the preceding paragraph, but here they have their usual force. Announcement and offerings were made at both shrines.

² The most likely opinion is that these five officers were—two belonging to the department of the minister of Instruction, two to that of the minister of Works, and one to that of the minister of War. On them, for reasons which we may not be able to give, devolved on such occasions the superintendence of the state.

³ There seems to be no doubt of the meaning here, but this significance of 道 is not given in the Khang-hsi dictionary. The more common term is 祖.

the shrine of their father¹. They will then put on their court robes, and go forth to hold their own court. (At this) they charge the officer of prayer and the recorder to announce (their departure) at the five shrines in the ancestral temple, and at the altars of the hills and rivers which they will pass. They then give (the business of) the state in charge to the five officers, and take their journey, presenting the offerings to the spirits of the road as they set forth. When they return, they will announce (the fact) in person to their grandfather and father¹, and will charge the officer of prayer and the recorder to make announcement of it at the altars where they announced (their departure). (When this has been done), they enter and give audience in the court.'

6. ŠĀng-šze asked, 'If the funerals of both parents² take place together, what course is adopted? Which is first and which last?'

Confucius said, 'The rule is that the burying of the less important (mother) should have the precedence, and that of the more important (father) follow, while the offerings to them are set down in the opposite order. From the opening of the apartment and conveying out the coffin (of the mother) till its interment no offerings are put down; when the coffin is on the route to the grave, there is no wailing at the regular place for that ceremony. When they return from this interment, they set down the offerings (to the father), and afterwards announce (to his spirit) when the removal of his coffin will take

¹ There would seem to be an omission in the former of these sentences of the announcement to the grandfathers.

² Or grandparents.

place, and proceed to arrange for the interment. It is the rule that the sacrifice of repose should first be offered to the more important (father), and afterwards to the less important (mother).'

7. Confucius said ¹, 'The eldest son, even though seventy, should never be without a wife to take her part in presiding at the funeral rites. If there be no such eldest son, the rites may be performed without a presiding wife.'

8. 3ǎng-ȳze asked, 'It has been proposed to invest a son with the cap, and the investors have arrived, and after exchanging bows and courtesies (with the master of the house), have entered. If then news should come that the death of some relative has occurred, for whom a year's mourning or that of nine months must be worn, what should be done?'

Confucius said, 'If the death has taken place within (the circle of the same surname), the ceremony should be given up²; but if without (that circle), it will go on, but the sweet wine will not be presented to the youth. The viands will be removed and the place swept, after which he will go to his proper position and wail. If the investors have not yet arrived, the capping will be given up (for the time)³.

9. 'If the arrangements for the capping have been

¹ The words of Confucius are here, as in some other paragraphs, not preceded by the formula, '3ǎng-ȳze asked.' Some say this is an omission, intentional or unintentional, of the compiler. Some commentators deride the judgment (see especially Ho Kung-yü), holding it unworthy of Confucius.

² Because then a festal and a mourning service would come together in the ancestral temple.

³ The investors may have previously heard of the death, and not kept their appointment.

made, but before the day arrives, an occasion for the one year's mourning, or for that of nine months, or five months, have arrived, the youth shall be capped in his mourning dress.'

10. 'When all mourning is over, may a son continue to wear the cap which he has hitherto worn¹?'

Confucius said, 'When the son of Heaven gives to the (young) prince of a state or a Great officer his robes and the cap proper to each in the grand ancestral temple, the youth on his return home will set forth his offering (in his own ancestral temple), wearing the robes that have been given to him, and here he will drink the cup of capping (as if) offered by his father², without the cup of wine at the ceremony.

11. 'When a son is (thus) capped after his father's death, he is considered to be properly capped; he will sweep the ground, and sacrifice at his father's shrine. This being done, he will present himself before his uncles, and then offer the proper courtesies to the investors.'

12. Ǻng-Ǻze asked, 'Under what circumstances is it that at sacrifice they do not carry out the practice of all drinking to one another?'

Confucius said, 'I have heard that at the close of the one year's mourning, the principal concerned in it

¹ Till he was capped, a youth wore nothing on his head. But in the case supposed the youth's time for capping had arrived; and he had assumed a cap without the ceremony.

² When a father gave orders to his son about his capping or marriage, he gave him a cup of ordinary wine. The sweet wine was given to the youth by a friend or friends who had invested him with the cap. The real answer to Ǻng-Ǻze's question is in paragraph 11.

sacrifices in his inner garment of soft silk, and there is not that drinking all round. The cup is set down beside the guests, but they do not take it up. This is the rule. Formerly duke K'áo of Lû¹, while in that silken garment, took the cup and sent it all round, but it was against the rule; and duke Háo², at the end of the second year's mourning, put down the cup presented to him, and did not send it all round, but this also was against the rule.'

13. ǰǎng-ǰze asked, 'In a case (of the) mourning for nine months, can (the principal) take part in contributing to the offerings (to the dead of others)?'

Confucius said, 'Why speak only of (the mourning for) nine months? In all cases from (the mourning for) three years downwards, it may be done. This is the rule.'

ǰǎng-ǰze said, 'Would not this be making the mourning of little importance, and attaching (undue) importance to mutual helpfulness?'

Confucius said, 'This is not what I mean. When there is mourning for the son of Heaven or the prince of a state, (all) who wear the sackcloth with the jagged edges (will contribute to) the offerings. At the mourning of a Great officer, (all) who wear the sackcloth with the even edges will do so. At the mourning of an ordinary officer, his associates and friends will do so. If all these be not sufficient, they may receive contributions from all who should mourn for nine months downwards; and if these be still insufficient, they will repeat the process³.'

¹ B. C. 541-510.

² B. C. 795-769. This is going a long way back.

³ On this paragraph P. Zottoli says:—'ǰǎng-ǰze petit an

14. Ǻng-Ǻze asked, 'In a case of the mourning for five months, may (the principal) take part in the other sacrifices (of mourning)¹?'

Confucius said, 'Why speak only of the mourning for five months? In all cases from the mourning for three years downwards, (the principals) take part in those sacrifices.'

Ǻng-Ǻze said, 'Would not this be making the mourning of little importance, and giving (undue) importance to the sacrifices?'

Confucius said, 'In the mourning sacrifices for the son of Heaven and the prince of a state, none but those who wear the sackcloth with the jagged edges take part in them. In those for a Great officer, they who wear the sackcloth with the even edges do so. In those for another officer, if the participants be insufficient, they add to them from their brethren who should wear mourning for nine months downwards.'

15. Ǻng-Ǻze asked, 'When acquaintances are in mourning, may they participate in one another's sacrifices?'

Confucius said, 'When wearing the three months' mourning, one has no occasion to sacrifice (in his own ancestral temple), and how should he assist another man (out of his own line)?'

aliquis in novem mensium luctu constitutus possit adjuvare alterius funestae familiae oblationem. Confucius intelligit de adjuvanda proprii funeris oblatione. There appears to be a similar misunderstanding between the two in the next paragraph.

¹ Khung Ying-tâ makes this out to be the sacrifices of repose, and at the end of the wailing. I think the reference is more general.

16. ǰǎng-ǰze asked, 'When one has put off his mourning, may he take part in contributing to the offerings (for the dead of another)?'

Confucius said, 'To take part in the offerings (to another's dead), on putting off one's own sackcloth, is contrary to the rule. Possibly, he may perform the part of assisting him in receiving visitors.'

17. ǰǎng-ǰze asked, 'According to the rules for marriages, the presents have been received and a fortunate day has been fixed;—if then the father or mother of the young lady die, what course should be adopted?'

Confucius said, 'The son-in-law will send some one to condole; and if it be his father or mother that has died, the family of the lady will in the same way send some to present their condolences. If the father have died, (the messenger) will name the (other) father (as having sent him); if the mother, he will name the (other) mother. If both parents be dead (on both sides), he will name the oldest uncle and his wife. When the son-in-law has buried (his dead), his oldest uncle will offer a release from the engagement to the lady, saying, "My son, being occupied with the mourning for his father or mother, and not having obtained the right to be reckoned among your brethren, has employed me to offer a release from the engagement." (In this case) it is the rule for the lady to agree to the message and not presume to (insist on) the marriage (taking place immediately). When the son-in-law has concluded his mourning, the parents of the lady will send and request (the fulfilment of the engagement). The son-in-law will not (immediately come to) carry her (to his house), but afterwards she will be married to him; this is the

rule. If it be the father or mother of the lady who died, the son-in-law will follow a similar course¹.

18. Šāng-sze asked, 'The son-in-law has met the lady in person, and she is on the way with him :—if (then) his father or mother die, what course should be adopted ?'

Confucius said, 'The lady will change her dress²; and in the long linen robe³, with the cincture of white silk round her hair, will hasten to be present at the mourning rites. If, while she is on the way, it be her own father or mother who dies, she will return⁴.'

19. 'If the son-in-law have met the lady in person, and before she has arrived at his house, there occur a death requiring the year's or the nine months' mourning, what course should be adopted ?'

Confucius said, 'Before the gentleman enters, he will change his dress in a place outside. The lady will enter and change her dress in a place inside. They will then go to the proper positions and wail.'

Šāng-sze asked, 'When the mourning is ended, will they not resume the marriage ceremonies?'

¹ Is the final marriage of the lady to the original betrothed 'son-in-law,' or bridegroom as we should say; or to another, that she may not pass the proper time for her marrying? Khung Ying-tâ, and other old commentators, advocate the latter view. Others, and especially the *K'ien-lung* editors, maintain the former; and I have indicated in the version my agreement with them. There are difficulties with the text; but Confucius would hardly have sanctioned the other course.

² At the house of him who was now her husband.

³ This, called 'the deep garment,' had the body and skirt sown together. See Book XXXIV.

⁴ This would be done, it is said, by Hsü Sze-šhāng (Ming dynasty), to allow play to her filial piety, but she would live at the house of 'the son-in-law.'

Confucius said, 'It is the rule, that when the time of sacrifice has been allowed to pass by, it is not then offered. Why in this case should they go back to what must have taken place previously?'

20. Confucius said, 'The family that has married a daughter away, does not extinguish its candles for three nights, thinking of the separation that has taken place. The family that has received the (new) wife for three days has no music; thinking her bridegroom is now in the place of his parents¹. After three months she presents herself in the ancestral temple, and is styled "The new wife that has come." A day is chosen for her to sacrifice at the shrine of her father-in-law; expressing the idea of her being (now) the established wife.'

21. ǰǎng-ǰze asked, 'If the lady die before she has presented herself in the ancestral temple, what course should be adopted?'

Confucius said, '(Her coffin) should not be removed to the ancestral temple, nor should (her tablet) be placed next to that of her mother-in-law. The husband should not carry the staff; nor wear the shoes of straw; nor have a (special) place (for wailing). She should be taken back, and buried among her kindred of her own family;—showing that she had not become the established wife.'

22. ǰǎng-ǰze asked, 'The fortunate day has been fixed for taking the lady (to her new home), and she dies (in the meantime):—what should be done?'

Confucius said, 'The son-in-law will come to condole, wearing the one year's mourning, which he will

¹ This and the statements that follow suppose that the bridegroom's parents are dead.

lay aside when the interment has taken place. If it be the husband who dies, a similar course will be followed on the other side.'

23. ŠĀng-ŋze asked, 'Is it according to rule that at the mourning rites there should be two (performing the part of) the orphan son (and heir, receiving visitors)¹, or that at a temple-shrine there should be two spirit-tablets?'

Confucius said, 'In heaven there are not two suns; in a country there are not two kings²; in the seasonal sacrifices, and those to Heaven and Earth³, there are not two who occupy the highest place of honour. I do not know that what you ask about is according to rule. Formerly duke Hwan of Kht⁴, going frequently to war, made fictitious tablets and took them with him on his expeditions, depositing them on his return in the ancestral temple⁵. The practice of having two tablets in a temple-shrine originated from duke Hwan. As to two (playing the part of the) orphan son, it may be thus explained:—Formerly, on occasion of a visit to Lû by duke Ling of Wei, the mourning rites of Kt Hwan-ŋze were in progress. The ruler of Wei requested leave to offer his condolences. Duke Ât (of Lû)⁶ declined (the ceremony), but could not

¹ The Chinese characters mean simply 'two orphans.' Neither Khang-hsi nor any English-Chinese dictionary explains the peculiar use of the term here; nor is Confucius' explanation satisfactory, or to the point.

² Compare paragraphs 5, 8, III, iii, pages 224–226.

³ See the 'Doctrine of the Mean,' 19, 6, Chinese Classics, vol. i.

⁴ B.C. 685–643.

⁵ Literally 'the temple-shrine of his grandfather;' but I think the name must have the general meaning I have given.

⁶ It has been shown that the ruler of Wei here could not be

enforce his refusal. He therefore acted as the principal (mourner), and the visitor came in to condole with him. Khang-ze stood on the right of the gate with his face to the north. The duke, after the usual bows and courtesies, ascended by the steps on the east with his face towards the west. The visitor ascended by those on the west, and paid his condolences. The duke bowed ceremoniously to him, and then rose up and wailed, while Khang-ze bowed with his forehead to the ground, in the position where he was. The superintending officers made no attempt to put the thing to rights. The having two now acting as the orphan son arose from the error of Kí Khang-ze.'

24. Jǎng-ze asked, 'Anciently when an army went on an expedition, was it not first necessary to carry with it the spirit-tablets that had been removed from their shrines¹?'

Confucius said, 'When the son of Heaven went on his tours of Inspection, he took (one of) those tablets along with him, conveying it in the carriage of Reverence, thus intimating how it was felt necessary to have with him that object of honour². The practice

duke Ling. He must have been duke K'û. But this error discredits the view of the statement having come from Confucius.

¹ See note 2 and plan of the royal ancestral temple of Káu on pages 223-225.

² This, it is said, was the tablet of the royal ancestor which had been last removed from its shrine, and placed in the shrine-house for all such removed tablets. The carriage of Reverence was the 'metal-guilt' carriage of the king, second to that adorned with jade, in which he rode to sacrifice. Zottoli renders:—'Imperator perlustrans custodita, cum translatici delubri tabella peragrabat, imposita super casti curru, significatum necessariam praesentiam superioris.'

now-a-days of taking the tablets of the seven temple-shrines along with them on an expedition is an error. No shrine in all the seven (of the king), or in the five of the prince of a state, ought to be (left) empty. A shrine can only be so left without its tablet, when the son of Heaven has died, or the prince of a state deceased, or left his state, or when all the tablets are brought together at the united sacrifice, in the shrine-temple of the highest ancestor. I heard the following statement from Lão Tan¹ :—" On the death of the son of Heaven, or of the prince of a state, it is the rule that the officer of prayer should take the tablets from all the other shrines and deposit them in that of the high ancestor². When the wailing was over, and the business (of placing the tablet of the deceased in its shrine) was completed, then every other tablet was restored to its shrine. When a ruler abandoned his state, it was the rule that the Grand minister should take the tablets from all the shrines and follow him. When there was the united sacrifice in the shrine of the high ancestor, the officer of prayer met (and received) the tablets from the four shrines. When they were taken from their shrines or carried back to them all were required to keep out of the way." So said Lão Tan.'

¹ This was, most probably, Lão-3ze, though some of the commentators deny it. *K'ang* says : ' Lão Tan, the title of old for men of longevity, was a contemporary of Confucius ;' and *K'han Hào* quotes a note on this from Wang of Shih-liang, that ' This was not the author of the " Five thousand words,"' i. e. of the *T'ao Te h King*.

² While the special sacrifices and other funeral rites were going on, the other sacrifices, which belonged to a different category of rites, were suspended.

25. 3ǎng-ze asked, 'Anciently, when they marched on an expedition, and carried no displaced tablets with them, what did they make their chief consideration ?'

Confucius said, 'They made the instructions from the tablet their chief consideration¹.'

'What does that mean?' asked the other.

Confucius said, 'When the son of Heaven or the prince of a state was about to go forth, he would, with gifts of silk, skins, and jade-tokens, announce his purpose at the shrines of his grandfather and father. He then took those gifts with him, conveying them on the march in the carriage of Reverence. At every stage (of the march), he would place offerings of food by them, and afterwards occupy the station. On returning, they would make announcement (at the same shrines), and when they had set forth (again) their offerings, they would collect the silk and jade, and bury them between the steps (leading) up to the fane of the high ancestor ; after which they left the temple. This was how they made the instructions they received their chief consideration.'

26. 3ze-yû asked, 'Is it the rule to mourn for a foster-mother² as for a mother?'

¹ Zottoli gives for this phrase simply 'adhaerebant numini,' subjoining no note on it. The parties spoken of put down their offerings before the shrines, announcing that they were about to undertake such an expedition ; and taking it for granted that their progenitors approved of their object, proceeded to carry it out, as if they had received a charge from them to do so, carrying the offerings with them in token of that charge from the spirits in the tablets of the shrines. This view is distinctly set forth by Hwang Khan (end of early Sung dynasty) and others.

² This foster-mother was not what we call 'a nurse ;' but a lady

Confucius said, 'It is not the rule. Anciently, outside the palace, a boy had his master, and at home his foster-mother; they were those whom the ruler employed to teach his son;—what ground should these be for wearing mourning for them? Formerly duke *Kào* of *Lû* having lost his mother when he was little, had a foster-mother, who was good; and when she died, he could not bear (not) to mourn for her, and wished to do so. The proper officer on hearing of it, said, "According to the ancient rule, there is no mourning for a foster-mother. If you wear this mourning, you will act contrary to that ancient rule, and introduce confusion into the laws of the state. If you will after all do it, then we will put it on record, and transmit the act to the future;—will not that be undesirable?" The duke said, "Anciently the son of Heaven, when unoccupied and at ease, wore the soft inner garment, assumed after the year's mourning, and the cap." The duke could not bear not to wear mourning, and on this he mourned for his foster-mother in this garb. The mourning for a foster-mother originated with duke *Kào* of *Lû*¹.'

of the harem to whom the care of an orphan boy was entrusted;—it may have been after he ceased to be suckled. The reasoning of Confucius goes on the assumption that mourning should be worn only in cases of consanguinity or affinity; and it may be inferred from this that concubinage was not the most ancient rule in China.

¹ See the eleventh article in the forty-third chapter of the 'Narratives of the School,' where a similar, probably the same, conversation, with some variations, is found. The duke of *Lû* in it, however, is not *Kào*, but *Hào*; see paragraph 12, page 315.

SECTION II.

1. ǰǎng-ǰze asked, 'The princes are assembled in a body to appear before the son of Heaven; they have entered the gate, but are not able to go through with the rites (of audience);—how many occurrences will make these be discontinued?'

Confucius said, 'Four.' 'May I ask what they are?' said the other. The reply was:—'The grand ancestral temple taking fire; an eclipse of the sun; funeral rites of the queen; their robes all unsightly through soaking rain. If, when the princes are all there, an eclipse of the sun take place, they follow the son of Heaven to save it¹; each one dressed in the colour of his quarter, and with the weapon proper to it². If there be a fire in the grand ancestral temple, they follow him to extinguish it without those robes and weapons.'

2. ǰǎng-ǰze said, 'Princes are visiting one another. (The strangers) have entered the gate after the customary bowings and courtesies, but they are not able to go through with the rites (of audience);—how many occurrences will make these be discontinued?'

Confucius said, 'Six;' and, in answer to the ques-

¹ The phenomenon of an eclipse suggested the idea of some enemy or adverse influence devouring the sun's disk.

² The colour appropriate to the east was green, and the weapon the spear with two hooks; the colour of the south was red, and the weapon the spear with one hook and two points; the colour of the west was white, and the weapon the bow; the colour of the north was black, and the weapon the shield; the colour of the centre was yellow, and the weapon the drum.

tion as to what they were, replied :—‘ The death of the son of Heaven ; the grand ancestral temple taking fire ; an eclipse of the sun ; the funeral rites of the queen or of the princess of the state ; and their robes all unsightly through soaking rain.’

3. ǰǰng-ǰze said, ‘ At the seasonal sacrifices of the son of Heaven, at those to Heaven and Earth, and at (any of) the five sacrifices of the house, after the vessels, round and square, with their contents have been set forth, if there occur the death of the son of Heaven or mourning rites for the queen, what should be done?’

Confucius said, ‘ The sacrifice should be stopped.’ The other asked, ‘ If, during the sacrifice, there occur an eclipse of the sun, or the grand ancestral temple take fire, what should be done?’ The reply was, ‘ The steps of the sacrifice should be hurried on. If the victim have arrived, but has not yet been slain, the sacrifice should be discontinued.

4. ‘ When the son of Heaven has died and is not yet coffined, the sacrifices of the house are not offered. When he is coffined, they are resumed ; but at any one of them the representative of the dead takes (only) three mouthfuls (of the food), and is not urged (to take more). He is then presented with a cup, but does not respond by presenting another, and there is an end (of the ceremony). From the removal of the coffin to the return (from the burial) and the subsequent wailing, those sacrifices (again) cease. After the burial they are offered, but when the officer of prayer has finished the cup presented to him, they stop.’

5. ǰǰng-ǰze asked, ‘ At the sacrifices to the spirits

of the land and grain proper to the feudal princes, if, after the stands and vessels, with their contents, have been arranged, news arrive of the death of the son of Heaven or of the mourning rites for his queen, or if the ruler die or there be mourning rites for his consort, what should be done ?'

Confucius said, 'The sacrifice should be discontinued. From the ruler's death to the coffining, and from the removal of the coffin to the return (from the burial) and the (subsequent) wailing, they will follow the example set by the son of Heaven¹.'

6. Jǎng-ze asked, 'At the sacrifices of a Great officer², when the tripods and stands have been arranged, and the dishes of bamboo and wood, with their contents, have been set forth, but they are not able to go through with the rites, how many occurrences will cause them to be discontinued ?'

Confucius said, 'Nine ;' and when asked what they were, he added :—'The death of the son of Heaven ; funeral rites for his queen ; the death of the ruler (of the state) ; funeral rites for his consort ; the ruler's grand ancestral temple taking fire ; an eclipse of the sun ; (a call to) the three years' mourning ; to that of one year ; or to that of nine months. In all these cases the sacrifice should be given up. If the mourning be merely for relatives by affinity, from all degrees of it up to the twelve months, the sacrifice will go on. At one where the mourning is worn for twelve months, the representative of the dead, after entering, will take (only) three mouthfuls (of the food), and not be urged to take (any more).

¹ As given in the preceding paragraphs.

² In his ancestral temple.

He will be presented with a cup, but will not respond by presenting one in return, and there will be an end (of the ceremony). Where the mourning is for nine months, after he has presented the responsive cup, the thing will end. Where it is for five or for three months, it will not end till all the observances in the apartment are gone through. What distinguishes the proceedings of an ordinary officer is, that he does not sacrifice when wearing the three months' mourning. He sacrifices, however, if the dead to whom he does so had no relationship with him requiring him to wear mourning.'

7. Ǻng-Ǻze asked, 'May one, wearing the three years' mourning for a parent, go to condole with others?'

Confucius said, 'On the completion of the first of the three years, one should not be seen standing with others, or going along in a crowd. With a superior man the use of ceremonies is to give proper and elegant expression to the feelings. Would it not be an empty form¹ to go and condole and wail with others, while wearing the three years' mourning?'

8. Ǻng-Ǻze asked, 'If a Great officer or ordinary officer be in mourning for a parent² he may put it off³; and if he be in mourning for his ruler, under what conditions will he put that off?'

Confucius said, 'If he have the mourning for his

¹ How could he, occupied with his own sorrow, offer anything but an empty form of condolence to others?

² Literally 'private mourning,' as below; but evidently the master and disciple both had the mourning for a parent in mind.

³ On his having to go into mourning for his ruler.

ruler on his person, he will not venture to wear any private mourning ;—what putting off can there be ? In this case, even if the time be passed (for any observances which the private mourning would require), he will not put it off. When the mourning for the ruler is put off, he will then perform the great sacrifices (of his private mourning)¹. This is the rule.'

9. 3ǎng-ze asked, 'But is it allowable thus to give up all the mourning rites for a parent through this keeping on of the mourning (for a ruler)?'

Confucius said, 'According to the ceremonies as determined by the ancient kings, it is the rule that when the time has passed (for the observance of any ceremony), there should be no attempt to perform it. It is not that one could not keep from not putting off the mourning ; but the evil would be in his going beyond the definite statute. Therefore it is that a superior man does not offer a sacrifice, when the proper time for doing so has passed.'

10. 3ǎng-ze said, 'If, when the ruler has died, and is now lying in his coffin, the minister be called to the funeral rites for his father or mother, what course will he pursue ?'

Confucius said, 'He should go home and remain there ; going indeed to the ruler's for the great

¹ That is, the rightful son and heir may then perform the sacrifice marking the close of the first year's mourning for a parent, and that marking the close of the second year's mourning in the month after. But *Khân Háo* argues that it was only the rightful son who could thus go back and offer the sacrifices proper to the mourning rites for parents, and that the other sons could not do so. This is the case underlying the next paragraph.

services (to the departed), but not for those of every morning and evening¹.

11. (Šāng-sze asked), 'If, when they have begun to remove the coffin, the minister be called to the funeral rites for his father or mother, how should he do?'

Confucius said, 'He should go home and wail, and then return and accompany the funeral of the ruler.'

12. 'If,' said (Šāng-sze), 'before the ruler has been coffined, a minister be called to the funeral rites for his father or mother, what should be his course?'

Confucius said, 'He should go home, and have the deceased put into the coffin, returning (then) to the ruler's. On occasion of the great services, he will go home, but not for those of every morning and evening. In the case of a Great officer, the chief servant of the household will attend to matters; in the case of an ordinary officer, a son or grandson. When there are the great services at the ruler's, the wife of the Great officer will also go there, but not for those of every morning and evening.'

13. One in a low position should not pronounce the eulogy of another in a high, nor a younger man that of one older than himself. In the case of the son of Heaven, they refer to Heaven as giving his

¹ It has been seen that morning and evening offerings to the dead were placed near the coffin. On the first and fifteenth of the month these were on a great scale, and with special observances,—at the new and full moon. They were 'the great services.' The practice still continues.

eulogy. It is not the rule for princes of states to deliver the eulogy of one another¹.

14. ǰǰng-ǰze asked, 'When a ruler goes across the boundary of his own state, he takes with him his inner coffin as a precaution for the preparations against the three years' (mourning rites) for him². If he die (abroad), what are the proceedings on his being brought back?'

Confucius said, 'The clothes to be put on him after the coffining having been provided, the son in the linen cap, with the sackcloth band round it, wearing coarse sackcloth and the shoes of straw, and carrying a staff, will enter by the opening made in the wall of the apartment for the coffin, having ascended by the western steps. If the slighter dressing (preparatory to the coffining) have still (to be made), the son will follow the bier without a cap, enter by the gate, and ascend by the steps on the east. There is one and the same rule for a ruler, a Great officer, and an ordinary officer.'

15. ǰǰng-ǰze asked, 'If one is occupied in drawing (the carriage with the bier on it) at the funeral rites of his ruler, and is then called to the funeral rites of his father or mother, what should he do?'

¹ The eulogy has in China for more than a thousand years taken the form of inscriptions on tombs and sacrificial compositions; of which there are many elegant and eloquent specimens. It should be summed up in the honorary title. Truth, however, might require that that should be the reverse of eulogistic; and perhaps this led to its being conferred, as a rule, by one superior in rank and position. The honorary title of a deceased sovereign was first proclaimed at the great sacrifice to Heaven at the winter solstice; and hence it is referred to in the text as coming from Heaven!

² That is, I think, simply, 'as a precaution against his dying while abroad.' Zottoli renders:—'*Regulus excedens confinia, ut in tres annos praecaveatur, habit sandapilam sequacem.*'

Confucius said, 'He should complete what he is engaged in; and when the coffin has been let down into the grave, return home, without waiting for the departure of the (ruler's) son.'

16. ŠĀng-šze asked, 'If one, occupied with the funeral rites of a parent, has (assisted in) drawing the bier to the path (to the grave), and there hear of the death of his ruler, what should he do?'

Confucius said, 'He should complete the burial; and, when the coffin has been let down, he should change his dress, and go to (the ruler's).'

17. ŠĀng-šze asked, 'If the eldest son by the proper wife be (only) an officer, and a son by a secondary wife be a Great officer, how will the latter proceed in his sacrificing?'

Confucius said, 'He will sacrifice, with the victims belonging to his higher rank, in the house of the eldest son. The officer of prayer will say, "So and So, the filial son, in behalf of So and So, the attendant son, presents his regular offering¹."

18. 'If the eldest son, now the head of the family, be residing, in consequence of some charge of guilt, in another state, and a son by a secondary wife be a Great officer, when (the latter) is offering a sacrifice (for the other), the officer of prayer will say, "So

¹ Here two things were in collision. The oldest son by the proper wife was the representative of the father, and only he could preside at the service in the ancestral temple of the family. But here an inferior son has been advanced to a higher rank than his older brother. As a Great officer he is entitled to have three shrine temples; but it would be contrary to the solidarity of the family for him to erect an ancestral temple for himself. The difficulty is met in the way described, the sacrifice being ascribed to the elder brother, as head of the family.

and So, the filial son, employs the attendant son, So and So, to perform for him the regular service." (In this case, however), the principal in this vicarious service will not conduct the sacrifice so as to see that the spirit of the deceased is satisfied to the full ; nor send the cup round among all who are present, nor receive the blessing (at the close) ; nor lay on the ground the portions of the sacrifice as thank-offerings ; nor have with him (the wife of the elder brother) who should appear before the spirit-tablet of her mother-in-law, the wife of the deceased. He will put down the cup before the (principal) guests, but they will put it down (in another place), and not send it round. He will not send to them portions of the flesh. In his address to the guests (at the beginning of the service), he will say, " My honoured brother, the honoured son (of our father), being in another state, has employed me, So and So, to make announcement to you¹."

19. 3ǎng-ze asked, ' If the eldest son have gone and is in another state, while a son by a secondary

¹ This paragraph continues the case in the preceding, with the additional circumstances that the head of the family is a fugitive from it, and that the sacrifice referred to in it is performed by the inferior brother remaining in the state, in lieu of him. It is difficult to translate without amplification so as to be intelligible, because of what may be called the technical terms in it. The five points in which the service was deficient, different from what it would have been, if performed by the proper brother, are given in the reverse order of their regular occurrence ; whether designedly or not, we cannot tell. For that portion of the paragraph P. Zottoli gives :—' Sed vicarius dominus vacabit satisfactionis sacrificio ; vacabit universali propinatione ; vacabit benedictione ; vacabit consternationis sacrificio ; vacabit copulatione ;' appending a note to explain the terms.

wife, and without rank, remains at home, may the latter offer the sacrifice ?'

Confucius said, 'Yes, certainly.' 'And how will he sacrifice?' 'He will rear an altar in front of the (family-)grave, and there he will sacrifice at the different seasons. If the oldest son die, he will announce the event at the grave, and afterwards sacrifice in the house, calling himself, however, only by his name, and abstaining from the epithet "filial." This abstinence will cease after his death.' The disciples of ǰze-yŭ, in the case of sons by inferior wives sacrificing, held that this practice was in accordance with what was right. Those of them who sacrifice now-a-days do not ground their practice on this principle of right ;—they have no truthful ground for their sacrifices¹.

20. ǰǰng-ǰze asked, 'Is it necessary that there should be a representative of the dead in sacrifice ? or may he be dispensed with as when the satisfying offerings are made to the dead ?'

Confucius said, 'In sacrificing to a full-grown man for whom there have been the funeral rites, there must be such a representative, who should be a grandson ; and if the grandson be too young, some one must be employed to carry him in his arms. If there be no grandson, some one of the same surname should be selected for the occasion. In sacrificing to one who has died prematurely, there are (only) the satisfying offerings, for he was not

¹ These last two sentences evidently should not be ascribed to Confucius. It was only after his death that ǰze-yŭ would have a school of his own. They must have been written moreover after the death of ǰze-yŭ.

full-grown. To sacrifice to a full-grown man, for whom there have been the funeral rites without a representative, would be to treat him as if he had died prematurely.'

21. Confucius said, 'There is the offering of satisfaction made in the dark chamber, and that made in the brighter place.'

Žǎng-ze answered with a question, 'But to one who has died prematurely there is not made a complete sacrifice; what do you mean by speaking of two satisfying offerings, the dark and the bright?'

Confucius said, 'When the oldest son, who would take the father's place, dies prematurely, no brother by an inferior wife can be his successor. At the auspicious sacrifice to him¹, there is a single bullock; but the service being to one who died prematurely, there is no presentation (of the lungs), no stand with the heart and tongue, no dark-coloured spirits², no announcement of the nourishment being completed. This is what is called the dark satisfying offering. In regard to all others who have died prematurely and have left no offspring, the sacrifice is offered to them in the house of the oldest son, where the apartment is most light, with the vases in the chamber on the east. This is what is called the bright satisfying offering.'

22. Žǎng-ze asked, 'At a burial, when the bier has been drawn to the path (leading to the place), if there happen an eclipse of the sun, is any change made or not?'

¹ The first auspicious sacrifice took place when the ceremony of wailing was over.

² A name for water.

Confucius said, 'Formerly, along with Láo Tan¹, I was assisting at a burial in the village of Hsiang, and when we had got to the path, the sun was eclipsed. Láo Tan said to me, "*K'ziú*, let the bier be stopped on the left of the road²; and then let us wail and wait till the eclipse pass away. When it is light again, we will proceed." He said that this was the rule. When we had returned and completed the burial, I said to him, "In the progress of a bier there should be no returning. When there is an eclipse of the sun, we do not know whether it will pass away quickly or not, would it not have been better to go on?" Láo Tan said, "When the prince of a state is going to the court of the son of Heaven, he travels while he can see the sun. At sun-down he halts, and presents his offerings (to the spirit of the way). When a Great officer is on a mission, he travels while he can see the sun, and at sun-down he halts. Now a bier does not set forth in the early morning, nor does it rest anywhere at night; but those who travel by star-light are only criminals and those who are hastening to the funeral rites of a parent. When there is an eclipse of the sun, how do we know that we shall not see the stars? And moreover, a superior man, in his performance of rites, will not expose his relatives to the risk of distress or evil." This is what I heard from Láo Tan.'

23. Ǻng-Ǻze asked, 'In the case of one dying where he is stopping, when discharging a mission for

¹ This was Láo-Ǻze, 'the old master.' It seems better to keep Láo as if it had been the surname. See paragraph 24, p. 325.

² The east of the road. Graves were north of the towns.

his ruler, the rules say¹ that, (if he die) in a government hotel his spirit shall be recalled; but not, (if he die) in a private one². But to whatever state a commissioner may be sent, the lodging which may be assigned to him by the proper officer becomes a public hotel;—what is the meaning of his spirit not being recalled, (if he die) in a private one?’

Confucius said, ‘You have asked well. The houses of a high minister, a Great officer, or an ordinary officer, may be called private hotels. The government hotel, and any other which the government may appoint, may be called a public hotel. In this you have the meaning of that saying that the spirit is recalled at a public hotel.’

24. Ǵǵng-ze asked, ‘Children dying prematurely, between eight and eleven, should be buried in the garden in a brick grave, and carried thither on a contrivance serving the purpose of a carriage, the place being near; but now if the grave is chosen at a distance, what do you say about their being buried there?’

Confucius said, ‘I have heard this account from Láo Tan:—“Formerly,” he said, “the recorder Yí had a son who died thus prematurely, and the grave was distant. The duke of Sháo said to him, ‘Why not shroud and coffin him in your palace?’ The recorder said, ‘Dare I do so?’ The

¹ Where these rules are to be found I do not know.

² I use ‘hotel’ here in the French meaning of the term. We must suppose that ‘the private hotel’ about which Ǵǵng-ze asked was one to which the commissioner had gone without the instructions of the state; and, as the *Khien-lung* editors say, ‘the rites were therefore so far diminished.’

duke of Šháu spoke about it to the duke of Káu, who said, 'Why may it not be done?' and the recorder did it. The practice of coffins for boys who have died so prematurely, and shrouding them, began with the recorder Yl."

25. Šāng-ze asked, 'A minister or a Great officer is about to act the part of a personator of the dead for his ruler. If, when he has received (orders) to pass the night in solemn vigil, there occur in his own family an occasion for him to wear the robe of hemmed sackcloth, what should he do?'

Confucius said, 'The rule is for him to leave (his house) and lodge in a state hotel, and wait till (the ruler's) business is accomplished.'

26. Confucius said, 'When one who has represented the dead comes forth in the (officer's) leathern cap, or the (Great officer's) tasseled cap (which he has worn), ministers, Great officers, and other officers, all will descend from their carriages (when he passes). He will bow forward to them, and he will also have a forerunner (to notify his approach).'

27. Šze-hsiâ asked, 'There is such a thing as no longer declining military service, after the wailing in the three years' mourning has come to an end. Is this the rule? or was it at first required by the officers (of the state)?'

Confucius said, 'Under the sovereigns of Hsiâ, as soon as the coffin in the three years' mourning was completed, they resigned all their public duties. Under Yin they did so as soon as the interment was over. Is not this the meaning of what we find in the record, that "the ruler does not take from men their affection to their parents, nor do men take from their parents their filial duty?"'

28. 3ze-hsiâ asked, 'Is then not declining military service (during mourning) to be condemned?'

Confucius said, 'I heard from Lâu Tan that duke Po-khin engaged once in such service, when there was occasion for it; but I do not know if I should allow it in those who seek (by it) their own advantage during the period of the three years' mourning¹.'

¹ Po-khin was the son of the duke of Kâu, and the first marquis of Lâu. The time of his entering on the rule of that state was a very critical one in the kingdom; and though it was then, it would appear, the period of his mourning for his mother's death, he discharged his public duty in the time of his own grief.

BOOK VI. WǎN WANG SHIH 3ZE

OR

KING WǎN AS SON AND HEIR¹.

SECTION I.

1. Thus did king Wǎn act when he was eldest son and heir :—Thrice a day he made a visit in due form to king K'ī. When the cock first crowed he dressed himself, and going to the outside of the bedroom, asked one of the servants of the interior who was in attendance how the king was and if he were well. When told that he was well, the prince was glad. At midday he repeated the visit in the same way; and so he did again in the evening². If the king were not so well as usual, the servant would tell the prince, and then his sorrow appeared in his countenance, and his walk was affected and disturbed. When king K'ī took his food again, Wǎn recovered his former appearance. When the food went up (to the king), he would examine it and see if it were cold and hot as it ought to be³. When it came down, he asked of what dishes the king had eaten. He gave orders to the cook that none of the dishes should go up again, and withdrew on receiving the cook's assurance accordingly⁴.

¹ See the introduction, pages 22, 23.

² It was the duty of a son to wait on his father twice a day,—at morning and night. King Wǎn showed his filial duty by paying king K'ī a third visit.

³ According to the season.

⁴ According to the ordinary dates in Chinese chronology, King

2. King Wû acted according to the example (of Wăn), not presuming to go (in anything) beyond it. When king Wăn was ill, Wû nursed him without taking off his cap or girdle. When king Wăn took a meal, he also took a meal; and when king Wăn took a second, he did the same. It was not till after twelve days that he intermitted his attentions.

King Wăn said to Wû, 'What have you been dreaming?' 'I dreamt,' was the reply, 'that God gave me nine ling?' 'And what do you think was the meaning?' King Wû said, 'There are nine states in the west;—may it not mean that you will yet bring them all under your happy sway?' Wăn said, 'That was not the meaning. Anciently they called a year ling. The age is also called ling. I am 100; and you are 90. I give you three years.' King Wăn was 97 when he died, and king Wû was 93¹.

3. King K'hang, being quite young, could not perform his part at the eastern steps². The duke of Kâu acted as regent, trod those steps, and adminis-

Wăn was born in B.C. 1258, and named K'hang (昌). King K' died in 1185, when he was in his seventy-fourth year.

¹ It is difficult to understand and interpret the latter half of this paragraph. The K'ien-lung editors say that, according to the ordinary accounts, king Wû was born when Wăn was fifteen years old, and there was an elder son, Yî-khâu, who died prematurely; whereas king Wû died at 93, leaving his son Sung (king K'hang) only seven years old. 'Wăn,' they said, 'must have married very early, and Wû very late.' They say also that they cannot understand the text that Wăn gave to his son 'three years,' &c., and suppose that some erroneous tradition has here been introduced.

² The king received his nobles at the top of the eastern steps. The phrase = 'in the government of the kingdom.'

tered the government. He illustrated the rules for the behaviour of a young heir in his treatment of Po-*k*hin, that king *Kh*ăng might thereby know the courses to be pursued by father and son, ruler and minister, old and young. When he committed an error, the duke punished Po-*k*hin. This was the way in which he showed king *Kh*ăng his duty as the son and heir.

4. So much on the way in which king Wăn acted as son and heir.

5. In teaching the heir-sons (of the king and feudal princes), and young men (chosen from their aptitude) for learning¹, the subjects were different at different seasons. In spring and summer they were taught the use of the shield and spear; in autumn and winter that of the feather and flute:—all in the eastern school. The inferior directors of Music² taught the use of the shield aided by the great assistants. The flute masters taught the use of the spear, aided by the subdirectors, while the assistants regulated by the drum (the chanting of) the Nan³.

In spring they recited (the pieces), and in summer

¹ These 'scholars,' no doubt, were those of whose selection for the higher instruction we have an account in the fourth and other paragraphs of Section IV, Book III.

² These are mentioned in the 'Royal Regulations,' though the title does not occur in the *K'âu Lî*. They are supposed to be the same as its 'music masters' (*Yo Sze*, Book XXII).

³ This clause about the 'drum' is perplexing to a translator. It destroys the symmetry of the paragraph. What we are to understand by the 'Nan' is also much disputed. I suppose the term should embrace the two Nan, or two first Books of the Shih, Part I. Compare the Shih II, vi, 4. 4.

they played on the guitar,—being taught by the grand master in the Hall of the Blind¹. In autumn they learned ceremonies,—being instructed by the masters of ceremonies. In winter they read the book of History,—being instructed by the guardians of it. Ceremonies were taught in the Hall of the Blind; the book in the upper school.

¹ The names of these different schools are also very perplexing; and I here give a note about them by Liū K'ang of our eleventh century. 'Under the K'au dynasty they had its own schools and those of the three former dynasties; four buildings, all erected in proximity to one another. Most in the centre was the Pî Yung of K'au itself. On the north of it was the school of Shun (the lord Yü); on the east that of Hsiâ; and on the west that of Shang. Those who were learning the use (in dancing) of the shield and spear, and of the plume and flute, went to the eastern school; those who were learning ceremonies went to that of Shang; and those who were learning history, to that of Shun. In the Pî Yung the son of Heaven nourished the old, sent forth his armies, matured his plans, received prisoners, and practised archery. When he came to the Pî Yung, they came from all the other three schools, and stood round the encircling water to look at him. There were also schools on the plan of Shun—the hsiang (庠)—in the large districts (the 鄉, containing 12500 families); others on the plan of Hsiâ—the hsü (序)—in the K'au, or smaller districts (the 州, containing 2500 families); and others still on the plan of Shang—the hsiâo (校)—in the Tang (黨), or those still smaller (containing 500 families). These were all schools for young boys. The most promising scholars (in the family schools) were removed to the hsiang; the best in the hsiang, again to the hsü; and the best in the hsü, to the hsiâo. The best in these were removed finally to the great school (or college) in the suburbs (of the capital).' Such is the account of Liū K'ang. Other scholars differ from him in some points; but there is a general agreement as to the existence of a system of graduated training.

6. All the rules about sacrificial offerings¹ and at the nourishing of the old begging them to speak (their wise counsels)² and the conversation at general reunions, were taught by the lower directors of Music in the eastern school.

7. The Grand director of Music taught how to brandish the shield and axe. He also delivered the graduated rules relating to conversations and the charges about begging the old to speak. The Grand perfecter (of Instruction)³ discussed all about (these matters) in the eastern school.

8. Whenever a pupil was sitting with the Grand completer (of Instruction), there was required to be between them the width of three mats. He might put questions to him; and when he had finished, sit back on the mat near to the wall. While the instructor had not finished all he had to say on any one point, he did not ask about another.

9. In all the schools, the officer (in charge), in spring set forth offerings to the master who first taught (the subjects); and in autumn and winter he did the same⁴.

10. In every case of the first establishment of a school the offerings must be set forth to the earlier

¹ Probably, not sacrifices in general, but offerings to sages, distinguished old men, &c.

² This asking the old men to speak was a part of the festal nourishment of them.

³ I do not think this officer appears in the lists of the *Kâu Lî*. He seems to be named as giving the finishing touch to the training of the young princes.

⁴ No mention is made of summer; but, no doubt, there were then the same observances as in the other seasons,—a tribute to the merit of the past, and a stimulus to the students.

sages and the earlier teachers ; and in the doing of this, pieces of silk must be used.

11. In all the cases of setting forth the offerings, it was required to have the accompaniments (of dancing and singing). When there were any events of engrossing interest in a state (at the time), these were omitted.

12. When there was the accompaniment of music on a great scale, they proceeded immediately to feast the aged.

13. At all examinations in the suburban schools, the rule was to select the best and mark out the most talented. The pupils might be advanced for their virtue, or commended for something they had accomplished, or distinguished for their eloquence¹. Those who had studied minor arts were encouraged and told to expect a second examination². If they (then) had one of the three things (above mentioned), they were advanced to a higher grade, according to their several orders, and were styled 'Men of the schools.' They were (still, however,) kept out of the royal college³, and could not receive the cup from the vase restricted to the superior students.

14. On the first establishment of schools (in any state), when the instruments of music were

¹ See paragraphs 2-4, pp. 231-233.

² These minor arts, it is understood, were such as medicine and divination.

³ The name for this college here perhaps indicates that on reaching it, all from the other schools were 'on the same level.' The youths would appear to have passed into it with a festive ceremony. The 'suburban schools' were those in the note on p. 346, with the addition of the 'Eastern Kíáo' (東膠), which it is not easy to distinguish from 'the eastern school,' already mentioned.

completed¹, offerings of silk were set forth; and afterwards those of vegetables². But there was no dancing and (consequently) no giving out of the spears and other things used in it. They simply retired and received visitors in the eastern school. Only one cup was passed round. The ceremony might pass without (parade of) attendants or conversation.

15. (All these things) belonged to the education of the young princes.

16. In the education of the crown princes adopted by the founders of the three dynasties the subjects were the rules of propriety and music. Music served to give the interior cultivation; the rules to give the external. The two, operating reciprocally within, had their outward manifestation, and the result was a peaceful serenity,—reverence of inward feeling and mild elegance of manners.

17. The Grand tutor and the assistant tutor were appointed for their training, to make them acquainted with the duties of father and son, and of ruler and minister. The former made himself perfectly master of those duties in order to exhibit them; the latter guided the princes to observe the virtuous ways of the other and fully instructed him about them. The Grand tutor went before them, and the assistant came

¹ 'Were completed,' should be, according to Khang-kháng, 'were consecrated.' For the character in the text he would substitute that which we find in Mencius, I, i, 7, 4, applied to the consecration of a bell. Compare vol. iii, p. 323.

² The ordinary offerings (see above, paragraph 9); but now a sequel to the offerings of silk. These two offerings, it is understood, were in the school on the west (the hsiang), and thence the parties officiating adjourned to that on the east (the hsiü).

after them. In the palace was the guardian, outside it was the master; and thus by this training and instruction the virtue (of the princes) was completed. The master taught them by means of occurring things, and made them understand what was virtuous. The guardian watched over their persons, and was as a stay and wings to them, leading them in the right way. The history says, 'Under the dynasties of Yü, Hsiâ, Shang, and K'au, there were the master, the guardian, the Lî, and the K'hang, and there were appointed the four aides and the three ducal ministers. That these offices should all be filled was not so necessary as that there should be the men for them;'—showing how the object was to employ the able¹.

18. When we speak of 'a superior man' we intend chiefly his virtue. The virtue perfect and his instructions honoured; his instructions honoured and the (various) officers correct; the officers correct and order maintained in the state:—these things give the ideal of a ruler².

¹ The K'ien-lung editors seem to say that 'the Grand tutor' and 'the assistant tutor,' who had the charge of the young prince from his infancy, must have been ladies of the harem; so that, in fact, the government of a ruler's household was regulated after the model of the government of the state in his maturer years. There are no materials to illustrate the duties of the ministers who are called 'the Lî and the K'hang.'

² Wû K'hang thinks that the first three characters here should be translated—'The superior man (K'ün-jze) says;' a sequel to 'The history says' of the preceding paragraph. He then proposes to suppress one of the virtues (德) that follow. But the structure of the whole will not admit this way of dealing with it. There is a play on the characters rendered 'a superior man' and 'a ruler,'—K'ün-jze (君子) and K'ün (君); like our English 'a noble man' and 'a noble,' 'a princely man' and 'a prince.'

19. *Kung-ní* said, 'Formerly, when the duke of *Kâu* was administering the government, he did so while he (continued to) go up by the eastern steps. He (also) set forth the rules for a crown prince in (his dealing with) *Po-khin*, and it was thus that he secured the excellence of king *Khǎng*. I have heard it said, "A minister will sacrifice himself to benefit his ruler, and how much more will he swerve from the ordinary course to secure his excellence!" This was what the duke of *Kâu* did with ease and unconcern.

20. 'Therefore he who knows how to show himself what a son should be can afterwards show himself what a father should be; he who knows how to show himself what a minister should be can afterwards show himself what a ruler should be; he who knows how to serve others can afterwards employ them. King *Khǎng*, being quite young, could not discharge the duties of the government. He had no means of learning how to show himself what the crown prince should be¹. On this account the rules for a crown prince were exhibited in (the treatment of) *Po-khin*, and he was made to live with the young king that the latter might thus understand all that was right between father and son, ruler and minister, elders and younger².'

¹ His father being dead.

² With reference to this paragraph, which, he thinks, appears here as from Confucius, *Wú Khǎng* says:—'When king *Wú* died, *Khǎng* was quite young. (His uncles of) *Kwan* and *Shái* sent their reports abroad, and the people of *Yin* planned their rebellion. Then the duke of *Kâu* left the capital, and dwelt in the east, and *Po-khin* went to his jurisdiction, and defeated the people of *Hsü* and the *Zung*. Three years afterwards the duke of

21. Take the case of the sovereign and his son and heir. Looked at from the standpoint of affection, the former is father; from that of honour, he is ruler. If the son can give the affection due to the father, and the honour due to the ruler, hereafter he will (be fit to) be the lord of all under the sky. On this account the training of crown princes ought to be most carefully attended to.

22. It is only in the case of the crown prince that by the doing of one thing three excellent things are realised; and it is with reference to his taking his place in the schools according to his age that this is spoken. Thus it is that when he takes his place in them in this way, the people observing it, one will say, 'He is to be our ruler, how is it that he gives place to us in the matter of years?' and it will be replied, 'While his father is alive, it is the rule that

Kâu returned, took the regency and made his expedition to the east,—it was impossible for *Khǎng* and *Po-khin* to be always together. Perhaps the duke made them keep so, while king *Wû* was alive; and the account in the text was an erroneous tradition.' To this the *Khien-lung* editors reply:—'Immediately on the death of king *Wû*, the duke of *Kâu* must have adopted the method described in the text. *Thái Kung* was Grand master; the duke of *Shào*, Grand guardian; and the duke of *Kâu* himself Grand tutor. They, no doubt, made *Po-khin*, *Kün Khǎn*, *Lü Kí*, *Wang-sun Máu*, and others associate with the young king. In the winter of his first year, the duke removed to the eastern capital, while the other two continued in their places, and *Po-khin* was daily with *Khǎng*, and there was no change in the rules for a son and heir. Next year happened the storm which changed the king's views about the duke, who returned to the court. The third year saw the removal of the people of *Yen*, and *Po-khin* proceeded to his jurisdiction in *Lû*. But by this time king *Khǎng*'s virtue and ability were matured. *Wû*'s objections to the ordinary view of the text are without foundation.'

he should do so.' Thus all will understand the right course as between father and son. A second will make the same remark, and put the same question; and it will be replied, 'While the ruler is alive, it is the rule that he should do so;' and thus all will understand the righteousness that should obtain between ruler and minister. To a third putting the same question it will be said, 'He is giving to his elders what is due to their age;' and thus all will understand the observances that should rule between young and old. Therefore, while his father is alive, he is but a son; and, while his ruler is alive, he may be called merely a minister. Occupying aright the position of son and minister is the way in which he shows the honour due to a ruler and the affection due to a father. He is thus taught the duties between father and son, between ruler and minister, between old and young; and when he has become master of all these, the state will be well governed. The saying,

'Music's Director the foundation lays;

The Master this doth to perfection raise.

Let him but once the great and good be taught,

And all the states are to correctness brought,'

finds its application in the case of the heir-son.

23. So much for the duke of K'âu's going up by the eastern steps.

SECTION II.

1. The Shû-ze¹, who had the direction of the (other) members of the royal and princely families,

¹ See Book XLIV, paragraph 1, and note. The Shû-ze or K'âu-ze belonged to the department of the Sze-mâ. They were two,—Great officers of the third grade; and under them thirty assistants,—officers and employés. The superintendents of the Lists in next

inculcated on them filial piety and fraternal duty, harmony and friendship, and kindly consideration; illustrating the righteousness that should prevail between father and son, and the order to be observed between elders and juniors.

2. When they appeared at court, if it were at a reception in the innermost (courtyard of the palace), they took their places, facing the east, those of the most honourable rank among them, as ministers, being to the north (of the others); but they were arranged according to their age. If it were a reception in the outer (and second courtyard), they were arranged according to their offices;—(as in the former case), by the superintendents of the official lists.

3. When they were in the ancestral temple, they took their places as at the reception in the outer (and second courtyard); and the superintendent of the temple¹ assigned his business to each according to rank and office. In their ascending (to the hall), partaking of what had been left (by the personator of the dead), presenting (the cup to him), and receiving it (from him)², the eldest son by the wife took the precedence. The proceedings were regulated by the Shû-ze. Although one might have received three of the gifts of distinction, he did not take precedence of an uncle or elder cousin.

4. At the funeral rites for rulers, they were arranged according to the character of their mourning-

paragraph belonged to the same department;—also two of the same rank as the Shû-ze, and under them sixty-eight others. The functions of both are described in the *Kâu Lî*, Book XXXI.

¹ See the *Kâu Lî*, Book XXVII.

² These ceremonies do not appear to be mentioned here in the order of their occurrence.

dress in the fineness or coarseness of the material. In case of such rites among themselves, the same order was observed, the principal mourner, however, always taking precedence of all others.

5. If the ruler were feasting with his kindred, then all of a different kindred were received as guests. The cook acted as master of the ceremonies¹. The ruler took place among his uncles and cousins according to age. Each generation of kindred took a lower place as it was a degree removed from the parent-stem.

6. When with the army, the kindred guarded the spirit-tablets that had been brought from their shrines. If any public duties called the ruler beyond the limits of the state, those officers of the kindred employed the members of it, who had not other duties, to guard the ancestral temple and the apartments of the palace, the eldest sons by the proper wives guarding the temple of the Grand ancestor; the various uncles, the most honoured temple-shrines and apartments; the other sons and grandsons, the inferior shrines and apartments.

7. All descended from any of the five rulers to whom the temple-shrines were dedicated, even those who were now classed among the common people, were required to announce the events of capping and marriage, so long as the temple-shrine of the (Grand ancestor) had not been removed. Their deaths had to be announced; and also their sacrifices during the

¹ We have here an instance of the important part which the cook played in the establishments of the kings and princes of those days; see vol. iii, pp. 356, 422. The ruler was too dignified to drink with the guests.

period of mourning. In the relations of the kindred among themselves, the proper officers punished any neglect of the regulations for condoling and not condoling, leaving off and not leaving off the cap (in mourning). There were the correct rules for the mourning gifts of articles, money, robes, and jade to put into the mouth (of the deceased).

8. When one of the ruler's kindred was found guilty of a capital offence, he was hanged by some one of the foresters' department. If the punishment for his offence were corporal infliction or dismemberment, it was also handed over to the same department. No one of the ruler's kindred was punished with castration.

When the trial was concluded, the proper officer reported the sentence to the ruler. If the penalty were death, he would say, 'The offence of So and So is a capital crime.' If the penalty were less, he would say, 'The offence of So and So has received a lighter sentence.' The ruler would say, 'Let the sentence be remitted for another;' and the officer would say, 'That is the sentence.' This was repeated till the third time, when the officer would make no answer, but hurry off and put the execution into the hands of the appointed forester. Still the ruler would send some one after him, and say, 'Yes, but grant forgiveness,' to which there would be the reply, 'It is too late.' When the execution was reported to the ruler, he put on white clothes, and did not have a full meal or music, thus changing his usual habits. Though the kinsman might be within the degree for which there should be mourning rites, the ruler did not wear mourning, but waited for him himself (in some family of a different surname).

9. That the ruler's kindred appeared at the reception in the innermost (court) showed how (the ruler) would honour the relatives of his own surname. That they took places according to their age, even those among them of high rank, showed the relation to be maintained between father and son. That they took places at the reception in the outer court according to their offices, showed how (the ruler) would show that they formed one body with (the officers of) other surnames¹.

10. Their taking their places in the ancestral temple according to rank served to exalt the sense of virtue. That the superintendent of the temple assigned to them their several services according to their offices was a tribute of honour to worth. That the eldest son by the proper wife was employed to ascend, take precedence in partaking of what had been left, and in receiving the cup, was to do honour to their ancestor².

11. That the distinctions at the funeral rites were arranged according to the fineness or coarseness of their mourning robes was not to take from any one the degree of his relationship³.

12. The ruler, when feasting with his kindred, took his place among them according to age, and thus development was given to filial piety and fraternal duty. That each generation took a lower place as it was removed a degree from the parent-stem showed the graduation of affection among relatives⁴.

¹ See paragraph 2, above.

² See paragraph 3, above.

³ See paragraph 4, above.

⁴ See paragraph 5, above.

13. The guard maintained during war over the spirit-tablets in the army showed the deep sense of filial piety and love. When the eldest son by the proper wife guarded the temple of the Grand ancestor, honour was done to the temple by the most honoured, and the rule as between ruler and minister was exhibited. When the uncles guarded the most honoured shrines and apartments, and the cousins those that were inferior, the principles of subordination and deference were displayed¹.

14. That the descendants of the five rulers, to whom the temple-shrines were dedicated, were required, so long as the shrine of the Grand ancestor had not been removed, to announce their cappings and marriages, and their death was also required to be announced, showed how kinship was to be kept in mind². While the kinship was yet maintained, that some were classed among the common people showed how mean position followed on want of ability. The reverent observance of condoling, wailing, and of presenting contributions to the funeral rites in articles and money, was the way taken to maintain harmony and friendliness³.

15. Anciently, when the duties of these officers of the royal or princely kindred were well discharged, there was a constant model for the regions and states; and when this model was maintained, all knew to what to direct their views and aims⁴.

¹ See paragraph 6, above.

² See paragraph 12, above.

³ See paragraph 7, above.

⁴ This paragraph is evidently out of place, and should follow the

16. When any of the ruler's kindred were guilty of offences, notwithstanding their kinship, they were not allowed to transgress with impunity, but the proper officers had their methods of dealing with them:—this showed the regard cherished for the people. That the offender was punished in secret¹, and not associated with common people, showed (the ruler's) concern for his brethren. That he offered no condolence, wore no mourning, and wailed for the criminal in the temple of a different surname, showed how he kept aloof from him as having disgraced their ancestors. That he wore white, occupied a chamber outside, and did not listen to music, was a private mourning for him, and showed how the feeling of kinship was not extinguished. That one of the ruler's kindred was not subjected to castration, showed how he shrank from cutting off the perpetuation of their family.

17. When the son of Heaven was about to visit the college, the drum was beaten at early dawn to arouse all (the students). When all were come together, the son of Heaven then arrived and ordered the proper officers to discharge their business, proceeding in the regular order, and sacrificing to the former masters and former sages. When

next. Some of the critics endeavour very ingeniously to account for its having been designedly placed where it stands.

¹ This refers to the statement in paragraph 8, that members of the ruler's kindred, instead of being executed or exposed in the court or market-place, were handed over to be dealt with in the country, by the foresters' department. On that department and the duties and members of it, see the *K'âu Lî*, Book I, 11; IV, 64-69.

they reported to him that everything had been done, he then began to go to the nourishing (of the aged).

18. Proceeding to the school on the east, he unfolded and set forth the offerings to the aged of former times, and immediately afterwards arranged the mats and places for the three (classes of the) old, and the five (classes of the) experienced, for all the aged (indeed who were present)¹.

19. He (then) went to look at the food and examine the liquor. When the delicacies for the nourishment of the aged were all ready, he caused the song to be raised (as a signal for the aged to come). After this he retired; and thus it was that he provided for (the aged) his filial nourishment.

20. When (the aged) had returned (to their seats after partaking of the feast), the musicians went up and sang the *K'ing Miào*², after which there was

¹ There is great difference of opinion about 'the three old' and 'the five experienced.' A common view is that the former name denotes the old men of 80, 90, and 100; which appears to have been first propounded by T'ü Yü (A. D. 222-284). The *K'ien-lung* editors speak contemptuously of it, and ask what analogous division is to be made of the five classes of the experienced. Callery has a note on the paragraph, to the effect that there were two old men, one called 'the san-lão,' and the other 'the wü-k'ang.' The emperor of the *K'ien-lung* period, he tells us, because of the great age at which he had himself arrived, wished to restore the ancient practices in honour of old age. His proposal, however, was so vigorously opposed in council, especially by a Chinese minister, that he was obliged to abandon it. 'Many volumes,' he says, 'have been written on the origin and meaning of the denominations in the text, but nothing certain is known on the subject.'

² '*K'ing Miào*' is the name of the first of 'The Sacrificial Odes of *K'au*;' see vol. iii, pp. 313, 314.

conversation to bring out fully its meaning. They spoke of the duties between father and son, ruler and minister, elders and juniors. This union (of the conversation) with the highest description of virtue in the piece constituted the greatest feature of the ceremony.

21. Below (in the court-yard), the flute-players played the tune of the Hsiang¹, while the Tâ-wû was danced, all uniting in the grand concert according to their parts, giving full development to the spirit (of the music), and stimulating the sense of virtue. The positions of ruler and minister, and the gradations of noble and mean were correctly exhibited, and the respective duties of high and low took their proper course.

22. The officers having announced that the music was over, the king then charged the dukes, marquises, earls, counts, and barons, with all the officers, saying, 'Return, and nourish the aged and the young² in your eastern schools.' Thus did he end (the ceremony) with (the manifestation of) benevolence.

23. The above statements show how the sage (sovereign) bore in mind the various steps (of this ceremony)³. He anxiously thought of it as its greatness deserved; his love for the aged was blended

¹ 'Hsiang' was the name of a piece of music played to the dance Tâ-wû, in memory of the kings Wân and Wû. It is hardly possible to give any more detailed description either of the piece or of the dance.

² 'The young' is supposed to be an interpolation.

³ This sentence is difficult. Callery translates it:—'*En vue de tout cela l'empereur vertueux repasse dans sa mémoire ce que (les anciens) ont fait (pour honorer la vieillesse, afin de les imiter).*'

with reverence; he carried the thing through with attention to propriety; he adorned it with his filial nourishing; he connected with it the exhibition of the legitimate distinctions (of rank); and concluded it with (the manifestation of) benevolence. In this way the ancients, in the exhibition of this one ceremony, made all know how complete was their virtue. Among them, when they undertook any great affair, they were sure to carry it through carefully from beginning to end, so that it was impossible for any not to understand them. As it is said in the Yüeh Ming¹, 'The thoughts from first to last should be fixed on (this) learning.'

24. The Record of (king Wăn's) son and heir says, 'Morning and evening he went to the outside of the door of the great chamber, and asked the attendant of the interior whether his father were well, and how he was. If told that he was well, his joy appeared in his countenance. If his father were not so well, the attendant would tell him so, and then his sorrow and anxiety appeared, and his demeanour was disturbed. When the attendant told him that his father was better, he resumed his former appearance. Morning and evening when the food went up, he would examine it and see if it were hot or cold as it ought to be. When it came down, he asked what his father had eaten. He made it a point to know what viands went in, and to give his orders to the cook; and then he retired.

'If the attendant reported that his father was ill, then he himself fasted and waited on him in his dark-coloured dress. He inspected with reverence the

¹ See the 'Charge to Yueh,' in vol. iii, p. 117.

food prepared by the cook, and tasted himself the medicine for the patient. If his father ate well of the food, then he was able to eat. If his father ate but little, then he could not take a full meal. When his father had recovered, then he resumed his former ways¹.

¹ This is evidently an unskilful reproduction of the first paragraph of Section i. We try in vain to discover why the compiler inserted it here.

BOOK VII. THE LÎ YUN

OR

CEREMONIAL USAGES; THEIR ORIGIN, DEVELOPMENT, AND INTENTION¹.

SECTION I.

1. Formerly *Kung-ni* was present as one of the guests at the *Kâ* sacrifice²; and when it was over, he went out and walked backwards and forwards on the terrace over the gate of Proclamations³, looking sad and sighing. What made him sigh was the state of *Lû*⁴. *Yen Yen* was by his side, and said to him, 'Master, what are you sighing about?' *Confucius* replied, 'I never saw the practice of the Grand course⁵, and the eminent men of the three dynasties⁶; but I have my object (in harmony with theirs).

2. 'When the Grand course was pursued, a public and common spirit ruled all under the sky; they

¹ See the introduction, pages 23, 24.

² Offered in the end of the year, in thanksgiving for all the crops that had been reaped. See in Book IX, ii, paragraphs 9, 10.

³ The gateway where illustrated copies of the laws and punishments were suspended. It belonged of right only to the royal palace, but it was among the things which *Lû* had usurped, or was privileged to use.

⁴ As usurping royal rites, and in disorder.

⁵ This sounds *Táoistic*. It is explained of the time of the five *T'is*.

⁶ The founders of the *Hsiâ*, *Shang*, and *K'au*, and their great ministers.

chose¹ men of talents, virtue, and ability; their words were sincere, and what they cultivated was harmony. Thus men did not love their parents only, nor treat as children only their own sons. A competent provision was secured for the aged till their death, employment for the able-bodied, and the means of growing up to the young. They showed kindness and compassion to widows, orphans, childless men, and those who were disabled by disease, so that they were all sufficiently maintained. Males had their proper work, and females had their homes. (They accumulated) articles (of value), disliking that they should be thrown away upon the ground, but not wishing to keep them for their own gratification². (They laboured) with their strength, disliking that it should not be exerted, but not exerting it (only) with a view to their own advantage². In this way (selfish) schemings were repressed and found no development. Robbers, filchers, and

¹ 'They chose;' who are intended by the 'they?' Shall we find them in the 'all under the sky' of the preceding clause? Callery has:—'*Sous le grand règne de la vertu, l'empire était la chose publique. On choisissait pour le gouverneur les hommes éminents, &c.* Khung Ying-tâ explains the clause by 'They made no hereditary princes.' Perhaps it would be well to translate passively,—'*Men of virtue and ability were chosen (to govern).*' The writer has before him the Tâoistic period of the primitive simplicity, when there was no necessity for organised government as in after ages.

² It is rather difficult to construe and translate these two sentences. Callery gives for them, not very successfully:—'*Quant aux objets matériels, ceux qu'on n'aimait pas, on les abandonnait (aux personnes qui en avaient besoin), sans les mettre en réserve pour soi. Les choses dont on était capable, on regardait comme fort mauvais de ne pas les faire, lors même que ce n'était pas pour soi.*'

rebellious traitors did not show themselves, and hence the outer doors remained open, and were not shut. This was (the period of) what we call the Grand Union.

3. 'Now that the Grand course has fallen into disuse and obscurity, the kingdom is a family inheritance. Every one loves (above all others) his own parents and cherishes (as) children (only) his own sons. People accumulate articles and exert their strength for their own advantage. Great men imagine it is the rule that their states should descend in their own families. Their object is to make the walls of their cities and suburbs strong and their ditches and moats secure. The rules of propriety and of what is right are regarded as the threads by which they seek to maintain in its correctness the relation between ruler and minister; in its generous regard that between father and son; in its harmony that between elder brother and younger; and in a community of sentiment that between husband and wife; and in accordance with them they frame buildings and measures; lay out the fields and hamlets (for the dwellings of the husbandmen); adjudge the superiority to men of valour and knowledge; and regulate their achievements with a view to their own advantage. Thus it is that (selfish) schemes and enterprises are constantly taking their rise, and recourse is had to arms; and thus it was (also) that Yü, Thang, Wăn and Wû, king *K'hang*, and the duke of *Kâu* obtained their distinction. Of these six great men every one was very attentive to the rules of propriety, thus to secure the display of righteousness, the realisation of sincerity, the exhibition of errors, the exemplification of benevolence, and

the discussion of courtesy, showing the people all the normal virtues. Any rulers who did not follow this course were driven away by those who possessed power and position, and all regarded them as pests. This is the period of what we call Small Tranquillity¹.

4. Yen Yen again asked, 'Are the rules of Propriety indeed of such urgent importance?' Confucius said, 'It was by those rules that the ancient kings sought to represent the ways of Heaven, and to regulate the feelings of men. Therefore he who neglects or violates them may be (spoken of) as dead, and he who observes them, as alive. It is said in the Book of Poetry,

"Look at a rat—how small its limbs and fine!

Then mark the course that scorns the proper line.

Propriety's neglect may well provoke

A wish the man would quickly court death's stroke²."

Therefore those rules are rooted in heaven, have their correspondencies in earth, and are applicable to spiritual beings. They extend to funeral rites, sacrifices, archery, chariot-driving, capping, marriage, audiences, and friendly missions. Thus the sages made known these rules, and it became possible for the kingdom, with its states and clans, to reach its correct condition.'

5. Yen Yen again asked, 'May I be allowed to hear, Master, the full account that you would give of

¹ The T'aoism in this and the preceding paragraph is evident, and we need not be surprised that Wang of Shih-liang should say that they ought not to be ascribed to Confucius. The *K'ien-lung* editors try to weaken the force of his judgment by a theory of misplaced tablets and spurious additions to the text.

² The Shih, I, iv, 8; metrical version, page 99.

these rules?' Confucius said, 'I wished to see the ways of Hsiâ, and for that purpose went to *Khî*. But it was not able to attest my words, though I found there "The seasons of Hsiâ." I wished to see the ways of Yin, and for that purpose went to Sung. But it was not able to attest my words, though I found there "The *Khwăn K'hien*." In this way I got to see the meanings in the *Khwăn K'hien*, and the different steps in the seasons of Hsiâ¹.

6. 'At the first use of ceremonies, they began with meat and drink. They roasted millet and pieces of pork²; they excavated the ground in the form of a jar, and scooped the water from it with their two hands; they fashioned a handle of clay, and struck with it an earthen drum. (Simple as these arrangements were), they yet seemed to be able to express by them their reverence for Spiritual Beings.

7. '(By-and-by)³, when one died, they went upon

¹ Compare with this paragraph the ninth in the third Book of the Analects. In that Confucius tells of his visits to *K'hî* and Sung; but says nothing of his finding any book or fragment of a book in either, dwelling instead on the insufficiency of their records. 'The seasons of Hsiâ,' which it is said here 'he got in *K'hî*,' is supposed to be the 'small calendar of Hsiâ,' preserved by the Greater Tâi, and 'the *Khwăn K'hien*' to have been the 'Kwei ßhang Yí,' attributed by many to the Shang dynasty. But all this is very uncertain.

² In an unartificial manner, we are told, 'by placing them on heated stones.' It is only the last sentence of the paragraph which makes us think that the previous parts have anything to do with sacrifice or religion.

³ Khung Ying-tâ thinks that this describes the practices of the period of 'the five Tîs.' The north is the quarter of darkness and decay, the south that of brightness and life. 'The paragraph

the housetop, and called out his name in a prolonged note, saying, "Come back, So and So." After this they filled the mouth (of the dead) with uncooked rice, and (set forth as offerings to him) packets of raw flesh. Thus they looked up to heaven (whither the spirit was gone), and buried (the body) in the earth. The body and the animal soul go downwards; and the intelligent spirit is on high. Thus (also) the dead are placed with their heads to the north, while the living look towards the south. In all these matters the earliest practice is followed.

8. 'Formerly the ancient kings¹ had no houses. In winter they lived in caves which they had excavated, and in summer in nests which they had framed. They knew not yet the transforming power of fire, but ate the fruits of plants and trees, and the flesh of birds and beasts, drinking their blood, and swallowing (also) the hair and feathers. They knew not yet the use of flax and silk, but clothed themselves with feathers and skins.

9. 'The later sages then arose, and men (learned) to take advantage of the benefits of fire. They moulded the metals and fashioned clay, so as to rear towers with structures on them, and houses with windows and doors. They toasted, grilled, boiled, and roasted. They produced must and sauces. They dealt with the flax and silk so as to form linen and silken fabrics. They were thus able to nourish the living, and to make offerings to the dead; to serve

teaches us,' says Hsu Shih-*jang*, 'that the burial and other mourning ceremonies were not inventions of later sages, but grew from the natural feelings and sorrow of the earliest men.'

¹ This was, says *K'ang*, 'the time of the highest antiquity;' 'the time,' says *Ying-tâ*, 'before the five T's.'

the spirits of the departed and God¹. In all these things we follow the example of that early time.

10. 'Thus it is that the dark-coloured liquor is in the apartment (where the representative of the dead is entertained)²; that the vessel of must is near its (entrance) door; that the reddish liquor is in the hall; and the clear, in the (court) below. The victims (also) are displayed, and the tripods and stands are prepared. The lutes and citherns are put in their places, with the flutes, sonorous stones, bells, and drums. The prayers (of the principal in the sacrifice to the spirits) and the benedictions (of the representatives of the departed) are carefully framed. The

¹ According to Ying-tâ, 'this is descriptive of the times of Shăn Năng in middle antiquity, of the five Tîs, and of the three kings.' This would extend it over a very long space of time. When it is said that men in their advancing civilisation were able to serve the spirits of the departed and God, the peculiarity of style by which those spirits (literally, the Kwei Shăn) are placed before God (Shang Tî) does not fail to attract the notice of the student. The explanation of it was given ingeniously, and I believe correctly, by Dr. Medhurst (*Theology of the Chinese*, page 78), who says, 'it was done, probably, in order to distinguish the one from the other, and to prevent the reader from imagining that the Kwei Shăns belonged to the Shang Tî, which mistake might have occurred had the characters been differently arranged.' I translate the last sentence in the present tense, the speaker having, I think, his own times in mind.

² The 'dark-coloured' liquor was water, which was employed in the earliest times, before there was any preparation of liquor made from grain, either by fermentation or distillation, and the use of it was continued in the subsequent times of which this paragraph speaks, in honour of the practice of antiquity; and is continued, probably, to the present day. The other liquors are mentioned in the order of their invention, following one another in the historical line of their discovery, the older always having a nearer and more honourable place.

object of all the ceremonies is to bring down the spirits from above, even their ancestors¹; serving (also) to rectify the relations between ruler and ministers; to maintain the generous feeling between father and son, and the harmony between elder and younger brother; to adjust the relations between high and low; and to give their proper places to husband and wife. The whole may be said to secure the blessing of Heaven.

11. 'They proceed to their invocations, using in each the appropriate terms. The dark-coloured liquor is employed in (every) sacrifice. The blood with the hair and feathers (of the victim) is presented. The flesh, uncooked, is set forth on the stands². The bones with the flesh on them are sodden; and rush mats and coarse cloth are placed underneath and over the vases and cups. The robes of dyed silk are put on. The must and clarified liquor are presented. The flesh, roasted and grilled, is brought forward³. The ruler and his wife take alternate parts in presenting these offerings, all being done to please the souls of the departed, and constituting a union (of the living) with the disembodied and unseen.

¹ Dr. Medhurst rendered this—'to bring down the Shāns of the upper world, together with the manes of their first ancestors.' In giving to the two phrases one and the same reference I am following Ying-tâ and others.

² The last three observances were in imitation of what was done in the earliest antiquity.

³ In these six things the ways of 'middle antiquity' were observed. The whole paragraph is descriptive of a sacrifice in the ancestral temple under Kâu, where an effort was made to reproduce all sacrificial customs from the earliest times.

12. 'These services having been completed, they retire, and cook again all that was insufficiently done. The dogs, pigs, bullocks, and sheep are dismembered. The shorter dishes (round and square), the taller ones of bamboo and wood, and the soup vessels are all filled. There are the prayers which express the filial piety (of the worshipper), and the benediction announcing the favour (of his ancestors). This may be called the greatest omen of prosperity; and in this the ceremony obtains its grand completion¹.'

SECTION II.

1. Confucius said, 'Ah! Alas! I look at the ways of *Kâu*. (The kings) *Yü*² and *Lî*³ corrupted them indeed, but if I leave *Lû*, where shall I go (to find them better)? The border sacrifice of *Lû*, (however,) and (the association with it of) the founder of the line (of *Kâu*) is contrary to propriety;—how have (the institutions of) the duke of *Kâu* fallen into decay⁴! At the border sacrifice in *K'hi*, *Yü* was the assessor, and at that in *Sung*, *Hsieh*; but these were observ-

¹ This last paragraph appears to me to give a very condensed account of the banquet to a ruler's kindred, with which a service in the ancestral temple concluded. Paragraphs 10, 11, 12 are all descriptive of the parts of such a service. Compare the accounts of it in the *Shih* II, vi, ode 5, and other pieces.

² B. C. 781-771.

³ B. C. 878-828.

⁴ That the sacrificial ceremonies of *Lû* were in many things corrupted in *Lû* in the time of Confucius is plain to the reader of the *Analects*. How the corruption first began is a subject of endless controversy. It seems to be established that special privileges were granted in this respect to the duke of *Kâu* and his son, *Po-khin*. Guarded at first and innocent, encroachments were made by successive princes, as the vigour of the royal authority declined; and by-and-by as those princes became them-

ances of the sons of Heaven, preserved (in those states by their descendants). The rule is that (only) the son of Heaven sacrifices to heaven and earth, and the princes of states sacrifice at the altars to the spirits of the land and grain.'

2. When no change is presumptuously made from the constant practice from the oldest times between the prayer and blessing (at the beginning of the sacrifice)¹ and the benediction (at the end of it)¹, we have what might be called a great and happy service.

3. For the words of prayer and blessing and those of benediction to be kept hidden away by the officers of prayer of the ancestral temple, and the sorcerers and recorders, is a violation of the rules of propriety. This may be called keeping a state in darkness².

selves more and more weak, their ministers followed in their wake, and usurped the same ceremonies in their own services.

The commentators throw little light on the special corruption selected here for condemnation by Confucius. I have interpreted it by the analogy of the cases of *K'hi* and *Sung*. The lords of those states were descended from the sovereigns of *Hsiâ* and *Shang* respectively, and were invested with them at the rise of the *K'âu* dynasty, that they might continue in them the sacrifices of their royal ancestors. They did so not as the lords of *K'hi* and *Sung*, but as representing the lines of *Hsiâ* and *Shang*. But the case was different with the lords of *Lû*, belonging to the time of *K'âu*, but not representing it. Its kings were still reigning. Whether the words of Confucius should be extended over all the paragraph is a doubtful point.

¹ See paragraph 12 of the last section.

² In this way new forms of prayer and benediction came into use, and the old forms were forgotten. The sorcerers; see page 172, paragraph 42.

4. (The use of) the *k'an* cup (of Hsiâ) and the *k'ia* cup (of Yin), and (the pledging in them) between the representative of the dead and the ruler are contrary to propriety;—these things constitute 'a usurping ruler¹.'

5. (For ministers and Great officers to) keep the cap with pendants and the leathern cap, or military weapons, in their own houses is contrary to propriety. To do so constitutes 'restraint of the ruler².'

6. For Great officers to maintain a full staff of employes, to have so many sacrificial vessels that they do not need to borrow any; and have singers and musical instruments all complete, is contrary to propriety. For them to do so leads to 'disorder in a state³.'

7. Thus, one sustaining office under the ruler is called a minister, and one sustaining office under the head of a clan is called a servant. Either of these, who is in mourning for a parent, or has newly married, is not sent on any mission for a year⁴.

¹ It would be of little use to give representations of those cups, as they are ordinarily figured. Only in *K'hi*, Sung, and *Lí* could they be used with any degree of propriety. In the times referred to in these paragraphs they were used by other states; which was an act of usurpation.

² Certain styles of these caps were peculiar to the king, and of course could not be used by inferiors. Others might be used by them, but were kept in public offices, and given out when required. Sometimes they were conferred by special gift; but none could make them for themselves.

³ A Great officer, if he had land, might have a ruler or steward, to whom everything was entrusted; and he might have some sacrificial vessels, but not a complete set. He did not have music at his sacrifices, unless it were by special permission.

⁴ Compare Deuteronomy xxiv. 5.

To enter court in decayed robes, or to live promiscuously with his servants, taking place among them according to age :—all these things are contrary to propriety. Where we have them, we have what is called 'ruler and minister sharing the state.'

8. Thus, the son of Heaven has his domain that he may settle there his sons and grandsons ; and the feudal princes have their states ; and Great officers their appanages that they may do the same for theirs. This constitutes 'the statutory arrangement.'

9. Thus, when the son of Heaven goes to visit a feudal prince, the rule is that he shall lodge in the ancestral temple, and that he do not enter it without having with him all the rules to be observed. If he act otherwise, we have an instance of 'The son of Heaven perverting the laws, and throwing the regulations into confusion.' A prince, unless it be to ask about the sick or to condole with a mourner, does not enter the house of a minister. If he act otherwise, we have the case of 'ruler and minister playing with each other.'

10. Therefore, ceremonies form a great instrument in the hands of a ruler. It is by them that he resolves what is doubtful and brings to light what is abstruse ; that he conducts his intercourse with spiritual beings, examines all statutory arrangements, and distinguishes benevolence from righteousness ; it is by them, in short, that government is rightly ordered, and his own tranquillity secured.

11. When government is not correct, the ruler's seat is insecure. When the ruler's seat is insecure,

the great ministers revolt, and smaller ones begin pilfering. Punishments (then) are made severe, and manners deteriorate. Thus the laws become irregular, and the rules of ceremony uncertain. When these are uncertain, officers do not perform their duties; and when punishments become severe, and manners deteriorate, the people do not turn (to what is right). We have that condition which may be described as 'an infirm state.'

12. In this way government is the means by which the ruler keeps and protects his person, and therefore it must have a fundamental connection with Heaven. This uses a variety of ways in sending down the intimations of Its will. As learned from the altars of the land, these are (receptivity and docility) imparted to the earth. As learned from the ancestral temple, they are benevolence and righteousness. As learned from the altars of the hills and streams, they are movement and activity. As learned from the five sacrifices of the house, they are the statutes (of their various spirits). It is in this way that the sage rulers made provision for the safe keeping of their persons¹.

¹ On this paragraph M. Callery has the following note:—'Très difficile à comprendre dans nos idées, ce passage offre un sens tout simple et naturel aux Chinois, dont la bizarre métaphysique va chercher dans la nature une analogie essentielle entre les accidents divers des êtres, et les phénomènes rationnels ou psychologiques. Ainsi, suivant les philosophes Chinois, tant anciens que modernes, la société présente des inégalités dans ses classes d'individus, comme la terre présente à sa surface des montagnes et des vallées; telle loi provoque l'action et le mouvement, comme les rivières pleines de poissons et les montagnes couvertes de forêts sont des foyers de vie et de développement; telle autre loi

13. Hence the sage forms a ternion with Heaven and Earth, and stands side by side with spiritual beings, in order to the right ordering of government. Taking his place on the ground of the principles inherent in them, he devised ceremonies in their order; calling them to the happy exercise of that in which

impose des obligations humanitaires, comme les temples inspirent la piété filiale envers les ancêtres, ou le respect envers les Dieux. Ces analogies sont quelquefois poussées jusqu'au dernier ridicule; mais les Chinois ne les trouvent jamais forcées, et semblent faire très peu de cas de la logique Européenne, qui ne les admire pas.'

The *K'hien-lung* editors say on it:—'Hsião (殺) gives the idea of distribution. All the principles under the sky are simply expressive of the mind of the one Heaven. Heaven is everywhere, and its distributions from which we see its ordinations are also everywhere. *K'hien* (乾), 'great and originating,' contains all the meaning belonging to the name Heaven. Earth (坤) obediently receives the influences of heaven. Consequently, when we see how earth supports all things, we know how the ordination of Heaven has descended on it. Heaven is the author of all things. It produced men, and men go on to produce one another, in succession. From this we see that every man has his ancestor, and know how the ordination of Heaven has descended on the ancestral temple. Hills and streams are also the productions of Heaven, but every one of them is also able to produce other things; and when we see their productiveness, we know that the ordination of Heaven to that effect has descended on them. The productive power of Heaven is distributed in the five elements, and their results, which are most important to men, are exhibited in the five sacrifices of the house, so that we see those results in these, and know that the ordination of Heaven has descended on them. Now the ancestral temples, the hills and streams, and those five altars of the house, are all distributed on the earth, but in reality have their root in Heaven. And so it is that the sages after the pattern of Heaven made their ordinations; and their filial piety and righteousness, and all the duties enjoined by them, effective, though unseen, secure the issues of government.'

they find pleasure, he secured the success of the government of the people.

14. Heaven produces the seasons. Earth produces all the sources of wealth. Man is begotten by his father, and instructed by his teacher. The ruler correctly uses these four agencies, and therefore he stands in the place where there is no error¹.

15. Hence the ruler is he to whose brightness men look; he does not seek to brighten men. It is he whom men support; he does not seek to support men. It is he whom men serve; he does not seek to serve men. If the ruler were to seek to brighten men, he would fall into errors. If he were to seek to nourish men, he would be unequal to the task. If he were to seek to serve men, he would be giving up his position. Therefore the people imitate the ruler, and we have their self-government; they nourish their ruler, and they find their security in doing so; they serve the ruler, and find their distinction in doing so. Thus it is by the universal application of the rules of propriety, that the lot and duty (of different classes) are fixed; thus it is that men, (acting contrary to those rules,) would all have to account death a boon, and life an evil.

16. Therefore (the ruler), making use of the wisdom of others, will put away the cunning to which that wisdom might lead him; using their courage, he will (in the same way) put away

¹ 'If the ruler,' says Khung Ying-tâ, 'were to undertake to do all the work of these agencies himself, he would commit many errors. Employing them according to the natural operation of each, the work is easily performed, and without error.'

passion; and using their benevolence, he will put away covetousness¹.

17. Therefore, when calamity comes on a state, for the ruler to die for its altars is to be regarded as right; but for a Great officer to die for the ancestral temple is to be regarded as a change (of the duty required from him)².

18. Therefore when it is said that (the ruler being) a sage can look on all under the sky as one family, and on all in the Middle states as one man, this does not mean that he will do so on premeditation and purpose. He must know men's feelings, lay open to them what they consider right, show clearly to them what is advantageous, and comprehend what are their calamities. Being so furnished, he is then able to effect the thing.

19. What are the feelings of men? They are joy, anger, sadness, fear, love, disliking, and liking. These seven feelings belong to men without their learning them. What are 'the things which men consider right?' Kindness on the part of the father, and filial duty on that of the son; gentleness on the part of the elder brother, and obedience on that of

¹ I have here followed the *K'ien-lung* editors in preference to *K'ang Khang-k'ang* and others. The latter consider that the cunning, passion, and covetousness are those of the men whom the ruler employs,—vices generally found along with the good qualities belonging to them.

² It is not easy to see the ground of the reprehension of the devotion of a Great officer which is here implied. 'The care of the state is a trust committed to the ruler by the sovereign,—he should die in maintaining it. An officer has services to discharge, and not trusts to maintain. When the services can no longer be discharged, he may leave them and save himself' (?).

the younger ; righteousness on the part of the husband, and submission on that of the wife ; kindness on the part of elders, and deference on that of juniors ; with benevolence on the part of the ruler, and loyalty on that of the minister ; — these ten are the things which men consider to be right. Truthfulness in speech and the cultivation of harmony constitute what are called ‘the things advantageous to men.’ Quarrels, plundering, and murders are ‘the things disastrous to men.’ Hence, when a sage (ruler) would regulate the seven feelings of men, cultivate the ten virtues that are right ; promote truthfulness of speech, and the maintenance of harmony ; show his value for kindly consideration and complaisant courtesy ; and put away quarrelling and plundering, if he neglect the rules of propriety, how shall he succeed ?

20. The things which men greatly desire are comprehended in meat and drink and sexual pleasure ; those which they greatly dislike are comprehended in death, exile, poverty, and suffering. Thus liking and disliking are the great elements in men’s minds. But men keep them hidden in their minds, where they cannot be fathomed or measured. The good and the bad of them being in their minds, and no outward manifestation of them being visible, if it be wished to determine these qualities in one uniform way, how can it be done without the use of the rules of propriety (implied in the ceremonial usages) ?

SECTION III.

1. Man is (the product of) the attributes of Heaven and Earth, (by) the interaction of the dual

forces of nature, the union of the animal and intelligent (souls), and the finest subtile matter of the five elements¹.

2. Heaven exercises the control of the strong and light force, and hangs out the sun and stars. Earth exercises the control of the dark and weaker force, and gives vent to it in the hills and streams. The five elements are distributed through the four seasons, and it is by their harmonious action that the moon is produced, which therefore keeps waxing for fifteen days and waning for fifteen².

¹ Callery's translation of this paragraph is the following:—*'L'homme émane, (pour le moral), de la vertu du Ciel et de la Terre; (pour le physique il émane) de la combinaison des (deux principes) Yin et Yang; (pour la partie spirituelle, il émane) de la réunion des esprits et des Dieux; et pour la forme qui lui est propre, il émane de l'essence la plus subtile des cinq éléments.'* To this he subjoins the following note:—*'Il m'est difficile de croire que les Chinois eux-mêmes aient jamais rien compris à ces théories androgénésiques, dont tout le mérite gît dans le vague de l'énoncé.'* The *Khien-lung* editors say:—*'The characteristic attributes of Heaven and Earth are blended and hid in the two forces of nature; and this is called the truth that is unlimited. If we speak of those forces in their fundamental character, we call them the Yin and Yang. If we speak of them as they develop their power, we call them Kwei and Shǎn. If we speak of them as they become substantial, we call them the five elements. And this is what is called the essence of what is meant by the second and fifth lines of the Khien hexagram,' &c. &c.*

² Callery says here:—*'C'est toujours l'application de la théorie des affinités naturelles dont nous avons parlé (see note, p. 281) et dont il importe de bien se pénétrer lorsqu'on veut comprendre quelque chose aux dissertations philosophiques des Chinois.'* But after the student has done his best to get hold of the theory, he will often be baffled in trying to follow the applications of it. For example, I cannot get hold of what is said here about the genesis of the moon. Much of the next four paragraphs is very obscure.

3. The five elements in their movements alternately displace and exhaust one another. Each one of them, in the revolving course of the twelve months of the four seasons, comes to be in its turn the fundamental one for the time.

4. The five notes of harmony, with their six upper musical accords, and the twelve pitch-tubes, come each, in their revolutions among themselves, to be the first note of the scale.

5. The five flavours, with the six condiments, and the twelve articles of diet, come each one, in their revolutions (in the course of the year), to give its character to the food.

6. The five colours, with the six elegant figures, which they form on the two robes, come each one, in their revolutions among themselves, to give the character of the dress that is worn.

7. Therefore Man is the heart and mind of Heaven and Earth, and the visible embodiment of the five elements. He lives in the enjoyment of all flavours, the discriminating of all notes (of harmony), and the enrobing of all colours¹.

A little light seems to flash on them from parts of different sections of Book IV, but it is neither bright nor steady.

¹ For this paragraph M. Callery gives:—‘L’homme est donc le cœur du Ciel et de la Terre, la fine essence des cinq éléments, et vit en mangeant des choses sapides, en distinguant les sons, et en s’habillant de différentes couleurs (contrairement à la brute, dont les goûts sont grossiers, et les instincts sans raison).’ Of course the first predicate about man, and, we might almost say, the second also, are metaphorical. ‘La fine essence’ is not a correct translation of the text in the second predicate, the Chinese character so rendered is different from the two characters in paragraph 1. On the former predicate Hsiang An-shih (Sung dynasty) says:—

8. Thus it was that when the sages would make rules (for men), they felt it necessary to find the origin (of all things) in heaven and earth; to make the two forces (of nature) the commencement (of all); to use the four seasons as the handle (of their arrangements); to adopt the sun and stars as the recorders (of time), the moon as the measurer (of work to be done), the spirits breathing (in nature) as associates¹, the five elements as giving substance (to things), rules of propriety and righteousness as (their) instruments, the feelings of men as the field (to be cultivated), and the four intelligent creatures as domestic animals (to be reared)².

9. The origin of all things being found in heaven and earth, they could be taken in hand, one after the other. The commencement of these being found in the two forces (of nature), their character and tendencies could be observed. The four seasons being used as a handle, (the people) could be stimulated to the business (of each). The sun and stars being constituted the measures of time,

'The heart of Heaven and Earth is simply benevolence. The perfect benevolence of Heaven and Earth is lodged in man. Given the human body, and forthwith there is the benevolent heart. Hence it is said (Mencius VII, ii, 16), "Man is benevolence;" "Benevolence is the heart of man." Moreover, the heart of Heaven and Earth is seen in the very idea of life, so that the heart (or kernel) of all fruits is called *zăn* (仁) or benevolence, which is again a name for man (仁者人也).'

¹ Callery has for this:—'Les Esprits et les Dieux pour compagnons;' Medhurst, 'the Kwei Shins, as the associates.' K'ang and Khung say that by Kwei Shăn are to be understood 'the hills and streams of last section,' paragraph 12, for 'those help the respiration of the earth.'

² See paragraph 10.

that business could be laid out in order. The moon being taken as the measure (of work to be done), that work could be accomplished successfully. The spirits breathing (in nature) being considered as associates, what is done will be maintained permanently. The five elements being considered as giving substance (to things), what has been done could be repeated. Rules of propriety and righteousness being viewed as the instruments, whatever was done would be completed. The feelings of men being the field to be cultivated, men would look up (to the sages) as to their lords. The four intelligent creatures being made to become domestic animals, there would be constant sources of food and drink.

10. What were the four intelligent creatures¹? They were the *K'hi-lin*, the phoenix, the tortoise, and the dragon. When the dragon becomes a domestic animal, (all other) fishes and the sturgeon do not lie hidden from men (in the mud). When the phoenix becomes so, the birds do not fly from them in terror. When the *K'hi-lin* does so, the beasts do not scamper away. When the tortoise does so, the feelings of men take no erroneous course.

¹ Callery calls these four creatures 'le cerf, l'aigle, la tortue, et le dragon;' and says:—'D'après la mythologie historique des Chinois, ces quatre animaux ne se montrent sur la terre que sous le règne des empereurs d'une vertu extraordinaire. Alors, la plus grande paix règne dans l'univers; tous les hommes sont heureux; personne ne manque de rien:—C'est l'âge d'or, moins les idées poétiques des Grecs et des Latins.' All the four excepting the tortoise are fabulous animals, and even Confucius believed in them (Ana. IX, 8). The lesson drawn from the text by many is that men's goodness is the pledge of, and the way to, all prosperity.

SECTION IV.

1. The ancient kings made use of the stalks and the tortoise-shell ; arranged their sacrifices ; buried their offerings of silk ; recited their words of supplication and benediction ; and made their statutes and measures. In this way arose the ceremonial usages of the states, the official departments with their administrators, each separate business with its own duties, and the rules of ceremony in their orderly arrangements.

2. Thus it was that the ancient kings were troubled lest the ceremonial usages should not be generally understood by all below them. They therefore sacrificed to God in the suburb (of the capital), and thus the place of heaven was established. They sacrificed at the altar of the earth inside the capital, and thus they intimated the benefits derived from the earth. Their sacrifices in the ancestral temple gave their fundamental place to the sentiments of humanity. Those at the altars of the hills and streams served to mark their intercourse with the spirits breathing (in nature). Their five sacrifices (of the house) were a recognition of the various business which was to be done.

For the same reason, there are the officers of prayer in the ancestral temple ; the three ducal ministers in the court ; and the three classes of old men in the college. In front of the king there were the sorcerers, and behind him the recorders ; the diviners by the tortoise-shell and by the stalks, the blind musicians and their helpers were all on his left and right. He himself was in the centre. His

mind had nothing to do, but to maintain what was entirely correct.

3. By means of the ceremonies performed in the suburb, all the spirits receive their offices. By means of those performed at the altar of the earth, all the things yielded (by the earth) receive their fullest development. By means of those in the ancestral temple, the services of filial duty and of kindly affection come to be discharged. By means of those at the five sacrifices of the house, the laws and rules of life are correctly exhibited. Hence when the ideas in these sacrifices in the suburb, at the altar of the earth, in the ancestral temple, at the altars of the hills and streams, and of the five sacrifices of the house are fully apprehended, the ceremonies used are found to be lodged in them¹.

4. From all this it follows that rules of ceremony must be traced to their origin in the Grand Unity².

¹ *K'ang* explains 'all the spirits' in the first sentence of this paragraph by 'all the constellations.' *Khung* agrees with him. *K'han Hào* (Yüan dynasty) explains it of 'wind, rain, cold, and heat.' The *K'ien-lung* editors say that the two explanations must be united. But why are these phenomena described as all or 'the hundred spirits?' Is it by personification? or a kind of pantheism?

² *Medhurst* translated this name by 'the Supreme One;' *Callery*, as I do, by 'la Grande Unité,' adding in parentheses, 'principe de toutes choses.' Does the name denote what we are to consider an Immaterial Being, acting with wisdom, intention, and goodness? *Medhurst* came to this conclusion. He says:—'Thāi Yî (太一) must mean the Supreme One, or the infinitely great and undivided one. Bearing in mind also that this paragraph follows another in which Tî (帝), the ruling Power, is honoured with the highest adoration, and that this ruling Power is the same

This separated and became heaven and earth. It revolved and became the dual force (in nature).

with the being here called the Supreme One, there can be no doubt that the reference in the whole passage is to the Almighty One who rules over all things' (Dissertation on the Theology of the Chinese, p. 85). He goes on to say that 'the Critical Commentary makes this still more plain by saying that this Supreme One is the source of all others, and that he existed before the powers of nature were divided, and before the myriad things were produced, the one only being. The operations ascribed to him of dividing heaven and earth, of revolving light and darkness, of changing the four seasons, and of appointing the various Kwei Shins to their several offices, are all indicative of that omnipotent power which must be ascribed to him alone.' But the operations referred to in this last sentence are mentioned in the text, not as performed by the Supreme One, but as undergone by the Grand Unity. And, moreover, 'the Critical Commentary' yields a testimony different from what Dr. Medhurst supposed. Khung Ying-tâ says:—'The name Thâi Yî means the original vapoury matter of chaos, before the separation of heaven and earth (太一謂天地未分, 混沌之元氣);' and there is nothing in any of the other commentators contrary to this. But the concluding sentence of the paragraph, that 'The law and authority (of all the lessons in the rules of ceremony) is in Heaven,' seems to me to imply 'a recognition (indistinct it may be) of a Power or Being anterior to and independent of the Grand Unity.' Wû K'hang says:—'The character Thien (Heaven) is used to cover the five things—the Grand Unity, heaven and earth, the (dual force of) Yin and Yang, the four seasons, and the Kwei Shân.' The attempt, apparent in the whole treatise, to give Tâoistic views a place in the old philosophy of the nation, is prominent here. Medhurst is not correct in saying that the Tî (帝) in paragraph 2 is the same as the Thâi Yî in this paragraph, but It, or rather He, is the same as the Thien (天) with which it concludes. The earliest Chinese adopted Thien or Heaven as the name for the supreme Power, which arose in their minds on the contemplation of the order of nature, and the principles of love and righteousness developed in the constitution of man and the course of providence, and

It changed and became the four seasons. It was distributed and became the breathings (thrilling in the universal frame). Its (lessons) transmitted (to men) are called its orders; the law and authority of them is in Heaven.

5. While the rules of ceremony have their origin in heaven, the movement of them reaches to earth. The distribution of them extends to all the business (of life). They change with the seasons; they agree in reference to the (variations of) lot and condition. In regard to man, they serve to nurture (his nature). They are practised by means of offerings, acts of strength, words and postures of courtesy, in eating and drinking, in the observances of capping, marriage, mourning, sacrificing, archery, chariot-driving, audiences, and friendly missions.

6. Thus propriety and righteousness are the great elements for man's (character); it is by means of them that his speech is the expression of truth and his intercourse (with others) the promotion of harmony; they are (like) the union of the cuticle and cutis, and the binding together of the muscles and bones in strengthening (the body). They constitute the great methods by which we nourish the living,

proceeded to devise the personal name of Tĭ or God, as the appellation of this; and neither Táoism, nor any other form of materialistic philosophising, has succeeded in eradicating the precious inheritance of those two terms from the mind of peasant or scholar.

Callery has misconstrued the paragraph by making 'Les Rites,' or the 'toutes choses' of his gloss, the subject of all the predicates in it:—'*Les rites ont pour origine essentielle la Grande Unité (principe de toutes choses). Ils se divisent ensuite, les uns pour le Ciel, les autres pour la Terre,*' &c.

bury the dead, and serve the spirits of the departed. They supply the channels by which we can apprehend the ways of Heaven and act as the feelings of men require. It was on this account that the sages knew that the rules of ceremony could not be dispensed with, while the ruin of states, the destruction of families, and the perishing of individuals are always preceded by their abandonment of the rules of propriety.

7. Therefore the rules of propriety are for man what the yeast is for liquor ¹. The superior man by (his use of them) becomes better and greater. The small man by his neglect of them becomes meaner and worse.

8. Therefore the sage kings cultivated and fashioned the lever of righteousness and the ordering of ceremonial usages, in order to regulate the feelings of men. Those feelings were the field (to be cultivated by) the sage kings. They fashioned the rules of ceremony to plough it. They set forth the principles of righteousness with which to plant it. They instituted the lessons of the school to weed it. They made love the fundamental subject by which to gather all its fruits, and they employed the training in music to give repose (to the minds of learners).

¹ On this comparison Callery says: — 'Ce que les Chinois appellent du vin (酒) n'étant une autre chose qu'une eau de vie de grains obtenue par la distillation, plus il y a de ferment dans la macération primitive, plus la fermentation vineuse est forte, et plus il y a d'alcool quand on la passe par l'alambic. De là cette comparaison entre le degré d'urbanité chez le sage et le degré de force dans le vin.'

9. Thus, rules of ceremony are the embodied expression of what is right. If an observance stand the test of being judged by the standard of what is right, although it may not have been among the usages of the ancient kings, it may be adopted on the ground of its being right.

10. (The idea of) right makes the distinction between things, and serves to regulate (the manifestation of) humanity. When it is found in anything and its relation to humanity has been discussed, the possessor of it will be strong.

11. Humanity is the root of right, and the embodying of deferential consideration. The possessor of it is honoured.

12. Therefore to govern a state without the rules of propriety would be to plough a field without a share. To make those rules without laying their foundation in right would be to plough the ground and not sow the seed. To think to practise the right without enforcing it in the school would be to sow the seed and not weed the plants. To enforce the lessons in the schools, and insist on their agreement with humanity, would be to weed and not to reap. To insist on the agreement of the lessons with humanity, and not give repose to (the minds of) the learners by music, would be to reap, and not eat (the product). To supply the repose of music and not proceed to the result of deferential consideration would be to eat the product and get no fattening from it.

13. When the four limbs are all well proportioned, and the skin is smooth and full, the individual is in good condition. When there is generous affection between father and son, harmony between brothers,

and happy union between husband and wife, the family is in good condition. When the great ministers are observant of the laws, the smaller ministers pure, officers and their duties kept in their regular relations and the ruler and his ministers are correctly helpful to one another, the state is in good condition. When the son of Heaven moves in his virtue as a chariot, with music as his driver, while all the princes conduct their mutual intercourse according to the rules of propriety, the Great officers maintain the order between them according to the laws, inferior officers complete one another by their good faith, and the common people guard one another with a spirit of harmony, all under the sky is in good condition. All this produces what we call (the state of) great mutual consideration (and harmony).

14. This great mutual consideration and harmony would ensure the constant nourishment of the living, the burial of the dead, and the service of the spirits (of the departed). However greatly things might accumulate, there would be no entanglement among them. They would move on together without error, and the smallest matters would proceed without failure. However deep some might be, they would be comprehended. However thick and close their array, there would be spaces between them. They would follow one another without coming into contact. They would move about without doing any hurt to one another. This would be the perfection of such a state of mutual harmony.

15. Therefore the clear understanding of this state will lead to the securing of safety in the midst of danger. Hence the different usages of ceremony,

and the maintenance of them in their relative proportions as many or few, are means of keeping hold of the feelings of men, and of uniting (high and low, and saving them from) peril.

16. The sage kings showed their sense of this state of harmony in the following way:—They did not make the occupants of the hills (remove and) live by the streams, nor the occupants of the islands (remove and live) in the plains; and thus the (people) complained of no hardship. They used water, fire, metal, wood, and the different articles of food and drink, each in its proper season. They promoted the marriages of men and women, and distributed rank and office, according to the years and virtues of the parties. They employed the people with due regard to their duties and wishes. Thus it was that there were no plagues of flood, drought, or insects, and the people did not suffer from bad grass or famine, from untimely deaths or irregular births. On account of all this heaven did not grudge its methods; earth did not grudge its treasures; men did not grudge (the regulation of) their feelings. Heaven sent down its fattening dews¹; earth sent forth its springs of sweet wine¹; hills produced implements and chariots²; the Hø sent forth the horse with the map (on his

¹ Káo Yî in his *Filial Miscellanies*, Book III, art. 9, contends that these are only different names for the same phenomenon. Few readers will agree with him, though the language means no more than that 'the dews were abundant, and the water of the springs delicious.'

² There must have been some legend which would have explained this language, but I have not succeeded in finding any trace of it.

back)¹. Phœnixes and *Khi*-lins were among the trees of the suburbs, tortoises and dragons in the ponds of the palaces, while the other birds and beasts could be seen at a glance in their nests and breeding places. All this resulted from no other cause but that the ancient kings were able to fashion their ceremonial usages so as to convey the underlying ideas of right, and embody their truthfulness so as to secure the universal and mutual harmony. This was the realisation of it.

¹ The famous 'River Map' from which, it has been fabled, Fû-hsî fashioned his eight trigrams. See vol. xvi, pp. 14-16.

BOOK VIII. THE LÎ KHÎ

OR

rites in the formation of character¹.

SECTION I.

1. The rules of propriety serve as instruments to form men's characters, and they are therefore prepared on a great scale. Being so, the value of them is very high. They remove from a man all perversity, and increase what is beautiful in his nature. They make him correct, when employed in the ordering of himself; they ensure for him free course, when employed towards others. They are to him what their outer coating is to bamboos, and what its heart is to a pine or cypress². These two are the best of all the productions of the (vegetable) world. They endure through all the four seasons, without altering a branch or changing a leaf. The superior man observes these rules of propriety, so that all in a wider circle are harmonious with him, and those in his narrower circle have no dissatisfactions with him. Men acknowledge and are affected by his goodness, and spirits enjoy his virtue.

2. The rules as instituted by the ancient kings had their radical element and their outward and

¹ See the introductory notice, p. 25.

² The author evidently knew the different conditions of their structure on which the growth and vigour of Endogens (the monocotyledonous plants) and Exogens (dicotyledons) respectively depend.

elegant form. A true heart and good faith are their radical element. The characteristics of each according to the idea of what is right in it are its outward and elegant form. Without the radical element, they could not have been established; without the elegant form, they could not have been put in practice¹.

3. (The things used in performing) the rites should be suitable to the season, taken from the resources supplied by the ground, in accordance with (the requirements of) the spirits², and agreeable to the minds of men;—according to the characteristics of all things. Thus each season has its productions, each soil its appropriate produce, each sense its peculiar power, and each thing its advantageousness. Therefore what any season does not produce, what any soil does not nourish, will not be used by a superior man in performing his rites, nor be enjoyed by the spirits. If mountaineers were to (seek to) use fish and turtles in their rites, or the dwellers

¹ Callery gives for this short paragraph :—‘ Les rites établis par les anciens rois ont leur essence intîmé et leur dehors ; la droiture est l’essence des rites ; leur accord patent avec la raison en est le dehors. Sans essence, ils ne peuvent exister ; sans dehors ils ne peuvent fonctionner.’ He appends a long note on the difficulty of translation occasioned by the character 文 (wǎn), which he renders by ‘le dehors,’ and I by ‘the outward, elegant form;’ and concludes by saying, ‘Traduise mieux qui pourra.’ I can only say that I have done the best I could (at the time) with this and every other paragraph.

² Khung Ying-tâ says here that ‘the spirits were men who, when alive, had done good service, and were therefore sacrificed to when dead. From which it follows that what was agreeable to the minds of men would be in accordance with (the requirements of) the spirits.’

near lakes, deer and pigs, the superior man would say of them that they did not know (the nature of) those usages.

4. Therefore it is necessary to take the established revenues of a state as the great rule for its ceremonial (expenditure). Important for the determination of this is the size of its territory. The amount of the offerings (also) should have regard to the character of the year as good or bad. In this way, though the harvest of a year may be very defective, the masses will not be afraid, and the ceremonies as appointed by the superiors will be economically regulated.

5. In (judging of) rites the time¹ should be the great consideration. (Their relation to) natural duties, their material substance, their appropriateness to circumstances, and their proportioning are all secondary.

Yáo's resignation of the throne to Shun, and Shun's resignation of it to Yü; Thang's dethronement of Kieh; and the overthrow of Kâu by Wăn and Wû:—all these are to be judged of by the time. As the Book of Poetry says,

‘It was not that he was in haste to gratify his wishes;

It was to show the filial duty that had come down to him.’

¹ ‘The time’ comes about by the ordering of heaven. The instances given of it are all great events in the changing of dynasties. But such changes can hardly be regarded as rites. Perhaps the writer thought that the abdication in some cases, and the violent dethroning in others, were precedents, which might be regarded as having that character. For the quotation from the Shih, which is not very happy, see Part III, ode 10, 2.

The sacrifices to heaven and earth ; the services of the ancestral temple ; the courses for father and son ; and the righteousness between ruler and minister :—these are to be judged of as natural duties.

The services at the altars of the land and grain and of the hills and streams ; and the sacrifices to spirits :—these are to be judged of by the material substance of the offerings. The use of the funeral rites and sacrifices ; and the reciprocities of host and guest :—these are to be judged of by their appropriateness to circumstances.

Sacrificing with a lamb and a sucking pig, by the multitude of officers, when yet there was enough ; and sacrificing with an ox, a ram, and a boar, when yet there was nothing to spare :—in these we have an instance of the proportioning.

6. The princes set great store by the tortoise, and consider their jade-tokens as the insignia of their rank, while the (chiefs of) clans have not the tortoises that are so precious, nor the jade-tokens to keep (by themselves), nor the towered gateways :—these (also) are instances of the proportioning.

7. In some ceremonial usages the multitude of things formed the mark of distinction. The son of Heaven had 7 shrines in his ancestral temple ; the prince of a state, 5 ; Great officers, 3 ; and other officers, 1. The dishes of the son of Heaven on stands were 26 ; of a duke, 16 ; of another prince, 12 ; of a Great officer of the upper class, 8 ; of one of the lower class, 6. To a prince there were given 7 attendants and 7 oxen ; and to a Great officer, 5 of each. The son of Heaven sat on 5 mats placed over one another ; a prince, on 3 ; and a Great officer,

on 2. When the son of Heaven died, he was buried after 7 months, in a fivefold coffin, with 8 plumes ; a prince was buried after 5 months, in a threefold coffin, with 6 plumes ; a Great officer after 3 months, in a twofold coffin, with 4 plumes. In these cases, the multitude of things was the mark of distinction¹.

8. In other usages, the paucity of things formed the mark of distinction. To the son of Heaven there were given no attendants², and he sacrificed to Heaven with a single victim ; when he visited the princes (on his tours of inspection), he was feasted with a single bullock. When princes went to the courts of one another, fragrant spirits were used in libations, and there were no dishes on stands, either of wood or bamboo. At friendly missions by Great officers, the ceremonial offerings were slices of dried meat and pickles. The son of Heaven declared himself satisfied after 1 dish ; a prince, after 2 ; a Great officer and other officers, after 3 ; while no limit was set to the eating of people who lived by their labour. (The horses of) the Great carriage had 1 ornamental tassel at their breast-bands ; those of the other carriages had 7 (pieces of) jade for rank-tokens ; and libation cups were presented singly ; as also the tiger-shaped and yellow cups. In sacrificing to spirits a single mat was used ; when princes were giving audience to their ministers, they (bowed to) the Great officers one by one, but to all the other officers

¹ The different views in attempting to verify all the numbers and other points in the specifications here are endless.

² The attendants waited on the visitors. But the son of Heaven was lord of all under the sky. He was at home everywhere ; and could not be received as a visitor.

together. In these cases the fewness of the things formed the mark of distinction.

9. In others, greatness of size formed the mark. The dimensions of palaces and apartments; the measurements of dishes and (other) articles; the thickness of the inner and outer coffins; the greatness of eminences and mounds¹:—these were cases in which the greatness of size was the mark.

10. In others, smallness of size formed the mark. At the sacrifices of the ancestral temple, the highest in rank presented a cup (of spirits to the representative of the dead), and the low, a san (containing five times as much): (at some other sacrifices), the honourable took a *kkih* (containing 3 cups), and the low a horn (containing 4). (At the feasts of viscounts and barons), when the vase went round 5 times, outside the door was the earthenware *fâu* (of supply), and inside, the *hû*; while the ruler's vase was an earthenware *wû*:—these were cases in which the smallness of size was the mark of distinction².

11. In others, the height formed the mark of

¹ Both these names refer, probably, to mounds raised over the dead. Those over the emperors of the Ming dynasty, about midway between Peking and the Great Wall, and that over Confucius at *K'hi-fû* in Shan-tung, are the best specimens of these which I have seen.

² It is difficult to explain fully and verify all the statements in this paragraph, for want of evidence. The unit in them is the *shăng* (升), or 'pint,' now = 1·031 litre; the cup, (*g*io, 爵) contained one *shăng*; the *kkih* (觶), three; the *kio* (角), four; and the *san* (散), five. The *hû* (壺) contained one 'stone' (石), = 10·310 litre; and the *wû* (甗) = 51·55. The size of the *fâu* (缶) is unknown.

distinction. The hall of the son of Heaven was ascended by 9 steps¹; that of a prince, by 7; that of a Great officer, by 5; and that of an ordinary officer, by 3. The son of Heaven and the princes had (also) the towered gateway. In these cases height was the mark.

12. In others, the lowness formed the mark. In sacrificing, the highest reverence was not shown on the raised altar, but on the ground beneath, which had been swept. The vases of the son of Heaven and the princes were set on a tray without feet²; those of Great and other officers on one with feet (3 inches high). In these cases the lowness was the mark of distinction.

13. In others, ornament formed the mark. The son of Heaven wore his upper robe with the dragons figured on it; princes, the lower robe with the axes embroidered on it; Great officers, their lower robe with the symbol of distinction; and other officers, the dark-coloured upper robe, and the lower one red. The cap of the son of Heaven had 12 pendants of jade beads set on strings hanging down of red and green silk; that of princes, 9; that of Great officers of the highest grade, 7; and if they were of the lowest grade, 5; and that of other officers, 3. In these cases the ornament was the mark of distinction.

14. In others, plainness formed the mark. Acts of the greatest reverence admit of no ornament.

¹ This literally is 'nine cubits;' each step, it is said, was a cubit high.

² This tray was four cubits long, two cubits four inches wide, and five inches deep.

The relatives of a father do not put themselves into postures (like other visitors). The Grand jade-token has no engraving on it. The Grand soup has no condiments. The Grand carriage is plain, and the mats in it are of rushes. The goblet with the victim-ox carved on it is covered with a plain white cloth. The ladle is made of white-veined wood. These are cases in which plainness is the mark.

15. Confucius said, 'Ceremonial usages should be most carefully considered.' This is the meaning of the remark that 'while usages are different, the relations between them as many or few should be maintained¹.' His words had reference to the proportioning of rites.

16. That in the (instituting of) rites the multitude of things was considered a mark of distinction, arose from the minds (of the framers) being directed outwards. The energy (of nature) shoots forth and is displayed everywhere in all things, with a great discriminating control over their vast multitude. In such a case, how could they keep from making multitude a mark of distinction in rites? Hence the superior men, (the framers), rejoiced in displaying (their discrimination).

But that in (the instituting of) rites the paucity of things was (also) considered a mark of distinction, arose from the minds (of the framers) being directed inwards. Extreme as is the energy (of nature) in production, it is exquisite and minute. When we look at all the things under the sky, they do not

¹ See page 392, paragraph 15. We may conclude that the Lî Yun was compiled and published before the Lî KHÎ; or it may be that the sentences common to them both had long been in use.

seem to be in proportion to that energy. In such a case, how could they keep from considering paucity a mark of distinction? Hence the superior men, (the framers), watched carefully over the solitude (of their own thoughts)¹.

17. The ancient sages (thus) gave honour to what was internal, and sought pleasure in what was external; found a mark of distinction in paucity, and one of what was admirable in multitude; and therefore in the ceremonial usages instituted by the ancient kings we should look neither for multitude nor for paucity, but for the due relative proportion.

18. Therefore, when a man of rank uses a large victim in sacrifice, we say he acts according to propriety, but when an ordinary officer does so, we say he commits an act of usurpation.

19. Kwan K'ung had his sacrificial dishes of grain carved, and red bands to his cap; fashioned hills on the capitals of his pillars, and pondweed on the small pillars above the beams²;—the superior man considered it wild extravagance.

20. An Phing-kung, in sacrificing to his father, used a sucking-pig which did not fill the dish, and went to court in an (old) washed robe and cap:—the superior man considered it was niggardliness³.

¹ Callery thinks that the theory about rites underlying this paragraph is 'éminemment obscure.' One difficulty with me is to discover any connection between its parts and what is said in paragraphs 7 and 8 about the 'multitude and paucity of rites.'

² See the Analects, V, xvii, and the note there. In that passage the extravagance is charged on the Sang Wán-kung of paragraph 23.

³ An Phing-kung was a Great officer of K'hi, and ought not to have been so niggardly.

21. Therefore the superior man thinks it necessary to use the utmost care in his practice of ceremonies. They are the bond that holds the multitudes together; and if the bond be removed, those multitudes fall into confusion. Confucius said, 'If I fight, I overcome; when I sacrifice, I receive blessing¹.' He said so, because he had the right way (of doing everything).

22. A superior man will say², 'The object in sacrifices is not to pray; the time of them should not be hastened on; a great apparatus is not required at them; ornamental matters are not to be approved; the victims need not be fat and large; a profusion of the other offerings is not to be admired.'

23. Confucius said, 'How can it be said that Ƴang Wăn-kung was acquainted with the rules of propriety? When Hsiâ Fû-khî went right in the teeth of sacrificial order³, he did not stop him, (nor could he

¹ It is understood that the 'I' is not used by Confucius of himself, but as personating one who knew the true nature of ceremonial usages. See the language again in the next Book, Sect. i, 22; it is found also in the 'Narratives of the School.'

² K'hsên Hào remarks that the compiler of the Book intends himself by 'the superior man.' Thus the compiler delivers his own judgment in an indirect way. Most of what he says will be admitted. It is to the general effect that simple offerings and sincere worship are acceptable, more acceptable than rich offerings and a formal service. But is he right in saying that in sacrificing we should not 'pray?' So long as men feel their own weakness and needs, they will not fail to pray at their religious services. So it has been in China in all the past as much as elsewhere.

³ Hsiâ Fû-khî was the keeper, or minister in charge, of the ancestral temple of Lû, and contemporary with Ƴang Wăn-kung during the marquises of Kwang, Wăn, and Hsi. He introduced at least one great irregularity in the ancestral temple, placing the

prevent) his burning a pile of firewood in sacrificing to the spirit of the furnace. Now that sacrifice is paid to an old wife. The materials for it might be contained in a tub, and the vase is the (common) wine-jar.'

SECTION II.

1. The rules of propriety may be compared to the human body. When the parts of one's body are not complete, the beholder¹ will call him 'An imperfect man;' and so a rule which has been made unsuitably may be denominated 'incomplete.'

Some ceremonies are great, and some small; some are manifest, and some minute. The great should not be diminished, nor the small increased. The manifest should not be hidden, nor the minute made great. But while the important rules are 300, and the smaller rules 3000, the result to which they all lead is one and the same². No one can enter an apartment but by the door.

2. A superior man in his observance of the rules, where he does his utmost and uses the greatest care, is extreme in his reverence and the manifestation of sincerity. Where they excite admiration and an

tablet of Hsî above that of Wăn; and Wăn-kung made no protest. Of the other irregularity mentioned in the text we have not much information; and I need not try to explain it. It seems to me that it must have been greater than the other.

¹ The text has here 'the superior man,' for which Callery has 'au dire du sage.'

² See Book XXVIII, ii, paragraph 38. What the 300 and 3000 rules are is very much disputed. The 'one and the same result' is, according to most, 'reverence and sincerity;' according to some, 'suitability.'

elegant attractiveness, there is (still) that manifestation of sincerity.

3. A superior man, in his consideration of the rules, finds those which are carried directly into practice ; those in which one has to bend and make some modification ; those which are regular and the same for all classes ; those which are diminished in a certain order ; those in which (a kind of) transplantation takes place, and (the ceremony) is distributed ; those in which individuals are pushed forward and take part in the rules of a higher grade ; those in which there are ornamental imitations (of natural objects) ; those in which the ornamental imitations are not carried out so fully ; and those where appropriation (of higher observances) is not deemed usurpation¹.

4. The usages of the three dynasties had one and the same object, and the people all observed them. In such matters as colour, whether it should be white or dark, Hsiâ instituted and Yin adopted (its choice, or did not do so)².

5. Under the *K'âu* dynasty the representatives of

¹ Nine peculiarities in ceremonial usages are here indicated. It would be possible to illustrate them fully after the most approved commentators ; but there would be little advantage in thus recalling the past which has for the most part passed away,—even in China.

² Callery takes a different view of the second sentence in this paragraph, and translates it :—‘(Si quelque chose a subi des modifications, ce n’a été que) la couleur blanche ou la couleur verte (caractéristique de telle ou telle autre dynastie ; en dehors de ces choses peu importantes, pour tout ce qui est essentiel) la dynastie des Yin s’est scrupuleusement conformée à ce qui a été établi par les Hsiâ.’ His view of the whole paragraph, however, comes to much the same as mine.

the dead sat. Their monitors and cup-suppliers observed no regular rules. The usages were the same (as those of Yin), and the underlying principle was one. Under the Hsiâ dynasty, the personators had stood till the sacrifice was ended, (whereas) under Yin they sat. Under K'âu, when the cup went round among all, there were six personators¹. 3ăng-ze said, 'The usages of K'âu might be compared to those of a subscription club².'

6. A superior man will say, 'The usages of ceremony that come closest to our human feelings are not those of the highest sacrifices; (as may be seen in) the blood of the border sacrifice; the raw flesh in the great offering (to all the royal ancestors) of the ancestral temple; the sodden flesh, where the spirits are presented thrice; and the roast meat, where they are presented once³.'

7. And so those usages were not devised by

¹ This would be on occasion of the united sacrifice to all the ancestors; the personator of Hâu K'î being left out of the enumeration, as more honourable than the others.

² That is, all stand equally as if each had paid his contribution to the expenses.

³ The greatest of all sacrifices was that to Heaven in a suburb of the capital; the next was the great triennial or quinquennial sacrifice in the ancestral temple; the third was that at the altars of the land and grain, and of the hills and rivers, which is supposed to be described here as that at which 'the cup' was thrice presented; and the last in order and importance were small sacrifices to individual spirits. The four offerings in the text were presented at the first three; but not in the same order. That to Heaven began with blood; that in the ancestral temple with raw flesh. Those farthest from our human feelings had the place of honour in the greatest services. We must seek for a higher and deeper origin of them than our ordinary feelings.

superior men in order to give expression to their feelings. There was a beginning of them from (the oldest times); as when (two princes) have an interview, there are seven attendants to wait on them and direct them. Without these the interview would be too plain and dull. They reach (the ancestral temple) after the visitor has thrice declined the welcome of the host, and the host has thrice tried to give precedence to the other. Without these courtesies the interview would be too hurried and abrupt.

In the same way, when in L¹ they were about to perform the service to God (in the suburb), they felt it necessary first to have a service in the college with its semicircular pool. When they were about in 3in to sacrifice to the Ho, they would first do so to the pool of W¹. When in K¹ they were about to sacrifice to mount Th¹, they would do so first in the forest of Phei.

Moreover, the keeping the victims (for the altar of Heaven) for three months (in the stable); the abstinence (of the worshippers) for seven days; and the vigil of three days:—all showed the extreme degree of (preparatory) care (for the service).

The ritual arrangements, further, of the reception (of guests) and communication between them and the host, and for assisting and guiding the steps of the (blind) musicians, showed the extreme degree of kindly (provision)¹.

¹ It is not easy to construe this paragraph, nor to discover and indicate the connexion between its different parts. Generally we may say that it illustrates the previous statement about the rites as not simply the expression of natural feeling, but of that feeling wisely guided and embodied so as to be most beneficial to the

8. In ceremonial usages we should go back to the root of them (in the mind), and maintain the old (arrangements of them), not forgetting what they were at first. Hence there is no (need to be) calling attention to the demonstrations expressive of grief¹; and those which (more particularly) belong to the court are accompanied by music. There is the use of sweet spirits, and the value set on water; there is the use of the (ordinary) knife, and the honour expressed by that furnished with (small) bells; there is the comfort afforded by the rush and fine bamboo mats, and the (special) employment of those which are made of straw. Therefore the ancient kings in their institution of the rules of propriety had a ruling idea, and thus it is that they were capable of being transmitted, and might be learned, however many they were.

9. The superior man will say, 'If a man do not have in himself the distinctions (embodied in ceremonies), he will contemplate that embodiment without any intelligent discrimination; if he wish to exercise that discrimination, and not follow the guidance of the rules, he will not succeed in his object. Hence if his practice of ceremonies be not according to the rules, men will not respect them;

individual and society. The auxiliary services in the first part of it were all preparatory to the great services that followed. That in the great college of Lî was concerned with Hâu Kĭ, the ancestor of the House of Kĭu and all its branches, and preliminary to the place he was to occupy at the great sacrifice to Heaven.

The remaining two paragraphs show how the natural feeling was quietly nourished, guided, and modified.

¹ Yet much is said in the Than Kung about those demonstrations of grief in the mourning rites.

and if his words be not according to those rules, men will not believe them. Accordingly it is said, "The rules of ceremony are the highest expression of (the truth of) things."

10. Hence it was that in old times, when the ancient kings instituted ceremonies, they conveyed their idea by means of the qualities of the articles and observances which they employed. In their great undertakings, they were sure to act in accordance with the seasons; in their doings morning and evening, they imitated the sun and moon; in what required a high situation, they took advantage of mounds and hillocks, and in what required a low situation, of the (banks of the) rivers and lakes. Hence each season has its rains and benefits, and those wise men sought to make use of them with intelligence with all the earnestness they could command¹.

11. The ancient kings valued (men's) possession of virtue, honoured those who pursued the right course, and employed those who displayed ability. They selected men of talents and virtue, and

¹ See Callery's translation of this paragraph. He says on it:— 'Cette période offre, par son incohérence, des difficultés sérieuses qui me font supposer une grave altération du texte primitif;' and justifies his own version by the remark, 'Je me suis dit qu'après tout il vaut mieux embellir que défigurer.' He takes the whole, like *K'ang*, as referring to the ceremonies of different sacrifices. *Ying Yung* (Sung dynasty; earlier than *K'ü Hsi*) understood it more generally of other royal and imperial doings. The *K'ien-lung* editors say that the two views must be united. They remark on the last sentence that, as 'every season has its appropriate productions and every situation its own suitabilities, we must examine them in order to use things appropriately.'

appointed them. They assembled the whole of them and solemnly addressed them¹.

12. Then in accordance with (the height of) heaven they did service to Heaven, in accordance with (the lower position of) earth they did service to Earth; taking advantage of the famous hills they ascended them, and announced to Heaven the good government (of the princes). When thus at the felicitous spot (chosen for their capitals) they presented their offerings to God in the suburb and announced to Heaven (the general good government from the famous hills), the phoenix descended, and tortoises and dragons made their appearance². When they presented their offerings to God in the suburb the winds and rains were duly regulated, and the cold and heat came each in its proper time, so that the sage (king) had only to stand with his face to the south, and order prevailed all under the sky.

13. The courses of the heavenly (bodies) supply the most perfect lessons, and the sages possessed the highest degree of virtue. Above, in the hall of the ancestral temple, there was the jar, with clouds and hills represented on it on the east, and that with the victim represented on it on the west. Below the hall the larger drums were suspended on the west, and the smaller drums answering to them on the east. The ruler appeared at the (top of the) steps on the east; his wife was in the apartment on the west. The great luminary makes his appearance in

¹ The 'selection' here, it is understood, was of the functionaries to take part in the sacrificial ceremonies, and the solemn address was on the duties they had to perform.

² See pp. 392, 393, paragraph 16.

the east; the moon makes her appearance in the west. Such are the different ways in which the processes of darkness and light are distributed in nature, and such are the arrangements for the positions (corresponding thereto) of husband and wife. The ruler fills his cup from the jar with an elephant represented on it; his wife fills hers from that with clouds and hills. With such reciprocation do the ceremonies proceed above, while the music responds in the same way below;—there is the perfection of harmony.

14. It is the object of ceremonies to go back to the circumstances from which they sprang, and of music to express pleasure in the results which first gave occasion to it. Thus it was that the ancient kings, in their institution of ceremonies, sought to express their regulation of circumstances, and, in their cultivation of music, to express the aims they had in mind. Hence by an examination of their ceremonies and music, the conditions of order and disorder in which they originated can be known. *K'ü Po-yü*¹ said, 'A wise man, by his intelligence, from the sight of any article, knows the skill of the artificer, and from the contemplation of an action knows the wisdom of its performer.' Hence there is the saying, 'The superior man watches over the manner in which he maintains his intercourse with other men.'

15. Within the ancestral temple reverence prevailed. The ruler himself led the victim forward,

¹ A friend, and perhaps a disciple of Confucius, an officer of the state of Wei. He is mentioned in the Confucian Analects and in Mencius.

while the Great officers assisted and followed, bearing the offerings of silk. The ruler himself cut out (the liver) for (the preliminary) offering, while his wife bore the dish in which it should be presented. The ruler himself cut up the victim, while his wife presented the spirits.

The high ministers and Great officers followed the ruler; their wives followed his wife. How grave and still was their reverence! How were they absorbed in their sincerity! How earnest was their wish that their offerings should be accepted! The arrival of the victim was announced (to the spirits) in the courtyard; on the presentation of the blood and the flesh with the hair on it, announcement was made in the chamber; on the presentation of the soup and boiled meat, in the hall. The announcement was made thrice, each time in a different place; indicating how they were seeking for the spirits, and had not yet found them. When the sacrifice was set forth in the hall, it was repeated next day outside (the gate of the temple); and hence arose the saying, 'Are they there? Are they here?'

16. One offering of the cup showed the simplicity of the service; three offerings served to ornament it; five, to mark discriminating care; and seven, to show (the reverence for) the spirits¹.

17. Was not the great quinquennial sacrifice a service belonging to the king? The three animal victims, the fish, and flesh, were the richest tributes for the

¹ The sacrifices where only one cup was presented were, it is said, the smallest; three cups belonged to the altars of the land and grain; five, to those of the hills and rivers; and seven, to those in the ancestral temple. All this is quite uncertain.

palate from all within the four seas and the nine provinces. The fruits and grain presented in the high dishes of wood and bamboo were the product of the harmonious influences of the four seasons. The tribute of metal showed the harmonious submission (of the princes). The rolls of silk with the round pieces of jade placed on them showed the honour they rendered to virtue. The tortoise was placed in front of all the other offerings, because of its knowledge of the future; the tribute of metal succeeded to it, showing the (hold it has on) human feelings. The vermilion, the varnish, the silk, the floss, the large bamboos and the smaller for arrows—the articles which all the states contribute; with the other uncommon articles, which each state contributed according to its resources, even to those from the remote regions:—(these followed the former). When the visitors left they were escorted with the music of the Sze Hsiâ¹. All these things showed how important was the sacrifice.

18. In the sacrifice to God in the suburb, we have the utmost expression of reverence. In the sacrifices of the ancestral temple, we have the utmost expression of humanity. In the rites of mourning, we have the utmost expression of leal-heartedness. In the preparation of the robes and vessels for the dead, we have the utmost expression of affection. In

¹ We are told in the *Kâu Lî*, Book XXIII, art. 32, that the bell master, with bells and drums, performed the nine Hsiâ pieces, on the occasions appropriate to them. The second of them was 'the Sze Hsiâ,' as here, but the occasion for it in the text would be inappropriate. The eighth, or Kâi Hsiâ, would be appropriate here, and hence K'ang said that sze was a mistake for kâi (咳).

the use of gifts and offerings between host and guest, we have the utmost expression of what is right. Therefore when the superior man would see the ways of humanity and righteousness, he finds them rooted in these ceremonial usages.

19. A superior man has said, 'What is sweet may be tempered; what is white may be coloured. So the man who is right in heart and sincere can learn the (meaning of the) rites.' The rites should not be perfunctorily performed by the man who is not right in heart and sincere. Hence it is all important (in the performance of them) to get the proper men.

20. Confucius said, 'One may repeat the three hundred odes, and not be fit to offer the sacrifice where there is (but) one offering of the cup. He may offer that sacrifice, and not be fit to join in a great sacrifice. He may join in such a sacrifice, and not be fit to offer a great sacrifice to the hills. He may perform that fully, and yet not be able to join in the sacrifice to God. Let no one lightly discuss the subject of rites¹.'

¹ It is not easy to trace satisfactorily the progress of thought here from one sacrificial service to another. 'The great sacrifice' is understood to be the triennial or quinquennial sacrifice to all the ancestors of the ruling House. It is a great step to that from a small sacrifice where only one cup was presented. What 'the great sacrifice to the hills was' is uncertain. It is in the text Tâ Lû (大旅). The meaning of Lû as a sacrifice to the spirit of a hill is well established from the Analects III, 6. Once the phrase Tâ Lû appears as used in the Kâu Lî, Book V, 91, of the royal sacrifice to God ('Lorsque l'empereur offre un grand sacrifice au Seigneur Suprême,' Biot); but it cannot have that meaning here, because the text goes on to speak of that sacrifice as superior to this. K'ang Hsüan made Tâ Lû to be the sacrifice to the 'five Tis,' or the five Planetary Gods, which view, as

21. When 3ze-lû was steward to the House of Kî, its chief had been accustomed to commence his sacrifices before it was light, and when the day was insufficient for them, to continue them by torchlight. All engaged in them, however strong they might appear, and however reverent they might be, were worn out and tired. The officers limped and leaned, wherever they could, in performing their parts, and the want of reverence was great. Afterwards, when 3ze-lû took the direction of them, the sacrifices proceeded differently. For the services in the chamber, he had parties communicating outside and inside the door; and for those in the hall, he had parties communicating at the steps. As soon as it was light, the services began, and by the time of the evening audience all were ready to retire. When Confucius heard of this management, he said, 'Who will say that this Yû does not understand ceremonies¹?'

the *Khien-lung* editors point out, cannot be adopted. And how any sacrifice to the hills, however great, could be represented as greater than the quinquennial sacrifice in the ancestral temple, I cannot understand. I must leave the paragraph in the obscurity that belongs to it.

¹ The *Khien-lung* editors say:—'3ze-lû was a leal-hearted and sincere man, and the Book ends with this account of him. From the mention of the preparation of the rites on a great scale and of their high value at the beginning of the Book down to this tribute to 3ze-lû as understanding ceremonies, its whole contents show that what is valuable in the rites is the combination of the idea of what is right with the elegant and outward form as sufficient to remove from a man all perversity and increase what is good in his nature, without a multiplicity of forms which would injure the natural goodness and sincerity, and lead their practiser to a crooked perversity. Deep and far-reaching is the idea of it!'

BOOK IX. THE KIÃO THEH SĂNG

OR

THE SINGLE VICTIM AT THE BORDER SACRIFICES¹.

SECTION I.

1. At the border sacrifices a single victim was used, and at the altars to (the spirits of) the land and grain there was (the full complement of) three victims². When the son of Heaven went on his

¹ See the introductory notice, p. 26.

² The object of the statements here and some other paragraphs is to show that the degree of honour was expressed by the 'paucity' of the articles; compare last Book, Sect. i, paragraph 8. Perhaps the name *Kiào* (郊) in the title should be translated in the plural as the name for all the border sacrifices, or those offered in the suburbs of the capital. There were several of them, of which the greatest was that at the winter solstice, on the round hillock in the southern suburb. Besides this, there was in the first month the border sacrifice for 'grain,'—to pray for the blessing of Heaven on the agricultural labours of the year, in which *Hâu K'i*, the father of the line of *K'âu*, and its 'Father of Husbandry,' was associated by that dynasty. There were also the five seasonal border sacrifices, of which we have mention in the different parts of Book IV, though, so far as what is said in them goes, the idea of Heaven falls into the background, and the five deified ancient sovereigns come forward as so many *T'is*. In the first month of summer there was, further, a great border sacrifice for rain, and in the last month of autumn a great border sacrifice of thanksgiving. 'Of all these border sacrifices,' say the *K'ien-lung* editors, 'there is clear evidence in classical texts.' Into the discussions growing out of them about 'one Heaven,' or 'five Heavens,' and about their origin, it is not necessary that I should enter; it would be foreign, indeed, to my object in this translation to do so. The

inspecting tours to the princes, the viands of the feast to him were composed of a (single) calf; and when they visited him, the rites with which he received them showed the three regular animals. (The feasting of him in such a manner) was to do honour to the idea of sincerity¹. Therefore if the animal happened to be pregnant, the son of Heaven did not eat of it, nor did he use such a victim in sacrificing to God².

2. The horses of the Grand carriage had one ornamental tassel at the breast; those of the carriages that preceded had three; and those of the carriages that followed had five³. There were the blood at the border sacrifice; the raw flesh in the great offering of the ancestral temple; the sodden flesh where spirits are presented thrice; and the roast meat where they are presented once³:—these were expressive of the greatest reverence, but the taste was not valued; what was held in honour was the scent of the air⁴. When the princes appeared as guests,

border sacrifices were the greatest religious or ceremonial services of the ancient Chinese; and the fact to which our attention is called in this Book, is that at them there was used only a single victim.

¹ Why 'a calf?' 'Because of its guileless simplicity,' says Kâu Hsü of our eleventh century; earlier than K'ü Hsî, who adopted his explanation. The calf, whether male or female, has not yet felt the appetency of sex, and is unconscious of any 'dissipation.' This is a refinement on the Hebrew idea of the victim lamb, 'without blemish.'

² This might be referred to his unwillingness to take life unnecessarily, but for what has just been said about the calf.

³ See last Book, Sect. i, 8; and Sect. ii, 6.

⁴ Little is said on the meaning of this statement, which appears to say that the most subtle and ethereal thing in sacrifices, the

they were presented with herb-flavoured spirits, because of their fragrance; at the great entertainment to them the value was given to (the preliminary) pieces of flesh prepared with cinnamon and nothing more.

3. At a great feast (to the ruler of another state), the ruler (who was the host) received the cup seated on his three mats. (On occasion of a visit through a minister or Great officer) when the cup was thrice presented, the ruler received it on a single mat:—so did he descend from the privilege of his more honourable rank, and assume the lower distinction (of his visitor).

4. In feasting (the orphaned young in spring) and at the vernal sacrifice in the ancestral temple they had music; but in feeding (the aged) and at the autumnal sacrifice they had no music:—these were based in the developing and receding influences (prevalent in nature). All drinking serves to nourish the developing influence; all eating to nourish the receding influence. Hence came the different character of the vernal and autumnal sacrifices; the feasting the orphaned young in spring, and the feeding the aged in autumn:—the idea was the same. But in the feeding and at the autumnal sacrifice there was no music. Drinking serves to nourish the developing influence and therefore is accompanied with music. Eating serves to nourish the receding influ-

'sweet savour' of the offerings, was the most important, and should excite the worshippers to add to their sincerity and reverence all other graces of character. The same lesson was given to the feudal princes when they were entertained as visitors at the royal court.

ence, and therefore is not accompanied with music. All modulation of sound partakes of the character of development.

5. The number of tripods and meat-stands was odd, and that of the tall dishes of wood and bamboo was even¹; this also was based in the numbers belonging to the developing and receding influences. The stands were filled with the products of the water and the land. They did not dare to use for them things of extraordinary flavours² or to attach a value to the multitude and variety of their contents, and it was thus that they maintained their intercourse with spiritual intelligences.

6. When the guests had entered the great door³, the music struck up the Sze Hsiâ⁴, showing the blended ease and respect (of the king). (While feasting), at the end of (every) cup the music stopped (for a moment), a practice of which Confucius often indicated his admiration. When the last cup had been put down, the performers ascended the hall, and sang;—exhibiting the virtues (of host and guests). The singers were (in the hall) above, and the organists were (in the court) below;—the honour being thus

¹ Every Chinese scholar knows that odd numbers all belong to the category of Yang (——), and even numbers to that of Yin (— —).

² The meaning of this clause is uncertain, and I have not found it anywhere sufficiently explained, considering what the characters are (褻味).

³ This paragraph and the next describe ceremonies on occasion of the king's reception of the great nobles, when they appeared in great force at court. With this the expurgated Lî Kî begins.

⁴ See note 1, page 413.

given to the human voice. Music comes from the expanding influence (that operates in nature); ceremonies from the contracting. When the two are in harmony, all things obtain (their full development).

7. There were no fixed rules for the various articles of tribute. They were the different products of the different territories according to their several suitabilities, and were regulated by their distances (from the royal domain). The tortoises were placed in front of all the other offerings;—because (the shell) gave the knowledge of the future. The bells succeeded to them;—because of their harmony, they were a symbol of the union of feeling that should prevail¹. Then there were the skins of tigers and leopards;—emblems of the fierce energy with which insubordination would be repressed; and there were the bundles of silks with disks of jade on them,—showing how (the princes) came to (admire and experience) the virtue (of the king).

8. (The use of) a hundred torches in his courtyard began with duke Hwan of *K'hi*. The playing of the Sze Hsiâ (at receptions) of Great officers began with *K'ao Wăn-jze*².

9. When appearing at another court, for a Great officer to have a private audience was contrary to propriety. If he were there as a commissioner, bearing

¹ As we have no account anywhere of bells, made, being sent as tribute, many understand the name as merely = 'metal.'

² This and the five paragraphs that follow seem the work of another hand, and are not in the expurgated *K'ī*. Duke Hwan was the first and greatest of 'the five presiding princes' of the *K'hun K'hiū* period. He died B.C. 643. *K'ao Wăn-jze* was a Great officer and chief minister of *Šin* about a century after. The king alone might have a hundred torches in his courtyard.

his own prince's token of rank, this served as his credentials. That he did not dare to seek a private audience showed the reverence of his loyalty. What had he to do with the tribute-offerings in the court of the other prince that he should seek a private audience? The minister of a prince had no intercourse outside his own state, thereby showing how he did not dare to serve two rulers.

10. For a Great officer to receive his ruler to an entertainment was contrary to propriety. For a ruler to put to death a Great officer who had violently exercised his power was (held) an act of righteousness; and it was first seen in the case of the three Hwan¹.

The son of Heaven did not observe any of the rules for a visitor or guest;—no one could presume to be his host. When a ruler visited one of his ministers, he went up to the hall by the steps proper to the master;—the minister did not presume in such a case to consider the house to be his own. According to the rules for audiences, the son of Heaven did not go down from the hall and meet the princes. To descend from the hall and meet the princes, was an error on the part of the son of Heaven, which began with king Í², and was afterwards observed.

¹ The 'three Hwan' intended here were three sons of duke Hwan' of Lû, known as *K'ing-fû*, *Yâ*, and *Kî-yû*; see the 30 *Kwan*, and *Kung-yang*, on the last year of duke *Kwang*. Instances of the execution of strong and insubordinate officers in different states, more to the point, had occurred before; but the writer had in mind only the history of Lû.

² Í was the ninth of the sovereigns of *Kâu* (B.C. 894–879); with him appeared the first symptoms of decline in the dynasty.

11. For the princes to suspend (their drums and bells) in four rows like the walls of an apartment (after the fashion of the king), and to use a white bull in sacrificing¹; to strike the sonorous jade; to use the red shields with their metal fronts and the cap with descending tassels in dancing the Tâ-wû; and to ride in the grand chariot:—these were usages which they usurped. The towered gateway with the screen across the path, and the stand to receive the emptied cups; the axes embroidered on the inner garment with its vermilion colour:—these were usurpations of the Great officers. Thus, when the son of Heaven was small and weak, the princes pushed their usurpations; and when the Great officers were strong, the princes were oppressed by them. In this state (those officers) gave honour to one another as if they had been of (high) degree; had interviews with one another and made offerings; and bribed one another for their individual benefit: and thus all usages of ceremony were thrown into disorder. It was not lawful for the princes to sacrifice to the king to whom they traced their ancestry, nor for the Great officers to do so to the rulers from whom they sprang. The practice of having a temple to such rulers in their private families, was contrary to propriety. It originated with the three Hwan².

12. The son of Heaven³ preserved the descend-

¹ That a white bull was used in Lî in sacrificing to the duke of Kâu, appears from the fourth of the Praise Odes of Lî. See vol. iii, p. 343.

² These must be the three families of Lî, so powerful in the time of Confucius, all descended from duke Hwan. The expression 'in this (state)' shows that the writer was a man of Lî.

³ We must think of this 'son of Heaven' as the founder of a

ants of (the sovereigns of) the two (previous) dynasties, still honouring the worth (of their founders). But this honouring the (ancient) worthies did not extend beyond the two dynasties.

13. Princes did not employ as ministers refugee rulers¹. Hence anciently refugee rulers left no son who continued their title.

14. A ruler stood with his face towards the south, to show that he would be (in his sphere) what the influence of light and heat was (in nature). His ministers stood with their faces to the north, in response to him. The minister of a Great officer did not bow his face to the ground before him, not from any honour paid to the minister, but that the officer might avoid receiving the homage which he had paid himself to the ruler.

15. When a Great officer was presenting (anything to his ruler), he did not do so in his own person; when the ruler was making him a gift, he did not go to bow in acknowledgment to him:—that the ruler might not (have the trouble of) responding to him.

16. When the villagers were driving away pestilential influences, Confucius would stand at the top of his eastern steps, in his court robes, to keep the spirits (of his departed) undisturbed in their shrines².

new dynasty. Thus it was that king Wû of Kâu enfeoffed the duke of Sung as representing the kings of Shang, and the rulers of Kû as representing those of Hsiâ.

¹ Rulers expelled from their own state. But the princes might employ their sons as ministers, who ceased to be named from their former dignity.

² See the Confucian Analects X, 10, 2, and note. Dr. Williams (on 禘) says that the ceremony is now performed by the Board of Rites ten days before the new year.

17. Confucius said, 'The practice of archery to the notes of music (is difficult). How shall the archer listen, and how shall he shoot, (that the two things shall be in harmony)?'

Confucius said, 'When an officer is required to shoot, if he be not able, he declines on the ground of being ill, with reference to the bow suspended at the left of the door (at his birth)¹.'

18. Confucius said, 'There are three days' fasting on hand. If one fast for the first day, he should still be afraid of not being (sufficiently) reverent. What are we to think of it, if on the second day he beat his drums²?'

19. Confucius said, 'The repetition of the sacrifice next day inside the Khû gate; the searching for the spirits in the eastern quarter; and the holding the market in the morning in the western quarter:—these all are errors.'

20. At the Shê, they sacrificed to (the spirits of) the land, and on the tablet rested the power of the darker and retiring influence of nature. The ruler stands (in sacrificing) with his face to the south at the foot of the wall on the north, responding to the idea of that influence as coming from the north. A *kiâ* day is used (for the sacrifice),—to employ a commencing day (in the Cycle)³.

¹ Every gentleman was supposed to learn archery as one of the 'six liberal arts;' and a bow was suspended near the door on the birth of a boy in recognition of this. The excuse in the paragraph is a lame one. See the 'Narratives of the School,' article 28; and Book XLIII, 19.

² 'Narratives of the School,' XLIV, 9.

³ There are of course six decades of days in the Cycle, each beginning with a *kiâ* day.

The great Shê altar of the son of Heaven was open to receive the hoarfrost, dew, wind, and rain, and allow the influences of heaven and earth to have full development upon it. For this reason the Shê altar of a state that had perished was roofed in, so that it was not touched by the brightness and warmth of Heaven. The altar (of Yin) at Po¹ had an opening in the wall on the north, so that the dim and cold (moon) might shine into it.

21. In the sacrifice at the Shê altars they dealt with the earth as if it were a spirit. The earth supported all things, while heaven hung out its brilliant signs. They derived their material resources from the earth; they derived rules (for their courses of labour) from the heavens. Thus they were led to give honour to heaven and their affection to the earth, and therefore they taught the people to render a good return (to the earth). (The Heads of) families provided (for the sacrifice to it) at the altar in the open court (of their houses); in the kingdom and the states they did so at the Shê altars; showing how it was the source (of their prosperity).

When there was a sacrifice at the Shê altar of a village², some one went out to it from every house. When there was such a sacrifice in preparation for a hunt, the men of the state all engaged in it. When there was such a sacrifice, from the towns, small and large, they contributed their vessels of rice, thereby

¹ Po had been the capital of the Shang dynasty. The site was in the present Ho-nan; changed more than once, but always retaining the name. We have the Northern, the Southern, and the Western Po.

² See page 259, paragraph 7.

expressing their gratitude to the source (of their prosperity) and going back in their thoughts to the beginning (of all being).

22. In the last month of spring¹, the fire star having appeared, they set fire to (the grass and brushwood). When this was done, they reviewed the chariots and men, numbering the companies of a hundred and of five. Then the ruler in person addressed them in front of the Shê altar, and proceeded to exercise their squadrons, now wheeling to the left, now wheeling to the right, now making them lie down, now making them rise up; and observing how they practised these evolutions. When the game came in sight and the desire of capturing it was exerted, (he watched) to see that (the hunters) did not break any of the rules (for their proceedings). It was thus sought to bring their wills into subjection, and make them not pursue the animals (in an irregular way). In this way such men conquered in fight, and such sacrificing obtained blessing.

SECTION II.

1. The son of Heaven, in his tours (of Inspection) to the four quarters (of the kingdom), as the first thing (on his arrival at each) reared the pile of wood (and set fire to it)².

¹ Perhaps 'the last month' should be 'the second month.' There is much contention on the point.

² This paragraph is not in the expurgated Lî. It does seem out of place, for the book goes on to speak of the border or suburban sacrifices presented in the vicinity of the capital, and having nothing to do with the tours of Inspection, of which we

2. At the (Great) border sacrifice, he welcomed the arrival of the longest day. It was a great act of thanksgiving to Heaven, and the sun was the chief object considered in it¹. The space marked off for it was in the southern suburb;—the place most open to the brightness and warmth (of the heavenly

first read in the Canon of Shun, in the Shû. Those tours, however, were understood to be under the direction of Heaven, and the lighting of the pile of wood, on reaching the mountain of each quarter, is taken as having been an announcement to Heaven of the king's arrival.

¹ P. Callery has here the following note:—'Il résulte de ce passage et de plusieurs autres des chapitres suivants, que dès les temps les plus anciens, les Chinois rendaient au soleil un véritable culte, sans même y supposer un esprit ou génie dont il fût la demeure, ainsi qu'ils le faisaient pour les montagnes, les rivières et tous les autres lieux auxquels ils offraient des sacrifices. De nos jours encore on sacrifie au soleil et à la lune; mais c'est plutôt un acte officiel de la part des autorités, qu'une pratique de conviction, car le peuple Chinois n'a pas, comme les Japonais, une grande dévotion pour l'astre du jour. Voyez la fin du chapitre XVIII.'

The text conveys no idea to me of such an ancient worship, but I call the attention of the reader to Callery's view. The other passages to which he refers will be noticed as they occur. For my, 'and the sun was the principal object regarded in it,' he says, 'C'est le soleil qui est le principal objet (des adorations).' The original text is simply 而主日. I let my translation stand as I first made it; but on a prolonged consideration, I think, it would be more accurate to say, 'and the sun was considered (for the occasion) as the residence of (the spirit of) Heaven.' Such an acceptance of 主 is quite legitimate. The sun became for the time the 'spirit-tablet (神主)' of Heaven. Fang K'ueh says:—'(The Son of Heaven) was welcoming the arrival of the longest day, and therefore he regarded the sun as the residence (for the time) of the spirit of Heaven. That spirit could not be seen; what could be looked up to and beheld were only the sun, moon, and stars.'

influence). The sacrifice was offered on the ground which had been swept for the purpose;—to mark the simplicity (of the ceremony). The vessels used were of earthenware and of gourds;—to emblem the natural (productive power of) heaven and earth. The place was the suburb, and therefore the sacrifice was called the suburban or border. The victim was red, that being the colour preferred by the (*Káu*) dynasty; and it was a calf;—to show the estimation of simple sincerity.

3. For (all) sacrifices in the border they used a *hsin day*¹; because when *Káu* first offered the border sacrifice, it was the longest day, and its name began with *hsin*.

4. When divining about the border sacrifice, (the king) received the reply in the fane of his (great) ancestor, and the tortoise-shell was operated on in that of his father;—honour being thus done to his ancestor, and affection shown to his father. On the day of divination, he stood by the lake², and listened himself to the declarations and orders which were

¹ The mention of the 'hsin day' requires that we should understand *xiào* (郊) here of other sacrifices so called, and not merely of the great one at the winter solstice. The *K'ien-lung* editors say:—'The border sacrifices for which they used the *hsin* days were those at which they prayed for a good year. They used such a day, because when king *Wû* offered his great sacrifice after the battle of *Mû-yêh*, and announced the completion of his enterprise, the day was *hsin-hâi*, and from it dated *Káu's* possession of the kingdom, and the *hsin* days became sacred days for the dynasty.' There were of course three *hsin* days in every month.

² The 'lake' here must be a name for the royal college with the water round it. So *Lû Tien* and others explain it (澤蓋學)

delivered¹,—showing an example of receiving lessons and reproof. (The officers) having communicated to him the orders (to be issued), he gives warning notice of them to all the officers (of a different surname from himself), inside the Khû gate (of the palace), and to those of the same surname, in the Grand temple.

5. On the day of the sacrifice, the king in his skin cap waits for the news that all is ready,—showing the people how they ought to venerate their superiors. Those who were engaged in mourning rites did not wail nor venture to put on their mourning dress. (The people) watered and swept the road, and turned it up afresh with the spade; at (the top of) the fields in the neighbourhood they kept torches burning,—thus without special orders complying with (the wish of) the king².

6. On that day, the king assumed the robe with the ascending dragons on it as an emblem of the heavens³. He wore the cap with the pendants of jade-pearls, to the number of twelve⁴, which is the

官辟雍), and Yüan Yüan's dictionary with reference to this paragraph, defines it as 'the place where they practised ceremonies.'

¹ By the officers as the result of the divination.

² It was an established custom that they should do so.

³ 'The robe with the dragons on it,'—Kwän (袞),—is thus described in the dictionary. But there must have been also some emblazonry of the heavenly figures on it also; otherwise it would not have emblemized the heavens. But I have not been able to find this in any dictionary.

⁴ Having now changed the skin cap mentioned in the preceding paragraph.

number of heaven¹. He rode in the plain carriage, because of its simplicity. From the flag hung twelve pendants, and on it was the emblazonry of dragons, and the figures of the sun and moon, in imitation of the heavens. Heaven hangs out its brilliant figures, and the sages imitated them. This border sacrifice is the illustration of the way of Heaven.

7. If there appeared anything infelicitous about the victim intended for God, it was used for that intended for Kî². That intended for God required to be kept in its clean stall for three months. That intended for Kî simply required to be perfect in its parts. This was the way in which they made a distinction between the spirits of Heaven and the manes of a man³.

8. All things originate from Heaven; man originates from his (great) ancestor. This is the reason

¹ 'The heavenly number;'—with reference, I suppose, to the twelve months of the year.

² Kî, better known as Hâu Kî, 'the prince, the minister of agriculture,' appears in the Shû as Shun's minister of agriculture (Kî 棄, vol. iii, pp. 42, 43), and one of the principal assistants of Yü, in his more than Herculean achievement (vol. iii, pp. 56-58); and in the Shih as the father of agriculture (vol. iii, pp. 396-399). To him the kings of Kâu traced their lineage, and they associated him with God at the Great border sacrifice. See the ode to him, so associated, vol. iii, p. 320. In that service there was thus the expression of reverence for God and of filial piety, the second virtue coming in as the complement of the other. It would seem to be implied that they used the ox for Kî for the blemished one.

³ By 'spirit' and 'manes' I have endeavoured to come as near as I could to the different significance of the characters shān (神) and kwei (鬼).

why *K'î* was associated with God (at this sacrifice). In the sacrifices at the border there was an expression of gratitude to the source (of their prosperity and a going back in their thoughts to the beginning of (all being).

9. The great *k'â* sacrifice of the son of Heaven consisted of eight (sacrifices). This sacrifice was first instituted by Yin *K'hi*¹. (The word) *k'â* expresses the idea of searching out. In the twelfth month of a year, they brought together (some of) all the productions (of the harvest), and sought out (the authors of them) to present them to them as offerings.

10. In the *k'â* sacrifice, the principal object contemplated was the Father of Husbandry. They also presented offerings to (ancient) superintendents of husbandry, and to the (discoverers of the) various grains, to express thanks for the crops which had been reaped.

They presented offerings (also) to the (representatives of the ancient inventors of the overseers of the) husbandmen, and of the buildings marking out the boundaries of the fields, and of the birds and beasts. The service showed the highest sentiments of benevolence and of righteousness.

The ancient wise men had appointed all these agencies, and it was felt necessary to make this

¹ Who this Yin *K'hi* was is unknown. *K'ang* thought he was an ancient sovereign. The *K'ien-lung* editors seem to prove in opposition to him and others that he was the minister of some ancient sovereign. His descendants were subordinate ministers under *K'au*, having to do with sacrifice. They are mentioned at the end of the 37th Book of the *K'au Li*.

return to them. They met the (representatives of the) cats, because they devoured the rats and mice (which injured the fruits) of the fields, and (those of) the tigers, because they devoured the (wild) boars (which destroyed them). They met them and made offerings to them. They offered also to (the ancient Inventors of) the dykes and water-channels;—(all these were) provisions for the husbandry¹.

11. They said,—

‘May the ground no sliding show,
Water in its channels flow,
Insects to keep quiet know;
Only in the fens weeds grow!’

They presented their offerings in skin caps and white robes;—in white robes to escort the closing year (to its grave). They wore sashes of dolychos cloth, and carried staffs of hazel,—as being reduced forms of mourning. In the *kâ* were expressed the highest sentiments of benevolence and righteousness.

¹ This and the other paragraphs down to 13 about the *kâ* sacrifice are not in the expurgated copies. It is difficult to understand what it really was. What is said of it leads us to think of it as a Chinese Saturnalia at the end of the year, when all the crops had been gathered in, and the people abandoned themselves to license and revel under the form of sacrificial services. ‘The Father of Husbandry’ was probably Shǎn Nǎng, the successor of Fû-hsí; see vol. iii, pp. 371, 372. ‘The Superintendents of Husbandry’ would be Hâu Kí and others, though Hâu Kí appears in the Shih as really the father of agriculture. ‘The overseer’ occurs in the Shih (vol. iii, p. 371 et al.) as ‘the surveyor of the fields.’ The commentators, so far as I have read, are very chary of giving us any information about the offerings to ‘the cats and tigers.’ Kiang Káo-hsí says, ‘They met the cats and tigers, that is, their spirits (迎貓虎, 卽其神也).’

(After this)¹ they proceeded to sacrifice in yellow robes and yellow caps,—releasing the field-labourers from the toils (of the year). Countrymen wore yellow hats, which were made of straw.

12. The Great Netter² was the officer who had the management for the son of Heaven of his birds and (captured) beasts, and to his department belonged (all such creatures) sent by the princes as tribute. (Those who brought them)³ wore hats of straw or bamboo splints, appearing, by way of honour to it, in that country dress. The Netter declined the deer and women (which they brought)⁴, and announced to the visitors the message (of the king) to this effect, that they might warn the princes with it:—

‘He who loves hunting and women,
Brings his state to ruin.’

The son of Heaven planted gourds and flowering plants; not such things as might be reaped and stored⁵.

¹ This seems to introduce another service, following that of the *kâ*. It is understood to be the *lâ* sacrifice of *K'hin*, described on page 300, paragraph 19.

² We find ‘the Netter’ called Lo (羅氏), as if Lo had become the surname of the family in which the office was hereditary, as the last but one of the departments described in the 30th Book of the *K'âu Lî*.

³ Those would be ‘Great officers’ from the various states, personating for the occasion hunters or labouring men.

⁴ The ‘deer’ would be taken in the chase; the ‘women,’ attractive captives, taken in war. But they would not have such to present from year to year. We can say nothing more about this article of tribute.

⁵ Many take this concluding sentence as part of the king’s message. The *K'ien-lung* editors decide against that view; its meaning is that the king never farmed for his own gain.

13. The *kâ* with its eight sacrifices served to record (the condition of the people) throughout all the quarters (of the country). If in any quarter the year had not been good, it did not contribute to those services,—out of a careful regard to the resources of the people. Where the labours of a good year had been successfully completed, they took part in them,—to give them pleasure and satisfaction. All the harvest having by this time been gathered, the people had nothing to do but to rest, and therefore after the *kâ* wise (rulers) commenced no new work¹.

14. The pickled contents of the ordinary dishes were water-plants produced by the harmonious powers (of nature); the brine used with them was from productions of the land. The additional dishes contained productions of the land with the brine from productions of the water.

The things in the dishes on stands were from both the water and land. They did not venture to use in them the flavours of ordinary domestic use, but variety was considered admirable. It was in this way that they sought to have communion with the spirits; it was not intended to imitate the flavours of food².

15. The things set before the ancient kings served as food, but did not minister to the pleasures of the palate. The dragon-robe, the tasseled cap, and

¹ This paragraph treats of the *kâ* as celebrated in the states.

² The conclusion of this paragraph leads us to take all the dishes spoken of in it as containing sacrificial offerings. It would take too long to discuss all that is said about the 'regular' and the 'additional' dishes in the first part.

the great carriage served for display, but did not awaken a fondness for their use.

The various dances displayed the gravity of the performers, but did not awaken the emotion of delight. The ancestral temple produced the impression of majesty, but did not dispose one to rest in it. Its vessels might be employed (for their purposes in it), but could not be conveniently used for any other. The idea which leads to intercourse with spiritual Beings is not interchangeable with that which finds its realisation in rest and pleasure.

16. Admirable as are the spirits and sweet spirits, a higher value is attached to the dark spirit and the bright water¹,—in order to honour that which is the source of the five flavours. Beautiful as is the elegant embroidery of robes, a higher value is set on plain, coarse cloth,—going back to the commencement of woman's work. Inviting as is the rest afforded by the mats of fine rushes and bamboos, the preference is given to the coarse ones of reeds and straw,—distinguishing the (character of the service in which they were employed). The Grand soup is unseasoned,—in honour of its simplicity. The Grand symbols of jade have no engraving on them,—in admiration of their simple plainness. There is the beauty of the red varnish and carved border

¹ We have seen, before, that 'the dark spirit' is water. Was there a difference between this and 'the bright water?' The *K'ien-lung* editors think so, and refer to the functions of the Sze Hsüan officer (司烜氏, *K'au Li*, Book XXXVII, 41-44), who by means of a mirror drew the bright water from the moon. How he did so, I do not understand. The object of the writer in this part of the section is to exhibit the value of simple sincerity in all religious services.

(of a carriage), but (the king) rides in a plain one,—doing honour to its plainness. In all these things it is simply the idea of the simplicity that is the occasion of the preference and honour. In maintaining intercourse with spiritual and intelligent Beings, there should be nothing like an extreme desire for rest and ease in our personal gratification. It is this which makes the above usages suitable for their purpose.

17. The number of the tripods and meat-stands was odd, but that of the tall dishes of wood and bamboo was even,—having regard to the numbers belonging to the developing and receding influences of nature¹. The vase with the yellow eyes² was the most valued of all, and contained the spirit with the fragrant herbs. Yellow is the colour (of earth) which occupies the central place³. In the eye the energy (of nature) appears most purely and brilliantly. Thus the spirit to be poured out is in that cup, the (emblem of the) centre, and (the symbol of) what is most pure and bright appears outside⁴.

¹ See the fifth paragraph of Section i, and the note. It may be added here, after Khung Ying-tâ, that 'the tripod and stand contained the body of the victim, which, as belonging to an animal that moved, was of the category of Yang, but the dishes contained the products of trees and vegetables, which were of the category of Yin.'

² In pictures, this vase was figured with two eyes. They were carved on the substance of the vessel and then gilt, so as to appear yellow.

³ On the central place assigned to the element of earth and its yellow colour, see the supplementary section appended to Book IV, Section ii, Part iii.

⁴ P. Callery characterises the reasoning of this paragraph as 'puéril et grotesque;' and concludes a long note on it with the

18. When sacrificing to Heaven, the earth is swept, and the sacrifice presented on the ground,—from a regard to the simplicity of such an unartificial altar. Admirable as are the vinegar and pickles, suet boiled and produced through evaporation is preferred,—to do honour to the natural product of heaven. An ordinary knife might be employed (to kill the victim), but that fitted with bells is preferred,—giving honour to the idea thereby indicated; there is the harmony of sound, and then the cutting work is done.

SECTION III.

1. (As to) the meaning of (the ceremony of) capping¹:—The cap used for the first act of the service was of black cloth,—the cap of the highest antiquity. It was originally of (white) cloth, but the colour when it was used in fasting was dyed black. As to its strings, Confucius said, 'I have not heard anything about them.' This cap, after it had been once put upon (the young man), might be disused.

2. The son by the wife proper was capped by the eastern stairs (appropriate to the use of the master), to show how he was in their line of succes-

sentence:—'Je laisse à ceux qui peuvent suivre ce logographe dans le texte Chinois, le soin d'en saisir toutes les finesses; car, à mon sens, ce n'est qu'une ineptie.'

¹ These paragraphs about capping are not in the expurgated copy of the *Lî*, and many commentators, especially Wang of Shih-liang, would relegate them to Book XI. And they are not all easy to be understood. The capping was thrice repeated, and each time with a different cap. So much is clear. The names and forms of the caps in paragraph 3 have given rise to much speculation, from which I purposely abstain; nor do I clearly comprehend its relation to the threefold capping in the ceremony.

sion to him. The father handed him a cup in the guests' place (without receiving one in return). The capping showed that he had reached maturity. The using of three caps was to give greater importance (to the ceremony), and show its object more clearly. The giving the name of maturity in connexion with the ceremony was to show the reverence due to that name.

3. The wei-mâo was the fashion of Kâu; the kang-fû, that of Yin; and the mâu-tui, that of the sovereigns of Hsiâ. Kâu used the pien; Yin, the hsü; and Hsiâ, the shâu. The three dynasties all used the skin cap, with the skirt-of-white gathered up at the waist.

4. There were no observances peculiar to the capping (in the families) of Great officers, though there were (peculiar) marriage ceremonies. Anciently a man was fifty when he took the rank of a Great officer; how should there have been peculiar ceremonies at his cappings? The peculiar ceremonies at the cappings as used by the princes arose in the end of the Hsiâ dynasty.

5. The eldest son of the son of Heaven by his proper queen (was capped only as) an ordinary officer. There was nowhere such a thing as being born noble. Princes received their appointments on the hereditary principle, (to teach them) to imitate the virtue of their predecessors. Men received office and rank according to the degree of their virtue. There was the conferring of an honourable designation after death; but that is a modern institution. Anciently, there was no rank on birth, and no honorary title after death.

6. That which is most important in ceremonies is to understand the idea intended in them. While the idea is missed, the number of things and observances in them may be correctly exhibited, as that is the business of the officers of prayer and the recorders. Hence that may all be exhibited, but it is difficult to know the idea. The knowledge of that idea, and the reverent maintenance of it was the way by which the sons of Heaven secured the good government of the kingdom.

7. By the united action of heaven and earth all things spring up. Thus the ceremony of marriage is the beginning of a (line that shall last for a) myriad ages. The parties are of different surnames; thus those who are distant are brought together, and the separation (to be maintained between those who are of the same surname) is emphasised¹. There must be sincerity in the marriage presents; and all communications (to the woman) must be good. She should be admonished to be upright and sincere. Faithfulness is requisite in all service of others, and faithfulness is (specially) the virtue of a wife. Once mated with her husband, all her life she will not change (her feeling of duty to him), and hence, when the husband dies she will not marry (again)².

¹ I do not see how Callery translates here :—‘On rapproche ce qui était éloigné, et on unit ce qui était distinct.’ He says, however, in a note :—‘Ceci se rapporte à l’antique loi, encore en vigueur, qui interdit le mariage entre personnes d’un même nom, parce que lors même qu’il n’existe entre elles aucune trace de parenté, il est possible qu’elles proviennent de la même souche, et se trouvent ainsi sur la ligne directe, où les Chinois admettent une parenté sans fin.’

² This brief sentence about a woman not marrying again is not

8. The gentleman went in person to meet the bride, the man taking the initiative and not the woman,—according to the idea that regulates the relation between the strong and the weak (in all nature). It is according to this same idea that heaven takes precedence of earth, and the ruler of the subject.

9. Presents are interchanged before (the parties) see each other¹;—this reverence serving to illustrate the distinction (that should be observed between man and woman). When this distinction (between husband and wife) is exhibited, affection comes to prevail between father and son. When there is this affection, the idea of righteousness arises in the mind, and to this idea of righteousness succeeds (the observance of) ceremonies. Through those ceremonies there ensues universal repose. The absence of such distinction and righteousness is characteristic of the way of beasts.

10. The bridegroom himself stands by (the carriage of the bride), and hands to her the strap (to assist her in mounting²),—showing his affection. Having

in the expurgated copies. Callery, however, says upon it:—‘ Dans certains textes du Lî K'î, on trouve à la suite de ce passage une phrase qui restreint à la femme cette immutabilité perpétuelle dans le mariage. En effet, les lois Chinoises ont de tout temps permis à l'homme de se remarier après la mort de sa première femme, tandis que pour les veuves, les secondes noces ont toujours été plus ou moins flétries, ou par la loi, ou par l'usage.’

¹ Callery has for this:—‘ Les présents que porte l'époux dans ses visites.’ But the young people did not see each other till the day of the marriage.

² On the ‘strap’ to help in mounting the carriage, see p. 45, et al. Callery has here ‘les rênes.’ The text would seem to say that the bridegroom was himself driving, and handed the strap to help the other up; but that would have been contrary to all etiquette;

that affection, he seeks to bring her near to him. It was by such reverence and affection for their wives that the ancient kings obtained the kingdom. In passing out from the great gate (of her father's house), he precedes, and she follows, and with this the right relation between husband and wife commences. The woman follows (and obeys) the man:—in her youth, she follows her father and elder brother; when married, she follows her husband; when her husband is dead, she follows her son. 'Man' denotes supporter. A man by his wisdom should (be able to) lead others.

11. The dark-coloured cap, and the (preceding) fasting and vigil, (with which the bridegroom meets the bride, makes the ceremony like the service of) spiritual beings, and (the meeting of) the bright and developing and receding influences (in nature). The result of it will be to give the lord for the altars to the spirits of the land and grain, and the successors of the forefathers of the past;—is not the utmost reverence appropriate in it? Husband and wife ate together of the same victim,—thus declaring that they were of the same rank. Hence while the wife had (herself) no rank, she was held to be of the rank of her husband, and she took her seat according to the position belonging to him¹.

and they appear immediately, not sitting together, but following each other.

¹ It is exceedingly difficult to construe this sentence, nor do the commentators give a translator much help. Rendering *ad verbum*, all that we have is this:—'The dark-coloured cap, self-purification (and) abstinence; spiritual beings, Yin (and) Yang.' K'ang's explanation is very brief:—'The dark-coloured cap (was) the dress in sacrificing. Yin (and) Yang mean husband and wife.' I have

12. The old rule at sacrifices was to have the vessels (only) of earthenware and gourds; and when the kings of the three dynasties instituted the (partaking of the) victim, those were the vessels employed. On the day after the marriage, the wife, having washed her hands, prepared and presented (a sucking-pig) to her husband's parents; and when they had done eating, she ate what was left,—as a mark of their special regard. They descended from the hall by the steps on the west, while she did so by those on the east;—so was she established in the wife's (or mistress's) place.

13. At the marriage ceremony, they did not employ music,—having reference to the feeling of solitariness and darkness (natural to the separation from parents). Music expresses the energy of the bright and expanding influence. There was no congratulation on marriage;—it indicates how (one generation of) men succeeds to another¹.

tried to catch and indicate the ideas in the mind of the writer. Taken as I have done, the passage is a most emphatic declaration of the religious meaning which was attached to marriage. Dr. Medhurst (*Theology of the Chinese*, pp. 88, 89) has translated the greater part of the paragraph, but not very successfully, thus:—‘A black crown, with fasting and watching, is the way to serve the Kwei Shins, as well as the male and female principle of nature. The same is the case also (with regard to marriages which are contracted) with the view of obtaining some one to perpetuate the lares domestici (社稷); and principally respect obtaining successors for our ancestors:—can they therefore be conducted without reverence?’

¹ See p. 322, paragraph 20; where Confucius says that in a certain case the bridegroom's family has no music for three days, on the ground that the bridegroom had lost his parents, and sorrow was more suitable than mirth as he thought of their

14. At the sacrifices in the time of the lord of Yü the smell was thought most important. There were the offerings of blood, of raw flesh, and of sodden flesh ;—all these were employed for the sake of the smell.

15. Under the Yin, sound was thought most important. Before there was any smell or flavour, the music was made to resound clearly. It was not till there had been three performances of it that they went out to meet (and bring in) the victim. The noise of the music was a summons addressed to all between heaven and earth.

16. Under the *K'âu*, a pungent odour was thought most important. In libations they employed the smell of millet-spirits in which fragrant herbs had been infused. The fragrance, partaking of the nature of the receding influence, penetrates to the deep springs below. The libations were poured from cups with long handles of jade, (as if) to employ (also) the smell of the mineral. After the liquor was poured, they met (and brought in) the victim, having first diffused the smell into the unseen realm. *Artemisia* along with millet and rice having then been burned (with the fat of the victim), the fragrance penetrates through all the building. It was for this reason that, after the cup had been put down, they burnt the fat with the southernwood and millet and rice.

17. So careful were they on all occasions of sacri-

being gone. This statement was generalised by the writer ; but in the Shih, as in ordinary life, music is an accompaniment of marriage. See the paraphrase of the 'Amplification of the fourth of the *Khang-hsi* precepts.'

fice. The intelligent spirit returns to heaven ; the body and the animal soul return to the earth ; and hence arose the idea of seeking (for the deceased) in sacrifice in the unseen darkness and in the bright region above. Under the Yin, they first sought for them in the bright region ; under *Kâu*, they first sought for them in the dark.

18. They informed the officer of prayer in the apartment ; they seated the representative of the departed in the hall ; they killed the victim in the courtyard. The head of the victim was taken up to the apartment. This was at the regular sacrifice, when the officer of prayer addressed himself to the spirit-tablet of the departed. If it were (merely) the offering of search, the minister of prayer takes his place at the inside of the gate of the temple. They knew not whether the spirit were here, or whether it were there, or far off, away from all men. Might not that offering inside the gate be said to be a searching for the spirit in its distant place ?

19. That service at the gate was expressive of the energy of the search. The stand with the heart and tongue of the victim (set forth before the personator) was expressive of reverence. (The wish of the principal) for wealth (to those assisting him) included all happiness. The (presentation of the) head was (intended as) a direct (communication with the departed). The presence (of the representative) was that the spirit might enjoy (the offerings). The blessing (pronounced by him) was for long continuance, and comprehensive. The personator (seemed) to display (the departed).

20. The (examination of the) hair and the (taking

of the) blood was an announcement that the victim was complete within and without. This announcement showed the value set on its being perfect¹. The offering of the blood was because of the breath which is contained in it. They offered (specially) the lungs, the liver, and the heart, doing honour to those parts as the home of the breath.

21. In offering the millet and the glutinous millet, they presented the lungs along with it. In offering the various prepared liquors, they presented the bright water;—in both cases acknowledging their obligations to the dark and receding influence (in nature). In taking the fat of the inwards and burning it, and in taking the head up (to the hall), they made their acknowledgments to the bright and active influence.

22. In the bright water and the clear liquor the thing valued was their newness. All clarifying is a sort of making new. The water was called 'bright' because the principal in the service had purified it.

23. When the ruler bowed twice with his head to the ground, and, with breast bared, himself applied

¹ From the middle of paragraph 10 to 18 inclusive is not in the expurgated edition, which closes with the nineteenth paragraph and the half of the twenty-first. I need not quote Callery's translation of this portion, but he says on it:—'Ce passage est un de ceux qui se refusent le plus à la traduction, et qui renferment, au fond, le moins d'idées claires et raisonnables. L'auteur a voulu, ce me semble, donner une explication mystique à des mots et à des coutumes qui n'en étaient point susceptibles, et il lui est arrivé, comme à certains commentateurs bibliques du moyen âge, de faire un galimatias, auquel lui même, sans doute, ne comprenait rien.'—On what the author says about the hair and blood, compare vol. iii, page 370.

the knife, this expressed his extreme reverence. Yes, his extreme reverence, for there was submission in it. The bowing showed his submission; the laying the head on the ground did that emphatically; and the baring his breast was the greatest (outward) exhibition of the feeling.

24. When the sacrificer styled himself 'the filial son,' or 'the filial grandson,' he did so (in all cases) according to the meaning of the name. When he styled himself 'So and So, the distant descendant,' that style was used of (the ruler of) a state or (the Head of) a clan. (Though) there were the assistants at the service, the principal himself gave every demonstration of reverence and performed all his admirable service without yielding anything to any one.

25. The flesh of the victim might be presented raw and as a whole, or cut up in pieces, or sodden, or thoroughly cooked; but how could they know whether the spirit enjoyed it? The sacrificer simply showed his reverence to the utmost of his power.

26. (When the representative of the departed) had made the libation with the *kîâ* cup, or the horn, (the sacrificer) was told (to bow to him) and put him at ease. Anciently, the representative stood when nothing was being done; when anything was being done, he sat. He personated the spirit; the officer of prayer was the medium of communication between him and the sacrificer.

27. In straining (the new liquor) for the cup, they used the white (*mâo*) grass and obtained a clear cup. The liquor beginning to clear itself was further clarified by means of pure liquor. The juice

obtained by boiling aromatics (with the extract of millet) was clarified by mingling with it the liquor which had begun to clear itself:—in the same way as old and strong spirits are qualified by the brilliantly pure liquor or that which has begun to clear itself¹.

¹ He would be a bold man who would say that he had given a translation of this paragraph, which he was sure represented exactly the mind of the author. The interpretation given of it even by K'ang Hsüan is now called in question in a variety of points by most scholars; and the K'ien-lung editors refrain from concluding the many pages of various commentators, which they adduce on it, with a summary and exposition of their own judgment. Until some sinologist has made himself acquainted with all the processes in the preparation of their drinks at the present day by the Chinese, and has thereby, and from his own knowledge of the general subject, attained to a knowledge of the similar preparations of antiquity, a translator can only do the best in his power with such a passage, without being sure that it is the best that might be done.

In the *K'au Li*, Book V, 23-36, we have an account of the duties of the Director of Wines (酒正; Biot, 'Intendant des Vins'). Mention is made of 'the three wines (三酒),' which were employed as common beverages, and called shih k'iu (事酒), hsi k'iu (昔酒), and k'ing k'iu (清酒); in Biot, 'vin d'affaire, vin âgé, and vin clair.' Consul Gingell, in his useful translation of 'The Institutes of the K'au Dynasty Strung as Pearls' (London: Smith, Elder, and Co., 1852), calls them—'wine made specially for any particular occasion; wine which has become ripe; and old, clear, and fine wine.'

In addition to these three k'iu, the Director had to do with the five k'ei (五齊; Biot, 'les cinque sorts de vins sacrés'), and called fan k'ei (泛齊), li k'ei (醴齊), ang k'ei (盎齊), thi k'ei (緹齊), and k'han k'ei (沈齊); in Biot, after K'ang Hsüan, 'vin surnageant, vin doux, vin qui se clarifie, vin substantiel, vin reposé;' in Gingell, 'rice-water which has undergone

28. Sacrifices were for the purpose of prayer, or of thanksgiving, or of deprecation.

29. The dark-coloured robes worn during vigil and purification had reference to the occupation of the thoughts with the dark and unseen. Hence after the three days of purification, the superior man was sure (to seem) to see those to whom his sacrifice was to be offered¹.

fermentation, wine in which dregs have formed, wine in which the dregs have risen to the surface, wine in which the dregs have congealed, and of which the colour has become reddish, and pure clear wine in which the dregs are subsiding.' Whether Biot be correct or not in translating 𩇛 (perhaps should be read 𩇛, = 齋) 'vin sacré,' the five preparations so called were for use at sacrifices. 'They were,' say the *K'ien-lung* editors, 'for use at sacrifices, and not as ordinary drinks.' 'They were all thin, and unpalatable; for the cup, and not for the mouth.'

¹ The *K'ien-lung* editors say that from paragraph 14 to this, the compiler mentions promiscuously a great many particulars about the ancient sacrifices, the different places in which the services at them were performed, the things used in them, &c., showing how sincere and earnest those engaged in them must be to attain to the result mentioned in this last paragraph; and that this is the fundamental object of the whole treatise.

I have called attention to this promiscuous nature of the contents of many of the Books towards the end of them, in the introduction, page 34, as a characteristic of the collection.

BOOK X. THE NÊI 3EH
OR
THE PATTERN OF THE FAMILY¹.

SECTION I.

1. The sovereign and king orders the chief minister to send down his (lessons of) virtue to the millions of the people.

2. Sons², in serving their parents, on the first crowing of the cock, should all wash their hands and rinse their mouths, comb their hair, draw over it the covering of silk, fix this with the hair-pin, bind the hair at the roots with the fillet, brush the dust from that which is left free, and then put on their caps, leaving the ends of the strings hanging down. They should then put on their squarely made black jackets, knee-covers, and girdles, fixing in the last their tablets. From the left and right of the girdle they should hang their articles for use:—on the left side, the duster and handkerchief, the knife and whetstone, the small spike, and the metal speculum for getting fire from the sun; on the right, the archer's thimble for the thumb and the armlet, the tube for writing instruments, the knife-case, the larger spike, and the borer for getting fire from wood. They should put on their leggings, and adjust their shoe-strings.

¹ See the introductory notice, pp. 26, 27.

² The 'sons' here are young gentlemen of good families, shih (士), who might be employed as ordinary officers.

3. (Sons') wives should serve their parents-in-law as they served their own. At the first crowing of the cock, they should wash their hands, and rinse their mouths; comb their hair, draw over it the covering of silk, fix this with the hair-pin, and tie the hair at the roots with the fillet. They should then put on the jacket, and over it the sash. On the left side they should hang the duster and handkerchief, the knife and whetstone, the small spike, and the metal speculum to get fire with; and on the right, the needle-case, thread, and floss, all bestowed in the satchel, the great spike, and the borer to get fire with from wood. They will also fasten on their necklaces¹, and adjust their shoe-strings.

4. Thus dressed, they should go to their parents and parents-in-law. On getting to where they are, with bated breath and gentle voice, they should ask if their clothes are (too) warm or (too) cold, whether they are ill or pained, or uncomfortable in any part; and if they be so, they should proceed reverently to stroke and scratch the place. They should in the same way, going before or following after, help and support their parents in quitting or entering (the apartment). In bringing in the basin for them to wash, the younger will carry the stand and the elder the water; they will beg to be allowed to pour out

¹ 'Necklaces' is only a guess at the meaning. *Khán Hào* and others make the character to mean 'scent bags.' But this also is only a guess. There is nothing in its form to suggest such a meaning; and as many other critics point out, it is inconsistent with the usage in paragraph 5. These acknowledge that they do not understand the phrase 衿纓. See I, i, 3, 34, but the use of *ying* there is considered inappropriate here.

the water, and when the washing is concluded, they will hand the towel. They will ask whether they want anything, and then respectfully bring it. All this they will do with an appearance of pleasure to make their parents feel at ease. (They should bring) gruel, thick or thin, spirits or must, soup with vegetables, beans, wheat, spinach, rice, millet, maize, and glutinous millet,—whatever they wish, in fact; with dates, chestnuts, sugar and honey, to sweeten their dishes; with the ordinary or the large-leaved violets, leaves of elm-trees, fresh or dry, and the most soothing rice-water to lubricate them; and with fat and oil to enrich them. The parents will be sure to taste them, and when they have done so, the young people should withdraw¹.

5. Youths who have not yet been capped, and maidens who have not yet assumed the hair-pin, at the first crowing of the cock, should wash their hands, rinse their mouths, comb their hair, draw over it the covering of silk, brush the dust from that which is left free, bind it up in the shape of a horn, and put on their necklaces. They should all hang at their girdles² the ornamental (bags of) perfume; and as soon as it is daybreak, they should (go to) pay their respects (to their parents) and ask what they will eat

¹ The structure of this and the preceding sentences is easy enough, but it is not easy for a translator to assure himself that he is rendering every Chinese character by its correct equivalent in his own language.

² They hang on these instead of the useful appendages mentioned in paragraphs 2 and 3, as being too young to employ these. This determines the meaning of 長者 in the last clause as I have given it. Zottoli's rendering is:—'Si nondum comederint, tunc adjuturi majores inspectabunt praeeparata.'

and drink. If they have eaten already, they should retire; if they have not eaten, they will (remain to) assist their elder (brothers and sisters) and see what has been prepared.

6. All charged with the care of the inner and outer parts (of the house), at the first crowing of the cock, should wash their hands and mouths, gather up their pillows and fine mats, sprinkle and sweep out the apartments, hall, and courtyard, and spread the mats, each doing his proper work. The children go earlier to bed, and get up later, according to their pleasure. There is no fixed time for their meals.

7. From the time that sons receive an official appointment, they and their father occupy different parts of their residence. But at the dawn, the son will pay his respects, and express his affection by (the offer of) pleasant delicacies. At sunrise he will retire, and he and his father will attend to their different duties. At sundown, the son will pay his evening visit in the same way.

8. When the parents wish to sit (anywhere), the sons and their wives should carry their mats, and ask in what direction they shall lay them. When they wish to lie down, the eldest among them should carry the mats, and ask where they wish to place their feet, while the youngest will carry a (small) bench for them to lean on while they stretch out their legs. (At the same time) an attendant will place a stool by them. They should take up the mat on which they had been lying and the fine mat over it, hang up the coverlet, put the pillow in its case, and roll up the fine mat and put it in its cover.

9. (Sons and their wives) should not move the clothes, coverlets, fine mats, or undermats, pillows, and stools of their parents¹; they should reverently regard their staffs and shoes, but not presume to approach them; they should not presume to use their vessels for grain, liquor, and water, unless some of the contents be left in them; nor to eat or drink any of their ordinary food or drink, unless in the same case.

10. While the parents are both alive, at their regular meals, morning and evening, the (eldest) son and his wife will encourage them to eat everything, and what is left after all, they will themselves eat². When the father is dead, and the mother still alive, the eldest son should wait upon her at her meals; and the wives of the other sons will do with what is left as in the former case. The children should have the sweet, soft, and unctuous things that are left.

11. When with their parents, (sons and their wives), when ordered to do anything, should immediately respond and reverently proceed to do it. In going forwards or backwards, or turning round, they should be careful and grave; while going out or coming in, while bowing or walking, they should not presume to eructate, sneeze, or cough, to yawn or stretch themselves, to stand on one foot, or to lean against anything, or to look askance. They should not dare to spit or snivel, nor, if it be cold, to put on more clothes, nor, if they itch anywhere, to scratch

¹ That is, the parents of the husband, and parents-in-law of the wife.

² 'That nothing,' says Khung Ying-tâ, 'may be served up again.'

themselves. Unless for reverent attention to something¹, they should not presume to unbare their shoulders or chest. Unless it be in wading, they should not hold up their clothes. Of their private dress and coverlet, they should not display the inside. They should not allow the spittle or snivel of their parents to be seen². They should ask leave to rinse away any dirt on their caps or girdles, and to wash their clothes that are dirty with lye that has been prepared for the purpose; and to stitch together, with needle and thread, any rent.

Every five days they should prepare tepid water, and ask them to take a bath, and every three days prepare water for them to wash their heads. If in the meantime their faces appear dirty, they should heat the water in which the rice has been cleaned, and ask them to wash with it; if their feet be dirty, they should prepare hot water, and ask them to wash them with it. Elders in serving their youngers, and the low in serving the noble, should all observe these rules.

12. The men should not speak of what belongs to the inside (of the house), nor the women of what belongs to the outside. Except at sacrifices and funeral rites, they should not hand vessels to one another. In all other cases when they have occasion to give and receive anything, the woman should receive it in a basket. If she have no basket, they should both sit down, and the other put the thing on

¹ As for archery. The meaning is, I suppose, that none of the things mentioned should be seen or known, while they are waiting on their parents.

² But instantly wipe it off, according to *Khẩn Hào*.

the ground, and she then take it up. Outside or inside¹, they should not go to the same well, nor to the same bathing-house. They should not share the same mat in lying down; they should not ask or borrow anything from one another; they should not wear similar upper or lower garments. Things spoken inside should not go out, words spoken outside should not come in. When a man goes into the interior of the house, he should not whistle nor point. If he have occasion to move in the night, he should use a light; and if he have no light, he should not stir. When a woman goes out at the door, she must keep her face covered. She should walk at night (only) with a light; and if she have no light, she should not stir. On the road, a man should take the right side, and a woman the left.

13. Sons and sons' wives, who are filial and reverential, when they receive an order from their parents should not refuse, nor be dilatory, to execute it². When (their parents) give them anything to eat or drink, which they do not like, they will notwithstanding taste it and wait (for their further orders); when they give them clothes, which are not to their mind, they will put them on, and wait (in the same way)³. If (their parents) give them anything to do, and then employ another to take their place,

¹ Zottoli has for this—'viri mulieresque.' The writer is speaking of men and women, indeed; but the characters have reference to place, and = 'out of the house or in it.'

² That is, they will not presume on any indulgence which they might expect from the impression made by their general character and behaviour.

³ 'Orders,' consequent on their parents' seeing that the food or garment is not to their mind.

although they do not like the arrangement, they will in the meantime give it into his hands and let him do it, doing it again, if it be not done well.

14. When the sons and their wives are engaged with laborious tasks, although (their parents) very much love them, yet they should let them go on with them for the time ;—it is better that they take other occasions frequently to give them ease.

When sons and their wives have not been filial and reverential, (the parents) should not be angry and resentful with them, but endeavour to instruct them. If they will not receive instruction, they should then be angry with them. If that anger do no good, they can then drive out the son, and send the wife away, yet not publicly showing why they have so treated them¹.

15. If a parent have a fault, (the son) should with bated breath, and bland aspect, and gentle voice, admonish him. If the admonition do not take effect, he will be the more reverential and the more filial ; and when the father seems pleased, he will repeat the admonition. If he should be displeased with this, rather than allow him to commit an offence against any one in the neighbourhood or countryside, (the son) should strongly remonstrate. If the parent be angry and (more) displeased, and beat him till the blood

¹ This last sentence is enigmatical in the original text. Zottoli says :—‘ Si non possint coerceri, filium ejice nurum exclude, quin tamen patefacius agendi morem ;’ adding as an explanation of that ‘ agendi morem,’ ‘ siquidem eos haud certe in finem sic ejectos voles.’ Different views of the Chinese have been given by different critics ; and it would not be difficult to add to their number.

flows, he should not presume to be angry and resentful, but be (still) more reverential and more filial.

16. If parents have a boy born (to the father) by a handmaid, or the son or grandson of one of his concubines, of whom they are very fond, their sons should after their death, not allow their regard for him to decay so long as they live.

If a son have two concubines, one of whom is loved by his parents, while he himself loves the other, yet he should not dare to make this one equal to the former whom his parents love, in dress, or food, or the duties which she discharges, nor should he lessen his attentions to her after their death. If he very much approves of his wife, and his parents do not like her, he should divorce her¹. If he do not approve of his wife, and his parents say, 'she serves us well,' he should behave to her in all respects as his wife,—without fail even to the end of her life.

17. Although his parents be dead, when a son is inclined to do what is good, he should think that he will thereby transmit the good name of his parents, and carry his wish into effect. When he is inclined to do what is not good, he should think that he will thereby bring disgrace on the name of his parents, and in no wise carry his wish into effect.

18. When her father-in-law is dead, her mother-in-law takes the place of the old lady²; but the wife of the eldest son, on all occasions of sacrificing and receiving guests, must ask her directions in every-

¹ *Khân Hào* quotes here from the *Lî* of the elder *Tâi* (Book XIII, chapter 26) the 'seven grounds of divorce,' the first of them being the wife's 'want of accordance with her husband's parents.'

² Who now retires from the open headship of the family.

thing, while the other sons' wives must ask directions from her. When her parents-in-law employ the eldest son's wife, she should not be dilatory, unfriendly, or unpolite to the wives of his brothers (for their not helping her). When the parents-in-law employ any of them, they should not presume to consider themselves on an equality with the other; walking side by side with her, or giving their orders in the same way, or sitting in the same position as she.

19. No daughter-in-law, without being told to go to her own apartment, should venture to withdraw from that (of her parents-in-law). Whatever she is about to do, she should ask leave from them. A son and his wife should have no private goods, nor animals, nor vessels; they should not presume to borrow from, or give anything to, another person. If any one give the wife an article of food or dress, a piece of cloth or silk, a handkerchief for her girdle, an iris or orchid, she should receive and offer it to her parents-in-law. If they accept it, she will be glad as if she were receiving it afresh. If they return it to her, she should decline it, and if they do not allow her to do so, she will take it as if it were a second gift, and lay it by to wait till they may want it. If she want to give it to some of her own cousins, she must ask leave to do so, and that being granted, she will give it.

20. Eldest cousins in the legitimate line of descent and their brothers should do reverent service to the son, who is the representative chief of the family and his wife¹. Though they may be richer and

¹ These are all legitimate members of the same surname or clan, but the honoured cousin is the chief of it in the direct line. He is

higher in official rank than he, they should not presume to enter his house with (the demonstrations of) their wealth and dignity. Although they may have in attendance many chariots and footmen, these should stop outside, and they enter it in more simple style with a few followers.

If to any of the younger cousins there have been given vessels, robes, furs, coverlets, carriages and horses, he must offer the best of them (to his chief), and then use those that are inferior to this himself. If what he should thus offer be not proper for the chief, he will not presume to enter with it at his gate, not daring to appear with his wealth and dignity, to be above him who is the head of all the clan with its uncles and elder cousins.

A wealthy cousin should prepare two victims, and present the better of them to his chief. He and his wife should together, after self-purification, reverently assist at his sacrifice in the ancestral temple. When the business of that is over, they may venture to offer their own private sacrifice.

21. Of grain food, there were millet, the glutinous rice, rice, maize, the white millet, and the yellow maize, cut when ripe, or when green.

Of prepared meats, there were beef soup, mutton soup, pork soup, and roast beef; pickle, slices of beef, pickle and minced beef; roast mutton, slices

the chieftain of the clan. They are heads of subordinate branches of it. They may have become more wealthy and attained to higher rank in the service of their common ruler, but within the limits of the clan, he is their superior, and has duties of sacrifice to the ancestors of it, with which they cannot of themselves intermeddle.

of mutton, pickle, and roast pork ; pickle, slices of pork, mustard sauce, and minced fish ; pheasant, hare, quail, and partridge¹.

22. Of drinks, there was must in two vessels, one strained, the other unstrained, made of rice, of millet, or of maize. In some cases, thin preparations were used as beverages, as millet gruel, pickle, with water syrup of prunes, and of steeped rice ; clear wine and white².

Of confections, there were dried cakes, and rice-flour scones.

23. For relishes, snail-juice and a condiment of the broad-leaved water-squash were used with pheasant soup ; a condiment of wheat with soups of dried slices and of fowl ; broken glutinous rice with dog soup and hare soup ; the rice-balls mixed with these soups had no smart-weed in them.

A sucking-pig was stewed, wrapped up in sonchus leaves and stuffed with smart-weed ; a fowl, with the same stuffing, and along with pickle sauce ; a fish, with the same stuffing and egg sauce ; a tortoise, with the same stuffing and pickle sauce.

For meat spiced and dried they placed the brine of ants ; for soup made of sliced meat, that of hare ; for a ragout of elk, that of fish ; for minced fish, mustard sauce ; for raw elk flesh, pickle sauce ; for preserved peaches and plums, egg-like suet.

24. All condiments for grain food were of a

¹ In all, four rows of prepared meats, consisting of four dishes each.

² Both the old wine and occasional wine, mentioned in the note on page 447, were 'white.' The *kiû* here, probably, were the three *kiû* there.

character corresponding to the spring ; for soup, to the summer ; for sauces, to the autumn ; and for beverages, to the winter.

In all attempering ingredients, sour predominated in the spring ; bitter, in the summer ; acrid, in the autumn ; and salt, in the winter :—with the due proportioning of the unctuous and sweet.

The glutinous rice (was thought) to suit beef ; millet, to suit mutton ; glutinous millet, to suit pork ; maize, to suit dog ; wheat, to suit goose ; and the broad-leaved squash, to suit fish.

25. Lamb and sucking-pig were (thought to be) good in spring, fried with odorous (beef) suet ; dried pheasant and fish, in summer, fried with the strong-smelling suet (of dog) ; veal and fawn, in autumn, fried with strong suet (of fowl) ; fresh fish and goose, in winter, fried with the frouzy suet (of goat).

26. There were dried beef, and dried stalks of deer's flesh, of wild pig's, of elk's, and of the muntjac's. Elk's flesh, deer's, wild pig's, and muntjac's, was (also eaten uncooked ; and) cut in large leaf-like slices. Pheasants and hares were (made into soup) with the duckweed. There were sparrows and finches, partridges, cicadas, bees, lichens, small chestnuts, the water-caltrops, the hovenia dulcis, the zizyphus, chestnuts, hazel-nuts, persimmons, cucumbers, peaches, plums, ballaces, almonds, haws, pears, ginger, and cinnamon ¹.

¹ In this there are the names of more than thirty condiments or relishes, which, according to most commentators, were, or might be, served up at the meals of the rulers of states. But from paragraph 21 we have a list of viands, drinks, and their accom-

27. If a Great officer, at his ordinary meals, had mince, he did not have, at the same time, dried slices of meat; and if he had the latter, he did not have the former. An ordinary officer did not have two kinds of soup, or sliced flesh. (But) old men of the common people, did not eat their meat alone without accompaniments.

28. Mince was made in spring, with onions; in autumn, with the mustard plant. Sucking-pig was used in spring, with scallions; in autumn, with smart-weed. With lard they used onions; with fat, chives. With the three victim-animals they used pepper, and employed pickle as an accompaniment. For wild animals' flesh they used plums. In quail soup, fowl soup, and with the curlew, the condiment was smart-weed. Bream and tench were steamed; pullets, roasted; and pheasants, (boiled), with fragrant herbs and no smart-weed.

29. Things not eaten were the turtle, when hatching; the intestines of the wolf, which were removed, as also the kidneys of the dog; the straight spine of the wild cat; the rump of the hare; the head of the fox; the brains of the sucking-pig; the y1-like bowels of fish¹; and the perforated openings of the turtle¹.

30. (Bones and sinews) were taken from the flesh; the scales were scraped from fish; dates were made to appear as new; chestnuts were

paniments with no information as to when and by whom they were used. To descend to further particulars about them would be troublesome.

¹ Z. It is uncertain what some of these forbidden articles really were.

selected; peaches were made smooth; 𪛗 and pears had the insects drilled out of them¹.

31. When an ox lowed at night, its flesh was (considered) to be rank; that of a sheep, whose long hair showed a tendency to get matted, to be frouzy; that of a dog which was uneasy and with (the inside of) its thighs red, to be coarse; that of birds when moulting and with their voices hoarse, to be fetid; that of pigs, when they looked upwards and closed their eyes, to be measly; that of a horse, black along the spine and with piebald fore-legs, to smell unpleasantly.

A pullet, whose tail could not be grasped by the hand, was not eaten, nor the rump of a tame goose, nor the ribs of a swan or owl, nor the rump of a tame duck, nor the liver of a fowl, nor the kidneys of a wild goose, nor the gizzard of the wild goose without the hind-toe, nor the stomach of the deer.

32. Flesh cut small was made into mince; cut into slices it was made into hash. Some say that the flesh of elks, deer, and fish was pickled; that of muntjacs also, being cut in small pieces; that of fowls and wild pigs, in larger pieces; of hares, the stomach was pickled. Onions and scallions were mixed with the brine to soften the meat².

¹ The explanation of these brief notes is also perplexing. Zottoli makes the 𪛗 to have been a kind of medlar (azarolus). Medhurst calls it, after the Khang-hsi dictionary, 'a kind of pear.' Williams, explaining it under a synonym (of the same sound), 'a sour red fruit of the size of a cherry, a kind of hawthorn.'

² The manner of these preparations has not been definitely explained. The meaning is uncertain. So also is what is said of the cupboards in the next paragraph.

33. Soup and boiled grain were used by all, from the princes down to the common people, without distinction of degree. Great officers did not regularly have savoury meat, but when seventy they had their cupboards. The cupboards of the son of Heaven were five on the right (of the dining hall), and five on the left; those of dukes, marquises, and earls were five, all in one room; those of Great officers three (in a side chamber), and other officers had one on their buffet.

SECTION II.

1. In nourishing the aged¹, (Shun), the lord of Yü, used the ceremonies of a drinking entertainment; the sovereigns of Hsiâ, those (at entertainments after) a reverent sacrifice or offering; the men of Yin, those of a (substantial) feast; and the men of Kâu cultivated and used all the three².

Those of fifty years were entertained in the schools of the districts; those of sixty, in the school of the capital; and those of seventy, in the college. This rule extended to the feudal states. An old man of eighty made his acknowledgment for the ruler's invitation by kneeling once and bringing his head to the ground twice. The blind did the same. An

¹ *Khân Hào* says:—The nourishment of the aged took place in four cases: 1st, in the case of the three classes of ancients; 2nd, in that of the father and grandfather of one who had died in the service of the country; 3rd, in that of officers who had retired from age; and 4th, in that of the aged of the common people. On seven occasions of the year it was done formally.

² On the different designations of the dynasties, see on Confucian Analects, III, 21.

old man of ninety employed another to receive (the message and gift for him).

For those of fifty, the grain was (fine and) different (from that used by younger men). For those of sixty, there was meat kept in store (from the day before). For those of seventy, there was a second service of savoury meat. Those of eighty were supplied regularly with delicacies. For those of ninety, food and drink were never out of their chambers; wherever they wandered, it was deemed right that savoury meat and drink should follow them.

After sixty (the coffin and other things for the funeral) were seen to be in readiness (once) a year; after seventy, once a season; after eighty, once a month; and after ninety, they were every day kept in good repair. The bandages, however, the sheet, the larger coverlets, and the cases were prepared after death¹.

At fifty, one was supposed to begin to decay; at sixty, not to feel satisfied unless he had flesh to eat. At seventy, he was thought to require silk in order to make him feel warm; at eighty, to need some one (to sleep) with him, to keep him warm; and at ninety, not to feel warm even with that.

At fifty, one kept his staff in his hand in the family; at sixty, in his district; at seventy, in the city; at eighty, (an officer) did so in the court. If the son of Heaven wished to put questions to (an officer of) ninety, he went to his house, and had rich food carried after him.

¹ The sheet was for the slighter dressing of the corpse immediately after death; the coverlets for the fuller dressing at the coffin-ing; the cases were for the upper part of the corpse and for the legs.

At seventy, (an officer) did not wait till the court was over (before he retired). At eighty, he reported every month (to the ruler's messenger) that he was still alive ; at ninety, he had (delicate food) sent to him regularly every day.

At fifty, one was not employed in services requiring strength ; at sixty, he was discharged from bearing arms along with others ; at seventy, he was exempted from the business of receiving guests and visitors ; at eighty, he was free from the abstinences and other rites of mourning.

When one received at fifty the rank (of a Great officer), at sixty he did not go in person to the school¹. At seventy he resigned office ; and then and afterwards, in mourning he used only the unhemmed dress of sackcloth (without adopting the privations of the mourning rites)¹.

The kings of the three dynasties, in nourishing the old, always caused the members of families who were advanced in years to be brought to their notice². Where an officer was eighty, one of his friends was free from all service of government ; where he was ninety, all the members of his family were exempted from them. So also it was in the case of the blind.

(Shun), the lord of Yü, entertained the aged (who had retired from the service) of the state in (the school called) the higher hsiang, and the aged of the common people in (the school called) the lower

¹ Does this intimate, that if he had learned better at school, when young, he might have become a Great officer earlier? He was now too old to learn.

² The government could not attend to all the aged ; but it wished to hear of all cases of remarkable age, and would then do what it could for them.

hsiang. The sovereigns of the line of Hsiâ entertained the former in (the school called) the hsü on the east, and the latter in (that called) the hsü on the west. The men of Yin entertained the former in the School of the Right, and the latter in that of the Left. The men of Kâu entertained the former in the kiao on the east, and the latter in the Yü hsiang. This was in the suburb of the capital on the west.

The lord of Yü wore the hwang cap in sacrificing (in the ancestral temple), and the white robes in entertaining the aged. The sovereigns of Hsiâ sacrificed in the shân cap, and entertained the aged in the dark garments of undress. Those of Yin sacrificed in the hsü cap, and entertained in the garments of white thin silk. Those of Kâu sacrificed in the mien cap, and entertained the aged in the dark upper garment (and the lower white one)¹.

2. 3ăng-ze said, 'A filial son, in nourishing his aged, (seeks to) make their hearts glad, and not to go against their wishes; to promote their comfort in their bed-chambers and the whole house; and with leal heart to supply them with their food and drink:—such is the filial son to the end of life. By "the end of life," I mean not the end of parents' lives, but the end of his own life. Thus what his parents loved he will love, and what they revered he will reverence. He will do so even in regard to all their

¹ The above long paragraph constitutes, with very little difference, the first twelve paragraphs of Section v of Book III. K'ü Hsi says that in this Book we have 'old text,' whereas Book III is a compilation of the Han dynasty; and that the authors of it incorporated this passage. I am willing to allow that they did so; but it may be doubted if this Book in its present form be older than the time of Han.

dogs and horses, and how much more in regard to the men (whom they valued)!'

3. In all their nourishment of the aged, (the object of) the five Ts was to imitate (their virtue), while the kings of the three dynasties also begged them to speak (their lessons). The five Ts taking them as models, sought to nourish their bodily vigour, and did not beg them to speak; but what good lessons they did speak were taken down by the faithful recorders. The three (lines of) kings also took them as models, and after nourishing their age begged them to speak. If they (seemed to) diminish the ceremonies (of entertainment), they all had their faithful recorders as well (to narrate their virtue).

4. For the Rich Fry, they put the pickled meat fried over rice that had been grown on a dry soil, and then enriched it with melted fat. This was called the Rich Fry.

5. For the Similar Fry, they put the pickled meat fried over the millet grains, and enriched it with melted fat. This was called the Similar Fry.

6. For the Bake, they took a sucking-pig or a (young) ram, and having cut it open and removed the entrails, filled the belly with dates. They then wrapped it round with straw and reeds, which they plastered with clay, and baked it. When the clay was all dry, they broke it off. Having washed their hands for the manipulation, they removed the crackling and macerated it along with rice-flour, so as to form a kind of gruel which they added to the pig. They then fried the whole in such a quantity of melted fat as to cover it. Having prepared a large pan of hot water, they placed in it a small tripod,

which was filled with fragrant herbs, and the slices of the creature which was being prepared. They took care that the hot water did not cover this tripod, but kept up the fire without intermission for three days and nights. After this, the whole was served up with the addition of pickled meat and vinegar.

7. For the Pounded Delicacy, they took the flesh of ox, sheep, elk, deer and muntjac, a part of that which lay along the spine, the same in quantity of each, and beat it now as it lay flat, and then turning it on its side; after that they extracted all the nerves. (Next), when it was sufficiently cooked, they brought it (from the pan), took away the outside crust, and softened the meat (by the addition of pickle and vinegar).

8. For the Steeped Delicacy, they took the beef, which was required to be that of a newly killed animal, and cut it into small pieces, taking care to obliterate all the lines in it. It was then steeped from one morning to the next in good wine, when it was eaten with pickle, vinegar, or the juice of prunes.

9. To make the Grill, they beat the beef and removed the skinny parts. They then laid it on a frame of reeds, sprinkled on it pieces of cinnamon and ginger, and added salt. It could be eaten thus when dried. Mutton was treated in the same way as beef, and also the flesh of elk, deer, and muntjac. If they wished the flesh wet, they added water and fried it with pickled meat. If they wished it dry, they ate it as eaten (at first).

10. For the (Soup) Balls, they took equal quantities of beef, mutton and pork, and cut them small. Then they took grains of rice, which they mixed

with the finely cut meat, two parts of rice to one of meat, and formed cakes or balls, which they fried.

11. For the Liver and Fat, they took a dog's liver, and wrapped it round with its own fat. They then wet it and roasted it, and took it in this condition and scorched it. No smartweed was mixed with the fat.

12. They took the grains of rice and steeped them in prepared rice-water. They then cut small the fat from a wolf's breast, and with it and the grains of rice made a fry¹.

13. The observances of propriety commence with a careful attention to the relations between husband and wife. They built the mansion and its apartments, distinguishing between the exterior and interior parts. The men occupied the exterior; the women the interior. The mansion was deep, and the doors were strong, guarded by porter and eunuch. The men did not enter the interior; the women did not come out into the exterior.

14. Males and females did not use the same stand or rack for their clothes. The wife did not presume to hang up anything on the pegs or stand of her husband; nor to put anything in his boxes or satchels; nor to share his bathing-house. When her husband had gone out (from their apartment), she put his pillow in its case, rolled up his upper and under mats, put them in their covers, and laid them away in their proper receptacles. The young served the old; the low served the noble;—also in this way.

¹ This and the other paragraphs from 4 are understood to describe the 'eight delicacies (八珍),' which were specially prepared for the old. See the *Káu Lí*, Book IV, par. 18.

15. As between husband and wife, it was not until they were seventy, that they deposited these things in the same place without separation. Hence though a concubine were old, until she had completed her fiftieth year, it was the rule that she should be with the husband (once) in five days. When she was to do so, she purified herself, rinsed her mouth and washed, carefully adjusted her dress, combed her hair, drew over it the covering of silk, fixed her hair-pins, tied up the hair in the shape of a horn, brushed the dust from the rest of her hair, put on her necklace, and adjusted her shoe-strings. Even a favourite concubine was required in dress and diet to come after her superior. If the wife were not with the husband, a concubine waiting on him, would not venture to remain the whole night¹.

16. When a wife was about to have a child, and the month of her confinement had arrived, she occupied one of the side apartments, where her husband sent twice a day to ask for her. If he were moved and came himself to ask about her², she did not presume to see him, but made her governess dress herself and reply to him.

When the child was born, the husband again sent twice a day to inquire for her. He fasted now, and did not enter the door of the side apartment. If the child were a boy, a bow was placed on the left of the door; and if a girl, a handkerchief on the

¹ This paragraph has given rise to a great deal of discussion and writing among the commentators, into which it is not desirable to enter.

² The first character in this clause occasions difficulty to a translator. Zottoli has:—'Negotiisque ipsemet interrogabit illam.' Wang Tâo understands it as I have done.

right of it. After three days the child began to be carried, and some archery was practised for a boy, but not for a girl.

17. When a son and heir to the ruler of a state was born, and information of the fact was carried to him, he made arrangements to receive him at a feast where the three animals should all be provided; and the cook took in hand the (necessary) preparations. On the third day the tortoise-shell was consulted for a good man to carry the child; and he who was the lucky choice, kept a vigil over night, and then in his court robes, received him in his arms outside the chamber. The master of the archers then took a bow of mulberry wood, and six arrows of the wild rubus, and shot towards heaven, earth, and the four cardinal points. After this the nurse received the child and carried it in her arms. The cook (at the same time) gave (a cup of) sweet wine to the man who had carried the child, and presented him with a bundle of silks, and the tortoise-shell was again employed to determine the wife of an officer, or the concubine of a Great officer, who should be nurse.

18. In all cases of receiving a son, a day was chosen; and if it were the eldest son of the king, the three animals were killed (for the occasion). For the son of a common man, a sucking-pig was killed; for the son of an officer, a single pig; for the son of a Great officer, the two smaller animals; and for the son of the ruler of a state, all the three. If it were not the eldest son, the provision was diminished in every case one degree.

19. A special apartment was prepared in the

palace for the child, and from all the concubines and other likely individuals there was sought one distinguished for her generosity of mind, her gentle kindness, her mild integrity, her respectful bearing, her carefulness and freedom from talkativeness, who should be appointed the boy's teacher; one was next chosen who should be his indulgent mother, and a third who should be his guardian mother. These all lived in his apartment, which others did not enter unless on some (special) business.

20. At the end of the third month a day was chosen for shaving off the hair of the child, excepting certain portions,—the horn-like tufts of a boy, and the circlet on the crown of a girl. If another fashion were adopted, a portion was left on the left of the boy's head, and on the right of the girl's. On that day the wife with the son appeared before the father. If they were of noble families, they were both in full dress. From the commissioned officer downwards, all rinsed their mouths and washed their heads. Husband and wife rose early, bathed and dressed as for the feast of the first day of the month. The husband entered the door, going up by the steps on the east, and stood at the top of them with his face to the west. The wife with the boy in her arms came forth from her room and stood beneath the lintel with her face to the east.

21. The governess then went forward and said for the lady, 'The mother, So and So, ventures to-day reverently to present to you the child!' The husband replied, 'Reverently (teach him to) follow the right way.' He then took hold of the right hand of his son, and named him with the smile and voice of a child. The wife responded, 'We will remember.

May your words be fulfilled !' She then turned to the left, and delivered the child to his teacher, who on her part told the name all round to the wives of the relatives of all ranks who were present. The wife forthwith proceeded to the (festal) chamber.

22. The husband informed his principal officer of the name, and he in turn informed all the (young) males (of the same surname) of it. A record was made to the effect—'In such a year, in such a month, on such a day, So and So was born,' and deposited. The officer also informed the secretaries of the hamlets, who made out two copies of it. One of these was deposited in the office of the village, and the other was presented to the secretary of the larger circuit, who showed it to the chief of the circuit ; he again ordered it to be deposited in the office of the circuit. The husband meanwhile had gone into (the festal chamber), and a feast was celebrated with the ceremonies of that with which a wife first entertains her parents-in-law.

23. When an heir-son has been born, the ruler washed his head and whole body, and put on his court robes. His wife did the same, and then they both took their station at the top of the stairs on the east with their faces towards the west. One of the ladies of quality, with the child in her arms, ascended by the steps on the west. The ruler then named the child ; and (the lady) went down with it.

24. A (second) son or any other son by the wife proper was presented in the outer chamber¹, when

¹ It seems plain that the sons in this paragraph were all by the proper wife or chief lady of the harem, for it is not till paragraph 26 that sons by inferior members of it are spoken of. The *K'ien-*

(the ruler) laid his hand on its head, and with gentle voice named it. The other observances were as before, but without any words.

25. In naming a son, the name should not be that of a day or a month or of any state, or of any hidden ailment¹. Sons of Great and other officers must not be called by the same name as the heir-son of the ruler.

26. When a concubine was about to have a child, and the month of her confinement had arrived, the husband sent once a day to ask for her. When the son was born, at the end of three months, she washed her mouth and feet, adjusted herself early in the morning and appeared in the inner chamber (belonging to the wife proper). There she was received with the ceremonies of her first entrance into the harem. When the husband had eaten, a special portion of what was left was given to her by herself; and forthwith she entered on her duties of attendance.

27. When the child of an inferior member of the ruler's harem was about to be born, the mother went to one of the side apartments, and at the end of three months, having washed her head and person, and

lung editors clearly establish this point. K'ang Hsüan took a different view, saying that "the (second) son" was a brother of the heir-son (in paragraph 23), and "any other son" a son by a concubine, and P. Zottoli adopts this view:—'Reguli haeres (世子), ejus germanus frater (適子), a subnuba filius (庶子);' adding, 'Regulus excipiebat primum in praecipua diaeta (路寢); secundum in postica diaeta (蒸寢), quae hic exterior dicitur relate ad adjacentes aedes, quibus nobilis puerpera morari solebat; tertium excipiebat in adjacentibus aedibus (側室).' But these 'side apartments' are not mentioned till paragraph 27.

¹ See page 78, paragraph 42.

put on her court robes, she appeared before the ruler. (One of) her waiting women (also) appeared with the child in her arms. If (the mother) was one to whom the ruler had given special favours, he himself named the son. In the case of such children generally, an officer was employed to name them.

28. Among the common people who had no side chambers, when the month of confinement was come, the husband left his bed-chamber, and occupied a common apartment. In his inquiries for his wife, however, and on his son's being presented to him, there was no difference (from the observances that have been detailed).

29. In all cases though the father is alive, the grandson is presented to the grandfather, who also names him. The ceremonies are the same as when the son is presented to the father; but there is no (interchange of) words (between the mother and him).

30. The nurse of the ruler's boy¹ quitted the palace after three years, and, when she appeared before the ruler, was rewarded for her toilsome work. The son of a Great officer had a nurse. The wife of an ordinary officer nourished her child herself.

31. The son of a commissioned officer and others above him on to the Great officer was presented (to the father once) in ten days. The eldest son of a ruler was presented to him before he had eaten, when he took him by the right hand; his second or any other son by the wife proper² was presented after he had eaten, when he laid his hand on his head.

32. When the child was able to take its own food,

¹ See above, par. 17.

² See above, par. 24.

it was taught to use the right hand. When it was able to speak, a boy (was taught to) respond boldly and clearly; a girl, submissively and low. The former was fitted with a girdle of leather; the latter, with one of silk¹.

¹ The account which follows this of the teaching and training of the brothers and sisters is interesting; and we may compare it with what is said in volume iii, p. 350, of the different reception given to sons and daughters in the royal family, though the distinction between them is not accentuated here so strongly. The passage treats of the children in a family of the higher classes, but those of the common people would be dealt with in a corresponding manner according to their circumstances. And even in the early feudal times the way was open for talent and character to rise from the lower ranks in the social scale, and be admitted to official employment. The system of competitive examinations was even then casting a shadow before. To number the days was, and is, a more complicated affair in China than with us, requiring an acquaintance with all the terms of the cycle of sixty, as well as the more compendious method by decades for each month. The education of a boy, it will be seen, comprehended much more than what we call the three R's. The conclusion of paragraph 33 gives the translator some difficulty. Zottoli has—*'et petet exerceri lectionibus sermonisque veritate,'* and my own first draft was—*'he would ask to be exercised in (reading) the tablets, and in truthful speaking.'* But it is making too much of the boys of ancient China to represent them as anxious to be taught to speak the truth. The meaning of the concluding characters, as given in the text, is that assigned to them by K'ang Hsüan.

There is nothing in what is said of the daughters to indicate that they received any literary training. They were taught simply the household duties that would devolve on them in their state of society; though among them, be it observed, were the forms and provision for sacrifice and worship. It will be observed, also, at how early an age all close intercourse between them and their brothers came to an end, and that at ten they ceased to go out from the women's apartments. On what is said about the young men marrying at the age of thirty I have spoken in a note on page 65.

33. At six years, they were taught the numbers and the names of the cardinal points; at the age of seven, boys and girls did not occupy the same mat nor eat together; at eight, when going out or coming in at a gate or door, and going to their mats to eat and drink, they were required to follow their elders:—the teaching of yielding to others was now begun; at nine, they were taught how to number the days.

At ten, (the boy) went to a master outside, and stayed with him (even) over the night. He learned the (different classes of) characters and calculation; he did not wear his jacket or trousers of silk; in his manners he followed his early lessons; morning and evening he learned the behaviour of a youth; he would ask to be exercised in (reading) the tablets, and in the forms of polite conversation.

34. At thirteen, he learned music, and to repeat the odes, and to dance the *k'o* (of the duke of *K'áu*)¹. When a full-grown lad, he danced the *hsiang* (of king *Wû*)¹. He learned archery and chariot-driving. At twenty, he was capped, and first learned the (different classes of) ceremonies, and might wear furs and silk. He danced the *tâ hsiâ* (of *Yü*)¹, and attended sedulously to filial and fraternal duties. He might become very learned, but did not teach others;—(his object being still) to receive and not to give out.

35. At thirty, he had a wife, and began to attend

¹ It is difficult to describe exactly, amid the conflict of different views, these several dances. Dances were of two kinds, the civil and military. The *k'o* was, perhaps, the first of the civil dances, ascribed to the duke of *K'áu* (vol. iii, p. 334); and the *hsiang*, the first of the martial. The two are said to have been combined in the *tâ hsiâ*.

to the business proper to a man. He extended his learning without confining it to particular subjects. He was deferential to his friends, having regard to the aims (which they displayed). At forty, he was first appointed to office ; and according to the business of it brought out his plans and communicated his thoughts. If the ways (which he proposed) were suitable, he followed them out ; if they were not, he abandoned them. At fifty, he was appointed a Great officer, and laboured in the administration of his department. At seventy, he retired from his duties. In all salutations of males, the upper place was given to the left hand.

36. A girl at the age of ten ceased to go out (from the women's apartments). Her governess taught her (the arts of) pleasing speech and manners, to be docile and obedient, to handle the hempen fibres, to deal with the cocoons, to weave silks and form fillets, to learn (all) woman's work, how to furnish garments, to watch the sacrifices, to supply the liquors and sauces, to fill the various stands and dishes with pickles and brine, and to assist in setting forth the appurtenances for the ceremonies.

37. At fifteen, she assumed the hair-pin ; at twenty, she was married, or, if there were occasion (for the delay), at twenty-three. If there were the betrothal rites, she became a wife ; and if she went without these, a concubine. In all salutations of females, the upper place was given to the right hand.

Clarendon Press, Oxford

A SELECTION OF BOOKS

PUBLISHED FOR THE UNIVERSITY BY

HENRY FROWDE,

AT THE OXFORD UNIVERSITY PRESS WAREHOUSE,
AMEN CORNER, LONDON.

ALSO TO BE HAD AT THE
CLARENDON PRESS DEPOSITORY, OXFORD.

[Every book is bound in cloth, unless otherwise described.]

LEXICONS, GRAMMARS, &c.

ANGLO-SAXON.—*An Anglo-Saxon Dictionary*, based on the MS. Collections of the late Joseph Bosworth, D.D., Professor of Anglo-Saxon, Oxford. Edited and enlarged by Prof. T. N. Toller, M.A. (To be completed in four parts.) Parts I and II. A—HWISTLIAN (pp. vi, 576). 1882. 4to. 15s. each.

CHINESE.—*A Handbook of the Chinese Language*. By James Summers. 1863. 8vo. half bound, 1l. 8s.

ENGLISH.—*A New English Dictionary, on Historical Principles*: founded mainly on the materials collected by the Philological Society. Edited by James A. H. Murray, LL.D., President of the Philological Society; with the assistance of many Scholars and men of Science. Part I. A—ANT (pp. xvi, 352). Part II. ANT—BATTEN (pp. viii, 353–704). Imperial 4to. 12s. 6d. each.

— *An Etymological Dictionary of the English Language*. By W. W. Skeat, M.A. *Second Edition*. 1884. 4to. 2l. 4s.

— Supplement to the First Edition of the above. 1884. 4to. 2s. 6d.

— *A Concise Etymological Dictionary of the English Language*. By W. W. Skeat, M.A. *Second Edition*. 1885. Crown 8vo. 5s. 6d.

GREEK.—*A Greek-English Lexicon*, by Henry George Liddell, D.D., and Robert Scott, D.D. Seventh Edition, Revised and Augmented throughout. 1883. 4to. 1l. 16s.

— *A Greek-English Lexicon*, abridged from Liddell and Scott's 4to. edition, chiefly for the use of Schools. Twenty-first Edition. 1884. Square 12mo. 7s. 6d.

— *A copious Greek-English Vocabulary*, compiled from the best authorities. 1850. 24mo. 3s.

— *A Practical Introduction to Greek Accentuation*, by H. W. Chandler, M.A. *Second Edition*. 1881. 8vo. 10s. 6d.

- HEBREW.—*The Book of Hebrew Roots*, by Abu 'l-Walīd Marwān ibn Janāh, otherwise called Rabbī Yōnāh. Now first edited, with an Appendix, by Ad. Neubauer. 1875. 4to. 2l. 7s. 6d.
- *A Treatise on the use of the Tenses in Hebrew*. By S. R. Driver, D.D. Second Edition. 1881. Extra fcap. 8vo. 7s. 6d.
- *Hebrew Accentuation of Psalms, Proverbs, and Job*. By William Wickes, D.D. 1881. Demy 8vo. stiff covers, 5s.
- ICELANDIC.—*An Icelandic-English Dictionary*, based on the MS. collections of the late Richard Cleasby. Enlarged and completed by G. Vigfússon, M.A. With an Introduction, and Life of Richard Cleasby, by G. Webbe Dasent, D.C.L. 1874. 4to. 3l. 7s.
- *A List of English Words the Etymology of which is illustrated by comparison with Icelandic*. Prepared in the form of an APPENDIX to the above. By W. W. Skeat, M.A. 1876. stitched, 2s.
- *An Icelandic Primer*, with Grammar, Notes, and Glossary. By Henry Sweet, M.A. Extra fcap. 8vo. 3s. 6d. *Just Published*.
- *An Icelandic Prose Reader*, with Notes, Grammar and Glossary, by Dr. Gudbrand Vigfússon and F. York Powell, M.A. 1879. Extra fcap. 8vo. 10s. 6d.
- LATIN.—*A Latin Dictionary*, founded on Andrews' edition of Freund's Latin Dictionary, revised, enlarged, and in great part rewritten by Charlton T. Lewis, Ph.D., and Charles Short, LL.D. 1879. 4to. 1l. 5s.
- MELANESIAN.—*The Melanesian Languages*. By R. H. Codrington, D.D., of the Melanesian Mission, 8vo. 18s.
- SANSKRIT.—*A Practical Grammar of the Sanskrit Language*, arranged with reference to the Classical Languages of Europe, for the use of English Students, by Monier Williams, M.A. Fourth Edition, 1877. 8vo. 15s.
- *A Sanskrit-English Dictionary*, Etymologically and Philologically arranged, with special reference to Greek, Latin, German, Anglo-Saxon, English, and other cognate Indo-European Languages. By Monier Williams, M.A. 1872. 4to. 4l. 14s. 6d.
- *Nalopakhyaṇam*. Story of Nala, an Episode of the Mahā-Bhārata: the Sanskrit text, with a copious Vocabulary, and an improved version of Dean Milman's Translation, by Monier Williams, M.A. Second Edition, Revised and Improved. 1879. 8vo. 15s.
- *Sakuntalā*. A Sanskrit Drama, in Seven Acts. Edited by Monier Williams, M.A. Second Edition, 1876. 8vo. 21s.
- SYRIAC.—*Thesaurus Syriacus*: collegerunt Quatremère, Bernstein, Lorsch, Arnoldi, Agrell, Field, Roediger: edidit R. Payne Smith, S.T.P. Fasc. I-VI. 1868-83. sm. fol. each, 1l. 1s.
- Vol. I, containing Fasc. I-V, sm. fol. 5l. 5s.
- Fasc. VII. sm. fol. 1l. 11s. 6d. *Just Published*.
- *The Book of Kalilah and Dimnah*. Translated from Arabic into Syriac. Edited by W. Wright, LL.D. 1884. 8vo. 21s.

OXFORD: CLARENDON PRESS DEPOSITORY,
116 HIGH STREET.

The DELEGATES OF THE PRESS invite suggestions and advice from all persons interested in education; and will be thankful for hints, &c. addressed to the SECRETARY TO THE DELEGATES, Clarendon Press, Oxford.

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

A COLLECTION OF TREATISES ON THE RULES
OF PROPRIETY OR CEREMONIAL USAGES.

BOOK XI. YÜ 3ÂO

OR

THE JADE-BEAD PENDANTS OF THE ROYAL CAP¹.

SECTION I.

1. The son of Heaven, when sacrificing², wore (the cap) with the twelve long pendants of beads of jade hanging down from its top before and behind, and the robe embroidered with dragons.

2. When saluting the appearance of the sun³ outside the eastern gate⁴, he wore the dark-coloured square-cut robes; and (also) when listening to the notification of the first day of the month⁵ outside the southern gate.

¹ See introductory notice, vol. xxvii, pp. 27, 28.

² Probably, to Heaven; K'ang thought it was to the former kings. Many try to unite both views.

³ At the vernal equinox. Callery has 'Quand de bon matin il sacrifie au soleil.' Probably there was a sacrifice on the occasion; but the text does not say so. The character 朝 (*chiáo*) means 'to appear at audience.'

⁴ Probably, of the city; many say, of the Hall of Distinction.

⁵ This announcement was to the spirits of his royal ancestors in the first place. Compare Analects III, 16.

3. If the month were intercalary, he caused the left leaf of the door to be shut, and stood in the middle of that (which remained open)¹.

4. He wore the skin cap at the daily audience in the court, after which he proceeded to take the morning meal in it. At midday he partook of what was left in the morning. He had music at his meals. Every day a sheep and a pig were killed and cooked; and on the first day of the month an ox in addition. There were five beverages:—water, which was the principal; rice-water, spirits, must, and millet-water.

5. When he had done eating, he remained at ease in the dark-coloured square-cut robes². His actions were written down by the recorder of the Left, and his utterances by the recorder of the Right. The blind musician in attendance judged whether the music were too high or too low³.

6. If the year were not good and fruitful, the son of Heaven wore white and plain robes, rode in the plain and unadorned carriage, and had no music at his meals.

¹ This is not easy to understand, nor easy to make intelligible. An intercalary month was an irregular arrangement of the year. It and the previous month formed one double month. The shutting half the door showed that one half of the time was passed. There remained the other leaf to be given—in the temple or in the palace—to the king for all the ceremonies or acts of government appropriate in such a position for the whole intercalary month. Something like this is sketched out as the meaning by the *K'ien-lung* editors.

² These were so named from the form in which they were made, the cloth being cut straight and square.

³ And judged, it is said, of the character of the measures of government; but this is being 'over-exquisite' to account for the custom.

7. The princes of states, in sacrificing, wore their dark-coloured square-cut robes. At court-audiences (of the king), they wore the cap of the next inferior degree of rank to their own¹. They wore the skin-cap, when listening to the notification of the first day of the month in the Grand temples; and their court robes when holding their daily audience in the inner court-yard.

8. (Their ministers and officers) entered (the palace) as soon as they could distinguish the dawning light², and the ruler came out daily (to the first court, inside the Khû gate), and received them. (After this audience), he retired, and went to the great chamber, there to listen to their proposals about the measures of government. He employed men to see whether the Great officers (were all withdrawn)³; and when they had left, he repaired to the smaller chamber, and put off his (court) robes.

9. He resumed his court robes, when he was about to eat. There was a single animal; with three (other) dishes of meat, the lungs forming the sacrificial offering. In the evening he wore the long robe in one piece, and offered some of the flesh of the animal. On the first day of the moon,

¹ So it seems to be said; but why it was done so, does not clearly appear.

² Several pieces in the Shih allude to this early attendance at court. See Book II, ii, 8; iii, 8, et al.

³ They sat or waited, not inside the chamber, but outside. Some Great officer might wish to bring a matter before the ruler which he had not ventured to mention in public. The ruler, therefore, would give him a private audience; and did not feel himself free from business till all had withdrawn.

a sheep and a pig were killed, and there were five (other) dishes of meat, and four of grain. On 3ze and Mão days¹ there were only the glutinous rice and vegetable soup. His wife used the same kitchen as the ruler².

10. Without some cause for it, a ruler did not kill an ox, nor a Great officer a sheep, nor a lower officer a pig or a dog. A superior man had his shambles and kitchen at a distance (from the) house; he did not tread wherever there was such a thing as blood or (tainted) air³.

11. When the eighth month came without rain, the ruler did not have full meals nor music. If the year were not abundant, he wore linen, and stuck in his girdle the tablet of an officer⁴. Duties were not levied at the barrier-gates and dams; the prohibitions of the hills and meres were enforced, but no contributions were required (from hunters and fishermen). No earthworks were undertaken, and Great officers did not make (any new) carriages for themselves.

12. The officer of divination by the tortoise-shell fixed the shell (to be used); the recorder applied the ink; and the ruler determined the figures (produced by the fire)⁵.

¹ See vol. xxvii, p. 180.

² That is, the wife was supplied with what was left from the ruler's meals.

³ Lî Tien says, 'He would not tread on ants.' The *Khien-lung* editors characterise this as 'a womanish remark.'

⁴ A ruler's tablet was of ivory; an officer's only of bamboo, tipped with ivory.

⁵ See the *Kâu Lî*, Book XXII, 25. The *Khien-lung* editors say that the methods of this divination are lost.

13. (The cross-board in front of) the ruler was covered with lambskin, edged with tiger's fur; for his sacred carriage and court-carriage a Great officer had a covering of deer skin, edged with leopard's fur; as also had an ordinary officer for his sacred carriage¹.

14. The regular place for a gentleman was exactly opposite the door, (facing the light). He slept with his head to the east. When there came violent wind, or rapid thunder, or a great rain, he changed (countenance). It was the rule for him then, even in the night, to get up, dress himself, put on his cap, and take his seat.

15. He washed his hands five times a day. He used millet-water in washing his head, and maize-water in washing his face. For his hair (when wet) he used a comb of white-grained wood, and an ivory comb for it when dry. (After his toilet), there were brought to him the (usual) cup and some delicacy; and the musicians came up² and sang.

In bathing he used two towels; a fine one for the upper part (of his body), and a coarser for the lower part. When he got out of the tub, he stepped on a straw mat; and having next washed his feet with hot water, he stepped on the rush one. Then in his (bathing) robe of cloth, he dried his body (again), and put on his shoes; and a drink was then brought into him.

16. When he had arranged to go to the ruler's,

¹ 'The sacred carriage' was one used for going in to some temple service that required previous fasting. The paragraph is strangely constructed. It is supposed that the ruler's carriage at the beginning of it was also a sacred one.

² Came up on the raised hall, that is.

he passed the night in vigil and fasting, occupying an apartment outside his usual one. After he had washed his head and bathed, his secretary brought him the ivory tablet, on which were written his thoughts (which he should communicate to the ruler), and how he should respond to orders (that he might receive). When he was dressed he practised deportment and listened to the sounds of the gems (at his girdle pendant). When he went forth, he bowed to all in his own private court elegantly, and proceeded to mount his carriage (to go to the ruler's) in brilliant style.

17. The son of Heaven carried in his girdle the thing tablet, showing how exact and correct he should be in his relations with all under heaven. The feudal lords had the shû, rounded at the top and straight at the bottom, showing how they should give place to the son of Heaven. The tablet of the Great officers was rounded both at the top and the bottom; showing how they should be prepared to give place in all positions¹.

18. When (a minister) is sitting in attendance on his ruler, the rule was that he should occupy a mat somewhat behind him on one side. If he did not occupy such a mat, he had to draw the one assigned to him back and keep aloof from the ruler's kindred who were near him².

One did not take his place on his mat from the

¹ It is not clear what the tablets of this paragraph were, and whether they were carried in the hand or inserted in the girdle. The character 楮 (3in) seems to imply the latter.

² The *K'ien-lung* editors say that after these two sentences; the subject of the rest of the paragraph is a student before his teacher.

front, to avoid seeming to step over it. When seated and unoccupied he did not take up the whole of the mat by at least a cubit. If he were to read any writings or to eat, he sat forward to the edge. The dishes were put down a cubit from the mat¹.

19. If food were given (to a visitor), and the ruler proceeded to treat him as a guest, he would order him to present the offering, and the visitor would do so. If he took the precedence in eating, he would take a little of all the viands, drink a mouthful, and wait (for the ruler to eat)². If there were one in attendance to taste the viands, he would wait till the ruler ate, and then eat himself. After this eating, he would drink (a mouthful), and wait (again).

20. If the ruler ordered him to partake of the delicacies, he took of that which was nearest to him. If he were told to take of all, he took of whatever he liked. In all cases, in tasting of what was some way off, they began with what was near.

(The visitor) did not dare to add the liquid to his rice till the ruler had touched the corners of his mouth with his hands and put them down³. When the ruler had done eating, he also took of the rice in this fashion, repeating the process three times. When the ruler had the things removed, he took his rice and sauces, and went out and gave them to his attendants.

21. Whenever pressed (by his host) to eat, one should not eat largely; when eating at another's,

¹ And also any tablets or other things to be referred to.

² Tasting the things before the ruler to see that they were good and safe.

³ That is, touched those parts with his fingers to see that no grains were sticking to them.

one should not eat to satiety. It was only of the water and sauces that some was not put down as an offering;—they were accounted too trivial for such a purpose.

22. If the ruler gave a cup (of drink) to an officer, he crossed over from his mat, bowed twice, laid his head to the ground, and received it. Resuming his place, he poured a portion of it as an offering, drank it off, and waited. When the ruler had finished his cup, he then returned his empty.

The rule for a superior man in drinking (with the ruler) was this:—When he received the first cup, he wore a grave look; when he received the second, he looked pleased and respectful. With this the ceremony stopped. At the third cup, he looked self-possessed and prepared to withdraw. Having withdrawn, he knelt down and took his shoes, retired out of the ruler's (sight) and put them on. Kneeling on his left knee, he put on the right shoe; kneeling on the right knee, he put on the left one¹.

23. (At festive entertainments), of all the vases that with the dark-coloured liquor (of water) was considered the most honourable²; and only the ruler sat with his face towards it. For the uncultivated people in the country districts, the vases all con-

¹ The subject in the two parts of this paragraph does not appear to be the same. The officer in the former was merely an attendant we may suppose; in the latter, one of a superior rank. The cup in the one case was of special favour; in the second the cups were such as were drunk with the ruler at certain times, but were always confined to three.

² 'Mindful,' says K'ang, 'of the ways of antiquity.' See Book VII, i, 10, 11, et al. on the honour paid to water at sacrifices and feasts, and the reasons for it.

tained prepared liquors¹. Great officers had the vase on one side of them upon a tray without feet; other officers had it in a similar position on a tray with feet².

SECTION II.

1. At the ceremony of capping, the first cap put on was one of black linen. The use of this extended from the feudal lords downwards. It might, after having been thus employed, be put away or disused³.

2. The dark-coloured cap, with red strings and tassels descending to the breast, was used at the capping of the son of Heaven. The cap of black linen, with strings and tassels of various colours, was used at the capping of a feudal prince. A dark-coloured cap with scarlet strings and tassels was worn by a feudal lord, when fasting. A dark-coloured cap with gray strings and tassels was worn by officers when similarly engaged.

3. A cap of white silk with the border or roll of a dark colour was worn (? at his capping) by a son or grandson (when in a certain stage of mourning)⁴. A similar cap with a plain white edging, was worn after the sacrifice at the end of the year's mourning. (The same cap) with strings hanging down five inches,

¹ The gratification of their taste was the principal thing at festive entertainments of the common people.

² On the two trays mentioned here,—the yü (composed of 木, and 於 on the right of it) and the k'in (禁),—see Book VIII, i, 12.

³ Such a cap had been used anciently; and it was used in the ceremony, though subsequently disused, out of respect to the ancient custom.

⁴ When his grandfather was dead, and his father (still alive) was in deep mourning for him.

served to mark the idle and listless officer¹. A dark-coloured cap with the roll round it of white silk was worn by one excluded from the ranks of his compeers².

4. The cap worn in private, with the roll or border attached to it, was used by all from the son of Heaven downwards. When business called them, the strings were tied and their ends allowed to hang down.

5. At fifty, one did not accompany a funeral with his sackcloth hanging loose. When his parents were dead, (a son) did not have his hair dressed in tufts (any more). With the large white (cap) they did not use strings hanging down. The purple strings with the dark-coloured cap began with duke Hwan of Lû³.

6. In the morning they wore the dark-coloured square-cut dress; in the evening, the long dress in one piece. That dress at the waist was thrice the width of the sleeve; and at the bottom twice as wide as at the waist. It was gathered in at each side (of the body). The sleeve could be turned back to the elbow.

7. The outer or under garment joined on to the sleeve and covered a cubit of it⁴. The collar was 2 inches wide; the cuff, a cubit and 2 inches long; the border, $1\frac{1}{2}$ inch broad. To wear silk under or inside linen was contrary to rule.

8. An (ordinary) officer did not wear anything woven of silk that had been first dyed⁵. One who had left the service of his ruler wore no two articles of different colours.

¹ By way of punishment or disgrace.

² Also in punishment. See Book III, iv, 2-5. ³ B.C. 711-694.

⁴ If we could see one dressed as in those early days, we should understand this better than we do.

⁵ Because of its expensiveness.

If the upper garment were of one of the correct colours, the lower garment was of the (corresponding) intermediate one ¹.

9. One did not enter the ruler's gate without the proper colours in his dress; nor in a single robe of grass-cloth, fine or coarse; nor with his fur robe either displayed outside, or entirely covered.

10. A garment wadded with new floss was called *kien*; with old, *pháo*. One unlined was called *kiung*; one lined, but not wadded, *tieh*.

11. The use of thin white silk in court-robos began with *Ki Khang-ze*. Confucius said, 'For the audience they use the (regular) court-robos, which are put on after the announcement of the first day of the month (in the temple).' He (also) said, 'When good order does not prevail in the states and clans, (the officers) should not use the full dress (as prescribed) ².'

12. Only a ruler wore the chequered fur robe ³ in addressing (his troops or the multitudes), and at the autumnal hunts ⁴. (For him) to wear the Great fur robe was contrary to ancient practice.

13. When a ruler wore the robe of white fox-fur, he wore one of embroidered silk over it to display it ⁵.

¹ The five 'correct' colours were azure (青; of varying shade), scarlet (赤; carnation, the colour of the flesh), white, black, and yellow. The 'intermediate' were green (綠), red (紅), jade-green (碧), purple (紫), and bay-yellow (駢黃).

² See the concluding article in the 'Narratives of the School.' The words of Confucius are understood to intimate a condemnation of *Ki Khang-ze*.

³ Made of black lamb's fur and white fox-fur.

⁴ Or, according to many, in giving charges about agriculture.

⁵ Of one colour, worn by the king, at a border sacrifice.

When (the guards on) the right of the ruler wore tigers' fur, those on the left wore wolves' fur. An (ordinary) officer did not wear the fur of the white fox.

14. (Great and other) officers wore the fur of the blue fox, with sleeves of leopard's fur, and over it a jacket of dark-coloured silk to display it; with fawn's fur they used cuffs of the black wild dog¹, with a jacket of bluish yellow silk, to display it; with lamb's fur, ornaments of leopard's fur, and a jacket of black silk to display it; with fox-fur, a jacket of yellow silk to display it. A jacket of embroidered silk with fox-fur was worn by the feudal lords.

15. With dog's fur or sheep's fur², they did not wear any jacket of silk over it. Where there was no ornamentation, they did not use the jacket. The wearing the jacket was to show its beauty.

When condoling, they kept the jacket covered, and did now show all its ornamental character; in the presence of the ruler, they showed all this.

The covering of the dress was to hide its beauty. Hence, personators of the deceased covered their jackets of silk. Officers holding a piece of jade or a tortoise-shell (to present it) covered it; but if they had no (such official) business in hand, they displayed the silken garment, and did not presume to cover it.

16. For his memorandum-tablet, the son of Heaven used a piece of sonorous jade; the prince of a state, a piece of ivory; a Great officer, a piece of bamboo, ornamented with fishbone³; ordinary

¹ Or foreign dog. An animal like the tapir or rhinoceros is called by the same name, but cannot be meant here.

² 'The dress,' says K'ang, 'worn by the common people.'

³ The bone seems to be specified; 須, read pan. What bone and of what fish, I do not know.

officers might use bamboo, adorned with ivory at the bottom.

17. When appearing before the son of Heaven, and at trials of archery, there was no such thing as being without this tablet. It was contrary to rule to enter the Grand temple without it. During the five months' mourning, it was not laid aside. When engaged in the performance of some business, and wearing the cincture, one laid it aside. When he had put it in his girdle, the bearer of it was required to wash his hands; but afterwards, though he had something to do in the court, he did not wash them (again).

When one had occasion to point to or draw anything before the ruler, he used the tablet. When he went before him and received a charge, he wrote it down on it. For all these purposes the tablet was used, and therefore it was ornamental.

18. The tablet was 2 cubits and 6 inches long. Its width at the middle was 3 inches; and it tapered away to $2\frac{1}{2}$ inches (at the ends).

19. (A ruler) wore a plain white girdle of silk, with ornamented ends; a Great officer, a similar girdle, with the ends hanging down; an ordinary officer, one of dyed silk, with the edges tucked in, and the ends hanging down; a scholar waiting to be employed, one of embroidered silk; and young lads, one of white silk¹.

¹ From this paragraph to the end of the part, the text is in great confusion; with characters missing here and there, and sentences thrown together without natural connexion. *Khân Hào* has endeavoured to readjust them; but I have preferred to follow the order of the imperial and other editions. The *Khien-lung* editors advise the reader to do so, and make the best he can of them by means of *K'ang Hsüan's* notes. *Khân Hào's* order is—

20. For all these the buttons and loops were made of silk cords.

21. The knee-covers of a ruler were of vermilion colour; those of a Great officer, white; and of another officer, purple:—all of leather; and might be rounded, slanting, and straight. Those of the son of Heaven were straight (and pointed at all the corners); of the prince of a state, square both at bottom and top; of a Great officer, square at the bottom, with the corners at the top rounded off; and of another officer, straight both at bottom and top.

22. The width of these covers was 2 cubits at bottom, and 1 at top. Their length was 3 cubits. On each side of (what was called) the neck were 5 inches, reaching to the shoulders or corners. From the shoulders to the leathern band were 2 inches¹.

23. The great girdle of a Great officer was 4

paragraphs—25, 19, 20, 27, 23, 21, 22, 24, 26, 28, 29. By this arrangement something like a train of thought can be made out.

¹ The knee-covers of the prince of a state are represented thus—

; and of a Great officer,

The middle suspender joined on to the top strap at the neck; the two others at the shoulders. On the central portions of the cover were represented certain of the emblems of distinction, according to the rank of the wearer:—dragons on the king's; flames on a prince's; and mountains on a Great officer's. But I do not think the makers of these figures had distinct ideas of the articles which they intended to represent. They certainly fail in giving the student such ideas. The colours, &c., moreover, appear to have varied with the occasions on which they were worn.

inches (wide)¹. In variegated girdles, the colours for a ruler were vermilion and green; for a Great officer, cerulean and yellow; for an (ordinary) officer, a black border of 2 inches, and this, when carried round the body a second time, appeared to be 4 inches. On all girdles which were tucked in there was no needlework.

24. (An officer) who had received his first commission wore a cover of reddish-purple, with a black supporter for his girdle-pendant. One who had received the second commission wore a scarlet cover, (also) with a black supporter for the pendant; and one who had received the third commission, a scarlet cover, with an onion-green supporter for the pendant².

25. The son of Heaven wore a girdle of plain white silk, with vermilion lining, and ornamented ends.

26. The queen wore a robe with white pheasants embroidered on it; (a prince's) wife, one with green pheasants³.

27. (The cords that formed the loops and buttons) were 3 inches long, equal to the breadth of the girdle. The rule for the length of the sash (descending from the girdle) was, that, for an officer, it should

¹ This, according to the *K'hien-lung* editors, was the girdle or sash of 'correct dress,' and white. The variegated girdles, they say, were worn in private and when at leisure.

² The character for a knee-cover here (韃, fū) is different from that in paragraph 21 (韃, pī); but the *K'hien-lung* editors say their significance is exactly the same. How the knee-covers and the supporter or balance-yard (衡, hāng) of the girdle pendant are spoken of together, I do not know.

³ The pheasants here referred to are described as I have done in the *R-Ya*. The 'wife' is supposed also to include the ladies called the king's 'three helpmates' in Book I, ii, Part ii, 1.

be 3 cubits; for one discharging a special service, $2\frac{1}{2}$. 3ze-yû said, 'Divide all below the girdle into three parts, and the sash will be equal to two of them. The sash, the knee-covers, and the ties are all of equal length¹.'

28. (The wife of a count or baron) who had received a degree of honour from the ruler² wore a pheasant cut out in silk on her robe; (the wife of the Great officer of a count or baron), who had received two degrees, wore a robe of fresh yellow; (the wife of a Great officer), who had received one degree, a robe of white; and the wife of an ordinary officer, a robe of black.

29. Only the ladies of honour³ received their degree of appointment, when they presented their cocoons. The others all wore the dresses proper to them as the wives of their husbands.

¹ K'hsan Hsiao says, 'Man's length is 8 cubits; below the waist $4\frac{1}{2}$ (= 45 inches). A third of this is 15 inches. $2 \times 15 = 30$ or 3 cubits, the length of the sash, and of the covers in par. 22.' The cubit must have been shorter than the name now indicates. I do not know what the 'ties' were.

² K'ang Hsüan took the ruler here to be feminine, and to mean 'the queen;' and, notwithstanding the protest of the K'ien-lung editors, I think he was right. This paragraph and the next speak of the queen and ladies who were brought around her by their work in silk. Why may we not suppose that in her department she could confer distinction on the deserving as the king did in his? This passage seems to show that she did so.

³ These ladies—'hereditary wives'—occur also in Bk. I, ii, Part ii, 1. It is commonly said that there were twenty-seven members of the royal harem, who had each that title; but there is much vagueness and uncertainty about all such statements. 'The others' must refer to the ladies, wives of the feudal lords and Great officers, whose rank gave them the privilege to co-operate with the queen in her direction of the nourishing of the silkworms and preparation of silk.

SECTION III.

1. All (officers) in attendance on the ruler let the sash hang down till their feet seemed to tread on the lower edge (of their skirt)¹. Their chins projected like the eaves of a house, and their hands were clasped before them low down. Their eyes were directed downwards, and their ears were higher than the eyes. They saw (the ruler) from his girdle up to his collar. They listened to him with their ears turned to the left ².

2. When the ruler called (an officer) to his presence, he might send three tokens. If two of them came to him, he ran (to answer the message); if (only) one, he yet walked quickly. If in his office, he did not wait for his shoes; if he were outside elsewhere, he did not wait for his carriage.

3. When an officer received a visit from a Great officer, he did not venture to bow (when he went) to meet him ³; but he did so when escorting him on his departure. When he went to visit one of higher rank than himself, he first bowed (at the gate) and then went into his presence. If the other bowed to him in replying, he hurried on one side to avoid (the honour).

4. When an officer was speaking before the ruler, if he had occasion to speak of a Great officer who was dead, he called him by his posthumous epithet, or by the designation of his maturity; if of an officer

¹ See vol. xxvii, page 100, note 1.

² They were on the right of the ruler, and turned their ears to the left to hear him.

³ That the more honourable visitor might not have the trouble of responding with a bow.

(who was similarly dead), he called him by his name. When speaking with a Great officer, he mentioned officers by their name, and (other) Great officers by their designation.

5. In speaking at a Great officer's, he avoided using the name of the (former) ruler, but not that of any of his own dead. At all sacrifices and in the ancestral temple, there was no avoiding of names. In school there was no avoiding of any character in the text.

6. Anciently, men of rank did not fail to wear their girdle-pendants with their precious stones, those on the right giving the notes *Kih* and *Kio*, and those on the left *Kung* and *Yü*¹.

When (the king or ruler) was walking quickly (to the court of audience), he did so to the music of the *Shâi K'hi*; when walking more quickly (back to the reception-hall), they played the *Sze hsiâ*². When turning round, he made a complete circle; when turning in another direction, he did so at a right angle. When advancing, he inclined forward a little; he held himself up straight; and in all these movements, the pieces of jade emitted their tinklings. So also the man of rank, when in his carriage, heard the harmonious sounds of its bells; and, when walking, those of his pendant jade-stones; and in this way evil and depraved thoughts found no entrance into his mind.

7. When the ruler was present, (his son and heir)

¹ *Kih* and *Kio* were the fourth and third notes of the musical scale, corresponding to our D and B; *Kung* and *Yü*, the first and fifth, corresponding to G and E. See the Chinese Classics, vol. iii, p. 84, note.

² *Shâi K'hi* is taken as another name for the *Khû Shze*, Chinese Classics, vol. iii, pp. 317-318.

did not wear the pendant of jade-stones. He tied it up on the left of his girdle, and left free the pendant (of useful things) on the right. When seated at ease, he wore the (jade) pendant; but in court, he tied it up¹.

In fasting and vigil they wore it, but the strings were turned round, and fastened at the girdle. They wore then the purple knee-covers¹.

8. All wore the jade-stone pendant at the girdle, excepting during the mourning rites. (At the end of the middle string) in it was the tooth-like piece, colliding with the others. A man of rank was never without this pendant, excepting for some sufficient reason; he regarded the pieces of jade as emblematic of the virtues (which he should cultivate).

9. The son of Heaven had his pendant composed of beads of white jade, hung on dark-coloured strings; a duke or marquis, his of jade-beads of hill-azure, on vermilion strings; a Great officer, his of beads of aqua-marine, on black strings; an heir-son, his of beads of Yü jade, on variegated strings; an ordinary officer, his of beads of jade-like quartz, on orange-coloured strings.

Confucius wore at his pendant balls of ivory², five inches (round), on gray strings.

10. According to the regulations for (the dress of) a lad³, his upper garment was of black linen,

¹ There were three pendants from the girdle:—the jade-stone in the middle, called the pendant of 'virtue;' and two others of useful things on the left and right, of which we shall read by and by. The subject of the first two sentences is said, correctly as I think, to be the heir-son of a ruler; while the last two have a more general application.

² Or 'an ivory ring.'

³ One who had not yet been capped.

with an embroidered edging. His sash was embroidered, and (also) the strings for the button-loops (of his girdle). With such a string he bound up his hair. The embroidered border and strings were all red.

11. When the ends of fastening strings reached to the girdle, if they had any toilsome business to do, they put them aside. If they were running, they thrust them in the breast¹.

12. A lad did not wear furs, nor silk, nor the ornamental points on his shoes. He did not wear the three months' mourning. He did not wear the hempen band, when receiving any orders. When he had nothing to do (in mourning rites), he stood on the north of the principal mourner, with his face to the south. When going to see a teacher, he followed in the suite of others, and entered his apartment.

13. When one was sitting at a meal with another older than himself, or of a different (and higher) rank, he was the last to put down the offering², but the first to taste the food. When the guest put down the offering, the host apologised, saying that the food was not worthy of such a tribute. When the guest was enjoying the viands, the host apologised for their being scanty and poor. When the host himself put down the pickle (for the guest), the guest himself removed it. When the members of a household ate together, not being host and guests, one of them removed the dishes; and the same was done when a company had eaten together. At all festival meals, the women (of the house) did not remove the dishes.

¹ This paragraph seems to be out of place. K'ang thought should follow the first sentence of paragraph 27 in the last part.

² By way of thanksgiving to the father of Cookery.

14. When eating dates, peaches, or plums, they did not cast the stones away (on the ground)¹. They put down the first slice of a melon as an offering, ate the other slices, and threw away the part by which they held it. When others were eating fruits with a man of rank, they ate them after him; cooked viands they ate before him². At meetings of rejoicing, if there were not some gift from the ruler, they did not congratulate one another; at meetings of sorrow³,

15. If one had any toilsome business to do, he took them in his hand. If he were running, he thrust them in his breast⁴.

16. When Confucius was eating with (the head of) the K'î family, he made no attempt to decline anything, but finished his meal with the rice and liquid added to it, without eating any of the flesh⁵.

17. When the ruler sent (to an officer) the gift of a carriage and horses, he used them in going to give thanks for them. When the gift was of clothes, he wore them on the same occasion. (In the case of similar gifts to a commissioner from the king), until his (own) ruler had given him orders to use them, he did not dare at once to do so⁶. When the ruler's

¹ Compare vol. xxvii, page 81, paragraph 6a.

² Fruits were the productions of nature, and there could be no poison in them. Cooked food might have been tampered with, and those in attendance on a superior man first tasted it as a precaution for his safety.

³ The conclusion is evidently lost.

⁴ A mistaken and meaningless repetition of part of paragraph 11.

⁵ To express, it is supposed, his dissatisfaction with some want of courtesy in his host.

⁶ This sentence is perplexing, and there are different views in interpreting it. I have followed K'ang Hsüan.

gift reached him, he bowed his head to the ground with his two hands also, laying one of them over the other. A gift of liquor and flesh did not require the second expression of thanks (by the visit).

18. Whenever a gift was conferred on a man of rank, nothing was given to a small man on the same day.

19. In all cases of presenting offerings to a ruler, a Great officer sent his steward with them, and an ordinary officer went with them himself. In both cases they did obeisance twice, with their heads to the ground as they sent the things away; and again the steward and the officer did the same at the ruler's¹. If the offerings were of prepared food for the ruler, there were the accompaniments of ginger and other pungent vegetables, of a peach-wood and a sedge-broom². A Great officer dispensed with the broom, and the officer with the pungent vegetables. (The bearers) went in with all the articles to the cook. The Great officer did not go in person to make obeisance, lest the ruler should come to respond to him.

20. When a Great officer went (next day) to do obeisance for the ruler's gift, he retired after performing the ceremony. An officer, (doing the same), waited to receive the ruler's acknowledgment (of his visit), and then retired, bowing again as he did so; but (the ruler) did not respond to his obeisance.

When a Great officer gave anything in person to an ordinary officer, the latter bowed on receiving

¹ This translation seems to make too much out of the text; but it is after Khung Ying-tâ, K'ân Hào, and others.

² Such presents might decompose or become offensive, and therefore these accompaniments were sent with them.

it ; and also went to his house to repeat the obeisance. He did not, however, wear the clothes (which might have been the gift), in going to make that obeisance.

(In interchanges between) equals, if (the recipient) were in the house (when the gift arrived), he went and made his obeisance in the house (of the donor).

21. When any one presented an offering to his superior in rank, he did not dare to say directly that it was for him¹.

An ordinary officer did not presume to receive the congratulations of a Great officer ; but a Great officer of the lowest grade did so from one of the highest.

When one was exchanging courtesies with another, if his father were alive, he would appeal to his authority ; if the other gave him a gift, he would say, in making obeisance for it, that he did so for his father.

22. If the ceremony were not very great, the (beauty of the) dress was not concealed. In accordance with this, when the great robe of fur was worn, it was without the appendage of one of thin silk to display it, and when (the king) rode in the grand carriage, he did not bend forward to the cross-bar (to show his reverence for any one beyond the service he was engaged on)².

¹ He would say, for instance, that it was for some member of his household.

² There are only fifteen characters in this paragraph, nor is there any intricacy in its structure, but few passages in the collection perplex a translator more. If we leave out the negatives in the former sentence, the meaning becomes clear. The grand carriage and grand fur-robe were used at the greatest of all ceremonies, the solstitial sacrifice to Heaven, which itself so occupied the mind

23. When a father's summons came to him, a son reverently obeyed it without any delay. Whatever work he had in hand, he laid aside. He ejected the meat that was in his mouth, and ran, not contenting himself with a measured, though rapid pace. When his parents were old and he had gone away, he did not go to a second place, nor delay his return beyond the time agreed on; when they were ailing, his looks and manner appeared troubled:—these were less-important observances of a filial son.

24. When his father died, he could not (bear to) read his books;—the touch of his hand seemed still to be on them. When his mother died, he could not (bear to) drink from the cups and bowls that she had used;—the breath of her mouth seemed still to be on them.

25. When a ruler, (visiting another ruler), was about to enter the gate, the attendant dusted the low post (at the middle of the threshold). The Great officers stood midway between the side-posts and this short post (behind their respective rulers). An officer, acting as an attendant, brushed the side-posts.

(A Great officer) on a mission from another court, did not enter at the middle of (either half of) the gate, nor tread on the threshold. If he were come on public business, he entered on the west of the short post; if on his own business, on the east of it.

26. A ruler and a representative of the dead brought their feet together step by step when they walked; a Great officer stepped along, one foot after the other; an ordinary officer kept the length of his

of the sovereign that he was supposed to think of nothing else. The paragraph might have had a more appropriate place in the seventh Book or the ninth.

foot between his steps. In walking slowly, they all observed these rules. In walking rapidly, while they wished to push on (and did so), they were not allowed to alter the motion either of hands or feet. In turning their feet inwards or outwards, they did not lift them up, and the edge of the lower garment dragged along, like the water of a stream. In walking on the mats it was the same.

When walking erect, (the body was yet bent, and) the chin projected like the eaves of a house, and their advance was straight as an arrow. When walking rapidly, the body had the appearance of rising constantly with an elevation of the feet. When carrying a tortoise-shell or (a symbol of) jade, they raised their toes and trailed their heels, presenting an appearance of carefulness.

27. In walking (on the road), the carriage of the body was straight and smart ; in the ancestral temple, it was reverent and grave ; in the court, it was exact and easy.

28. The carriage of a man of rank was easy, but somewhat slow ;—grave and reserved, when he saw any one whom he wished to honour. He did not move his feet lightly, nor his hands irreverently. His eyes looked straightforward, and his mouth was kept quiet and composed. No sound from him broke the stillness, and his head was carried upright. His breath came without panting or stoppage, and his standing gave (the beholder) an impression of virtue. His looks were grave, and he sat like a personator of the dead¹. When at leisure and at ease, and in conversation, he looked mild and bland.

¹ See vol. xxvii, page 62, paragraph 6, and note 2.

29. At all sacrifices, the bearing and appearance (of the worshippers) made it appear as if they saw those to whom they were sacrificing.

30. When engaged with the mourning rites, they had a wearied look, and an aspect of sorrow and unrest. Their eyes looked startled and dim, and their speech was drawling and low.

31. The carriage of a martialist was bold and daring; his speech had a tone of decision and command; his face was stern and determined; and his eyes were clear and bright.

32. He stood with an appearance of lowliness, but with no indication of subserviency. His head rose straight up from the centre of the neck. He stood (firm) as a mountain, and his movements were well timed. His body was well filled with the volume of his breath, which came forth powerfully like that of nature. His complexion showed (the beauty and strength of) a piece of jade¹.

33. When they spoke of themselves, the style of the son of Heaven was, 'I, the One man;' a chief of regions described himself as 'The strong minister.

¹ On the translation of this, and many of the paragraphs immediately preceding, Callery says:—'The Chinese text contains dissyllabic expressions very difficult to translate, because they are a sort of onomatopœias, which have nothing in common with the nature of the things to which they are applied. We could do nothing better with them than adopt the sense given by the commentators.' But these binomial combinations, which are often repetitions of the same character, are only onomatopoeitic in the sense in which all words, sensuously descriptive at first, are applied by the mind to express its own concepts; metaphorical rather than onomatopoeitic. They are very common in the Shih, or Book of Poetry, and in all passionate, descriptive composition. So it is in other languages as well as Chinese.

of the son of Heaven;' the relation of a feudal lord expressed itself by 'So and So, the guardian of such and such a territory.' If the fief were on the borders, he used the style—'So and So, the minister in such and such a screen.' Among his equals and those below him, he called himself 'The man of little virtue.' The ruler of a small state called himself 'The orphan.' The officer who answered for him (at a higher court) also styled him so¹.

34. A Great officer of the highest grade (at his own court), called himself 'Your inferior minister;' (at another court), his attendant who answered for him, described him as 'The ancient of our poor ruler.' A Great officer of the lowest grade (at his own court), called himself by his name; (at another court), his attendant described him as 'Our unworthy Great officer.' The son and heir of a feudal prince (at his own court), called himself by his name; (at another court), his attendant described him as 'The rightful son of our unworthy ruler.'

35. A ruler's son (by an inferior lady) called himself 'Your minister, the shoot from the stock.' An (ordinary) officer styled himself 'Your minister, the fleet courier;' to a Great officer, he described himself as 'The outside commoner.' When a Great officer went on a mission about private affairs, a man of his private establishment went with him as his spokesman, and called him by his name.

36. When an officer belonging to the ruler's establishment acted (at another court for a Great officer), he spoke of him as 'Our unworthy Great officer,' or 'The ancient of our unworthy ruler.'

¹ So, most commentators; but this last sentence is not clear.

When a Great officer went on any mission, it was the rule that he should have such an officer from the ruler's establishment with him, to answer for him.

PLAN OF THE HALL OF DISTINCTION.

BOOK XII. MING THANG WEI

OR

THE PLACES IN THE HALL OF DISTINCTION¹.

1. Formerly, when the duke of *Kâu* gave audience to the feudal princes in their several places in the Hall of Distinction, the son of Heaven stood with his back to the axe-embroidered screen², and his face towards the south³.

2. The three dukes⁴ were in front of the steps, in the middle, with their faces to the north, inclining to the east as the most honourable position⁵. The places of the marquises were at the east of the

¹ See introductory notice, vol. xxvii, pp. 28-30. On the opposite page there is the plan of the Hall, as given in Morrison's Dictionary, vol. i, part i, page 512. Compare it with the less complicated figure in vol. xxvii, page 252.

² See vol. xxvii, page 111, paragraph 11.

³ Many chronological and other perplexing questions arise in connexion with the great audience described in this and the paragraphs that immediately follow. The time should be referred, I think, to the inauguration of Lo as the eastern capital of *Kâu*, probably in B.C. 1109, at the close of the duke of *Kâu*'s regency for the young king *Khăng*; see the *Shû*, V, xiii. That 'the son of Heaven' must be understood of king *Khăng* himself, and not of the duke of *Kâu*, is a point, it seems to me, that no Chinese commentator should ever have called in question.

⁴ The three Kung, I suppose, mentioned in vol. iii, page 227, paragraph 3. The duke of *Kâu* was himself one of them; but perhaps, during his regency, another had been appointed in his place.

⁵ The text here simply = 'the east the upper.' The nearer one was to the king, the more honourable was his position.

eastern steps, with their faces to the west, inclining to the north as the most honourable position. The lords of the earldoms were at the west of the western steps, with their faces to the east, inclining also and for the same reason to the north. The counts were on the east of the gate, with their faces to the north, inclining to the east as the more honourable position. The barons were on the west of the gate, with their faces to the north, inclining also and for the same reason to the east.

3. The chiefs of the nine Î¹ were outside the eastern door, with their faces to the west, inclining to the north as the position of honour; those of the eight Mân were outside the door on the south, with their faces to the north, inclining for the same reason to the east; those of the six Zung were outside the door on the west, with their faces to the east, inclining for the same reason to the south; and those of the five Tî were outside the door on the north, with their faces to the south, inclining for the same reason to the east.

4. The chiefs of the nine 3hâi were outside the Ying gate, with their faces to the north, inclining to the east as the position of honour for them; those of the four Sâi (also) came, who had only once in their time to announce their arrival (at the court). These were the places of the lords in the Hall of Distinction (when they appeared before) the duke of Kâu².

¹ Î was the general name for the wild tribes of the east; Mân, for those of the south; Zung, for those of the west; and Tî, for those of the north.

² It is so difficult to explain what is meant by 'the nine 3hâi,' and again by 'the four Sâi,' that I am inclined to doubt, with Wang Yen (王炎) and others, the genuineness of this paragraph.

5. The Hall of Distinction was so called, because in it the rank of the princes was clearly shown as high or low¹.

6. Formerly, when *Kâu* of Yin was throwing the whole kingdom into confusion, he made dried slices of (the flesh of) the marquis of Kwei², and used them in feasting the princes. On this account the duke of *Kâu* assisted king *Wû* in attacking *Kâu*. When king *Wû* died, king *Khǎng* being young and weak, the duke took the seat of the son of Heaven³, and governed the kingdom. During six years he gave audience to all the princes in the Hall of Distinction; instituted ceremonies, made his instruments of music, gave out his (standard) weights and measures⁴, and there was a grand submission throughout the kingdom.

7. In the seventh year, he resigned the government to king *Khǎng*; and he, in consideration of the duke's services to the kingdom, invested him with (the territory about) *Khü-fû*⁵, seven hundred li square, and sending forth a thousand chariots of

¹ See the introduction, vol. xxvii, page 28.

² 'The marquis of Kwei' appears in Sze-mâ *Khien's* history of Yin (near the end), as the marquis of *Khiû* (九侯), and is made into pickle. The reference, no doubt, is to some act of atrocious and wanton cruelty on the part of *Kâu*.

³ This can only mean that the duke, as regent, administered the government, though the compiler of the Book wanted to exalt his personality beyond the bounds of truth.

⁴ The text is—measures of length and of capacity.

⁵ *Khü-fû* is still a district city in the department of Yen-kâu, Shan-tung. It was the capital of *Lû*; and is called by foreigners 'the city of Confucius.' It contains the great temple of the sage, and is the residence of his representative-descendant, with thousands of other Khungs.

war¹. He (also) gave charge that (the princes of) Lû, from generation to generation, should sacrifice to the duke of Kâu with the ceremonies and music proper at a sacrifice by the son of Heaven.

8. Thus it was that the rulers of Lû, in the first month of spring, rode in a grand carriage, displaying the banner, suspended from its bow-like arm, with the twelve streamers, and having the sun and moon emblazoned on it, to sacrifice to God in the suburb of their metropolis, associating Hâu K' as his assessor in the service ;—according to the ceremonies used by the son of Heaven².

9. In the last month of summer, the sixth month, they used the ceremonies of the great sacrifice in sacrificing to the duke of Kâu in the great ancestral temple, employing for the victim to him a white bull. The cups were those with the figure of a victim bull, of an elephant, and of hills and clouds ; that for the fragrant spirits was the one with gilt eyes on it. For libations they used the cup of jade with the handle made of a long rank-symbol. The dishes with the offerings were on stands of wood, adorned with jade and carved. The cups for the personator were of jade carved in the same way. There were also the plain cups and those of horn, adorned with round pieces of jade ; and for the meat-stands, they used those with four feet and the cross-binders.

10. (The singers) went up to the hall (or stage),

¹ This is one of the gross exaggerations in the Book. The marquisate of Lû was only a hundred lî square on its first constitution.

² Of this and many of the statements in the paragraphs that follow, see the fourth of the 'Praise Odes of Lû,' in the Shih, Metrical version, pp. 379-383.

and sang the *K'ing Miào*; (in the court) below, (the pantomimes) performed the *Hsiang* dance¹, to the accompaniment of the wind instruments. With their red shields and jade-adorned axes, and in their caps with pendants, they danced to the music of the *Tâ Wû*²; in their skin caps, and large white skirts gathered at the waist, and jacket of silk, they danced the *Tâ Hsiâ*³. There (were also) the *Mei*, or music of the wild tribes of the East; and the *Zăn*, or music of those of the South. The introduction of these two in the grand temple was to signalise the distinction of *Lû* all over the kingdom.

11. The ruler, in his dragon-figured robe and cap with pendants, stood at the eastern steps; and his wife, in her head-dress and embroidered robe, stood in her room. The ruler, with shoulder bared, met the victim at the gate; his wife brought in the stands for the dishes. The ministers and Great officers assisted the ruler; their wives⁴ assisted his wife. Each one discharged the duty proper to him or her. Any officer who neglected his duty was severely punished; and throughout the kingdom there was a great acknowledgment of, and submission to, (the worth of the duke of *Kâu*).

12. (In *Lû*) they offered (also) the sacrifices of summer, autumn, and winter (in the ancestral temple); with those at the altars of the land and grain in spring, and that at the autumnal hunt, going on to the great sacrifice of thanksgiving at

¹ See vol. xxvii, page 361, paragraph 21.

² Attributed to king *Wû*.

³ Said to be of the *Hsiâ* dynasty.

⁴ 'The commissioned wives;' including, according to *K'ăn Hão*, the ruler's 'ladies of honour,' as well as the wives of his ministers and Great officers.

the end of the year :—all (after the pattern of) the sacrifices of the son of Heaven.

13. The grand temple (of Lû) corresponded to the Hall of Distinction of the son of Heaven, the Khû gate of the (marquis's palace) to the Kâo (or outer) gate of the king's, and the Kih gate to the Ying¹. They shook the bell with the wooden clapper in the court as was done in the royal court, in announcing governmental orders.

14. The capitals of the pillars with hills carved on them, and the pond-weed carving on the small pillars above the beams; the second storey and the great beams projecting under the eaves; the polished pillars and the windows opposite to one another; the earthen stand on which the cups, after being used, were placed; the high stand on which the jade tokens were displayed aloft; and the slightly carved screen:—all these were ornaments of the temple of the son of Heaven².

15. (The princes of Lû) had, as carriages, that of (Shun), the lord of Yü, furnished with bells; that of the sovereign of Hsiâ, with its carved front; the Great carriage (of wood), or that of Yin; and the carriage (adorned with jade), or that of Kâu.

16. They had, as flags or banners, that of (Shun), the lord of Yü; the yak's tail of the sovereign of Hsiâ; the great white flag of Yin; and the corresponding red one of Kâu.

¹ The five gates of the royal palace, beginning with the outermost, were the Kâo (皇), the Khû (庫), the Kih (雉), the Ying (應), and the Lû (路); the palaces of the princes wanted the Kâo and Ying gates. The grand temples appear to have been constructed on a similar plan, to the east of the palace.

² And in the temple of Lû, also, it is implied.

17. They had the white horses of the sovereign of Hsiâ, with their black manes; the white horses of Yin, with their black heads; and the bay horses of Kâu, with red manes. The sovereigns of Hsiâ preferred black victims; those of Yin, white; and those of Kâu, victims which were red and strong.

18. Of jugs for liquor, they had the earthenware jug of the lord of Yü; the jug of Hsiâ, with clouds and hills figured on it; the *kio* of Yin, with no base, which rested directly on the ground; and the jugs of Kâu, with a victim-bull or an elephant on them.

19. For bowls or cups they had the *kân*¹ of Hsiâ; the *kia* of Yin²; and the *kio* of Kâu³.

20. For libations they had the jug of Hsiâ, with a cock on it; the *kia* of Yin; and that of Kâu, with gilt eyes on it.

For ladles they had that of Hsiâ, with the handle ending in a dragon's head; that of Yin, slightly carved all over; and that of Kâu, with the handle like plaited rushes.

21. They had the earthen drum, with clods for the drumstick and the reed pipe,—producing the music of *Î-khi*⁴; the pillow-like bundles of chaff,

¹ Made of-jade, or adorned with it.

² With plants of grain figured on it.

³ Also made of, or adorned with, jade.

⁴ *Î-khi* is said by K'ang to be 'the dynastic title of an ancient son of Heaven.' Many identify him with Shân N'ang, who generally follows Fû-hsî in the chronology, and who cannot be placed later than the thirty-first century B. C., if we can speak at all of so distant dates. Evidently the compiler is putting down the names of the most ancient instruments which he had heard of. There is in the K'ien-lung edition of our collection, chapter 81, page 5, a representation of the drum and its handle; with a collection of the views about them, contradictory and fantastical,

which were struck¹; the sounding stone of jade; the instruments rubbed or struck, (to regulate the commencement and close of the music)²; the great lute and great cithern; the medium lute and little cithern³:—the musical instruments of the four dynasties.

22. The temple of the duke of Lû was maintained from generation to generation like that of (king) Wăn (in the capital of Kâu), and the temple of duke Wû in the same way like that of (king) Wû⁴.

23. They had the hsiang (school) of the lord of Yü, in connexion with which were kept the stores of (sacrificial) rice⁵; the hsü school of the sovereign of Hsiâ; the school of Yin, in which the blind were

so that it is not worth while to reproduce them here. There is a figure also of the reed pipe, which can only have been something a little superior to the early 'oaten pipe' of the west.

¹ This also is represented in the *K'ien-lung* edition; but how anything like music could be brought from the pillows I do not know. The two characters, supposed to give the name, are found, perhaps, in the *Shu*, II, iv, 9, used with verbal force of playing on the lute.

² The *K'ü* and *Yü*; see vol. xxvii, pages 219 and 273.

³ The invention of the lute and cithern is ascribed to Fû-hsi. They are represented thus—

⁴ The duke of Lû here is the first duke, Po-khin (B.C. 1115-1063). Duke Wû was the ninth duke (B.C. 826-817).

⁵ As a lesson, it is said, of filial duty.

honoured¹; and the college of *Kâu*, with its semi-circle of water.

24. They had the tripods of *Khung*² and *Kwan*²; the great jade hemisphere; and the tortoise-shell of *Făng-fû*³:—all articles (properly) belonging to the son of Heaven. They (also) had the lance of *Yüeh*³; and the great bow,—military weapons of the son of Heaven.

25. They had the drum of *Hsiâ* supported on four legs; that of *Yin* supported on a single pillar; the drums of *Kâu*, pendent from a stand; the peal of bells of *Sui*⁴; the differently toned *k'ing* (sonorous stones) of *Shû*⁵; and the organ of *Nü-kwâ*⁶, with its tongues.

26. They had the music-stand of *Hsiâ*, with its face-board and posts, on which dragons were carved; that of *Yin*, with the high-toothed face-board; and that of *Kâu*, with its round ornaments of jade, and feathers (hung from the corners).

¹ The father of Music, it is said, was here sacrificed to, or had offerings presented to him. All this is very uncertain. Blind men were used as musicians.

² These are names of states mentioned in the *Shû*, with which we find king *Wăn* at war.

³ *Făng-fû* must also be the name of an ancient state; but where it was I do not know. *Yüeh* was a great state, south of *Wû*, on the seaboard.

⁴ See the *Shû*, II, i, 21, and note.

⁵ *Shû* was also called *Wû-kâu* (無句).

⁶ *Nü-kwâ* is placed between *Fû-hsî* and *Shăn Năng*. Various fabulous marvels are related of him or her (for many hold the name to be that of a female) in the account of the five *Ti*s, prefixed to *Sze-mâ K'ien*'s histories. The organ is represented thus—

27. They had the two tui of the lord of Yü (for holding the grain at sacrifices); the four lien of Hsiâ; the six hû of Yin; and the eight kwei of K'âu¹.

28. They had for stands (on which to set forth the flesh of the victims), the khwan of Shun; the k'üeh of Hsiâ; the k'ü of Yin; and the room-like stand of K'âu. For the tall supports of the dishes, they used those of Hsiâ of unadorned wood; those of Yin, adorned with jade; and those of K'âu, with feathers carved on them.

29. They had the plain leather knee-covers of Shun; those of Hsiâ, with hills represented on them; those of Yin, with flames; and those of K'âu, with dragons.

30. They used for their sacrificial offerings (to the father of Cookery), like the lord of Yü, (portions of) the head; like the sovereigns of Hsiâ, (portions of) the heart; as they did under Yin, (portions of) the liver; and as they did under K'âu, (portions of) the lungs².

31. They used the bright water preferred by Hsiâ; the unfermented liquor preferred by Yin; and the completed liquor preferred by K'âu³.

¹ Figures of all these are given. The number of the vessels in the different dynasties is thought to have been regulated by the number of the kinds of grain; but most of this is conjecture.

² K'ang Hsüan, in explanation of these practices, has only three characters, which I confess I do not fully comprehend. Khung Ying-tâ says nothing about them, nor the K'ien-lung editors. Fang K'ueh writes, on the relation between the five elements and the five colours, and the symbolical colours adopted by the different dynasties, and of the different members of the victims; very mystically and darkly, and failing to elucidate the passage.

³ There have been various references to these points already, and there will be more hereafter.

32. They used (the names) of the 50 officers of the lord of Yü; of the 100 of the sovereigns of Hsiâ; of the 200 of Yin; and of the 300 of K'âu¹.

33. (At their funerals) they used the feathery ornaments of the lord of Yü; the wrappings of white silk (about the flag-staffs) of the sovereigns of Hsiâ; (the flags) with their toothed edges of Yin; and the round pieces of jade and plumes of K'âu².

34. Lû (thus) used the robes, vessels and officers of all the four dynasties, and so it observed the royal ceremonies. It long transmitted them everywhere. Its rulers and ministers never killed one another. Its rites, music, punishments, laws, governmental proceedings, manners and customs never changed. Throughout the kingdom it was considered the state which exhibited the right ways; and therefore dependence was placed on it in the matters of ceremonies and music³.

¹ Compare the Shû, V, xx, 3. Various attempts are made to reconcile the statements there and those of this paragraph; 'all,' says K'han Hào, 'mere conjectures.'

² Compare paragraph 22, page 139, vol. xxvii.

³ Much of what is said here is glaringly false; and justifies what is said of the Book in the introduction, page 29.

BOOK XIII. SANG FŪ HSIÃO KĪ

OR

RECORD OF SMALLER MATTERS IN THE DRESS OF MOURNING¹.

SECTION I.

1. When wearing the unhemmed sackcloth (for a father), (the son) tied up his hair with a hempen (band), and also when wearing it for a mother. When he exchanged this band for the cincture (in the case of mourning for his mother)², this was made of linen cloth.

(A wife)³, when wearing the (one year's mourning) of sackcloth with the edges even, had the girdle (of the same), and the inferior hair-pin (of hazel-wood), and wore these to the end of the mourning.

2. (Ordinarily) men wore the cap, and women the hair-pin; (in mourning) men wore the cincture, and women the same after the female fashion.

¹ See the introductory notice, vol. xxvii, page 30.

² This was done after the slighter dressing of the corpse. The cincture (wǎn, 免) is mentioned in the first paragraph of the Than Kung (vol. xxvii, page 120). The hempen band being removed, one of linen cloth, about the breadth of which there are different accounts, was put round the hair on the crown, taken forward to the forehead, there crossed, taken back again, and knotted at the back of the hair.

³ The text does not mention 'the wife' here; but a comparison of different passages shows that this sentence is only applicable to her.

The idea was (simply) to maintain in this way a distinction between them ¹.

3. The dark-coloured staff was of bamboo; that pared and fashioned (at the end) was of eleococca wood ².

4. When the grandfather was dead, and afterwards (the grandson) had to go into mourning for his grandmother, he, being the representative of the family (through the death of his father), did so for three years.

5. The eldest son, (at the mourning rites) for his father or mother, (before bowing to a visitor who had come to condole with him), first laid his forehead to the ground (as an expression of his sorrow).

When a Great officer came to condole (with an ordinary officer), though it might be (only) in a case of the three months' mourning, (the latter first) laid his forehead to the ground ³.

A wife, at the rites for her husband or eldest son, bowed her head to the ground before she saluted

¹ Anciently, it is said, there was no distinction between these two cinctures, but in the name. There probably came to be some difference between them; but what it was I cannot discover.

² This is found also in the 𣎵 Lî, XXXII, 5; but the interpretation there is as difficult as here. The translation of the first character (𣎵, 𣎵) by 'dark-coloured' is from Khung Ying-tâ. The paring away the end of the dryandria branch was to make it square. The round bamboo was carried in mourning for a father, and was supposed to symbolise heaven; the other was carried in mourning for a mother, and its square end symbolised earth. What heaven and earth were to nature that the father and mother were to a child. I can make nothing more or better of the passage.

³ We do not see how this instance coheres with the former one; nor why the two are brought together.

a visitor ; but in mourning for others, she did not do so ¹.

✓ 6. The man employed to preside (at the mourning rites) was required to be of the same surname (as the deceased parent) ; the wife so employed, of a different surname ².

✓ 7. The son ~~who was his father's successor~~ (as now head of the family) did not wear mourning for his mother who had been divorced.

✓ 8. In counting kindred (and the mourning to be worn of them), the three closest degrees become expanded into five, and those five again into nine. The mourning diminished as the degrees ascended or descended, and the collateral branches also were correspondingly less mourned for ; and the mourning for kindred thus came to an end ³.

9. At the great royal sacrifice to all ancestors, the first place was given to him from whom the founder of the line sprang, and that founder had the place of assessor to him. There came thus to be established four ancestral shrines ⁴. In the

¹ The 'others,' according to K'ang, must be understood of her own parents. She was now identified with a family of another surname ; and her husband's relatives were more to her than her own.

² The son and his wife who should have presided are supposed to be dead. The wife elected for the office would be the wife of some other member of the family, herself therefore of a different surname.

³ The three closest degrees are 'father, son, and son's son.' Add the grandfather and grandson (counting from the son), and we have five ; great-grandfather and great-grandson (here omitted), and we have seven. Then great-great-grandfather and great-great-grandson, make nine ; and the circle of kindred, for whom mourning should be worn, is complete. See Appendix, Book II, vol. xxvii.

⁴ This statement about the four shrines has given occasion to much writing.

case of a son by another than the queen coming to be king, the same course was observed.

10. When a son other than (the eldest) became the ancestor (of a branch of the same line), his successor was its Honoured Head, and he who followed him (in the line) was its smaller Honoured Head. After five generations there was a change again of the Honoured Head; but all in continuation of the High Ancestor.

11. Hence the removal of the ancestor took place high up (in the line), and the change of the Honoured Head low down (in it). Because they honoured the ancestor, they revered the Honoured Head; their reverencing the Honoured Head was the way in which they expressed the honour which they paid to the ancestor and his immediate successor ¹.

12. That any other son but the eldest did not sacrifice to his grandfather showed that (only he was in the direct line from) the Honoured Head (of their branch of the family). So, no son but he wore the (three years') unhemmed sackcloth for his eldest son, because the eldest son of no other continued (the direct line) of the grandfather and father ².

13. None of the other sons sacrificed to a son

¹ The subject imperfectly described in these two paragraphs,—the manner in which a family, ever lengthening its line and multiplying its numbers, was divided into collateral branches, will come before the reader again in the next Book.

² It is difficult to catch exactly the thought in the writer of these, and several of the adjacent, sentences. Even the native critics, down to the *K'hien-lung* editors, seem to experience the difficulty.

(of his own) who had died prematurely, or one who had left no posterity. (The tablet of) such an one was placed along with that of his grandfather, and shared in the offerings made to him.

14. Nor could any of them sacrifice to their father ; showing that (the eldest son was the representative of) the Honoured Head.

15. (In the distinctions of the mourning) for the kindred who are the nearest, the honoured ones to whom honour is paid, the elders who are venerated for their age, and as the different tributes to males and females ; there are seen the greatest manifestations of the course which is right for men.

16. Where mourning would be worn from one's relation with another for parties simply on the ground of that affinity, when that other was dead, the mourning ceased. Where it would have been worn for them on the ground of consanguinity, even though that other were dead, it was still worn ¹.

When a concubine had followed a ruler's wife to the harem, and the wife came to be divorced, the concubine, (following her out of the harem), did not wear mourning for her son ².

17. According to the rules, no one but the king offered the united sacrifice to all ancestors ³.

¹ Khung Ying-tâ specifies six cases coming under the former of these cases, and four under the second. It is not necessary to set them forth. The K'ien-lung editors say that the paragraph has reference only to the practice of the officer ; for a Great officer did not wear mourning either for his wife or mother's kin.

² This concubine would be either of the near relatives of the wife, who had gone with her on her marriage.

³ This paragraph is out of place. It should have formed part, probably, of paragraph 9.

18. The heir-son (of the king or a feudal lord) did not diminish the mourning for the parents of his wife. For his wife he wore the mourning which the eldest and rightful son of a Great officer did for his ¹.

19. When the father was an officer, and the son came to be king or a feudal prince, the father was sacrificed to with the rites of a king or a lord; but the personator wore the dress of an officer. When the father had been the son of Heaven, or a feudal lord, and the son was (only) an officer, the father was sacrificed to with the rites of an officer, but his personator wore only the dress of an officer ².

20. If a wife were divorced while wearing the mourning (for her father or mother-in-law), she put it off. If the thing took place while she was wearing the mourning for her own parents, and before she had completed the first year's mourning, she continued to wear it for the three years; but if that term had been completed, she did not resume the mourning.

If she were called back before the completion of the year, she wore it to the end of that term; but if that term had been completed before she was called back, she went on wearing it to the regular term of mourning for parents.

21. The mourning which lasted for two complete years was (held to be) for three years; and that

¹ The sackcloth for one year, without carrying the staff.

² Both the cases in this paragraph can hardly be taken as anything more than hypothetical. On the concluding statement, the *K'ien-lung* editors ask how the robes of a king could be exhibited in the ancestral temple of an officer.

which lasted for one complete year for two years¹. The mourning for nine months and that for seven months² was held to be for three seasons; that for five months for two; and that for three months for one. Hence the sacrifice at the end of the completed year was according to the prescribed rule; but the putting off the mourning (or a part of it) then was the course (prompted by natural feeling). The sacrifice was not on account of the putting off of the mourning³.

22. When the interment (for some reason) did not take place till after the three years, it was the rule that the two sacrifices (proper at the end of the first and second years) should then be offered. Between them, but not all at the same time, the mourning was put off⁴.

23. If a relative who had himself to wear only the nine months' mourning for the deceased took the direction of the mourning rites in the case of any who must continue their mourning for three years, it was the rule that he should offer for them the two annual terminal sacrifices. If one who was merely a friend took that direction, he only offered

¹ See the introduction on Book XXXV, vol. xxvii, page 49.

² We have not met before with this mourning term of seven months. It occurs in the 1 LĪ, Book XXIV, 6, as to be worn for those who had died in the second degree of prematurity between the age of twelve and fifteen inclusive.

³ 'This remark is made by the compiler,' say the *K'hien-lung* editors, 'to guard against the sudden abandonment of their grief by the mourners, as if they had done with the deceased when the mourning was concluded.'

⁴ After the first, it is said, men put off the mourning headband, and women that of the girdle. After the second they both put off their sackcloth.

the sacrifice of Repose, and that at the placing of the tablet in the shrine ¹.

24. When the concubine of an officer had a son, he wore the three months' mourning for her. If she had no son, he did not do so ².

25. When one had been born (in another state), and had had no intercourse with his grand-uncles and aunts, uncles and cousins, and his father, on hearing of the death of any of them, proceeded to wear mourning, he did not do so.

26. If one did not (through being abroad) hear of the death of his ruler's father or mother, wife or eldest son, till the ruler had put off his mourning, he did not proceed to wear any.

27. If it were a case, however, where the mourning was reduced to that of three months, he wore it ³.

28. (Small) servants in attendance on the ruler, (who had followed him abroad), when he assumed mourning (on his return, for relatives who had died when he was away), also put it on. Other and (higher officers in his train) also did so; but if the proper term for the mourning in the case were past, they did not do so. (Those who had remained at home), though the ruler could not know of their doing so, had worn the (regular) mourning.

¹ Because of the youth of the son, or of some other reason existing in the case. The director would himself be a cousin.

² But Great officers wore the three months' mourning for the relatives who had accompanied their wives to the harem, though they might have had no son. No such relatives accompanied the wife of an officer.

³ This, it is supposed, should follow paragraph 25. There are doubts as to the interpretation of it.

SECTION II.

1. (The presiding mourner), after the sacrifice of Repose, did not carry his staff in proceeding to his apartment; after the placing of the tablet of the deceased (in the shrine of the grandfather), he did not carry it in going up to the hall¹.

2. The (son of another lady of the harem), who had been adopted as the child of the (childless) wife of the ruler, when that wife died, did not go into mourning for her kindred².

3. The sash was shorter (than the headband), by one-fifth of the length (of the latter). The staff was of the same length as the sash³.

4. For the ruler's eldest son a concubine wore

¹ See vol. xxvii, p. 170. I have met with 'the Pacifying sacrifice,' instead of 'the sacrifice of Repose,' which I prefer for 虞 in this application. The character is explained by 安, the symbol of 'being at rest.' The mourners had done all they could for the body of the deceased. It had been laid in the grave; and this sacrifice of Repose was equivalent to our wish for a departed friend, 'Requiescat in pace.' It was offered in the principal apartment of the house. It remained only to place with an appropriate service the tablet of the deceased in its proper shrine in the ancestral temple next day. The staff was discarded by the mourner, it is said, to show that his grief was beginning to be assuaged. He and the others would pass from the principal apartment to others more private; and on leaving the temple, would have to mount the steps to the hall.

² The *K'ien-lung* editors argue, and, I think, correctly, that this paragraph should say the opposite of what it does. They think it has been mutilated.

³ The purely native staff in China is very long. At temples in the interior of the country I have often been asked to buy choice specimens as long as a shepherd's crook, or an alpenstock.

mourning for the same time as his wife, (the son's mother).

5. In putting off the mourning attire, they commenced with what was considered most important. In changing it, they commenced with what was considered least important.

6. When there was not the (regular) occasion for it, they did not open the door of the temple¹. All wailed in the (mourning) shed (at other times).

7. In calling the dead back, and writing the inscription (to be exhibited over the coffin), the language was the same for all, from the son of Heaven to the ordinary officer. A man was called by his name. For a wife they wrote her surname, and her place among her sisters. If they did not know her surname, they wrote the branch-name of her family.

8. The girdle of dolychos cloth assumed with the unhemmed sackcloth (at the end of the wailing), and the hempen girdle worn when one (first) put on the hemmed sackcloth (of one year's mourning), were of the same size. The girdle of dolychos cloth assumed (as a change) in the hemmed sackcloth mourning, and that of hempen cloth at the (beginning of the) nine months' mourning, were of the same size. When the occasion for assuming the girdle of the lighter mourning occurred, a man wore both it and the other together².

¹ This is not the ancestral temple; but the apartment where the body was kept in the coffin, entered regularly for wailing in the morning and evening.

² So far as I can understand this paragraph, it describes the practice of a man (not of a woman), when, while he was wearing

9. An early interment was followed by an early sacrifice of repose. But they did not end their wailing till the three months were completed.

10. When the mourning rites for both parents occurred at the same time, the sacrifices of repose and of the enshrining of the tablet, for the (mother) who was buried first, did not take place till after the burial of the father. The sackcloth worn at her interment was the unhemmed and jagged¹.

11. A Great officer reduced the (period of) mourning for a son by a concubine²; but his grandson, (the son of that son), did not reduce his mourning for his father.

12. A Great officer did not preside at the mourning rites for an (ordinary) officer.

13. For the parents of his nurse³ a man did not wear mourning.

14. When the husband had become the successor and representative of some other man (than his own father), his wife wore the nine months' mourning for his parents-in-law⁴.

15. When the tablet of an (ordinary) officer was placed in the shrine of (his grandfather who had been) a Great officer, the victim due to him (as an officer) was changed (for that due to a Great officer).

16. A son who had not lived with his step-father (did not wear mourning for him). (They) must

deep mourning, a fresh death in his circle required him to add to it something of a lighter mourning.

¹ Compare vol. xxvii, page 315, paragraph 6.

² To nine months.

³ A concubine of his father's.

⁴ Her husband's own parents. But the paragraph is a difficult one; nor have the commentators elucidated it clearly.

have lived together and both be without sons to preside at their mourning rites; and (the step-father moreover) must have shared his resources with the son, and enabled him to sacrifice to his grandfather and father, (in order to his wearing mourning for him);—under these conditions they were said to live together. If they had sons to preside at the mourning rites for them, they lived apart.

17. When people wailed for a friend, they did so outside the door (of the principal apartment), on the left of it, with their faces towards the south¹.

18. When one was buried in a grave already occupied, there was no divination about the site (in the second case).

19. The tablet of an (ordinary) officer or of a Great officer could not be placed in the shrine of a grandfather who had been the lord of a state; it was placed in that of a brother of the grandfather who had been an (ordinary) officer or a Great officer. The tablet of his wife was placed by the tablet of that brother's wife, and that of his concubine by the tablet of that brother's concubine.

If there had been no such concubine, it was placed by the tablet of that brother's grandfather; for in all such places respect was had to the rules concerning the relative positions assigned to the tablets of father and son². The tablet of a feudal lord could not be placed in the shrine of the son of Heaven (from whom he was born or descended); but that of the son of Heaven, of a feudal lord, or

¹ See vol. xxvii, page 134, paragraph 10.

² See vol. xxvii, page 223, paragraph 4, and note.

of a Great officer, could be placed in the shrine of an (ordinary) officer (from whom he was descended)¹.

20. For his mother's mother, who had been the wife proper of her father, if his mother were dead, a son did not wear mourning².

21. The son who was the lineal Head of his new branch of the surname, even though his mother were alive, (his father being dead), completed the full period of mourning for his wife³.

22. A concubine's son who had been reared by another, might act as son to that other; and she might be any concubine of his father or of his grandfather⁴.

23. The mourning went on to the than ceremony for a parent, a wife, and the eldest son⁵.

24. To a nursing mother, or any concubine who was a mother, sacrifice was not maintained for a second generation.

25. When a grown-up youth had been capped, (and died), though his death could not be considered premature; and a (young) wife, after having worn

¹ A descendant in a low position could not presume on the dignity of his ancestors; but those who had become distinguished glorified their meaner ancestors.

² It is difficult to say exactly what is the significance of the 君母 in the text here.

³ Meaning, say some, performed the than sacrifice at the end of twenty-seven months for her. I cannot think this is the meaning. Even for such a wife there could not be the 'three years' mourning.' According to Wang Yüan (汪琬), the mourning for one year terminated with a than sacrifice in the fifteenth month. This must be what is here intended.

⁴ This is the best I can do for this paragraph, over which there is much conflict of opinion.

⁵ Here is the same difficulty as in paragraph 21.

the hair-pin, (died), though neither could her death be said to be premature; yet, (if they died childless), those who would have presided at their rites, if they had died prematurely, wore the mourning for them which they would then have done ¹.

26. If an interment were delayed (by circumstances) for a long time, he who was presiding over the mourning rites was the only one who did not put off his mourning. The others having worn the hempen (band) for the number of months (proper in their relation to the deceased), put off their mourning, and made an end of it ².

27. The hair-pin of the arrow-bamboo was worn by (an unmarried daughter for her father) to the end of the three years' mourning ³.

28. That in which those who wore the sackcloth with even edges for three months, and those who wore (it) for all the nine months' mourning agreed, was the shoes made of strings (of hemp).

29. When the time was come for the sacrifice at the end of the first year's mourning, they consulted the divining stalks about the day for it, and the individual who was to act as personator of the deceased. They looked that everything was clean, and that all wore the proper girdle, carried their staffs, and had on the shoes of hempen-string. When the officers charged with this announced that all was ready, (the son) laid aside his staff, and assisted at the divinations for the day and for the

¹ Another difficult paragraph, about the interpretation of which there seem to be as many minds as there are commentators.

² Yet they would keep it by them till the interment took place, and then put it on again for the occasion.

³ Should form part of the first paragraph of Section i.

personator. The officers having announced that these were over, he resumed his staff, bowed to the guests (who had arrived in the meantime), and escorted them away. At the sacrifice for the end of the second year, (the son) wore his auspicious (court) robes, and divined about the personator.

30. The son of a concubine, living in the same house with his father, did not observe the sacrifice at the end of the mourning for his mother.

Nor did such a son carry his staff in proceeding to his place for wailing.

As the father did not preside at the mourning rites for the son of a concubine, that son's son might carry his staff in going to his place for wailing. Even while the father was present, the son of a concubine, in mourning for his wife, might carry his staff in going to that place.

31. When a feudal prince went to condole on the death of a minister of another state¹, (being himself there on a visit), the ruler of that state received him and acted as the presiding mourner. The rule was that he should wear the skin cap and the starched sackcloth. Though the deceased on account of whom he paid his condolences had been interred, the presiding mourner wore the mourning cincture. If he had not yet assumed the full mourning dress, the visitor also did not wear that starched sackcloth.

32. One who was ministering to another who was ill did not do so in the mourning clothes (which he might be wearing); and (if the patient died), he might go on to preside at the mourning rites for him. But if another relative, who had not ministered

¹ That is, if the visit were made before the removal of the coffin.

to the deceased in his illness, came in to preside at the rites for him, he did not change the mourning which he might be wearing. In ministering to one more honourable than himself, the rule required a person to change the mourning he might be wearing, but not if the other were of lower position¹.

33. If there had been no concubine of her husband's grandmother by whose tablet that of a deceased concubine might be placed, it might be placed by that of the grandmother, the victim offered on the occasion being changed.

34. In the mourning rites for a wife, at the sacrifices of repose and on the ending of the wailing, her husband or son presided; when her tablet was put in its place, her father-in-law presided.

35. An (ordinary) officer did not take the place of presiding (at the mourning rites) for a Great officer. It was only when he was the direct descendant of the Honoured Head of their branch of the surname that he could do so.

36. If a cousin arrived from another state (to take part in the rites), before the presiding mourner had put off his mourning, the latter received him in the part of host, but without the mourning cincture².

37. The course pursued in displaying the articles, (vessels to the eye of fancy, to be put into the grave)³, was this:—If they were (too) many as dis-

¹ If the other, it is said, in the former case were elder, an uncle or elder cousin; in the latter, a younger cousin.

² If the ruler came to condole after the interment, the presiding mourner would resume his cincture to receive him, out of respect to his rank; but this was not required on the late arrival of a relative.

³ These articles were the contributions of friends and those

played, a portion of them might be put into the grave; if they were comparatively few as displayed, they might all be put into it.

38. Parties hurrying to the mourning rites for a brother or cousin (whose burial had taken place) first went to the grave and afterwards to the house, selecting places at which to perform their wailing. If the deceased had (only) been an acquaintance, they (first) wailed in the apartment (where the coffin had been), and afterwards went to the grave.

39. A father (at the mourning rites) for any of his other sons did not pass the night in the shed outside (the middle door, as for his eldest son by his wife).

40. The brothers and cousins of a feudal prince wore the unhemmed sackcloth (in mourning for him)¹.

41. In the five months' mourning for one who had died in the lowest stage of immaturity, the sash was of bleached hemp from which the roots were not cut away. These were turned back and tucked in.

42. When the tablet of a wife was to be placed by that of her husband's grandmother, if there were three (who could be so denominated), it was placed by that of her who was the mother of her husband's father².

43. In the case of a wife dying while her husband

prepared by the family. They were displayed inside the gate of the temple on the east of it when the body was being moved, and in front of the grave, on the east of the path leading to it.

¹ Even though they might not be in the same state with him.

² We must suppose that the grandfather had had three wives; not at the same time, but married one after another's death. Some suppose the three to be a mistake for two. 'The mother of her husband's father' is simply 'the nearest' in the text.

was a Great officer, and his ceasing, after her death, to be of that rank ; if his tablet were placed (on his death) by that of his wife, the victim on the occasion was not changed (from that due to an ordinary officer). But if her husband (who had been an officer) became a Great officer after her death, then the victim at the placing of his tablet by hers was that due to a Great officer ¹.

44. A son who was or would be his father's successor did not wear mourning for his divorced mother. He did not wear such mourning, because one engaged in mourning rites could not offer sacrifice ².

45. When a wife did not preside at the mourning rites and yet carried the staff, it was when her mother-in-law was alive, and she did so for her husband. A mother carried the eleococca staff with its end cut square for the oldest son. A daughter, who was still in her apartment unmarried, carried a staff for her father or mother. If the relative superintending the rites did not carry the staff, then this one child did so ³.

¹ We must suppose that the appointment of the husband, whether as officer or Great officer, had been so recent that there had been no time for any tablets of an elder generation to get into his ancestral temple. His wife's had been the first to be placed in it.

² That is, he might have to preside at the sacrifices in the ancestral temple of his own family, and would be incapacitated for doing so, if he were mourning for her. The reader should bear in mind that there were seven justifiable causes for the divorce of a wife, without her being guilty of infidelity, or any criminal act.

³ It is supposed there was no brother in the family to preside at the rites, and a relative of the same surname was called in to do so. But it was not in rule for him to carry the staff, and this daughter therefore did so, as if she had been a son.

46. In the mourning for three months and five months, at the sacrifice of repose and the ending of the wailing, they wore the mourning cincture.

After the interment, if they did not immediately go to perform the sacrifice of repose, they all, even the presiding mourner, wore their caps; but when they came to the sacrifice of repose, they all assumed the cincture.

When they had put off the mourning for a relative, on the arrival of his interment, they resumed it; and when they came to the sacrifice of repose and the ending of the wailing, they put on the cincture. If they did not immediately perform the sacrifice, they put it off.

When they had been burying at a distance, and were returning to wail, they put on their caps. On arriving at the suburbs, they put on the cincture, and came back to wail.

47. If the ruler came to condole with mourners, though it might not be the time for wearing the cincture, even the president of the rites assumed it, and did not allow the ends of his hempen girdle to hang loose. Even in the case of a visit from the ruler of another state, they assumed the cincture. The relatives all did so.

48. When they put off the mourning for one who had died prematurely, the rule was that at the (accompanying) sacrifice, the dress should be dark-coloured. When they put off the mourning for one fully grown, they wore their court robes, with the cap of white, plain, silk.

49. A son, who had hurried to the mourning rites of his father (from a distance), bound up his hair in the raised hall, bared his chest, descended to

the court, and there performed his leaping. (The leaping over, he reascended), covered his chest, and put on his sash in an apartment on the east.

If the rites were for his mother, he did not bind up his hair. He bared his chest, however, in the hall, descended to the court, and went through his leaping. (Reascending then), he covered his chest, and put on the cincture in the apartment on the east.

In the girdle (or the cincture), he proceeded to the appointed place, and completed the leaping. He then went out from the door (of the coffin-room), and went to (the mourning shed). The wailing commencing at death had by this time ceased. In three days he wailed five times, and thrice bared his chest for the leaping.

50. When an eldest son and his wife could not take the place hereafter of his parents, then, (in the event of her death), her mother-in-law wore for her (only) the five months' mourning¹.

¹ The scope of this paragraph is plain enough; but the construing of it is difficult. I have translated after *Khân Hào's* text, which contains a character more than that of the *Khien-lung* edition. The son and his wife could not become the representatives of the family. Various reasons are suggested by the commentators for the fact. The text supposes the death of the wife to take place before that of her mother-in-law.

BOOK XIV. TÂ KWÂN

OR

THE GREAT TREATISE¹.

1. According to the rules, only the king offered the united sacrifice to all ancestors. The chief place was then given to him from whom the founder of the line sprang, and that founder had the place of assessor to him².

The sacrifices of the princes of states reached to their highest ancestor. Great officers and other officers, who had performed great services, when these were examined (and approved) by the ruler, were able to carry their sacrifices up to their high ancestor.

2. The field of Mû-yeh was the great achievement of king Wû. When he withdrew after the victory, he reared a burning pile to God; prayed at the altar of the earth; and set forth his offerings in the house of Mû³. He then led all the princes of the kingdom, bearing his offerings in their various stands, and hurrying about, and carried the title of king back to Thái who was Than-fû, Kî-lî, and king Wăn who was Khang;—he would not approach his honourable ancestors with their former humbler titles.

¹ See the introductory notice, vol. xxvii, pages 30, 31.

² See the last Book, I, paragraphs 9, 17, et al.

³ I suppose that all which is here described was done by king Wû after his victory at Mû, under the advice of his brother, known to us as the duke of Kâu; see the Kung Yung, paragraphs 54, 55. 'The house of Mû' would be a building converted for the occasion into a temple.

3. Thus he regulated the services to be rendered to his father and grandfather before him;—giving honour to the most honourable. He regulated the places to be given to his sons and grandsons below him;—showing his affection to his kindred. He regulated (also) the observances for the collateral branches of his cousins;—associating all their members in the feasting. He defined their places according to their order of descent; and his every distinction was in harmony with what was proper and right. In this way the procedure of human duty was made complete.

4. When a sage sovereign stood with his face to the south, and all the affairs of the kingdom came before him, there were five things which for the time claimed his first care, and the people were not reckoned among them. The first was the regulating what was due to his kindred (as above); the second, the reward of merit; the third, the promotion of worth; the fourth, the employment of ability; and the fifth, the maintenance of a loving vigilance. When these five things were all fully realised, the people had all their necessities satisfied, all that they wanted supplied. If one of them were defective, the people could not complete their lives in comfort.

It was necessary for a sage on the throne of government to begin with the (above) procedure of human duty.

5. The appointment of the measures of weight, length, and capacity; the fixing the elegancies (of ceremony); the changing the commencement of the year and month; alterations in the colour of dress; differences of flags and their blazonry; changes in vessels and weapons, and distinctions in dress:—

these were things, changes in which could be enjoined on the people. But no changes could be enjoined upon them in what concerned affection for kin, the honour paid to the honourable, the respect due to the aged, and the different positions and functions of male and female.

6. Members of the same surname were united together in the various ramifications of their kinship, under the Heads of their different branches¹. Those of a different surname² had their mutual relations regulated principally by the names assigned to them. Those names being clearly set forth, the different positions of males and females were determined.

When the husband belonged to the class of fathers [or uncles]³, the wife was placed in that of mothers [or aunts]; when he belonged to the class of sons [or cousins], the wife was placed in that of (junior) wives⁴. Since the wife of a younger brother was (thus) styled (junior) wife, could the wife of his elder brother be at the same time styled mother [or aunt]? The name or appellation is of the greatest

¹ That is, the males all called by the surname of the family.

² That is, the females, married into the family from other families of different surnames, and receiving different names or appellations from the places of their husbands in the family roll.

³ 'Fathers' and 'mothers' here are really uncles and aunts, the 父 for the former being equivalent to 伯叔父; and the 母 for the latter to 伯叔母. The uncles were of the same category as the father in respect to age, and the aunts in the same category as the mother.

⁴ Fû, the character here for wife, does not in itself contain the idea of this inferiority in point of age. That idea was in the mind of the writer, arising from the subject of which he was treating.

importance in the regulation of the family;—was not anxious care required in the declaration of it?

7. For parties four generations removed (from the same common ancestor) the mourning was reduced to that worn for three months, and this was the limit of wearing the hempen cloth. If the generations were five, the shoulders were bared and the cincture assumed; and in this way the mourning within the circle of the same was gradually reduced. After the sixth generation the bond of kinship was held to be at an end.

8. As the branch-surnames which arose separated the members of them from their relatives of a former time, and the kinship disappeared as time went on, (so far as wearing mourning was concerned), could marriage be contracted between parties (so wide apart)¹? But there was that original surname tying all the members together without distinction, and the maintenance of the connexion by means of the common feast²;—while there were these conditions, there could be no intermarriage, even after a hundred generations. Such was the rule of *K'âu*³.

9. The considerations which regulated the mourning worn were six:—first, the nearness of the kinship⁴;

¹ *K'ăn Hào* says that under the Yin dynasty intermarriages were allowed after the fifth generation in a family of the same surname. The same statement is referred to by *Khung Ying-tâ*, from whom *K'ăn*, probably, took it; but the *K'ien-lung* editors discard it, as being 'without proof.'

² 'The feast' given to all the kindred after the seasonal sacrifices in the ancestral temple.

³ *K'ăn Hào* refers to this prohibition of intermarriages by *K'âu* as the grand distinction of the dynasty, marking clearly 'for the first time the distinction between man and beast.'

⁴ As between parents and children.

second, the honour due to the honourable¹; third, the names (as expressing the position in the relative circle)²; fourth, the cases of women still unmarried in the paternal home, and of those who had married and left it³; fifth, age⁴; and sixth, affinity, and external relationship⁵.

10. Of the considerations of affinity and external relationship there were six cases:—those arising from inter-relationship⁶; those in which there was no inter-relationship⁷; those where mourning should be worn, and yet was not; those where it should not be worn, and yet was; those where it should be deep, and yet was light; and those where it should be light, and yet was deep.

11. Where the starting-point was affection, it began from the father. Going up from him by degrees it reached to the (high) ancestor, and was said to diminish. Where the starting-point was the consideration of what is right, it began with the ancestor. Coming down by natural degrees from him, it reached to the father, and was said to increase. In the diminution and the increase, the considerations of affection and right acted thus.

12. It was the way for the ruler to assemble and feast all the members of his kindred. None of

¹ As to the ruler, Great officers, and ministers.

² See paragraph 6.

³ Spinsters and married aunts, cousins, sisters, &c.

⁴ Relatives dying as minors, and after maturity.

⁵ See next paragraph.

⁶ Mother's kin; husband's kin; wife's kin.

⁷ As when a minister wore mourning for his ruler's kindred; a concubine for the kindred of the wife, &c. The reader must task himself to imagine cases in which the other four conditions would apply.

them could, because of their mutual kinship, claim a nearer kinship with him than what was expressed by the places (assigned to them).

13. Any son but the eldest, (though all sons of the wife proper), did not sacrifice to his grandfather,—to show there was the Honoured Head (who should do so). Nor could he wear mourning for his eldest son for three years, because he was not the continuator of his grandfather ¹.

14. When any other son but the eldest became an ancestor of a line, he who succeeded him became the Honoured Head (of the branch); and his successor again became the smaller Head ¹.

15. There was the (great) Honoured Head whose tablet was not removed for a hundred generations. There were the (smaller) Honoured Heads whose tablets were removed after five generations. He whose tablet was not removed for a hundred generations was the successor and representative of the other than the eldest son (who became an ancestor of a line); and he was so honoured (by the members of his line) because he continued the (High) ancestor from whom (both) he and they sprang; this was why his tablet was not removed for a hundred generations. He who honoured the continuator of the High ancestor was he whose tablet was removed after five generations. They honoured the Ancestor, and therefore they revered the Head. The reverence showed the significance of that honour.

16. There might be cases in which there was a smaller Honoured Head, and no Greater Head (of

¹ See the last Book, I, paragraphs 10-12.

a branch family); cases in which there was a Greater Honoured Head, and no smaller Head; and cases in which there was an Honoured Head, with none to honour him. All these might exist in the instance of the son of the ruler of a state¹.

The course to be adopted for the headship of such a son was this; that the ruler, himself the proper representative of former rulers, should for all his half-brothers who were officers and Great officers appoint a full brother, also an officer or a Great officer, to be the Honoured Head. Such was the regular course.

17. When the kinship was no longer counted, there was no further wearing of mourning. The kinship was the bond of connexion (expressed in the degree of mourning).

18. Where the starting-point was in affection, it began with the father, and ascended by steps to the ancestor. Where it was in a consideration of what was right, it began with the ancestor, and descended in natural order to the deceased father. Thus the course of humanity (in this matter of mourning) was all comprehended in the love for kindred.

19. From the affection for parents came the honouring of ancestors; from the honouring of the

Suppose a ruler had no brother by his father's wife, and appointed one of his brothers by another lady of the harem, to take the headship of all the others, this would represent the first case. If he appointed a full brother to the position, but could not appoint a half-brother to the inferior position, this would represent the second; and if the younger brothers of the ruling house were reduced to one man, he would represent the third case, having merely the name and nothing more. Such is the explanation of the text, so far as I can apprehend it.

ancestor came the respect and attention shown to the Heads (of the family branches). By that respect and attention to those Heads all the members of the kindred were kept together. Through their being kept together came the dignity of the ancestral temple. From that dignity arose the importance attached to the altars of the land and grain. From that importance there ensued the love of all the (people with their) hundred surnames. From that love came the right administration of punishments and penalties. Through that administration the people had the feeling of repose. Through that restfulness all resources for expenditure became sufficient. Through the sufficiency of these, what all desired was realised. The realisation led to all courteous usages and good customs; and from these, in fine, came all happiness and enjoyment :—affording an illustration of what is said in the ode :—

‘ Glory and honour follow Wăn’s great name,
And ne’er will men be weary of his fame¹.’

¹ See vol. iii, page 314, the last two lines of ode 1; Metrical Version, page 351.

BOOK XV. SHĀO Í

OR

SMALLER RULES OF DEMEANOUR¹.

1. I have heard (the following things):—

When one wished to see for the first time another of character and position, his language was, ‘I, so and so, earnestly wish my name to be reported to the officer of communication².’ He could not go up the steps directly to the host. If the visitor were of equal rank with the host, he said, ‘I, so and so, earnestly wish to see him.’ If he were an infrequent visitor, he asked his name to be reported. If he were a frequent visitor, he added, ‘this morning or evening.’ If he were blind³, he asked his name to be reported.

2. If it were on an occasion of mourning, the visitor said he had come as a servant and helper; if he were a youth, that he had come to perform whatever might be required of him. If the visit were at the mourning rites for a ruler or high minister, the language was, ‘I am come to be employed by the chief minister of the household⁴.’

¹ See the introductory notice, vol. xxvii, pages 31, 32.

² The visitor did not dare to send even a message directly to the master of the establishment where he was calling.

³ That is, an officer of music, high or low.

⁴ The name of the minister here is generally translated by ‘Minister of Instruction.’ But that can hardly be its meaning here; and there were officers so called also in the establishments of Great officers; see vol. xxvii, page 154, paragraph 20.

3. When a ruler was about to go out of his own state¹, if a minister were presenting to him money or pieces of jade, or any other article, the language was, 'I present this to the officer for the expenses of his horses.' To an equal in a similar case it was said, 'This is presented for the use of your followers.'

4. When a minister contributed a shroud to his ruler, he said, 'I send this laid-aside garment to the valuers².' An equal, sending such a gift to another equal, simply said, 'a shroud.' Relatives, such as brothers, did not go in with the shrouds which they presented.

5. When a minister was contributing articles or their value to his ruler who had mourning rites on hand for the previous ruler, he said, 'I present these products of my fields to the officers³.'

6. A carriage and horses presented for a funeral, entered the gate of the ancestral temple. Contributions of money and horses with the accompanying presents of silk, the white flag (of a mourning carriage) and war chariots, did not enter the gate of the temple⁴.

7. When the bearer of the contribution had

¹ About to proceed to the royal court.

² In the *Kâu Lí*, Book I, 35, we find that among the functionaries attached to the 'Treasury of Jade,' there were eight men thus denominated 'valuers.' There were officers, probably, performing a similar duty in the department to which the charge of the offering in this paragraph would be consigned.

³ The things presented here are called 'articles (coarse), shells' (貨貝), the meaning being, I think, what I have given. The things were not the produce of the donor's land; but that land being held by him from the ruler, he so expressed himself.

⁴ It is difficult for us to appreciate the reasons given for the distinction made between these contributions.

delivered his message, he knelt down and left the things on the ground. The officer of communication took them up. The presiding mourner did not himself receive them.

8. When the receiver stood, the giver stood; neither knelt. Parties of a straightforward character might, perhaps, do so.

9. When (the guest was) first entering, and it was proper to give the precedence to him, the officer of communication said (to the host), 'Give precedence.' When they proceeded to their mats, he said to them, 'Yes; be seated.'

When the leaves of the door were opened, only one man could take off his shoes inside the door. If there were already an honourable and elderly visitor, parties coming later could not do so.

10. When asking about the various dishes (of a feast), they said, 'Have you enjoyed such and such a dish?'

When asking one another about their (various) courses¹ and accomplishments², they said, 'Have you practised such and such a course? Are you skilful at such and such an accomplishment?'

11. (A man sought to) give no occasion for doubt about himself, nor to pass his judgment on the articles of others. He did not desire the (possessions of) great families, nor speak injuriously of the things which they valued.

12. Sweeping in general was called *são*. Sweep-

¹ There was the threefold course of aim, diligence, and filial duty, in filialness, friendship, and obedience.

² The accomplishments were six :—ceremonies, music, archery, charioteering, writing, mathematics.

ing up in front of a mat was called *phân*. In sweeping a mat they did not use a common broom¹. The sweeper held the dust-pan with its tongue towards himself.

13. There was no divining (twice about the same thing) with a double mind. In asking about what had been referred to the tortoise-shell or the stalks, two things were to be considered, whether the thing asked about were right, and what was the diviner's own mind. On the matter of right he might be questioned, but not on what was in his own mind.

14. When others more honourable and older than one's self took precedence of him, he did not presume to ask their age. When they came to feast with him, he did not send to them any (formal) message. When he met them on the road, if they saw him, he went up to them, but did not ask to know where they were going. At funeral rites for them, he waited to observe the movements (of the presiding mourner), and did not offer his special condolences. When seated by them, he did not, unless ordered to do so, produce his lutes. He did not draw lines on the ground; that would have been an improper use of his hand. He did not use a fan. If they were asleep, and he had any message to communicate to them, he knelt in doing so.

15. At the game of archery, the inferior carried his four arrows in his hand. At that of throwing darts, he carried the four together in his breast. If he conquered, he washed the cup and gave it to the other, asking him to drink. If he were defeated, the elder went through the same process with him. They

¹ It might be dirty, having been used to sweep the ground.

did not use the (large) horn; they did not remove the (figure of a) horse (for marking the numbers)¹.

16. When holding the reins of the ruler's horses, the driver knelt. He wore his sword on his right side with his back to the best strap (for the ruler). When handing this to him, he faced him and then drew the strap towards the cross-bar. He used the second or inferior strap to help himself in mounting. He then took the reins in hand, and began to move on.

17. One asked permission to appear at court, but not to withdraw.

One was said to withdraw from court; to return home from a feast or a ramble; to close the toils of a campaign.

18. When sitting by a person of rank, if he began to yawn and stretch himself, to turn round his tablet, to play with the head of his sword, to move his shoes about, or to ask about the time of day, one might ask leave to retire.

19. For one who (wished to) serve his ruler, (the rule was) first to measure (his abilities and duties), and then enter (on the responsibilities); he did not enter on these, and then measure those. There was the same rule for all who begged or borrowed from others, or sought to engage in their service. In this way superiors had no ground for offence, and inferiors avoided all risk of guilt.

20. They did not spy into privacies nor form intimacies on matters aside from their proper business. They did not speak of old affairs, nor wear an appearance of being in sport.

¹ See in Book XXXVII.

21. One in the position of a minister and inferior might remonstrate (with his ruler), but not speak ill of him; might withdraw (from the state), but not (remain and) hate (its Head); might praise him, but not flatter; might remonstrate, but not give himself haughty airs (when his advice was followed). (If the ruler were) idle and indifferent, he might arouse and assist him; if (the government) were going to wreck, he might sweep it away, and institute a new one. Such a minister would be pronounced as doing service for the altars (of the state).

22. Do not commence or abandon anything hastily. Do not take liberties with or weary spiritual Beings. Do not try to defend or cover over what was wrong in the past, or to fathom what has not yet arrived. A scholar should constantly pursue what is virtuous, and amuse himself with the accomplishments.

A workman should follow the rules (of his art), and amuse himself with the discussion (of their application). One should not think about the clothes and elegant articles (of others), nor try to make good in himself what is doubtful in words (which he has heard)¹.

23. The style prized in conversation required that it should be grave and distinct. The demeanour prized in the court required that it should be

¹ These cautions are expressed enigmatically in the text. The expurgated edition gives only the third and fourth, which P. Callery translates thus:—'L'homme de lettres s'applique à la vertu par-dessus tout, et ne s'adonne que d'une façon secondaire à la culture des arts libéraux, semblable en cela à l'ouvrier qui suit d'abord les procédés fondamentaux de son art, et ne discute qu'après les changements à introduire dans leur application.'

well regulated and urbane; that at sacrifices was to be grave, with an appearance of anxiety. The horses of the chariot were to be well-paced and matched. The beauty of their bells was that they intimated dignity and harmony ¹.

24. To a question about the age of a ruler's son, if he were grown up, it was said, 'He is able to attend to the business of the altars.' If he were still young, it was said, 'He is able to drive,' or 'He is not yet able to drive.' To the same question about a Great officer's son, if he were grown up, it was said, 'He is able to take his part in music;' if still young, it was said, 'He is able to take lessons from the music-master,' or 'He is not yet able to do so.' To the same question about the son of an ordinary officer, if he were grown up, it was said, 'He is able to guide the plough;' if he were still young, it was said, 'He is able to carry firewood,' or 'He is not yet able to do so' ².

25. When carrying a symbol of jade, a tortoise-shell, or the divining stalks, one did not walk hastily. Nor did he do so in the raised hall, or on a city wall. In a war chariot he did not bow forward to the cross-bar. A man in his mail did not try to bow ³.

26. A wife, on festive occasions, even though it were on receiving a gift from the ruler, (only) made

¹ This paragraph is in the expurgated edition, in the commentary to which, however, the whole is understood with reference to the heir-son of the kingdom or a state; and P. Callery translates accordingly:—'(L'héritier présomptif du trône) doit avoir,' &c.

² Compare vol. xxvii, page 115, paragraph 4.

³ Compare vol. xxvii, page 72, paragraph 30; page 96, paragraph 39; et al.

a curtsy¹. When seated as a personatrix (of the deceased grandmother of her husband), she did not bow with her head to her hands, but made the curtsy². When presiding at the mourning rites, she did not bow with her head to her hands lowered to the ground.

27. (After the sacrifice of repose), her head-band was of dolychos cloth, and her girdle of hempen.

28. When taking meat from a stand or putting meat on it, they did not kneel.

29. An empty vessel was carried (with the same care) as a full one, and an empty apartment entered (with the same reverence) as if there were people in it.

30. At all sacrifices, whether in the apartment or in the hall, they did not have their feet bare. At a feast they might.

31. Till they had offered a portion in the temple, they did not eat of a new crop.

32. In the case of a charioteer and the gentleman whom he was driving, when the latter mounted or descended, the other handed him the strap. When the driver first mounted, he bowed towards the cross-bar. When the gentleman descended to walk, (he also descended), but (immediately) returned to the carriage and stood.

33. The riders in an attendant carriage (to court or temple), bowed forward to the bar, but not if it were to battle or hunt. Of such attendant carriages, the ruler of a state had seven; a Great officer of

¹ In Chinese fashion, an inclination of the head towards the hands.

² Some interpret this as saying that she did not even make the curtsy.

the highest grade, five; and one of the lowest grade, three¹.

34. People did not speak of the age of the horses or of the carriages of those who possessed such attendant carriages; nor did they put a value on the dress, or sword, or horses of a gentleman whom they saw before them.

35. In giving (to an inferior) or offering to a superior, four pots of spirits, a bundle of dried meat, and a dog, (the messenger) put down the liquor, and carried (only) the dried meat in his hand, when discharging his commission, but he also said that he was the bearer of four pots of spirits, a bundle of dried meat, and a dog. In presenting a tripod of flesh, he carried (one piece) in his hand. In presenting birds, if there were more than a couple, he carried a couple in his hand, leaving the others outside.

36. The dog was held by a rope. A watch dog or a hunting dog was given to the officer who was the medium of communication; and on receiving it, he asked its name. An ox was held by the tether, and a horse by the bridle. They were both kept on the right of him who led them; but a prisoner or captive, who was being presented, was kept on the left.

37. In presenting a carriage, the strap was taken off and carried in the hand of the messenger. In presenting a coat of mail, if there were other things to be carried before it, the messenger bore them. If there were no such things, he took off its covering, and bore the helmet in his hands. In the case of a

¹ Compare vol. xxvii, page 125, paragraph 4.

vessel, he carried its cover. In the case of a bow, with his left hand he stript off the case, and took hold of the middle of the back. In the case of a sword, he opened the cover of its case, and placed it underneath. Then he put into the case a silken cloth, on which he placed the sword.

38. Official tablets ; writings ; stalks of dried flesh ; parcels wrapped in reeds ; bows ; cushions ; mats ; pillows ; stools ; spikes ; staffs ; lutes, large and small ; sharp-edged lances in sheaths ; divining stalks ; and flutes :—these all were borne with the left hand upwards. Of sharp-pointed weapons, the point was kept behind, and the ring presented ; of sharp-edged weapons, the handle was presented. In the case of all sharp-pointed and sharp-edged weapons, the point was turned away in handing them to others.

39. When leaving the city, in mounting a war-chariot, the weapon was carried with the point in front ; when returning and entering it again, the end. The left was the place for the general and officers of an army ; the right, for the soldiers.

40. For visitors and guests the principal thing was a courteous humility ; at sacrifices, reverence ; at mourning rites, sorrow ; at meetings and reunions, an active interest. In the operations of war, the dangers had to be thought of. One concealed his own feelings in order to judge the better of those of others.

41. When feasting with a man of superior rank and character, the guest first tasted the dishes and then stopt. He should not bolt the food, nor swill down the liquor. He should take small and frequent mouthfuls. While chewing quickly, he did not make faces with his mouth. When he

proceeded to remove the dishes, and the host declined that service from him, he stopt¹.

42. The cup with which the guest was pledged was placed on the left; those which had been drunk (by the others) on the right. Those of the guest's attendant, of the host himself, and of the host's assistant;—these all were placed on the right².

43. In putting down a boiled fish to be eaten, the tail was laid in front. In winter it was placed with the fat belly on the right; in summer with the back. The slices offered in sacrifice (to the father of the fish-diet were thus more easily cut³).

44. All condiments were taken up with the right (hand), and were therefore placed on the left.

45. He who received the presents offered (to the ruler) was on his left; he who transmitted his words, on the right.

46. A cup was poured out for the driver of a personator of the dead as for the driver of the ruler. In the carriage, and holding the reins in his left hand, he received the cup with his right; offered a little in sacrifice at the end of the axle and cross-

¹ Compare vol. xxvii, pages 80, 81, paragraphs 54, 57, et al. The writer passes in this paragraph from the indicative to the imperative mood.

² The guest sat facing the south, so that the east and west were on his left and right respectively. The cups were set where they could be taken up and put down most conveniently.

³ The fish, as a sacrificial offering and on great occasions, was placed lengthways on the stand. As placed in this paragraph, it was more convenient for the guest. It may be correct that the belly is the best part of a fish in winter, and the back in summer. Let gastronomers and those who are fond of pisciculture decide and explain the point.

bar on the right and left (to the father of charioteering), and then drank off the cup.

47. Of all viands which were placed on the stands, the offering was put down inside the stand.

A gentleman did not eat the entrails of grain-fed animals¹.

A boy² ran, but did not walk quickly with measured steps. When he took up his cup, he knelt in offering (some of the contents) in sacrifice, and then stood up and drank (the rest). Before rinsing a cup, they washed their hands. In separating the lungs of oxen and sheep, they did not cut out the central portion of them³; when viands were served up with sauce, they did not add condiments to it.

In selecting an onion or scallion for a gentleman, they cut off both the root and top.

When the head was presented among the viands, the snout was put forward, to be used as the offering.

48. He who set forth the jugs considered the left of the cup-bearer to be the place for the topmost one. The jugs and jars were placed with their spouts towards the arranger.

The drinkers at the ceremonies of washing the head and cupping, in presence of the stand with the divided victims on it, did not kneel. Before the common cup had gone round, they did not taste the viands.

¹ Dogs (bred to be eaten) and pigs. The reason for not eating their entrails can hardly be stated.

² A waiting-boy.

³ That it might easily be taken in hand and put down as an offering of thanksgiving.

49. The flesh of oxen, sheep, and fish was cut small, and made into mince. That of elks and deer was pickled; that of the wild pig was hashed:—these were all sliced, but not cut small. The flesh of the muntjac was alone pickled, and that of fowls and hares, being sliced and cut small. Onions and shalots were sliced, and added to the brine to soften the meat.

50. When the pieces of the divided body were on the stand, in taking one of them to offer and in returning it¹, they did not kneel. So it was when they made an offering of roast meat. If the offerer, however, were a personator of the dead, he knelt.

51. When a man had his robes on his person, and did not know their names (or the meaning of their names), he was ignorant indeed.

52. If one came late and yet arrived before the torches were lighted, it was announced to him that the guests were all there, and who they were. The same things were intimated to a blind musician by the one who bid him. At a drinking entertainment, when the host carried a light, or bore a torch before them, the guests rise and decline the honour done to them. On this he gave the torch to a torch-bearer, who did not move from his place, nor say a word, nor sing².

53. When one was carrying in water or liquor and food to a superior or elder, the rule was not to

¹ The lungs.

² In the 30 *Kwân* we have many accounts of these entertainments. The singing was almost always of a few lines from one of the pieces of the *Shih King*, expressing a sentiment appropriate to the occasion. The custom was like our after-dinner speeches and toasts.

breathe on it; and if a question was asked, to turn the mouth on one side.

54. When one conducted sacrifice for another, (and was sending to others the flesh of the victim), the message was, 'Herewith (the flesh of) blessing.' When sending of the flesh of his own sacrifice to a superior man, the party simply announced what it was.

If it were flesh of the sacrifice on placing the tablet of the deceased in the temple, or at the close of the first year's mourning, the fact was announced. The principal mourner spread out the portions, and gave them to his messenger on the south of the eastern steps, bowing twice, and laying his head to the ground as he sent him away; when he returned and reported the execution of his commission, the mourner again bowed twice and laid his head to the ground.

If the sacrifice were a great one, consisting of the three victims, then the portion sent was the left quarter of the ox, divided into nine pieces from the shoulder. If the sacrifice were the smaller, the portion sent was the left quarter, divided into seven pieces. If there were but a single pig, the portion was the left quarter, divided into five portions.

55. When the revenues of a state were at a low ebb, the carriages were not carved and painted; the buff-coats were not adorned with ribbons and cords; and the dishes were not carved; the superior man did not wear shoes of silk; and horses were not regularly supplied with grain.

BOOK XVI. HSIO K'1

OR

RECORD ON THE SUBJECT OF EDUCATION¹.

✓ 1. When a ruler is concerned that his measures should be in accordance with law, and seeks for the (assistance of the) good and upright, this is sufficient to secure him a considerable reputation, but not to move the multitudes.

✓ When he cultivates the society of the worthy, and tries to embody the views of those who are remote (from the court), this is sufficient to move the multitudes, but not to transform the people.

If he wish to transform the people and to perfect their manners and customs, must he not start from the lessons of the school?

2. The jade uncut will not form a vessel for use; and if men do not learn, they do not know the way (in which they should go). On this account the ancient kings, when establishing states and governing the people, made instruction and schools a primary object;—as it is said in the Charge to Yüeh, 'The thoughts from first to last should be fixed on learning ⁷²⁸ 2.'

✓ 3. However fine the viands be, if one do not eat, he does not know their taste; however perfect the course may be, if one do not learn it, he does not know its goodness. Therefore when he learns, one

¹ See the introductory notice, vol. xxvii, page 32.

² Vol. iii, page 117.

knows his own deficiencies ; when he teaches, he knows the difficulties of learning. After he knows his deficiencies, one is able to turn round and examine himself ; after he knows the difficulties, he is able to stimulate himself to effort. Hence it is said, 'Teaching and learning help each other ;' as it is said in the Charge to Yüeh, 'Teaching is the half of learning¹.'

4. According to the system of ancient teaching, for the families of (a hamlet)² there was the village school ; for a neighbourhood² there was the *hsiang* ; for the larger districts there was the *hsü* ; and in the capitals there was the college.

5. Every year some entered the college, and every second year there was a comparative examination. In the first year it was seen whether they could read the texts intelligently, and what was the meaning of each ; in the third year, whether they were reverently attentive to their work, and what companionship was most pleasant to them ; in the fifth year, how they extended their studies and sought the company of their teachers ; in the seventh year, how they could discuss the subjects of their studies and select their friends. They were now said to have made some small attainments. In the ninth year, when they knew the different classes of subjects and had gained a general intelligence, were firmly established and would not fall back, they

¹ Vol. iii, page 117.

² The hamlet was supposed to contain twenty-five families ; the neighbourhood 500 ; and the district 2,500. For the four institutions, P. Callery adopts the names of school, college, academy, and university. It would be tedious to give the various explanations of the names *Hsiang* and *Hsü*.

were said to have made grand attainments. After this the training was sufficient to transform the people, and to change (anything bad in) manners and customs. Those who lived near at hand submitted with delight, and those who were far off thought (of the teaching) with longing desire. Such was the method of the Great learning; as is said in the Record, 'The little ant continually exercises the art (of amassing)'¹.

✓ 6. At the commencement of the teaching in the Great college, (the masters) in their skin caps presented the offerings of vegetables (to the ancient sages), to show their pupils the principle of reverence for them; and made them sing (at the same time) the (first) three pieces of the Minor Odes of the Kingdom, as their first lesson in the duties of officers². When they entered the college, the drum was beaten and the satchels were produced, that they might begin their work reverently. The cane and the thorns³ were there to secure in them a proper awe. It was not till the time for the summer sacrifice⁴ was divined for, that the testing examination was held;—to give composure to their minds. They were continually under inspection, but not spoken to,—to keep their minds undisturbed.) They listened, but they did not ask questions; and

¹ See the note of Callery in loc. The quotation is from some old Record; it is not known what.

² The three pieces were the Lí Ming, the 3ze Mâu, and the Hwang-hwang Kê hwâ, the first three pieces in the first decade of the Shih, Part II; showing the harmony and earnestness of officers.

³ Callery calls these 'la latte et la baguette.'

⁴ Khung Ying-tâ thought this was the quinquennial sacrifice. See the K'ien-lung editors on the point.

they could not transgress the order of study (imposed on them). These seven things were the chief regulations in the teaching. As it is expressed in the Record, 'In all learning, for him who would be an officer the first thing is (the knowledge of) business; for scholars the first thing is the directing of the mind.'

7. In the system of teaching at the Great college, every season had its appropriate subject; and when the pupils withdrew and gave up their lessons (for the day), they were required to continue their study at home.

8. If a student do not learn (at college) to play in tune, he cannot quietly enjoy his lutes; if he do not learn extensively the figures of poetry, he cannot quietly enjoy the odes; if he do not learn the varieties of dress, he cannot quietly take part in the different ceremonies; if he do not acquire the various accomplishments, he cannot take delight in learning.

9. Therefore a student of talents and virtue pursues his studies, withdrawn in college from all besides, and devoted to their cultivation, or occupied with them when retired from it, and enjoying himself. Having attained to this, he rests quietly in his studies and seeks the company of his teachers; he finds pleasure in his friends, and has all confidence in their course. Although he should be separated from his teachers and helpers, he will not act contrary to the course;—as it is said in the Charge to Yüeh, 'Maintain a reverent humility, and strive to be constantly earnest. In such a case the cultivation will surely come¹.'

¹ Vol. iii, p. 117. But the quotation is a little different from the text of the Shü.

10. According to the system of teaching now-a-days, (the masters) hum over the tablets which they see before them, multiplying their questions. They speak of the learners' making rapid advances, and pay no regard to their reposing (in what they have acquired). In what they lay on their learners they are not sincere, nor do they put forth all their ability in teaching them. What they inculcate is contrary to what is right, and the learners are disappointed in what they seek for. In such a case, the latter are distressed by their studies and hate their masters; they are embittered by the difficulties, and do not find any advantage from their (labour). They may seem to finish their work, but they quickly give up its lessons. That no results are seen from their instructions :—is it not owing to these defects?

11. The rules aimed at in the Great college were the prevention of evil before it was manifested; the timeliness of instruction just when it was required; the suitability of the lessons in adaptation to circumstances; and the good influence of example to parties observing one another. It was from these four things that the teaching was so effectual and flourishing.

12. Prohibition of evil after it has been manifested meets with opposition, and is not successful. Instruction given after the time for it is past is done with toil, and carried out with difficulty. The communication of lessons in an indiscriminating manner and without suitability produces injury and disorder, and fails in its object. Learning alone and without friends makes one feel solitary and uncultivated, with but little information. Friendships of festivity

lead to opposition to one's master. Friendships with the dissolute lead to the neglect of one's learning. These six things all tend to make teaching vain.

13. When a superior man knows the causes which make instruction successful, and those which make it of no effect, he can become a teacher of others. Thus in his teaching, he leads and does not drag; he strengthens and does not discourage; he opens the way but does not conduct to the end (without the learner's own efforts). Leading and not dragging produces harmony. Strengthening and not discouraging makes attainment easy. Opening the way and not conducting to the end makes (the learner) thoughtful. He who produces such harmony, easy attainment, and thoughtfulness may be pronounced a skilful teacher.

14. Among learners there are four defects with which the teacher must make himself acquainted. Some err in the multitude of their studies; some, in their fewness; some, in the feeling of ease (with which they proceed); and some, in the readiness with which they stop. These four defects arise from the difference of their minds. When a teacher knows the character of his mind, he can save the learner from the defect to which he is liable. Teaching should be directed to develop that in which the pupil excels, and correct the defects to which he is prone.

15. The good singer makes men (able) to continue his notes, and (so) the good teacher makes them able to carry out his ideas. His words are brief, but far-reaching; unpretentious, but deep; with few illustrations, but instructive. In this way he may be said to perpetuate his ideas.

16. When a man of talents and virtue knows the difficulty (on the one hand) and the facility (on the other) in the attainment of learning, and knows (also) the good and the bad qualities (of his pupils), he can vary his methods of teaching. When he can vary his methods of teaching, he can be a master indeed. When he can be a teacher indeed, he can be the Head (of an official department). When he can be such a Head, he can be the Ruler (of a state). Hence it is from the teacher indeed that one learns to be a ruler, and the choice of a teacher demands the greatest care; as it is said in the Record, 'The three kings and the four dynasties were what they were by their teachers¹.'

17. In pursuing the course of learning, the difficulty is in securing the proper reverence for the master. When that is done, the course (which he inculcates) is regarded with honour. When that is done, the people know how to respect learning. Thus it is that there are two among his subjects whom the ruler does not treat as subjects. When one is personating (his ancestor), he does not treat him as such, nor does he treat his master as such. According to the rules of the Great college, the master, though communicating anything to the son of Heaven, did not stand with his face to the north. This was the way in which honour was done to him.

¹ 'The three kings' are of course the Great Yü, founder of the Hsiâ dynasty; Thang the Successful, founder of the Shang; and Wăn and Wû, considered as one, founders of Kâu. The four dynasties is an unusual expression, though we shall meet with it again, as we have met with it already. They are said to be those of Yü (the dynasty of Shun), Hsiâ, Shang, and Kâu. But how then have we only 'the three kings?' I should rather take them to be Hsiâ, Shang (considered as two, Shang and Yin), and Kâu.

18. The skilful learner, while the master seems indifferent, yet makes double the attainments of another, and in the sequel ascribes the merit (to the master). The unskilful learner, while the master is diligent with him, yet makes (only) half the attainments (of the former), and in the sequel is dissatisfied with the master. The skilful questioner is like a workman addressing himself to deal with a hard tree. First he attacks the easy parts, and then the knotty. After a long time, the pupil and master talk together, and the subject is explained. The unskilful questioner takes the opposite course. The master who skilfully waits to be questioned, may be compared to a bell when it is struck. Struck with a small hammer, it gives a small sound. Struck with a great one, it gives a great sound. But let it be struck leisurely and properly, and it gives out all the sound of which it is capable¹. He who is not skilful in replying to questions is the opposite of this. This all describes the method of making progress in learning.

19. He who gives (only) the learning supplied by

¹ P. Callery makes this sentence refer to the master, and not to the bell, and translates it:—'(Mais quelle que soit la nature des questions qu'on lui adresse, le maître) attend que l'élève ait fait à loisir toutes ses demandes, pour y faire ensuite une réponse complète.' He appends a note on the difficulty of the passage, saying in conclusion that the translation which he has adopted was suggested by a citation of the passage in the *Pei-wăn Yun-fû* (佩文韻府), where there is a different reading of (學), 'instruction,' for (聲), 'sound.' I have not been able to find the citation in the great *Thesaurus*, to which he refers. Yen Yüan does not mention any different reading in his examination of the text (皇清經解, chapter 917); and I do not see any reason for altering the translation which I first made.

his memory in conversations is not fit to be a master. Is it not necessary that he should hear the questions (of his pupils)? Yes, but if they are not able to put questions, he should put subjects before them. If he do so, and then they do not show any knowledge of the subjects, he may let them alone.

20. The son of a good founder is sure to learn how to make a fur-robe. The son of a good maker of bows is sure to learn how to make a sieve. Those who first yoke a (young) horse place it behind, with the carriage going on in front of it. The superior man who examines these cases can by them instruct himself in (the method of) learning¹.

21. The ancients in prosecuting their learning compared different things and traced the analogies between them. The drum has no special relation to any of the musical notes; but without it they cannot be harmonised. Water has no particular relation to any of the five colours; but without it they cannot be displayed². Learning has no particular relation to any of the five senses; but without it they cannot be regulated. A teacher has no

¹ The *K'ien-lung* editors say that this paragraph is intended to show that the course of learning must proceed gradually. So far is clear; but the illustrations employed and their application to the subject in hand are not readily understood. In his fifth Book (towards the end), Lieh-ze gives the first two illustrations as from an old poem, but rather differently from the text:—'The son of a good maker of bows must first learn to make a sieve; and the son of a good potter must first learn to make a fur-robe.' In this form they would more suitably have their place in paragraph 18.

² That is, in painting. The Chinese only paint in water colours. 'Water itself,' says Khung Ying-tâ, 'has no colour, but the paint requires to be laid on with water, in order to its display.' I cannot follow the text so easily in what it says on the other illustrations.

special relation to the five degrees of mourning; but without his help they cannot be worn as they ought to be.

22. A wise man has said, 'The Great virtue need not be confined to one office; Great power of method need not be restricted to the production of one article; Great truth need not be limited to the confirmation of oaths; Great seasonableness accomplishes all things, and each in its proper time.' By examining these four cases, we are taught to direct our aims to what is fundamental.

When the three sovereigns sacrificed to the waters, they did so first to the rivers and then to the seas; first to the source and then to its result. This was what is called 'Paying attention to the root.'

BOOK XVII. YO KĪ

OR

RECORD OF MUSIC¹.

SECTION I.

1. All the modulations of the voice arise from the mind, and the various affections of the mind are produced by things (external to it). The affections thus produced are manifested in the sounds that are uttered. Changes are produced by the way in which those sounds respond to one another; and those changes constitute what we call the modulations of the voice. The combination of those modulated sounds, so as to give pleasure, and the (direction in harmony with them of the) shields and axes², and of the plumes and ox-tails², constitutes what we call music.

2. Music is (thus) the production of the modulations of the voice, and its source is in the affections of the mind as it is influenced by (external) things.

¹ See the introductory notice, vol. xxvii, pages 32-34.

² There was a pantomimic exhibition of scenes of war, in which the performers brandished shields and axes; and another of scenes of peace, in which they waved plumes and ox-tails. What I have rendered by 'the modulations of the voice' is in the text the one Chinese character yin (音), for which Callery gives 'air musical,' and which K'ang Hsüan explains as meaning 'the five full notes of the scale.' See the long note of Callery prefixed to this record, concluding:—'La musique Chinoise, telle que l'ont entendue les anciens, avait tous les caractères d'une représentation théâtrale ayant pour but de parler tout à la fois aux yeux, aux oreilles, à l'esprit, et au cœur.'

When the mind is moved to sorrow, the sound is sharp and fading away; when it is moved to pleasure, the sound is slow and gentle; when it is moved to joy, the sound is exclamatory and soon disappears; when it is moved to anger, the sound is coarse and fierce; when it is moved to reverence, the sound is straightforward, with an indication of humility; when it is moved to love, the sound is harmonious and soft. These six peculiarities of sound are not natural¹; they indicate the impressions produced by (external) things. On this account the ancient kings were watchful in regard to the things by which the mind was affected.

3. And so (they instituted) ceremonies to direct men's aims aright; music to give harmony to their voices; laws to unify their conduct; and punishments to guard against their tendencies to evil. The end to which ceremonies, music, punishments, and laws conduct is one; they are the instruments by which the minds of the people are assimilated, and good order in government is made to appear.

4. All modulations of the voice spring from the minds of men. When the feelings are moved within, they are manifested in the sounds of the voice; and when those sounds are combined so as to form compositions, we have what are called airs. Hence, the airs of an age of good order indicate composure and enjoyment. The airs of an age of disorder indicate dissatisfaction and anger, and its government is per-

¹ Or, 'are not the nature;' that is, the voice does not naturally, when the mind is not moved, from without itself, give such peculiar expressions of feeling. What belongs to man by his nature is simply the faculty of articulate speech, slumbering until he is awakened by his sensations and perceptions.

versely bad. The airs of a state going to ruin are expressive of sorrow and (troubled) thought. There is an interaction between the words and airs (of the people) and the character of their government.

5. (The note) kung represents the ruler; shang, the ministers; kio, the people; kih, affairs; and yü, things. If there be no disorder or irregularity in these five notes, there will be no want of harmony in the state. If kung be irregular, (the air) is wild and broken; the ruler of the state is haughty. If shang be irregular, (the air) is jerky; the offices of the state are decayed. If kio be irregular, (the air) expresses anxiety; the people are dissatisfied. If kih be irregular, (the air) expresses sorrow; affairs are strained. If yü be irregular, (the air) is expressive of impending ruin; the resources (of the state) are exhausted. If the five notes are all irregular, and injuriously interfere with one another, they indicate a state of insolent disorder; and the state where this is the case will at no distant day meet with extinction and ruin¹.

6. The airs of K'äng² and Wei were those of an age of disorder, showing that those states were near such an abandoned condition. The airs near the river Pû, at the mulberry forest, were those of a state going to ruin³. The government (of Wei) was in a state of dissipation, and the people were unsettled, calumniating their superiors, and pursuing their private aims beyond the possibility of restraint.

¹ On those notes, see Chinese Classics, vol. iii, page 48.

² See Confucian Analects, XV, 10, 6.

³ This place was in the state of Wei. See the ridiculous incident which gave rise to this account of the airs in Sze-mâ K'ien's monograph on music, pages 13, 14.

7. All modulations of sound take their rise from the mind of man; and music is the intercommunication of them in their relations and differences. Hence, even beasts know sound, but not its modulations; and the masses of the common people know the modulations, but they do not know music. It is only the superior man who can (really) know music.

8. On this account we must discriminate sounds in order to know the airs; the airs in order to know the music; and the music in order to know (the character of) the government. Having attained to this, we are fully provided with the methods of good order. Hence with him who does not know the sounds we cannot speak about the airs, and with him who does not know the airs we cannot speak about the music. The knowledge of music leads to the subtle springs that underlie the rules of ceremony. He who has apprehended both ceremonies and music may be pronounced to be a possessor of virtue. Virtue means realisation (in one's self)¹.

9. Hence the greatest achievements of music were not in the perfection of the airs; the (efficacy) of the ceremonies in the sacrificial offerings was not in the exquisiteness of the flavours. In the lutes for the *K'ing Miào* the strings were of red (boiled) silk, and the holes were wide apart; one lute began, and

¹ Virtue (德) and getting or realising (得) have the same name or pronunciation (teh) in Chinese. This concluding sentence, as Callery points out, is only a sort of pun on that common name. And yet 'virtue' is the 'realisation' in one's self 'of what is good.' The next paragraph expands the writer's thought. The greatest achievement of music in its ancient perfection was the softening and refining of the character, and that of the services of the temple was the making men reverent, filial, and brotherly.

(only) three others joined it ; there was much melody not brought out. In the ceremonies of the great sacrifices, the dark-coloured liquor took precedence, and on the stands were uncooked fish, while the grand soup had no condiments : there was much flavour left undeveloped.

10. Thus we see that the ancient kings, in their institution of ceremonies and music, did not seek how fully they could satisfy the desires of the appetite and of the ears and eyes ; but they intended to teach the people to regulate their likings and dislikings, and to bring them back to the normal course of humanity.

11. It belongs to the nature of man, as from Heaven, to be still at his birth. His activity shows itself as he is acted on by external things, and develops the desires incident to his nature. Things come to him more and more, and his knowledge is increased. Then arise the manifestations of liking and disliking. When these are not regulated by anything within, and growing knowledge leads more astray without, he cannot come back to himself, and his Heavenly principle is extinguished.

12. Now there is no end of the things by which man is affected ; and when his likings and dislikings are not subject to regulation (from within), he is changed into the nature of things as they come before him ; that is, he stifles the voice of Heavenly principle within, and gives the utmost indulgence to the desires by which men may be possessed. On this we have the rebellious and deceitful heart, with licentious and violent disorder. The strong press upon the weak ; the many are cruel to the few ; the knowing impose upon the dull ; the bold make it bitter for

the timid; the diseased are not nursed; the old and young, orphans and solitaries are neglected:—such is the great disorder that ensues.

13. Therefore the ancient kings, when they instituted their ceremonies and music, regulated them by consideration of the requirements of humanity. By the sackcloth worn for parents, the wailings, and the weepings, they defined the terms of the mourning rites. By the bells, drums, shields, and axes, they introduced harmony into their seasons of rest and enjoyment. By marriage, capping, and the assumption of the hair-pin, they maintained the separation that should exist between male and female. By the archery gatherings in the districts, and the feastings at the meetings of princes, they provided for the correct maintenance of friendly intercourse.

14. Ceremonies afforded the defined expression for the (affections of the) people's minds; music secured the harmonious utterance of their voices; the laws of government were designed to promote the performance (of the ceremonies and music); and punishments, to guard against the violation of them. When ceremonies, music, laws, and punishments had everywhere full course, without irregularity or collision, the method of kingly rule was complete¹.

¹ With this paragraph ends the first portion of the treatise on music, called *Yo Pān* (樂本), or 'Fundamental Principles in Music.' The *K'ien-lung* editors divide it into four chapters:—the first setting forth that music takes its character as good or bad from the mind of man, as affected by what is external to it; the second, that the character of the external things affecting the mind is determined by government as good or bad; the third, that the ceremonies and music of the ancient kings were designed to

15. Similarity and union are the aim of music ; difference and distinction, that of ceremony. From union comes mutual affection ; from difference, mutual respect. [Where music prevails, we find a weak coalescence ; where ceremony prevails, a tendency to separation.] It is the business of the two to blend people's feelings and give elegance to their outward manifestations.

16. Through the perception of right produced by ceremony, came the degrees of the noble and the mean ; through the union of culture arising from music, harmony between high and low. By the exhibition of what was to be liked and what was to be disliked, a distinction was made between the worthy and unworthy. When violence was prevented by punishments, and the worthy were raised to rank, the operation of government was made impartial. Then came benevolence in the love (of the people), and righteousness in the correction (of their errors) ; and in this way good government held its course.

17. Music comes from within, and ceremonies from without. Music, coming from within, produces the stillness (of the mind) ; ceremonies, coming from without, produce the elegancies (of manner). [The highest style of music is sure to be distinguished by its ease ; the highest style of elegance, by its undemonstrativeness.]

18. Let music attain its full results, and there would be no dissatisfactions (in the mind) ; let ceremony do so, and there would be no quarrels. When

regulate the minds of men in their likings and dislikings ; and the fourth, that that regulation was in harmony with the will of Heaven, as indicated in the nature of man,

bowings and courtesies marked the government of the kingdom, there would be what might be described as music and ceremony indeed. Violent oppression of the people would not arise; the princes would appear submissively at court as guests; there would be no occasion for the weapons of war, and no employment of the five punishments¹; the common people would have no distresses, and the son of Heaven no need to be angry:—such a state of things would be an universal music. When the son of Heaven could secure affection between father and son, could illustrate the orderly relation between old and young, and make mutual respect prevail all within the four seas, then indeed would ceremony (be seen) as power.

19. In music of the grandest style there is the same harmony that prevails between heaven and earth; in ceremonies of the grandest form there is the same graduation that exists between heaven and earth. Through the harmony, things do not fail (to fulfil their ends); through the graduation we have the sacrifices to heaven and those to earth. In the visible sphere there are ceremonies and music; in the invisible, the spiritual agencies. These things being so, in all within the four seas, there must be mutual respect and love.

20. The occasions and forms of ceremonies are different, but it is the same feeling of respect (which they express). The styles of musical pieces are different, but it is the same feeling of love (which they

¹ The 'five punishments' were branding on the forehead, cutting off the nose, other various dismemberments, castration, and death; see Mayers' 'Chinese Readers' Manual,' page 313. But the one word 'punishment' would sufficiently express the writer's meaning.

promote). The essential nature of ceremonies and music being the same, the intelligent kings, one after another, continued them as they found them. The occasions and forms were according to the times when they were made; the names agreed with the merit which they commemorated.

21. Hence the bell, the drum, the flute, and the sounding-stone; the plume, the fife, the shield, and the axe are the instruments of music; the curvings and stretchings (of the body), the bending down and lifting up (of the head); and the evolutions and numbers (of the performers), with the slowness or rapidity (of their movements), are its elegant accompaniments. The dishes, round and square, the stands, the standing dishes, the prescribed rules and their elegant variations, are the instruments of ceremonies; the ascending and descending, the positions high and low, the wheelings about, and the changing of robes, are their elegant accompaniments.

22. Therefore they who knew the essential nature of ceremonies and music could frame them; and they who had learned their elegant accompaniments could hand them down. The framers may be pronounced sage; the transmitters, intelligent. Intelligence and sagehood are other names for transmitting and inventing.

23. Music is (an echo of) the harmony between heaven and earth; ceremonies reflect the orderly distinctions (in the operations of) heaven and earth.) From that harmony all things receive their being; to those orderly distinctions they owe the differences between them. Music has its origin from heaven; ceremonies take their form from the appearances of earth. If the imitation of those appearances were

carried to excess, confusion (of ceremonies) would appear; if the framing of music were carried to excess, it would be too vehement. Let there be an intelligent understanding of the nature and interaction of (heaven and earth), and there will be the ability to practise well both ceremonies and music.

24. The blending together without any mutual injuriousness (of the sentiments and the airs on the different instruments) forms the essence of music; and the exhilaration of joy and the glow of affection are its business. $\sqrt{\text{Exactitude and correctness, without any inflection or deviation, form the substance of ceremonies, while gravity, respectfulness, and a humble consideration are the rules for their discharge.}}$

25. As to the employment of instruments of metal and stone in connexion with these ceremonies and this music, the manifestation of them by the voice and its modulations, the use of them in the ancestral temple, and at the altars to the spirits of the land and grain, and in sacrificing to (the spirits of) the hills and streams, and to the general spiritual agencies (in nature);—these are (external demonstrations), natural even to the people¹.

26. When the (ancient) kings had accomplished their undertakings, they made their music (to commemorate them); when they had established their

¹ The eleven paragraphs ending with this form the second chapter of the Book, called by Liū Hsiang Yo Lun (樂論), while the third chapter, extending to the end of the section, is called Yo Lî (樂理), as if the two were an expansion of the statement in the seventh paragraph, that music is 'the intercommunication of the modulated sounds and the mind in their relations and differences.'

government, they framed their ceremonies. The excellence of their music was according to the greatness of their undertakings; and the completeness of their ceremonies was according to the comprehensiveness of their government. The dances with shields and axes did not belong to the most excellent music¹, nor did the sacrifices with cooked flesh mark the highest ceremonies¹.

27. The times of the five Tîs were different, and therefore they did not each adopt the music of his predecessor. The three kings belonged to different ages, and so they did not each follow the ceremonies of his predecessor. Music carried to an extreme degree leads to sorrow, and coarseness in ceremonies indicates something one-sided. To make the grandest music, which should bring with it no element of sorrow, and frame the completest ceremonies which yet should show no one-sidedness, could be the work only of the great sage.

28. There are heaven above and earth below, and between them are distributed all the (various) beings with their different (natures and qualities):—in accordance with this proceeded the framing of ceremonies. (The influences of) heaven and earth flow forth and never cease; and by their united action (the phenomena of) production and change ensue:—in accordance with this music arose. The processes of growth in spring, and of maturing in summer (suggest the idea of) benevolence; those of in-gather-ing in autumn and of storing in winter, suggest

¹ As being, I suppose, commemorative of the achievements of war, and not the victories of peace; and as marking a progress of society, and a departure from the primitive era of innocent simplicity and reverence.

righteousness. [Benevolence is akin to music, and righteousness to ceremonies.

29. Harmony is the thing principally sought in music:—it therein follows heaven, and manifests the spirit-like expansive influence characteristic of it. Normal distinction is the thing aimed at in ceremonies:—they therein follow earth, and exhibit the spirit-like retractive influence characteristic of it. Hence the sages made music in response to heaven, and framed ceremonies in correspondence with earth. In the wisdom and completeness of their ceremonies and music we see the directing power of heaven and earth¹.

30. (The relation) between ruler and minister was determined from a consideration of heaven (conceived of as) honourable, and earth (conceived of as) mean. The positions of noble and mean were fixed with a reference to the heights and depths displayed by the surface (of the earth). The regularity with which movement and repose follow each other (in the course of nature) led to the consideration of affairs as small

¹ On the first of these two paragraphs, P. Callery says:—"The celebrated Encyclopædist, Mâ Twan-lin (Book 181), says that this passage is one of the most marvellous that ever were written, and he draws from it the proof that the work could not have been written later than the Han, "because reckoning from that dynasty, there did not appear any author capable of conceiving ideas so profound, and expressing them in language so elevated." P. Callery adds, 'As regards the origin of the Li K'í, the reasoning of the Encyclopædist appears to me passably (passablement) false; as to the intrinsic worth of the passage, I leave it to the reader to form his judgment from the translation, which I have endeavoured to render as faithful as possible.'

In the passage of Mâ Twan-lin, however, that author is simply quoting the words of K'û Hsi (Tâ Kwân, Book 37), and expresses no opinion of his own.

and great. The different quarters (of the heavens) are grouped together, and the things (of the earth) are distinguished by their separate characteristics; and this gave rise to (the conception of) natures and their attributes and functions. In heaven there are formed its visible signs, and earth produces its (endless variety of) things; and thus it was that ceremonies were framed after the distinctions between heaven and earth.

31. The breath (or influence) of earth ascends on high, and that of heaven descends below. These in their repressive and expansive powers come into mutual contact, and heaven and earth act on each other. (The susceptibilities of nature) are roused by the thunder, excited by the wind and rain, moved by the four seasons, and warmed by the sun and moon; and all the processes of change and growth vigorously proceed. Thus it was that music was framed to indicate the harmonious action of heaven and earth.

32. If these processes took place out of season, there would be no (vigorous) life; and if no distinction were observed between males and females, disorder would arise and grow:—such is the nature of the (different qualities of) heaven and earth.

33. When we think of ceremonies and music, how they reach to the height of heaven and embrace the earth; how there are in them the phenomena of retrogression and expansion, and a communication with the spirit-like (operations of nature), we must pronounce their height the highest, their reach the farthest, their depth the most profound, and their breadth the greatest.

34. Music appeared in the Grand Beginning (of all things), and ceremonies had their place on the com-

pletion of them.] Their manifestation, being ceaseless, gives (the idea of) heaven; and again, being motionless, gives (the idea of) earth. Through the movement and repose (of their interaction) come all things between heaven and earth. Hence the sages simply spoke of ceremonies and music.

SECTION II.

1. Anciently, Shun made the lute with five strings, and used it in singing the Nan Fǎng. Khwei was the first who composed (the pieces of) music to be employed by the feudal lords as an expression of (the royal) approbation of them¹.

2. Thus the employment of music by the son of Heaven was intended to reward the most virtuous among the feudal lords. When their virtue was very great, and their instructions were honoured, and all the cereals ripened in their season, then they were rewarded by (being permitted) the use of the music. Hence, those of them whose toils in the government of the people were conspicuous, had their rows of pantomimes extended far; and those of them who had been indifferent to the government of the people

¹ Nan Fǎng, 'the South wind,' was the name of a poetical piece made by Shun, and celebrating the beneficent influence of rulers and parents as being like that of the south wind. Four lines of it are found in the Narratives of the School (Article 35):—

'The south wind's genial balm
Gives to my people's sorrows ease;
Its breath amidst the season's calm,
Brings to their wealth a large increase.'

The invention of the *lute* or *lute*, here ascribed to Shun, is also attributed to the more ancient Tis, Shǎn Nǎng and Fû-hsî. Perhaps Shun was the first to make it with five strings. Khwei was his minister of music; see vol. iii, pages 44, 45.

had those rows made short. On seeing their pantomimes, one knew what was (the degree of) their virtue, (just as) on hearing their posthumous designations, we know what had been (the character of) their conduct.

3. The *Tâ K'ang* expressed the brilliance (of its author's virtue); the *Hsien K'ih*, the completeness (of its author's); the *Shão* showed how (its author) continued (the virtue of his predecessor); the *Hsiâ*, the greatness (of its author's virtue); the music of *Yin* and *K'au* embraced every admirable quality¹.

4. In the interaction of heaven and earth, if cold and heat do not come at the proper seasons, illnesses arise (among the people); if wind and rain do not come in their due proportions, famine ensues. The instructions (of their superiors) are the people's cold and heat; if they are not what the time requires, an injury is done to society. The affairs (of their superiors) are the people's wind and rain; if they are not properly regulated, they have no success. In accordance with this, the object of the ancient kings in their practice of music was to bring their government into harmony with those laws (of heaven and earth). If it was good, then the conduct (of the people) was like the virtue (of their superiors).

5. (The feast on) grain-fed animals, with the adjunct of drinking, was not intended to produce evil, and yet cases of litigation are more numerous in consequence of it:—it is the excessive drinking which produces the evil. Therefore the former kings framed

¹ *Tâ K'ang* was the name of *Yáo's* music; *Hsien K'ih*, that of *Hwang Tí's*; *Shão*, that of *Shun's*; and *Hsiâ*, that of *Yü's*. Pages would be required to condense what is said about the pieces and their names.

the rules to regulate the drinking. Where there is (but) one presentation of the cup (at one time), guest and host may bow to each other a hundred times, and drink together all the day without getting drunk. This was the way in which those kings provided against evil consequences.

Such feasts served for the enjoyment of the parties at them. The music was intended to illustrate virtue ; the ceremonies to restrain excess.

6. Hence the former kings, on occasions of great sorrow, had their rules according to which they expressed their grief ; and on occasions of great happiness, they had their rules by which they expressed their pleasure. The manifestations, whether of grief or joy, were all bounded by the limits of these rules¹.

7. In music the sages found pleasure, and (saw that) it could be used to make the hearts of the people good. Because of the deep influence which it exerts on a man, and the change which it produces in manners and customs, the ancient kings appointed it as one of the subjects of instruction.

8. Now, in the nature of men there are both the energy of their physical powers and the intelligence of the mind ; but for their (affections of) grief, pleasure, joy, and anger there are no invariable rules. They are moved according to the external objects which excite them, and then there ensues the manifestation of the various faculties of the mind.

9. Hence, when a (ruler's) aims are small, notes

¹ With this paragraph ends the fourth division of the Book, called Yo Shih (樂施), meaning 'The grant of Music,' or the principles on which the ancient kings permitted their music to be used by the feudal princes, to signify their approval of what was good, and stimulate all to virtue.

that quickly die away characterise the music, and the people's thoughts are sad; when he is generous, harmonious, and of a placid and easy temper, the notes are varied and elegant, with frequent changes, and the people are satisfied and pleased; when he is coarse, violent, and excitable, the notes, vehement at first and distinct in the end, are full and bold throughout the piece, and the people are resolute and daring; when he is pure and straightforward, strong and correct, the notes are grave and expressive of sincerity, and the people are self-controlled and respectful; when he is magnanimous, placid, and kind, the notes are natural, full, and harmonious, and the people are affectionate and loving; when he is careless, disorderly, perverse, and dissipated, the notes are tedious and ill-regulated, and the people proceed to excesses and disorder.

10. Therefore the ancient kings (in framing their music), laid its foundations in the feelings and nature of men; they examined (the notes) by the measures (for the length and quality of each); and adapted it to express the meaning of the ceremonies (in which it was to be used). They (thus) brought it into harmony with the energy that produces life, and to give expression to the performance of the five regular constituents of moral worth. They made it indicate that energy in its Yang or phase of vigour, without any dissipation of its power, and also in its Yin or phase of remission, without the vanishing of its power. The strong phase showed no excess like that of anger, and the weak no shrinking like that of pusillanimity. These four characteristics blended harmoniously in the minds of men, and were similarly manifested in their conduct. Each occupied quietly

in its proper place, and one did not interfere injuriously with another.

11. After this they established schools for (teaching their music), and different grades (for the learners). They marked most fully the divisions of the pieces, and condensed into small compass the parts and variations giving beauty and elegance, in order to regulate and increase the inward virtue (of the learners). They gave laws for the great and small notes according to their names, and harmonised the order of the beginning and the end, to represent the doing of things. Thus they made the underlying principles of the relations between the near and distant relatives, the noble and mean, the old and young, males and females, all to appear manifestly in the music. Hence it is said that 'in music we must endeavour to see its depths.'

12. When the soil is worn out, the grass and trees on it do not grow well. When water is often troubled, the fish and tortoises in it do not become large. When the energy (of nature) is decayed, its production of things does not proceed freely. In an age of disorder, ceremonies are forgotten and neglected, and music becomes licentious.

13. In such a case the notes are melancholy but without gravity, or joyous without repose. There is remissness (in ceremonies), and the violation of them is easy. One falls into such a state of dissoluteness that he forgets the virtue properly belonging to his nature. In great matters he is capable of treachery and villainy; in small matters he becomes greedy and covetous. There is a diminution in him of the enduring, genial forces of nature, and an extinction of the virtue of satisfaction and harmony. On this

account the superior man despises such (a style of music and ceremonies)¹.

14. Whenever notes that are evil and depraved affect men, a corresponding evil spirit responds to them (from within); and when this evil spirit accomplishes its manifestations, licentious music is the result. Whenever notes that are correct affect men, a corresponding correct spirit responds to them (from within); and when this correct spirit accomplishes its manifestations, harmonious music is the result. The initiating cause and the result correspond to each other. The round and the deflected, the crooked and the straight, have each its own category; and such is the character of all things, that they affect one another severally according to their class.

15. Hence the superior man returns to the (good) affections (proper to his nature) in order to bring his will into harmony with them, and compares the different qualities (of actions) in order to perfect his conduct. Notes that are evil and depraved, and sights leading to disorder, and licentiousness, are not allowed to affect his ears or eyes. Licentious music and corrupted ceremonies are not admitted into the mind to affect its powers. The spirit of idleness, indifference, depravity, and perversity finds no exhibition in his person. And thus he makes his ears, eyes, nose, and mouth, the apprehensions of his mind, and the movements of all the parts of his body, all follow the course that is correct, and do that which is right.

¹ This and the six previous paragraphs form the fifth division of the Book, and are called Yo Yen (樂言), 'Words about Music.' The K'ien-lung editors, however, propose changing the Yen (言) into Hsing (形), so that the meaning would be 'Manifestations of Music.'

16. After this there ensues the manifestation (of the inward thoughts) by the modulations of note and tone, the elegant accompaniments of the lutes, small and large, the movements with the shield and battle-axe, the ornaments of the plumes and ox-tails, and the concluding with the pipes and flutes¹. All this has the effect of exhibiting the brilliance of complete virtue, stirring up the harmonious action of the four (seasonal) energies; and displaying the true natures and qualities of all things.

17. Hence in the fine and distinct notes we have an image of heaven; in the ample and grand, an image of earth; in their beginning and ending, an image of the four seasons; in the wheelings and revolutions (of the pantomimes), an image of the wind and rain. (The five notes, like) the five colours, form a complete and elegant whole, without any confusion. (The eight instruments of different materials, like) the eight winds, follow the musical accords, without any irregular deviation. The lengths of all the different notes have their definite measurements, without any uncertainty. The small and the great complete one another. The end leads on to the beginning, and the beginning to the end. The key notes and those harmonising with them, the sharp and the bass, succeed one another in their regular order.

¹ Thus:—

18. Therefore, when the music has full course, the different relations are clearly defined by it; the perceptions of the ears and eyes become sharp and distinct; the action of the blood and physical energies is harmonious and calm; (bad) influences are removed, and manners changed; and all under heaven there is entire repose.

19. Hence we have the saying, 'Where there is music there is joy.' Superior men rejoice in attaining to the course (which they wish to pursue); and smaller men in obtaining the things which they desire. When the objects of desire are regulated by a consideration of the course to be pursued, there is joy without any disorder. When those objects lead to the forgetfulness of that course, there is delusion, and no joy.

20. It is for this purpose that the superior man returns to the (good) affections (proper to his nature), in order to bring his will into harmony with them, and makes extensive use of music in order to perfect his instructions. When the music has free course, the people direct themselves to the quarter (to which they should proceed), and we can see (the power of) his virtue.

21. Virtue is the strong stem of (man's) nature, and music is the blossoming of virtue. Metal, stone, silk, and bamboo are (the materials of which) the instruments of music (are made). Poetry gives expression to the thoughts; singing prolongs the notes (of the voice); pantomimic movements put the body into action (in harmony with the sentiments). These three things originate in the mind, and the instruments of the music accompany them.

22. In this way the affections (from which comes the music) are deeply seated, and the elegant display

of them is brilliant. All the energies (of the nature) are abundantly employed, and their transforming power is mysterious and spirit-like. A harmonious conformity (to virtue) is realised within, and the blossoming display of it is conspicuous without, for in music, more than other things, there should be nothing that is pretentious or hypocritical.

23. Music springs from the movement of the mind; the notes are the manifestation of the music; the elegant colours and various parts are the ornaments of the notes. The superior man puts its fundamental cause in movement, makes its manifesting notes into music, and regulates its ornaments.

24. Thus they first strike the drum to warn (the performers) to be in readiness, and (the pantomimes) take three steps to show the nature of the dance. This is done a second time and they begin to move forward; and when they have completed their evolutions, they return and dress their ranks. However rapid their movements may be, there is nothing violent in them; however mysterious they may be, they are not beyond the power of being understood. One, studying them alone, finds pleasure in the object of them, and does not tire in his endeavours to understand them. When he has fully understood them, he does not keep what he desires to himself. Thus the affections (of joy) are displayed; the (ideal) of righteousness is established; and when the music is ended, the (due) honour has been paid to virtue. Superior men by it nourish their love of what is good; small men in it hear the (correction of) their errors. Hence it is said, that 'for the courses to be pursued by men the influence of music is great.'

25. In music we have the outcome and bestowal

(of what its framers felt); in ceremonies a return (for what their performers had received). Music expresses the delight in what produces it, and ceremonies lead the mind back to (the favours) which originate them. Music displays the virtue (of the framer); ceremonies are a return of the feelings (which led to them), as carrying the mind back to what originated them.

26. What is called 'a Grand carriage' is one which is (the gift) of the son of Heaven; the flag with dragons, and a nine-scolloped border, was the banner (conferred by) the son of Heaven; that with the azure and black edging exhibited the precious tortoises, and was (also the gift of) the son of Heaven; and when these were followed by herds of oxen and sheep, they were the gifts bestowed on the feudal lords¹.

SECTION III.

1. In music we have the expression of feelings which do not admit of any change; in ceremonies that of principles which do not admit of any alteration. Music embraces what all equally share; ceremony distinguishes the things in which men differ. Hence the theory of music and ceremonies embraces the whole nature of man.

2. To go to the very root (of our feelings) and know the changes (which they undergo) is the province of music; to display sincerity and put away all that is hypocritical is the grand law of ceremonies. Ceremonies and music resemble the nature of Heaven and Earth, penetrate to the virtues of the spiritual Intelligences, bring down the spirits from above, and

¹ With this ends the sixth chapter of the Book, called Yo Hsiang (樂象), meaning the natural symbols of music.

raise up those whose seat is below. They give a sort of substantial embodiment of what is most subtle as well as material, and regulate the duties between father and son, ruler and subject.

3. Therefore, when the Great man uses and exhibits his ceremonies and music, Heaven and Earth will in response to him display their brilliant influences. They will act in happy union, and the energies (of nature), now expanding, now contracting, will proceed harmoniously. The genial airs from above and the responsive action below will overspread and nourish all things. Then plants and trees will grow luxuriantly; curling sprouts and buds will expand; the feathered and winged tribes will be active; horns and antlers will grow; insects will come to the light and revive; birds will breed and brood; the hairy tribes will mate and bring forth; the mammalia will have no abortions, and no eggs will be broken or addled,—and all will have to be ascribed to the power of music¹.

4. When we speak of music we do not mean the notes emitted by the Hwang Kung, Tâ Lü, (and the other musical pipes), the stringed instruments and the singing, or the (brandishing of the) shields and axes. These are but the small accessories of the music; and hence lads act as the pantomimes. (In

¹ There is extravagance in this description. The Great man is the sage upon the throne. The imagination of the eloquent writer runs riot as he dwells on the article of his creed, that 'Heaven, Earth, and Man' are the 'Three Powers (三才)', intended by their harmonious co-operation to make a happy and flourishing world. That would indeed be wonderful music which should bring about such a result. Compare the words of the Hebrew prophet in Hosea ii. 21, 22. Callery's translation of the concluding clause is:—'Tout cela n'est autre chose que l'harmonie de la musique rejaillissant (sous tous les êtres de la nature).'

the same way), the spreading of the mats, the disposing of the vases, and the arranging of the stands and dishes, with the movements in ascending and descending, are but the small accessories of ceremonies; and hence there are the (smaller) officers who direct them. The music-masters decide on the tunes and the pieces of poetry; and hence they have their places with their stringed instruments, and their faces directed to the north. The prayer-officers of the ancestral temple decide on the various ceremonies in it, and hence they keep behind the representatives of the deceased. Those who direct the mourning rites after the manner of the Shang dynasty¹, have their places (for the same reason) behind the presiding mourner.

5. It is for this reason that the practice of virtue is held to be of superior worth, and the practice of any art of inferior; that complete virtue takes the first place, and the doing of anything, (however ingenious, only) the second. Therefore the ancient kings had their distinctions of superior and inferior, of first and last; and so they could frame their music and ceremonies for the whole kingdom².

6. The marquis Wăn of Wei³ asked 3ze-hsiâ, saying, 'When in my square-cut dark robes and cap I listen to the ancient music, I am only afraid that I shall go to sleep. When I listen to the music of

¹ Which was distinguished for the plain simplicity of its observances.

² With this ends the seventh chapter, called *Yo K'ing* (樂情), 'The attributes of Music.'

³ The marquis Wăn ruled in Wei from B.C. 425 to 387. He is said to have received the classical books from 3ze-hsiâ, when that disciple of Confucius must have been a hundred years old, and was blind, in B.C. 407.

K'ang and Wei, I do not feel tired ; let me ask why I should feel so differently under the old and the new music.'

7. 3ze-hsia replied, 'In the old music, (the performers) advance and retire all together ; the music is harmonious, correct, and in large volume ; the stringed instruments (above) and those made from gourd shells with the organs and their metal tongues (below), are all kept waiting for the striking of the drum. The music first strikes up at the sound of the drum ; and when it ends, it is at the sound of the cymbals. The close of each part of the performance is regulated by the Hsiang¹, and the rapidity of the motions by the Yá¹. In (all) this the superior man speaks of, and follows, the way of antiquity. The character is cultivated ; the family is regulated ; and peace and order are secured throughout the kingdom. This is the manner of the ancient music.

8. 'But now, in the new music, (the performers) advance and retire without any regular order ; the music is corrupt to excess ; there is no end to its vileness. Among the players there are dwarfs like monkeys, while boys and girls are mixed together, and there is no distinction between father and son. Such music can never be talked about, and cannot be said to be after the manner of antiquity. This is the fashion of the new music.

9. 'What you ask about is music ; and what you like is sound. Now music and sound are akin, but they are not the same.'

¹ These are names of musical instruments, of which figures are given in the plates to the *K'ien-lung* edition ; but there is much uncertainty about them.

10. The marquis asked him to explain, and 3ze-hsiâ replied, 'In antiquity, Heaven and Earth acted according to their several natures, and the four seasons were what they ought to be. The people were virtuous, and all the cereals produced abundantly. There were no fevers or other diseases, and no apparitions or other prodigies. This was what we call "the period of great order." After this arose the sages, and set forth the duties between father and son, and between ruler and subject, for the guidance of society. When these guiding rules were thus correctly adjusted, all under heaven, there was a great tranquillity; after which they framed with exactness the six accords (upper and lower), and gave harmony to the five notes (of the scale), and the singing to the lutes of the odes and praise-songs; constituting what we call "the virtuous airs." Such virtuous airs constituted what we call "Music," as is declared in the Book of Poetry (III, i, ode 7, 4).

"Silently grew the fame of his virtue,
His virtue was highly intelligent;
Highly intelligent, and of rare discrimination;
Able to lead, able to rule,—
To rule over this great country,
Rendering a cordial submission, effecting a cordial
union.
When (the sway) came to king Wăn,
His virtue left nothing to be dissatisfied with.
He received the blessing of God,
And it was extended to his descendants."

11. 'May I not say that what you love are the vile airs?' The marquis said, 'Let me ask where the vile airs come from?' 3ze-hsiâ replied, 'The

airs of *Kǎng* go to a wild excess, and debauch the mind; those of *Sung* tell of slothful indulgence and women, and drown the mind; those of *Wei* are vehement and rapid, and perplex the mind; and those of *Kh* are violent and depraved, and make the mind arrogant. The airs of those four states all stimulate libidinous desire, and are injurious to virtue;—they should therefore not be used at sacrifices.

12. 'It is said in the Book of Poetry (IV, i [Part ii], ode 5),

"In solemn unison (the instruments) give forth their notes;

Our ancestors will hearken to them."

That solemn unison denotes the grave reverence and harmony of their notes:—with reverence, blended with harmony, what is there that cannot be done?

13. 'A ruler has only to be careful of what he likes and dislikes. What the ruler likes, his ministers will practise; and what superiors do, their inferiors follow. This is the sentiment in the Book of Poetry (III, ii, ode 10, 6),

"To lead the people is very easy."

14. 'Seeing this, and after (the repose of the people was secured), the sages made hand-drums and drums, the stopper and the starter, the earthen whistle and the bamboo flute,—the six instruments which produced the sounds of their virtuous airs. After these came the bell, the sounding-stone, the organ with thirty-six pipes, and the large lute, to be played in harmony with them; the shields, axes, ox-tails, and plumes, brandished by the pantomimes in time and

tune. These they employed at the sacrifices in the temple of the former kings, at festivals in offering and receiving the pledge cup; in arranging the services of officers (in the temple) according to the rank due to each, as noble or mean, and in showing to future ages how they observed the order due to rank and to age.

15. 'The bells give out a clanging sound as a signal. The signal is recognised by all, and that recognition produces a martial enthusiasm. When the ruler hears the sound of the bell, he thinks of his officers of war.

'The sounding-stones give out a tinkling sound, as a summons to the exercise of discrimination. That discrimination may lead to the encountering of death. When the ruler hears the sounding-stone, he thinks of his officers who die in defence of his frontiers.

'The stringed instruments give out a melancholy sound, which produces the thought of purity and fidelity, and awakens the determination of the mind. When the ruler hears the sound of the lute and cithern, he thinks of his officers who are bent on righteousness.

'The instruments of bamboo give out a sound like that of overflowing waters, which suggests the idea of an assembly, the object of which is to collect the multitudes together. When the ruler hears the sound of his organs, pipes, and flutes, he thinks of his officers who gather the people together.

'The drums and tambours give out their loud volume of sound, which excites the idea of movement, and tends to the advancing of the host. When the ruler hears the sounds of his drums and tam-

bours, he thinks of his leaders and commanders. When a superior man thus hears his musical instruments, he does not hear only the sounds which they emit. There are associated ideas which accompany these¹.'

16. Pin-máu Kĭá² was sitting with Confucius. Confucius talked with him about music, and said, 'At (the performance of) the Wû, how is it that the preliminary warning (of the drum) continues so long?' The answer was, 'To show (the king's) anxiety that all his multitudes should be of one mind with him.'

'How is it that (when the performance has commenced) the singers drawl their notes so long, and the pantomimes move about till they perspire?' The answer was, 'To show his apprehension that some (princes) might not come up in time for the engagement.'

'How is it that the violent movement of the arms and stamping fiercely with the feet begin so soon?' The answer was, 'To show that the time for the engagement had arrived.'

'How is it that, (in the performance of the Wû,) the pantomimes kneel on the ground with the right

¹ With this fifteenth paragraph ends the eighth chapter of the Book called simply 'Marquis Wan of Wei's Chapter' (魏文侯章); and the K'ien-lung editors say nothing more about it.

² Pin-máu Kĭá must have been a scholar of Confucius' time, a master of music; but, so far as I have read, nothing is known about him beyond what appears here. The K'ang Hung at the end of the paragraph was a historiographer of K'áu, with whom Confucius is said to have studied music. The Wû was the dance and music which king Wû is said to have made after his conquest of Shang or Yin.

knee, while the left is kept up?' The answer was, 'There should be no kneeling in the Wû.'

'How is it that the words of the singers go on to speak eagerly of Shang?' The answer was, 'There should be no such sounds in the Wû.'

'But if there should be no such sound in the Wû, where does it come from?' The answer was, 'The officers (of the music) failed to hand it down correctly. If they did not do so, the aim of king Wû would have been reckless and wrong.'

The Master said, 'Yes, what I heard from *Khang Hung* was to the same effect as what you now say.'

17. Pin-mâu *K'ia* rose up, left his mat, and addressed Confucius, saying, 'On the long-continued warning (of the drum) in the Wû, I have heard your instructions; but let me ask how it is that after that first delay there is another, and that a long one?'

The Master said, 'Sit down, and I will tell you. Music is a representation of accomplished facts. The pantomimes stand with their shields, each erect and firm as a hill, representing the attitude of king Wû. The violent movements of the arms and fierce stamping represent the enthusiasm of *Thâi-kung*. The kneeling of all at the conclusion of the performance represents the government (of peace, instituted) by (the dukes of) *Kâu* and *Shão*.

18. 'Moreover, the pantomimes in the first movement proceed towards the north (to imitate the marching of king Wû against Shang); in the second, they show the extinction of Shang; in the third, they show the return march to the south; in the fourth, they show the laying out of the Southern states; in the fifth, they show how (the dukes of) *Kâu* and *Shão* were severally put in charge of the states on the

left and right; in the sixth, they again unite at the point of starting to offer their homage to the son of Heaven. Two men, one on each side of the performers, excite them with bells, and four times they stop and strike and thrust, showing the great awe with which (king Wû) inspired the Middle states. Their advancing with these men on each side shows his eagerness to complete his helpful undertaking. The performers standing long together show how he waited for the arrival of the princes.

19. 'And have you alone not heard the accounts of Mû-yeh? King Wû, after the victory over Yin, proceeded to (the capital of) Shang; and before he descended from his chariot he invested the descendants of Hwang Tî with *Kî*; those of the Tî Yâo with *Kû*; and those of the Tî Shun with *Khân*. When he had descended from it, he invested the descendant of the sovereign of Hsiâ with *Kî*; appointed the descendants of Yin to Sung; raised a mound over the grave of the king's son, Pi-kan; released the count of *Khi* from his imprisonment, and employed him to restore to their places the officers who were acquainted with the ceremonial usages of Shang. The common people were relieved from (the pressure) of the (bad) government which they had endured, and the emoluments of the multitude of (smaller) officers were doubled.

'(The king then) crossed the Ho, and proceeded to the west. His horses were set free on the south of mount Hwâ, not to be yoked again. His oxen were dispersed in the wild of the Peach forest, not to be put to the carriages again. His chariots and coats of mail were smeared with blood, and despatched to his arsenals, not to be used again. The

shields and spears were turned upside down and conveyed away, wrapped in tiger skins, which were styled "the appointed cases." The leaders and commanders were then constituted feudal lords; and it was known throughout the kingdom that king Wû would have recourse to weapons of war no more¹.

20. 'The army having been disbanded (the king commanded) a practice of archery at the colleges in the suburbs. At the college on the left (or east) they shot to the music of the Lî-shâu²; at that on the right (or west) they shot to the music of the 3âu-yü; and (from this time) the archery which consisted in going through (so many) buffcoats ceased. They wore (only) their civil robes and caps, with their ivory tokens of rank stuck in their girdles; and the officers of the guard put off their swords. (The king) offered sacrifice in the Hall of Distinction, and the people learned to be filial. He gave audiences at court, and the feudal lords knew how they ought to demean themselves. He ploughed in the field set apart for that purpose, and the lords learned what should be the object of reverence to them (in their states). These five things constituted great lessons for the whole kingdom.'

21. In feasting the three (classes of the) old and the five (classes of the) experienced in the Great college, he himself (the son of Heaven) had his

¹ See the account of all these proceedings after the victory of Mû in the Shû, V, iii, 9, though it is difficult to reconcile the two accounts in some of their details.

² See the K'âu Lî, Book 22, 32. The ode Lî-shâu was used at the archery celebrations of the feudal lords, and is now lost. The 3âu-yü is the last ode in the second Book of the Shih, Part I. It was used at contests where the king presided.

breast bared and cut up the animals. He (also) presented to them the condiments and the cups. He wore the royal cap, and stood with a shield before him. In this way he taught the lords their brotherly duties.

22. 'In this manner the ways of *Kâu* penetrated everywhere, and the interaction of ceremonies and music was established;—is it not right that in the performance of the *Wû* there should be that gradual and long-continuing action¹?'

23. A superior man says: 'Ceremonies and music should not for a moment be neglected by any one. When one has mastered completely (the principles of) music, and regulates his heart and mind accordingly, the natural, correct, gentle, and honest heart is easily developed, and with this development of the heart comes joy. This joy goes on to a feeling of repose. This repose is long-continued. The man in this constant repose becomes (a sort of) Heaven. Heaven-like, (his action) is spirit-like. Heaven-like, he is believed without the use of words. Spirit-like, he is regarded with awe, without any display of rage. So it is, when one by his mastering of music regulates his mind and heart.

24. 'When one has mastered completely (the principle of) ceremonies so as to regulate his person accordingly, he becomes grave and reverential. Grave and reverential, he comes to be regarded with awe. If the heart be for a moment without the feeling of harmony and joy, meanness and deceitfulness enter

¹ The preceding seven paragraphs form the ninth chapter, which, like the former, simply bears the name of one of the parties in it, and is called 'The chapter of Pin-mâu *Kiá*.'

it. If the outward demeanour be for a moment without gravity and respectfulness, indifference and rudeness show themselves.

25. 'Therefore the sphere in which music acts is the interior of man, and that of ceremonies is his exterior. The result of music is a perfect harmony, and that of ceremonies a perfect observance (of propriety). When one's inner man is (thus) harmonious, and his outer man thus docile, the people behold his countenance and do not strive with him; they look to his demeanour, and no feeling of indifference or rudeness arises in them. Thus it is that when virtue shines and acts within (a superior), the people are sure to accept (his rule), and hearken to him; and when the principles (of propriety) are displayed in his conduct, the people are sure (in the same way) to accept and obey him. Hence it is said, "Carry out perfectly ceremonies and music, and give them their outward manifestation and application, and under heaven nothing difficult to manage will appear."'

26. Music springs from the inward movements (of the soul); ceremonies appear in the outward movements (of the body). Hence it is the rule to make ceremonies as few and brief as possible, and to give to music its fullest development. This rule for ceremonies leads to the forward exhibition of them, and therein their beauty resides; that for music leads to the introspective consideration of it, and therein its beauty resides. If ceremonies demanding this condensation were not performed with this forward exhibition of them, they would almost disappear altogether; if music, demanding this full development, were not accompanied with this introspection, it would produce a dissipation of the mind. Thus it

is that to every ceremony there is its proper response, and for music there is its introspection. When ceremonies are responded to, there arises pleasure; and when music is accompanied with the right introspection, there arises the (feeling of) repose. The responses of ceremony and the introspection of music spring from one and the same idea, and have one and the same object.

27. Now music produces pleasure;—what the nature of man cannot be without. That pleasure must arise from the modulation of the sounds, and have its embodiment in the movements (of the body);—such is the rule of humanity. These modulations and movements are the changes required by the nature, and they are found complete in music. Thus men will not be without the ministration of pleasure, and pleasure will not be without its embodiment, but if that embodiment be not suitably conducted, it is impossible that disorder should not arise. The ancient kings, feeling that they would feel ashamed (in the event of such disorder arising), appointed the tunes and words of the Yâ and the Sung to guide (in the music), so that its notes should give sufficient pleasure, without any intermixture of what was bad, while the words should afford sufficient material for consideration without causing weariness; and the bends and straight courses, the swell and diminution, the sharp angles, and soft melody throughout all its parts, should be sufficient to stir up in the minds of the hearers what was good in them, without inducing any looseness of thought or depraved air to be suggested. Such was the plan of the ancient kings when they framed their music.

28. Therefore in the ancestral temple, rulers and

ministers, high and low, listen together to the music, and all is harmony and reverence ; at the district and village meetings of the heads of clans, old and young listen together to it, and all is harmony and deference. Within the gate of the family, fathers and sons, brothers and cousins, listen together to it, and all is harmony and affection. Thus in music there is a careful discrimination (of the voices) to blend them in unison so as to bring out their harmony ; there is a union of the (various) instruments to give ornamental effect to its different parts ; and these parts are combined and performed so as to complete its elegance. In this way fathers and sons, rulers and subjects are united in harmony, and the people of the myriad states are associated in love. Such was the method of the ancient kings when they framed their music.

29. In listening to the singing of the Yâ and the Sung, the aims and thoughts receive an expansion. From the manner in which the shields and axes are held and brandished, and from the movements of the body in the practice with them, now turned up, now bent down, now retiring, now stretching forward, the carriage of the person receives gravity. From the way in which (the pantomimes) move to their several places, and adapt themselves to the several parts (of the performance), the arrangement of their ranks is made correct, and their order in advancing and retiring is secured. In this way music becomes the lesson of Heaven and Earth, the regulator of true harmony, and what the nature of man cannot dispense with.

30. It was by music that the ancient kings gave elegant expression to their joy ; by their armies and

axes that they gave the same to their anger. Hence their joy and anger always received their appropriate response. When they were joyful, all under heaven were joyful with them; when they were angry, the oppressive and disorderly feared them. In the ways of the ancient kings, ceremonies and music may be said to have attained perfection¹.

31. (Once), when 3ze-kung had an interview with the music-master Yt, he asked him, saying, 'I have heard that in the music and words belonging to it there is that which is specially appropriate to every man; what songs are specially appropriate to me?' The other replied, 'I am but a poor musician, and am not worthy to be asked what songs are appropriate for particular individuals;—allow me to repeat to you what I have heard, and you can select for yourself (what is appropriate to you). The generous and calm, the mild and correct, should sing the Sung; the magnanimous and calm, and those of wide penetration and sincere, the Tâ Yâ (Major Odes of the Kingdom); the courteous and self-restraining, the lovers of the rules of propriety, the Hsiâo Yâ (Minor Odes of the Kingdom); the correct, upright, and calm, the discriminating and humble, the Făng (Airs of the States); the determinedly upright, but yet gentle and loving, the Shang; and the mild and honest, but yet capable of decision, the K'hi. The object of this singing is for one to make himself right, and then to display his virtue. When he has thus put

¹ From paragraph 23 to this forms the tenth chapter of the Book, which has the name of Yo Hwâ (樂化), 'The Transforming Operation of Music,' supplementing and summarising all the previous chapters.

himself in a condition to act, Heaven and Earth respond to him, the four seasons revolve in harmony with him, the stars and constellations observe their proper laws, and all things are nourished and thrive.

32. 'What are called the Shang¹ were the airs and words transmitted from the five Tis; and having been remembered by the people of Shang, we call them the Shang. What are called the *K'hi* were transmitted from the three dynasties; and having been remembered by the people of *K'hi*, we call them the *K'hi*. He who is versed in the airs of the Shang will generally be found to manifest decision in the conduct of affairs. He who is versed in the airs of the *K'hi*, when he is attracted by the prospect of profit, will yet give place to others. To manifest decision in the conduct of affairs is bravery; to give place to others in the prospect of gain is righteousness. Who, without singing these songs, can assure himself that he will always preserve such bravery and righteousness?

33. 'In singing, the high notes rise as if they were borne aloft; the low descend as if they were falling to the ground; the turns resemble a thing broken off; and the finale resembles (the breaking) of a willow tree; emphatical notes seem made by the

¹ All the other pieces of song mentioned in the preceding paragraph are well known, as the divisions under which the odes of the Shih King are arranged. What are called the Shang and *K'hi* are lost, but some account of them is given in this paragraph. When it is said that the people of Shang remembered the airs and poetry of the five Tis, we must understand by Shang the duchy of Sung, which was ruled by the representation of the line of the Shang kings. Why the state of *K'hi* should have remembered the airs and songs of 'the three dynasties' more than any other state, I cannot tell.

square; quavers are like the hook (of a spear); and those prolonged on the same key are like pearls strung together. Hence, singing means the prolonged expression of the words; there is the utterance of the words, and when the simple utterance is not sufficient, the prolonged expression of them. When that prolonged expression is not sufficient, there come the sigh and exclamation. When these are insufficient, unconsciously there come the motions of the hands and the stamping of the feet¹.

(Such was the answer to) 3ze-kung's question about music².

¹ On this passage, P. Callery says:—' Quoique, à la rigueur, on puisse comparer des airs à des objets, ou à des accidents matériels, comme nous disons de tel motif musical qu'il est "Large," "Sec," "Dur," etc., il faut avouer que les comparaisons adoptées par l'artiste Chinois sont, en général, fort mauvaises, c'est une amplification gâtée de ce qu'il a dit plus haut.'

² This and the two preceding paragraphs form the eleventh chapter of the Book, the last of those of which the text has been preserved. It is called, 'Questions of 3ze-kung about Music.'

BOOK XVIII. 3Â KĪ

OR

MISCELLANEOUS RECORDS¹.

SECTION I. PART I.

1. When a feudal lord was on the march and died in his lodging², they called back his soul in the same way as in his state. If he died on the road, (one) got up on the nave of the left wheel of the chariot in which he had been riding, and called it, waving the pennon of his flag.

(For the carriage with the bier) there was a pall, and attached to it a fringe made of black cloth, like a lower garment, serving as a curtain (to the temporary coffin), and the whole was made into a sort of house by a covering of white brocade. With this they travelled (back to his state), and on arriving at the gate of the temple, without removing the (curtain) wall, they entered and went straight to the place where the confining was to take place. The pall was removed at the outside of the door.

2. When a Great officer or an ordinary officer died on the road, (one) got up on the left end of the nave of his carriage, and called back his soul, waving his pennon. If he died in his lodging, they called the soul back in the same manner as if he had died in his house.

¹ See the introductory notice, vol. xxvii, page 34.

² The public lodging assigned to him in the state where he was.

In the case of a Great officer they made a pall of cloth, and so proceeded homewards. On arriving at the house, they removed the pall, took the (temporary) coffin on a handbarrow, entered the gate, and proceeding to the eastern steps, there halted and removed the barrow, after which they took the body up the steps, right to the place where it was to be coffined.

3. The pall-house made over the body of an ordinary officer was made of the phragmites rush; and the fringe for a curtain below of the typha.

4. In every announcement of a death to the ruler it was said, 'Your lordship's minister, so and so, has died.' When the announcement was from a parent, a wife, or an eldest son, it was said, 'Your lordship's minister, my —, has died.' In an announcement of the death of a ruler to the ruler of another state, it was said, 'My unworthy ruler has ceased to receive his emoluments. I venture to announce it to your officers¹.' If the announcement were about the death of his wife, it was said, 'The inferior partner of my poor ruler has ceased to receive her emoluments.' On the death of a ruler's eldest son, the announcement ran, 'The heir-son of my unworthy ruler, so and so, has died.'

5. When an announcement of the death of a Great officer was sent to another of the same grade, in the same state, it was said, 'So and so has ceased to receive his emoluments.' The same terms were employed when the announcement was to an ordinary officer. When it was sent to the ruler of another state, it ran, 'Your lordship's outside minister,

¹ Not daring to communicate the evil tidings directly to the ruler.

my poor Great officer, so and so, has died.' If it were to one of equal degree (in the other state), it was said, 'Sir, your outside servant, our poor Great officer, has ceased to receive his emoluments, and I am sent here to inform you.' If it were to an ordinary officer, the announcement was made in the same terms.

6. In the announcement of the death of an ordinary officer to the same parties, it was made in the same style, only that 'So and so has died,' was employed in all the cases.

7. A Great officer had his place in the lodgings about the palace, till the end of the mourning rites (for a ruler), while another officer returned to his home on the completion of a year. An ordinary officer had his place in the same lodgings. A Great officer occupied the mourning shed; another officer, the unplastered apartment¹.

8. In the mourning for a cousin, either paternal or maternal, who had not attained to the rank of a Great officer, a Great officer wore the mourning appropriate

¹ Two places of lodging about the palace are mentioned here :— the mourning shed, and the unplastered apartment. Both these appear to have been in the courtyard, outside the palace itself; the former, a hut, formed by trees and branches of trees, placed against the wall on the east, with the most slender provision for accommodation and comfort; the latter, an apartment in some other place, made of unburnt bricks, and unplastered, more commodious, but nearly as destitute of comfort. In the former, the chief mourners 'afflicted themselves,' while those whose mourning was not so intense occupied the other.

The ordinary officer, who returned home at the end of a year, is supposed to have had his charge in some town at a distance from court, where his presence could no longer be dispensed with; and the other, who occupies the unplastered apartment to the end of the rites, to have been employed at the court.

for an ordinary officer; and an ordinary officer, in mourning similarly for a cousin on either side who had been a Great officer, wore the same mourning.

9. The son of a Great officer by his wife proper wore the mourning appropriate for a Great officer.

10. The son of a Great officer by any other member of his harem, who was himself a Great officer, wore for his father or mother the mourning of a Great officer; but his place was only the same as that of a son by the proper wife who was not a Great officer.

11. When the son of an ordinary officer had become a Great officer, his parents could not preside at his mourning rites. They made his son do so; and if he had no son, they appointed some one to perform that part, and be the representative of the deceased.

12. When they were divining by the tortoise-shell about the grave and the day of interment of a Great officer, the officer superintending (the operation) wore an upper robe of sackcloth, with (strips of) coarser cloth (across the chest), and a girdle of the same and the usual mourning shoes. His cap was of black material, without any fringe. The diviner wore a skin cap.

13. If the stalks were employed, then the manipulator wore a cap of plain silk, and the long robe. The reader of the result wore his court robes.

14. At the mourning rites for a Great officer (preparatory to the interment), the horses were brought out. The man who brought them wailed, stamped, and went out. After this (the son) folded up the offerings, and read the list (of the gifts that had been sent).

15. At the mourning rites for a Great officer, one from the department of the chief superintendent of the ancestral temple assisted (the presiding mourner), and one from that of the assistant superintendent put the question to the tortoise-shell, which was then manipulated in the proper form by the diviner.

16. In calling back (the soul of) a feudal lord, they used the robe which had first been conferred on him, with the cap and corresponding robes, varying according to the order of his nobility.

17. (In calling back the soul of) a friend's wife, they used the black upper robe with a purple border, or that with pheasants embroidered on it in various colours; both of them lined with white crape.

18. (In calling back that of) the wife of a high noble, they used the upper robe of light green, worn on her first appointment to that position, and lined with white crape; (in calling back that of the wife of) a Great officer of the lowest grade, the upper robe of plain white. (The souls of other wives were called back) by parties with the same robe as in the case of an ordinary officer.

19. In the calling back, they stood (with their faces to the north), inclining to the west¹.

20. (To the pall over the coffin of a Great officer) there was not attached the (curtain of) yellow silk with pheasants on it, descending below the (bamboo) catch for water.

21. (The tablet of a grandson who had been) a Great officer was placed (in the shrine of his grandfather who had (only) been an officer; but not if he

¹ Paragraph 18 in the ordinary editions is before 16. The tablets must have been confused, and were, perhaps, defective.

had only been an officer, and the grandfather a Great officer. In that case, the tablet was placed in the shrine of a brother of the grandfather (who had only been an officer). If there were no such brother, (it was placed in the shrine of their high ancestor), according to the regular order of relationship. Even if his grand-parents were alive, it was so.

22. The (tablet of a) wife was placed after that of the wife (of the principal of the shrine), in which her husband's tablet was placed. If there had been no such wife, it was placed in the shrine of the wife of the high ancestor, according to the regular order of relationship. The (tablet of a) concubine was placed in the shrine of her husband's grandmother (concubine). If there had been no such concubine, then (it was placed in that of the concubine of the high ancestor) according to the regular order of relationship.

23. (The tablet of) an unmarried son was placed in the shrine of his grandfather, and was used at sacrifices. That of an unmarried daughter was placed in the shrine of her grandmother, but was not used at sacrifices. The (tablet of) the son of a ruler was placed in the shrine of (one of) the sons (of his grandfather), that grandfather having also been a ruler.

24. When a ruler died, his eldest son was simply styled son (for that year), but he was treated (by other rulers) as the ruler.

25. If one, after wearing for a year the mourning and cap proper to the three years for a parent, met with the death of a relative for whom he had to wear the mourning of nine months, he changed it for the hempen-cloth proper to the nine months; but he did not change the staff and shoes.

26. In mourning for a parent, (after a year) the sackcloth of the nine months' mourning is preferred; but if there occurred the placing in its shrine of the tablet of a brother who had died prematurely, the cap and other mourning worn during that first year was worn in doing so. The youth who had died prematurely was called 'The Bright Lad,' and (the mourner said), 'My so and so,' without naming him. This was treating him with reference to his being in the spirit-state.

27. In the case of brothers living in different houses, when one first heard of the death of another, he might reply to the messenger simply with a wail. His first step then was to put on the sackcloth, and the girdle with dishevelled edges. If, before he had put on the sackcloth, he hurried off to the mourning rites, and the presiding mourner had not yet adjusted his head-band and girdle, in the case of the deceased being one for whom he had to mourn for five months, he completed that term along with the presiding mourner. If nine months were due to the deceased, he included the time that had elapsed since he assumed the sackcloth and girdle.

28. The master, presiding at the mourning rites for a concubine, himself conducted the placing of her tablet (in its proper shrine). At the sacrifices at the end of the first and second years, he employed her son to preside at them. The sacrifice at her offering did not take place in the principal apartment.

29. A ruler did not stroke the corpse of a servant or a concubine.

30. Even after the wife of a ruler was dead, the concubines (of the harem) wore mourning for her

relatives. If one of them took her place (and acted as mistress of the establishment), she did not wear mourning for the relatives¹.

PART II.

1. If one heard of the mourning rites for a cousin for whom he had to wear mourning for nine months or more, when he looked in the direction of the place where those rites were going on, he wailed. If he were going to accompany the funeral to the grave, but did not get to the house in time, though he met the presiding mourner returning, he himself went on to the grave. The president at the mourning rites for a cousin, though the relationship might not have been near, also presented the sacrifice of Repose.

2. On all occasions of mourning, if, before the mourning robes had all been completed, any one arrived to offer condolences, (the president) took the proper place, wailed, bowed to the visitor, and leaped.

3. At the wailing for a Great officer, another of the same rank, wore the conical cap, with a sack-cloth band round it. He wore the same also when engaged with the coffining.

If he had on the cap of dolichos-cloth in mourning for his own wife or son, and were called away to the lighter mourning for a distant relative, he put on the conical cap and band.

4. (In wailing for) an eldest son, he carried a staff, but not for that son's son; he went without it

¹ This lady took the deceased wife's place, and performed many of the duties; but she had not the position of wife. Anciently, a feudal ruler could only, in all his life, have one wife, one lady, that is, to be called by that name.

to the place of wailing. (An eldest son), going to wail for his wife, if his parents were alive, did not carry a staff, nor bow so as to lay his forehead on the ground. If (only) his mother were alive, he did not lay his forehead to the ground. Where such a prostration should have taken place, as in the case of one who brought a gift with his condolence, an ordinary bow was made.

5. (An officer) who had left a feudal prince and gone into the service of a Great officer did not on the lord's death return and wear mourning for him; nor did one who had left a Great officer to serve a prince, return to mourn on the death of the former.

6. The strings of the mourning cap served to distinguish it from one used on a festive occasion. The silk cap worn after a year's mourning, and belonging to that for three years, had such strings, and the seam of it was on the right. That worn in the mourning of five months, and a still shorter time, was seamed on the left. The cap of the shortest mourning had a tassel of reddish silk. The ends of the girdle in the mourning of nine months and upward hung loose.

7. Court robes were made with fifteen skeins (1200 threads) in the warp. Half that number made the coarse cloth for the shortest mourning, which then was glazed by being steeped with ashes.

8. In sending presents to one another for the use of the dead, the princes of the states sent their carriages of the second class with caps and robes. They did not send their carriages of the first class, nor the robes which they had themselves received (from the king).

9. The number of (small) carriages sent (to the

grave) was according to that of the parcels of flesh to be conveyed. Each one had a pall of coarse cloth. All round were ornamental figures. These parcels were placed at the four corners of the coffin.

10. (Sometimes) rice was sent, but Yû-ze said that such an offering was contrary to rule. The food put down (by the dead) in mourning was only dried meat and pickled.

11. At the sacrifices (after the sacrifice of Repose), the mourner styled himself 'The filial son,' or 'The filial grandson;' at the previous rites, 'The grieving son,' or 'The grieving grandson.'

12. In the square upper garment of the mourner and the sackcloth over it, and in the carriage in which he rode to the grave, there was no difference of degree.

13. The white cap of high (antiquity) and the cap of black cloth were both without any ornamental fringe. The azure-coloured and that of white silk with turned-up rim had such a fringe.

14. A Great officer wore the cap with the square top when assisting at a sacrifice of his ruler; but that of skin when sacrificing at his own shrines. An ordinary officer used the latter in his ruler's temple, and the cap (of dark cloth) in his own. As an officer wore the skin cap, when going in person to meet his bride, he might also use it at his own shrines.

15. The mortar for the fragrant herbs, in making sacrificial spirits, was made of cypress wood, and the pestle of dryandria. The ladle (for lifting out the flesh) was of mulberry wood, three, some say five, cubits long. The scoop used in addition was of mulberry, three cubits long, with its handle and end carved.

16. The girdle over the shroud used for a prince

or a Great officer was of five colours; that used for another officer, only of two.

17. The must (put into the grave) was made from the malt of rice. There were the jars (for it and other liquids), the baskets (for the millet), and the boxes (in which these were placed). These were placed outside the covering of the coffin; and then the tray for the mats was put in.

18. The spirit-tablet (which had been set up over the coffin) was buried after the sacrifice of Repose.

19. (The mourning rites for) all wives were according to the rank of their husbands.

20. (Visitors who had arrived) during the slighter dressing of the corpse, the more complete dressing, or the opening (the enclosure where the coffin was), were all saluted and bowed to (after these operations were finished).

21. At the wailing morning and evening, (the coffin) was not screened from view. When the bier had been removed, the curtain was no more suspended.

22. When the ruler came to condole, after the carriage with its coffin (had reached the gate of the temple), the presiding mourner bowed towards him with his face towards the east, and moving to the right of the gate, leaped there, with his face towards the north. Going outside, he waited till the ruler took his departure and bade him go back, after which he put down (by the bier the gifts which the ruler had brought).

23. When 3ze-káo was fully dressed after his death, first, there were the upper and lower garments both wadded with floss silk, and over them a suit of black with a purple border below; next, there was a suit of white made square and straight, (the

suit belonging to) the skin cap ; next, that belonging to the skin cap like the colour of a sparrow's head ; and next, (that belonging to) the dark-coloured cap, with the square top. 3ăng-ze said, 'In such a dressing there should be nothing of woman's dress.'

24. When an officer died on some commission, upon which he had gone for his ruler, if the death took place in a public hotel, they called his soul back ; if in a private hotel, they did not do so. By a public hotel was meant a ruler's palace, or some other building erected by him, and by a private hotel, the house of a noble, a Great officer, or an officer below that rank¹.

25. (On the death of) a ruler, there is the leaping for him for seven days in succession ; and on that of a Great officer, it lasts for five days. The women take their share in this expression of grief at intervals, between the presiding mourner and his visitors. On the death of an ordinary officer, it lasts for three days ; the women taking their part in the same way.

26. In dressing the corpse of a ruler, there is first put on it the upper robe with the dragon ; next, a dark-coloured square-cut suit ; next, his court-robcs ; next, the white lower garment with gathers ; next, a purple-coloured lower garment ; next, a sparrow-head

¹ It is generally supposed that the 3ze-káo here was the disciple of Confucius, so styled, and also known as Káo K'ái ; but the dressing here is that of the corpse of a Great officer, and there is no evidence that the disciple ever attained to that rank ; and I am inclined to doubt, with K'iang K'áo-hsî and others, whether the party in the text may not have been another 3ze-káo. The caps of the last three suits are understood to be used for the suits themselves, with which they were generally worn. 3ăng-ze's condemnation of the dressing was grounded on the purple border of one of the articles in the first suit. See Analects X, 4.

skin cap ; next, the dark-coloured cap with the square top ; next, the robe given on his first investiture ; next, a girdle of red and green ; over which was laid out the great girdle.

27. At the slight dressing of the corpse the son (or the presiding mourner) wore the band of sackcloth about his head. Rulers, Great officers, and ordinary officers agreed in this.

28. When the ruler came to see the great dressing of the corpse, as he was ascending to the hall, the Shang priest spread the mat (afresh), and proceeded to the dressing.

29. The gifts (for the dead, and to be placed in the grave), contributed by the people of Lû, consisted of three rolls of dark-coloured silk, and two of light red, but they were (only) a cubit in width, and completing the length of (one) roll¹.

30. When one came (from another ruler) with a message of condolence, he took his place outside, on the west of the gate, with his face to the east. The chief officer attending him was on the south-east of him, with his face to the north, inclining to the west, and west from the gate. The orphan mourner, with his face to the west, gave his instructions to the officer waiting on him, who then went to the visitor and said, 'My orphaned master has sent me to ask why you have given yourself this trouble,' to which the visitor replies, 'Our ruler has sent me to ask for your master in his trouble.' With this reply the officer returned to the mourner and reported it,

¹ This paragraph, which it is not easy to construe or interpret, is understood to be condemnatory of a stinginess in the matter spoken of, which had begun in the Lû. The rule had been that such pieces of silk should be twenty-five cubits wide, and eighteen cubits long.

returning and saying, 'My orphaned master is waiting for you.' On this the visitor advanced. The mourning host then went up to the reception hall by the steps on the east, and the visitor by those on the west. The latter, with his face to the east, communicated his message, saying, 'Our ruler has heard of the bereavement you have sustained, and has sent me to ask for you in your sorrows.' The mourning son then bowed to him, kneeling with his forehead to the ground. The messenger then descended the steps, and returned to his place.

31. The attendant charged with the jade for the mouth of the deceased, and holding it in his hand—a flat round piece of jade—communicated his instructions, saying, 'Our ruler has sent me with the gem for the mouth.' The officer in waiting went in and reported the message, then returning and saying, 'Our orphaned master is waiting for you.' The bearer of the gem then advanced, ascended the steps, and communicated his message. The son bowed to him, with his forehead to the ground. The bearer then knelt, and placed the gem on the south-east of the coffin, upon a phragmites mat; but if the interment had taken place, on a typha mat. After this, he descended the steps, and returned to his place. The major-domo, in his court robes, but still wearing his mourning shoes, then ascended the western steps, and kneeling with his face to the west, took up the piece of jade, and descending by the same steps, went towards the east (to deposit it in the proper place).

32. The officer charged with the grave-clothes said, 'Our ruler has sent me with the grave-clothes.' The officer in waiting, having gone in and reported,

returned and said, 'Our orphaned master is waiting for you.' Then the other took up first the cap with the square top and robes, with his left hand holding the neck of the upper garment, and with his right the waist. He advanced, went up to the hall, and communicated his message, saying, 'Our ruler has sent me with the grave-clothes.' The son bowed to him, with his forehead to the ground; and when the bearer laid down the things on the east of the coffin, he then went down, and received the skin cap of the sparrow's-head colour, with the clothes belonging to it inside the gate, under the eaves. These he presented with the same forms; then the skin cap and clothes which he received in the middle of the courtyard; then the court robes; then the dark-coloured, square-cut garments, which he received at the foot of the steps on the west. When all these presentations were made, five men from the department of the major-domo took the things up, and going down the steps on the west, went away with them to the east. They all took them up with their faces towards the west.

33. The chief of the attendants (of the messenger) had charge of the carriage and horses, and with a long symbol of jade in his hand communicated his message, saying, 'Our ruler has sent me to present the carriage and horses.' The officer in waiting went in and informed the presiding mourner, and returned with the message, 'The orphan, so and so, is waiting for you.' The attendant then had the team of yellow horses and the grand carriage exhibited in the central courtyard, with the front to the north; and with the symbol in hand he communicated his message. His grooms were all below, on

the west of the carriage. The son bowed to him, with his forehead to the ground. He then knelt, and placed his symbol in the corner, on the south-east of the coffin. The major-domo then took the symbol up, and proceeded with it to the east.

34. The message was always delivered with the face turned towards the coffin, and the son always bowed to the attendant charged with it, with his forehead down to the ground. The attendant then knelt with his face to the west, and deposited his gift (or its representative). The major-domo and his employes ascended by the steps on the west to take these up, and did so with their faces towards the west, descending (again) by the same steps.

The attendant charged with the carriage and horses went out, and returned to his place outside the gate.

35. The chief visitor then, (wishing) to perform the ceremony of wailing, said, 'My ruler, being engaged in the services of his own ancestral temple, could not come and take part in your rites, and has sent me, so and so, his old servant, to assist in holding the rope.' The officer in waiting (reported his request), and returned with the message, 'The orphan, so and so, is waiting for you.' The messenger then entered and took his place on the right of the gate. His attendants all followed him, and stood on his left, on the east. The superintendent of ceremonies introduced the visitor, and went up on the hall, and received his ruler's instructions, then descending and saying, 'The orphan ventures to decline the honour which you propose, and begs you to return to your place.' The messenger, however, replied, 'My ruler charged me that I should not

demean myself as a visitor or guest, and I venture to decline doing as you request.' The other then reported this reply, and returned, and told the messenger that the orphan firmly declined the honour which he proposed, and repeated the request that he would return to his place. The messenger repeated his reply, saying that he also firmly declined (to return to his place). The same message from the mourner was repeated, and the same reply to it, (after which) the mourner said, 'Since he thus firmly declines what I request, I will venture respectfully to comply with his wish.'

The messenger then stood on the west of the gate, and his attendants on his left, facing the west. The orphaned mourner descended by the steps on the east, and bowed to him, after which they both ascended and wailed, each of them leaping three times in response to each other. The messenger then went out, escorted by the mourner outside of the gate, who then bowed to him, with his forehead down to the ground.

36. When the ruler of a state had mourning rites in hand for a parent, (any officer who was mourning for a parent) did not dare to receive visits of condolence (from another state).

37. The female relatives of the exterior kept in their apartments; the servants spread the mats; the officer of prayer, who used the Shang forms, spread out the girdle, sash, and upper coverings; the officers washed their hands, standing on the north of the vessel; they then removed the corpse to the place where it was to be dressed. When the dressing was finished, the major-domo reported it. The son then leant on the coffin and leaped. The wife with her

face to the east, also leant on it, kneeling ; and then she got up and leaped¹.

38. There are three things in the mourning rites for an officer which agree with those used on the death of the son of Heaven:—the torches kept burning all night (when the coffin is to be conveyed to the grave); the employment of men to draw the carriage; and the keeping of the road free from all travellers on it.

¹ See the twelfth paragraph in the second section of next Book. It appears here, with some alteration, by mistake.

SECTION II. PART I.

1. When a man was wearing mourning for his father, if his mother died before the period was completed, he put off the mourning for his father (and assumed that proper for his mother). He put on, however, the proper dress when sacrificial services required it; but when they were over ¹, he returned to the mourning (for his mother).

2. When occasion occurred for wearing the mourning for uncles or cousins, if it arrived during the period of mourning for a parent, then the previous mourning was not laid aside, save when the sacrificial services in these cases required it to be so; and when they were finished, the mourning for a parent was resumed.

3. If during the three years' mourning (there occurred also another three years' mourning for the eldest son), then after the coarser girdle of the *Kiung* hemp had been assumed in the latter case, the sacrifices at the end of the first or second year's mourning for a parent might be proceeded with.

4. When a grandfather had died, and his grandson also died before the sacrifices at the end of the first or second year had been performed, (his spirit-tablet) was still placed next to the grandfather's.

5. When a mourner, while the coffin was in the house, heard of the death of another relative at a

¹ That is, the sacrifices regularly presented at the end of the first and second year from the death. The translation here and in the next three paragraphs, if it were from an Aryan or Semitic language, could not be said to be literal; but it correctly represents the ideas of the author.

distance, he went to another apartment and wailed for him. (Next day), he entered where the coffin was, and put down the offerings (to the deceased), after which he went out, changed his clothes, went to the other apartment, and repeated the ceremony of the day before.

6. When a Great officer or another officer was about to take part in a sacrifice at his ruler's, if, after the inspection of the washing of the vessels to be used, his father or mother died, he still went to the sacrifice ; but took his place in a different apartment. After the sacrifice he put off his (sacrificial) dress, went outside the gate of the palace, wailed, and returned to his own house. In other respects he acted as he would have done in hurrying to the mourning rites. If the parent's death took place before the inspection of the washing, he sent a messenger to inform the ruler of his position ; and when he returned, proceeded to wail (for his deceased parent).

When the death that occurred was that of an uncle, aunt, or cousin, if he had received the previous notice to fast, he went to the sacrifice ; and when it was over, he went out at the ruler's gate, put off his (sacrificial) dress, and returned to his own house. In other respects he acted as if he had been hurrying to the mourning rites. If the deceased relative lived under the same roof with him, he took up his residence in other apartments ¹.

¹ The *K'ien-lung* editors doubt the genuineness of this last sentence. A commissioned officer, they say, and much more a Great officer, occupied his own residence, and had left the family at home ; and they fail to see how the condition supposed could have existed.

7. 3ǎng-íze asked, 'When a high minister or Great officer is about to act the part of the personator of the dead at a sacrifice by his ruler, and has received instructions to pass the night previous in solemn vigil, if there occur in his own family occasion for him to wear the robe of hemmed sackcloth, what is he to do?' Confucius said, 'The rule is for him to leave his own house, and lodge in the ruler's palace till the service (for the ruler) is accomplished.'

8. Confucius said, 'When the personator of the dead comes forth in his leathern cap, or that with the square top, ministers, Great officers, and other officers, all should descend from their carriages when he passes. He should bow forward to them, and he should (also) have people going before him (to notify his approach, that people may get out of the way¹).'

9. During the mourning rites for a parent, when the occasion for one of the sacrifices was at hand, if a death occurred in the family of a brother or cousin, the sacrifice was postponed till the burial of the dead had taken place. If the cousin or brother were an inmate of the same palace with himself, although the death were that of a servant or concubine, the party postponed his sacrifice in this way. At the sacrifice the mourner went up and descended the steps with only one foot on each, all assisting him, doing the same. They did so even for the sacrifice of Repose, and to put the spirit-tablet in its place.

10. From the feudal rulers down to all officers, at the sacrifice at the end of the first year's mourning

¹ See vol. xxvii, page 341, paragraph 26, which is here repeated.

for a parent, when the chief mourner took the cup offered to him by the chief among the visitors, he raised it to his teeth, while, the visitors, brothers, and cousins all sipped the cups presented to them. After the sacrifice at the end of the second year, the chief mourner might sip his cup, while all the visitors, brothers, and cousins might drink off their cups.

11. The attendants at the sacrifices during the funeral rites give notice to the visitors to present the offerings, of which, however, they did not afterwards partake.

12. 3ze-kung asked about the rites of mourning (for parents), and the Master said, 'Reverence is the most important thing ; grief is next to it ; and emaciation is the last. The face should wear the appearance of the inward feeling, and the demeanour and carriage should be in accordance with the dress.'

He begged to ask about the mourning for a brother, and the Master said, 'The rites of mourning for a brother are to be found in the tablets where they are written.'

13. A superior man will not interfere with the mourning of other men to diminish it, nor will he do so with his own mourning¹.

14. Confucius said, 'Shão-lien and Tâ-lien demeaned themselves skilfully during their mourning (for their parents). During the (first) three days they were alert; for the (first) three months they manifested no weariness; for the (first) year they were full of grief; for the (whole) three years they were

¹ The *K'ien-lung* editors think paragraph 13 is out of place, and would place it farther on, after paragraph 43.

sorrowful. (And yet) they belonged to one of the rude tribes on the East¹.

15. During the three years of mourning (for his father), (a son) might speak, but did not discourse; might reply, but did not ask questions. In the shed or the unplastered apartment he sat (alone), nobody with him. While occupying that apartment, unless there were some occasion for him to appear before his mother, he did not enter the door (of the house). On all occasions of wearing the sackcloth with its edges even, he occupied the unplastered apartment, and not the shed. To occupy the shed was the severest form in mourning.

16. (The grief) in mourning for a wife was like that for an uncle or aunt; that for a father's sister or one's own sister was like that for a cousin; that for any of the three classes of minors dying prematurely was as if they had been full-grown.

17. The mourning for parents is taken away (at the end of three years), (but only) its external symbols; the mourning for brothers (at the end of one year), (and also) internally.

18. (The period of mourning) for a ruler's mother or wife is the same as that for brothers. But (beyond) what appears in the countenance is this, that (in the latter case) the mourners do not eat and drink (as usual).

19. After a man has put off the mourning (for his father), if, when walking along the road, he sees one like (his father), his eyes look startled. If he hear one with the same name, his heart is agitated.

¹ Sháo-lien; see *Analects* XVIII, 8, 3, and 'Narratives of the School,' Article 43.

In condoling with mourners on occasion of a death, and inquiring for one who is ill, there will be something in his face and distressed manner different from other men. He who is thus affected is fit to wear the three years' mourning. So far as other mourning is concerned, he may walk right on (without anything) having such an effect on him.

20. The sacrifice at the end of the second¹ year is signalized by the principal mourner putting off his mourning dress. The evening (before), he announces the time for it, and puts on his court robes, which he then wears at the sacrifice.

21. 3ze-yû said, 'After the sacrifice at the end of the second year, although the mourner should not wear the cap of white silk, (occasions may occur when) he must do so². Afterwards he resumes the proper dress.'

22. (At the mourning rites of an officer), if, when he had bared his breast, a Great officer arrived (on a visit of condolence), although he might be engaged in the leaping, he put a stop to it, and went to salute and bow to him. Returning then, he resumed his leaping and completed it, after which he re-adjusted his dress and covered his breast.

In the case of a visit from another officer, he went on with his leaping, completed it, readjusted his upper dress, and then went to salute and bow to him, without having occasion to resume and complete the leaping.

23. At the sacrifice of Repose for a Great officer of the highest grade, there were offered a boar and a

¹ So, *Khân Kào*.

² Such as receiving the condolences of visitors on account of some other occasion of mourning.

ram; at the conclusion of the wailing, and at the placing of his spirit-tablet, there was, in addition, the bull. On the similar occasions for a Great officer of the lowest grade, there was in the first case a single victim, and in the others the boar and the ram.

24. In consulting the tortoise-shell about the burial and sacrifice of Repose, the style of the petition was as follows:—A son or grandson spoke of himself as ‘the sorrowing,’ (when divining about his father or grandfather); a husband (divining about his wife) said, ‘So and so for so and so;’ an elder brother about a younger brother, simply said, ‘So and so;’ a younger brother about an elder brother said, ‘For my elder brother, so and so.’

25. Anciently, noble and mean all carried staffs. (On one occasion) Shû-sun Wû-shû¹, when going to court, saw a wheelwright put his staff through the nave of a wheel, and turn it round. After this (it was made a rule that) only men of rank should carry a staff.

26. (The custom of) making a hole in the napkin (covering the face of the dead) by which to introduce what was put into the mouth, was begun by Kung-yang Kíá².

27. What were the grave-clothes (contributed to the dead)? The object of them was to cover the body. From the enshrouding to the slighter dressing, they were not put on, and the figure of the body was seen. Therefore the corpse was first enshrouded, and afterwards came the grave-clothes.

28. Some one asked Ǵǵng-ǵze, ‘After sending

¹ A Great officer of Lí, about B.C. 500.

² We do not find anything about this man elsewhere.

away to the grave the offerings to the dead, we wrap up what remains;—is this not like a man, after partaking of a meal, wrapping up what is left (to take with him)? Does a gentleman do such a thing?’ ᢈᠠᠩ-ᢈᠵᠡ said, ‘Have you not seen what is done at a great feast? At a great feast, given by a Great officer, after all have partaken, he rolls up what is left on the stands for the three animals, and sends it to the lodgings of his guests. When a son treats his parents in this way as his (honoured) guests, it is an expression of his grief (for their loss). Have you, Sir, not seen what is done at a great feast?’

29. ‘Excepting at men’s funeral rites, do they make such inquiries and present such gifts as they then do? At the three years’ mourning, the mourner bows to his visitors in the manner appropriate to the occasion; at the mourning of a shorter period, he salutes them in the usual way¹.’

30. During the three years’ mourning, if any one sent wine or flesh to the mourner, he received it after declining it thrice; he received it in his sackcloth and band. If it came from the ruler with a message from him, he did not presume to decline it;—he received it and presented it (in his ancestral temple).

One occupied with such mourning did not send any gift, but when men sent gifts to him he received them. When engaged in the mourning rites for an uncle, cousin, or brother, and others of a shorter period, after the wailing was concluded, he might send gifts to others.

31. Hsien-ᢈᠵᠡ said, ‘The pain occasioned by the

¹ See vol. xxvii, pp. 122–3, paragraph 5. There is probably something wanting at the beginning of this paragraph.

mourning for three years is like that of beheading ; that arising from the one year's mourning, is like the stab from a sharp weapon.'

32. During the one year's mourning, in the eleventh month, they put on the dress of silk, which was called *lien*; in the thirteenth month they offered the *hsiang* sacrifice, and in the same month that called *than*;—which concluded the mourning.

During the mourning for three years, even though they had occasion to assume the dress proper for the nine months' mourning, they did not go to condole (with the other mourners). From the feudal lords down to all officers, if they had occasion to dress and go to wail (for a relative newly deceased), they did so in the dress proper to the mourning for him. After putting on the *lien* silk, they paid visits of condolence.

33. When one was occupied with the nine months' mourning, if the burial had been performed, he might go and condole with another mourner, retiring after he had wailed without waiting for any other part of the mourner's proceedings.

During the mourning for one year, if before the burial one went to condole with another in the same district, he withdrew after he had wailed, without waiting for the rest of the proceedings.

If condoling during the mourning for nine months, he waited to see the other proceedings, but did not take part in them.

During the mourning for five months or three months, he waited to assist at the other proceedings, but did not take part in the (principal) ceremony¹.

¹ That is, in putting down the offerings to the deceased.

34. When one (was condoling with) another whom he had been accustomed to pass with a hasty step¹, (at the interment of his dead relative), he retired when the bier had passed out from the gate of the temple. If they had been on bowing terms, he retired when they had reached the station for wailing. If they had been in the habit of exchanging inquiries, he retired after the coffin was let down into the grave. If they had attended court together, he went back to the house with the other, and wailed with him. If they were intimate friends, he did not retire till after the sacrifice of Repose, and the placing of the spirit-tablet of the deceased in the shrine.

35. Condoling friends did not (merely) follow the principal mourner. Those who were forty (or less) held the ropes when the coffin was let down into the grave. Those of the same district who were fifty followed him back to the house and wailed ; and those who were forty waited till the grave was filled up.

36. During mourning, though the food might be bad, the mourner was required to satisfy his hunger with it. If for hunger he had to neglect anything, this was contrary to the rules. If he through satiety forgot his sorrow, that also was contrary to the rules. It was a distress to the wise men (who made the rules) to think that a mourner should not see or hear distinctly; should not walk correctly or be unconscious of his occasion for sorrow ; and therefore (they enjoined) that a mourner, when ill, should drink wine and eat flesh; that people of fifty should do nothing to bring on emaciation; that at sixty they should not be emaciated; that at seventy they should drink ✓

¹ This was a mark of respect. Compare Analects IX, 9.

liquor and eat flesh:—all these rules were intended as preventives against death.

- ✓ 37. If one, while in mourning, was invited by another to eat with him, he did not go while wearing the nine months' mourning or that of a shorter period; if the burial had taken place, he might go to another party's house. If that other party belonged to his relative circle, and wished him to eat with him, he might do so; if he did not belong to that circle, he did not eat with him.
- ✓ 38. While wearing the mourning of nine months, one might eat vegetables and fruits, and drink water and congee, using no salt or cream. If he could not eat dry provisions, he might use salt or cream with them.
- ✓ 39. Confucius said, 'If a man have a sore on his body, he should bathe. If he have a wound on his head, he should wash it. If he be ill, he should drink liquor and eat flesh. A superior man will not emaciate himself so as to be ill. If one die from such emaciation, a superior man will say of him that he has failed in the duty of a son.'
- ✓ 40. Excepting when following the carriage with the bier to the grave, and returning from it, one was not seen on the road with the mourning cap, which was used instead of the ordinary one.
- ✓ 41. During the course of mourning, from that worn for five months and more, the mourner did not wash his head or bathe, excepting for the sacrifice of Repose, the placing the spirit-tablet in the shrine, the assuming the dress of lien silk, and the sacrifice at the end of a year.
- ✓ 42. During mourning rites, when the sackcloth with the edges even was worn, after the burial, if one asked an interview with the mourner, he saw him, but

he himself did not ask to see any person. He might do so when wearing the mourning of five months. When wearing that for nine months, he did not carry the introductory present in his hand (when seeking an interview). It was only when wearing the mourning for a parent that the mourner did not avoid seeing any one, (even) while the tears were running from him.

43. A man while wearing the mourning for three years might execute any orders of government after the sacrifice at the end of a year. One mourning for a year, might do so when the wailing was ended; one mourning for nine months, after the burial; one mourning for five months or three, after the encoffining and dressing.

44. ᢈᠠᢈ ᢈᠠᢈ asked ᢈᠠᢈ-ᢈᢈ, saying, 'In wailing for a parent, should one do so always in the same voice?' The answer was, 'When a child has lost its mother on the road, is it possible for it to think about the regular and proper voice?'

PART II.

1. After the wailing was ended, there commenced the avoiding of certain names. (An officer) did not use the name of his (paternal) grandfather or grandmother, of his father's brothers or uncles; of his father's aunts or sisters. Father and son agreed in avoiding all these names. The names avoided by his mother the son avoided in the house. Those avoided by his wife he did not use when at her side. If among them there were names which had been borne by his own paternal great-grandfather or great-grand-uncles, he avoided them (in all places).

2. When (the time for) capping (a young man) came during the time of the mourning rites, though they were those for a parent, the ceremony might be performed. After being capped in the proper place, the subject went in, wailed and leaped,—three times each bout, and then came out again.

3. At the end of the nine months' mourning, it was allowable to cap a son or to marry a daughter. A father at the end of the five months' mourning, might cap a son, or marry a daughter, or take a wife (for a son). Although one himself were occupied with the five months' mourning, yet when he had ended the wailing, he might be capped, or take a wife. If it were the five months' mourning for one who had died in the lowest degree of immaturity, he could not do so¹.

4. Whenever one wore the cap of skin with a sackcloth band (in paying a visit of condolence), his upper garment of mourning had the large sleeves.

5. When the father was wearing mourning, a son, who lived in the same house with him, kept away from all music. When the mother was wearing it, the son might listen to music, but not play himself. When a wife was wearing it, the son, (her husband), did not play music by her side. When an occasion for the nine months' mourning was about to occur, the lute and cithern were laid aside. If it were only an occasion for the five months' mourning, music was not stopped.

6. When an aunt or sister died (leaving no son), if her husband (also) were dead, and there were no

¹ This paragraph seems to me, as to many of the Chinese critics, irretrievably corrupt or defective.

brother or cousin in his relative circle, some other of her husband's more distant relatives was employed to preside at her mourning rites. None of a wife's relatives, however near, could preside at them. If no distant relative even of her husband could be found, then a neighbour, on the east or the west, was employed. If no such person (suitable) could be found, then the head man of the neighbourhood presided. Some say, 'One (of her relatives) might preside, but her tablet was placed by that of the (proper) relative of her husband.'

7. The girdle was not used along with the sack-cloth band. That band could not be used by one who carried in his hand his jade-token; nor could it be used along with a dress of various colours.

8. On occasions of prohibitions issued by the state (in connexion with the great sacrifices), the wailing ceased; as to the offerings deposited by the coffin, morning and evening, and the repairing to their proper positions, mourners proceeded as usual¹.

9. A lad, when wailing, did not sob or quaver; did not leap; did not carry a staff; did not wear the straw sandals; and did not occupy the mourning shed.

10. Confucius said, 'For grand-aunts the mourning with the edges even is worn, but the feet in leaping are not lifted from the ground. For aunts and sisters the mourning for nine months is worn, but the feet in leaping are lifted from the ground. If a man understands these things, will he not (always) follow the right forms of ceremonies? Will he not do so?'

¹ The punctuation and place of this short paragraph vary. Its integrity is also doubted.

11. When the mother of Î Liû died, his assistants in the rites stood on his left; when Î Liû died, they stood on his right. The practice of the assistants (at funeral rites) giving their aid on the right, originated from the case of Î Liû¹.

12. The mouth of the son of Heaven was stuffed after death with nine shells; that of a feudal lord, with seven; that of a Great officer, with five; and that of an ordinary officer, with three².

13. An officer was interred after three months, and the same month the wailing was ended. A Great officer was interred (also) after three months, and after five months the wailing was ended. A prince was interred after five months, and after seven the wailing was ended.

For an officer the sacrifice of Repose was offered three times; for a Great officer, five times; and for a feudal prince, seven times.

14. A feudal lord sent a messenger to offer his condolences; and after that, his contributions for the mouth, the grave-clothes, and the carriage. All these things were transacted on the same day, and in the order thus indicated.

15. When a high minister or Great officer was ill, the ruler inquired about him many times. When an ordinary officer was ill, he inquired about him once. When a Great officer or high minister was buried, the ruler did not eat flesh; when the wailing was finished, he did not have music. When an officer was encoffined, he did not have music.

16. After they had gone up, and made the bier

¹ A minister of duke Mû of Lû, B.C. 409-377.

² This was not the practice in the Kâu dynasty.

ready, in the case of the burial of a feudal lord, there were 500 men to draw the ropes. At each of the four ropes they were all gagged. The minister of War superintended the clappers; eight men with these walking on each side of the bier. The chief artizan, carrying a shade of feathers, guided the progress (of the procession). At the burial of a Great officer, after they had gone up and made the bier ready, 300 men drew the ropes; four men with their clappers walked on each side of the bier; and its progress was guided (by the chief artizan) with a reed of white grass in his hand.

17. Confucius said, 'Kwan Kung had carving on the square vessels for holding the grain of his offerings, and red ornaments for his cap; he set up a screen where he lodged on the way, and had a stand of earth on which the cups he had used, in giving a feast, were replaced; he had hills carved on the capitals of his pillars, and pondweed on the lower pillars supporting the rafters¹. He was a worthy Great officer, but made it difficult for his superiors (to distinguish themselves from him).

'An Phing-kung², in sacrificing to his father and other progenitors, used only the shoulders of a pig, not large enough to cover the dish. He was a worthy Great officer, but made it difficult for his inferiors (to distinguish themselves from him).

'A superior man will not encroach on (the observances of) those above him, nor put difficulties in the way of those below him.'

¹ See Confucian Analects III, 22, and V, 17.

² A minister of K'hi, contemporary with Confucius, distinguished for his simple, and perhaps parsimonious, ways.

18. Excepting on the death of her father or mother, the wife (of a feudal lord) did not cross the boundaries of the state to pay a visit of condolence. On that occasion she did so, and went back to her original home, where she used the ceremonies of condolence proper to a feudal lord, and she was treated as one. When she arrived, she entered by the women's gate, and went up (to the reception hall) by steps at the side (of the principal steps), the ruler receiving her at the top of the steps on the east. The other ceremonies were the same as those of a guest who hastened to attend the funeral rites.

19. A sister-in-law did not lay the soothing hand on the corpse of her brother-in-law; and vice versâ.

20. There are three things that occasion sorrow to a superior man (who is devoted to learning):—If there be any subject of which he has not heard, and he cannot get to hear of it; if he hear of it, and cannot get to learn it; if he have learned it, and cannot get to carry it out in practice. There are five things that occasion shame to a superior man (who is engaged in governmental duties):—If he occupy an office, and have not well described its duties; if he describe its duties well, but do not carry them into practice; if he have got his office, and lost it again; if he be charged with the care of a large territory, and the people be not correspondingly numerous; if another, in a charge like his own, have more merit than he.

21. Confucius said, 'In bad years they used in their carriages their poorest horses, and in their sacrifices the victims lowest (in the classes belonging to them).'

22. At the mourning rites for Hsü Yü, duke Âi

sent Zû Pî to Confucius to learn the rites proper at the mourning for the officer. Those rites were thus committed at that time to writing.

23. 3ze-kung having gone to see the agricultural sacrifice at the end of the year, Confucius said to him, '3hze, did it give you pleasure?' The answer was, 'The people of the whole state appeared to be mad; I do not know in what I could find pleasure.' The Master said, 'For their hundred days' labour in the field, (the husbandmen) receive this one day's enjoyment (from the state);—this is what you do not understand. (Even) Wăn and Wû could not keep a bow (in good condition), if it were always drawn and never relaxed; nor did they leave it always relaxed and never drawn. To keep it now strung and now unstrung was the way of Wăn and Wû.'

24. Mâng Hsien-ze said, 'If in the first month at the (winter) solstice it be allowable to offer the (border) sacrifice to God, in the seventh month, at the summer solstice, we may offer the sacrifice in the temple of the ancestor (of our ruling House).' Accordingly Hsien-ze offered that sacrifice to all the progenitors (of the line of Lû) in the seventh month¹.

25. The practice of not obtaining from the son of Heaven the confirmation of her dignity for the wife (of the ruler of Lû) began with duke K'áo².

¹ Hsien-ze was the honorary title of Kung-sun Mieh, a good officer of Lû, under dukes Wăn, Hsüan, K'äng, and Hsiang. He must understand him as speaking of the sacrifices of the state, and not of his own.

² See Confucian Analects VII, 30. Duke K'áo married a lady of Wû, of the same surname with himself, and therefore had not announced the marriage to the king.

26. The mourning of a ruler and his wife were regulated by the same rules for the ladies of his family married in other states and for those married in his own¹.

27. When the stables of Confucius were burned, and the friends of his district came (to offer their condolences) on account of the fire, he bowed once to the ordinary officers, and twice to the Greater officers;—according to the rule on occasions of mutual condolence.

28. Confucius said, 'Kwan K'ung selected two men from among (certain) thieves with whom he was dealing, and appointed them to offices in the state, saying, "They were led astray by bad men with whom they had associated, but they are proper men themselves." When he died, duke Hwan made these two wear mourning for him. The practice of old servants of a Great officer wearing mourning for him, thus arose from Kwan K'ung. But these two men only mourned for him by the duke's orders.'

29. When an officer, in a mistake, used a name to his ruler which should be avoided, he rose to his feet. If he were speaking to any one who had the name that should be avoided with the ruler, he called him by the name given to him on his maturity.

30. (A Great officer) took no part in any seditious movements within his state, and did not try to avoid calamities coming from without.

31. The treatise on the duties of the Chief Inter-nuncius says, 'The length of the long symbol of rank was for a duke, nine inches; for a marquis or

¹ There are differences of opinion as to the meaning of this paragraph, between which it is not easy to decide. It would be tedious to go into an exhibition and discussion of them.

earl, seven; for a count or baron, five. The width in each case was three inches; and the thickness, half an inch. They tapered to the point for one inch and a half. They were all of jade. The mats for them were made with three different colours, (two rows of each,) six in all.'

32. Duke Âi asked 3ze-kão, 'When did members of your family first begin to be in office?' The answer was, 'My ancestor held a small office under duke Wăn¹.'

33. When a temple was completed, they proceeded to consecrate it with the following ceremony:—The officer of prayer, the cook, and the butcher, all wore the cap of leather of the colour of a sparrow's head, and the dark-coloured dress with the purple border. The butcher rubbed the sheep clean, the officer of prayer blessed it, and the cook with his face to the north took it to the pillar and placed it on the south-east of it. Then the butcher took it in his arms, went up on the roof at the middle point between the east and west, and with his face to the south stabbed it, so that the blood ran down in front; and then he descended. At the gate of the temple, and of each of the two side apartments, they used a fowl, one at the gate of each (going up as before and stabbing them). The hair and feathers about the ears were first pulled out under the roof (before the victims were killed). When the fowls were cut at the gates of the temple, and the apartments on each side of it, officers stood, opposite to each gate on the north. When the thing was over, the officer of prayer announced that it

¹ This paragraph is supposed to be defective. Duke Wăn was marquis of Lû from B.C. 626 to 609.

was so, and they all retired, after which he announced it to the ruler, saying, 'The blood-consecration has been performed.' This announcement was made at the door of the back apartment of the temple, inside which the ruler stood in his court-robes, looking towards the south. This concluded the ceremony, and all withdrew¹.

When the great apartment (of the palace) was completed, it was inaugurated (by a feast), but there was no shedding of blood. The consecration by blood of the temple building was the method taken to show how intercourse with the spirits was sought. All the more distinguished vessels of the ancestral temple were consecrated, when completed, by the blood of a young boar.

34. When a feudal lord sent his wife away, she proceeded on her journey to her own state, and was received there with the observances due to a lord's wife. The messenger, accompanying her, then discharged his commission, saying, 'My poor ruler, from his want of ability, was not able to follow her, and take part in the services at your altars and in your ancestral temple. He has, therefore, sent me, so and so, and I venture to inform your officer appointed for the purpose of what he has done.' The officer presiding (on the occasion) replied, 'My poor ruler in his former communication did not lay (her defects) before you, and he does not presume to do anything but respectfully receive your lord's message.' The officers in attendance on the commis-

¹ This ceremony is also described in the 'Rites of the greater Tâi,' Book X, with some difference in the details. It is difficult, even from the two accounts, to bring the ceremony fully before the mind's eye.

sioner then set forth the various articles sent with the lady on her marriage, and those on the other side received them.

35. When the wife went away from her husband, she sent a messenger and took leave of him, saying, 'So and so, through her want of ability, is not able to keep on supplying the vessels of grain for your sacrifices, and has sent me, so and so, to presume to announce this to your attendants.' The principal party (on the other side) replied, 'My son, in his inferiority, does not presume to avoid your punishing him, and dares not but respectfully receive your orders.' The messenger then retired, the principal party bowing to him, and escorting him. If the father-in-law were alive, then he named himself; if he were dead, an elder brother of the husband acted for him, and the message was given as from him; if there were no elder brother, then it ran as from the husband himself. The message, as given above, was, 'The son of me, so and so, in his inferiority.' (At the other end of the transaction), if the lady were an aunt, an elder sister, or a younger, she was mentioned as such.

36. Confucius said, 'When I was at a meal at Shão-shih's, I ate to the full. He entertained me courteously, according to the rules. When I was about to offer some in sacrifice, he got up and wished to stop me, saying, "My poor food is not worth being offered in sacrifice." When I was about to take the concluding portions, he got up and wished to stop me, saying, "I would not injure you with my poor provisions¹."'

¹ See pages 20, 21, paragraph 13.

37. A bundle of silk (in a marriage treaty) contained five double rolls, each double roll being forty cubits in length.

38. At the (first) interview of a wife with her father and mother-in-law, (her husband's) unmarried aunts and sisters all stood below the reception hall, with their faces towards the west, the north being the place of honour. After this interview, she visited all the married uncles of her husband, each in his own apartment.

Although not engaged to be married, the rule was for a young lady to wear the hair-pin;—she was thus treated with the honours of maturity. The (principal) wife managed the ceremony. When she was unoccupied and at ease, she wore her hair without the pin, on each side of her head.

39. The apron (of the full robes) was three cubits long, two cubits wide at bottom, and one at the top. The border at the top extended five inches; and that at the sides was of leather the colour of a sparrow's head, six inches wide, terminating five inches from the bottom. The borders at top and bottom were of white silk, embroidered with the five colours.

BOOK XIX. SANG TÂ KI

OR

THE GREATER RECORD OF MOURNING RITES¹.

SECTION I.

1. When the illness was extreme, all about the establishment was swept clean, inside and out. In the case of a ruler or Great officer, the stands, with the martial instruments suspended from them, were removed; in that of an officer, his lute and cithern. The sufferer lay with his head to the east, under the window on the north. His couch was removed (and he was laid on the ground). The clothes ordinarily worn at home were removed, and new clothes substituted for them. (In moving the body) one person took hold of each limb. Males and females changed their dress². Some fine floss was put (on the mouth and nostrils), to make sure that the breath was gone. A man was not permitted to die in the hands of the women, or a woman in the hands of the men.

2. A ruler and his wife both died in the Great chamber, a Great officer and his acknowledged wife in the Proper chamber³; the not yet acknowledged

¹ See introductory notice, vol. xxvii, pages 34, 35.

² The clothes of the dying master and friend were changed; it was right that all about them should also change their dress. The court or best robes were put on, moreover, that inquiring visitors might be properly received.

³ This proper, or 'legitimate' chamber corresponded in the mansion of a Great officer to the Grand chamber in the palace.

wife of a high minister, in an inferior chamber, but the corpse was then removed to the higher chamber. The wives of officers died in their chambers.

3. At (the ceremony of) calling back the soul, if (the deceased were a lord on whose territory) there were forests and copses, the forester arranged the steps (by which to go up on the roof); and if there were no forests, one of the salvage men (employed about the court in menial offices) did so. An officer of low rank performed the ceremony. All who did so employed some of the court robes (of the deceased):—for a ruler, the robe with the descending dragon; for the wife, that with the descending pheasant; for a Great officer, the dark robe and red skirt; for his recognised wife, the robe of fresh yellow; for an officer, that worn with the cap of deep purple leather; and for his wife, the dark dress with the red border. In all cases they ascended from the east wing to the middle of the roof, where the footing was perilous. Facing the north, they gave three loud calls for the deceased, after which they rolled up the garment they had employed, and cast it down in front, where the curator of the robes received it, and then they themselves descended by the wing on the north-west.

If the deceased were a visitor, and in a public lodging, his soul was called back; if the lodging were private, it was not called back. If he were in the open country, one got up on the left end of the nave of the carriage in which he had been riding, and called it back.

Connected with the Grand chamber were two smaller apartments. It is mentioned in the *So Kwan*, under B.C. 627, that duke Hsî of Lû died 'in the small apartment;' which has always been understood as discreditable to him.

4. The garment which had been used in calling the soul back was not employed to cover the corpse, nor in dressing it. In calling back the soul of a wife, the upper robe with the purple border in which she had been married was not employed. In all cases of calling back the soul, a man was called by his name, and a woman by her designation. Nothing but the wailing preceded the calling the soul back. After that calling they did what was requisite on an occasion of death.

5. Immediately after death, the principal mourners sobbed¹; brothers and cousins (of the deceased) wailed; his female relatives wailed and leaped.

6. When the dead body (of a ruler) had been placed properly (beneath the window with the head to the south), his son sat (or knelt) on the east; his ministers, Great officers, uncles, cousins, their sons and grandsons, stood (also) on the east; the multitude of ordinary officers, who had the charge of the different departments, wailed below the hall, facing the north. His wife knelt on the west; the wives, aunts, sisters, their daughters and grand-daughters, whose husbands were of the same surname as he, stood (behind her) on the west; and the wives, his relatives of the same surname, whose position had been confirmed in their relation to their husbands, at the head of all the others married similarly to husbands of other surnames, wailed above in the hall, facing the north.

7. At the mourning rites (immediately after death) of a Great officer, the (son), presiding, knelt on the east, and the wife, presiding, on the west. The

¹ They were too much affected, it is said, to give loud expression to their grief.

husbands and wives (among the relations) whose positions had been officially confirmed, sat (or knelt); others who had not that confirmation, stood.

At the rites for a deceased officer, the son presiding, uncles, brothers, and cousins, with their sons and grandsons, all sat (or knelt) on the east; the wife presiding, aunts, sisters, and cousins, with their female children and grandchildren, all sat (or knelt) on the west.

Whenever they wailed by the corpse in the apartment, the presiding mourner did so, holding up the shroud with his two hands at the same time.

8. At the mourning rites of a ruler, before the slighter dressing was completed, the principal mourner came out to receive the visit of a refugee ruler, or a visitor from another state.

At those for a Great officer, at the same period, he came out to receive a message from his ruler. At those for an ordinary officer, also at the same period, he came out to receive a Great officer, if he were not engaged in the dressing.

9. Whenever the presiding mourner went forth (to meet visitors), he had his feet bare, his skirt tucked under his girdle, and his hands across his chest over his heart. Having gone down by the steps on the west, if a ruler, he bowed to a refugee ruler, or a minister commissioned from another state, each in his proper place. When a message from his ruler came to a Great officer, he came to the outside of the door of the apartment (where the dead was), to receive the messenger who had ascended to the hall and communicated his instructions. (They then went down together), and the mourner bowed to the messenger below.

When a Great officer came himself to condole with an ordinary officer, the latter wailed along with him, but did not meet him outside the gate.

10. The wife of a ruler went out (of her apartment) on a visit from the wife of a refugee ruler.

The confirmed wife (of a Great officer) went out (in the same way) on the arrival of a message from the ruler's wife.

The wife of an officer, if not engaged in the dressing, (also) went out to receive the confirmed wife (of a Great officer).

11. At the slighter dressing, the presiding mourner took his place inside the door (on the east of it), and the presiding wife had her face to the east. When the dressing was ended, both of them made as if they leant on the body, and leaped. The mourner unbared his breast, took off the tufts of juvenility, and bound up his hair with sackcloth. The wife knotted up her hair, and put on her sackcloth girdle in her room.

12. When the curtain (which screened the body) was removed, the men and women carried it and put it down in the hall, (the eldest son) going down the steps and bowing (to the visitors).

13. The (young) ruler (who was mourning) bowed to refugee lords, and to ministers, commissioners from other states. Great officers and other officers bowed to ministers and Great officers in their respective places. In the case of (the three grades of) officers, they received three side-bows¹, one for each grade. The ruler's wife also bowed to the wife of a refugee

¹ The side-bows were somehow made, without the ruler's turning directly towards the officers.

lord, above in the hall. With regard to the wives of Great officers and of other officers, she bowed specially to each whose position had received the official appointment; to the others she gave a general bow;—all above in the hall.

14. When the mourner had gone to his own place (after bowing to his visitors), he closed the robe which was drawn on one side, covering his breast, put on his girdle and head-band, and leapt. When the mourning was for his mother, he went to his place, and tied up his hair, after which he put down the offerings by the body. The visitors who had come to condole, covered their fur robes, put the roll at the back of their caps, assumed their girdles and head-bands, and leapt in correspondence with the mourner.

15. At the funeral rites for a ruler, the chief forester supplied wood and horns; the chief of the salvage-men supplied the vases for water; the chief of the slaughtering department supplied boilers; and (an officer from the department of) the minister of War (saw to the) hanging of these. Thus they secured the succession of wailers. Some of those in the department took their part in the wailing. If they did not hang up the vases, and the Great officers were sufficient to take the wailing in turns, then they did not use those others¹.

In the hall of the ruler there were two lights above and two below; for that of a Great officer, one above

¹ The object of the arrangements in this obscure paragraph was evidently to maintain the wailing uninterrupted, and to provide, by means of the clepsydra, a regular marking of the time for that purpose. See, in the *K'âu Kwan* XXX, 51-52, the duties of the officer of the department of the minister of War who had charge of the vase.

and two below ; for that of an ordinary officer, one above and one below¹.

16. When the guests went out, the curtain was removed².

17. When they were wailing the corpse above in the hall, the principal mourner was at the east ; visitors coming from without, took their place at the west, and the women stood facing the south.

18. The wife (presiding), in receiving guests and escorting them, did not go down from the hall with them. If she did go down (as with the wife of the ruler), she bowed to her, but did not wail.

If the son (presiding), had occasion to go outside the door of the apartment, and saw the guest (whom he so went to meet), he did not wail.

When there was no female to preside, a son did so, and bowed to the female visitors inside the door of the apartment. If there were no son to preside, a daughter did so, and bowed to the male visitors at the foot of the steps on the east.

If the son were a child, then he was carried in his sackcloth in the arms, and his bearer bowed for him.

If the successor of the deceased were not present, and was a man of rank, an apology was made to the guests ; if he were not a man of rank, some other one bowed to them for him.

If he were anywhere in the state, they waited for him ; if he had gone beyond it, the encoffining and burial might go on. The funeral rites might proceed without the presence of the successor of the deceased, but not without one to preside over them.

¹ This must have been towards morning. During the night torches were kept burning.

² This should be at the end of paragraph 14.

19. At the mourning rites for a ruler, on the third day his sons and his wife assumed the staff. On the fifth day, when the corpse was put into the coffin, his daughters who had become the wives of Great officers were allowed to use it. His (eldest) son and Great officers used it outside the door of the apartment (where the coffin was); inside the door they carried it in their hands (but did not use it). The wife and his daughters, the wives of Great officers, used the staff in their rooms; when they went to their places (in the apartment where the coffin was), people were employed to hold it for them.

When a message came from the king, (the son presiding) put away his staff; when one came from the ruler of another state, he only held it in his hand. When attending to any consultation of the tortoise-shell about the corpse, he put away his staff.

A Great officer, in the place of the ruler, carried his staff in his hand; at another Great officer's, he used it.

20. At the mourning rites for a Great officer, on the morning of the third day, when the body was put into the coffin, his son presiding, his wife presiding, and the steward of the House, all assumed the staff. On a message from the ruler, the (new) Great officer put away his staff; on a message from another Great officer, he carried it in his hand. His wife, on a message from the wife of the ruler, put her staff away; on a message from the confirmed wife (of another Great officer), she gave it to some one to hold for her.

21. At the mourning rites for an officer, the body on the second day was put into the coffin. On the morning of the third day, the presiding mourner

assumed the staff, and his wife also. The same observances as in the rites for a Great officer were observed on messages arriving from the ruler or his wife, or from a Great officer and his confirmed wife.

22. All the sons assumed the staff, but only the eldest son used it when they were going to their places (in the apartment where the coffin was). Great officers and other officers, when wailing by the coffin, used the staff; when wailing by the bier, they carried it in their hands. When the staff (used in mourning) was thrown away, it was broken and thrown away in secret.

23. As soon as death took place, the corpse was transferred to the couch¹, and covered with a large sheet. The clothes in which the deceased had died were removed. A servant plugged the mouth open with the spoon of horn; and to keep the feet from contracting, an easy stool was employed². These observances were the same for a ruler, a Great officer, and an ordinary officer³.

24. The servant in charge of the apartments drew the water, and without removing the well-rope from the bucket gathered it up, and carried the whole up to the top of the steps. There, without going on the hall, he gave it to the attendants in waiting on the body. These then went in to wash the corpse, four

¹ When death seemed to be imminent, the body was removed from the couch and laid on the ground;—if, perhaps, contact with ‘mother’ earth might revive it. When death had taken place, it was replaced on the couch.

² I do not quite understand how this stool was applied so as to accomplish its purpose.

³ This paragraph is the 24th in the *Khien-lung* edition. See below, paragraph 26.

lower servants holding up the sheet, and two performing the washing ; having put the water in basins, to which they took it with ladles. In washing they used napkins of fine linen, and in drying the body the ordinary bathing clothes. Another servant then pared the nails of the feet, after which they threw away the rest of the water into the pit. At the funeral rites for a mother (or other female), the female attendants in waiting in the inner room held up the sheet and washed the body.

25. The servant in charge of the apartments, having drawn water and given it to the attendants in waiting on the body, these prepared the wash for the head, above in the hall :—for a ruler, made from maize-water ; for a Great officer, from that of the glutinous millet ; and for an ordinary officer, that from maize-water. After this, some of the forester's department made a sort of furnace at the foot of the wall on the west ; and the potter brought out a large boiler, in which the servant in charge of the apartments should boil the water. The servants of the forester's department brought the fuel which he had removed from the crypt in the north-west of the apartment, now converted into a shrine, to use for that purpose. When the water was heated, he gave it to the attendants, who proceeded to wash the head, and poured the water into an earthenware basin, using the napkin as on ordinary occasions to dry the head. Another servant then clipped the nails of the fingers, and wiped the beard. The water was then thrown into the pit.

26. For a ruler they put down a large vessel, full of ice ; for a Great officer, a middle-sized one, full of ice ; and for an ordinary officer, only one of earthen-

ware, without any ice in it. Over these they placed the couch with a single sheet and pillow on it; another couch on which the jade should be put into the mouth; and another still, where the fuller dressing should be done. Then the corpse was removed to a couch in the hall, on which was a pillow and mat. The same forms were observed for a ruler, a Great officer, and an ordinary officer¹.

27. At the mourning rites for a ruler, his (eldest) son, Great officers, his other sons, and all the (other) officers (employed about the court), ate nothing for three days, but confined themselves to gruel. (Afterwards) for their consumption they received in the morning a handful of rice, and another in the evening; which they ate without any observance of stated times. Officers (at a distance) were restricted to coarse rice and water for their drink, without regard to any stated times. The wife (of the new ruler), the confirmed wives (of the Great officers), and all the members of their harems, had coarse rice and drank water, having no regard in their eating to stated times.

28. At the mourning rites for a Great officer, the presiding mourner, the steward, and grandsons, all were confined to gruel. All the inferior officers were restricted to coarse rice, and water to drink. Wives and concubines took coarse rice, and water to drink. At the rites for an ordinary officer the same rules were observed.

29. After the burial, the presiding mourner had (only) coarse rice and water to drink;—he did not

¹ This paragraph is the 23rd in the *K'ien-lung* edition, confessedly out of place.

eat vegetables or fruits. His wife observed the same rule. So it was in the case of rulers, Great officers, and other officers.

After the change of mourning, towards the end of the year, they ate vegetables and fruit; and after the subsequent sacrifice, they ate flesh.

30. They took their gruel in bowls, and did not wash their hands (before doing so). When they took their rice from the basket, they washed their hands. They ate their vegetables along with pickles and sauces. When they first ate flesh, it was dry flesh; when they first drank liquor, it was that newly made.

31. During the mourning of a year, on three occasions they abstained from eating. When eating coarse rice, with water to drink, they did not eat vegetables or fruits. After the burial, at the end of three months, they ate flesh and drank liquor. When the year's mourning was ended, they did not eat flesh nor drink liquor. When the father was alive, in the mourning of nine months, the rules were the same as in that for a year, on account of the mother or of the wife. Though they ate flesh and drank liquor, they could not take the enjoyment of these things in company with others¹.

32. During the mourning for five months, and that for three months, it was allowable to abstain from eating once or twice. Between the coffining and burial², when eating flesh and drinking liquor,

¹ The statements in this paragraph, and those in the next, might certainly be stated more distinctly.

² Such is the meaning of the text here, as fully defined by a Fang Páo (方苞):—比葬者自殯後比至于葬也.

they did not take the enjoyment of these things in company with others. While mourning for an aunt, the confirmed wife of an uncle, one's old ruler, or the head of a clan, they ate flesh and drank liquor.

If a mourner could not eat the gruel, he might eat soup of vegetables. If he were ill, he might eat flesh and drink liquor. At fifty, one did not go through all the observances of mourning. At seventy, he simply wore the sackcloth on his person.

33. After the burial, if his ruler feasted a mourner, he partook of the viands; if a Great officer or a friend of his father did so, he partook in the same way. He did not even decline the grain and flesh that might be set before him, but wine and new wine he declined.

SECTION II.

1. The slighter dressing was performed inside the door (of the apartment where the body was); the fuller dressing (at the top of) the steps (leading up to the reception hall) on the east. The body of a ruler was laid on a mat of fine bamboo; of a Great officer, on one of typha grass; and of an ordinary officer, on one of phragmites grass.

2. At the slighter dressing one band of cloth was laid straight, and there were three bands laid cross-wise. The sheet for a ruler's body was embroidered; for a Great officer's, white; for an ordinary officer's, black:—each had one sheet.

There were nineteen suits of clothes¹; those for

¹ So in all our dictionaries; as in Medhurst, 衣一稱, 'a suit of clothes.' But why nineteen suits? K'ang and Ying-tâ say, 'To make up ten, the concluding number of heaven; and nine, that of

the ruler, displayed in the corridor on the east ; and those for a Great officer, or a common officer, inside the apartments :—all with their collars towards the west, those in the north being the best. The sash and sheet were not reckoned among them.

3. At the fuller dressing there were three bands of cloth laid straight, and five laid cross-wise. There were (also) strings of cloth, and two sheets :—equally for a ruler, a Great officer, and a common officer. The clothes for a ruler consisted of one hundred suits, displayed in the courtyard, having their collars towards the north, those on the west being the best ; those of a Great officer were fifty suits, displayed in the corridor on the east, having the collars towards the west, those on the south being the best ; those of a common officer were thirty suits, displayed also in the corridor on the east, with their collars towards the west, the best on the south. The bands and strings were of the same quality as the court robes. One strip of the band-cloth was divided into three, but at the ends was not further divided. The sheets were made of five pieces, without strings or buttons.

4. Among the clothes at the slighter dressing, the sacrificial robes were not placed below the others. For the ruler no clothes were used that were presented. For a Great officer and a common officer, the sacrificial (and other) robes belonging to the principal mourner were all used, and then they used those contributed by their relatives ; but these were not displayed along with the others.

earth.' But how shall we account for the hundred, fifty, and thirty suits at the greater dressing, in next paragraph ? These suits were set forth, I suppose, for display ; they could hardly be for use.

At the slighter dressing, for a ruler, a Great officer, and a common officer, they used wadded upper robes and sheets.

At the greater dressing, the number of sacrificial (and other) robes put on a ruler, a Great officer, or another officer, was not definitely fixed; but the upper robes and sheets for a ruler had only a thin lining, (instead of being wadded); for a Great officer and a common officer, they were as at the slighter dressing.

5. The long robe (worn in private) had a shorter one placed over it;—it was not displayed alone. It was the rule that with the upper garment the lower one should also be shown. So only could they be called a suit.

6. All who set forth the clothes took them from the chests in which they had been deposited; and those who received the clothes brought (as contributions) placed them in (similar) chests. In going up to the hall and descending from it, they did so by the steps on the west. They displayed the clothes without rumpling them. They did not admit any that were not correct; nor any of fine or coarse *dolychos* fibre, or of coarse flax.

7. All engaged in dressing the corpse had their arms bared; those who moved it into the coffin, had their breasts covered. At the funeral rites for a ruler, the Great officer of prayer performed the dressing, assisted by all the members of his department; at those for a Great officer, the same officer stood by, and saw all the others dress the body; at those of a common officer, the members of that department stood by, while other officers (his friends) performed the dressing.

8. At both the dressings the sacrificial robes were not placed below the others. They were all placed with the lappel to lie on the left side. The bands were tied firmly, and not in a bow-knot.

9. The rule was that the dressers should wail, when they had completed their work. But in the case of an officer, as the dressing was performed by those who had served in office along with him, they, after the work was done, omitted a meal. In all cases the dressers were six.

10. The body cases (used before the dressing) were made :—for a ruler, the upper one embroidered, and the lower one striped black and white, with seven strings on the open side ; for a Great officer, the upper one dark blue, and the lower one striped black and white, with five tie-strings on the side ; for a common officer, the upper one black, and the lower one red, with three tie-strings at the side. The upper case came down to the end of the hands, and the lower case was three feet long. At the smaller dressing and afterwards, they used coverlets laid on the body (instead of these cases), their size being the same as that of the cases.

11. When the great dressing of a ruler's body was about to commence, his son, with the sackcloth band about his cap, went to his place at the (south) end of the (eastern) corridor, while the ministers and Great officers took theirs at the corner of the hall, with the pillar on their west, their faces to the north, and their row ascending to the east. The uncles, brothers, and cousins were below the hall, with their faces to the north. The (son's) wife, and other wives whose position had been confirmed were on the west of the body, with their faces to

the east. The female relations from other states were in their apartments with their faces to the south. Inferior officers spread the mats. The Shang officers of prayer spread the strings, the coverlet, and clothes. The officers had their hands over the vessels. They then lifted the corpse and removed it to the place for the dressing. When the dressing was finished, the superintendent announced the fact. The son then (seemed to) lean on it, and leaped while his wife did the same, with her face to the east.

12. At the mourning rites of a Great officer, when they were about to proceed to the great dressing, and the tie-strings, coverlets, and clothes had all been spread out, the ruler arrived, and was met by (the son), the principal mourner. The son entered before him, (and stood) at the right of the gate, outside which the exorcist stopped. The ruler having put down the vegetables (as an offering to the spirit of the gate), and the blesser preceding him, entered and went up to the hall. He then repaired to his place at the end of the corridor, while the ministers and Great officers took theirs at the corner of the hall on the west of the pillar, looking to the north, their row ascending to the east. The presiding mourner was outside the apartment (where the corpse was), facing the south. His wife presiding was on the west of the body, facing the east. When they had moved the corpse, and finished the dressing, the steward reported that they had done so, and the presiding mourner went down below the hall, with his face to the north. There the ruler laid on him the soothing hand, and he bowed with his forehead to the ground. The ruler signified to him to go up, and lean on the

body, and also requested his wife, presiding, to lean on it.

13. At the mourning rites for a common officer, when they were about to proceed to the great dressing, the ruler was not present. In other respects the observances were the same as in the case of a Great officer.

14. They also leaped at the spreading out of the ties and strings; of the sheet; of the clothes; at the moving of the corpse; at the putting on of the clothes; of the coverlet; and of the adjusting of the ties and bands.

15. The ruler laid his hand on the body of a Great officer, and on that of the most honourable ladies of his own harem. A Great officer laid his hand on the body of the steward of his house, and on that of his niece and the sister of his wife, who had accompanied her to the harem.

The ruler and a Great officer leant closely with their breasts over the bodies of their parents, wives, and eldest sons, but not over those of their other sons.

A common officer, however, did so also to all his other sons.

If a son by a concubine had a son, the parents did not perform this ceremony over him. When it was performed, the parents did it first, and then the wife and son.

A ruler laid his hand on the body of a minister; parents, while bending over that of a son, also took hold of his hand. A son bent over his parents, bringing his breast near to theirs. A wife seemed as if she would place her two arms beneath the bodies of her parents-in-law; while they (simply)

laid their hands on her. A wife made as if she would cling to her husband's body; while the husband held her hand as he did that of a brother or cousin. When others brought the breast near the body of a corpse, they avoided the point at which the ruler had touched it. After every such mark of sorrow, the mourner rose up and leaped.

16. At the mourning rites for a parent, (the son) occupied the slanting shed, unplastered; slept on straw, with a clod of earth for his pillow. He spoke of nothing but what related to the rites. A ruler enclosed this hut; but Great and common officers left it exposed.

After the burial, the inclined posts were set up on lintels, and the hut was plastered, but not on the outside which could be seen. Rulers, Great and common officers, all had it enclosed.

All the other sons, but the eldest by the proper wife, even before the burial had huts made for themselves in out-of-the-way places.

17. After the burial, the son would stand with others. If a ruler, he would speak of the king's affairs, but not of those of his own state. If a Great officer, or a common officer, he would speak of the ruler's affairs, but not of those of his own clan or family.

18. When the ruler was buried, the royal ordinances came into the state. After the wailing was finished, the new ruler engaged in the king's affairs.

When a Great officer or a common officer was buried, the ordinances of the state came to his family. After the wailing was finished, while continuing the sackcloth band round his cap, and the girdle, he might don his armour and go into the field.

19. After the mourning was changed at the end of a year, (the sons) occupied the unplastered apartment, and did not occupy one along with others. Then the ruler consulted about the government of the state; and Great officers and common officers about the affairs of their clan and families. After the sacrifice at the end of two years, the ground of the apartment was made of a dark green, and the walls were whitened. After this, they no longer wailed outside; and after the sacrifice at the end of twenty-seven months, they did not do so inside; for, after it, music began to be heard.

20. After that sacrifice, at the end of twenty-seven months, (the son) attended to all his duties; and after the felicitous sacrifice (of re-arranging the tablets in his ancestral temple), he returned to his (usual) chamber.

At the one year's mourning, he occupied the hut; and when it was completed, the occasions on which he did not seek the nuptial chamber were:—when his father was alive, and he had been wearing the hemmed sackcloth of a year for his mother or his wife, and when he had been wearing the cloth mourning of nine months; on these occasions, for three months he did not seek the intercourse of the inner chamber.

A wife did not occupy the hut, nor sleep on the straw. At the mourning for her father or mother, when she had changed the mourning at the end of a year, she returned to her husband; when the mourning was that of nine months, she returned after the burial.

21. At the mourning rites for a duke (of the royal domain), his Great officers continued till the

change of mourning at the end of a year, and then returned to their own residences. A common officer returned at the conclusion of the wailing.

22. At the mourning rites for their parents, (the other sons who were) Great officers or common officers, returned to their own residences after the change of the mourning at the end of the year; but on the first day of the month and at full moon, and on the return of the death-day, they came back and wailed in the house of him who was now the Head of their family.

At the mourning for uncles and cousins, they returned to their own residences at the conclusion of the wailing.

23. A father did not take up his quarters (during the mourning) at a son's, nor an elder brother at a younger's.

24. At the mourning rites for a Great officer or his acknowledged wife, a ruler (went to see) the greater dressing; but if he wished to show special favour, he attended the slighter dressing.

The ruler, in the case of an acknowledged wife, married to a Great officer of a different surname from his own, arrived after the lid was put on the coffin.

He went to an officer's, when the body was put into the coffin; but if he wanted to show special favour, he attended at the greater dressing.

The ruler's wife, at the mourning for a (Great officer's) acknowledged wife, attended at the greater dressing; but if she wished to show special favour, at the slighter. In the case of his other wives, if she wished to show special favour, she attended at the greater dressing. In the case of a Great officer's

acknowledged wife, who was of a different surname from her own, she appeared after the coffining had taken place.

25. When the ruler went to a Great officer's or a common officer's, after the coffining had taken place, he sent word beforehand of his coming. The chief mourner provided all the offerings to be set down for the dead in the fullest measure, and waited outside the gate, till he saw the heads of the horses. He then led the way in by the right side of the gate. The exorcist stopped outside, and the bleaser took his place, and preceded the ruler, who put down the offerings of vegetables (for the spirit of the gate) inside it. The bleaser then preceded him up the eastern steps, and took his place with his back to the wall, facing the south. The ruler took his place at (the top of) the steps; two men with spears standing before him, and two behind. The officer of reception then advanced. The chief mourner bowed, laying his forehead to the ground. The ruler then said what he had to say; looked towards the bleaser and leaped. The chief mourner then (also) leaped.

26. If the visit were paid to a Great officer, the offerings might at this point be put down by the coffin. If it were to a common officer, he went out to wait outside the gate. Being requested to return and put down the offerings, he did so. When this was done, he preceded the ruler, and waited for him outside the gate. When the ruler retired, the chief mourner escorted him outside the gate, and bowed to him, with his forehead to the ground.

27. When a Great officer was ill, the ruler thrice inquired for him; and when his body was confined, visited (his son) thrice. When a common officer

was ill, he inquired for him once ; and when his body was coffined, visited (his son) once.

When the ruler came to condole (after the coffin-ing), the (son) put on again the clothes he had worn at the coffining.

28. When the ruler's wife went to condole at a Great officer's or a common officer's, the chief mourner went out to meet her outside the gate, and, when he saw her horses' heads, went in before her by the right side of the gate. She then entered, went up to the hall, and took her place. The wife presiding went down by the steps on the west, and bowed with her head to the ground below (the hall). The ruler's wife looked towards her eldest son (who had accompanied her), and leaped.

The offerings were put down according to the rules for them on the visit of the ruler. When she retired, the wife presiding went with her to the inside of the door of the apartment, and bowed to her with her head to the ground. The chief mourner escorted her to the outside of the great gate, but did not bow.

29. When a Great officer came to the mourning rites of one of his officers to whom he stood in the relation of ruler, the officer did not meet him outside the gate. He entered and took his place below the hall. The chief mourner (stood on the south of his place), with his face to the north, though the general rule for chief mourners was to face the south. The wife took her place in the room.

If, at this juncture, there came a message from the ruler of the state, or one from a confirmed (Great) officer or his confirmed wife, or visitors from the neighbouring states, the Great officer-ruler, having

the chief mourner behind him, performed the bow of ceremony to each visitor.

30. When a ruler, on a visit of condolence, saw the bier for the corpse, he leaped.

If a ruler had not given notice beforehand of his coming to a Great officer or a common officer, and he had not prepared the various offerings to be put down by the coffin on the occasion, when the ruler withdrew, the rule was that they should then be put down.

31. The largest (or outermost) coffin of the ruler of a state was eight inches thick ; the next, six inches ; and the innermost, four inches. The larger coffin of a Great officer of the highest grade was eight inches thick ; and the inner, six inches ; for one of the lowest grade, the dimensions were six inches and four. The coffin of a common officer was six inches thick.

32. The (inner) coffin of a ruler was lined with red (silk), fixed in its place with nails of various metals ; that of a Great officer with (silk of a) dark blue, fixed with nails of ox-bone ; that of a common officer was lined, but had no nails.

33. The lid of a ruler's coffin was varnished, with three double wedges (at the edges) over which were three bands ; that of a Great officer's was (also) varnished, with two double wedges and two bands ; that of a common officer was not varnished, but it had two double wedges and two bands.

34. The (accumulated) hair and nails of a ruler and Great officer were placed (in bags) at the four corners of the coffin ; those of an officer were buried (without being put in the coffin).

35. The coffin of a ruler was placed upon a bier,

which was surrounded with high stakes, inclined over it till, when all was finished and plastered, there was the appearance of a house. That of a Great officer, having been covered with a pall, was placed in the western corridor and staked, but the plastering did not reach all over the coffin. That of a common officer was placed so that the double wedges could be seen ; above that it was plastered. All were screened.

36. Of scorched grain there were put by the coffin of a ruler eight baskets, containing four different kinds; by that of a Great officer, six baskets, containing three kinds; by that of a common officer, four baskets, containing two kinds. Besides these, there were (dried) fish and flesh.

37. Ornamenting the coffin (on its way to the grave), there were for a ruler :—the curtains with dragons (figured on them), and over them three gutter-spouts ; the fluttering ornaments (with pheasants figured on them and the ends of the curtains); above (on the sloping roof of the catafalque) were figures of axe-heads, of the symbol of discrimination, thrice repeated, and of flames, thrice repeated. These occupied the pall-like roof of white silk, as embroidery, and above it was the false covering attached to it by six purple ties, and rising up with ornaments in five colours and five rows of shells. There were (at the corners) two streamers of feathers, suspended from a frame with the axes on it; two from another, bearing the symbol of discrimination; two from another, variously figured ; all the frames on staffs, showing jade-symbols at the top. Fishes were made as if leaping at the ends of the gutters. The whole of the catafalque was kept together by six supports rising from the coffin, and wound round with purple

silk, and six sustaining ropes, also purple, (drawn through the curtains).

For the catafalque of a Great officer there were painted curtains, with two gutter-spouts (above them); there were not the fluttering ornaments; above (on the sloping roof) there were flames painted, thrice repeated; and three symbols of discrimination. These formed the pall-like roof, and there were two purple ties, and two of deep blue. At the very top there were ornaments in three colours, and three rows of shells. There were two feather-streamers from a frame with axes, and two from a painted frame; all the frames on staffs with plumage at the tops. Figures of fishes were made at the ends of the gutters. The front supports of a Great officer's catafalque were purple, and those behind deep blue. So also were the sustaining ropes.

For the catafalque of a common officer, the curtains were of (plain) linen, and there was the sloping roof. There was (but) one gutter-spout. There were the fluttering pheasants on the bands. The purple ties were two, and the black also two. At the very top the ornaments were of three colours, and there was only one row of shells. The streamers of feathers from a painted frame were two, the staffs of which had plumage at their tops. The front supports of the catafalque were purple, and those behind black. The sustaining ropes were purple.

38. In burying the coffin of a ruler, they used a bier, four ropes, and two pillars. Those guiding the course of the coffin carried the shade with pendent feathers.

In burying a Great officer, they used two ropes and two pillars. Those who guided the coffin used a reed of white grass.

In burying a common officer, they used a carriage of the state. They employed two ropes and no post. As soon as they left the residence, those who directed the coffin used the shade of merit.

39. In letting down the coffin into the grave, they removed the ropes from the posts, and pulled at them with their backs to the posts. For a ruler's coffin, they also used levers, and for a Great officer's or a common officer's, ropes attached to the sides of the coffin. Orders were given that they should not cry out in letting down that of the ruler. They let it down as guided by the sound of a drum. In letting down a Great officer's, they were commanded not to wail. In letting down a common officer's, those who began to wail stopped one another.

40. The outer shell of the coffin of a ruler was of pine; of a Great officer, of cypress; of another officer, of various kinds of wood.

41. The surface between the coffin and shell of a ruler was sufficient to contain a music stopper; in the case of the coffin and shell of a Great officer, a vase for water; in that of the coffin and shell of a common officer, a jar of liquor.

42. In the rites of a ruler, the shell was lined, and there were baskets of yü; in those of a Great officer, the shell was not lined; in those of a common officer, there were no baskets of yü¹.

¹ We cannot tell what these baskets were. *K'ang* says he did not know, and the *K'ien-lung* editors think they may have contained the grain mentioned in paragraph 36. Otherwise, the paragraph is obscure.

On the next page there is given a figure of the catafalque over the coffin as borne to the grave, copied from the second volume of

P. Zottoli's work. A larger one, more fully illustrating the details of the text, forms the last plate in the *K'ien-lung* edition of the Classic ; but it is so rough and complicated that the friend who has assisted me with most of the figures that I have ventured to introduce shrank from attempting to reproduce it on a smaller scale.

BOOK XX. KÎ FÂ

OR

THE LAW OF SACRIFICES¹.

1. According to the law of sacrifices, (Shun), the sovereign of the line of Yü, at the great associate sacrifice, gave the place of honour to Hwang Tî, and at the border sacrifice made *K'û* the correlate of Heaven; he sacrificed (also) to *Kwan-hsü* as his ancestor (on the throne), and to *Yáo* as his honoured predecessor.

¹ See the introduction, vol. xxvii, pp. 35, 36. It is there said that in the idea of sacrifices (*Kî*), which is here given, there is no indication of deprecation by means of them, and much less of atonement, but that they were merely expressions of gratitude. The character *Kî* (祭) is one of those formed by combination of the ideas in its several parts. The *Shwo-wăn*, the earliest Chinese dictionary, says that it is made up of two ideagrams: 𡇗, the symbol for spiritual beings; and another, composed of 肉 and 又, representing a right hand and a piece of flesh. Offerings of flesh must have been common when the character was formed, which then itself entered, as the phonetic element, into the formation of between twenty and thirty other characters. The explanations of it given by Morrison (*Dict.*, part i), taken mostly from the *Khang-hsf* dictionary, are:—‘To carry human affairs before the gods [i. e. spirits]. That which is the medium between, or brings together men and gods [spirits]. To offer flesh in the rites of worship; to sacrifice with worship.’ There is nothing, however, in the *Khang-hsf* corresponding to this last sentence; and I suppose that Morrison gave it from the analysis of the character in the *Shwo-wăn*. The general idea symbolised by it is—an offering whereby communication and communion with spiritual beings is effected.

The sovereigns of Hsiâ, at the corresponding sacrifice, gave the place of honour also to Hwang Tî, and made Khwăn the correlate at the border sacrifice; they sacrificed to Kwan-hsü as their ancestor, and to Yü as their honoured predecessor.

Under Yin, they gave the place of honour to K'ê, and made Ming the correlate at the border sacrifice; they sacrificed to Hsieh as their ancestor, and to Thang as their honoured predecessor.

Under K'au they gave the place of honour to K'ê, and made K'î the correlate at the border sacrifice; they sacrificed to king Wân as their ancestor, and to king Wû as their honoured predecessor¹.

2. With a blazing pile of wood on the Grand altar they sacrificed to Heaven²; by burying (the victim)

¹ This and other portions of the Book are taken mainly from the seventh article in the second section of the 'Narratives of the States,' part i. The statements have much perplexed the commentators, and are held to be of doubtful authority. Some of them, indeed, are said by K'han Hsiao to be inexplicable. Khwăn, 'the correlate in the sacrifices of Hsiâ, was the father of Yü,' of whom we receive a bad impression from the references to him in the Shû K'ing; and Ming, who occupied the same position in those of Yin, was the fifth in descent from Hsieh, the ancestor of that dynasty, a minister of Works, who died somehow in his labours on a flood. P. Zottoli thinks that of the four sacrifices here mentioned, the first (禘) was to the Supreme Deity (Supremo Numini), and the second, to the Highest Heaven (Summo Coelo). My own view is different, and agrees with that of the K'ien-lung editors. They discuss the different questions that have been agitated on the subject, and their conclusions may be taken as the orthodoxy of Chinese scholars on the subject; into the exhibition of which it is not necessary to go at greater length.

² On the blazing pile were placed the victim and pieces of jade; in the square mound were buried the victim and pieces of silk. For

in the Grand mound, they sacrificed to the Earth. (In both cases) they used a red victim¹.

3. By burying a sheep and a pig at the (altar of) Great brightness, they sacrificed to the seasons. (With similar) victims they sacrificed to (the spirits of) cold and heat, at the pit and the altar, using prayers of deprecation and petition²; to the sun, at the (altar called the) royal palace; to the moon, at the (pit called the) light of the night; to the stars at the honoured place of gloom; to (the spirits of) flood and drought at the honoured altar of rain; to the (spirits of the) four quarters at the place of the four pits and altars; mountains, forests, streams, valleys, hills, and mounds, which are able to produce clouds, and occasion winds and rain, were all regarded as (dominated by) spirits.

He by whom all under the sky was held sacrificed to all spirits. The princes of states sacrificed to those which were in their own territories; to those which were not in their territories, they did not sacrifice.

4. Generally speaking, all born between heaven and earth are said to have their allotted times; the death of all creatures is spoken of as their dissolution; but man when dead is said to be in the ghostly

泰折, which follow, Zottoli gives solenni angulari, and I have met with 'the great pit' as a translation of them. Of course a 'pit' was formed in the mound to receive the offerings; but in the Khang-hsi dictionary 折 is specially defined with reference to this passage as 'a mound of earth as a place of sacrifice;' though we do not find this account of the character in Morrison, Medhurst, or Williams.

¹ This was specially the colour of the victims under the K'au dynasty.

² Such is the meaning given by Ying-tâ and others to 相近, which they think should be 禳祈.

state. There was no change in regard to these points in the five¹ dynasties. What the seven² dynasties made changes in, were the assessors at the Great associate and the border sacrifices, and the parties sacrificed to in the ancestral temple;—they made no other changes.

5. The sovereigns, coming to the possession of the kingdom, divided the land and established the feudal principalities; they assigned (great) cities (to their nobles), and smaller towns (to their chiefs); they made ancestral temples, and the arrangements for altering the order of the spirit-tablets; they raised altars, and they cleared the ground around them for the performance of their sacrifices. In all these arrangements they made provision for the sacrifices according to the nearer or more remote kinship, and for the assignment of lands of greater or less amount.

Thus the king made for himself seven ancestral temples, with a raised altar and the surrounding area for each. The temples were—his father's; his grandfather's; his great-grandfather's; his great-great-grandfather's; and the temple of his (high) ancestor. At all of these a sacrifice was offered every month. The temples of the more remote ancestors formed the receptacles for the tablets as they were displaced; they were two, and at these only the seasonal sacrifices were offered. For the removed tablet of one more remote, an altar was

¹ Those of Yáo, Shun, Hsiá, Shang or Yin, and Káu.

² What these 'seven' dynasties were is doubtful. Add to the preceding five, the names of Kwan-hsi and K'ü, and we get the number, all descended from Hwang Tí. The writer must have regarded him as the founder of the Chinese kingdom.

raised and its corresponding area ; and on occasions of prayer at this altar and area, a sacrifice was offered, but if there were no prayer, there was no sacrifice. In the case of one still more remote, (there was no sacrifice);—he was left in his ghostly state.

A feudal prince made for himself five ancestral temples, with an altar and a cleared area about it for each. The temples were—his father's ; his grandfather's ; and his great-grandfather's ; in all of which a sacrifice was offered every month. In the temples of the great-great-grandfather, and that of the (high) ancestor only, the seasonal sacrifices were offered. For one beyond the high ancestor a special altar was raised, and for one still more remote, an area was prepared. If there were prayer at these, a sacrifice was offered ; but if there were no prayer, there was no sacrifice. In the case of one still more remote, (there was no service) ;—he was left in his ghostly state.

A Great officer made for himself three ancestral temples and two altars. The temples were—his father's ; his grandfather's ; and his great-grandfather's. In this only the seasonal sacrifices were offered. To the great-great-grandfather and the (high) ancestor there were no temples. If there were occasion for prayer to them, altars were raised, and sacrifices offered on them. An ancestor still more remote was left in his ghostly state.

An officer of the highest grade had two ancestral temples and one altar ;—the temples of his father and grandfather, at which only the seasonal sacrifices were presented. There was no temple for his great-grandfather. If there were occasion to pray to him, an altar was raised, and a sacrifice offered to him.

Ancestors more remote were left in their ghostly state.

An officer in charge merely of one department had one ancestral temple ; that, namely, of his father. There was no temple for his grandfather, but he was sacrificed to (in the father's temple.) Ancestors beyond the grandfather were left in their ghostly state.

The mass of ordinary officers and the common people had no ancestral temple. Their dead were left in their ghostly state, (to have offerings presented to them in the back apartment, as occasion required).

6. The king, for all the people, erected an altar to (the spirit of) the ground, called the Grand altar, and one for himself, called the Royal altar.

A feudal prince, for all his people, erected one called the altar of the state, and one for himself called the altar of the prince.

Great officers and all below them in association erected such an altar, called the Appointed altar.

7. The king, for all the people, appointed (seven altars for) the seven sacrifices :—one to the superintendent of the lot ; one in the central court, for the admission of light and the rain from the roofs ; one at the gates of the city wall ; one in the roads leading from the city ; one for the discontented ghosts of kings who had died without posterity ; one for the guardian of the door ; and one for the guardian of the furnace. He also had seven corresponding altars for himself.

A feudal prince, for his state, appointed (five altars for) the five sacrifices :—one for the superintendent of the lot ; one in the central court, for the admission of light and rain ; one at the gates of the city wall ;

one in the roads leading from the city; one for the discontented ghosts of princes who had died without posterity. He also had five corresponding altars for himself.

A Great officer appointed (three altars for) the three sacrifices:—one for the discontented ghosts of his predecessors who had died without posterity; one at the gates of his city; and one on the roads leading from it.

An officer of the first grade appointed (two altars for) the two sacrifices:—one at the gates, and one on the roads (outside the gates).

Other officers and the common people had one (altar and one) sacrifice. Some raised one altar for the guardian of the door; and others, one for the guardian of the furnace.

8. The king, carrying down (his favour), sacrificed to five classes of those who had died prematurely:—namely, to the rightful eldest sons (of former kings); to rightful grandsons; to rightful great-grandsons; to rightful great-great-grandsons; and to the rightful sons of these last.

A feudal prince, carrying down (his favour), sacrificed to three classes; a Great officer similarly to two; another officer of the first grade and the common people sacrificed only to the son who had died prematurely¹.

9. According to the institutes of the sage kings about sacrifices, sacrifice should be offered to him who had given (good) laws to the people; to him

¹ From paragraph 1 down to this is absent from the expurgated edition of Fan Šze-tāng, which P. Callery translated, so that the book contains in it only the one long paragraph that follows.

who had laboured to the death in the discharge of his duties; to him who had strengthened the state by his laborious toil; to him who had boldly and successfully met great calamities; and to him who had warded off great evils.

Such were the following:—*Năng*, the son of the lord of *Lí-shan*¹, who possessed the kingdom, and showed how to cultivate all the cereals; and *Khí* (the progenitor) of *Kâu*, who continued his work after the decay of *Hsiâ*, and was sacrificed to under the name of *Kí*²; *Hâu-thú*, a son of the line of *Kung-kung*³, that swayed the nine provinces, who was able to reduce them all to order, and was sacrificed to as the spirit of the ground; the *Tí Khú*, who could define all the zodiacal stars, and exhibit their times to the people; *Yáo*, who rewarded (the worthy), made the penal laws impartial, and the end of whose course was distinguished by his righteousness; *Shun*, who, toiling amid all his affairs, died in the country (far from his capital); *Yü*, (the son of) *Khwăn*, who was kept a prisoner till death for trying to dam up the waters of the flood, while *Yü* completed the work, and atoned for his father's failure; *Hwang Tí*, who gave everything its right name, thereby showing the people how to avail themselves of its qualities; *Kwan-hsü*, who completed this work

¹ *Lí-shan* is generally mentioned as *Lieh-shan*, and sometimes *Lien-shan*. Where the country so-called was, we do not know. *Năng*, or *Shăn Năng*, is generally accepted as the first of the line, about B.C. 3072.

² This account of *Kí* is given confusedly.

³ It is difficult to find a place in chronology for this *Kung-kung*. An article in the 30 *Kwan* (under duke *Kao*'s seventeenth year, paragraph 3) places him between *Fû-hsî* and *Shăn Năng*.

of Hwang Tî ; Hsieh, who was minister of Instruction, and perfected the (condition and manners of the) people ; Ming, who, through his attention to the duties of his office, died in the waters ; Thang, who ruled the people with a benignant sway and cut off their oppressor ; and king Wăn, who by his peaceful rule, and king Wû, who by his martial achievements, delivered the people from their afflictions. All these rendered distinguished services to the people.

As to the sun and moon, the stars and constellations, the people look up to them, while mountains, forests, streams, valleys, hills, and mountains supply them with the materials for use which they require. Only men and things of this character were admitted into the sacrificial canon.

BOOK XXI. K'î í

OR

THE MEANING OF SACRIFICES¹.

SECTION I.

1. Sacrifices should not be frequently repeated. Such frequency is indicative of importunateness; and importunateness is inconsistent with reverence. Nor should they be at distant intervals. Such infrequency is indicative of indifference; and indifference leads to forgetting them altogether. Therefore the superior man, in harmony with the course of Heaven, offers the sacrifices of spring² and autumn. When he treads on the dew which has descended as hoar-frost he cannot help a feeling of sadness, which arises in his mind, and cannot be ascribed to the cold. In spring, when he treads on the ground, wet with the rains and dews that have fallen heavily, he cannot avoid being moved by a feeling as if he were seeing his departed friends. We meet the approach of our friends with music, and escort them away with sadness, and hence at the sacrifice in spring we use music, but not at the sacrifice in autumn.

2. The severest vigil and purification is maintained and carried on inwardly; while a looser vigil

¹ See the introduction, vol. xxvii, pages 36, 37.

² The spring sacrifice is here called tî (禘), probably by mistake for yó (禴), the proper name for it.

is maintained externally. During the days of such vigil, the mourner thinks of his departed, how and where they sat, how they smiled and spoke, what were their aims and views, what they delighted in, and what things they desired and enjoyed. On the third day of such exercise he will see those for whom it is employed.

3. On the day of sacrifice, when he enters the apartment (of the temple), he will seem to see (the deceased) in the place (where his spirit-tablet is). After he has moved about (and performed his operations), and is leaving at the door, he will seem to be arrested by hearing the sound of his movements, and will sigh as he seems to hear the sound of his sighing.

4. Thus the filial piety taught by the ancient kings required that the eyes of the son should not forget the looks (of his parents), nor his ears their voices; and that he should retain the memory of their aims, likings, and wishes. As he gave full play to his love, they seemed to live again; and to his reverence, they seemed to stand out before him. So seeming to live and stand out, so unforgotten by him, how could his sacrifices be without the accompaniment of reverence?

5. The superior man, while (his parents) are alive, reverently nourishes them; and, when they are dead, he reverently sacrifices to them;—his (chief) thought is how to the end of life not to disgrace them. The saying that the superior man mourns all his life for his parents has reference to the recurrence of the day of their death. That he does not do his ordinary work on that day does not mean that it would be unpropitious to do so; it

means that on that day his thoughts are occupied with them, and he does not dare to occupy himself as on other days with his private and personal affairs.

6. It is only the sage¹ who can sacrifice to God, and (only) the filial son who can sacrifice to his parents. Sacrificing means directing one's self to. The son directs his thoughts (to his parents), and then he can offer his sacrifice (so that they shall enjoy it). Hence the filial son approaches the personator of the departed without having occasion to blush; the ruler leads the victim forward, while his wife puts down the bowls; the ruler presents the offerings to the personator, while his wife sets forth the various dishes; his ministers and Great officers assist the ruler, while their acknowledged wives assist his wife. How well sustained was their reverence! How complete was the expression of their loyal devotion! How earnest was their wish that the departed should enjoy the service!

7. King Wăn, in sacrificing, served the dead as if he were serving the living. He thought of them dead as if he did not wish to live (any longer himself)². On the recurrence of their death-day, he was sad; in calling his father by the name elsewhere forbidden, he looked as if he saw him. So sincere was he in sacrificing that he looked as if he saw the things which his father loved, and the

¹ According to rule, and in fact, only the sovereign sacrifices to God. He may be 'a sage,' but more frequently is not. But the ritual of China should impress on him, as on no other person, the truth in the words 'noblesse oblige.'

² K'ăn Hào says here:—'As if he wished to die himself and follow them.'

pleased expression of his face :—such was king Wăn!
The lines of the ode (II, v, ode 2),

‘When early dawn unseals my eyes,
Before my mind my parents rise,’

might be applied to king Wăn. On the day after the sacrifice, when the day broke, he did not sleep, but hastened to repeat it; and after it was finished, he still thought of his parents. On the day of sacrifice his joy and sorrow were blended together. He could not but rejoice in the opportunity of offering the sacrifice; and when it was over, he could not but be sad.

8. At the autumnal sacrifice, when *Kung-ni* advanced, bearing the offerings, his general appearance was indicative of simple sincerity, but his steps were short and oft repeated. When the sacrifice was over, *Ze-kung* questioned him, saying, ‘Your account of sacrificing was that it should be marked by the dignity and intense absorption of all engaged in it; and now how is it that in your sacrificing there has been no such dignity and absorption?’

The Master said, ‘That dignity of demeanour should belong to those who are only distantly connected (with him who is sacrificed to), and that absorbed demeanour to one whose thoughts are turned in on himself (lest he should make any mistake). But how should such demeanour consist with communion with the spirits (sacrificed to)? How should such dignity and absorption be seen in my sacrifice? (At the sacrifices of the king and rulers) there is the return of the personator to his apartment, and the offering of food to him there; there are the performances of the music, and the setting forth of the stands with the victims on them; there

are the ordering of the various ceremonies and the music ; and there is the complete array of the officers for all the services. When they are engaged in the maintenance of that dignity and absorption in their duties, how can they be lost in their abandonment to intercourse with the spiritual presences? Should words be understood only in one way? Each saying has its own appropriate application.'

9. When a filial son is about to sacrifice, he is anxious that all preparations should be made beforehand ; and when the time arrives, that everything necessary should be found complete ; and then, with a mind free from all pre-occupation, he should address himself to the performance of his sacrifice.

The temple and its apartments having been repaired, the walls and roofs having been put in order, and all the assisting officers having been provided, husband and wife, after vigil and footing, bathe their heads and persons, and array themselves in full dress. In coming in with the things which they carry, how grave and still are they ! how absorbed in what they do ! as if they were not able to sustain their weight, as if they would let them fall :— Is not theirs the highest filial reverence? He sets forth the stands with the victims on them ; arranges all the ceremonies and music ; provides the officers for the various ministries. These aid in sustaining and bringing in the things, and thus he declares his mind and wish, and in his lost abstraction of mind seeks to have communion with the dead in their spiritual state, if peradventure they will enjoy his offerings, if peradventure they will do so. Such is the aim of the filial son (in his sacrifices) !

10. The filial son, in sacrificing, seems never able

to exhaust his earnest purpose, his sincerity, and reverence. He observes every rule, without transgression or short-coming. His reverence appears in his movements of advancing and retiring, as if he were hearing the orders (of his parents), or as if they were perhaps directing him.

11. What the sacrifice of a filial son should be can be known. While he is standing (waiting for the service to commence), he should be reverent, with his body somewhat bent; while he is engaged in carrying forward the service, he should be reverent, with an expression of pleasure; when he is presenting the offerings, he should be reverent, with an expression of desire. He should then retire and stand, as if he were about to receive orders; when he has removed the offerings and (finally) retires, the expression of reverent gravity should continue to be worn on his face. Such is the sacrifice of a filial son.

To stand without any inclination of the body would show insensibility; to carry the service forward without an expression of pleasure would show indifference; to present the offerings without an expression of desire (that they may be enjoyed) would show a want of love; to retire and stand without seeming to expect to receive orders would show pride; to retire and stand, after the removal of the offerings, without an expression of reverent gravity would show a forgetfulness of the parent to whom he owes his being. A sacrifice so conducted would be wanting in its proper characteristics.

12. A filial son, cherishing a deep love (for his parents), is sure to have a bland air; having a bland air, he will have a look of pleasure; having a look

of pleasure, his demeanour will be mild and compliant. A filial son will move as if he were carrying a jade symbol, or bearing a full vessel. Still and grave, absorbed in what he is doing, he will seem as if he were unable to sustain the burden, and in danger of letting it fall. A severe gravity and austere manner are not proper to the service of parents;—such is the manner of a full-grown man.

13. There were five things by means of which the ancient kings secured the good government of the whole kingdom:—the honour which they paid to the virtuous; to the noble; and to the old; the reverence which they showed to the aged; and their kindness to the young. It was by these five things that they maintained the stability of the kingdom.

Why did they give honour to the virtuous? Because of their approximation to the course of duty¹. They did so to the noble because of their approximation to the position of the ruler; and to the old because of their approximation to that of parents. They showed reverence to the aged, because of their approximation to the position of elder brothers; and kindness to the young, because of their approximation to the position of sons.

¹ P. Callery translates this by—'Parce qu'ils sont proche de la vérité,' saying in a note:—'According to the Chinese philosophers, they understand by *teh* (德) that which man has obtained by his own efforts or the virtue he has acquired, and by *tão* (道) that which all men should be striving to reach, what is suitable, what is in order, or virtue in the abstract. Now, as I think, there is nothing but truth which satisfies these conditions, for, according to the Christian philosophy, God Himself is the truth,' &c. Zottoli's translation is, 'Quia hi appropinquant ad perfectionem.'

14. Therefore he who is perfectly filial approximates to be king, and he who is perfectly fraternal approximates to being presiding chieftain. He who is perfectly filial approximates to being king, for even the son of Heaven had the father (whom he must revere); and he who is perfectly fraternal approximates to being presiding chieftain, for even a feudal lord had his elder brothers (or cousins), (whom he must obey). The observance of the lessons of the ancient kings, without admitting any change in them, was the way by which they united and kept together the kingdom with its states and families¹.

15. The Master said, 'The laying the foundation of (all) love in the love of parents teaches people concord. The laying the foundation of (all) reverence in the reverence of elders teaches the people obedience. When taught loving harmony, the people set the (proper) value on their parents; when taught to reverence their superiors, the people set the (proper) value in obeying the orders given to them. Filial piety in the service of parents, and obedience in the discharge of orders can be displayed throughout the kingdom, and they will everywhere take effect.

16. At (the time of) the border sacrifice (to Heaven), those who are engaged in funeral rites do not dare to wail, and those who are wearing mourning do not dare to enter the gate of the capital;—this is the highest expression of reverence.

17. On the day of sacrifice, the ruler led the victim forward, along with and assisted by his son on

¹ The sequence in the writer's mind in this paragraph almost eludes my discovery; it does so still more in the translation of it by Callery and Zottoli.

the opposite side; while the Great officers followed in order. When they had entered the gate of the temple, they fastened the victim to the stone pillar. The ministers and Great officers then bared their arms, and proceeded to inspect the hair, paying particular attention to that of the ears. They then with the knife with the bells attached to it, cut it open, took out the fat about the inwards, and withdrew (for a time¹). Afterwards they offered some of the flesh boiled, and some raw, then (finally) withdrawing. There was the highest reverence about everything.

18. The sacrifice in the suburb of the capital was the great expression of gratitude to Heaven, and it was specially addressed to the sun, with which the moon was associated². The sovereigns of Hsiâ presented it in the dark. Under the Yin dynasty they did so

¹ They withdrew for a time, 'to offer the hair and blood.'

² This sentence is translated by Zottoli:—'*Coeli sacrificio summe rependitur coelum sed potissimum intenditur sol, consociatus cum luna.*' Callery says:—'*Le sacrifice qu'on offre dans la campagne est un acte de grande reconnaissance envers le ciel, et principalement envers le soleil, auquel on associe la lune.*'

Here, again, nature-worship seems to crop up. *Khân Hào* says on the passage:—'Heaven is the great source of *táo* (the course of nature and duty), and of all the visible bodies which it hangs out, there are none greater than the sun and moon. Therefore, while the object of the suburban sacrifice was a grateful acknowledgment of Heaven, the sun was chosen as the resting-place for its spirit (or spirits). The idea in the institution of the rite was deep and far-reaching.' It must be borne in mind that the rites described in the text are those of former dynasties, especially of that of *Kâu*. I cannot bring to mind any passages in which there is mention made of any sacrifice to the sun or sun-spirit in connexion with the great sacrifice to Heaven, or *Shang Tî*, at the service on the day of the winter solstice in the southern suburb.

at noon. Under the *K'au* they sacrificed all the day, especially at daybreak, and towards evening.

19. They sacrificed to the sun on the altar, and to the moon in the hollow;—to mark the distinction between (the) gloom (of the one) and (the) brightness (of the other), and to show the difference between the high and the low. They sacrificed to the sun in the east, and to the moon in the west;—to mark the distinction between (the) forthcoming (of the former) and (the) withdrawing (of the latter), and to show the correctness of their (relative) position. The sun comes forth from the east, and the moon appears in the west; the darkness and the light are now long, now short; when the one ends, the other begins, in regular succession;—thus producing the harmony of all under the sky¹.

20. The rites to be observed by all under heaven were intended to promote the return (of the mind) to the beginning (= Creator of all); to promote (the honouring of) spiritual Beings; to promote the harmonious use (of all resources and appliances) of government; to promote righteousness; and to promote humility. They promote the return to the beginning, securing the due consideration of their originator. They promote (the honouring) of spiritual Beings, securing the giving honour to superiors. They promote the (proper) use of all resources, thereby establishing the regulations (for the well-being of) the people. They promote

¹ The sacrifices in this paragraph are those at the equinoxes; that to the sun at the vernal in the eastern suburb, and that to the moon at the autumnal in the western suburb. They are still maintained. See the ritual of the present dynasty (大清通禮), Book VIII, where the former is called 朝日, and the latter 夕月.

righteousness, and thus there are no oppositions and conflictings between high and low. They promote humility, in order to prevent occasions of strife. Let these five things be united through the rites for the regulation of all under heaven, and though there may be some extravagant and perverse who are not kept in order, they will be few.

SECTION II.

1. 3âi Wo said, 'I have heard the names Kwei and Shăn, but I do not know what they mean¹.' The Master said, 'The (intelligent) spirit² is of the shăn nature, and shows that in fullest measure; the animal soul is of the kwei nature, and shows that in fullest measure. It is the union of kwei and shăn that forms the highest exhibition of doctrine.

'All the living must die, and dying, return to the ground; this is what is called kwei. The bones and flesh moulder below, and, hidden away, become the earth of the fields. But the spirit issues forth, and is displayed on high in a condition of glorious brightness. The vapours and odours which produce a feeling of sadness, (and arise from the decay of their substance), are the subtle essences of all things, and (also) a manifestation of the shăn nature.

¹ I am unable to give a translation of the characters kwei (鬼) and shăn, so as to make the meaning readily intelligible to the English reader. Callery gives for them 'L'âme et l'esprit,' Zottoli, 'Manes Spiritusque.' Evidently the question is about the application of them to the dead and gone, and the component elements of the human constitution.

² The character in the text here is kî (氣), 'the breath.' Zottoli translates it by 'rationalis vis,' and Callery by 'la respiration de l'homme.'

'On the ground of these subtle essences of things, with an extreme decision and inventiveness, (the sages) framed distinctly (the names of) kwei and shān, to constitute a pattern for the black-haired race¹; and all the multitudes were filled with awe, and the myriads of the people constrained to submission.'

2. 'The sages did not consider these (names) to be sufficient, and therefore they built temples with their (different) apartments, and framed their rules for ancestors who were always to be honoured, and those whose tablets should be removed;—thus making a distinction for nearer and more distant kinship, and for ancestors the remote and the recent, and teaching the people to go back to their oldest fathers, and re-trace their beginnings, not forgetting those to whom they owed their being. In consequence of this the multitude submitted to their lessons, and listened to them with a quicker readiness.

3. 'These two elements (of the human constitution) having been established (with the two names), two ceremonies were framed in accordance with them. They appointed the service of the morning, when the fat of the inwards was burned so as to bring out its fragrance, and this was mixed with the blaze of dried southern-wood. This served as a tribute to the (intelligent) spirit, and taught all to go back to their originating ancestors. They (also) presented millet and rice, and offered the delicacies of the liver, lungs, head, and heart, along with two bowls (of

¹ It is observed by many of the commentators that the characters here employed for 'black-haired race' were unused in the time of Confucius, and became current under the K'ín dynasty.

liquor) and odoriferous spirits. This served as a tribute to the animal soul, and taught the people to love one another, and high and low to cultivate good feeling between them;—such was the effect of those ceremonies.

4. 'The superior man, going back to his ancient fathers, and returning to the authors of his being, does not forget those to whom he owes his life, and therefore he calls forth all his reverence, gives free vent to his feelings, and exhausts his strength in discharging the above service;—as a tribute of gratitude to his parents he dares not but do his utmost¹.'

5. Thus it was that anciently the son of Heaven had his field of a thousand acres, in which he himself held the plough, wearing the square-topped cap with red ties. The feudal princes also had their field of a hundred acres, in which they did the same, wearing the same cap with green ties. They did this in the service of Heaven, Earth, the Spirits of the land and grain, and their ancient fathers, to supply the new wine, cream, and vessels of grain. In this way did they procure these things;—it was a great expression of their reverence.

6. Anciently, the son of Heaven and the feudal lords had their officers who attended to their animals; and at the proper seasons, after vigil and fasting, they washed their heads, bathed, and visited them in person², taking from them for victims those which

¹ The above conversation with 3ái Wo is found in the 'Narratives of the School,' Article 17, headed 'Duke Âi's Questions about Government;' and the reply of Confucius ends here. I hesitate, therefore, to continue the points of quotation in what follows.

² The first day, probably, of the last month of spring. If it were not bright, perhaps another was chosen.

were spotless and perfect;—it was a great expression of their reverence.

The ruler ordered the oxen to be brought before him, and inspected them; he chose them by their hair, divined whether it would be fortunate to use them, and if the response were favourable, he had them cared for. In his skin cap, and the white skirt gathered up at the waist, on the first day and at the middle of the month, he inspected them. Thus did he do his utmost;—it was the height of filial piety.

7. Anciently, the son of Heaven and the feudal lords had their own mulberry trees and silkworms' house; the latter built near a river, ten cubits in height, the surrounding walls being topped with thorns, and the gates closed on the outside. In the early morning of a very bright day, the ruler, in his skin cap and the white skirt, divined for the most auspicious of the honourable ladies in the three palaces of his wife¹, who were then employed to take the silkworms into the house. They washed the seeds in the stream, gathered the leaves from the mulberry trees, and dried them in the wind to feed the worms.

When the (silkworm) year was ended, the honourable ladies had finished their work with the insects, and carried the cocoons to show them to the ruler. They then presented them to his wife, who said, 'Will not these supply the materials for the ruler's robes?' She forthwith received them, wearing her head-dress and the robe with pheasants on it, and afterwards caused a sheep and a pig to be killed and

¹ The queen had six palaces; the wife of a prince, three. The writer confines his account here to the latter.

cooked to treat (the ladies). This probably was the ancient custom at the presentation of the cocoons.

Afterwards, on a good day, the wife rinsed some of them thrice in a vessel, beginning to unwind them, and then distributed them to the auspicious and honourable ladies of her three palaces to (complete) the unwinding. They then dyed the thread red and green, azure and yellow, to make the variously-coloured figures on robes. When the robes were finished, the ruler wore them in sacrificing to the former kings and dukes ;—all displayed the greatest reverence.

8. The superior man says, 'Ceremonies and music should not for a moment be neglected by any one. When one has mastered (the principles of) music, and regulates his heart and mind accordingly, the natural, correct, gentle, and honest heart is easily developed, and with this development of the heart comes joy. This joy goes on to a feeling of repose. This repose is long continued. The man in this constant repose becomes (a sort of) heaven. Heaven-like, his action is spirit-like. Heaven-like, he is believed, though he do not speak. Spirit-like, he is regarded with awe, though he display no rage. So it is when one by his mastering of music regulates his mind and heart.

'When one has mastered' (the principle of) ceremonies, and regulates his person accordingly, he becomes grave and reverential. Grave and reverential, he is regarded with awe. If the heart be for a moment without the feeling of harmony and joy, meanness and deceitfulness enter it. If the outward demeanour be for a moment without gravity and reverentialness, indifference and rudeness show themselves.

‘Therefore the sphere in which music acts is the interior of man, and that of ceremonies is his exterior. The result of music is a perfect harmony, and that of ceremonies is a perfect observance (of propriety). When one’s inner man is thus harmonious, and his outer man thus docile, the people behold his countenance and do not strive with him; they look to his demeanour, and no feeling of indifference or rudeness arises in them. Thus it is that when virtue shines and moves within (a superior), the people are sure to accept (his rule) and hearken to him; and when the principles (of propriety) are displayed in his conduct, the people are all sure to accept (his rule) and obey him. Therefore it is said, ‘Let ceremonies and music have their course till all under heaven is filled with them; then give them their manifestation and application, and nothing difficult to manage will appear.’

Music affects the inward movements (of the soul); ceremonies appear in the outward movements (of the body). Hence it is the rule to make ceremonies as few and brief as possible, and to give to music its fullest development. This leads to the forward exhibition of ceremonies, and therein their beauty resides; and to the introspective consideration of music, and therein its beauty resides. If ceremonies, demanding this condensation, did not receive this forward exhibition of them, they would almost disappear altogether; if music, demanding this full development, were not accompanied with the introspection, it would produce a dissipation of the mind. Thus it is that to every ceremony there is its proper response, and for music there is this introspection. When ceremonies are responded to, there arises

pleasure, and when music is accompanied with the right introspection, there arises repose. The response of ceremony and the introspection of music spring from one and the same idea, and have one and the same object.

9. ǺǺng-Ǻze said, 'There are three degrees of filial piety. The highest is the honouring of our parents; the second is the not disgracing them; and the lowest is the being able to support them.'

10. (His disciple), Kung-ming Í, said, 'Can you, master, be considered (an example of a) filial son?' ǺǺng-Ǻze replied, 'What words are these? What words are these? What the superior man calls filial piety requires the anticipation of our parents' wishes, the carrying out of their aims and their instruction in the path (of duty). I am simply one who supports his parents;—how can I be considered filial?'

11. ǺǺng-Ǻze said, 'The body is that which has been transmitted to us by our parents; dare any one allow himself to be irreverent in the employment of their legacy? If a man in his own house and privacy be not grave, he is not filial; if in serving his ruler, he be not loyal, he is not filial; if in discharging the duties of office, he be not reverent, he is not filial; if with friends he be not sincere, he is not filial; if on the field of battle he be not brave, he is not filial. If he fail in these five things, the evil (of the disgrace) will reach his parents;—dare he but reverently attend to them?'

To prepare the fragrant flesh and grain which he has cooked, tasting and then presenting them before his parents, is not filial piety; it is only nourishing them. He whom the superior man pronounces filial is he whom (all) the people of (his) state praise,

saying with admiration, 'Happy are the parents who have such a son as this!'—that indeed is what can be called being filial. The fundamental lesson for all is filial piety. The practice of it is seen in the support (of parents). One may be able to support them; the difficulty is in doing so with the proper reverence. One may attain to that reverence;—the difficulty is to do so without self-constraint. That freedom from constraint may be realised;—the difficulty is to maintain it to the end. When his parents are dead, and the son carefully watches over his actions, so that a bad name, (involving) his parents, shall not be handed down, he may be said to be able to maintain his piety to the end. True love is the love of this; true propriety is the doing of this; true righteousness is the rightness of this; true sincerity is being sincere in this; true strength is being strong in this. Joy springs from conformity to this; punishments spring from the violation of this.

12. 3ǎng-ze said, 'Set up filial piety, and it will fill the space from earth to heaven; spread it out, and it will extend over all the ground to the four seas; hand it down to future ages, and from morning to evening it will be observed; push it on to the eastern sea, the western sea, the southern sea, and the northern sea, and it will be (everywhere) the law for men, and their obedience to it will be uniform. There will be a fulfilment of the words of the ode (III, i, ode 10, 6),

"From west to east, from south to north,
There was no unsubmissive thought."

13. 3ǎng-ze said, 'Trees are felled and animals killed, (only) at the proper seasons. The Master said¹,

¹ The master here is Confucius. The record of his saying is found only here.

“ To fell a single tree, or kill a single animal, not at the proper season, is contrary to filial piety.” ’

There are three degrees of filial piety :—the least, seen in the employment of one’s strength (in the service of parents); the second, seen in the endurance of toil (for them); and the greatest, seen in its never failing. Thinking of the gentleness and love (of parents) and forgetting our toils (for them) may be called the employment of strength. Honouring benevolences and resting with the feeling of repose in righteousness may be called the endurance of toil; the wide dispensation of benefits and the providing of all things (necessary for the people) may be called the piety that does not fail.

When his parents love him, to rejoice, and not allow himself to forget them; when they hate him, to fear and yet feel no resentment; when they have faults, to remonstrate with them, and yet not withstand them; when they are dead, to ask (the help only of) the good to obtain the grain with which to sacrifice to them :—this is what is called the completion (by a son) of his proper services.

14. The disciple Yo-kǎng *Khun*¹ injured his foot in descending from his hall, and for some months was not able to go out. Even after this he still wore a look of sorrow, and (one of the) disciples of the school said to him, ‘Your foot, master, is better; and though for some months you could not go out, why should you still wear a look of sorrow?’ Yo-kǎng *Khun* replied, ‘It is a good question which

¹ Yo-kǎng *Khun* evidently was a disciple of Ǵǎng-ǵze. Mencius had a disciple of the same surname, Yo-kǎng Kho (I, ii, 16). Another is mentioned by him (V, ii, 3). Lieh-ǵze mentions a fourth. The Yo-kǎngs are said to have sprung from the ducal stock of Sung.

you ask! It is a good question which you ask! I heard from Jǎng-ze what he had heard the Master say, that of all that Heaven produces and Earth nourishes, there is none so great as man. His parents give birth to his person all complete, and to return it to them all complete may be called filial duty. When no member has been mutilated and no disgrace done to any part of the person, it may be called complete; and hence a superior man does not dare to take the slightest step in forgetfulness of his filial duty. But now I forgot the way of that, and therefore I wear the look of sorrow. (A son) should not forget his parents in a single lifting up of his feet, nor in the utterance of a single word. He should not forget his parents in a single lifting up of his feet, and therefore he will walk in the highway and not take a by-path, he will use a boat and not attempt to wade through a stream;—not daring, with the body left him by his parents, to go in the way of peril. He should not forget his parents in the utterance of a single word, and therefore an evil word will not issue from his mouth, and an angry word will not come back to his person. Not to disgrace his person and not to cause shame to his parents may be called filial duty.'

15. Anciently, the sovereigns of the line of Yü honoured virtue, and highly esteemed age; the sovereigns of Hsiâ honoured rank, and highly esteemed age; under Yin they honoured riches, and highly esteemed age; under K'áu, they honoured kinship, and highly esteemed age. Yü, Hsiâ, Yin, and K'áu produced the greatest kings that have appeared under Heaven, and there was not one of them who neglected age. For long has honour been paid

to years under the sky; to pay it is next to the service of parents.

16. Therefore, at court among parties of the same rank, the highest place was given to the oldest. Men of seventy years carried their staffs at the court. When the ruler questioned one of them, he made him sit on a mat. One of eighty years did not wait out the audience, and when the ruler would question him he went to his house. Thus the submission of a younger brother (and juniors generally) was recognised at the court.

17. A junior walking with one older (than himself), if they were walking shoulder to shoulder, yet it was not on the same line. If he did not keep transversely (a little behind), he followed the other¹. When they saw an old man, people in carriages or walking got out of his way. Men, where the white were mingling with their black hairs, did not carry burdens on the roads. Thus the submission of juniors was recognised on the public ways.

Residents in the country took their places according to their age, and the old and poor were not neglected, nor did the strong come into collision with the weak, or members of a numerous clan do violence to those of a smaller. Thus the submission of juniors was recognised in the country districts and hamlets².

18. According to the ancient rule, men of fifty years were not required to serve in hunting expeditions³; and in the distribution of the game, a larger

¹ If the elder were a brother or cousin, the junior kept a little behind, and apart. If he were an uncle, the other followed in a line.

² Five *Kâu*, translated 'districts,' made a 'hsiang,' here translated 'the country districts.'

³ Literally, 'men of the tien' (甸). The tien was a tract of

share was given to the more aged. Thus the submission of juniors was recognised in the arrangements for the hunts. In the tens and fives of the army and its detachments, where the rank was the same, places were given according to age. Thus the submission of juniors was recognised in the army.

19. The display of filial and fraternal duty in the court; the practice of them on the road; their reaching to the districts and hamlets; their extension to the huntings; and the cultivation of them in the army, (have thus been described). All would have died for them under the constraint of righteousness, and not dared to violate them.

20. The sacrifice in the Hall of Distinction served to inculcate filial duty on the feudal lords; the feasting of the three classes of the old and five classes of the experienced in the Great college served to inculcate brotherly submission on those princes; the sacrifices to the worthies of former times in the western school served to inculcate virtue on them; the (king's) ploughing in the field set apart for him, served to teach them the duty of nourishing (the people); their appearances at court in spring and autumn served to inculcate on them their duty as subjects or ministers. Those five institutions were the great lessons for the kingdom.

21. When feasting the three classes of the old and five classes of the experienced, the son of Heaven bared his arm, cut up the bodies of the victims, and handed round the condiments; he also presented

considerable size; contributing to the army a chariot, three mailed men, and seventy-two foot-men. There was a levy on it also of men to serve in the hunting expeditions.

the cup with which they rinsed their mouths, wearing the square-topped cap, and carrying a shield. It was thus he inculcated brotherly submission on the princes. It was thus that in the country and villages regard was paid to age, that the old and poor were not neglected, and that the members of a numerous clan did not oppress those of a smaller;—these things came from the Great college.

The son of Heaven appointed the four schools; and when his eldest son entered one of them, he took his place according to his age.

22. When the son of Heaven was on a tour of inspection, the princes (of each quarter) met him on their borders. The son of Heaven first visited those who were a hundred years old. If there were those of eighty or ninety, on the way to the east, he, though going to the west, did not dare to pass by (without seeing them); and so, if their route was to the west, and his to the west. If he wished to speak of matters of government, he, though ruler, might go to them.

23. Those who had received the first degree of office took places according to age (at meetings) in the country and villages; those who had received the second, took places in the same way (at meetings) of all the members of their relatives. Those who had received the third degree did not pay the same regard to age. But at meetings of all the members of a clan no one dared to take precedence of one who was seventy years old.

Those who were seventy, did not go to court unless for some great cause. When they did so for such a cause, the ruler would bow and give place to them, afterwards going on to the parties possessed of rank.

24. Whatever good was possessed by the son of Heaven, he humbly ascribed the merit of it to Heaven; whatever good was possessed by a feudal lord, he ascribed it to the son of Heaven; whatever good was possessed by a minister or Great officer, he attributed it to the prince of his state; whatever good was possessed by an officer or a common man, he assigned the ground of it to his parents, and the preservation of it to his elders. Emolument, rank, felicitations, and rewards were (all) transacted in the ancestral temple; and it was thus that they showed (the spirit of) submissive deference.

25. Anciently, the sages, having determined the phenomena of heaven and earth in their states of rest and activity, made them the basis of the Yĭ (and divining by it). The diviner held the tortoise-shell in his arms, with his face towards the south, while the son of Heaven, in his dragon-robe and square-topped cap, stood with his face to the north. The latter, however intelligent might be his mind, felt it necessary to set forth and obtain a decision on what his object was;—showing that he did not dare to take his own way, and giving honour to Heaven (as the supreme Decider)¹. What was good in him (or in his views) he ascribed to others; what was wrong, to himself; thus teaching not to boast, and giving honour to men of talents and virtue.

26. When a filial son was about to sacrifice, the

¹ Who does not see that, from the writer's point of view, divination was originally had recourse to in the search for an 'infallible' director in matters to be done? The Decider was held to be 'Heaven;' the error was in thinking that the will of Heaven could be known through any manipulation of the tortoise-shell, or the stalks.

rule was that he should have his mind well adjusted and grave, to fit him for giving to all matters their full consideration, for providing the robes and other things, for repairing the temple and its fanes, and for regulating everything. When the day of sacrifice arrived, the rule was that his countenance should be mild, and his movements show an anxious dread, as if he feared his love were not sufficient. When he put down his offerings, it was required that his demeanour should be mild, and his body bent, as if (his parents) would speak (to him) and had not yet done so; when the officers assisting had all gone out¹, he stood lowly and still, though correct and straight, as if he were about to lose the sight (of his parents).

After the sacrifice, he looked pleased and expectant, as if they would again enter².

In this way his ingenuousness and goodness were never absent from his person; his ears and eyes were never withdrawn from what was in his heart; the exercises of his thoughts never left his parents. What was bound up in his heart was manifested in his countenance; and he was continually examining himself;—such was the mind of the filial son.

¹ The text here is difficult. I have followed K'ang, as has Zottoli;—the interpretation of 宿者 as 'assisting officers,' can otherwise be defended. Callery gives for the clause:—'Toutes les pensées étrangères (au sacrifice) il les chasse au dehors,' which it would be difficult to justify.

² Here again translation is difficult. Zottoli gives:—'Cumque sacrificium transiverit, intendet animo, prosequetur ore, quasi mox iterum ingressuri essent.' Callery:—'Après le sacrifice il s'en va lentement, comme (s'il suivait quelqu'un pas à pas, et avait envie) de rentrer (avec lui dans le temple).'

27. The sites for the altars to the spirits of the land and grain were on the right; that for the ancestral temple on the left¹.

¹ That is, with reference to the palace. As you looked out from it to the south, the altars were on the right hand and the temple on the left.

BOOK XXII. K'Ī THUNG

OR

A SUMMARY ACCOUNT OF SACRIFICES¹.

1. Of all the methods for the good ordering of men, there is none more urgent than the use of ceremonies. Ceremonies are of five kinds², and there is none of them more important than sacrifices.

Sacrifice is not a thing coming to a man from without; it issues from within him, and has its birth in his heart. When the heart is deeply moved, expression is given to it by ceremonies; and hence, only men of ability and virtue can give complete exhibition to the idea of sacrifice.

2. The sacrifices of such men have their own blessing;—not indeed what the world calls blessing³. Blessing here means perfection;—it is the name given to the complete and natural discharge of all duties. When nothing is left incomplete or improperly discharged;—this is what we call perfection, implying the doing everything that should be done in one's internal self, and externally the performance of everything according to the proper method. There is a fundamental agreement between a loyal subject in his service of his ruler and a filial son in

¹ See the introduction, vol. xxvii, pp. 37, 38.

² The five kinds of ceremonies are the Auspicious (吉 including all acts of religious worship); the Mourning (凶); those of Hospitality (賓); the Military (軍); and the Festive (嘉).

³ Success, longevity, the protection of spiritual Beings.

his service of his parents. In the supernal sphere there is a compliance with (what is due to) the repose and expansion of the energies of nature¹; in the external sphere, a compliance with (what is due) to rulers and elders; in the internal sphere, the filial service of parents;—all this constitutes what is called perfection.

It is only the able and virtuous man who can attain to this perfection; and can sacrifice when he has attained to it. Hence in the sacrifices of such a man he brings into exercise all sincerity and good faith, with all right-heartedness and reverence; he offers the (proper) things; accompanies them with the (proper) rites; employs the soothing of music; does everything suitably to the season. Thus intelligently does he offer his sacrifices, without seeking for anything to be gained by them:—such is the heart and mind of a filial son.

3. It is by sacrifice that the nourishment of parents is followed up and filial duty to them perpetuated. The filial heart is a storehouse (of all filial duties). Compliance with everything that can mark his course, and be no violation of the relation (between parent and child):—the keeping of this is why we call it a storehouse. Therefore in three ways is a filial son's service of his parents shown:—while they are alive, by nourishing them; when they are dead, by

¹ Callery gives for these:—'Conformité avec les Esprits et les Dieux.' Zottoli:—'Ordo erga Genios Spiritusque.' Medhurst:—'Being obedient to the Kwei Shins.' If they had observed the 'three spheres' of the writer, I think they would have translated differently. I believe the idea is—'Compliance with the will of Heaven or God, as seen in the course of Nature and Providence.'

all the rites of mourning ; and when the mourning is over by sacrificing to them. In his nourishing them we see his natural obedience ; in his funeral rites we see his sorrow ; in his sacrifices we see his reverence and observance of the (proper) seasons. In these three ways we see the practice of a filial son.

4. When a son had done everything (for his sacrifices) that he could do himself, he proceeded to seek assistance from abroad ; and this came through the rites of marriage. Hence the language of a ruler, when about to marry a wife, was :—‘ I beg you, O ruler, to give me your elegant daughter, to share this small state with my poor self, to do service in the ancestral temple, and at the altars to (the spirits of) the land and grain.’ This underlay his seeking for that assistance (from abroad).

In sacrificing, husband and wife had their several duties which they personally attended to ; and on this account there was the array of officials belonging to the exterior and interior departments (of the palace). When these officers were complete, all things necessary (for the service) were made ready :—small things, such as the sourcroust of water plants and pickles from the produce of dry grounds ; and fine things, such as the stands for the bodies of the three victims, and the supplies for the eight dishes. Strange insects and the fruits of plants and trees, produced under the best influences of light and shade, were all made ready. Whatever heaven produces, whatever earth develops in its growth ;—all were then exhibited in the greatest abundance. Everything was there from without, and internally there was the utmost effort of the will :—such was the spirit in sacrificing.

5. For this reason, also, the son of Heaven himself guided the plough in the southern suburb, to provide the grain for the sacrificial vessels; and the queen looked after her silkworms in the northern suburb, to provide the cap and robes of silk. The princes of the states guided the plough in their eastern suburb, also to provide the grain for the sacrificial vessels, and their wives looked after their silkworms in the northern suburb, to provide the cap and robes of silk. This was not because the son of Heaven and the princes had not men to plough for them, or because the queen and the princes' wives had not women to tend the silkworms for them; it was to give the exhibition of their personal sincerity. Such sincerity was what is called doing their utmost; and such doing of their utmost was what is called reverence. When they had reverently done their utmost, they could serve the spiritual Intelligences—such was the way of sacrificing.

6. When the time came for offering a sacrifice, the man wisely gave himself to the work of purification. That purification meant the production of uniformity (in all the thoughts);—it was the giving uniformity to all that was not uniform, till a uniform direction of the thoughts was realised. Hence a superior man, unless for a great occasion, and unless he were animated by a great reverence, did not attempt this purification. While it was not attained, he did not take precautions against the influence of (outward) things, nor did he cease from all (internal) desires. But when he was about to attempt it, he guarded against all things of an evil nature, and suppressed all his desires. His ears did not listen to music;—as it is said in the Record, 'People occupied with purification

have no music,' meaning that they did not venture to allow its dissipation of their minds. He allowed no vain thoughts in his heart, but kept them in a strict adherence to what was right. He allowed no reckless movement of his hands or feet, but kept them firmly in the way of propriety. Thus the superior man, in his purification, devotes himself to carrying to its utmost extent his refined and intelligent virtue.

Therefore there was the looser ordering of the mind for seven days, to bring it to a state of fixed determination; and the complete ordering of it for three days, to effect the uniformity of all the thoughts. That determination is what is called purification; the final attainment is when the highest degree of refined intelligence is reached. After this it was possible to enter into communion with the spiritual Intelligences.

7. Moreover, on the eleventh day, before that appointed for the sacrifice, the governor of the palace gave warning notice to the wife of the ruler, and she also conducted that looser ordering of her thoughts for seven days, and that more complete ordering of them for three. The ruler accomplished his purification in the outer apartment, and the wife her purification in the inner. After this they met in the grand temple.

The ruler, in the dark-coloured square-topped cap, stood at the top of the steps on the east; his wife in her head-dress and pheasant-embroidered robe stood in the eastern chamber. The ruler from his mace-handled libation-cup poured out the fragrant spirit before the personator of the dead; and the great minister in charge of the temple with his halfmace-

handled cup poured the second libation (for the wife). When the victim was introduced, the ruler held it by the rope; the ministers and Great officers followed; other officers carried the dried grass (to lay on the ground when it should be killed); the wives of the ruler's surname followed the wife with the basins; she presented the purified liquid; the ruler held in his hand the knife with bells; he prepared the lungs (to be offered to the personator); and his wife put them on the dishes and presented them. All this shows what is meant in saying that husband and wife had their parts which they personally performed.

8. When they went in for the dance, the ruler, holding his shield and axe, went to the place for the performance. He took his station at the head of those on the east, and in his square-topped cap, carrying his shield, he led on all his officers, to give pleasure to the august personator of the dead. Hence the son of Heaven in his sacrifices (gave expression to) the joy of all in the kingdom. (In the same way) the feudal princes at their sacrifices (gave expression to) the joy of all within their territories. In their square-topped caps, and carrying their shields, they led on all their officers, to give joy to the august personators:—with the idea of showing the joy of all within their territories.

9. At a sacrifice there were three things specially important. Of the offerings there was none more important than the libation; of the music there was none more important than the singing in the hall above; of the pantomimic evolutions there was none more important than that representing (king) Wû's (army) on the night (before his battle). Such was

the practice of the *K'áu* dynasty. All the three things were designed to increase the aim of the superior man by the use of these external representations. Hence their movements in advancing and retreating were regulated by (the degree of) that aim. If it were less intense, they were lighter; if it were more intense, they were more vehement. If the aim were less intense, and they sought to make the outward representation more vehement, even a sage could not have accomplished this.

Therefore the superior man, in sacrificing, exerted himself to the utmost in order to give clear expression to these more important things. He conducted everything according to the rules of ceremony, thereby giving prominent exhibition to them, and displaying them to the august personator:—such was the method of the sages.

10. At sacrifices there are the provisions that are left. The dealing with these is the least important thing in sacrifices, but it is necessary to take knowledge of it. Hence there is the saying of antiquity, 'The end must be attended to even as the beginning:—there is an illustration of it in these leavings. Hence it was the remark of a superior man of antiquity, that 'The personator also eats what the spirits have left;—it is a device of kindness, in which may be seen (the method of) government.'

Hence, when the personator rose, the ruler and his three ministers partook of what he had left. When the ruler had risen, the six Great officers partook;—the officers partook of what the ruler had left. When the Great officers rose, the eight officers partook:—the lower in rank ate what the higher had

left. When these officers rose, each one took what was before him and went out, and placed it (in the court) below the hall, when all the inferior attendants entered and removed it:—the inferior class ate what the superior had left.

11. Every change in the disposal of these relics was marked by an increase in the number (of those who partook of them); and thus there was marked the distinction between the degrees of the noble and the mean, and a representation given of the dispensation of benefits (by the sovereign). Hence by means of the four vessels of millet there is shown the cultivation of this in the ancestral temple, which becomes thereby a representation of all comprised within the confines (of the state).

What is done at sacrifices afforded the greatest example of the dispensation of favours¹. Hence when the superior possessed the greatest blessing, acts of favour were sure to descend from him to those below him, the only difference being that he enjoyed the blessing first, and those below him afterwards;—there was no such thing as the superior's accumulating a great amount for himself, while the people below him might be suffering from cold and want. Therefore when the superior enjoyed his great blessing, even private individuals waited till the stream should flow down, knowing that his favours would surely come to them. This was shown by what was done with the relics at sacrifices, and hence came the saying that 'By the dealing with these was seen (the method of) government.'

¹ It is difficult to detect the mind of the writer here, and make out the train of his reasoning. Zottoli:—'Sacrificium, beneficiorum maximum est.' Callery:—'Dans les sacrifices, les bien-

12. Sacrifice is the greatest of all things. Its apparatus of things employed in it is complete, but that completeness springs from all being in accordance with the requirements (of nature and reason):— is it not this which enables us to find in it the basis of all the lessons of the sages? Therefore (those lessons, in the external sphere, inculcated the honouring of the ruler and of elders, and, in the internal sphere, filial piety towards parents.) Hence, when there was an intelligent ruler above, all his ministers submitted to and followed him. When he reverently sacrificed in his ancestral temple, and at the altars to the (spirits of the) land and grain, his sons and grandsons were filially obedient. He did all his duty in his own walk, and was correct in his righteousness; and thence grew up the lessons (of all duty.)

Therefore a superior man, in the service of his ruler, should find (guidance for) all his personal conduct. What does not satisfy him in (the behaviour of) his superiors, he will not show in his employment of those below himself; and what he dislikes in the behaviour of those below him, he will not show in the service of his superiors. To disapprove of anything in another, and do the same himself, is contrary to the rule of instruction. Therefore the superior in the inculcation of his lessons, ought to proceed from the foundation (of all duty). This will show him pursuing the greatest method of what is natural and right in the highest degree; and is not this what is seen in sacrifice? Hence we have the saying that

faits sont la plus grande chose.' Wylie :—' Sacrifice is the greatest of the virtuous influences.' But is not the writer simply referring to what he has said about the admission of all classes to participate in the relics of a sacrifice?

'The first and greatest teaching is to be found in sacrifice.'

13. In sacrifice there is a recognition of what belongs to ten relationships¹. There are seen in it the method of serving spiritual Beings; the righteousness between ruler and subject; the relation between father and son; the degrees of the noble and mean; the distance gradually increasing between relatives; the bestowment of rank and reward; the separate duties of husband and wife; impartiality in government affairs; the order to be observed between old and young; and the boundaries of high and low. These are what are called the (different duties in the) ten relationships.

14. The spreading of the mat and placing on it a stool to serve for two, was intended as a resting-place for the united spirits (of husband and wife)². The instruction to the blesser in the apartment and the going out to the inside of the gate³, was the method pursued in (seeking) communion with the spirits.

15. The ruler went to meet the victim, but not to meet the representative of the dead;—to avoid misconstruction⁴. While the representative was outside

¹ Zottoli :—'Sacrificium habet decem sensus.' Callery :—'Les sacrifices renferment dix ordres d'idées.'

² The reason given for this practice is peculiar. 'While alive,' says K'han Hào, 'every individual has his or her own body, and hence in the relation of husband and wife, there are the separate duties to be discharged by each; but when they are dead, there is no difference or separation between their spiritual essences (精氣無間), and one common stool for support is put down for them both.' Is there any truth that these Chinese speculators are groping after?

³ See vol. xxvii, page 444, paragraph 18.

⁴ It was not for the ruler to go to meet one who was still a

the gate of the temple, he was to be regarded only as a subject; inside the temple, he had the full character of a ruler. While the ruler was outside the gate of the temple, he was there the ruler; when he entered that gate (on the occasion of the sacrifice), he had the full character of a subject, or a son. Hence his not going forth (to meet the representative) made clear the right distinction between the ruler and subject.

16. According to the rule in sacrifices, a grandson acted as the representative of his grandfather. Though employed to act the part of representative, yet he was only the son of the sacrificer. When his father, with his face to the north, served him, he made clear how it is the way of a son to serve his father. Thus (sacrifice) illustrated the relation of father and son.

17. When the representative had drunk the fifth cup, the ruler washed the cup of jade, and presented it to the ministers. When he had drunk the seventh cup, that of green jasper was presented to the Great officers. When he had drunk the ninth cup, the plain one varnished was presented to the ordinary officers, and all who were taking part in the service. In all the classes the cup passed from one to another, according to age; and thus were shown the degrees of rank as more honourable and lower.

18. At the sacrifice the parties taking part in it were arranged on the left and right, according to their order of descent from the common ancestor, and thus the distinction was maintained between the order of fathers and sons, the near and the

subject, and had not yet entered on the function, which placed him in a position of superiority for the time and occasion.

distant, the older and the younger, the more nearly related and the more distantly, and there was no confusion. Therefore at the services in the grand ancestral temple, all in the two lines of descent were present, and no one failed to receive his proper place in their common relationship. This was what was called (showing) the distance gradually increasing between relatives.

19. Anciently the intelligent rulers conferred rank on the virtuous, and emoluments on the meritorious; and the rule was that this should take place in the Grand temple, to show that they did not dare to do it on their own private motion. Therefore, on the day of sacrifice, after the first presenting (of the cup to the representative), the ruler descended and stood on the south of the steps on the east, with his face to the south, while those who were to receive their appointments stood facing the north. The recorder was on the right of the ruler, holding the tablets on which the appointments were written. He read these, and (each man) bowed twice, with his head to the ground, received the writing, returned (home), and presented it in his (own) ancestral temple :—such was the way in which rank and reward were given.

20. The ruler, in the dragon robe and square-topped cap, stood at the top of the steps on the east, while his wife in her head-dress and pheasant-embroidered robe, stood in the chamber on the east. When the wife presented and put down the dishes on stands, she held them by the foot; (the officer) who held the vessels with new wine, presented them to her, holding them by the bottom; when the representative of the dead was handing the cup to the wife, he held it by the handle, and she gave it to him by

the foot; when husband and wife were giving and receiving, the one did not touch the place where the other had held the article; in passing the pledge cup, they changed the cups:—so was the distinction to be maintained between husband and wife shown.

21. In all arrangements with the stands, the chief attention was given to the bones. Some bones were considered nobler, and some meaner. Under the Yin they preferred the thigh bone; and under the K'âu, the shoulder bone. Generally, the bones in front were thought nobler than those behind. The stands served to illustrate the rule in sacrifices of showing favours. Hence the nobler guests received the nobler bones, and the lower, the less noble; the nobler did not receive very much, and the lower were not left without any:—impartiality was thus shown. With impartiality of favours, government proceeded freely; with the free proceeding of government, undertakings were accomplished; with the accomplishment of undertakings, merit was established. It is necessary that the way in which merit is established should be known. The stands served to show the rule for the impartial bestowment of favours. So did the skilful administrators of government proceed, and hence it is said that (sacrifices showed the principle of) impartiality in the business of government.

22. Whenever they came to the (general) circulation of the cup, those whose place was on the left stood in one row, and also those whose place was on the right. The members of each row had places according to their age; and in the same way were arranged all the assistants at the service. This was what was called (exhibiting) the order of the old and young.

23. At sacrifices there were portions given to the skimmers, cooks, assistants, feather-wavers, and door-keepers,—showing how favours should descend to the lowest. Only a virtuous ruler, however, could do this; having intelligence sufficient to perceive (the wisdom of) it, and benevolence equal to the bestowment of it. Apportioning means bestowing; they were able to bestow what was left on those below them.

Skimmers were the meanest of those who looked after the buff-coats; cooks' assistants, the meanest of those who looked after the flesh; feather-wavers, the meanest of those who had to do with the music; door-keepers, those who looked after the doors; for anciently they did not employ men who had suffered dismemberment to keep the doors. These four classes of keepers were the meanest of the servants; and the representative of the dead was the most honoured of all. When the most honoured, at the close of the sacrifice, did not forget those who were the most mean, but took what was left and bestowed it on them, (it may be seen how) with an intelligent ruler above, there would not be any of the people within his territory who suffered from cold and want. This is what was meant by saying that sacrifices show the relation between high and low.

24. For the sacrifices (in the ancestral temple) there were the four seasons. That in spring was called *yo*¹; that in summer, *tí*; that in autumn, *khang*; and that in winter, *khang*. The *yo* and *tí* expressed the idea in the bright and expanding (course of nature); the *khang* and *khang*, that in

¹ Meaning, it is said, 'meagre;' the things offered being few in the spring season; but such explanations are far-fetched.

the sombre and contracting (course). The *tí* showed the former in its fullest development, and the *khang* showed the latter in the same. Hence it is said, 'There is nothing more important than the *tí* and *khang*.' Anciently, at the *tí* sacrifice, they conferred rank, and bestowed robes;—acting according to the idea in the bright and expanding (course); and at the *khang* they gave out fields and homesteads, and issued the rules of autumn-work;—acting according to the idea in the sombre and contracting (course). Hence it is said in the Record, 'On the day of the *khang* sacrifice they gave forth (the stores of) the ruler's house;' showing how rewards (were then given). When the plants were cut down, the punishment of branding might be inflicted. Before the rules of autumn-work were issued, the people did not dare to cut down the grass.

25. Hence it is said that 'the ideas in the *tí* and *khang* are great, and lie at the foundation of the government of a state; and should by all means be known.' It is for the ruler to know clearly those ideas, and for the minister to be able to execute (what they require). The ruler who does not know the ideas is not complete, and the minister who cannot carry them into execution is not complete.

Now the idea serves to direct and help the aim, and leads to the manifestation of all virtue. Hence he whose virtue is the completest, has the largest aims; and he whose aims are the largest, has the clearest idea. He whose idea is the clearest, will be most reverent in his sacrifices. When the sacrifices (of a state) are reverent, none of the sons and grandsons within its borders will dare to be irreverent. Then the superior man, when he has a sacrifice, will

feel it necessary to preside at it in person. If there be a (sufficient) reason for it, he may commit the performance of it to another. But when committing the performance to another, the ruler will not fail (to think) of its meaning, because he understands the ideas in it. He whose virtue is slight, has but a small aim. He who is in doubts as to the idea in it, and will yet seek to be reverent in his sacrifice, will find it impossible to be so ; and how can he, who sacrifices without reverence, be the parent of his people ?

26. The tripods (at the sacrifices) had inscriptions on them. The maker of an inscription named himself, and took occasion to praise and set forth the excellent qualities of his ancestors, and clearly exhibit them to future generations. Those ancestors must have had good qualities and also bad. But the idea of an inscription is to make mention of the good qualities and not of the bad :—such is the heart of a filial descendant ; and it is only the man of ability and virtue who can attain to it.

The inscriber discourses about and panegyrises the virtues and goodness of his ancestors, their merits and zeal, their services and toils, the congratulations and rewards (given to them), their fame recognised by all under heaven ; and in the discussion of these things on his spiritual vessels, he makes himself famous ; and thus he sacrifices to his ancestors. In the celebration of his ancestors he exalts his filial piety. That he himself appears after them is natural. And in the clear showing (of all this) to future generations, he is giving instruction.

27. By the one panegyric of an inscription benefit accrues to the ancestors, to their descendant and to

others after them. Hence when a superior man looks at an inscription, while he admires those whom it praises, he also admires him who made it. That maker had intelligence to see (the excellences of his ancestors), virtue to associate himself with them, and wisdom to take advantage (of his position);—he may be pronounced a man of ability and virtue. Such worth without boasting may be pronounced courteous respect.

28. Thus the inscription on the tripod of Khung Khwei of Wei was:—‘In the sixth month, on the day ting-hâi, the duke went to the Grand Temple, and said, “My young uncle, your ancestor *Kwang Shû* assisted duke *Khăng*, who ordered him to follow him in his difficulties on the south of the Han, and afterwards to come to him in his palace (of imprisonment) in the honoured capital of *Kâu*; and all these hurried journeyings he endured without wearying of them. From him came the helper of duke Hsien, who charged your (later) ancestor *Khăng Shuh* to continue the service of his ancestor. Your deceased father *Wăn Shû* cherished and stimulated in himself the old desires and aims, roused and led on the admirable officers, and showed his own great personal interest in the state of Wei. His labours for our ducal house never wearied early or late, so that the people all testified how good he was.” The duke further said, “My young uncle, I give you (this tripod with) its inscription. Carry on and out the services of your father.” Khwei bowed with his head to the ground, and said, “In response to the distinction (you have conferred upon me) I will take your great and important charge, and I will put it on the vases and tripods of my winter sacrifice.”’ Such

was the inscription on the tripod of Khung Khwei of Wei¹.

In this way the superior men of antiquity panegyrised the excellent qualities of their ancestors, and clearly exhibited them to future generations, thereby having the opportunity to introduce their own personality and magnify their states. If descendants who maintain their ancestral temples and the altars to the spirits of the land and grain, praised their ancestors for good qualities which they did not possess, that was falsehood; if they did not take knowledge of the good qualities which they did possess, that showed their want of intelligence; if they knew them and did not transmit them (by their inscriptions), that showed a want of virtue:—these are three things of which a superior man should have been ashamed.

29. Anciently, Tan, duke of Kâu, did most meritorious service for the kingdom. After his death the kings K'hăng and Khang, bearing in mind all his admirable work, and wishing to honour Lû, granted to its lords the right of offering the greatest sacrifices;—those in the borders of their capital to Heaven and Earth, in the wider sphere of sacrifice; and the great summer and autumnal sacrifices in the ancestral temple of the state. At those great summer and autumnal sacrifices, on the hall above, they sang the K'hing Miào, and in the courtyard below it they danced the Hsiang to the flute; they

¹ In the year that Confucius died, B.C. 479, this Khung Khwei was obliged to flee from Wei to Sung. The duke K'ăng, who is mentioned in connexion with his ancestor known as Kwang Shô, was marquis of Wei from B.C. 635 to 600. Duke Hsien ruled from B.C. 577 to 559.

carried red shields and axes adorned with jade in performing the Tâ Wû dance ; and this was the music employed by the son of Heaven. (Those kings) in acknowledgment of the great merit of the duke of Kâu, allowed (the use of those sacrifices and this music) to the (marquis of) Lû. His descendants have continued it, and down to the present day it is not abolished, thereby showing clearly the virtue of the lords of Kâu and magnifying their state¹.

¹ This distinction, said to have been thus conferred on the princes of Lû, is contrary to the views of the ablest commentators on the subject.

BOOK XXIII. KING KIEH

OR

THE DIFFERENT TEACHING OF THE DIFFERENT KINGS¹.

1. Confucius said, 'When you enter any state you can know what subjects (its people) have been taught. If they show themselves men who are (mild and gentle, sincere and good, they have been taught from the Book of Poetry. If they have a wide comprehension (of things), and know what is remote and old, they have been taught from the Book of History. If they be large-hearted and generous, bland and honest, they have been taught from the Book of Music. If they be pure and still, refined and subtile, they have been taught from the Yí. If they be courteous and modest, grave and respectful, they have been taught from the Book of Rites and Ceremonies. If they suitably adapt their language to the things of which they speak, they have been taught from the *Khün K'hiû*.

'Hence the failing that may arise in connexion with the study of the Poems is a stupid simplicity; that in connexion with the History is duplicity; that in connexion with Music is extravagance; that in connexion with the Yí is the violation (of reason)¹; that in connexion with the practice of Rites and Ceremonies is fussiness; and that in connexion with the *Khün K'hiû* is insubordination².

¹ See the introductory notice, vol. xxvii, p. 38.

² Callery translates the character in the text by 'l'hérésie.' I have met with 'robbery' for it.

4 2. 'If they show themselves men who are mild and gentle, sincere and good, and yet free from that simple stupidity, their comprehension of the Book of Poetry is deep. If they have a wide comprehension (of things), and know what is remote and old, and yet are free from duplicity, their understanding of the Book of History is deep. If they are large-hearted and generous, bland and honest, and yet have no tendency to extravagance, their knowledge of Music is deep.) If they are pure and still, refined and subtle, and yet do not violate (reason), they have made great attainments in the Yi. (If they are courteous and modest, grave and reverent, and yet not fussy, their acquaintance with the Book of Rites and Ceremonies is deep. If they suitably adapt their language to the things of which they speak, and yet have no disposition to be insubordinate, their knowledge of the *Khun Khiû* is deep.)'

3. The son of Heaven forms a ternion with heaven and earth. Hence, in power of his goodness he is their correlate, and his benefits extend at once to all things¹. His brilliancy is equal to that of the sun and moon, and enlightens all within the four seas, not excepting anything, however minute and small. In the audiences at his court everything is done according to the orderly procedure of benevolence, wisdom, propriety, and righteousness. At his entertainments he listens to the singing of the Odes of the Kingdom and the Odes of the Temple and Altar. When he walks, there are the notes from his girdle pendant. When he rides in his chariot, there are the harmonious sounds of the bells attached to

¹ Compare vol. xxvii, pp. 377, 378.

his horses. When he is in private at ease, there is the observance of the rules of propriety. When he advances or retires, he does so according to rule and measure. All the officers fulfil their duties rightly, and all affairs are carried on with order. It is as described in the Book of Poetry (I, xiv, 3),

‘That virtuous man, the princely one,
Has nothing wrong in his deportment;
He has nothing wrong in his deportment,
And thus he rectifies the four quarters of the state.’

4. When (a ruler) issues his notices and gives forth his orders, and the people are pleased, we have what may be called the condition of harmony. When superiors and inferiors love one another, we have the condition of benevolence. When the people get what they desire without seeking for it, we have the condition of confidence. When all things in the operations of heaven and earth that might be injurious are taken out of the way, we have the condition of rightness. Rightness and confidence, harmony and benevolence are the instruments of the presiding chieftain and the king. If any one wishes to govern the people, and does not employ these instruments, he will not be successful.

5. In the right government of a state, the Rules of Propriety serve the same purpose as the steel-yard in determining what is light and what is heavy; or as the carpenter's line in determining what is crooked and what is straight; or as the circle and square in determining what is square and what is round. Hence, if the weights of the steel-yard be true, there can be no imposition in the matter of weight; if the line be truly applied, there can be no

imposition in the evenness of a surface ; if the square and compass be truly employed, there can be no imposition in the shape of a figure. When a superior man (conducts the government of his state) with a discriminating attention to these rules, he cannot be imposed on by traitors and impostors.

6. Hence he who has an exalted idea of the rules, and guides his conduct by them, is called by us a mannerly gentleman, and he who has no such exalted idea and does not guide his conduct by the rules, is called by us one of the unmannerly people. These rules (set forth) the way of reverence and courtesy ; and therefore when the services in the ancestral temple are performed according to them, there is reverence ; when they are observed in the court, the noble and the mean have their proper positions ; when the family is regulated by them, there is affection between father and son, and harmony among brothers ; and when they are honoured in the country districts and villages, there is the proper order between old and young. There is the verification of what was said by Confucius, 'For giving security to superiors and good government of the people, there is nothing more excellent than the Rules of Propriety¹.'

7. The ceremonies at the court audiences of the different seasons were intended to illustrate the righteous relations between ruler and subject ; those of friendly messages and inquiries, to secure mutual honour and respect between the feudal princes ; those of mourning and sacrifice, to illustrate the kindly feelings of ministers and sons ; those of social

¹ See vol. iii, page 482 (*The Hsião King*).

meetings in the country districts, to show the order that should prevail between young and old ; and those of marriage, to exhibit the separation that should be maintained between males and females. Those ceremonies prevent the rise of disorder and confusion, and are like the embankments which prevent the overflow of water. He who thinks the old embankments useless and destroys them is sure to suffer from the desolation caused by overflowing water ; and he who should consider the old rules of propriety useless and abolish them would be sure to suffer from the calamities of disorder.

8. Thus if the ceremonies of marriage were discontinued, the path of husband and wife would be embittered, and there would be many offences of licentiousness and depravity. If the drinking ceremonies at country feasts were discontinued, the order between old and young would be neglected, and quarrelsome litigations would be numerous. If the ceremonies of mourning and sacrifice were discontinued, the kindly feeling of officers and sons would become small ; there would be numerous cases in which there was a revolt from the observances due to the dead, and an oblivion of (those due) to the living. If the ceremonies of friendly messages and court attendances were discontinued, the positions of ruler and subject would fall into disuse, the conduct of the feudal princes would be evil, and the ruin wrought by rebellion, encroachment, and oppression would ensue.

9. Therefore the instructive and transforming power of ceremonies is subtle ; they stop depravity before it has taken form, causing men daily to move towards what is good, and keep themselves farther

apart from guilt, without being themselves conscious of it. It was on this account that the ancient kings set so high a value upon them. This sentiment is found in the words of the Yî, 'The superior man is careful at the commencement; a mistake, then, of a hair's breadth, will lead to an error of a thousand li¹.'

¹ But these words, common enough in later Chinese writings, are not found in the Yî King. Khung Ying-tâ says they are from the 'Great Appendix.' It is more likely that he was in error, than that they existed there in his time.

BOOK XXIV. ÂI KUNG WÂN

OR

QUESTIONS OF DUKE ÂI¹.

1. Duke Âi² asked Confucius, saying, 'What do you say about the great rites? How is it that superior men, in speaking about them, ascribe so much honour to them?' Confucius said, 'I, *Khiû*, am a small man, and unequal to a knowledge of the rites.' 'By no means,' said the ruler. 'Tell me what you think, my Master.' Then Confucius replied, 'According to what I have heard, of all things by which the people live the rites are the greatest. Without them they would have no means of regulating the services paid to the spirits of heaven and earth; without them they would have no means of distinguishing the positions proper to father and son, to high and low, to old and young; without them they would have no means of maintaining the separate character of the intimate relations between male and female, father and son, elder brother and younger, and conducting the intercourse between the contracting families in a marriage, and the frequency or infrequency (of the reciprocities between friends). These

¹ See the introduction, vol. xxvii, pp. 39, 40.

² Âi ('The Courteous, Benevolent, and Short-lived') was the posthumous title of the marquis Jiang (蔣) of Lû (B.C. 494-468), in whose sixteenth year Confucius died. He seems to have often consulted the sage on important questions, but was too weak to follow his counsels.

are the grounds on which superior men have honoured and revered (the rites) as they did.

2. 'Thereafter, (having this view of the rites), they taught them to the people, on the ground of their ability (to practise them), not disregarding their general principles or the limitations (that circumstances impose in particular cases).

3. 'When their object had been accomplished (so far), they proceeded to give rules for the engraving (of the ceremonial vessels), and the embroidering in various colours (of the robes), in order to secure the transmission (of the rites).

4. 'Having obtained the concurrence (of the people in these things), they proceeded to tell them the different periods of mourning; to provide the full amount of tripods and stands; to lay down the (offerings of) pork and dried meats; to maintain in good order their ancestral temples; and then at the different seasons of the year reverently to present their sacrifices; and to arrange thereat, in order, the different branches and members of their kindred. Meanwhile (they themselves) were content to live economically, to have nothing fine about their dress; to have their houses low and poor; to eschew much carving about their carriages; to use their vessels without carving or graving; and to have the plainest diet, in order to share all their advantages in common with the people. In this manner did the superior men of antiquity practise the rites.'

5. The duke said, 'How is it that the superior men of the present day do not practise them (in this way)?' Confucius said, 'The superior men of the present day are never satisfied in their fondness for wealth, and never wearied in the extravagance of

their conduct. They are wild, idle, arrogant, and insolent. They determinedly exhaust the (resources of the) people, put themselves in opposition to the multitude, and seek to overthrow those who are pursuing the right way. They seek to get whatever they desire, without reference to right or reason. The former using of the people was according to the ancient rules; the using of them now-a-days is according to later rules. The superior men of the present day do not practise the rites (as they ought to be practised).'

6. Confucius was sitting beside duke Âi, when the latter said, 'I venture to ask, according to the nature of men, which is the greatest thing (to be attended to in dealing with them).'

Confucius looked startled, changed countenance, and replied, 'That your lordship should put this question is a good thing for the people. How should your servant dare but express his opinion on it?' Accordingly he proceeded, and said, 'According to the nature of men, government is the greatest thing for them.'

7. The duke said, 'I venture to ask what is meant by the practice of government.' Confucius replied, 'Government is rectification. When the ruler is correct himself, all the people will follow his government. What the ruler does is what the people follow. How should they follow what he does not do?'

8. The duke said, 'I venture to ask how this practice of government is to be effected?' Confucius replied, 'Husband and wife have their separate functions; between father and son there should be affection; between ruler and minister there should be a strict adherence to their several parts. If

these three relations be correctly discharged, all other things will follow.'

9. The duke said, 'Although I cannot, in my unworthiness, count myself as having attained, I should like to hear how these three things which you have mentioned can be rightly secured. May I hear it from you?' Confucius replied, 'With the ancients in their practice of government the love of men was the great point; in their regulation of this love of men, the rules of ceremony was the great point; in their regulation of those rules, reverence was the great point. For of the extreme manifestation of reverence we find the greatest illustration in the great (rite of) marriage. Yes, in the great (rite of) marriage there is the extreme manifestation of respect; and when one took place, the bridegroom in his square-topped cap went in person to meet the bride;—thus showing his affection for her. It was his doing this himself that was the demonstration of his affection. Thus it is that the superior man commences with respect as the basis of love. To neglect respect is to leave affection unprovided for. Without loving there can be no (real) union; and without respect the love will not be correct. Yes, love and respect lie at the foundation of government.'

10. The duke said, 'I wish that I could say I agree with you, but for the bridegroom in his square-topped cap to go in person to meet the bride,—is it not making too much (of the ceremony)?' Confucius looked startled, changed countenance, and said, '(Such a marriage) is the union of (the representatives of) two different surnames in friendship and love, in order to continue the posterity of the

former sages¹, and to furnish those who shall preside at the sacrifices to heaven and earth, at those in the ancestral temple, and at those at the altars to the spirits of the land and grain;—how can your lordship say that the ceremony is made too great?’

11. The duke said, ‘I am stupid. But if I were not stupid, how should I have heard what you have just said? I wish to question you, but cannot find the proper words (to do so); I beg you to go on a little further.’ Confucius said, ‘If there were not the united action of heaven and earth, the world of things would not grow. By means of the grand rite of marriage, the generations of men are continued through myriads of ages. How can your lordship say that the ceremony in question is too great?’ He immediately added, ‘In their own peculiar sphere, (this marriage) serves for the regulation of the ceremonies of the ancestral temple, and is sufficient to supply the correlates to the spiritual Intelligences of heaven and earth; in the (wider) sphere abroad, it serves for the regulation of the ceremonies of the court², and is sufficient to establish the respect of those below him to him who is

¹ *K'ang* takes this in the singular, ‘the former sage,’ meaning the duke of *K'au*, so that Confucius should say that the ceremony in question was a continuation of that instituted by the duke of *K'au*. I cannot construe or interpret the text so.

² The text here seems to be corrupt. Translating it as it stands—**治直言之禮**—we should have to say, ‘the regulation of straightforward speech.’ *K'ăn Hào* says that he does not understand the **直言**, and mentions the conjecture of ‘some one’ that they should be **朝廷**. I have followed this conjecture, which also is followed in Callery’s expurgated edition.

above them all. If there be ground for shame on account of (a deficiency of) resources, this is sufficient to stimulate and secure them ; if there be ground for shame on account of the condition of the states, this is sufficient to revive and renew them. Ceremonies are the first thing to be attended to in the practice of government. Yes, (this) ceremony (of marriage) lies at the foundation of government !'

12. Confucius continued, 'Anciently, under the government of the intelligent kings of the three dynasties, it was required of a man to show respect to his wife and son. When the path (of right government) was pursued, the wife was the hostess of the (deceased) parents ;—could any husband dare not to show her respect ? And the son was the descendant of those parents ;—could any father dare not to show him respect ? The superior man's respect is universal. Wherein it appears the greatest is in his respect for himself. He is in his person a branch from his parents ;—can any son but have this self-respect ? If he is not able to respect his own person, he is wounding his parents. If he wound his parents, he is wounding his own root ; and when the root is wounded, the branches will follow it in its dying. These three things are an image of what is true with the whole people (in the body politic). One's own person reaches to the persons of others ; one's own son to the sons of others ; one's own wife to the wives of others. If a ruler do these things, the spirit of his conduct will reach to all under the sky. If the course of the great king be thus, all the states and families will be docilely obedient.'

13. The duke said, 'I venture to ask what is meant by "respecting one's self."' Confucius replied,

'When a man who is over others¹ transgresses in his words, the people will fashion their speech accordingly; when he transgresses in his actions, the people will make him their model. If in his words he do not go beyond what should be said, nor in his actions what should be a model, then the people, without being commanded, will reverence and honour him. When this obtains, he can be said to have respected his person. Having succeeded in respecting his person, he will (at the same time) be able to do all that can be done for his parents.'

14. The duke said, 'I venture to ask what is meant by doing all that can be done for one's parents?' Confucius replied, '*Kün-ze* is the completest name for a man; when the people apply the name to him, they say (in effect) that he is the son of a *kün-ze*; and thus he makes his parents (? father) to be a *kün-ze*. This is what I intend by saying that he does all that can be done for his parents².'

Confucius forthwith added, 'In the practice of

¹ The phrase in the text for 'a man who is high in rank' is *Kün-ze* (君子, *Keun-ze*, in Southern mandarin, and as it is transliterated by Morrison and our older scholars), meaning 'ruler's son,' 'a princely man,' 'a superior man,' 'a wise man,' 'a sage.' In all these ways it has been translated by Chinese scholars, and I have heard it proposed to render it by 'a gentleman.' Here all the commentators say it is to be understood of a man of rank and position (君子以位言), which is a not unfrequent application of it.

² What I translate by 'doing all that can be done for his parents' is in the text 'completing his parents.' Callery renders it:—'Assurant (un nom honorable) à ses père et mère.' Wylie:—'Completing his duty to his parents.' It certainly is not easy to catch the mind of Confucius here and in the context.

government in antiquity, the love of men was the great point. If (a ruler) be not able to love men he cannot possess¹ his own person; unable to possess his own person, he cannot enjoy in quiet his land; unable to enjoy in quiet his land, he cannot rejoice in Heaven; unable to rejoice in Heaven, he cannot do all that can be done for his person.'

15. The duke said, 'I venture to ask what is meant by "doing all that could be done for one's person."' Confucius replied, 'It is keeping from all transgression of what is due ^{to his being or orig. nature} in all the sphere beyond one's self².'

16. The duke said, 'I venture to ask what it is that the superior man values in the way of Heaven.' Confucius replied, 'He values its unceasingness. There is, for instance, the succession and sequence of the sun and moon from the east and west:—that is the way of Heaven. There is the long continuance of its progress without interruption:—that is the way of Heaven. There is its making (all) things complete without doing anything:—that is the way of Heaven. There is their brilliancy when they have been completed:—that is the way of Heaven.'

17. The duke said, 'I am very stupid, unintelligent also, and occupied with many things; do you, Sir, help me that I may keep this lesson in my mind.'

18. Confucius looked grave, moved a little from his mat, and replied, 'A man of all-comprehensive

¹ K'ang says that 'to possess' is equivalent to 'to preserve' (有猶保也), adding 'men will injure him.' So all the other commentators.

² Callery gives for this:—'Ce n'est autre chose que de se maintenir dans le devoir.' Wylie:—'It is not to transgress the natural order of things.' The reply of Confucius appears more fully in the 'Narratives of the School.'

virtue¹ does not transgress what is due from him in all the sphere beyond himself, and it is the same with a filial son. Therefore a son of all-comprehensive virtue serves his parents as he serves Heaven, and serves Heaven as he serves his parents. Hence a filial son does all that can be done for his person².

19. The duke said, 'I have heard your (excellent) words;—how is it that I shall hereafter not be able to keep from the guilt (of transgressing)?' Confucius answered, 'That your lordship gives expression to such words is a happiness to me.'

¹ 'A man of all-comprehensive virtue' is in the text simply 'the benevolent man (仁人).' But that name must be to be taken in the sense of Mencius, who says that 'Benevolence is man (仁也者人也)' (vii, 11, 16); as Julien translates it, 'Humanitas homo est.' There 仁, 'benevolence,' is a name denoting the complex of human virtues, with the implication that it is itself man's distinguishing characteristic. So 'humanity' may be used in English to denote 'the peculiar nature of man as distinguished from other beings.'

² Callery has a note on this paragraph:—'Ces axiômes de Confucius ne sont pas d'une grande clarté; on y entrevoit, cependant, que le philosophe veut établir l'identité entre le devoir chez l'homme et la vérité éternelle, ou la vertu dans le sens abstrait.' But perhaps the sayings of the Master seem to be wanting in 'clearness' because it is difficult to catch his mind and spirit in them. Nor do I think that the latter part of what the French sinologue says is abundantly clear or appropriate. I have often said that Confucius and his school try to make a religion out of filial virtue. That appears here with a qualification; for the text makes out 'the service of Heaven,' which would be religion, to be identical with the full discharge of all filial duty, equivalent, in the Chinese system, to all morality.

BOOK XXV. KUNG-NÎ YEN KÜ

OR

KUNG-NÎ AT HOME AT EASE¹.

1. *Kung-nî* 'being at home at ease¹,' with *Ûze-kang*, *Ûze-kung*, and *Yen Yü* by him, their conversation went on from general matters to the subject of ceremonies.

2. The Master said, 'Sit down², you three, and I will discourse to you about ceremonies, so that you may rightly employ them everywhere and in all circumstances.'

3. *Ûze-kung* crossed over (*Ûze-kang's*) mat³, and replied, 'Allow me to ask what you mean.' The Master said, 'Respect shown without observing the rules of propriety is called vulgarity; courtesy without observing those rules is called forwardness; and boldness without observing them is called violence.' The Master added, 'Forwardness takes away from gentleness and benevolence.'

4. The Master said, 'Sze, you err by excess, and Shang by defect.' *Ûze-khân* might be regarded as a

¹ See the introductory notice of this Book, vol. xxvii, page 40. The *Yen* (燕) in *Yen Kü* is said by *Käng* to denote that the party had been to court, and was now at his ease in his own residence.

² The three disciples must have risen from their mats on the introduction of a new topic, according to vol. xxvii, page 76, paragraph 21.

³ Substantially a violation of vol. xxvii, page 71, paragraph 26.

mother of the people. He could feed them, but he could not teach them¹.

5. 3ze-kung (again) crossed the mat, and replied, 'Allow me to ask by what means it is possible to secure this due mean.' The Master said, 'By means of the ceremonial rules; by the rules. Yes, it is those rules which define and determine the due mean.'

6. 3ze-kung having retired, Yen Yû advanced, and said, 'May I be allowed to ask whether the rules of ceremony do not serve to control what is bad, and to complete what is good?' The Master said, 'They do.' 'Very well, and how do they do it?' The Master said, 'The idea in the border sacrifices to Heaven and Earth is that they should give expression to the loving feeling towards the spirits; the ceremonies of the autumnal and summer services in the ancestral temple give expression to the loving feeling towards all in the circle of the kindred; the ceremony of putting down food (by the deceased) serves to express the loving feeling towards those who are dead and for whom they are mourning; the ceremonies of the archery fêtes and the drinking at them express the loving feeling towards all in the district and neighbourhood; the ceremonies of festal entertainments express the loving feeling towards visitors and guests.'

¹ The *Khien-lung* editors say that in this paragraph, the part from '3ze-khân' has been introduced by an error in manipulating the tablets. It is found, and more fully, also in the *Narratives of the School*, article 41 (正論解). The previous sentence of it also appears to me to be out of place. Why should Confucius address himself to Sze?—that was not the name of 3ze-kung. What is said to him is found in the *Analects*, VI, 15, and also more fully.

7. The Master said, 'An intelligent understanding of the idea in the border sacrifices to Heaven and Earth, and of the ceremonies of the autumnal and summer services, would make the government of a state as easy as to point to one's palm. Therefore let the ceremonial rules be observed:—in the ordinary life at home, and there will be the (right) distinction between young and old ; inside the door of the female apartments, and there will be harmony among the three branches of kin ; at court, and there will be the right ordering of office and rank ; in the different hunting expeditions, and skill in war will be acquired ; in the army and its battalions, and military operations will be successful.

'In this way, houses and their apartments will be made of the proper dimensions ; measures and tripods will have their proper figure ; food will have the flavour proper to its season ; music will be according to the rules for it ; carriages will have their proper form ; spirits will receive their proper offerings ; the different periods of mourning will have their proper expression of sorrow ; discussions will be conducted by those who from their position should take part in them ; officers will have their proper business and functions ; the business of government will be properly distributed and applied. (The duty) laid on (each) person being discharged in the matter before him (according to these rules), all his movements, and every movement will be what they ought to be.'

8. The Master said, 'What is (the object of) the ceremonial rules ? It is just the ordering of affairs. The wise man who has affairs to attend to must have the right method of ordering them. (He who

should attempt) to regulate a state without those rules would be like a blind man with no one to lead him;—groping about, how could he find his way? Or he would be like one searching all night in a dark room without a light;—how could he see anything?

‘If one have not the ceremonial rules, he would not (know how to) dispose of his hands and feet, or how to apply his ears and eyes; and his advancing and retiring, his bowings and giving place would be without any definite rules. Hence, when the rules are thus neglected:—in the ordinary life at home, then the right distinction between old and young will be lost; in the female apartments, then the harmony among the three branches of kin will be lost; in the court, then the order of office and rank will be lost; in the different hunting expeditions, then the prescribed methods of military tactics will be lost; in the army and its battalions, then the arrangements that secure success in war will be lost. (Also), houses and apartments will want their proper dimensions; measures and tripods will want their proper figure; food will want its seasonal flavour; music will want its proper parts; Spirits will want their proper offerings; the different periods of mourning will want their proper expression of sorrow; discussions will not be conducted by the proper men for them; officers will not have their proper business; the affairs of government will fail to be properly distributed and applied; and (in the duties) laid on (each) person to be discharged in the matters before him, all his movements, every movement, will fail to be what they ought to be. In this condition of things it will be impossible to put one’s self at the

head of the multitudes, and secure harmony among them.'

9. The Master said, 'Listen attentively, you three, while I discourse to you about the ceremonial rules. There are still nine things (to be described), and four of them belong to the Grand festive entertainments. When you know these, though your lot may lie among the channeled fields, if you carry them into practice, you will become wise as sages.

'When one ruler is visiting another, they bow to each other, each courteously declining to take the precedence, and then enter the gate. As soon as they have done so, the instruments of music, suspended from their frames, strike up. They then bow and give place to each other again, and ascend to the hall; and when they have gone up, the music stops. In the court below, the dances Hsiang and Wû are performed to the music of the flute, and that of Hsiâ proceeds in due order with (the brandishing of feathers and) fifes. (After this), the stands with their offerings are set out, the various ceremonies and musical performances go on in regular order, and the array of officers provided discharge their functions. In this way the superior man perceives the loving regard (which directs the entertainment). They move forward in perfect circles; they return and form again the squares. The bells of the equipages are tuned to the *Khâi-khî*; when the guest goes out they sing the Yung; when the things are being taken away, they sing the *Khăn-yü*; and thus the superior man (sees that) there is not a single thing for which there is not its proper ceremonial usage. The striking up of the instruments of metal, when they enter the gate, serves to

indicate their good feeling; the singing of the *K'ing Miáo*, when they have gone up to the hall, shows the virtue (they should cultivate); the performance of the *Hsiang* to the flute in the court below, reminds them of the events (of history). Thus the superior men of antiquity did not need to set forth their views to one another in words; it was enough for them to show them in their music and ceremonies.'

10. The Master said, 'Ceremonial usages are (the prescriptions of) reason; music is the definite limitation (of harmony). The superior man makes no movement without (a ground of) reason, and does nothing without its definite limitation. He who is not versed in the odes will err in his employment of the usages, and he who is not versed in music will be but an indifferent employer of them. He whose virtue is slender will vainly perform the usages.'

11. The Master said, 'The determinate measures are according to the rules; and the embellishments of them are also so; but the carrying them into practice depends on the men.'

12. *3ze-kung* crossed over the mat and replied, 'Allow me to ask whether even *Khwei* was ignorant (of the ceremonial usages)¹?'

13. The Master said, 'Was he not one of the ancients? Yes, he was one of them. To be versed in the ceremonial usages, and not versed in music, we call being poorly furnished. To be versed in the usages and not versed in music, we call being one-sided. Now *Khwei* was noted for his acquaintance with music, and not for his acquaintance with cere-

¹ *Khwei* was Shun's Director of Music. See the *Shû*, II, i, 24.

monies, and therefore his name has been transmitted with that account of him (which your question implies). But he was one of the men of antiquity.'

14. 3ze-kang asked about government. The Master said, 'Sze, did I not instruct you on that subject before? The superior man who is well acquainted with ceremonial usages and music has only to take and apply them (in order to practise government).'

15. 3ze-kang again put the question, and the Master said, 'Sze, do you think that the stools and mats must be set forth, the hall ascended and descended, the cups filled and offered, the pledge-cup presented and returned, before we can speak of ceremonial usages? Do you think that there must be the movements of the performers in taking up their positions, the brandishing of the plumes and fifes, the sounding of the bells and drums before we can speak of music? To speak and to carry into execution what you have spoken is ceremony; to act and to give and receive pleasure from what you do is music. The ruler who vigorously pursues these two things may well stand with his face to the south, for thus will great peace and order be secured all under heaven; the feudal lords will come to his court; all things will obtain their proper development and character; and no single officer will dare to shrink from the discharge of his functions. Where such ceremony prevails, all government is well ordered; where it is neglected, all falls into disorder and confusion. A house made by a good (though unassisted) eye will yet have the corner of honour, and the steps on the east for the host to ascend by; every mat have its upper and lower end; every chariot have

its right side and left; walkers follow one another, and those who stand observe a certain order:—such were the right rules of antiquity. If an apartment were made without the corner of honour and the steps on the east, there would be confusion in the hall and apartment. If mats had not their upper and lower ends, there would be confusion among the occupants of them; if carriages were made without their left side and right, there would be confusion in their seats; if people did not follow one another in walking, there would be confusion on the roads; if people observed no order in standing, there would be disorder in the places they occupy. Anciently the sage T's and intelligent kings and the feudal lords, in making a distinction between noble and mean, old and young, remote and near, male and female, outside and inside, did not presume to allow any to transgress the regular rule they had to observe, but all proceeded in the path which has been indicated.'

16. When the three disciples had heard these words from the Master, they saw clearly as if a film had been removed from their eyes.

BOOK XXVI. KHUNG-3ZE HSIEN KÜ

OR

CONFUCIUS AT HOME AT LEISURE¹.

1. Confucius being at home at leisure, with 3ze-hsiâ by his side, the latter said, 'With reference to the lines in the Book of Poetry (III, ii, ode 8, 1),

"The happy and courteous sovereign

Is the father and mother of the people;"

I beg to ask what the sovereign must be, who can be called "the parent of the people." Confucius said, 'Ah! the parent of the people! He must have penetrated to the fundamental principles of ceremonies and music, till he has reached the five extreme points to which they conduct, and the three that have no positive existence, and be able to exhibit these all under heaven; and when evil is impending in any part of the kingdom, he must have a foreknowledge of it:—such an one is he whom we denominate 'the parent of the people.'

2. 3ze-hsiâ said, 'I have thus heard (your explanation) of the name "parent of the people;" allow me to ask what "the five extreme points" (that you mention) mean.' Confucius said, 'The furthest aim of the mind has also its furthest expression in the Book of Poetry. The furthest expression of the Book of Poetry has also its furthest embodiment in the ceremonial usages. The furthest embodiment

¹ See the introductory notice, vol. xxvii, page 41.

in the ceremonial usages has also its furthest indication in music. The furthest indication of music has also its furthest indication in the voice of sorrow. Sorrow and joy produce, each the other; and thus it is that when we look with the directest vision of the eyes at (these extreme points) we cannot see them, and when we have bent our ears with the utmost tension we cannot hear them. The mind and spirit must embrace all within heaven and earth:—these are what we denominate “the five extreme points.”

3. 3ze-hsiâ said, ‘I have heard your explanation of “the five extreme points;” allow me to ask what “the three points that have no positive existence” mean.’ Confucius said, ‘The music that has no sound; ceremonial usages that have no embodiment; the mourning that has no garb:—these are what we denominate “the three points that have no positive existence.” 3ze-hsiâ said, ‘I have heard what you have said on those three negations; allow me to ask in which of the odes we find the nearest expression of them.’ Confucius said, ‘There is that (IV, ii, ode 1, 6),

“Night and day he enlarged its foundations by
his deep and silent virtue:”—

there is music without sound. And that (I, iii, ode 1, 3),

“My deportment has been dignified and good,

Without anything wrong that can be pointed out:”—

there is the ceremony that has no embodiment. And that (I, iii, ode 10, 4),

“When among any of the people there was a death,

I crawled on my knees to help them:”—

there is the mourning that has no garb.’

4. 3ze-hsiâ said, 'Your words are great, admirable, and complete. Do they exhaust all that can be said on the subject? Is there nothing more?' Confucius said, 'How should it be so? When a superior man practises these things, there still arise five other points.'

5. 3ze-hsiâ said, 'How is that?' Confucius said, 'When there is that music without sound, there is no movement of the spirit or will in opposition to it. When there is that ceremony without embodiment, all the demeanour is calm and gentle. When there is that mourning without garb, there is an inward reciprocity, and great pitifulness.

'When there is that music without sound, the spirit and will are mastered. When there is that ceremony without embodiment, all the demeanour is marked by courtesy. When there is that mourning without garb, it reaches to all in all quarters.

'When there is that music without sound, the spirit and will are followed. When there is that ceremony without embodiment, high and low are harmonious and united. When there is that mourning without garb, it goes on to nourish all regions.

'When there is that music without sound, it is daily heard in all the four quarters of the kingdom. When there is that ceremony without embodiment, there is a daily progress and a monthly advance. When there is that mourning without garb, the virtue (of him who shows it) becomes pure and very bright.

'When there is that music without sound, all spirits and wills are roused by it. When there is that ceremony without embodiment, its influence extends to all within the four seas. When there is

that mourning without garb, it extends to future generations.'

6. 3ze-hsiâ said, '(It is said that) the virtue of the kings (who founded the) three dynasties was equal to that of heaven and earth; allow me to ask of what nature that virtue was which could be said to put its possessors on an equality with heaven and earth.' Confucius said, 'They reverently displayed the Three Impartialities, while they comforted all beneath the sky under the toils which they imposed.' 3ze-hsiâ said, 'Allow me to ask what you call the "Three Impartialities."' Confucius said, 'Heaven overspreads all without partiality; Earth sustains and contains all without partiality; the Sun and Moon shine on all without partiality. Reverently displaying these three characteristics and thereby comforting all under heaven under the toils which they imposed, is what is called "the Three Impartialities." It is said in the Book of Poetry (IV, iii, ode 4, 3),

"God in His favour Thang's House would not leave,
And then Thang rose that favour to receive.

Thang's birth was not from Hsieh too far removed,

His sagely reverence daily greater proved;

For long to Heaven his brilliant influence rose,

And while his acts the fear of God disclose,

God Thang as model fit for the nine regions chose."—

such was the virtue of Thang.

7. 'To Heaven belong the four seasons, spring, autumn, winter, summer, with wind, rain, hoar-frost, and dew;—(in the action) of all and each of these there is a lesson.

‘Earth contains the mysterious energy (of nature). That mysterious energy (produces) the wind and thunder-clap. By the wind and thunder-clap the (seeds of) forms are carried abroad, and the various things show the appearance of life :—in all and each of these things there is a lesson.

8. ‘When the personal character is pure and bright, the spirit and mind are like those of a spiritual being. When what such an one desires is about to come, there are sure to be premonitions of it in advance, (as when) Heaven sends down the seasonable rains, and the hills produce the clouds. As it is said in the Book of Poetry (III, iii, ode 5, 1),

“How grand and high, with hugest bulk, arise
Those southern hills whose summits touch the
skies!

Down from them came a Spirit to the earth,
And to the sires of Fû and Shăn gave birth.
In those two states our Kâu a bulwark has,
O’er which the southern foemen dare not pass,
And all its states they screen, and through them
spread

Lessons of virtue, by themselves displayed :”—
such was the virtue of (kings) Wăn and Wû.

9. ‘As to the kings (who founded) the three dynasties, it was necessary that they should be preceded by the fame of their forefathers. As it is said in the Book of Poetry (III, iii, ode 8, 6),

“Very intelligent were the sons of Heaven,
Their good fame was without end :”—

such was the virtue of (the founders) of the three dynasties.

‘ (And again),

“ He displayed his civil virtues,

And they permeated all parts of the kingdom:”—
such was the virtue of king Thái.’

10. 3ze-hsiâ rose up with a sudden joy, and, standing with his back to the wall, said, ‘ Your disciple dares not but receive (your instructions) with reverence.’

BOOK XXVII. FANG K'Ī

OR

RECORD OF THE DYKES¹.

1. According to what the Masters said, the ways laid down by the superior men may be compared to dykes, the object of which is to conserve that in which the people may be deficient; and though they may be on a great scale, the people will yet pass over them. Therefore the superior men framed rules of ceremony for the conservation of virtue; punishments to serve as a barrier against licentiousness; and declared the allotments (of Heaven), as a barrier against evil desires².

2. The Master said, 'The small man, when poor, feels the pinch of his straitened circumstances; and when rich, is liable to become proud. Under the pinch of that poverty he may proceed to steal; and when proud, he may proceed to deeds of disorder. The rules of propriety recognise these feelings of men, and lay down definite regulations for them, to serve as dykes for the people. Hence the sages dealt with riches and honours, so that riches should

¹ See the introductory notice, vol. xxvii, pp. 41, 42.

² Any reader acquainted with Chinese will see that the character fang (坊) is used substantively and meaning 'a dyke,' and as a verb, 'to serve as a dyke.' But a dyke has two uses:—to conserve what is inside it, preventing its flowing away; and to ward off what is without, barring its entrance and encroachment. So the character is here used in both ways. The *K'ien-lung* editors insist on this twofold application of it, tersely and convincingly.

not have power to make men proud; that poverty should not induce that feeling of being pinched; and that men in positions of honour should not be intractable to those above them. In this way the causes of disorder would more and more disappear.'

3. The Master said, 'Under heaven the cases are few in which the poor yet find enjoyment¹, the rich yet love the rules of propriety, and a family that is numerous (and strong) yet remains quiet and at peace. As it is said in the Book of Poetry (III, iii, ode 3, 11),

"The people desire disorder,
And find enjoyment in bitter, poisonous ways."

Hence it was made the rule that no state should have more than 1000 chariots, no chief city's wall more than 100 embrasures, no family, however rich, more than 100 chariots. These regulations were intended for the protection of the people, and yet some of the lords of states rebelled against them.'

4. The Master said, 'It is by the rules of ceremony that what is doubtful is displayed, and what is minute is distinguished, that they may serve as dykes for the people. Thus it is that there are the grades of the noble and the mean, the distinctions of dress, the different places at court; and so the people (are taught to) give place to one another.'

5. The Master said, 'There are not two suns in the sky, nor two kings in a territory, nor two masters in a family, nor two superiors of equal honour; and the people are shown how the distinction between ruler and subject should be maintained.

¹ Literally, 'the poor are fond of (enjoyment);' but the 'fond of' is acknowledged to be an addition to the text.

The *Khün Khiû* does not mention the funeral rites for the kings of *Khiû* and *Yüeh*. According to the rules, the ruler of a state is not spoken of as "Heaven's," and a Great officer is not spoken of as "a ruler;"—lest the people should be led astray. It is said in the ode,

"Look at (that bird) which in the night calls out for the morning¹."

Even this is still occasion for being dissatisfied with it.'

6. The Master said, 'A ruler does not ride in the same carriage with those of the same surname with himself; and when riding with those of a different surname, he wears a different dress;—to show the people that they should avoid what may give rise to suspicion. This was intended to guard the people (from incurring suspicion), and yet they found that there were those of the same surname who murdered their ruler².'

7. The Master said, 'The superior man will decline a position of high honour, but not one that is mean; and riches, but not poverty. In this way confusion and disorder will more and more disappear. Hence the superior man, rather than have his emoluments superior to his worth, will have his worth superior to his emoluments.'

8. The Master said, 'In the matter of a cup of liquor and a dish of meat, one may forego his claim and receive that which is less than his due;

¹ This is from one of the old pieces, which have been forgotten and lost. Is the bird alluded to the cock? and where is the point of the reference?

² The *Khien-lung* editors labour in vain to make this paragraph clear, and say that it is 'an error of errors' to ascribe it to Confucius.

and yet the people will try to obtain more than is due to their years. When one's mat has been spread for him in a high place, he may move and take his seat on a lower; and yet the people will try to occupy the place due to rank. From the high place due to him at court one may in his humility move to a meaner place; and yet the people shall be intrusive even in the presence of the ruler. As it is said in the Book of Poetry (II, vii, ode 9, 4),

“When men in disputations fine
To hear their consciences refuse,
Then 'gainst each other they repine,
And each maintains his special views.
If one a place of rank obtain,
And scorn humility to show,
The others view him with disdain,
And, wrangling, all to ruin go.”

9. The Master said, ‘The superior man exalts others and abases himself; he gives the first place to others and takes the last himself;—and thus the people are taught to be humble and yielding. Thus when he is speaking of the ruler of another state, he calls him “The Ruler;” but when mentioning his own ruler, he calls him “Our ruler of little virtue.”’

10. The Master said, ‘When advantages and rewards are given to the dead first¹, and to the living afterwards, the people will not act contrarily to the (character of) the dead. When (the ruler) places those who are exiles (from and for their state) first, and those who remain in it last, the people may be

¹ The memory of the dead would be honoured, and titles given to them, while those they left behind would be supported.

trusted with (the most arduous duties). It is said in the Book of Poetry (I, iii, ode 3, 4),

“In thinking of our deceased lord,
She stimulated worthless me.”

When this dyke is set up for the people, will they still act contrarily to the dead and have to bewail their lot, with none to whom to appeal?’

11. The Master said, ‘When the ruler of a state, with its clans, thinks much of the men and little of the emoluments (which he bestows on them), the people give place readily (to those men). When he thinks much of their ability, and little of the chariots (with which he rewards them), the people address themselves to elegant arts. Hence a superior man keeps his speech under control, while the small man is forward to speak.’

12. The Master said, ‘If superiors consider and are guided by the words of the people, the people receive their gifts or commands as if they were from Heaven. If superiors pay no regard to the words of the people, the people put themselves in opposition to them. When inferiors do not receive the gifts of their superiors as if they were from Heaven, there ensues violent disorder. Hence, when the superior exhibits his confidence and courtesy in the government of the people, then the usages of the people in response to him are very great. It is said in the Book of Poetry (III, ii, ode 10, 3),

“Remember what in days of old they spake,
With grass and fuel-gatherers counsel take.”

13. The Master said, ‘If (the ruler) ascribe what is good to others, and what is wrong to himself, the

people will not contend (among themselves). If he ascribe what is good to others, and what is wrong to himself, dissatisfactions will more and more disappear. It is said in the Book of Poetry (I, v, ode 4, 2),

“You had consulted the tortoise-shell; you had consulted the stalks;

In their responses there was nothing unfavourable.”

14. The Master said, ‘If (the ruler) ascribe what is good to others and what is wrong to himself, the people will yield to others (the credit of) what is good in them. It is said in the Book of Poetry (III, i, ode 10, 7),

“He examined and divined, did the king,

About settling in the capital of Hào.

The tortoise-shell decided the site,

And king Wû completed the city.”

15. The Master said, ‘If (ministers) ascribe what is good to their ruler and what is wrong to themselves, the people will become loyal. It is said in the Book of History (V, xxi, 6),

“When you have any good plans or counsels, enter and lay them before your ruler in the court; and thereafter, when you are acting abroad in accordance with them, say, ‘This plan, or this view, is all due to the virtue of our ruler!’ Oh! in this way how good and distinguished will you be!”

16. The Master said, ‘If (a ruler, being a son,) ascribe what is good to his father, and what is wrong to himself, the people will become filial. It is said in “The Great Declaration,” “If I subdue K’âu, it will not be my prowess, but the faultless virtue of

my deceased father Wăn. If Kâu subdues me, it will not be from any fault of my deceased father Wăn, but because I, who am as a little child, am not good" (Shû, V, i, sect. 3, 6).

17. The Master said, 'A superior man will forget and not make much of the errors of his father, and will show his reverence for his excellence. It is said in the Lun Yü (I, xi), "He who for three years does not change from the way of his father, may be pronounced filial;" and in the Káo Jung (Shû, III, viii, 1) it is said, "For three years he kept without speaking; when he did speak, they were delighted."'

18. The Master said, 'To obey (his parents') commands without angry (complaint); to remonstrate with them gently without being weary; and not to murmur against them, though they punish him, may be pronounced filial piety. It is said in the Book of Poetry (III, ii, ode 3, 5),

"Your filial son was unceasing in his service."

19. The Master said, 'To cultivate harmony with all the kindred of parents may be pronounced filial! It is said in the Book of Poetry (II, vii, ode 9, 3),

"Brethren whose virtue stands the test,
By bad example still unchanged,
Their generous feelings manifest,
Nor grow among themselves estranged.
But if their virtue weakly fails
The evil influence to withstand,
Then selfishness o'er love prevails,
And troubles rise on every hand."

20. The Master said, '(A son) may ride in the chariot of an intimate friend of his father, but he

should not wear his robes. By this (rule) the superior man widens (the sphere of) his filial duty.'

21. The Master said, 'Small men are all able to support their parents. If the superior man do not also reverence them, how is his supporting to be distinguished (from theirs)?'

22. The Master said, 'Father and son should not be in the same (official) position;—to magnify the reverence (due to the father). It is said in the Book of History (Shû, III, v, sect. 1, 3), "If the sovereign do not show himself the sovereign, he disgraces his ancestors."'

23. The Master said, 'Before his parents (a son) should not speak of himself as old; he may speak of the duty due to parents, but not of the gentle kindness due from them; inside the female apartments he may sport, but should not sigh. By these (rules) the superior man would protect the people (from evil), and still they are found slight in their acknowledgment of filial duty, and prompt in their appreciation of gentle kindness.'

24. The Master said, 'When they who are over the people show at their courts their respect for the old, the people become filial.'

25. The Master said, 'The (use of) the representatives of the deceased at sacrifices, and of one who presides (at the services) in the ancestral temple, was intended to show the people that they had still those whom they should serve. The repairing of the ancestral temple and the reverential performance of the sacrifices were intended to teach the people to follow their dead with their filial duty. These things should guard the people (from evil), and still they are prone to forget their parents.'

26. The Master said, 'When (it is wished to) show respect (to guests), the vessels of sacrifice are used¹. Thus it is that the superior man will not in the poverty of his viands neglect the rules of ceremony, nor in their abundance and excellence make those rules disappear. Hence, according to the rules of feasting, when the host gives in person anything to a guest, the guest offers a portion in sacrifice, but he does not do so with what the host does not himself give him. Therefore, when there is no ceremony in the gift, however admirable it may be, the superior man does not partake of it.] It is said in the Yî, "The ox slain in sacrifice by the neighbour on the east is not equal to the spare spring sacrifice of the neighbour on the west, (whose sincerity) receives the blessing²." It is said in the Book of Poetry (III, ii, ode 3, 1),

"You have made us drink to the full of your spirits,

You have satiated us with your virtue."

But though in this way the people are admonished, they will still keep striving after profit, and forget righteousness.'

27. The Master said, 'There are the seven days of fasting, and the three days of vigil and adjustment of the thoughts; there is the appointment of the one man to act as the personator of the dead, in passing whom it is required to adopt a hurried pace:—all to teach reverence (for the departed).'

¹ This would be in the entertainment, at the close of the sacrifices, given to the relatives and others who had taken part in them.

² This is the symbolism of the fifth line of the 63rd Hexagram (K'î 3î). See vol. xvi, pp. 206-208.

The sweet liquor is in the apartment (where the personator is); the reddish in the hall; and the clear in the court below :—all to teach the people not to go to excess in being greedy¹.

The personator drinks three cups, and all the guests drink one :—teaching the people that there must be the distinction of high and low.

The ruler takes the opportunity of the spirits and flesh of his sacrifice to assemble all the members of his kindred :—teaching the people to cultivate harmony.

Thus it is that on the hall above they look at what is done in the apartment, and in the court below at what is done by those in the hall (for their pattern) ; as it is said in the Book of Poetry (II, vi, ode 5, 3),

‘ Every form is according to rule ;

Every smile and word is as it should be.’

28. The Master said, ‘The giving place to a visitor at every stage of his advancing (from the entrance gate), according to the rules for visitors ; and the repetition of the ceremonies, according to the mourning rites, in an ever-increasing distance from the apartment of the corpse ; the washing of the corpse over the pit in the centre of the open court ; the putting the rice into the mouth under the window ; the slighter dressing of the corpse inside the door of the apartment ; the greater dressing at the top of the steps on the east ; the coffining in the place for guests ; the sacrifice on taking the road (with the coffin) in the courtyard ; and the interment in the grave :—these were intended to teach the people how the element of distance enters into the

¹ The best liquor was in the lowest place.

usages. Under the Yin dynasty they consoled with the mourners at the grave ; they do so under *K'âu* in the house :—showing the people that they should not neglect the custom.'

The Master said, '(These services in connexion with) death are the last duties which the people have to pay (to their departed). I follow *K'âu* in them. They were intended to serve as guards to the people (to keep them from error). Among the princes, however, there still were those who did not attend the burials of other princes, and take part in them¹.'

29. The Master said, 'The going up to the hall by the steps for the guests, and receiving the condolences sent to him in the guests' place, are designed to teach the filial to continue their filial duty even to the dead.

'Until the mourning rites are finished, a son is not styled "Ruler:"—showing the people that there ought to be no contention (between father and son). Hence in the *K'hun K'hiû* of Lû, recording deaths in 3in, it is said, "(Lî Kho) killed Hsî-k'hi, the son of his ruler, and his ruler *K'ho*²:"—a barrier was thus raised to prevent the people (from doing such deeds). And yet there were sons who still murdered their fathers.'

30. The Master said, 'Filial duty may be transferred to the service of the ruler, and brotherly sub-

¹ It is not easy to determine the meaning of the text in this sentence. Chinese writers differ about it among themselves. The whole paragraph, indeed, is confused ; and the second 'The Master said' should probably form a paragraph by itself.

² This forms two entries in the *K'hun K'hiû*, under the ninth and tenth years of duke Hsî. The first notice is according to the rule about a son of a feudal prince being still only called 'Son' till the mourning for his father was completed, and the second is contrary to it. The concluding remark is also away from the point.

mission to the service of elders :—showing the people that they ought not to be double-minded. Hence a superior man, while his ruler is alive, should not take counsel about taking office (in another state). It is only on the day of his consulting the tortoise-shell (about such a thing) that he will mention two rulers¹.

‘The mourning for a father lasts for three years, and that for a ruler the same time :—showing the people that they must not doubt (about the duty which they owe to their ruler).

‘While his parents are alive, a son should not dare to consider his wealth as his own, nor to hold any of it as for his own private use :—showing the people how they should look on the relation between high and low. Hence the son of Heaven cannot be received with the ceremonies of a guest anywhere within the four seas, and no one can presume to be his host. Hence, also, when a ruler goes to a minister’s (mansion) he goes up to the hall by the (host’s) steps on the east and proceeds to the place (of honour) in the hall : showing the people that they should not dare to consider their houses their own.

‘While his parents are alive, the gifts presented to a son should not extend to a carriage and its team :—showing the people that they should not dare to monopolise (any honours).

‘All these usages were intended to keep the people from transgressing their proper bounds ; and yet there are those who forget their parents, and are double-minded to their ruler.’

31. The Master said, ‘The ceremony takes place before the silks (offered in connexion with it) are

¹ The translation here is according to a view appended by the *Khien-lung* editors to the usual notes on the sentence.

presented :—this is intended to teach the people to make the doing of their duties the first thing, and their salaries an after consideration. If money be sought first and the usages of propriety last, then the people will be set on gain : if the mere feeling be acted on, without any expressions (of courtesy and deference), there will be contentions among the people. Hence the superior man, when presents are brought to him, if he cannot see him who offers them, does not look at the presents. It is said in the Yí, “ He reaps without having ploughed that he may reap ; he gathers the produce of the third year’s field without having cultivated them the first year ;—there will be evil¹. ” In this way it is sought to guard the people, and yet there are of them who value their emoluments and set little store by their practice.’

32. The Master said, ‘The superior man does not take all the profit that he might do, but leaves some for the people. It is said in the Book of Poetry (II, vi, ode 8, 3),

“ There shall be handfuls left on the ground,
And ears here and there left untouched ;—
For the benefit of the widow.”

‘Hence, when a superior man is in office (and enjoys its emoluments), he does not go in for farming ; if he hunts, he does not (also) fish ; he eats the (fruits of the) season, and is not eager for delicacies ; if a Great officer, he does not sit on sheepskins ; if a lower officer, he does not sit on dogskins. It is said in the Book of Poetry (I, iii, ode 10, 1),

¹ See the symbolism of line 2, of the 25th Hexagram, vol. xvi, pp. 110, 111. The last character here is not in the Yí, and a different moral seems to be drawn from the whole.

"When we gather the mustard-plant and earth-melons,
We do not reject them because of their roots.
While I do nothing contrary to my good name,
I should live with you till our death."

In this way it was intended to guard the people against loving wrong; and still some forget righteousness and struggle for gain, even to their own ruin.'

33. The Master said, 'The ceremonial usages serve as dykes to the people against bad excesses (to which they are prone). They display the separation which should be maintained (between the sexes), that there may be no occasion for suspicion, and the relations of the people be well defined. It is said in the Book of Poetry (I, viii, ode vi, 3, 4),

"How do we proceed in hewing an axe-handle?
Without another axe it cannot be done.
How do we proceed in taking a wife?
Without a go-between it cannot be done.
How do we proceed in planting hemp?
The acres must be dressed length-wise and cross-wise.

How do we proceed in taking a wife?
Announcement must first be made to our parents."

In this way it was intended to guard the people (against doing wrong), and still there are some (women) among them, who offer themselves (to the male).'

34. The Master said, 'A man in taking a wife does not take one of the same surname with himself:—to show broadly the distinction (to be maintained between man and wife). Hence, when a man is buying a concubine, if he do not know her surname,

he consults the tortoise-shell about it. In this way it was intended to preserve the people (from going wrong in the matter); and yet the *Khun Khiu* of Lû still suppresses the surname of duke *Kào*'s wife, simply saying "Wû," and the record of her death is "Măng (the elder) 3ze died¹."

35. The Master said, 'According to the rules, male and female do not give the cup to one another, excepting at sacrifice. This was intended to guard the people against (undue freedom of intercourse); and yet the marquis of Yang killed the marquis of Mû, and stole away his wife². Therefore the presence of the wife at the grand entertainments was disallowed.'

36. The Master said, 'With the son of a widow one does not have interviews :—this would seem to be an obstacle to friendship, but a superior man will keep apart from intercourse in such a case, in order to avoid (suspicion). Hence, in the intercourse of friends, if the master of the house be not in, a visitor, unless there is some great cause, does not enter the door. This was intended to preserve the people (from all appearance of evil); and yet there are of them who pay more regard to beauty than to virtue.'

37. The Master said, 'The love of virtue should be like the love of beauty (from an inward constraint). Princes of states should not be like fishers for beauty

¹ The latter entry is found in the *Khun Khiu*, under the twelfth year of duke *Âi*. The lady's surname is not found in that *King* at all; and Confucius himself probably suppressed it. Compare what is said in the *Analects*, VII, 30, where the sage, on the same subject, does not appear to more advantage than he does here.

² Who these princes were, or what were the circumstances of the case, is not known.

(in the families) below them. Hence the superior man keeps aloof from beauty, in order to constitute a rule for the people. Thus male and female, in giving and receiving, do not allow their hands to touch; in driving his wife in a carriage, a husband advances his left hand; when a young aunt, a sister, or a daughter has been married, and returns (to her father's house), no male can sit on the same mat with her; a widow should not wail at night; when a wife is ill, in asking for her, the nature of her illness should not be mentioned:—in this way it was sought to keep the people (from irregular connexions); and yet there are those who become licentious, and introduce disorder and confusion among their kindred.'

38. The Master said, 'According to the rules of marriage, the son-in-law should go in person to meet the bride. When he is introduced to her father and mother, they bring her forward, and give her to him¹:—being afraid things should go contrary to what is right. In this way a dyke is raised in the interest of the people; and yet there are cases in which the wife will not go (to her husband's)².'

¹ 'Warning her, at the same time, to see that she revered her husband.'

² We should rather say here—'in which the bride will not go to the bridegroom's.' The commentators do not give instances in point from the records of Chinese history. Perhaps the Master merely meant to say that there were cases in which the bride did not go to her new home in the spirit of reverence and obedience enjoined upon her.

BOOK XXVIII. KUNG YUNG

OR

THE STATE OF EQUILIBRIUM AND HARMONY¹.

SECTION I.

1. What Heaven has conferred is called the Nature. An accordance with this nature is called the Path of Duty; the regulation of this path is called the System of Instruction.

2. The path should not be left for an instant; if it could be left, it would not be the path.

3. On this account the superior man does not wait till he sees things to be cautious, nor till he hears things to be apprehensive.

4. There is nothing more visible than what is secret, and nothing more manifest than what is minute. Therefore the superior man is watchful over himself when he is alone.

5. When there are no stirrings of pleasure, anger, sorrow, or joy, we call it the State of Equilibrium. When those feelings have been stirred, and all in their due measure and degree, we call it the State of Harmony. This Equilibrium is the great root (from which grow all the human actings) in the world; and this Harmony is the universal path (in which they should all proceed).

6. Let the State of Equilibrium and Harmony exist in perfection, and heaven and earth

¹ See the introductory notice, vol. xxvii, pp. 42, 43.

would have their (right) places, (and do their proper work), and all things would be nourished (and flourish)¹.

7. *Kung-nt*² said, 'The superior man (exhibits) the state of equilibrium and harmony³; the small

¹ These six short paragraphs may be considered a summary of the Confucian doctrine, and a sort of text to the sermon which follows in the rest of the Treatise;—the first chapter of it. The commencing term, Heaven, gives us, vaguely, the idea of a supreme, righteous, and benevolent Power; while 'heaven and earth,' in paragraph 6, bring before us the material heaven and earth with inherent powers and capabilities, by the interaction of which all the phenomena of production, growth, and decay are produced. Midway between these is Man; and nothing is wanting to make a perfectly happy world but his moral perfection, evidenced by his perfect conformity to the right path, the path of duty. 'The superior man,' in paragraph 3, has evidently the moral signification of the name in its highest degree. He is the man 'who embodies the path (體道之人).' The description of him in paragraph 4, that 'he is watchful over himself when alone,' is, literally, that 'he is watchful over his solitariness,—his aloneness,' that 'solitariness' being, I conceive, the ideal of his own nature to which every man in his best and highest moments is capable of attaining.

² See the introductory notice of Book XXV.

³ Formerly I translated this by 'The superior man (embodies) the course of the mean.' Zottoli gives for it, 'Sapiens vir tenet medium;' Rémusat, 'Le sage tient invariablement le milieu,' and 'Sapiens medio constat.' The two characters *Kung yung* (中庸), however, are evidently brought on from the preceding chapter, *yung* (庸) being used instead of the *ho* (和) in paragraphs 5 and 6. In the *Khang-hsi* dictionary, we find that *yung* is defined by *ho*, among other terms, with a reference to a remark of *K'ang Hsi*ün, preserved by *Lü Teh-ming*, that 'the Book is named the *Kung Yung*, because it records the practice of the *Kung Ho*.' *K'ang* was obliged to express himself so, having defined the *yung* of the title by another *yung* (用), meaning 'use' or 'practice.' But both *kung* and *yung* are adjectival terms used substantively.

man presents the opposite of those states. The superior man exhibits them, because he is the superior man, and maintains himself in them; the small man presents the opposite of them, because he is the small man, and exercises no apprehensive caution.'

8. The Master said, 'Perfect is the state of equilibrium and harmony! Rare have they long been among the people who could attain to it!'

9. The Master said, 'I know how it is that the Path is not walked in. The knowing go beyond it, and the stupid do not come up to it. The worthy go beyond it, and the unworthy do not come up to it. There is nobody but eats and drinks; but they are few who can distinguish the flavours (of what they eat and drink)¹.'

10. The Master said, 'Ah! how is the path untrodden!'

11. The Master said, 'Was not Shun grandly wise? Shun loved to question others, and to study their words though they might be shallow. He concealed what was bad (in them), and displayed what was good. He laid hold of their two extremes, determined the mean² between them, and used it in (his government of) the people. It was this that made him Shun!'

12. The Master said, 'Men all say, "We are wise;" but being driven forward and taken in a net, a trap, or a pitfall, not one of them knows how to escape. Men all say, "We are wise;" but when they have chosen the state of equilibrium and harmony, they are not able to keep in it for a round month.'

¹ Men eat and drink without knowing why or what.

² Here *Kung* has the signification of 'the mean,' the just medium between two extremes.

13. The Master said, 'This was the character of Hui :—Having chosen the state of equilibrium and harmony, when he found any one thing that was good, he grasped it firmly, wore it on his breast, and did not let it go¹.'

14. The Master said, 'The kingdom, its states, and clans may be perfectly ruled ; dignities and emoluments may be declined ; but the state of equilibrium and harmony cannot be attained to.'

15. 3ze-lû² asked about fortitude. 16. The Master said, 'Do you mean the fortitude of the South, the fortitude of the North, or your fortitude ?' 17. To show forbearance and gentleness in teaching others ; and not to return conduct towards one's self which is contrary to the right path :—this is the fortitude of the South, and the good man makes it his study. 18. To lie under arms, and to die without regret :—this is the bravery of the North, and the bold make it their study. 19. Therefore, the superior man cultivates a (friendly) harmony, and is not weak ;—how firm is he in his fortitude ! He stands erect in the middle, and does not incline to either side ;—how firm is he in his fortitude ! If right ways prevail in (the government of his state), he does not change from what he was in retirement ;—how firm is he in his fortitude ! If bad ways prevail, he will die sooner than change ;—how firm is he in his fortitude !'

20. The Master said, 'To search for what is

¹ 3ze-hui was Yen Yüan, Confucius' favourite disciple.

² 3ze-lû was K'ung Yü, another celebrated disciple, famous for his bravery. 'Your fortitude,' in paragraph 16, is probably the fortitude which you ought to cultivate, that described in paragraph 19.

mysterious¹, and practise marvellous (arts), in order to be mentioned with honour in future ages :—this is what I do not do. 21. The good man tries to proceed according to the (right) path, but when he has gone half-way, he abandons it ;—I am not able (so) to stop. 22. The superior man, acting in accordance with the state of equilibrium and harmony, may be all unknown and unregarded by the world, but he feels no regret :—it is only the sage who is able for this².

23. ‘The way of the superior man reaches far and wide, and yet is secret. 24. Common men and women, however ignorant, may intermeddle with the knowledge of it ; but in its utmost reaches there is that which even the sage does not know. Common men and women, however much below the ordinary standard of character, can carry it into practice ; but in its utmost reaches, there is that which even the sage cannot attain to. 25. Great as heaven and earth are, men still find things in their action with which to be dissatisfied³.

26. ‘Therefore, if the superior man were to speak (of this way) in its greatness, nothing in the world would be able to contain it ; and if he were to speak of it in its smallness, nothing in the world would be

¹ This is translated from a reading of the text, as old as the second Han dynasty.

² With this ends the second chapter of the Treatise, in which the words of Confucius are so often quoted ; specially it would appear, to illustrate what is meant by ‘the state of equilibrium and harmony.’ Yet there is a great want of definiteness and practical guidance about the utterances.

³ Who does not grumble occasionally at the weather, and disturbances apparently of regular order in the seasons ?

found able to divide it. 27. It is said in the Book of Poetry (III, i, ode 5),

“Up to heaven flies the hawk;
Fishes spring in the deep,”

telling how (the way) is seen above and below.

28. The way of the superior man may be found in its simple elements among common men and women, but in its utmost reaches it is displayed in (the operations of) heaven and earth¹.

29. The Master said, ‘The path is not far from man. When men try to pursue a path which is far from what their nature suggests, it should not be considered the Path. 30. It is said in the Book of Poetry (I, xv, ode 5),

“In hewing an axe-shaft, in hewing an axe-shaft,
The pattern is not far off.”

We grasp one axe-handle to hew the other; but if we look askance at it, we still consider it far off.

31. Therefore the superior man governs men according to their humanity; and when they change (what is wrong), he stops. 32. Fidelity to one’s self and the corresponding reciprocity are not far from the path. What you do not like when done to yourself, do not do to others. 33. In the way of the superior man there are four things, to not one of which have I, *K’hiu*², as yet attained.—To

¹ With this chapter commences, it is commonly and correctly held, the third part of the Treatise, intended to illustrate what is said in the second paragraph of it, that ‘the path cannot be left for an instant.’ The author proceeds to quote sayings of Confucius to make his meaning clear, but he does so ‘in a miscellaneous way,’ and so as to embrace some of the widest and most difficult exercises of Chinese thought.

² The name first given to Confucius by his parents.

serve my father as I would require my son to serve me, I am not yet able ; to serve my ruler as I would require my minister to serve me, I am not yet able ; to serve my elder brother as I would require a younger brother to serve me, I am not yet able ; to set the example in behaving to a friend as I would require him to behave to me, I am not yet able. 34. In the practice of the ordinary virtues, and attention to his ordinary words, if (the practice) be in anything defective, (the superior man) dares not but exert himself ; if (his words) be in any way excessive, he dares not allow himself in such license. His words have respect to his practice, and his practice has respect to his words. 35. Is not the superior man characterised by a perfect sincerity ?

36. ' The superior man does what is proper to the position in which he is ; he does not wish to go beyond it. In a position of wealth and honour, he does what is proper to a position of wealth and honour. In a position of poverty and meanness, he does what is proper to a position of poverty and meanness. Situated among barbarous tribes, he does what is proper in such a situation. In a position of sorrow and difficulty, he does what is proper in such a position. The superior man can find himself in no position in which he is not himself. 37. In a high situation, he does not insult or oppress those who are below him ; in a low situation, he does not cling to or depend on those who are above him.

38. ' He rectifies himself, and seeks for nothing from others ; and thus none feel dissatisfied with him. Above, he does not murmur against Heaven ; below, he does not find fault with men. 39. Therefore the superior man lives quietly and calmly, waiting for the

appointments (of Heaven); while the mean man does what is full of risk, looking out for the turns of luck.' 40. The Master said, 'In archery we have something like (the way of) the superior man. When the archer misses the centre of the target, he turns round and seeks for the cause of his failure in himself.

41. 'The way of the superior man may be compared to what takes place in travelling, when to go far we must traverse the space that is near, and in ascending a height we must begin from the lower ground. 42. It is said in the Book of Poetry (II, i, ode 4, 7, 8),

"Children and wife we love;
Union with them is sweet,
As lute's soft strain, that soothes our pain.
How joyous do we meet!
But brothers more than they
Can satisfy the heart.
'Tis their accord does peace afford,
And lasting joy impart.
For ordering of your homes,
For joy with child and wife,
Consider well the truth I tell;—
This is the charm of life!"

43. The Master said, 'How complacent are parents (in such a state of things)!'

44. The Master said, 'How abundant and rich are the powers possessed and exercised by Spiritual Beings! We look for them, but do not see them; we listen for, but do not hear them; they enter into all things, and nothing is without them¹. 45. They

¹ We hardly see the relevancy of pars. 44-47 as illustrating the

cause all under Heaven to fast and purify themselves, and to array themselves in their richest dresses in order to attend at their sacrifices. Then, like overflowing water, they seem to be over the heads, and on the left and right (of their worshippers). 46. It is said in the Book of Poetry (III, iii, ode 2, 7),

“The Spirits come, but when and where,
No one beforehand can declare.
The more should we not Spirits slight,
But ever feel as in their sight.”

47. ‘Such is the manifestness of what is minute. Such is the impossibility of repressing the outgoings of sincerity!’

48. The Master said, ‘How greatly filial was Shun! His virtue was that of a sage; his dignity was that of the son of Heaven; his riches were all within the four seas; his ancestral temple enjoyed his offerings; his descendants preserved (those to) himself. 49. Thus it was that with his great virtue he could not but obtain his position, his riches, his fame, and his long life. 50. Therefore Heaven, in

statement that ‘the path cannot be left.’ They bear rather on the next statement of the first chapter, the manifestness of that which is most minute, and serve to introduce the subject of ‘sincerity,’ which is dwelt upon so much in the last part of the Treatise. But what are the Spirits or Spiritual Beings that are spoken of? In paragraphs 45, 46, they are evidently the spirits sacrificed to in the ancestral temple and spirits generally, according to our meaning of the term. The difficulty is with the name in paragraph 44, the Kwei Shān there. Rémusat renders the phrase simply by ‘les esprits,’ and in his Latin version by ‘spiritus genii que,’ as also does Zottoli. Wylie gives for it ‘the Spiritual Powers.’ Of course K’au Hsi and all the Sung scholars take it, according to their philosophy, as meaning the phenomena of expansion and contraction, the displays of the Power or Powers, working under Heaven, in nature.

producing things, is sure to be bountiful to them according to their qualities. 51. Thus it nourishes the tree that stands flourishing, and that which is ready to fall it overthrows. 52. It is said in the Book of Poetry (III, ii, ode 5, 1),

“What brilliant virtue does our king,
Whom all admire and love, display!
People and officers all sing
The praise of his impartial sway.
Heaven to his sires the kingdom gave,
And him with equal favour views,
Heaven's strength and aid will ever save
The throne whose grant it oft renews.”

Hence (we may say that) he who is greatly virtuous is sure to receive the appointment (of Heaven).’

53. The Master said, ‘It is only king Wăn of whom it can be said that he had no cause for grief! His father was king Kî, and his son was king Wû. His father laid the foundations of his dignity, and his son transmitted it. 54. King Wû continued the line and enterprise of kings Thái, Kî, and Wăn. Once for all he buckled on his armour, and got possession of all under heaven; and all his life he did not lose the illustrious name of being that possessor. His dignity was that of the son of Heaven; his riches were all within the four seas; his ancestral temple enjoyed his offerings; and his descendants preserved those to himself. 55. It was in his old age that king Wû received the appointment (to the throne), and the duke of Kâu completed the virtuous achievements of Wăn and Wû. He carried back the title of king to Thái and Kî, sacrificing also to all the dukes before them with the ceremonies of the son

of Heaven. And the practice was extended as a rule to all the feudal princes, the Great officers, all other officers, and the common people. If the father were a Great officer, and the son an inferior officer, the former was buried with the ceremonies due to a Great officer, and sacrificed to with those due by an inferior officer. If the father were an ordinary officer, and the son a Great officer, the burial was that of an ordinary officer, and the sacrifices those of a Great officer. The one year's mourning extended up to Great officers; the three years' mourning extended to the son of Heaven (himself). In the mourning for a father or mother no difference was made between the noble and the mean;—it was one and the same for all.'

56. The Master said, 'How far-extending was the filial piety of king Wû and the duke of Kâu! Now filial piety is the skilful carrying out of the wishes of our forefathers, and the skilful carrying on of their undertakings. In spring and autumn¹ they repaired and beautified the temple-halls of their ancestors, set forth their ancestral vessels, displayed their dresses, and presented the offerings of the several seasons. 57. By means of the ceremonies of the ancestral temple, they maintained the order of their ancestors sacrificed to, here on the left, there on the right, according as they were father or son; by arranging the parties present according to their rank, they distinguished between the more noble and the less; by the arrangement of the various services, they made a distinction of the talents and virtue of

¹ Two seasons, instead of the four, as in the title of the *K'zun K'hiu*.

those discharging them ; in the ceremony of general pledging, the inferiors presented the cup to the superiors, and thus something was given to the lowest to do ; at the (concluding) feast, places were given according to the hair, and thus was made the distinction of years. 58. They occupied the places (of their forefathers) ; practised their ceremonies ; performed their music ; showed their respect for those whom they honoured ; and loved those whom they regarded with affection. Thus they served the dead as they served them when alive, and served the departed as they would have served them if they had been continued among them :—all this was the perfection of filial duty.

59. 'By the ceremonies of the border sacrifices (to Heaven and Earth) they served God, and by those of the ancestral temple they sacrificed to their forefathers¹. 60. If one understood the ceremonies of the border sacrifices and the meaning of the sacrifices of the ancestral temple, it would be as easy for him to rule a state as to look into his palm².'

¹ The phraseology of this paragraph and the next is to be taken in accordance with the usage of terms in the chapters on Sacrifices.

² With this ends, according to the old division of the Treatise, followed by the *Khien-lung* editors, the first section of it ; and with it, we may say, ends also the special quotation by the author of the words of Confucius to illustrate what is said in the first chapter about the path being never to be left. The relevancy of much of what we read from paragraph 24 downwards to the purpose which it is said to serve, it is not easy for us to appreciate. All that the Master says from paragraph 48 seems rather to belong to a Treatise on Filial Piety than to one on the States of Equilibrium and Harmony.

SECTION II.

1. Duke Āi asked about government¹. The Master said, 'The government of Wăn and Wû is exhibited in (the Records),—the tablets of wood and bamboo. Let there be the men, and their government would (again) flourish; but without the men, their government must cease. 2. With the (right) men the growth of government is rapid, (just as) in the earth the growth of vegetation is rapid. 3. Government is (like) an easily-growing rush². 4. Therefore the exercise of government depends on (getting) the proper men. 5. (Such) men are to be got by (the ruler's) own character. That character is to be cultivated by his pursuing the right course. That course is to be cultivated by benevolence. 6. Benevolence is (the chief element in) humanity³, and the greatest exercise of it is in the love of relatives. Righteousness is (the accordance of actions with) what is right, and the greatest exercise of it is in the honour paid to the worthy. The decreasing

¹ A considerable portion of this chapter, with variations and additions, is found in the Narratives of the School, forming the 17th article of that compilation. It may very well stand by itself; but the author of the *Kung Yung* adopted it, and made it fit into his own way of thinking.

² Literally, 'a typha or a phragmites.' Such is *Kû Hsi*'s view of the text. The old commentators took a different view, which appears to me, and would appear to my readers, very absurd.

³ Literally, 'Benevolence is Man (仁者人也);' a remarkable saying, found elsewhere in the *LĪ KĪ*, and also in Mencius. The value of it is somewhat marred by what follows about 'righteousness' and 'propriety.'

measures in the love of relatives, and the steps in the honour paid to the worthy, are produced by (the principle of) propriety. 7. When those in inferior situations do not obtain (the confidence of) their superiors, the people cannot be governed successfully¹. 8. Therefore the wise ruler should not neglect the cultivation of his character. Desiring to cultivate his character, he should not neglect to serve his parents. Desiring to serve his parents, he should not neglect to know men. Desiring to know men, he should not neglect to know Heaven. 9. The universal path for all under heaven is five-fold, and the (virtues) by means of which it is trodden are three. There are ruler and minister; father and son; husband and wife; elder brother and younger; and the intercourse of friend and friend:—(the duties belonging to) these five (relationships) constitute the universal path for all. Wisdom, benevolence, and fortitude:—these three are the universal virtues of all. That whereby these are carried into exercise is one thing². 10. Some are born with the knowledge of these (duties); some know them by study; and some know them as the result of painful experience. But the knowledge being possessed, it comes to one and the same thing. 11. Some practise them with the ease of nature; some for the sake of their advantage; and some by

¹ This short sentence is evidently out of place. It is found again farther on in its proper place. It has slipped in here by mistake. There is a consent of opinion, ancient and modern, on this point.

² 'One thing;' literally 'one,' which might be translated 'singleness,' meaning, probably, the 'solitariness' of chapter i, or the 'sincerity' of which we read so often in the sequel.

dint of strong effort. But when the work of them is done, it comes to one and the same thing¹.

12. The Master said, 'To be fond of learning is near to wisdom; to practise with vigour is near to benevolence; to know to be ashamed is near to fortitude. He who knows these three things, knows how to cultivate his own character. Knowing how to cultivate his own character, he knows how to govern other men. Knowing how to govern other men, he knows how to govern the kingdom with its states and families.

13. 'All who have the government of the kingdom with its states and families have nine standard rules to follow:—the cultivation of themselves; the honouring of the worthy; affection towards their relatives; respect towards their great ministers; kind and sympathetic treatment of the whole body of officers; dealing with the mass of the people as their children; encouraging the resort of all classes of artisans; indulgent treatment of men from a distance; and the kindly cherishing of the princes of the states.

14. 'By (the ruler's) cultivation of himself there is set up (the example of) the course (which all should pursue); by his honouring of the worthy, he will be preserved from errors of judgment; by his showing affection towards his relatives, there will be no dissatisfaction among his uncles and brethren; by respecting the great ministers he will be kept from mistakes; by kindly treatment of the whole body of officers, they will be led to make the most

¹ After this, it follows in the 'Narratives:—The duke said, 'Your words are admirable, are perfect; but I am really stupid and unable to fulfil them.'

grateful return for his courtesies; by dealing with the mass of the people as his children, they will be drawn to exhort one another (to what is good); by encouraging the resort of artisans, his wealth for expenditure will be rendered sufficient; by indulgent treatment of men from a distance, they will come to him from all quarters; by his kindly cherishing of the princes of the states, all under heaven will revere him.

15. 'The adjustment of all his thoughts, purification, arraying himself in his richest dresses, and the avoiding of every movement contrary to the rules of propriety;—this is the way in which (the ruler) must cultivate his own character. Discarding slanderers, keeping himself from (the seductions of) beauty, making light of riches and honouring virtue:—this is the way by which he will encourage the worthy. Giving his relatives places of honour, and large emolument, and entering into sympathy with them in their likes and dislikes:—this is the way by which he can stimulate affection towards relatives. Giving them numerous officers to discharge their functions and execute their orders:—this is the way by which he will stimulate his Great ministers. According to them a generous confidence, and making their emoluments large:—this is the way by which he will stimulate (the body of) his officers. Employing them (only) at the regular times and making the imposts light:—this is the way by which he will stimulate the people. Daily examinations and monthly trials, and rations and allowances in proportion to the work done:—this is the way in which he will stimulate the artisans. Escorting them on their departure, and meeting them on their coming, commending the good among them and showing pity to the incom-

petent:—this is the way in which he will manifest his indulgent treatment of men from a distance. Continuing families whose line of succession has been broken, reviving states that have ceased to exist, reducing confusion to order, supporting where there is peril; having fixed times for receiving the princes themselves and their envoys; sending them away after liberal treatment and with liberal gifts, and requiring from them small offerings on their coming:—this is the way in which he will cherish with kindness the princes of the states.

16. 'All who have the government of the kingdom with its states and families have these nine standard rules to attend to. That whereby they are carried into exercise is one thing. In all things success depends on previous preparation; without such preparation there is failure. If what is to be spoken be determined beforehand, there will be no stumbling in the utterance. If the things to be done be determined beforehand, there will be no difficulty with them. If actions to be performed be determined beforehand, there will be no difficulty with them. If actions to be performed be determined beforehand, there will be no sorrow or distress in connexion with them. If the courses to be pursued be determined beforehand, the pursuit of them will be inexhaustible¹.

17. 'When those in inferior situations do not

¹ The 'one thing' in this paragraph carries us back to the same phrase in paragraph 9. If we confine our attention to this paragraph alone, we shall say, with K'ang and Ying-tâ, 'the one thing' is the 'preparation beforehand,' of which it goes on to speak; and it seems to be better not to grope here for a more mysterious meaning.

obtain (the confidence of) their superiors, the people cannot be governed successfully.

18. 'There is a way to obtain (the confidence of) the superior;—if one is not believed in by his friends, he will not obtain the confidence of his superior. There is a way to secure being believed in by his friends;—if he be not in submissive accord with his parents, he will not be believed in by his friends. There is a way to secure submissive accord with parents;—if one, on turning his thoughts in on himself, finds that he has not attained to the perfection of his nature¹, he will not be in submissive accord with his parents. There is a way to secure the perfection of the nature;—if a man have not a clear understanding of what is good, he will not attain to that perfection.

19. 'Perfection of nature is characteristic of Heaven. To attain to that perfection belongs to man. He who possesses that perfection hits what is right without any effort, and apprehends without any exercise of thought;—he is the sage² who

¹ Literally, 'that he is not sincere,' which is Mr. Wylie's rendering; or, as I rendered it in 1861, 'finds a want of sincerity.' But in the frequent occurrence of 誠 in the 'Sequel of the Treatise,' 'sincerity' is felt to be an inadequate rendering of it. Zottoli renders the clause by 'Si careat veritate, integritate,' and says in a note, '誠 est naturalis entis perfectio, quae rei convenit juxta genuinum Creatoris protypon, quaeque a creatore infunditur; proindeque est rei veritas, seu rei juxta veritatem perfectio.' It seems to me that this ideal perfection, as belonging to all things, which God made 'good,' is expressed by 善 in the last clause; and that the realisation of that perfection by man, as belonging to his own nature, is the work of 誠, and may be spoken of as actually and fully accomplished, or in the process of being accomplished. It is difficult with our antecedent knowledge and opinions to place ourselves exactly in the author's point of view.

² 聖人, — Rémusat, Zottoli, and many give for this name

naturally and easily embodies the right way. He who attains to perfection is he who chooses what is good, and firmly holds it fast.

20. 'He extensively studies what is good ; inquires accurately about it ; thinks carefully over it ; clearly discriminates it ; and vigorously practises it. While there is anything he has not studied, or in what he has studied there is anything he cannot (understand), he will not intermit his labour. While there is anything he has not asked about, or anything in what he has asked about that he does not know, he will not intermit his labour. While there is anything he has not thought over, or anything in what he has thought about that he does not know, he will not intermit his labour. While there is anything which he has not tried to discriminate, or anything in his discrimination that is not clear, he will not intermit his labour. While there is anything which he has not practised, or any want of vigour so far as he has practised, he will not intermit his labour.

'If another man succeed by one effort, he will use a hundred efforts ; if another succeed by ten, he will use a thousand. Let a man proceed in this way, and though stupid, he is sure to become intelligent ; though weak, he is sure to become strong.'

21. The understanding (of what is good), springing from moral perfection, is to be ascribed to the nature ; moral perfection springing from the under-

'sanctus vir,' 'un saint,' 'the holy man.' I prefer, after all, to adhere to the rendering, 'le sage,' 'the sage.' The sage is the ideal man ; the saint is the man sanctified by the Spirit of God. Humanity predominates in the former concept ; Divinity in the latter. The ideas of morality and goodness belong to both names. See Mencius, VII, ix, 25, for his graduation of the appellations of good men.

standing (of what is good) is to be ascribed to instruction. But given the perfection, and there shall be the understanding; given the understanding, and there shall be the perfection¹.

22. It is only he of all under heaven who is entirely perfect that can give its full development to his nature. Able to give its full development to his own nature, he can also give the same to the nature of other men. Able to give its full development to the nature of other men, he can also give the same to the natures of animals and things². Able to give their full development to these, he can assist the transforming and nourishing operations of heaven and earth. Capable of assisting those transforming and nourishing operations, he can form a ternion with heaven and earth.

23. Next to the above is he who cultivates to the utmost the shoots (of goodness in his nature)³, till he becomes morally perfect. This perfection will then obtain embodiment; embodied, it will be manifested; manifested, it will become brilliant; brilliant,

¹ With this paragraph there commences the last chapter of the Treatise. 3ze-sze, it is said, takes up in it the commencing utterances in paragraph 19, and variously illustrates and prosecutes them. From the words 'nature and instruction' it is evident how he had the commencing chapter of the Treatise in his mind.

² The text is simply 'the nature of things;' but the word 'things' (物) comprehends all beings besides man. Zottoli's '*rerum natura*' seems quite inadequate. Rémusat's Latin version is the same; his French is '*la nature des choses*.' Wylie says, 'the nature of other objects.' This chapter has profoundly affected all subsequent philosophical speculation in China. The ternion of 'Heaven, Earth, and Man' is commonly called San 3hâi (三才), 'the Three Powers.'

³ The character in the text here is a difficult one :—*k'k'û* (曲),

it will go forth in action ; going forth in action, it will produce changes ; producing changes, it will effect transformations. It is only he of all under heaven who is entirely perfect that can transform.

24. It is characteristic of him who is entirely perfect that he can foreknow. When a state or family is about to flourish, there are sure to be lucky omens, and when it is about to perish, there are sure to be unlucky omens. They will be seen in the tortoise-shell and stalks¹ ; they will affect the movements of the four limbs. When calamity or happiness is about to come, the good is sure to be foreknown by him, and the evil also. Hence, he who is entirely perfect is like a Spirit².

meaning 'crooked,' often used as the antithesis of 'straight ;' but the title of the first Book in this collection shows that it need not be used only of what is bad. In that case, the phrase 致曲 would mean—'carries to the utmost what is bad.' Zottoli's rendering of it by 'promovere declinatam naturam' is inadmissible. Nor can we accept Rémusat's 'diriger efforts vers une seule vertu,' which Wylie follows, merely substituting 'object' for 'vertu.' See the introduction on the title of the first Book. Very much to the point is an illustration by the scholar Pâi Lū :—'Put on stone on a bamboo shoot, or where it would show itself, and it will travel round the stone and come out crookedly at its side.' So it is with the good nature, whose free and full development is repressed.

¹ These were the two principal methods of divination practised from very ancient times. The stalks were those of the *Parmica Sibirica* ; of which I possess a bundle brought from the tomb of Confucius in 1873. It is difficult to say anything about 'the four limbs,' which were to Kǎng 'the four feet of the tortoise.'

² 'The Spirit-man' is, according to Mencius' graduation, an advance on the Sage or Holy man, one whose action is mysterious and invisible, like the power of Heaven and Earth working in nature. Chinese predicates about him could not go farther.

25. Perfection is seen in (its possessor's) self-completion; and the path (which is its embodiment), in its self-direction.

26. Perfection is (seen in) the beginning and end of (all) creatures and things. Without this perfection there would be no creature or thing.

27. Therefore the superior man considers perfection as the noblest of all attainments.

28. He who is perfect does not only complete himself; his perfection enables him to complete all other beings also. The completion of himself shows the complete virtue of his nature; the completion of other beings shows his wisdom. (The two) show his nature in good operation, and the way in which the union of the external and internal is effected.

29. Hence, whenever he exercises it, (the operation) is right.

30. Thus it is that entire perfection is unresting; unresting, it continues long; continuing long, it evidences itself; evidencing itself, it reaches far; reaching far, it becomes large and substantial; large and substantial, it becomes high and brilliant.

31. By being large and substantial it contains (all) things. By being high and brilliant, it over-spreads (all) things. By reaching far and continuing long, it completes (all) things. By its being so large and substantial, it makes (its possessor) the co-equal of earth; by its height and brilliancy, it makes him the co-equal of heaven; by its reaching far and continuing long, it makes him infinite.

32. Such being his characteristics, without any manifestation he becomes displayed; without any movement he effects changes; without any exertion

he completes. The way of heaven and earth may be completely described in one sentence :—

33. They are without any second thought, and so their production of things is inexhaustible.

34. The characteristics of heaven and earth are to be large ; to be substantial ; to be high ; to be brilliant ; to be far-reaching ; to be long-continuing.

35. There now is this heaven ; it is only this bright shining spot, but when viewed in its inexhaustible extent, the sun, moon, stars, and constellations of the zodiac are suspended in it, and all things are overspread by it. There is this earth ; it is only a handful of soil, but when regarded in its breadth and thickness, it sustains mountains like the Hwá and the Yo, without feeling the weight, and contains the rivers and seas without their leaking away. There is this mountain ; it looks only the size of a stone, but when contemplated in all its altitude the grass and trees are produced on it, birds and beasts dwell on it, and the precious things which men treasure up are found in it. There is this water ; it appears only a ladleful, but, when we think of its unfathomable depths, the largest tortoises, iguanas, iguanadons, dragons, fishes, and turtles are produced in them, and articles of value and sources of wealth abound in them.

36. It is said in the Book of Poetry (IV, i, sect. 1, ode 2),

‘ The ordinances of Heaven,

How profound are they and unceasing !’

intimating that it is thus that Heaven is Heaven.
(And again) :—

‘ Oh ! how illustrious

Was the singleness of the virtue of king Wán !’

intimating that it was thus that king Wăn was the accomplished (king), by his singleness unceasing.

37. How great is the course of the sage ! Like an overflowing flood it sends forth and nourishes all things ! It rises up to the height of heaven.

38. How complete is its greatness ! It embraces the three hundred usages of ceremony, and the three thousand modes of demeanour. It waits for the right man, and then it is trodden. Hence it is said, 'If there be not perfect virtue, the perfect path cannot be exemplified.'

39. Therefore the superior man honours the virtuous nature, and pursues the path of inquiry and study (regarding it); seeking to carry it out in its breadth and greatness, so as to omit none of the exquisite and minute points (which it embraces); raising it to its greatest height and brilliancy, so as to be found in the way of equilibrium and harmony. He cherishes his old knowledge so as (continually) to be acquiring new, and thus manifests an honest, generous, earnestness in the esteem and practice of all propriety

40. Therefore, when occupying a high situation he is not proud, and in a low situation he is not insubordinate. If the state is well-governed, his words are able to promote its prosperity ; and if it be ill-governed, his silence is sufficient to secure forbearance (for himself).

41. Is not this what is said in the Book of Poetry (III, iii, ode 6, 4),

'Intelligent is he and wise,
Protecting his own person?'

42. The Master said, 'Let a man who is ignorant be fond of using his own judgment ; let one who is

in a low situation be fond of arrogating a directing power; let one who is living in the present age go back to the ways of antiquity;—on all who act thus calamity is sure to come.'

43. To no one but the son of Heaven does it belong to discuss the subject of ceremonial usages; to fix the measures; and to determine (the names of) the written characters.

44. Now, throughout the whole kingdom, carriages have all wheels of the same breadth of rim; all writing is with the same characters; and for conduct there are the same rules.

45. One may occupy the throne, but if he have not the proper virtue, he should not presume to make ceremonies or music. One may have the virtue, but if he have not the throne, he in the same way should not presume to make ceremonies or music.

46. The Master said, 'I might speak of the ceremonies of Hsiâ, but *K'hi* could not sufficiently attest (my words). I have learned the ceremonies of Yin, and they are preserved in Sung. I have learned the ceremonies of *K'âu*, and they are now used. I follow *K'âu*.'

47. If he who attains to the sovereignty of all the kingdom attach the due importance to (those) three points¹, there are likely to be few errors (among the people).

48. However excellent may have been (the regulations of) those of former times, they cannot be attested. Not being attested, they cannot command credence. Not commanding credence, the people

¹ What are those three points? The old interpretations said,—'The ceremonies of the three kings;' *K'û Hsî* thought they were the three things in paragraph 43;—which is more likely.

would not follow them. However excellent might be those of one in an inferior station, they would not be honoured. Not honoured, they would not command credence. Not commanding credence, the people would not follow them.

49. Therefore the course of the superior man is rooted in his own character and conduct, and attested by the multitudes of the people. He examines (his institutions) by comparison with those of the founders of the three dynasties, and finds them without mistake. He sets them up before heaven and earth, and there is nothing in them contrary to (their mode of operation). He presents himself with them before Spiritual Beings, and no doubts about them arise. He is prepared to wait for the rise of a sage a hundred ages hence, and has no misgivings. That he can present himself with them before Spiritual Beings, without any doubts about them arising, shows that he knows Heaven; that he is prepared to wait for the rise of a sage a hundred ages hence, without any misgivings, shows that he knows men.

50. Therefore the movements of the superior man mark out for ages the path for all under heaven; his actions are the law for ages for all under heaven; and his words are for ages the pattern for all under heaven. Those who are far from him look longingly for him, and those who are near are never weary of him.

51. It is said in the Book of Poetry (IV, i, sect. 2, ode 3),

‘There in their own states are they loved,
Nor tired of are they here;
Their fame through lapse of time shall grow,
Both day and night, more clear.’

Never has a superior man obtained an early renown throughout the kingdom who did not correspond to this description.

52. *Kung-ní* handed down (the views of) *Yáo* and *Shun* as if they had been his ancestors, and elegantly displayed (the ways) of *Wăn* and *Wû*, taking them as his model. Above, he adopted as his law the seasons of heaven; and below, he conformed to the water and land.

53. He may be compared to heaven and earth in their supporting and containing, their overshadowing and curtaining all things. He may be compared to the four seasons in their alternating progress, and to the sun and moon in their successive shining. All things are nourished together without their injuring one another; the courses (of the seasons and of the sun and moon) proceed without any collision among them. The smaller energies are like river-currents; the greater energies are seen in mighty transformations. It is this which makes heaven and earth so great.

54. It is only he possessed of all sagely qualities that can exist under heaven, who shows himself quick in apprehension, clear in discernment, of far-reaching intelligence and all-embracing knowledge, fitted to exercise rule; magnanimous, generous, benign, and mild, fitted to exercise forbearance; impulsive, energetic, firm, and enduring, fitted to maintain a strong hold; self-adjusted, grave, never swerving from the mean, and correct, fitted to command respect; accomplished, distinctive, concentrative, and searching, fitted to exercise discrimination.

55. All-embracing is he and vast, deep and active as a fountain, sending forth in their due seasons these (qualities).

56. All-embracing is he and vast, like heaven. Deep and active as a fountain, he is like an abyss. He shows himself, and the people all revere him ; he speaks, and the people all believe him ; he acts, and the people all are pleased with him. In this way his fame overspreads the Middle kingdom, and extends to all barbarous tribes. Wherever ships and carriages reach ; wherever the strength of man penetrates ; wherever the heavens overshadow and the earth sustains ; wherever the sun and moon shine ; wherever frosts and dews fall ; all who have blood and breath unfeignedly honour and love him. Hence it is said, 'He is the equal of Heaven¹.'

57. It is only he among all under heaven who is entirely perfect that can adjust and blend together the great standard duties of all under heaven, establish the great fundamental principles of all, and know the transforming and nourishing operations of heaven and earth.

58. How shall this individual have any one beyond himself on whom he depends ? Call him man in his ideal, how earnest is he ! Call him an abyss, how deep is he ! Call him Heaven, how vast is he !

59. Who can know him but he who is indeed quick in apprehension and clear in discernment, of sagely wisdom, and all-embracing knowledge, possessing heavenly virtue ?

60. It is said in the Book of Poetry (I, v, ode 3, 1),

¹ It was the old opinion that in this part of the Treatise we have his grandson's eloquent eulogium of Confucius, and I agree with that opinion. Yet I have not ventured to translate the different parts of it in the past tense. Let it be read as the description of the ideal sage who found his realisation in the Master.

'Over her embroidered robe she wears a (plain) garment;'

expressing how the wearer disliked the display of the beauty (of the robe). Just so, it is the way of the superior man to prefer the concealment (of his virtue), while it daily becomes more illustrious, and it is the way of the small man to seek notoriety, while he daily goes more and more to ruin.

61. It is characteristic of the superior man, appearing insipid, yet not to produce satiety; preferring a simple negligence, yet to have his accomplishments recognised; seeming mild and simple, yet to be discriminating. He knows how what is distant lies in what is near. He knows where the wind proceeds from. He knows how what is minute becomes manifested¹. He, we may be assured, will enter (the innermost recesses of) virtue.

62. It is said in the Book of Poetry (II, iv, ode 8, 11),

'Though they dive to the bottom, and lie there,
They are very clearly seen.'

Therefore the superior man internally examines his heart, that there may be nothing wrong there, and no occasion for dissatisfaction with himself.

63. That wherein the superior man cannot be equalled is simply this,—his (work) which other men do not see. It is said in the Book of Poetry (III, iii, ode 2, 7),

'When in your chamber, 'neath its light,
Maintain your conscience pure and bright.'

¹ That is how the ruler's character acts on the people as the wind on grass and plants.

64. Therefore the superior man, even when he is not acting, has the feeling of reverence ; and when he does not speak, he has the feeling of truthfulness. It is said in the Book of Poetry (IV, iii, ode 2),

‘ These offerings we set forth without a word,
Without contention, and with one accord,
To beg the presence of the honoured lord.’

65. Therefore the superior man does not use rewards, and the people are stimulated (to virtue); he does not show anger, and the people are awed more than by hatchets and battle-axes. It is said in the Book of Poetry (IV, i, sect. 1, ode 4),

‘ What is most distinguished is the being virtuous;
It will secure the imitation of all the princes.’

66. Therefore the superior man being sincerely reverential, the whole kingdom is made tranquil. It is said in the Book of Poetry (III, i, ode 7, 7),

‘ I am pleased with your intelligent virtue,
Not loudly proclaimed, nor pourtrayed.’

67. The Master said, ‘ Among the appliances to transform the people, sounds and appearances (may seem to) have a trivial effect. But it is said in another ode (III, iii, ode 6, 6),

“ Virtue is light as a hair.”

68. ‘ But a hair will still admit of comparison (as to its size). In what is said in another ode (III, i, ode 1, 7),

“ The doings of high Heaven
Have neither sound nor odour,”

we have the highest description (of transforming virtue).’

BOOK XXIX. PIÃO KÍ

OR

THE RECORD ON EXAMPLE¹.

1. These were the words of the Master :—‘ Let us return².’ The superior man, in obscurity, yet makes himself manifest ; without giving himself any airs, his gravity is acknowledged ; without the exercise of severity, he inspires awe ; without using words, he is believed.

2. The Master said, ‘ The superior man takes no erroneous step before men, nor errs in the expression of his countenance, nor in the language of his speech. Therefore his demeanour induces awe, his countenance induces fear, and his words produce confidence. It is said in *The Punishments of Fû* (*The Shû*, V, xxvii, 11) : “ They were all reverence and caution. They had no occasion to make choice of words in reference to their conduct.”’

3. The Master said, ‘ The dress and the one worn over it do not take the place, the one of the other, it being intimated to the people thereby that they should not trouble or interfere with one another.’

4. The Master said, ‘ When a sacrifice has come to the point of greatest reverence, it should not be immediately followed by music. When the dis-

¹ See the introductory notice, vol. xxvii, pp. 44, 45.

² Compare *Analects*, V, 22. When Confucius thus spoke, he was accepting his failure in the different states, and saying in effect that his principles and example would ultimately win their way, without his being immediately successful.

cussion of affairs at court has reached its utmost nicety, it should not be immediately followed by an idle indifference.'

5. The Master said, 'The superior man is careful (in small things), and thereby escapes calamity. His generous largeness cannot be kept in obscurity. His courtesy keeps shame at a distance.'

6. The Master said, 'The superior man, by his gravity and reverence, becomes every day stronger (for good); while indifference and want of restraint lead to a daily deterioration. The superior man does not allow any irregularity in his person, even for a single day;—how should he be like (a small man) who will not end his days (in honour)?'

7. The Master said, 'Vigil and fasting are required (as a preparation) for serving the spirits (in sacrifice); the day and month in which to appear before the ruler are chosen beforehand:—these observances were appointed lest the people should look on these things without reverence.'

8. The Master said, '(The small man) is familiar and insolent. He may bring death on himself (by being so), and yet he stands in no fear¹.'

9. The Master said, 'Without the interchange of the formal messages, there can be no reception of one party by another; without the presenting of the ceremonial (gifts), there can be no interview (with a superior):—these rules were made that the people might not take troublesome liberties with one another! It is said in the Yí, "When he shows (the sincerity that marks) the first recourse to divination, I instruct him. If he apply a second and third time,

¹ The text of this short paragraph is supposed to be defective.

that is troublesome, and I do not instruct the troublesome¹.”

10. These were the words of the Master:—
‘(Humanity, of which the characteristic is) Benevolence, is the Pattern for all under Heaven; Righteousness is the Law for all under Heaven; and the Reciprocations (of ceremony) are for the Profit of all under Heaven.’

11. The Master said, ‘When kindness is returned for kindness, the people are stimulated (to be kind). When injury is returned for injury, the people are warned (to refrain from wrong-doing). It is said in the Book of Poetry (III, iii, ode 26):—

“Answers to every word will leap,
Good deeds their recompense shall reap.”

‘It is said in the *Thâi Kíá* (*Shû*, IV, v, sect. 2, 2),
“Without the sovereign, the people cannot enjoy repose with one another; without the people, the sovereign would have none to rule over in the four quarters (of the kingdom).”’

12. The Master said, ‘They who return kindness for injury are such as have a regard for their own persons. They who return injury for kindness are men to be punished and put to death².’

13. The Master said, ‘Under heaven there is only a man (here and there) who loves what is proper to humanity without some personal object in the

¹ See the explanation of the 4th Hexagram, *Mãng*, vol. xvi, pp. 64, 65,—with this paragraph ends the first section of the Treatise. It seems to be extended to exhibit the necessity of reverence in the superior man, who is to be an example to others.

² Comparing this utterance with the decision of Confucius in the *Analects*, XIV, 36, *Khân Hào* thinks it doubtful that we have here the sentiment or words of the sage.

matter, or who hates what is contrary to humanity without being apprehensive (of some evil). Therefore the superior man reasons about the path to be trodden from the standpoint of himself, and lays down his laws from the (capabilities of the) people.'

14. The Master said, '(The virtues of) humanity appear in three ways. (In some cases) the work of humanity is done, but under the influence of different feelings. In these, the (true character of the) humanity cannot be known; but where there is some abnormal manifestation of it, in those the true character can be known¹. Those to whom it really belongs practise it easily and naturally; the wise practise it for the sake of the advantage which it brings; and those who fear the guilt of transgression practise it by constraint.

15. Humanity is the right hand; pursuing the right path is the left². Humanity comprehends the (whole) man; the path pursued is the exhibition of righteousness. Those whose humanity is large, while their exhibition of righteousness is slight, are loved and not honoured. Those whose righteousness is large and their humanity slight are honoured and not loved.

16. There is the perfect path, the righteous path, and the calculated path. The perfect path conducts to sovereignty; the righteous path, to chieftaincy; and the calculated path, to freedom from error and failure³.

¹ In illustration of this point there is always adduced the case of the duke of Kâu, who erred, under the influence of his brotherly love, in the promotion of his brothers that afterwards joined in rebellion.

² The right hand is used most readily and with greatest effect.

³ With this paragraph ends the second section of the Treatise. It

17. These were the words of the Master :—‘ Of humanity there are various degrees ; righteousness is now long, now short, now great, now small. Where there is a deep and compassionate sympathy in the heart, we have humanity evidenced in the love of others ; where there is the following of (old) examples, and vigorous endeavour, we have the employment of humanity for the occasion. It is said in the Book of Poetry (III, i, ode 10, 6),

“ Where the Fǎng-water flows,
Is the white millet grown.
So his men Wû employed,
And his merit was shown !
To his sons he would leave
His wise plans and his throne
And our Wû was a sovereign true.”

‘ That was a humanity extending to many generations. In the Lessons from the States it is said (I, iii, ode 10, 3),

“ Person slighted, life all blighted,
What can the future prove ?”

‘ That was a humanity extending (only) to the end of the speaker’s life.’

18. The Master said, ‘ Humanity is like a heavy vessel, and like a long road. He who tries to lift the vessel cannot sustain its weight ; he who travels the road cannot accomplish all its distance. There is nothing that has so many different degrees as (the course of) humanity ; and thus he who tries to nerve himself to it finds it a difficult task. Therefore when

is occupied with the subject of humanity, or the whole nature of man, of which benevolence is the chief element and characteristic, as the most powerful form of example.

the superior man measures men with the scale of righteousness, he finds it difficult to discover the men (whom he seeks); when he looks at men and compares them with one another, he knows who among them are the more worthy.'

19. The Master said, 'It is only one man (here and there) under heaven, who with his heart of hearts naturally rests in humanity. It is said in the Tâ Yâ, or Major Odes of the Kingdom (III, iii, ode 6, 6),

"Virtue is very light,—
Light as a hair, yet few can bear
The burden of its weight.
'Tis so; but Kung Shan, as I think,
Needs not from virtue's weight to shrink
That other men defies.
Aid from my love his strength rejects.
(If the king's measures have defects,
What's needed he supplies)."

'In the Hsião Yâ, or Minor Odes of the Kingdom, it is said (II, vii, ode 4, 5),

"To the high hills I looked;
The great way I pursued."

The Master said, 'So did the poets love (the exhibition of) humanity. (They teach us how) one should pursue the path of it, not giving over in the way, forgetting his age, taking no thought that the years before him will not be sufficient (for his task), urging on his course with earnestness from day to day, and only giving up when he sinks in death.'

20. The Master said, 'Long has the attainment of a perfect humanity been difficult among men! all men err in what they love;—and hence it is easy to

apologise for the errors of those who are seeking this humanity¹.

21. The Master said, 'Courtesy is near to propriety; economy is near to humanity; good faith is near to the truth of things. When one with respect and humility practises these (virtues), though he may fall into errors, they will not be very great. Where there is courtesy, the errors are few; where there is truth, there can be good faith; where there is economy, the exercise of forbearance is easy:—will not failure be rare in the case of those who practise these things? It is said in the Book of Poetry (III, iii, ode 2, 9),

"Mildness and reverence base supply

For virtue's structure, broad and high."

22. The Master said, 'Long has the attainment of perfect humanity been difficult among men; it is only the superior man who is able to reach it. Therefore the superior man does not distress men by requiring from them that which (only) he himself can do, nor put them to shame because of what they cannot do. Hence the sage, in laying down rules for conduct, does not make himself the rule, but gives them his instructions so that they shall be able to stimulate themselves to endeavour, and have the feeling of shame if they do not put them in practice. (He enjoins) the rules of ceremony to regulate the conduct; good faith to bind it on them; right demeanour to set it off; costume to distinguish it; and friendship to perfect it:—he desires in this way to produce a uniformity of the people. It is said in the Hsiào Yâ (V, ode 5, 3),

¹ This seems to be the meaning, about which there are various opinions.

“Shall they unblushing break man’s law?
Shall they not stand of Heaven in awe?”

23. ‘Therefore, when a superior man puts on the dress (of his rank), he sets it off by the demeanour of a superior man. That demeanour he sets off with the language of a superior man; and that language he makes good by the virtues of a superior man. Hence the superior man is ashamed to wear the robes, and not have the demeanour; ashamed to have the demeanour, and not the style of speech; ashamed to have the style of speech, and not the virtues; ashamed to have the virtues, and not the conduct proper to them. Thus it is that when the superior man has on his sackcloth and other mourning, his countenance wears an air of sorrow; when he wears the square-cut dress and square-topped cap, his countenance wears an air of respect; and when he wears his mail-coat and helmet, his countenance says that he is not to be meddled with. It is said in the Book of Poetry (I, xiv, ode 2, 2),

“Like pelicans, upon the dam
Which stand, and there their pouches cram,
Unwet the while their wings,
Are those who their rich dress display,
But no befitting service pay,
Intent on meanest things¹.”

¹ With this paragraph ends the 3rd section of the Book. ‘It speaks,’ say the *Khien-lung* editors, ‘of the perfect humanity, showing that to rest naturally in this is very difficult, yet it is possible by self-government to advance from the practice of it, with a view to one’s advantage, to that natural resting in it; and by means of instruction to advance from the practice of it by constraint to the doing so for its advantages.’

24. These were the words of the Master :—‘ What the superior man calls righteousness is, that noble and mean all have the services which they discharge throughout the kingdom. The son of Heaven himself ploughs the ground for the rice with which to fill the vessels, and the black millet from which to distil the spirit to be mixed with fragrant herbs, for the services of God, and in the same way the feudal lords are diligent in discharging their services to the son of Heaven.’

25. The Master said, ‘ In serving (the ruler) his superior, (an officer) from his position has great opportunity to protect the people; but when he does not allow himself to have any thought of acting as the ruler of them, this shows a high degree of humanity. Therefore, the superior man is courteous and economical, seeking to exercise his benevolence, and sincere and humble in order to practise his sense of propriety. He does not himself set a high value on his services; he does not himself assert the honour due to his person. He is not ambitious of (high) position, and is very moderate in his desires. He gives place willingly to men of ability and virtue. He abases himself and gives honour to others. He is careful and in fear of doing what is not right. His desire in all this is to serve his ruler. If he succeed in doing so (and obtaining his ruler’s approbation), he feels that he has done right; if he do not so succeed, he still feels that he has done right :—prepared to accept the will of Heaven concerning himself. It is said in the Book of Poetry (III, i, ode 5, 6),

“ How the creepers close twine
Round the branches and stems!

Self-possession and ease

Robed our prince as with gems.

Happiness increased unsought,

Nor by crooked ways was bought."

Might not this have been said of Shun, Yü, king Wăn, or the duke of Kâu, who had the great virtues (necessary) to govern the people, and yet were (only) careful to serve their rulers? It is said again in the same Book of Poetry (III, i, ode 2, 3),

"This our king Wăn in all his way

Did watchful reverence display,

With clearest wisdom serving God,

Who, pleased to see the course he trod,

Him with great favour crowned.

His virtue no deflection knew,

But always to the right was true.

The states beheld, and all approved.

With loyal ardour stirred and moved,

Wăn as their head they owned."

26. The Master said, 'The practice of the ancient kings in conferring honorary posthumous names was to do honour to the fame (of the individuals); but they limited themselves to one excellence (in the character);—they would have been ashamed if the name had been beyond the actions (of the life). In accordance with this the superior man does not himself magnify his doings, nor himself exalt his merit, seeking to be within the truth; actions of an extraordinary character he does not aim at, but seeks to occupy himself only with what is substantial and good. He displays prominently the good qualities of others, and celebrates their merits, seeking to place himself below them in the scale of worth. There-

fore, although the superior man abases himself, yet the people respect and honour him.'

27. The Master said, 'The meritorious services of Hâu Kî were the greatest of all under Heaven; could his hands and feet be described as those of an ordinary man? But all which he desired was that his doings should be superior to his name, and therefore he said of himself that he was simply "a man useful to others¹."

28. These were the words of the Master:—
'Difficult is it to attain to what is called the perfect humanity of the superior man! It is said in the Book of Poetry²,

"The happy and courteous prince

Is the father and mother of his people."

Happy, he (yet) vigorously teaches them; courteous, he makes them pleased and restful. With all their happiness, there is no wild extravagance; with all their observance of ceremonial usages, there is the feeling of affection. Notwithstanding his awing gravity, they are restful; notwithstanding his son-like gentleness, they are respectful. Thus he causes

¹ With this ends the 4th section of the Book, 'On the service of his ruler by an inferior, showing the righteousness between them, and how that righteousness completes the humanity.'

² The ode here quoted from can hardly be any other than III, ii, 7. The first character in the former of the two lines in that ode, however, is only the phonetic part of that in the text here, and the meaning of 'force or vigour' which the writer employs seems incongruous with that belonging to it in the Shih, where it occurs several times, in combination with the character that follows it, used as a binomial adjective. I need not say more on the difficulty. The meaning of the paragraph as a whole is plain:—'The superior man,' the competent ruler, must possess, blended together, the strength of the father and the gentleness of the mother.

them to honour him as their father, and love him as their mother. There must be all this before he is the father and mother of his people. Could any one who was not possessed of perfect virtue be able to accomplish this ?

29. 'Here now is the affection of a father for his sons ;—he loves the worthy among them, and places on a lower level those who do not show ability ; but that of a mother for them is such, that while she loves the worthy, she pities those who do not show ability :—the mother deals with them on the ground of affection and not of showing them honour ; the father, on the ground of showing them honour and not of affection. (So we may say of) water and the people, that it manifests affection to them, but does not give them honour ; of fire, that it gives them honour, but does not manifest affection ; of the ground, that it manifests affection, but does not give honour ; of Heaven, that it gives them honour, but does not manifest affection ; of the nature conferred on them, that it manifests affection, but does not give them honour ; and of the manes of their departed, that they give honour, but do not manifest affection¹.'

30. 'Under the Hsiâ dynasty it was the way to give honour to the nature conferred on men ; they served the manes of the departed, and respected Spiritual Beings, keeping them at a distance, while they brought the people near, and made them loyal ; they put first the (attraction) of emolument, and last the terrors of power ; first rewards, and then punishments ; showing their affection (for the people), but

¹ The ruler-father of the previous paragraph is here contrasted with the ordinary parent ; but the second half of the text is not easily translated, and is difficult to comprehend.

not giving them honour. The bad effect on the people was, that they became stupid and ignorant, proud and clownish, and uncultivated, without any accomplishments.

‘Under the Yin dynasty, they honoured Spiritual Beings, and led the people on to serve them; they put first the service of their manes, and last the usages of ceremony; first punishments, and then rewards; giving honour (to the people), but not showing affection for them. The bad effect on the people was, that they became turbulent and were restless, striving to surpass one another without any sense of shame.

‘Under the *K'âu* dynasty, they honoured the ceremonial usages, and set a high value on bestowing (favours); they served the manes and respected Spiritual Beings, yet keeping them at a distance; they brought the people near, and made them loyal; in rewarding and punishing they used the various distinctions and arrangements of rank; showing affection (for the people), but not giving them honour. The bad effects on the people were, that they became fond of gain and crafty; were all for accomplishments, and shameless; injured one another, and had their moral sense obscured.’

31. The Master said, ‘It was the method of the Hsiâ dynasty not to trouble (the people) with many notices; it did not require everything from the people, nor (indeed) look to them for great things; and they did not weary of the affection (between them and their rulers).

‘Under the Yin dynasty, they did not trouble (the people) with ceremonies, and yet they required everything from them.

‘Under the *K'âu* dynasty, they were rigorous with

the people, and not troublesome in the services to the spirits; but they did all that could be done in the way of awards, conferring rank, punishments, and penalties.'

32. The Master said, 'Under the methods of (the dynasties of the line of) Yü¹ and Hsiâ, there were few dissatisfactions among the people. The methods of Yin and Kâu were not equal to the correction of their errors.'

33. The Master said, 'The plain and simple ways of (the dynasties of the line of) Yü and Hsiâ, and the multiplied forms of Yin and Kâu were both extreme. The forms of Yü and Hsiâ did not neutralise their simplicity, nor was there sufficient simplicity under Yin and Kâu to neutralise their forms.'

34. These were the words of the Master :—
'Although in subsequent ages there arose (distinguished sovereigns), yet none of them succeeded in equalling the Tí of (the line of) Yü. He ruled over all under heaven, but, while he lived, he had not a selfish thought, and when he died, he did not make his son great (with the inheritance). He treated the people as his sons, as if he had been their father and mother. He had a deep and compassionate sympathy for them (like their mother); he instructed them in loyalty and what was profitable (like their father). While he showed his affection for them, he also gave them honour; in his natural restfulness, he was reverent; in the terrors of his majesty, he yet was loving; with all his riches, he was yet observant

¹ 'The line of Yü' was Shun, who succeeded to Yáo. He did not found a dynasty; but he is often spoken of as if he had done so.

of the rules of propriety; and his kindness was yet (rightly) distributed. The superior men who stood in connexion with him gave honour to benevolence, and stood in awe of righteousness; were ashamed of lavish expenditure, and set little store by their accumulation of substance; loyal, but not coming into collision with their sovereign; righteous, and yet deferential to him; accomplished, and yet restful; generous, and yet discriminating. It is said in Fû on Punishments, "He sought to awe the people by his virtue, and all were filled with dread; he proceeded to enlighten them by his virtue, and all were enlightened." Who but the Tî of (the line of) Yü could have been able to do this¹? (Shû, V, xxvii, 7.)

35. These were the words of the Master:—'(A minister) in the service of his ruler will first offer his words of counsel, and (when they are accepted), he will bow and voluntarily offer his person to make good his sincerity. Hence, whatever service a ruler requires from his minister, the minister will die in support of his words. In this way the salary which he receives is not obtained on false pretences, and the

¹ With this paragraph it is understood that the 5th section of the Book ends, 'illustrating the perfect humanity of the superior man in the government of the people.' Every fresh section thus far, however, has commenced with a—'These were the words of the Master,' and in no case ended with that phraseology. Paragraph 35 rightly begins with it. It is out of place, or rather misplaced, in this; and belongs, I believe, to another place, as we shall see. We should read here, instead of it, 'The Master said.' With regard to the greater part of the section, its genuineness is liable to suspicion, and is indeed denied by the majority of commentators, including the *K'ien-lung* editors. The sentiments are more Tâoistic than Confucian. See the introductory notice of the Book.

things for which he can be blamed will be more and more few.'

36. The Master said, 'In the service of a ruler, when great words are spoken to (and accepted by) him, great advantages (to the state) may be expected from them; and when words of small importance are presented to him, only small advantages are to be looked for. Therefore a superior man will not for words of small importance receive great emolument, nor for words of great importance small emolument. It is said in the Yĭ, "He does not enjoy his revenues in his own family, (but at court); there will be good fortune¹."

37. The Master said, 'In the service of a ruler, (a minister) should not descend to subjects beneath him, nor set a high value on speeches, nor accept an introduction from improper individuals. It is said in the Hsião Yâ (II, vi, ode 3, 4),

"Your duties quietly fulfil,
And hold the upright in esteem,
With friendship fast;
So shall the Spirits hear your cry,
You virtuous make, and good supply
In measure vast."

38. The Master said, 'In the service of a ruler, for (a minister) whose place is remote from (the court), to remonstrate is an act of sycophancy; for one whose place is near the ruler, not to remonstrate is to hold his office idly for the sake of gain.'

39. The Master said, 'Ministers near (the ruler) should (seek to) preserve the harmony (of his

¹ See the Thwan, or first of the appendixes of the Yĭ, on Hexagram 26, vol. xvi, page 234.

virtues). The chief minister should maintain correctness in all the departments. Great ministers should be concerned about all parts (of the kingdom).'

40. The Master said, 'In the service of a ruler there should be the wish to remonstrate, but no wish to set forth (his faults). It is said in the Book of Poetry (II, viii, ode 4, 4),

"I cherish those men in my heart;—
Might not my words my love impart?
No;—if the words were once but spoken,
The charm of love might then be broken.
The men shall dwell within my heart,
Nor thence with lapse of time depart."

41. The Master said, 'In the service of a ruler, when it is difficult to advance and easy to retire, there is a proper order maintained in the occupancy of places (according to the character of their holders). If it were easy to advance and difficult to retire, there would be confusion. Hence a superior (visitor) advances (only) after he has been thrice bowed to, while he retires after one salutation on taking leave; and thus confusion is prevented.'

42. The Master said, 'In the service of a ruler, if (an officer), after thrice leaving the court (on his advice being rejected), do not cross the borders (of the state), he is remaining for the sake of the profit and emolument. Although men say that he is not trying to force (his ruler), I will not believe them.'

43. The Master said, 'In the service of a ruler, (an officer) should be careful at the beginning, and respectful to the end.'

44. The Master said, 'In the service of a ruler, one may be in a high position or a low, rich or poor, to live or to die (according to the will of the ruler),

but he should not allow himself to be led to do anything contrary to order or right.'

45. The Master said, 'In the service of a ruler, if it be in the army, (an officer) should not (try to) avoid labour and danger; if it be at court, he should not refuse a mean office. To occupy a post and not perform its business is contrary to order and right. Hence, when a ruler employs him on any duty, if it suit his own mind, he thinks carefully of what it requires, and does it; if it do not suit his own mind, he thinks the more carefully of what it requires, and does it. When his work is done, he retires from office:—such is an officer who well discharges his duty. It is said in the Yt (vol. xvi, p. 96), "He does not serve either king or feudal lord, but in a lofty spirit prefers (to attend to) his own affairs."'

46. The Master said, 'It is only the son of Heaven who receives his appointment from Heaven; officers receive their appointments from the ruler. Therefore if the ruler's orders be conformed (to the mind of Heaven), his orders to his ministers are also conformed to it; but if his orders be contrary (to that mind), his orders to them are also contrary to it. It is said in the Book of Poetry (I, iv, ode 5, 2),

"How strong the magpies, battling fierce,
Each one to keep his mate!
How bold the quails together rush,
Upon the same debate!
This woman, with no trait that's good,
Is stained by vicious crime,
Yet her I hail as marchioness;—
Alas! woe worth the time!"'

47. The Master said, 'The superior man does not consider that his words (alone) show fully what a

man is. Hence when right ways prevail in the kingdom, the branches and leaves (from the stem) of right conduct appear; but when there are not right ways in the kingdom, the branches and leaves of (mere) words appear.

‘In accordance with this, when a superior man is by the side of one occupied with the mourning rites, and cannot contribute to assist him in his expenditure, he does not ask him what it is; when he is by the side of one who is ill, and cannot supply him with food, he does not ask what he would like; when he has a visitor for whom he cannot provide a lodging, he does not ask where he is staying. Hence the intercourse of a superior man may be compared to water, and that of a small man, to sweet wine. The superior man seems insipid, but he helps to perfection; the small man seems sweet, but he leads to ruin. It is said in the Hsião Yá (II, v, ode 4, 3),

“He trusts the rogues that lie and sneak,
And make things worse;
Their duties shirked, their words so meek
Prove but a curse.”’

48. The Master said¹, ‘The superior man does not confine himself to praising men with his words; and so the people prove loyal to him. Thus, when he asks about men who are suffering from cold, he clothes them; or men who are suffering from want, he feeds them; and when he praises a man’s good qualities, he (goes on to) confer rank on him. It

¹ With this commences the 7th section of the Book, but it commences irregularly with ‘the Master said,’ instead of ‘The words of the Master were;’ see note above, on page 344.

is said in the Lessons from the States (I, xiv, ode 1, 3),

“I grieve; would they but lodge with me!”’

49. The Master said, ‘Dissatisfaction and calamity will come to him whose lip-kindness is not followed by the corresponding deeds. Therefore the superior man will rather incur the resentment arising from his refusal than the charge of promising (and then not fulfilling). It is said in the Lessons from the States (V, ode 4, 6),

“I wildly go; I’ll never know

Its smiles and chat again,

To me you clearly swore the faith,

Which now to break you’re fain.

Could I foresee so false you’d be?

And now regrets are vain.”’

50. The Master said, ‘The superior man is not affectionate to others with his countenance (merely) as if, while cold in feeling, he could assume the appearance of affection. That belongs to the small man, and stamps him as no better than the thief who makes a hole in the wall.’

51. The Master said, ‘What is required in feeling is sincerity; in words, that they be susceptible of proof¹.’

52. These were the words of the Master :—‘The ancient and intelligent kings of the three dynasties all served the Spiritual Intelligences of heaven and earth, but invariably used the tortoise-shell and divining stalks. They did not presume to employ their own private judgment in the service of God.

¹ Here ends the 7th section, showing how the superior man strives to be sincere in his words and looks.

In this way they did not transgress in the matter of the day or month, for they did not act contrary to the result of the divination. The tortoise and the shell were not consulted in succession on the same point.

53. 'For the great (sacrificial) services there were (fixed) seasons and days; for the smaller services these were not fixed. They fixed them by divination (near the time). (In divining) about external affairs they used the odd days; and for internal affairs, the even. They did not go against the (intimations of the) tortoise-shell and stalks.'

54. The Master said, 'With the victims perfect, the proper ceremonies and music, and the vessels of grain, (they sacrificed); and thus no injury was received from the Spiritual Powers, and the people had no occasion for dissatisfaction.'

55. The Master said, 'The sacrifices of Hâu Kí were easily provided. His language was reverential; his desires were restricted; and the blessings received extended down to his descendants. It is said in the Book of Poetry (III, ii, ode 1, 8),

"Hâu Kí founded the sacrifice;
No one has failed in it,
Down to the present day."

56. The Master said, 'The shell and stalks employed by the great men¹ must be held in awe and reverence. But the son of Heaven does not divine by the stalks. While the princes are keeping guard in their states, they divine by the stalks. When the son of Heaven is on the road (travelling), he (also) divines by the stalks. In any other state but their

¹ The king and feudal lords.

own they do not divine by the stalks. They consult the tortoise-shell about the chambers and apartments of the houses (where they lodge). The son of Heaven does not so consult the tortoise-shell; he stays always in the grand ancestral temples.'

57. The Master said, 'The men of rank, on occasions of special respect, use their sacrificial vessels. On this account they do not fail to observe the set seasons and days, and do not act contrary to the intimations of the shell and stalks; thus seeking to serve with reverence the ruler and their superiors. In this way superiors are not troublesome to the people, and the people do not take liberties with their superiors¹.'

¹ Paragraphs 52 to 57 from the last section of the Book. They are not so interesting as the previous sections, nor do they hang closely together. 'The section,' say the *Khien-lung* editors, 'treats of the two methods of divination, and also of reverence. Reverence is the subject of the first section, and here again it occurs in the end of the Treatise. Reverence is the beginning and end of the learning of the superior man.'

BOOK XXX. 3ZE 1

OR

THE BLACK ROBES¹.

1. These were the words of the Master²:—
'When the superior is easily served, his inferiors are easily known³, and in this case punishments are not numerous (in the state).'

2. The Master said, 'When (the superior) loves the worthy as (the people of old loved him of) the black robes (Shih, I, vii, ode 1), and hates the bad as Hsiang-po (hated them;—II, v, ode 6), then without the frequent conferring of rank the people are stimulated to be good, and without the use of punishments they are all obedient to his orders. It is said in the Tâ Yâ (III, i, ode 1, 7),

"From Wăn your pattern you must draw,
And all the states will own your law."

3. The Master said, 'If the people be taught by lessons of virtue, and uniformity sought to be given to them by the rules of ceremony, their minds will go on to be good. If they be taught by the laws, and uniformity be sought to be given to them by punishments, their minds will be thinking of how

¹ See the introductory notice, vol. xxvii, pp. 45, 46.

² Thus the Book begins as if it were another section of the preceding Treatise.

³ They are 'easily known,' there being nothing in the ruler's method to make them deceitful.

they can escape (the punishment ;—Analects, II, iii). Hence, when the ruler of the people loves them as his sons, they feel to him as a parent; when he binds them to himself by his good faith, they do not turn away from him; when he presides over them with courtesy, their hearts are docile to him. It is said in the Punishments of Fû (Shû, V, xxvii, 3), "Among the people of Miào they did not use orders simply, but the restraints of punishment. They made the five punishments engines of oppression, calling them the laws." In this way their people became bad, and (their rulers) were cut off for ever (from the land).'

4. The Master said, 'Inferiors, in serving their superiors, do not follow what they command, but what they do. When a ruler loves anything, those below him are sure to do so much more. Therefore the superior should by all means be careful in what he likes and dislikes. This will make him an example to the people¹.'

5. The Master said, 'When Yü had been on the throne three years, the humanity of the common people was in accordance with his ;—was it necessary that all (at court) should be perfectly virtuous? It is said in the Book of Poetry (II, v, ode 7, 1),

"Awe-inspiring are you, O (Grand-)Master Yin,
And the people all look up to you."

It is said in the Punishments of Fû (V, xxvii, 13), "I, the One man, will have felicity, and the millions of the people will look to you as their sure dependence." It is said in the Tâ Yâ (III, i, ode 9, 3),

¹ This again looks very much as if this Treatise were a continuation of the last.

“King Wû secured the people's faith,
And gave to all the law.”’

6. The Master said, ‘When superiors are fond of showing their humanity, inferiors strive to outstrip one another in their practice of it. Therefore those who preside over the people should cherish the clearest aims and give the most correct lessons, honouring the requirement of their humanity by loving the people as their sons; then the people will use their utmost efforts with themselves to please their superiors. It is said in the Book of Poetry (III, iii, ode 2, 2),

“Where from true virtue actions spring,
All their obedient homage bring.”’

7. The Master said, ‘The king's words are (at first) as threads of silk; but when given forth, they become as cords. Or they are (at first) as cords; but when given forth, they become as ropes. Therefore the great man does not take the lead in idle speaking. The superior does not speak words which may be spoken indeed but should not be embodied in deeds; nor does he do actions which may be done in deed but should not be expressed in words. When this is the case, the words of the people can be carried into action without risk, and their actions can be spoken of without risk. It is said in the Book of Poetry (III, iii, ode 2, 8),

“Keep on your acts a watchful eye,
That you may scrutiny defy.”’

8. The Master said, ‘The superior man leads men on (to good) by his words, and keeps them (from evil) by (the example of) his conduct. Hence, in speaking, he must reflect on what may be the end of his words, and examine whether there may not be

some error in his conduct; and then the people will be attentive to their words, and circumspect in their conduct. It is said in the Book of Poetry (III, iii, ode 2, 5),

“Be circumspect in all you say,
And reverent bearing still display.”

It is said in the Tâ Yâ (III, i, ode 1, 4),

“Deep were Wăn’s thoughts, unstained his ways;
His reverence lit its trembling rays.”

9. The Master said, ‘When the heads of the people use no (improper) variations in their dress, and their manners are always easy and unconstrained, and they seek thus to give uniformity to the people, the virtue of the people does become uniform. It is said in the Book of Poetry (II, viii, ode 1, 1),

“In the old capital they stood,
With yellow fox-furs plain;
Their manners all correct and good,
Speech free from vulgar stain.
Could we go back to K’âu’s old days,
All would look up to them with praise.”

10. The Master said, ‘When (the ruler) above can be known by men looking at him, and (his ministers) below can have their doings related and remembered, then the ruler has no occasion to doubt his ministers, and the ministers are not led astray by their ruler. The Announcement of Yin says (Shû, IV, vi, 3), “There were I, Yin, and Thang; both possessed the same pure virtue.” It is said in the Book of Poetry (I, xiv, ode 3, 3),

“In soul so steadfast is that princely man,
Whose course for fault or flaw we vainly scan.”

11. The Master said, ‘When the holders of states

and clans give distinction to the righteous and make it painful for the bad, thus showing the people the excellence (they should cultivate), then the feelings of the people do not swerve (to what is evil). It is said in the Book of Poetry (II, vi, ode 3, 5),

“Your duties quietly fulfil,
And hold the upright in esteem,
With earnest love.”

12. The Master said, ‘When the highest among men has doubts and perplexities, the common people go astray. When (the ministers) below him are difficult to be understood, the toil of the ruler is prolonged. Therefore when the ruler exhibits clearly what he loves, and thus shows the people the style of manners (they should aim at), and is watchful against what he dislikes, and thereby guards the people against the excesses (of which they are in danger), then they do not go astray.

‘When the ministers are exemplary in their conduct, and do not set a value on (fine) speeches; when they do not try to lead (the ruler) to what is unattainable, and do not trouble him with what cannot be (fully) known, then he is not toiled. It is said in the Book of Poetry (III, ii, ode 10, 1),

“Reversed is now the providence of God;
The lower people groan beneath their load.”

It is said in the Hsiáo Yâ (II, v, ode 4, 4),

“They do not discharge their duties,
But only cause distress to the king.”

13. The Master said, ‘When (the measures of) government do not take effect, and the lessons of the ruler do not accomplish their object, (it is because) the giving of rank and emoluments is

unfit to stimulate the people to good, and (the infliction of) punishments and penalties is unfit to make them ashamed (of evil). Therefore (the ruler) above must not be careless in punishing, nor lightly confer rank. It is said in the Announcement to the Prince of Khang (Shû, V, ix, 8), "Deal reverently and understandingly in your infliction of punishments;" and in the Punishments of Fû (Shû, V, xxvii, 12), "He spreads abroad his lessons to avert punishments."

14. The Master said, 'When the great ministers are not on terms of friendly intimacy (with the ruler), and the common people consequently are not restful, this is because the loyalty (of the ministers) and the respect (of the ruler) are not sufficient, and the riches and rank conferred (on the former) are excessive. (The consequence is, that) the great ministers do not discharge their functions of government, and the ministers closer (to the ruler) form parties against them. Therefore the great ministers should by all means be treated with respect; they are examples to the people; and ministers nearer (to the ruler) should by all means be careful;—they direct the way of the people. Let not the ruler consult with inferior officers about greater, nor with those who are from a distance about those who are near to him, nor with those who are beyond the court about those who belong to it. If he act thus, the great ministers will not be dissatisfied; the ministers closer to him will not be indignant; and those who are more remote will not be kept in obscurity. The duke of Sheh in his dying charge said, "Do not by little counsels ruin great enterprises; do not for the sake of a favourite concubine

provoke queen *Kwang*; do not for the sake of a favourite officer provoke your grave officers,—the Great officers or high ministers¹.”

15. The Master said, ‘If the great man be not in affectionate sympathy with (his officers) whom he considers worthy, but give his confidence to others whom he despises, the people in consequence will not feel attached to him, and the lessons which he gives them will be troublesome (and ineffective). It is said in the Book of Poetry (II, ii, ode 8),

“As if I were hidden they sought me at first,

At court for a pattern to shine;

’Tis with hatred intense they now bend their
scowls,

And my services curtly decline.”

It is said in the *Kün-khân* (Shû, V, xxiv, 4), “While they have not seen a sage, (they are full of desire) as if they could not get a sight of him; but after they have seen him, they are still unable to follow him.”

16. The Master said, ‘A small man is drowned in the water; a superior man is drowned or ruined by his mouth; the great man suffers his ruin from the people;—all suffer from what they have played and taken liberties with. Water is near to men, and yet it drowns them. Its nature makes it easy to play with, but dangerous to approach;—men are easily drowned in it. The mouth is loquacious and

¹ This is an error. The dying counsels referred to were not given by any duke of Sheh (a dependency of *K’û*), but by Wân-fû, duke of *Ûái*, to king *Mû* of *K’âu*. They are found with some slight alterations in the Apocryphal Books of *K’âu* (逸周書), Book VIII, article 1. Confucius would not have fallen into such a mistake.

troublesome ; for words once uttered there is hardly a place of repentance ;—men are easily ruined by it. The people, restricted in their humanity, have vulgar and rude minds ; they should be respected, and should not be treated with contempt ;—men are easily ruined by them. Therefore the superior man should by all means be careful in his dealings with them. It is said in the *Thái K'ia* (*Shû*, III, v, sect. 1, 5, 7), "Do not frustrate the charge to me, and bring on yourself your own overthrow. Be like the forester, who, when he has adjusted the string, goes to examine the end of the arrow, whether it be placed according to rule, and then lets go." It is said in the *Charge to Yüeh* (III, viii, sect. 2, 4), "It is the mouth which gives occasion to shame ; they are the coat of mail and helmet which give occasion to war. The upper robes and lower garments (for reward) should not be taken (lightly from) their chests ; before spear and shield are used, one should examine himself." It is said in the *Thái K'ia* (*Shu*, III, v, sect. 2, 3), "Calamities sent by Heaven may be avoided ; but from those brought on by one's self there is no escape." It is said in the *Announcement of Yin* (*Shû*, III, v, sect. 1, 3), "I have seen it myself in *Hsiâ* with its western capital, that when its sovereigns went through a prosperous course to the end, their ministers also did the same."

17. The Master said, 'To the people the ruler is as their heart ; to the ruler the people are as his body. When the heart is composed, the body is at ease ; when the heart is reverent, the body is respectful ; when the heart loves anything, the body is sure to rest in it. (So), when the ruler loves anything, the people are sure to desire it. The

body is the complement of the heart, and a wound in it makes the heart also suffer. So the ruler is preserved by the people, and perishes also through the people. It is said in an ode,

“Once we had that former premier,
His words were wise and pure;
The states and clans by him were at rest,
The chief cities and towns by him were well
regulated,
All the people by him enjoyed their life.
Who (now) holds the ordering of the kingdom?
Not himself attending to the government,
The issue is toil and pain to the people¹.”

It is said in the *K'ün-yâ* (Shû, V, xxv, 5), “In the heat and rain of summer days the inferior people may be described as murmuring and sighing. And so it may be said of them in the great cold of winter.”

18. The Master said, ‘In the service by an inferior of his superior, if his personal character be not correct, his words will not be believed; and in this case their views will not be the same, and the conduct (of the superior) will not correspond (to the advice given to him) ².’

19. The Master said, ‘Words should be capable of proof by instances, and conduct should be conformed to rule; when the case is so, a man’s aim cannot be taken from him while he is alive, nor can his good name be taken away when he is dead. Therefore the superior man, having heard much, verifies it by

¹ This is from an ode not in the *Shih*, and only preserved, so far, here. The three concluding lines, however, are also found in the *Shih*, II, iv, ode 7, 6.

² The meaning of this latter part is matter of dispute.

inquiry, and firmly holds fast (what is proved); he remembers much, verifies it by inquiry, and makes it his own; when he knows it exactly, he carries the substance of it into practice. It is said in the *K'ün-k'ăn* (Shû, V, xxi, 5), "Going out and coming in, seek the judgment of the people about things, till you find a general agreement upon them." It is said in the Book of Poetry (I, xiv, ode 3, 1),

"The virtuous man, the princely one,
Is uniformly correct in his deportment."

20. The Master said, 'It is only the superior man who can love what is correct, while to the small man what is correct is as poison. Therefore the friends of the superior man have the definite aims which they pursue, and the definite courses which they hate. In consequence, those who are near at hand have no perplexities of thought about him, and those who are far off, no doubts. It is said in the Book of Poetry (I, i, ode 1, 1),

"For our prince a good mate."

21. The Master said, 'When a man on light grounds breaks off his friendship with the poor and mean, and only on great grounds with the rich and noble, his love of worth cannot be great, nor does his hatred of evil clearly appear. Though men may say that he is not influenced by (the love of) gain, I do not believe them. It is said in the Book of Poetry (III, ii, ode 3, 4),

"And all the friends assisting you
Behave with reverent mien."

22. The Master said, 'The superior man will not voluntarily remain to share in private acts of kind-

ness not offered on grounds of virtue. In the Book of Poetry it is said (II, i, ode 1, 1),

“They love me, and my mind will teach
How duty’s highest aim to reach.”

23. The Master said, ‘If there be a carriage (before you), you are sure (by-and-by) to see the cross-board (in front); if there be a garment, you are sure (in the same way) to see (the traces of) its being worn; if one speaks, you are sure to hear his voice; if one does anything, you are sure to see the result. It is said in the Book of Poetry (I, i, ode 2, 2),

“I will wear them without being weary of them.”

24. The Master said, ‘When one says anything, and immediately proceeds to act it out, his words cannot embellish it; and when one does anything, and immediately proceeds to describe it, the action cannot be embellished. Hence the superior man saying little, and acting to prove the sincerity of his words, the people cannot make the excellence of their deeds greater than it is, nor diminish the amount of their badness¹. It is said in the Book of Poetry (III, iii, ode 2, 5),

“A flaw in mace of white jade may
By patient toil be ground away;
But for a flaw we make in speech,
What can be done? ’Tis past our reach.”

¹ The excellence and the badness would seem, in the text, to belong to the conduct of the superior man; but to predicate badness of him would be too daring. To justify the view which appears in my translation, the *Khien-lung* editors, in their expansion of the meaning, after ‘the people,’ interpolate ‘who come under the transforming influence of his example.’

It is said in the Hsião Yá (II, iii, ode 5, 8),

“Well does our lord become his place,
And high the deeds his reign have crowned.”

It is said to the Prince Shih (Shû, V, xvi, 11),
“Aforetime, when God beheld the virtue of king
Wăn in the fields of K'âu, he made the great decree
light on his person.”

25. The Master said, ‘The people of the south have a saying that “A man without constancy cannot be a diviner either with the tortoise-shell or the stalks.” This was probably a saying handed down from antiquity. If such a man cannot know the tortoise-shell and stalks, how much less can he know other men¹? It is said in the Book of Poetry (II, v, ode 1, 3),

“Our tortoise-shells are wearied out,
And will not tell us anything about the plans.”

The Charge to Yüeh says (Shû, IV, viii, sect. 2, 5, 11),
“Dignities should not be conferred on men of evil practices. (If they be), how can the people set themselves to correct their ways? If this be sought merely by sacrifices, it will be disrespectful (to the spirits). When affairs come to be troublesome, there ensues disorder; when the spirits are served so, difficulties ensue².”

‘It is said in the Yü, “When one does not conti-

¹ I cannot make anything but this of this sentence, though Khung Ying-tâ takes it differently. The whole paragraph is evidently very corrupt, and even the K'ien-lung editors have put forth all their strength upon it in vain.

² We have here a quotation from the Shû, IV, viii, sect. 2; but it is very different from the textus receptus. All the commentators and critics are at fault upon it; see vol. iii, pp. 115, 116.

nuously maintain his virtue, some will impute it to him as a disgrace¹;—(in the position indicated in the Hexagram.) When one does maintain his virtue continuously (in the other position indicated), this will be fortunate in a wife, but in a husband evil.”

¹ See the symbolism of the 3rd and 5th lines of the Hăng or 32nd Hexagram, vol. xvi, pp. 125-128.

BOOK XXXI. PĀN SANG

OR

RULES ON HURRYING TO MOURNING RITES¹.

1. According to the rules for hurrying to attend the mourning rites, when one first heard that the mourning rites for a relative were going on, he wailed as he answered the messenger², and gave full vent to his sorrow. Having asked all the particulars, he wailed again, with a similar burst of grief, and immediately arranged to go (to the place). He went 100 li a day, not travelling in the night.

2. Only when the rites were those for a father or a mother did he travel while he could yet see the stars, and rested when he (again) saw them³. If it was impossible for him to go (at once)⁴, he assumed the mourning dress, and then went (as soon as he could). When he had passed through the state (where he was), and reached its frontier, he stopped and wailed, giving full vent to his sorrow. He avoided wailing in the market-place and when near the court. He looked towards the frontier of his own state when he wailed.

¹ See the introductory notice, vol. xxvii, pp. 46, 47.

² The mourner is absent from his state, and a messenger has been sent to tell him of the death. The relative, it is argued, may have been any one within the 'five degrees' of consanguinity.

³ That is, from peep of dawn till the stars came out again after sunset.

⁴ Being restrained by the duties of the commission, with which he was charged by the ruler.

3. When he came to the house, he entered the gate at the left side of it, (passed through the court), and ascended to the hall by the steps on the west. He knelt on the east of the coffin, with his face to the west, and wailed, giving full vent to his grief. He (then) tied up his hair in a knot, bared his arms, and went down from the hall, proceeding to his place on the east, where he wailed towards the west. Having completed the leaping, he covered his arms and put on his sash of sackcloth in the corridor on the east; and after tucking up the ends of his sash, he returned to his place. He bowed to the visitors, leaping with them, and escorted them (to the gate), returning (afterwards) to his place. When other visitors arrived, he bowed to them, leaped with them, and escorted them;—all in the same way.

4. (After this), all the principal mourners¹, with their cousins, went out at the gate, stopping there while they wailed. The gate was then closed, and the director told them to go to the mourning shed².

5. At the next wailing, the day after, they tied up their hair, bared their arms, and went through the leaping. At the third wailing next day, they again tied up their hair, bared their arms, and went through the leaping. On these three days, the finishing the mourning dress, bowing to and escorting the visitors, took place as in the first case.

6. If he who has hurried to be present at the

¹ This seems to mean 'all the sons of the departed.' Of course there was really but one 'chief or host-man,' as in par. 6.

² This takes us by surprise. Did all go to the shed? Were there many sheds?

rites were not the presiding mourner on the occasion¹, then that presiding mourner, instead of him, bowed to the visitors and escorted them.

7. When one hurried to the rites, even where they were less than those for a mother or father, which required the wearing of sackcloth, with even edge or frayed, he entered the gate at the left side of it, and stood in the middle of the court-yard with his face to the north, wailing and giving full vent to his sorrow. He put on the cincture for the head and the sackcloth girdle in the corridor on the east, and repaired to his place, where he bared his arms. Then he wailed along with the presiding mourner, and went through the leaping. For the wailing on the second day and the third, they wore the cincture and bared the arms. If there were visitors, the presiding mourner bowed to them on their arrival, and escorted them.

The husbands and wives (of the family) waited for him at the wailing-places for every morning and evening, without making any change.

8. When one hurries to the mourning rites for a mother, he wails with his face to the west, giving full vent to his sorrow. He then ties up his hair, bares his arms, descends from the hall, and goes to his station on the east, where, with his face to the west, he wails and goes through the leaping. After that, he covers his arms and puts on the cincture and sash in the corridor on the east. He bows to the visitors, and escorts them (to the gate) in the same way as if he had hurried to the rites for his

¹ This seems to imply that, in the preceding paragraphs, he had been the principal mourner.

father. At the wailing on the day after, he does not tie up his hair.

9. When a wife¹ hurried to the mourning rites, she went up to the hall by the (side) steps on the east, and knelt on the east of the coffin with her face to the west. There she wailed, giving full vent to her grief. Having put on the lower cincture on the east², she went to the station (for wailing), and there leaped alternately with the presiding mourner.

10. When one, hurrying to the mourning rites, did not arrive while the coffin with the body was still in the house, he first went to the grave; and there kneeling with his face to the north, he wailed, giving full vent to his sorrow. The principal mourners have been waiting for him (at the grave), and have taken their stations,—the men on the left of it, and the wives on the right. Having gone through the leaping, and given full expression to his sorrow, he tied up his hair, and went to the station of the principal mourners on the east. In his headband of sackcloth, and sash with the ends tucked up, he wailed and went through the leaping. He then bowed to the visitors, and returned to his station, going (again) through the leaping, after which the director announced that the business was over³.

11. He then put on the cap, and returned to the

¹ An aunt, sister, or daughter of the family, who was married, and hurried to the family home from her husband's.

² I suppose this was in the corridor on the east. The rule was for the women to dress in an apartment; but a distinction was made between those residing in the house, and those who returned to it for the occasion.

³ It is understood that this mourner was the eldest and rightful son of the deceased.

house. There he entered at the left side of the door, and, with his face to the north, wailed and gave full vent to his sorrow. He then tied up his hair, bared his arms, and went through the leaping. Going to his station on the east, he bowed to the visitors, and went through the leaping. When the visitors went out, the presiding mourner bowed to them, and escorted them. When other visitors afterwards arrived, he bowed to them, went through the leaping, and escorted them in the same way. All the principal mourners and their cousins went out at the gate, wailed there and stopped, when the directors instructed them to go to the shed. At the wailing next day, he bound up his hair and went through the leaping. At the third wailing, he did the same. On the third day he completed his mourning dress (as was required). After the fifth wailing, the director announced that the business was over.

12. Wherein the usages at the rites for a mother differed from those at the rites for a father, was that there was but one tying up of the hair. After that the cincture was worn to the end of the business. In other respects the usages were the same as at the rites for a father.

13. At the rites for other relations, after those for the mother or father, the mourner who did not arrive while the coffin was in the house, first went to the grave, and there wailed with his face to the west, giving full vent to his sorrow. He then put on the cincture and hempen sash, and went to his station on the east, where he wailed with the presiding mourner, and went through the leaping. After this he covered his arms; and if there were visitors, the presiding mourner bowed to them and escorted them away.

If any other visitors afterwards came, he bowed to them, as in the former case, and the director announced that the business was over.

Immediately after he put on the cap, and returned to the house. Entering at the left side of the door, he wailed with his face to the north, giving full vent to his sorrow. He then put on the cincture, bared his arms, and went through the leaping. Going then to the station on the east, he bowed to the visitors, and went through the leaping again. When the visitors went out, the presiding mourner bowed to them and escorted them.

At the wailing next day, he wore the cincture, bared his arms, and went through the leaping. At the third wailing he did the same. On the third day, he put on his mourning-garb; and at the fifth wailing, the director announced that the business was over.

14. When one heard of the mourning rites, and it was impossible (in his circumstances) to hurry to be present at them, he wailed and gave full vent to his grief. He then asked the particulars, and (on hearing them) wailed again, and gave full vent to his grief. He then made a place (for his mourning) where he was, tied up his hair, bared his arms, and went through the leaping. Having covered his arms, and put on the higher cincture and his sash with the ends tucked up, he went (back) to his place. After bowing to (any visitors that arrived), he returned to the place, and went through the leaping. When the visitors went out, he, as the presiding mourner, bowed to them, and escorted them outside the gate, returning then to his station. If any other visitors came afterwards, he bowed to them and went through the leaping, then escorting them as before.

At the wailing next day, he tied up his hair, bared his arms, and went through the leaping. At the third wailing he did the same. On the third day, he put on his mourning-garb, wailed, bowed to his visitors, and escorted them as before.

15. If one returned home after the mourning rites had been completed, he went to the grave, and there wailed and went through the leaping. On the east of it, he tied up his hair, bared his arms, put on the cincture for the head, bowed to the visitors, and went (again) through the leaping. Having escorted the visitors, he returned to his place, and again wailed, giving full vent to his grief. With this he put off his mourning. In the house he did not wail. The principal mourner, in his treatment of him, made no change in his dress; and though he wailed with him (at the grave), he did not leap.

16. Wherein at other observances than those for the death of a mother or father, the usages (of such a mourner) differed from the above, were in the cincture for the head and the hempen sash.

17. In all cases where one made a place for his mourning (away from home), if it were not on occasion of the death of a parent, but for some relative of the classes not so nearly related, he went to the station, and wailed, giving full vent to his sorrow. Having put on the cincture for the head and the girdle on the east, he came back to the station, bared his arms, and went through the leaping. He then covered his arms, bowed to the visitors, went back to the station, wailed, and went through the leaping. (After this), he escorted the guests away, and came back to the station, when the director told him to go to the shed. When the fifth wailing

was ended, on the third day, the presiding mourner came forth and escorted the visitors away. All the principal mourners and their cousins went out at the gate, wailed, and stopped there. The director announced to them that the business was ended. He put on his full mourning-garb, and bowed to the visitors ¹.

18. If the home were far distant from the place which an absent mourner has selected (for his wailing), they completed all their arrangements about dress before they went to it.

19. One hurrying to mourning rites, if they were for a parent, wailed when he looked towards the district (where they had lived); if they were for a relation for whom nine months' mourning was due, he wailed when he could see the gate of his house; if for one to whom five months' mourning was due, he wailed when he got to the door; if for one to whom but three months' mourning was due, he wailed when he took his station.

✓ 20. For one of his father's relations (for whom he did not need to go into mourning) a man wailed in the ancestral temple; for one of his mother or wife's relatives, in the back chamber of the temple; for his teacher, outside the gate of the temple; for a friend, outside the door of the back-chamber; for an acquaintance, in the open country, having pitched a tent for the occasion. Some say the wailing for a mother's relation was in the temple.

¹ The *K'ien-lung* editors think that this last sentence is an erroneous addition to the paragraph. But with other parts of it there are great difficulties, insoluble difficulties, as some of the commentators allow.

21. In all cases where a station was selected, away from the house of mourning, for paying funeral rites, no offerings were put down (for the departed).
- ✓ 22. For the son of Heaven they wailed nine days; for a feudal prince, seven; for a high minister and Great officer, five; for another officer, three.
- ✓ 23. A Great officer, in wailing for the ruler of his state, did not presume to bow to the visitors.
- ✓ 24. Ministers in other states, when they selected a station (for their wailing), did not presume to bow to the visitors.
- ✓ 25. Officers, of the same surname with a feudal prince, (but who were serving in other states), also made a place at which to wail for him (on his death).
- ✓ 26. In all cases where one made a place (at a distance) at which to wail, he bared his arms (only) once.
- ✓ 27. In condoling with (the relations of) an acquaintance (after he has been buried), one first wailed in his house, and afterwards went to the grave, in both cases accompanying the wailing with the leaping. He alternated his leaping with that of the presiding mourner, keeping his face towards the north.
28. At all mourning rites (in a household), if the father were alive, he acted as presiding mourner; if he were dead, and brothers lived together in the house, each presided at the mourning for one of his own family-circle. If two brothers were equally related to the deceased for whom rites were necessary, the eldest presided at those rites; if they were not equally related, the one most nearly so presided.

29. When one heard of the death of a brother or cousin at a distance, but the news did not arrive till the time which his own mourning for him would have taken had expired¹, he (notwithstanding) put on the mourning cincture, bared his arms, and went through the leaping. He bowed to his visitors, however, with the left hand uppermost².

30. The only case in which a place was chosen in which to wail for one for whom mourning was not worn, was the death of a sister-in-law, the wife of an elder brother. For a female member of the family who had married, and for whom therefore mourning was not worn, the hempen sash was assumed.

31. When one had hurried to the mourning rites, and a Great officer came (to condole with him), he bared his arms, and bowed to him. When he had gone through the leaping, he covered his arms. In the case of a similar visit from an ordinary officer, he covered his arms, and then bowed to him.

¹ The deceased would have been only in the degree of relationship, to which five months' mourning was assigned.

² The left hand uppermost made the bow one more appropriate to a festive occasion.

BOOK XXXII. WĀN SANG

OR

QUESTIONS ABOUT MOURNING RITES¹.

1. Immediately after his father's death, (the son ✓ put off his cap, and) kept his hair, with the pin in it, in the bag (of silk); went barefoot, with the skirt of his dress tucked up under his girdle; and wailed with his hands across his breast. In the bitterness of his grief, and the distress and pain of his thoughts, his kidneys were injured, his liver dried up, and his lungs scorched, while water or other liquid did not enter his mouth, and for three days fire was not kindled (to cook anything for him). On this account the neighbours prepared for him gruel and rice-water, which were his (only) meat and drink. The internal grief and sorrow produced a change in his outward appearance; and with the severe pain in his heart, his mouth could not relish any savoury food, nor his body find ease in anything pleasant.

2. On the third day there was the (slighter) dressing (of the corpse). While the body was on the couch it was called the corpse; when it was put into the coffin, it was called *xiū*. At the moving of the corpse, and lifting up of the coffin, (the son) wailed and leaped, times without number. Such was the bitterness of his heart, and the pain of his thoughts, so did his grief and sorrow fill his mind and

¹ See the introductory notice, vol. xxvii, pp. 47, 48.

agitate his spirit, that he bared his arms and leaped, seeking by the movement of his limbs to obtain some comfort to his heart and relief to his spirit.

The women could not bare their arms, and therefore they (merely) pushed out the breast, and smote upon their hearts, moving their feet with a sliding, hopping motion, and with a constant, heavy sound, like the crumbling away of a wall. The expression of grief, sorrow, and deep-seated pain was extreme ; hence it is said, ' With beating of the breast and movement of the feet, did they sorrowfully accompany the body ; so they escorted it away, and so did they come back to meet its essential part.'

When (the mourners) went, accompanying the coffin (to the grave), they looked forward, with an expression of eagerness, as if they were following some one, and unable to get up to him. When returning to wail, they looked disconcerted, as if they were seeking some one whom they could not find. Hence, when escorting (the coffin), they appeared full of affectionate desire ; when returning, they appeared full of perplexity. They had sought the (deceased), and could not find him ; they entered the gate, and did not see him ; they went up to the hall, and still did not see him ; they entered his chamber, and still did not see him ; he was gone ; he was dead ; they should see him again nevermore. Therefore they wailed, wept, beat their breasts, and leaped, giving full vent to their sorrow, before they ceased. Their minds were disappointed, pained, fluttered, and indignant. They could do nothing more with their wills ; they could do nothing but continue sad.

3. In presenting the sacrifice (of repose) in the

ancestral temple¹, (the son) offered it (to his parent) in his disembodied state, hoping that his shade would peradventure return (and enjoy it). When he came back to the house from completing the grave, he did not venture to occupy his chamber, but dwelt in the mourning shed, lamenting that his parent was now outside. He slept on the rushes, with a clod for his pillow, lamenting that his parent was in the ground. Therefore he wailed and wept, without regard to time; he endured the toil and grief for three years. His heart of loving thoughts showed the mind of the filial son, and was the real expression of his human feelings.

4. Some one may ask, 'Why does the dressing not commence till three days after death?' and the answer is:—When his parent is dead, the filial son is sad and sorrowful, and his mind is full of trouble. He crawls about and bewails his loss, as if the dead might come back to life;—how can he hurriedly take (the corpse) and proceed to dress it? Therefore, when it is said that the dressing does not begin till after three days, the meaning is, that (the son) is waiting that time to see if (his father) will come to life. When after three days there is no such return, the father is not alive, and the heart of the filial son is still more downcast. (During this space, moreover), the means of the family can be calculated, and the clothes that are necessary can be provided and made accordingly; the relations and connexions who live at a distance can also arrive. Therefore the sages decided in the case ✓

¹ 'Not the structure so called,' says Khung Ying-tâ, 'but the apartment where the coffin had been;'—now serving for the occasion as a temple.

that three days should be allowed, and the rule was made accordingly.

5. Some one may ask, 'How is it that one with the cap on does not bare his arms, and show the naked body?' and the answer is:—The cap is the most honourable article of dress, and cannot be worn where the body is bared, and the flesh exposed. Therefore the cincture for the head is worn instead of the cap, (when the arms are bared).

6. And so, when a bald man does not wear the cincture, and a hunchback does not bare his arms, and a lame man does not leap, it is not that they do not feel sad, but they have an infirmity which prevents them from fully discharging the usages. Hence it is said that in the rites of mourning it is the sorrow that is the principal thing. When a daughter wails, weeps, and is sad, beats her breast, and wounds her heart; and when a son wails, weeps, is sad, and bows down till his forehead touches the ground, without regard to elegance of demeanour, this may be accepted as the highest expression of sorrow.

7. Some one may ask, 'What is the idea in the cincture?' and the reply is:—The cincture is what is worn while uncapped. The Rule says, 'Boys do not wear (even) the three months' mourning; it is only when the family has devolved on one that he does so.' The cincture, we may suppose, was what was worn in the three months' mourning (by a boy). If he had come to be the representative of the family, he wore the cincture, and carried the staff.

8. Some one may ask, 'What is meant by (using) the staff?' and the answer is:—The staff of bamboo

and that of elaeococcus wood have the same meaning. Hence, for a father they used the black staff of bamboo; and for a mother, the square-cut staff, an elaeococcus branch ¹.

9. Some one may say, 'What is meant by (using) the staff?' and the answer is:—When a filial son mourns for a parent, he wails and weeps without regard to the number of times; his endurances are hard for three years; his body becomes ill and his limbs emaciated; and so he uses a staff to support his infirmity.

10. Thus, while his father is alive he does not dare to use a staff, because his honoured father is still living. Walking in the hall, he does not use the staff;—refraining from doing so in the place where his honoured father is. Nor does he walk hastily in the hall,—to show that he is not hurried. Such is the mind of the filial son, the real expression of human feeling, the proper method of propriety and righteousness. It does not come down from heaven, it does not come forth from the earth; it is simply the expression of the human feelings.

¹ On Book XIII, i, 3 the *K'ien-lung* editors say, that the staff of old men was carried with the root up, and the other end down; but the opposite was the case with the mourner's staff. In breaking off a branch from the elaeococcus, the part which has been torn from the stem is cut square and smooth with a knife. The round stem of the bamboo cane is said by *K'ăn Hào* to symbolise heaven, and so is carried for a father; and the square cut end of the dryandria branch, to symbolise earth, and so is used for a mother. But this fanciful explanation seems to be contrary to what is said in the conclusion of the next paragraph.

BOOK XXXIII. FÛ WǎN

OR

SUBJECTS FOR QUESTIONING ABOUT THE MOURNING DRESS¹.

1. The Directory for Mourning says, 'There are cases in which parties wear deep mourning, while those, in consequence of their connexion with whom they assume it, wear only light.' Such is the mourning for her husband's mother by the wife of the son of a ruler (by a concubine)².

2. 'There are cases in which parties wear light mourning, while those, in consequence of their connexion with whom they assume it, wear deep mourning.' Such is the mourning of a husband for the father or mother of his wife³.

3. 'There are cases in which parties wear mourning, while those, in consequence of their connexion with whom they have a relation with the deceased, wear none.' Such is the case of the wife of a ruler's

¹ See the introductory notice, vol. xxvii, page 48.

² Such a son of a ruler could wear for his mother only the nine months' mourning, as she was but a concubine with an inferior position in the family; but his wife wore mourning for her for a whole year. She was her husband's mother, and the general rule for mourning in such a relation was observed by the wife, without regard to the deceased being only a concubine, and whether the ruler were alive or dead.

³ The wife, of course, observed the three years' mourning for her father or mother; the husband only the three months.

son with the cousins of her husband on the female side ¹.

4. 'There are cases in which parties wear no mourning, while those, in consequence of their connexion with whom they have a relation with the deceased, do wear mourning.' Such is the case of a ruler's son with regard to the father and mother of his wife.

5. The Directory of Mourning says, 'When his mother has been divorced, the son wears mourning for the relatives of the wife whom his father has taken in his mother's place.' When his mother has died ² (without being divorced), a son wears mourning for her relatives. Wearing mourning for his own mother's relatives, he does not do so for those of the step-mother, whom his father may have taken in her place.

6. After the sacrifice at the end of the first year, during the three years' rites, and after the interment has taken place, during those of one year (occurring at the same time), the mourner puts on the old sash of *dolychos* cloth, and the headband of the one year's mourning, wearing (at the same time) the sackcloth of the mourning for nine months.

7. The same thing is done (after the interment) during the nine months' mourning.

8. No change is made (after the interment) during the five months' mourning.

¹ There is no satisfactory account of this case.

² *Khăn Hào* supposed that this mother 'dying' is the wife whom his father has taken in the place of the son's divorced mother. The *Khien-lung* editors rightly point out his error; but it shows how these notices are perplexing, not only to foreigners, but also to native scholars.

9. Where they wore the sash with the roots of hemp wrought into the cloth ¹, they changed it for the dolychos cloth of the three years' mourning ².

10. After the sacrifice at the end of a year, if there occurred an occasion for using the hempen sash with the roots cut off, (the mourner) put on the proper band along with the higher cincture. When the cincture was no longer worn, he put off the band. When it was proper to use the band, the rule was to wear it; and when the occasion for it was over, it was put off ³.

11. In the mourning for five months they did not change the cap worn for the sacrifice at the end of a year. If there were occasion to wear the cincture, then they employed the band proper for the mourning of three months or five months; still keeping on the first dolychos sash. The linen of the three months' mourning did not make it necessary to change the dolychos cloth of the five months; nor the linen of the five months to change the dolychos cloth of the nine months. Where the roots were woven with the cloth, they made a change.

12. On occasion of mourning for a minor, if he were of the highest grade or the middle, they changed the dolychos cloth of the three years' mourning, assuming it when they had completed the months of these intervening rites. This was done not because of the value set on the linen, but because no change was made at the conclusion of

¹ This was done in the mourning for nine months and for one year; not in that for five months and for three.

² That is, after the sacrifice at the end of the first year.

³ This is supplementary, say the *K'ien-lung* editors, to paragraph 8.

the wailing. They did not observe this rule on the death of a minor of the third or lowest grade.

13. The ruler of a state mourned for the son of Heaven for the three years. His wife observed the rule of a lady of her husband's house who had gone to her own married home in mourning for the ruler¹.

14. The heir-son of a ruler did not wear mourning for the son of Heaven².

15. A ruler acted as presiding mourner at the mourning rites for his wife, his eldest son, and that son's wife.

16. The eldest son of a Great officer, by his proper wife, wore the mourning of an ordinary officer for the ruler, and for the ruler's wife and eldest son.

17. When the mother of a ruler had not been the wife (of the former ruler)³, the body of the ministers did not wear mourning (on her death). Only the officers of the harem, the charioteer and the man-at-arms who sat on the left, followed the example of the ruler, wearing the same mourning as he did.

18. For a high minister or Great officer, (during the mourning rites for him), the ruler wore in his place the coarse glazed linen, and also when he went out (on business not connected with the rites). If it were on business connected with them, he wore also the skin-cap and the band round it. Great officers dressed in the same way for one another. At the mourning rites for their wives, they wore the same dress, when they were going to be present at

¹ That is, for a year.

² To avoid suspicion, say the commentators. I do not see it.

³ She must have been a concubine, or some inferior member of the harem. Various circumstances might have concurred to lead to her son's succession to the state.

those rites ; if they went out (on other business), they did not wear it.

19. In all cases of going to see others, the visitor (being in mourning for his parents) did not put off his headband. Even when he was going to the ruler's court, he did not put it off ; it was only at the ruler's gate that (in certain circumstances) he put off his sackcloth. The Directory of Mourning says, 'A superior man will not take away from others their mourning rites ;' and so it was deemed wrong to put off this mourning.

20. The Directory of Mourning says, 'Crimes are many, but the punishments are only five. The occasions for mourning are many, but there are only five varieties of the mourning dress. The occasions must be arranged, according as they are classed in the upper grade or in the lower.'

BOOK XXXIV. KIEN KWÂN

OR

TREATISE ON SUBSIDIARY POINTS IN MOURNING USAGES¹.

1. What is the reason that the headband worn with the frayed sackcloth, for a father, must be made of the fibres of the female plant?

Those fibres have an unpleasant appearance, and serve to show outwardly the internal distress. The appearance of (the mourners), wearing the sackcloth for a father with its jagged edges, corresponds to those fibres. That of one wearing the sackcloth for a mother with its even edges, corresponds to the fibres of the male plant. That of one wearing the mourning of nine months looks as if (the ebullitions of sorrow) had ceased. For one wearing the mourning of five months or of three, his (ordinary) appearance is suitable.

These are the manifestations of sorrow in the bodily appearance².

2. The wailing of one wearing the sackcloth for his father seems to go forth in one unbroken strain;

¹ See the introductory notice, vol. xxvii, pp. 48, 49.

² The 卣 (苧) is commonly understood to be the female plant of hemp, and the 枲 (枲) the male plant; though some writers reverse the application of the names. The fibres of both are dark coloured, those of the female plant being the darker. The cloth woven of them was also of a coarser texture. All admit that the subject here is the mourning band for the head; the staffs borne in the two cases corresponded in colour to the band.

that of one wearing the sackcloth for a mother is now and then broken ; in the mourning of nine months, after the first burst there are three quavers in it, and then it seems to die away ; in the mourning of five and three months, an ordinary wailing is sufficient.

These are the manifestations of sorrow in the modulations of the voice¹.

3. When wearing the sackcloth for a father, one indicates that he hears what is said to him, but does not reply in words ; when wearing that for a mother, he replies, but does not speak of anything else. During the nine months' mourning, he may speak of other things, but not discuss them ; during that for five months or three months, he may discuss other things, but does not show pleasure in doing so.

These are the manifestations of sorrow in speech.

4. When a mourner has assumed the sackcloth for a father, for three days he abstains from food ; for a mother, for two days. When he has commenced the nine months' mourning, he abstains from three meals ; in that of five months or of three, for two. When an ordinary officer takes part in the dressing (of a friend's corpse), he abstains from one meal. Hence at the mourning rites for a father or mother, when the coffining takes place, (the children) take gruel made of a handful of rice in the morning, and the same quantity in the evening. During all the rites for a mother, they eat coarse rice and drink only water, not touching vegetables or fruits. During the nine months' mourning (the mourners) do not eat pickles or sauces ; during that of five months or three, they do not drink prepared liquor, either new or old.

¹ I have read something of the same kind as this account of the 'wailing' in descriptions of the 'keening' at an Irish wake.

These are the manifestations of sorrow in drinking and eating.

5. In the mourning rites for a parent, when the sacrifice of repose has been presented, and the wailing is at an end, (the mourners) eat coarse rice and drink water, but do not take vegetables or fruits. At the end of a year, when the smaller felicitous sacrifice has been offered, they eat vegetables and fruits. After another year, when the greater sacrifice has been offered, they take pickles and sauces. In the month after, the final mourning sacrifice is offered, after which they drink the must and spirits. When they begin to drink these, they first use the must; when they begin to eat flesh, they first take that which has been dried.

6. During the mourning rites for a parent, (the son) occupied the mourning shed, and slept on straw with a clod for his pillow, without taking off the headband or girdle. If they were for a mother (only, and the father were still alive), he occupied the unplastered chamber, (sleeping on) typha rushes with their tops cut off, but not woven together. During the mourning for nine months, there was a mat to sleep on. In that for five months or for three, it was allowed to use a bedstead.

These were the manifestations of sorrow given in the dwelling-places.

7. At the mourning rites for a parent, after the sacrifice of repose, and when the wailing was concluded, the (inclined) posts of the shed were set up on lintels, and the screen (of grass) was clipped, while typha rushes, with the tops cut off, but not woven together, (were laid down for a mat). At the end of a year, and when the smaller felicitous sacrifice had

been offered, (the son) occupied the unplastered chamber, and had a mat to sleep on. After another year, and when the greater felicitous sacrifice had been offered, he returned to his old sleeping apartment. Then, when the final mourning sacrifice was offered, he used a bedstead.

8. The mourning with jagged edges was made with 3 shǎng of hempen threads, each shǎng containing 81 threads; that with even edge, with 4, 5, or 6 shǎng; that for the nine months' mourning with 7, 8, or 9 shǎng; that for the five months, with 10, 11, or 12 shǎng; that for the three months, with 15 shǎng less the half¹. When the thread was manipulated and boiled, no such operation was performed on the woven cloth, and it was called sze (or the material for the mourning of three months).

These were the manifestations of sorrow shown in the fabrics of the different mournings.

9. The sackcloth with jagged edges (worn at first) was made with 3 shǎng, but after the sacrifice of repose when the wailing was over, this was exchanged for a different fabric made with 6 shǎng, while the material for the cap was made with 7 shǎng. The coarse sackcloth for a mother was made with 4 shǎng, exchanged for a material made with 7 shǎng, while the cap was made with one of 8 shǎng.

When the hempen dress is put away (after the burial), grass-cloth is worn, the sash of it being made of triple twist. At the end of the year, and when the first felicitous sacrifice has been offered, (the son) puts on the cap of dyed silk proper to that

¹ K'ü Hsü says, 'Inexplicable!'

sacrifice, and the red collar, still retaining the sash and headband. A son begins at the head, and a woman with the girdle, in putting off their mourning. What is the reason? Because a man considers the head the most important to him, and a woman the waist. In laying aside the mourning, they began with the most important; in changing it, with what was least.

At the end of the second year, and when the greater felicitous sacrifice had been offered, the cap and dress of plain hempen cloth was assumed. After the concluding sacrifice of mourning, in the next month, the black cap and silk of black and white were put on, and all the appendages of the girdle were assumed.

10. Why is it that in changing the mourning they (first) changed what was the lightest? During the wearing of the sackcloth with jagged edges for a father, if when, after the sacrifice of repose and the end of the wailing, there came occasion to wear the even-edged sackcloth for a mother, that, as lighter, was considered to be embraced in the other, and that which was most important was retained.

After the sacrifice at the end of the year, when there occurred occasion for the mourning rites of nine months, both the sackcloth and grass-cloth bands were worn.

During the wearing of the sackcloth for a mother, when, after the sacrifice of repose and the end of the wailing, there came occasion to wear the mourning for nine months, the sackcloth and grass-cloth bands were worn together.

The grass-cloth band with the jagged-edged sackcloth and the hempen band with the even-edged

sackcloth were of the same value. The grass-cloth with the even-edged sackcloth and the hempen band of the nine months' mourning were of the same value. The grass-cloth with the nine months' mourning and the hempen band with that of five months were of the same value. The grass-cloth with the five months' mourning and the hempen with that of three months were of the same value. So they wore them together. When they did so, that which was the lighter was changed first.

BOOK XXXV. SAN NIEN WÂN

OR

QUESTIONS ABOUT THE MOURNING FOR THREE YEARS¹.

1. What purposes do the mourning rites for three years serve?

The different rules for the mourning rites were established in harmony with (men's) feelings. By means of them the differences in the social relations are set forth, and the distinctions shown of kindred as nearer or more distant, and of ranks as more noble or less. They do not admit of being diminished or added to; and are therefore called 'The unchanging rules.'

2. The greater a wound is, the longer it remains; ✓
and the more pain it gives, the more slowly is it healed. The mourning of three years, being appointed with its various forms in harmony with the feelings (produced by the occasion of it), was intended to mark the greatest degree of grief. The sackcloth with jagged edges, the dark colour of the sackcloth and the staff, the shed reared against the wall, the gruel, the sleeping on straw, and the clod of earth for a pillow:—these all were intended to set forth the extremity of the grief.

3. The mourning of the three years came really to an end with (the close of) the twenty-fifth month. The sorrow and pain were not yet ended, and the

¹ See the introductory notice, vol. xxvii, pp. 49, 50.

longing loving thoughts were not yet forgotten ; but in the termination of the mourning dress in this way, was it not shown that there should be an end to the duties rendered to the dead, and that the time was come for the resumption of their duties to the living ?

4. All living creatures between heaven and earth, being endowed with blood and breath, have a certain amount of knowledge. Possessing that amount of knowledge, there is not one of them but knows to love its species. Take the larger birds and beasts :—when one of them has lost its mate, after a month or a season, it is sure to return and go about their old haunts. It turns round and round, utters its cries, now moves, now stops, and looks quite embarrassed and uncertain in its movements, before it can leave the place. Even the smaller birds, such as swallows and sparrows, chatter and cry for a little before they can leave the place. But among all creatures that have blood and breath, there is none which has intelligence equal to man ; and hence the feeling of man on the death of his kindred remains unexhausted even till death.

5. Will any one follow the example of those men who are under the influence of their depraved lusts ? In that case, when a kinsman dies in the morning, he will forget him by the evening. But if we follow the course of such men, we shall find that they are not equal to the birds and beasts. How can they live with their kindred, and not fall into all disorders ?

6. Will he rather follow the example of the superior man who attends to all the methods by which the feeling of grief is set forth ? In that case, the

twenty-five months, after which the mourning of three years comes to an end, will seem to pass as quickly as a carriage drawn by four horses is whirled past a crevice. And if we continue to indulge the feeling, it will prove to be inexhaustible.

7. Therefore the ancient kings determined the proper medium for mourning, and appointed its definite terms. As soon as it was sufficient for the elegant expression of the varied feeling, it was to be laid aside.

8. This being the case, how is it that (in certain cases the mourning lasts) only for a year? The answer is, that in the case of the nearest kindred, there is a break in it at the end of a year.

9. How is that? The answer is:—The interaction of heaven and earth has run its round; and the four seasons have gone through their changes. All things between heaven and earth begin their processes anew. The rules of mourning are intended to resemble this.

10. Then how is it that there are three years' mourning (for a parent)? The answer is:—From the wish to make it greater and more impressive, the time is doubled, and so embraces two round years.

11. What about the mourning for nine months' and the shorter periods? The answer is:—It is to prevent such mourning from reaching (the longer periods).

12. Therefore the three years should be considered as the highest expression of grief in mourning; the three months and five months, as the lowest; while the year and the nine months are between them. Heaven above gives an example; earth beneath, a law; and man between, a pattern. The

harmony and unity that should characterise men living in their kinships are hereby completely shown.

13. Thus it is that in the mourning of three years the highest forms that vary and adorn the ways of men are displayed. Yes, this is what is called the richest exhibition (of human feelings).

14. In this the hundred kings (of all the dynasties) agree, and ancient and modern customs are one and the same. But whence it came is not known.

15. Confucius said, 'A son, three years after his birth, ceases to be carried in the arms of his parents. The mourning of three years is the universal rule of all under heaven.'

BOOK XXXVI. SHĀN Ĩ

OR

THE LONG DRESS IN ONE PIECE¹.

1. Anciently the long dress had definite measurements, so as to satisfy the requirements of the compass and square, the line, the balance, and the steelyard. It was not made so short as to show any of the skin, nor so long as to touch the ground. The outside pieces of the skirt joined, and were hooked together at the side; (the width of) the seam at the waist was half that at the bottom (of the skirt).

2. The sleeve was joined to the body of the dress at the arm-pit, so as to allow the freest movement of the elbow-joint; the length of the lower part admitted of the cuffs being turned back to the elbow. The sash was put on where there were no bones, so as not to interfere with the action of the thighs below or of the ribs above.

3. In the making (of the garment) twelve strips (of the cloth) were used, to correspond to the twelve months. The sleeve was made round, as if fashioned by a disk. The opening at the neck was square, as if made by means of that instrument so named. The cord-like (seam) at the back descended to the ankles, as if it had been a straight line. The edge at the bottom was like the steelyard of a balance, made perfectly even.

4. In this way through the rounded sleeves the arms could be lifted up in walking (for the purpose of salutation) in the most elegant form. The

¹ See the introductory notice, vol. xxvii, p. 50.

cord-like seam of the back and the square-shaped collar about the neck in front, served to admonish (the wearer) how his government should be correct and his righteousness on the square. It is said in the Yí, 'The movement indicated by the second line in Khwăn, divided, is "from the straight (line) to the square¹."' The even edge at the bottom, like the steelyard and balance, admonished him to keep his will at rest, and his heart even and calm.

5. These five rules being observed in the making (of the dress), the sages wore it. In its squareness and roundness they saw its warning against selfishness; in its line-like straightness they saw its admonition to be correct, and in its balance-like evenness they saw its lesson of impartiality. Therefore the ancient kings attached a high value to it; it could be worn in the discharge of both their civil and military duties; in it they could receive visitors and regulate the cohorts of their armies. It was complete, but not extravagant; it ranked in the second class of good dresses².

6. For ornament, while his parents and grandparents were alive, (a son) wore the dress with its border embroidered. If (only) his parents were alive, the ornamental border was blue. In the case of an orphan son³, the border was white. The border round the mouth of the sleeves and all the edges of the dress was an inch and a half wide.

¹ See the symbolism of the second line of the 2nd Hexagram, and especially the lesser symbolism in the 2nd Appendix, from which the quotation is made;—vol. xvi, pages 60 and 268.

² That is, next after the court and sacrificial robes.

³ K'ang says that a son whose father was dead was called 'an orphan son' up to thirty.

BOOK XXXVII. THÂU HŨ

OR

THE GAME OF PITCH-POT¹.

1. According to the rules for Pitch-pot, the host carries the arrows in both his hands put together; the superintendent of the archery carries in the same way the stand² on which the tallies were placed; and an attendant holds in his hand the pot.

2. The host entreats (one of the guests), saying, 'I have here these crooked³ arrows, and this pot with its wry³ mouth; but we beg you to amuse yourself with them.' The guest says, 'I have partaken, Sir, of your excellent drink and admirable viands; allow me to decline this further proposal for my pleasure.' The host rejoins, 'It is not worth the while for you to decline these poor arrows and pot; let me earnestly beg you to try them.' The guest repeats his refusal, saying, 'I have partaken (of your entertainment), and you would still further have me enjoy myself;—I venture firmly to decline.' The host again addresses his request in the same words, and then the guest says, 'I have firmly declined what you request, but you will not allow me to refuse;—I venture respectfully to obey you.'

¹ See the introductory notice, vol. xxvii, pp. 50, 51.

² This was a small stand or tray, with the figure of a stag (or some other animal, according to the rank of the party) carved in wood and put down on it, with a tube by its side in which the tallies were to be placed.

³ These are merely the customary terms of depreciation in which a Chinese speaks of his own things.

The guest then bows twice, and signifies that he will receive (the arrows). The host wheels round, saying, 'Let me get out of the way;' and then at the top of the steps on the east, he bows to the guest and gives him the arrows. The guest wheels round, and says, 'Let me get out of the way¹.'

3. (The host) having bowed, and received the arrows (for himself), advances to the space between the two pillars. He then retires, and returns to his station, motioning also to the guest to go to his mat (for pitching from).

4. The superintendent of the archery comes forward, and measures the distance of the pot (from the mats), which should be a space of the length of two and a half arrows. He then returns to his station, sets forth the stand for the tallies, and with his face to the east, takes eight counters and stands up. He asks the guest to pitch, saying, 'When the arrow goes straight in, it is reckoned an entry. If you throw a second (without waiting for your opponent to pitch), it is not reckoned.' The victor gives the vanquished a cup to drink; and when the cups of decision have been dispatched, the superintendent begs to set up what he calls 'a horse' for the victor. If he set up one horse, then a second, and finally a third, he begs to congratulate the thrower on the number of his horses. He asks the host to pitch in the same way, and with the same words.

5. He orders the cithern-players to strike up

¹ From this point to the end of the paragraph, it is very difficult to make out from the text the sequence of proceedings between the host and guest.

'The pitching,' say the *K'ien-lung* editors, 'has been agreed on.'

'The Fox's Head,' with the same interval between (each repetition of the tune), and the director of the music answers, 'Yes.'

6. When the superintendent announces to them on the left and right that the arrows are all used up, he requests them to pitch again. When an arrow enters, he kneels, and puts down a counter. The partners of the guest are on the right, and those of the host on the left.

7. When they have done pitching, he takes up the counters, and says, 'They have done pitching, both on the left and right; allow me to take the numbers.' He then takes the numbers two by two, and leaves the single counters. After this he takes the single counters, and gives the announcement, saying, 'Such and such a side has the better by so many doubles, or naming the number of the singles.' If they are equal, he says, 'Left and right are equal.'

8. He then orders the cups to be filled, saying, 'Let the cup go round,' and the cup-bearer (of the successful side) replies, 'Yes.' Those who have to drink all kneel, and raising their cups with both hands, say, 'We receive what you give us to drink.' The victors (also) kneel and say, 'We beg respectfully to refresh you.'

9. When this cup has gone round, according to rule, (the superintendent) asks leave to exhibit the 'horses' (of the victorious side). Each 'horse' stands for so many counters. (He who has only) one 'horse' gives it to him who has two, to congratulate him (on his superiority). The usage in congratulating (the most successful) is to say, 'Your three "horses" are all here; allow me to congratulate you on their number.' The guests and host all express their

assent. The customary cup goes round, and the superintendent asks leave to remove the 'horses.'

10. The number of the counters varies according to the place in which they kneel (when playing the game). (Each round is with 4 arrows.) (If the game be in) the chamber, there are 5 sets of these; if in the hall, 7; if in the courtyard, 9. The counters are 1 cubit 2 inches long. The neck of the pot is 7 inches long; its belly, 5; and its mouth is $2\frac{1}{2}$ inches in diameter. It contains a peck and 5 pints. It is filled with small beans, to prevent the arrows from leaping out. It is distant from the mats of the players, the length of $2\frac{1}{2}$ arrows. The arrows are made of mulberry wood, or from the zizyphus, without the bark being removed.

11. In Lû, the young people (taking part in the game) were admonished in these words, 'Do not be rude; do not be haughty; do not stand awry; do not talk about irrelevant matters; for those who stand awry, or speak about irrelevant matters, there is the regular (penal) cap.' A similar admonition in Hsieh was to this effect:—'Do not be rude; do not be haughty; do not stand awry; do not speak about irrelevant matters. Those who do any of these things must pay the penalty.'

12. The superintendent of the archery, the overseer of the courtyard, and the capped officers who stood by, all belonged to the party of the guest. The musicians and the boys who acted as attendants, all belonged to the party of the host.

13. There follows after this what appears to be a representation of the progress of a game by means of small circles and squares. The circles indicating blows on a small drum

called phî, and the squares, blows on the larger drum (kû);—according, we may suppose, to certain events in the game. The ‘drum’ marks are followed by what are called ‘halves’ or semis. The representation is:—

Semis.						Drums.					
○	○	□	○			○	○	○	○		
□	□	○	□			□	□	□	□		
○	□	○	○			○	□	○			

Then follows the representation of a game in Lû:—

Semis.						Lû drums.					
○	○					○	□	□	○	○	
□	□					□	○	○	□	□	
□	○					□	□	○	□	○	
○	○					○	○	□	○	○	

There is then a remark that in the Hsieh drums the semi marks were used for the game of pitch-pot, and all the marks for the archery game; and then we have:—

Semis.	Hsieh drums.					Semis.	Lû drums.	
○ ○	○	○	□	○	○	○ ○ ○	□ ○	
○ □		□	○	□	□	□ ○ □	○ □	
○ ○		○	○	○	○	○ ○ ○	○ ○	
□ □		○	○	□	○	○ ○	○	
○ ○		□	□	○	○	□ □	□	

BOOK XXXVIII. ZŪ HSING

OR

THE CONDUCT OF THE SCHOLAR¹.

1. Duke Âi of Lû asked Confucius, saying, 'Is not the dress, Master, which you wear that of the scholar²?' Confucius replied, 'When I was little, I lived in Lû, and wore the garment with large sleeves; when I was grown up, I lived in Sung, and was then capped with the *kang-fû* cap³. I have heard that the studies of the scholar are extensive, but his dress is that of the state from which he sprang. I do not know any dress of the scholar.'

2. The duke said, 'Allow me to ask what is the conduct of the scholar.' Confucius replied, 'If I were to enumerate the points in it summarily, I could not touch upon them all; if I were to go into details on each, it would take a long time. You would have changed all your attendants-in-waiting before I had concluded⁴.' The duke ordered a mat

¹ See the introductory notice, vol. xxvii, pp. 51, 52.

² Callery renders *Zû* here by 'le Philosophe.' Evidently there was in Confucius' time a class of men, thus denominated, distinguished by their learning and conduct. The name first occurs in the *Kâu Lî*. It is now used for the literati of China, the followers of Confucius, in distinction from *Tâoists* and *Buddhists*.

³ See vol. xxvii, page 438, paragraph 3. Confucius' ancestors belonged to the state of Sung, the representative of the ancient Yin.

⁴ It was the custom for a ruler to change his attendants-in-waiting, so as not to overtire any.

to be placed for him, and Confucius took his place by his side.

3. He then said, 'The scholar has a precious gem placed upon its mat, with which he is waiting to receive an invitation (from some ruler)¹; early and late he studies with energy, waiting to be questioned. He carries in his bosom leal-heartedness and good faith, waiting to be raised (to office); he is vigorous in all his doings, waiting to be chosen (to employment):—so does he establish his character and prepare himself (for the future).

4. 'The scholar's garments and cap are all fitting and becoming; he is careful in his undertakings and doings: in declining great compliments he might seem to be rude, and in regard to small compliments, hypocritical; in great matters he has an air of dignity, and in small matters, of modesty; he seems to have a difficulty in advancing, but retires with ease and readiness; and he has a shrinking appearance, as if wanting in power:—such is he in his external appearance.

5. 'The scholar, wherever he resides, ordinarily or only for a time, is grave as if he were apprehensive of difficulties; when seated or on foot, he is courteous and respectful; in speaking, his object is, first of all, to be sincere; in acting, he wishes to be exact and correct; on the road, he does not strive about the most difficult or easiest places; in winter and summer, he does not strive about the temperature, the light and shade; he guards against death that he may be in waiting (for whatever he may be called to); he attends well to his person that he may be

¹ Compare Analects IX, 12. The gem is the scholar's virtue,—his character and capacities.

ready for action:—such are his preparations and precautions for the future.

6. 'The scholar does not consider gold and jade to be precious treasures, but leal-heartedness and good faith; he does not desire lands and territory, but considers the establishment of righteousness as his domain; he does not desire a great accumulation of wealth, but looks on many accomplishments as his riches; it is difficult to win him, but easy to pay him; it is easy to pay him, but difficult to retain him. As he will not show himself when the time is not proper for him to do so, is it not difficult to win him? As he will have no fellowship with what is not righteous, is it not difficult to retain him? As he must first do the work, and then take the pay, is it not easy to pay him?—such are the conditions of his close association with others.

7. 'Though there may be offered to the scholar valuable articles and wealth, and though it be tried to enervate him with delights and pleasures, he sees those advantages without doing anything contrary to his sense of righteousness; though a multitude may attempt to force him (from his standpoint), and his way be stopped by force of arms, he will look death in the face without changing the principles (which) he maintains; (he would face) birds and beasts of prey with their talons and wings, without regard to their fierceness; he would undertake to raise the heaviest tripod, without regard to his strength; he has no occasion to regret what he has done in the past, nor to make preparations for what may come to him in the future; he does not repeat any error of speech; any rumours against him he does not pursue up to their source; he does not allow his

dignity to be interrupted; he does not dread to practise (beforehand) the counsels (which he gives):—such are the things in which he stands out and apart from other men.

8. [‘With the scholar friendly relations may be cultivated, but no attempt must be made to constrain him; near association with him can be sought, but cannot be forced on him; he may be killed, but he cannot be disgraced;] in his dwelling he will not be extravagant; in his eating and drinking he will not be luxurious; he may be gently admonished of his errors and failings, but he should not have them enumerated to him to his face:—such is his boldness and determination. ✓

9. ‘The scholar considers leal-heartedness and good faith to be his coat-of-mail and helmet; propriety and righteousness to be his shield and buckler; he walks along, bearing aloft over his head benevolence; he dwells, holding righteousness in his arms before him; the government may be violently oppressive, but he does not change his course:—such is the way in which he maintains himself. ✓

10. ‘The scholar may have a house in (only) a mǎu of ground,—a (poor) dwelling each of whose (surrounding) walls is (only) ten paces long, with an outer door of thorns and bamboos, and openings in the wall, long and pointed; within, the inner door stopped up by brushwood, and little round windows like the mouth of a jar¹; the inmates may have to

¹ This is a picture of squalid poverty, in which it is not easy to understand all the details without a discussion of the force of the Chinese characters, on which it is impossible to enter here. With all the discussion which they have received from the critics, there are still difficulties in interpreting the paragraph.

exchange garments when they go out; they may have to make one day's food serve for two days; if the ruler respond to him, he does not dare to have any hesitation (in accepting office); if he do not respond, he does not have recourse to flattery:—such is he in the matter of taking office, (however small).

11. 'The scholar lives and has his associations with men of the present day, but the men of antiquity are the subjects of his study. Following their (principles and example) in the present age, he will become a pattern in future ages. If it should be that his own age does not understand and encourage him, that those above him do not bring him, and those below him do not push him, forward, or even that calumniators and flatterers band together to put him in danger, his person may be placed in peril, but his aim cannot be taken from him. Though danger may threaten him in his undertakings and wherever he is, he will still pursue his aim, and never forget the afflictions of the people, (which he would relieve):—such is the anxiety which he cherishes.

✓ 12. 'The scholar learns extensively, but never allows his researches to come to an end; he does what he does with all his might, but is never weary; he may be living unnoticed, but does not give way to licentiousness; he may be having free course in his acknowledged position, but is not hampered (by it); in his practice of ceremonial usages he shows the value which he sets on a natural ease; in the excellence of his leal-heartedness and good faith, he acts under the law of a benignant playfulness; he shows his fond regard for men of virtue and ability, and yet

is forbearing and kind to all ; he (is like a potter who) breaks his square (mould), and his tiles are found to fit together :—such is the largeness and generosity of his spirit.

13. 'The scholar recommends members of his own family (to public employment), without shrinking from doing so, because of their kinship, and proposes others beyond it, without regard to their being at enmity with him ; he estimates men's merits, and takes into consideration all their services, selecting those of virtue and ability, and putting them forward, without expecting any recompense from them ; the ruler thus gets what he wishes, and if benefit results to the state, the scholar does not seek riches or honours for himself :—such is he in promoting the employment of the worthy and bringing forward the able.

14. 'The scholar when he hears what is good, tells it to (his friends), and when he sees what is good, shows it to them ; in the view of rank and position, he gives the precedence to them over himself ; if they encounter calamities and hardships, he is prepared to die with them ; if they are long (in getting advancement), he waits for them ; if they are far off, he brings them together with himself :—such is he in the employment and promotion of his friends.

15. 'The scholar keeps his person free from stain, and continually bathes (and refreshes) his virtue ; he sets forth what he has to say (to his superior by way of admonition), but remains himself in the back-ground, trying thus quietly to correct him ; if his superior do not acknowledge (his advice), he more proudly and clearly makes his views known, but still does

not press them urgently; he does not go among those who are low to make himself out to be high, nor place himself among those who have little (wisdom) to make himself out to have much; in a time of good government, he does not think little (of what he himself can do); in a time of disorder, he does not allow his course to be obstructed; he does not (hastily) agree with those who think like himself, nor condemn those who think differently:—so does he stand out alone among others and take his own solitary course.

16. ‘The scholar sometimes will not take the high office of being a minister of the son of Heaven, nor the lower office of serving the prince of a state; he is watchful over himself in his retirement, and values a generous enlargement of mind, while at the same time he is bold and resolute in his intercourse with others; he learns extensively that he may know whatever should be done; he makes himself acquainted with elegant accomplishments, and thus smoothes and polishes all his corners and angles; although the offer were made to share a state with him, it would be no more to him than the small weights of a balance; he will not take a ministry, he will not take an office:—such are the rules and conduct he prescribes to himself.

17. ‘The scholar has those with whom he agrees in aim, and pursues the same objects, with whom he cultivates the same course, and that by the same methods; when they stand on the same level with him, he rejoices in them; if their standing be below his, he does not tire of them; if for long he has not seen them, and hears rumours to their prejudice, he does not believe them; his actions are rooted in

correctness, and his standing is in what is right¹; if they proceed in the same direction with him, he goes forward with them, if not in the same direction, he withdraws from them:—so is he in his intercourse with his friends.

18. 'Gentleness and goodness are the roots of humanity; respect and attention are the ground on which it stands; generosity and large-mindedness are the manifestation of it; humility and courtesy are the ability of it; the rules of ceremony are the demonstration of it; speech is the ornament of it; singing and music are the harmony of it; sharing and distribution are the giving of it. The scholar possesses all these qualities in union and has them, and still he will not venture to claim a perfect humanity on account of them:—such is the honour (he feels for its ideal), and the humility (with which) he declines it (for himself).

19. 'The scholar is not cast down, or cut from his root, by poverty and mean condition; he is not elated or exhausted by riches and noble condition; he feels no disgrace that rulers and kings (may try to inflict); he is above the bonds that elders and superiors (may try to impose); and superior officers cannot distress him. Hence he is styled a scholar. Those to whom the multitude now-a-days give that name have no title to it, and they constantly employ it to one another as a term of reproach.'

When Confucius came (from his wanderings to Lû) to his own house, duke Âi gave him a (public) lodging. When the duke heard these words, he became more sincere in his speech, and more

¹ I suspect there is here some error in the text.

righteous in his conduct. He said, 'To the end of my days I will not presume to make a jest of the name of scholar¹.'

¹ It is doubtful whether any of this paragraph should be ascribed to Confucius, even in the sense in which we receive the preceding paragraphs as from him. Evidently the latter half of it is a note by the compiler to show the effect which the long discourse had on duke Âi.

BOOK XXXIX. TÂ HSIO

OR

THE GREAT LEARNING¹.

✓ 1. What the Great Learning teaches, is to illustrate illustrious virtue; to love the people²; and to rest in the highest excellence.

The point where to rest being known, the object of pursuit is then determined; and, that being determined, a calm unperturbedness may be attained to. To that calmness there will succeed a tranquil repose. In that repose there will be careful deliberation, and that deliberation will be followed by the attainment (of the desired end).

Things have their root and their branches; affairs have their end and their beginning. To know what is first and what is last will lead near to what is taught (in the Great Learning).

2. The ancients who wished to illustrate illustrious virtue throughout the kingdom, first ordered well their states. Wishing to order well their states, they first regulated their families. Wishing to regulate their families, they first cultivated their persons. Wishing to cultivate their persons, they

¹ See the introductory notice, vol. xxvii, pp. 53, 54.

² The text of the Tâ Hsio, since the labours of K'û Hsî upon it, reads here—'to renovate,' instead of 'to love,' the people. K'û adopted the alteration from Po-shun, called also Ming-táo, one of his 'masters,' the two brothers K'häng; but there is really no authority for it.

first rectified their hearts. Wishing to rectify their hearts, they first sought to be sincere in their thoughts. Wishing to be sincere in their thoughts, they first extended to the utmost their knowledge.

3. The extension of knowledge is by the investigation of things¹.

4. Things being investigated, their knowledge became complete. Their knowledge being complete, their thoughts were sincere. Their thoughts being sincere, their hearts were then rectified. Their hearts being rectified, their persons were cultivated. Their persons being cultivated, their families were regulated. Their families being regulated, their states were rightly governed. Their states being rightly governed, the whole kingdom was made tranquil and happy.

From the son of Heaven down to the multitudes of the people, all considered the cultivation of the person to be the root (of everything besides). It cannot be, when the root is neglected, that what should spring from it will be well ordered. It never has been the case that what was of great importance has been slightly cared for, and at the same time what was of slight importance has been greatly cared for².

¹ There is great difficulty in determining the meaning of this short sentence. What Kǎng and Khung Ying-tá say on it is unsatisfactory. Kú introduces a long paragraph explaining it from his master Kǎng;—see Chinese Classics, vol. i, pp. 229, 239.

² Here ends the first chapter of the Book according to the arrangement of Kú Hsî. He says that it is 'the words of Confucius, handed down by Ǵǎng-ǵze,' all the rest being the commentary of Ǵǎng-ǵze, recorded by his disciples. The sentiments in this chapter are not unworthy of Confucius; but there is no

This is called 'knowing the root,' this is called 'the perfection of knowledge.'

5. What is called 'making the thoughts sincere' is the allowing no self-deception ;—as when we hate a bad smell and love what is beautiful, naturally and without constraint. Therefore the superior man must be watchful over himself when he is alone. There is no evil to which the small man, dwelling retired, will not proceed ; but when he sees a superior man, he tries to disguise himself, concealing his evil, and displaying what is good. The other beholds him as if he saw his heart and reins ;—of what use (is his disguise) ? This is an instance of the saying, 'What truly is within will be manifested without.' Therefore the superior man must be watchful over himself when he is alone.

6. 3ǎng-ze said, 'What ten eyes behold, what ten hands point to, is to be regarded with reverence'.¹ (As) riches adorn a house, so virtue adorns the person. When the mind becomes enlarged, the body appears at ease. Therefore the superior man is sure to make his thoughts sincere.

7. It is said in the Book of Poetry (I, v, ode 1, 1),
'How rich the clumps of green bamboo,
Around each cove of *K'hi* !

evidence that they really proceeded from him, nor of the other assertions of *K'ü*. See what is said on the subject in the introductory notice.

¹ This saying is from 3ǎng-ze ; but standing as it does alone and apart, it gives no sanction to the view that the first chapter was handed down by him, or the rest of the Book compiled by his disciples. Rather, the contrary. 'The ten eyes and ten hands,' says Lo Kung-fân, 'indicate all the spirits who know men's inmost solitary thoughts.'

They lead my thoughts to our duke Wû;—
 Of winning grace is he!
 As knife and file make smooth the bone,
 As jade by chisel wrought and stone,
 Is stamp upon him set.
 Grave and of dignity serene;
 With force of will as plainly seen;
 Accomplished, elegant in mien;
 Him we can ne'er forget.'

(That expression), 'as knife and file make smooth the bone,' indicates the effect of learning. 'Like jade by chisel wrought and stone' indicates that of self-culture. 'Grave and of dignity serene' indicates the feeling of cautious reverence. 'With force of will as plainly seen' indicates an awe-inspiring deportment. (The lines),

'Accomplished, elegant in mien,
 Him can we ne'er forget,'

indicate how when virtue is complete, and excellence extreme, the people cannot forget them.

8. It is said in the Book of Poetry (IV, i, ode 4),

'The former kings in mind still bear,
 What glory can with theirs compare?'

Superior men deem worthy whom they deemed worthy, and love whom they loved. The inferior people delight in what they delighted in, and are benefited by their beneficial arrangements. It is on this account that the former kings, after they have quitted the world, are not forgotten.

9. It is said in the Announcement to the Prince of Khang (Shû, V, ix, 3),

'He was able to make his virtue illustrious.'

It is said in the Thâi Kíá, 'He kept his eye

continually on the bright requirements of Heaven' (Shû, III, v, sect. 1, 2).

It is said in the Canon of the Tî (Yáo), 'He was able to make illustrious his lofty virtue' (Shû, I, 2).

These (passages) all show how (those sovereigns) made themselves illustrious.

10. On the bathing-tub of Thang¹, the following words were engraved, 'If you can one day renovate yourself, do so from day to day. Yea, daily renovate yourself.'

In the Announcement to the Prince of Khang it is said, 'Stir up the new people' (Shû, V, ix, 7).

In the Book of Poetry it is said (III, i, 1, 1),

'The state of Kâu had long been known;
Heaven's will as new at last was shown.'

Therefore the superior man in everything uses his utmost endeavours².

11. It is said in the Book of Poetry (IV, iii, 3),

'A thousand li extends the king's domain,
And there the people to repose are fain.'

And in another place (II, viii, 1),

'Titters fast the oriole
Where yonder bends the mound,
The happy little creature
Its resting-place has found.'

The Master said, 'Yes, it rests; it knows where

¹ A fact not elsewhere noted. But such inscriptions are still common in China.

² The repeated use of 'new,' 'renovated,' in this paragraph, is thought to justify the change of 'loving the people,' in paragraph 1, to 'renovating the people;' but the object of the renovating here is not the people.

to rest. Can one be a man, and yet not equal (in this respect) to this bird ?'

12. It is said in the Book of Poetry (III, i, 1, 4),
'Deep were Wăn's thoughts, sustained his ways;
And reverent in each resting-place.'

As a ruler, he rested in benevolence ; as a minister, he rested in respect ; as a son, he rested in filial piety ; as a father, he rested in kindness ; in intercourse with his subjects, he rested in good faith.

13. The Master said, 'In hearing litigations, I am like any other body.' What is necessary is to cause the people to have no litigations, so that those who are devoid of truth shall find it impossible to carry out their speeches, and a great awe be struck into the minds of the people.

14. This is called 'knowing the root'¹.

15. What is meant by 'The cultivation of the person depends on the rectifying of the mind' (may be thus illustrated):—If a man be under the influence of anger, his conduct will not be correct. The same will be the case, if he be under the influence of terror, or of fond regard, or of sorrow and distress. When the mind is not present, we look and do not see ; we hear and do not understand ; we eat and do not know the taste of what we eat. This is what is meant by saying that 'the cultivation of the person depends on the rectifying of the mind.'

16. What is meant by 'The regulation of the family depends on the cultivation of the person'

¹ It is certainly difficult to see how paragraphs 13, 14 stand where they do. Lo Kung-fân omits them.

is this :—Men are partial where they feel affection and love ; partial where they despise and dislike ; partial where they stand in awe and with a feeling of respect ; partial where they feel sorrow and compassion ; partial where they are arrogant and rude. Thus it is that there are few men in the world who love and at the same time know the bad qualities (of the object of their love), or who hate and yet know the good qualities (of the object of their hatred). Hence it is said, in the common adage, ' A man does not know the badness of his son ; he does not know the richness of his growing corn.' This is what is meant by saying, that ' if his person be not cultivated, a man cannot regulate his family.'

17. What is meant by 'In order to govern well his state, it is necessary first to regulate his family' is this :—It is not possible for one to teach others while he cannot teach his own family. Therefore the superior man (who governs a state), without going beyond his family, completes the lessons for his state. There is filial piety ;—it has its application in the service of the ruler. There is brotherly obedience ;—it has its application in the service of elders. There is kindly gentleness ;—it has its application in the employment of the multitudes. It is said in the Announcement to the Prince of Khang (Shû, V, ix, 9), '(Deal with the people), as if you were watching over an infant.' If (a mother) be really anxious about it, though she may not hit (exactly the wants of her infant), she will not be far from doing so. There never has been (a girl) who learned (first) to bring up an infant that she might afterwards be married.

18. From the loving (example) of one family,

a whole state may become loving, and from its courtesies, courteous, while from the ambition and perverseness of the One man, the whole state may be thrown into rebellious disorder ;—such is the nature of the influence. This is in accordance with the saying, ‘Affairs may be ruined by a single sentence ; a state may be settled by its One man.’

19. Yáo and Shun presided over the kingdom with benevolence, and the people followed them. Kieh and Kâu did so with violence, and the people followed them. When the orders of a ruler are contrary to what he himself loves to practise the people do not follow him.

20. Therefore the ruler must have in himself the (good) qualities, and then he may require them in others ; if they are not in himself, he cannot require them in others. Never has there been a man who, not having reference to his own character and wishes in dealing with others, was able effectually to instruct them. Thus we see how ‘the government of the state depends on the regulation of the family.’

21. In the Book of Poetry it is said (I, i, 6, 3),

‘Graceful and young the peach-tree stands,
Its foliage clustering green and full.
This bride to her new home repairs ;
Her household will attest her rule.’

Let the household be rightly ordered, and then the people of the state may be taught.

In another ode it is said (II, ii, 9, 3),

‘In concord with their brothers may they dwell !’

Let rulers dwell in concord with all their brethren, and then they may teach the people of their states.

In a third ode it is said (I, xiv, 3, 3),

‘His movements without fault or flaw beget
Good order for his rule throughout the state.’

When the ruler as a father, a son, an elder brother or a younger, is a model for imitation, then the people imitate him. These (passages) show how ‘the government of a state depends on the regulation of the family.’

22. What is meant by ‘The making the whole kingdom peaceful and happy depends on the government of its states’ is this:—When the superiors behave to their aged as the aged should be behaved to, the people become filial; when they behave to their elders as elders should be behaved to, the people learn brotherly submission; when they treat compassionately the young and helpless, the people do the same. Thus the superior man has a principle with which, as with a measuring square, to regulate his course.

23. What a man dislikes in his superiors, let him not display in his treatment of his inferiors; and what he dislikes in his inferiors, let him not display in his service of his superiors: what he dislikes in those who are before him, let him not therewith precede those who are behind him; and what he dislikes in those who are behind him, let him not therewith follow those who are before him: what he dislikes to receive on the right, let him not bestow on the left; and what he dislikes to receive on the left, let him not bestow on the right:—this is what is called ‘The Principle with which, as with a measuring square, to regulate one’s course.’

24. In the Book of Poetry it is said (II, ii, 7, 3),

‘To be rejoiced in are these noble men,
The parents of the people!’

When (a ruler) loves what the people love, and hates what the people hate, then is he what is called 'The Parent of the People.'

25. In the Book of Poetry it is said (II, iv, 7, 1),
 'That southern hill, sublime, uprears its craggy height ;
 Such thou, Grand-master Yin, before the nation's sight !'

Rulers of states should not neglect to be careful. If they deviate (to a selfish regard only for themselves), they will be counted a disgrace throughout the kingdom.

26. In the Book of Poetry it is said (III, i, 1, 6),
 'Ere Shang had lost the nation's heart,
 Its monarchs all with God had part
 In sacrifice. From them we see
 'Tis hard to keep High Heaven's decree.'

This shows that by gaining the people, the state is gained ; and by losing the people, the state is lost.

Therefore the ruler should first be careful about his (own) virtue. Possessing virtue will give him the people. Possessing the people will give him the territory. Possessing the territory will give him its wealth. Possessing the wealth, he will have resources for expenditure.

Virtue is the root ; wealth is the branches. If he make the root his secondary object, and the branches his primary object, he will only quarrel with the people, and teach them rapine. Hence the accumulation of wealth is the way to scatter the people, and the distribution of his wealth is the way to collect the people. Hence (also), when his words go forth contrary to right, they will come back to

him in the same way, and wealth got by improper ways will take its departure by the same.

27. It is said in the Announcement to the Prince of Khang (Shû, V, ix, 2, 3), 'The decree (of Heaven) is not necessarily perpetual.' That is, goodness obtains the decree, and the want of goodness loses it.

28. In a Book of *K'û* it is said¹, 'The state of *K'û* does not consider (such a toy) to be precious. Its good men are what it considers to be precious.'

29. Fan, the maternal uncle (of duke Wăn of Jin), said, 'A fugitive (like you) should not account (that) to be precious. What he should consider precious is the affection due (even) to his (deceased) parent².'

30. It is said in the Speech of (duke Mû of) *K'ên* (Shû, V, xxx, 6, 7), 'Let me have but one minister, plain and sincere, not possessed of other abilities, but with a simple, upright, and at the same time a generous, mind, regarding the talents of others as if they were his own; and when he finds accomplished and perspicacious men, loving them in his heart more than his mouth expresses, and really showing himself able to bear them (and employ them),—such a minister will be able to preserve my sons and grandsons, and other benefits (to the state) may well be expected from him. But if (it be his character), when he finds men of ability, to be

¹ The narratives about *K'û*, Section II, Article 5, in the 'Narratives of the States.' The exact characters of the text are not found in the article, but they might easily arise from what we do find. An officer of Jin is asking Wang-sun Wei, an envoy from *K'û*, about a famous girdle of that state. The envoy calls it a toy, and gives this answer.

² See vol. xxvii, page 165, paragraph 19.

jealous of them and hate them ; and, when he finds accomplished and perspicacious men, to oppose them, and not allow their advancement, showing himself really not able to bear them,—such a man will not be able to protect my sons and grandsons, and black-haired people ; and may he not also be pronounced dangerous (to the state) ?’

31. It is only the truly virtuous man that can send away such a man and banish him, driving him out among the barbarous tribes around, determined not to dwell with him in the Middle states. This is in accordance with the saying, ‘It is only the truly virtuous man who can love others or can hate others.’

32. To see men of worth, and not be able to raise them to office ; to raise them to office, but not to do so quickly :—this is treating them with disrespect. To see bad men, and not to be able to remove them ; to remove them, but not to do so to a distance :—this is weakness.

33. To love those whom men hate, and to hate those whom men love :—this is to outrage the natural feeling of men. Calamities are sure to come on him who does so.

34. Thus we see that the ruler has a great course to pursue. He must show entire self-devotion and sincerity to succeed, and by pride and extravagance he will fail.

35. There is a great course (also) for the production of wealth. Let the producers be many, and the consumers few. Let there be activity in the production, and economy in the expenditure. Then the wealth will always be sufficient.

36. The virtuous (ruler) uses his wealth so as to

make himself more distinguished. The vicious ruler will accumulate wealth, even though it cost him his life.

37. Never has there been a case of the superior loving benevolence, and his inferiors not loving righteousness. Never has there been a case where (his inferiors) loved righteousness, and the business (of the superior) has not reached a happy issue. Never has there been a case where the wealth accumulated in the treasuries and arsenals (of such a ruler and people) did not continue to be his.

38. Mang Hsien-ze¹ said, 'He who keeps his team of horses² does not look after fowls and pigs. The family which has its stores of ice³ does not keep cattle or sheep. The house which possesses a hundred chariots⁴ should not keep a grasping minister to gather up all the taxes for it. Than have such a minister, it would be better to have one who would rob it of its revenues.' This is in accordance with the saying, 'In a state gain should not be considered prosperity; its prosperity lies in righteousness.'

39. When he who presides over a state or a family makes his revenues his chief business, he must be under the influence of some small man. He may consider him to be good; but when such a person is employed in the administration of a state

¹ The worthy minister of Lû, mentioned in vol. xxvii, p. 154, et al. His name was Kung-sun Mieh. Hsien was his posthumous title.

² An officer who has just attained to be a Great officer, and received from the ruler the carriage of distinction.

³ To be used in sacrificing; but, we may suppose, for other uses as well.

⁴ A dignitary, possessing an appanage.

or family, calamities and injuries will befall it together; and though a good man (may take his place), he will not be able to remedy the evil. This illustrates (again) the saying, 'In a state gain should not be considered prosperity; its prosperity should be sought in righteousness.'

BOOK XL. KWAN Í

OR

THE MEANING OF THE CEREMONY OF CAPPING¹.

1. Generally speaking, that which makes man man is the meaning of his ceremonial usages. The first indications of that meaning appear in the correct arrangement of the bodily carriage, the harmonious adjustment of the countenance, and in the natural ordering of the speech. When the bodily carriage is well arranged, the countenance harmoniously adjusted, and speech naturally ordered, the meaning of the ceremonial usages becomes complete, and serves to render correct the relation between ruler and subject, to give expression to the affection between father and son, and to establish harmony between seniors and juniors. When the relation between ruler and subject is made correct, affection secured between father and son, and harmony shown between seniors and juniors, then the meaning of those usages is established. Hence after the capping has taken place, provision is made for every other article of dress. With the complete provision of the dress, the bodily carriage becomes (fully) correct, the harmonious expression of the countenance is made perfect, and the speech is all conformed to its purposes. Hence it is said that in capping we have the first indications of (the meaning of the) ceremonial usages. It was on this account that the sage

¹ See the introductory notice, vol. xxvii, pp. 54, 55.

kings of antiquity made so much as they did of the capping.

2. Anciently, when about to proceed to the ceremony of capping, they divined for the day by the stalks, and also for the guests (who should be present). In this way did they manifest the value which they attached to capping. Attaching such a value to it, they made the ceremony very important. They made the ceremony so important, showing how they considered it to lie at the foundation of the state's (prosperity).

3. Hence (also) the capping took place at the top of the eastern steps, (appropriate to the use of the Master);—to show that the son would (in due time) take his place. (The father) handed him a (special) cup in the guests' place. Three caps were used in the ceremony, each successive one more honourable, and giving the more importance to his coming of age. When the capping was over, he received the name of his maturity. So was it shown that he was now a full-grown man¹.

4. He presented himself before his mother, and his mother bowed to him; he did the same before his brothers and cousins, and they bowed to him:—he was a man grown, and so they exchanged courtesies with him. In the dark-coloured cap, and the dark-coloured square-cut robes, he put down his gift of introduction before the ruler, and then proceeded with the proper gifts to present himself to the high ministers and Great officers, and to the old gentlemen of the country:—appearing before them as a man grown.

¹ Compare paragraph 2 on pages 437, 438, vol. xxvii.

5. Treating him (now) as a grown-up man, they would require from him all the observances of a full-grown man. Doing so, they would require from him the performance of all the duties of a son, a younger brother, a subject, and a junior. But when these four duties or services were required from him, was it not right that the ceremony by which he was placed in such a position should be considered important?

6. Thus when the discharge of filial and fraternal duties, of loyal service, and of deferential submission was established, he could indeed be regarded as a (full-grown) man. When he could be regarded as such, he could be employed to govern other men. It was on this account that the sage kings attached such an importance to the ceremony, and therefore it was said, that in capping we have the introduction to all the ceremonial usages, and that it is the most important of the festive services.

Therefore the ancients considered the capping as so important. Considering it so important, they performed it in the ancestral temple. They did so, to do honour to so important a service. Feeling that it was to be honoured so, they did not dare to take the responsibility of its performance on themselves. Not daring themselves to take the responsibility of it, they therefore humbled themselves, and gave honour in doing so to their forefathers.

BOOK XLI. HWÂN Í

OR

THE MEANING OF THE MARRIAGE CEREMONY¹.

✓ 1. The ceremony of marriage was intended to be a bond of love between two (families of different) surnames, with a view, in its retrospective character, to secure the services in the ancestral temple, and in its prospective character, to secure the continuance of the family line. Therefore the superior men, (the ancient rulers), set a great value upon it. Hence, in regard to the various (introductory) ceremonies,—the proposal with its accompanying gift²; the inquiries about the (lady's) name; the intimation of the approving divination³; the receiving the special offerings⁴; and the request to fix the day⁵:—these all were received by the principal party (on the lady's side), as he rested on his mat or leaning-stool in the ancestral temple. (When they arrived), he met the messenger, and greeted him outside the gate, giving place to him as he entered, after which they ascended to the hall. Thus were the instruc-

¹ See the introductory notice, vol. xxvii, page 55.

² This gift was always a goose; into the reasons for which it is not necessary to enter.

³ The gentleman's family had divined on the proposal.

⁴ These were various.

⁵ The lady's family fixed this. The first proposal was made, and perhaps those which followed also, by that important functionary in Chinese life, 'the go-between,' or a friend acting in that capacity.

tions received in the ancestral temple¹, and in this way was the ceremony respected, and watched over, while its importance was exhibited and care taken that all its details should be correct.

2. The father gave himself the special cup² to his son, and ordered him to go and meet the bride; it being proper that the male should take the first step (in all the arrangements). The son, having received the order, proceeded to meet his bride. Her father, who had been resting on his mat and leaning-stool in the temple, met him outside the gate and received him with a bow, and then the son-in-law entered, carrying a wild goose. After the (customary) bows and yieldings of precedence, they went up to the hall, when the bridegroom bowed twice and put down the wild goose. Then and in this way he received the bride from her parents.

After this they went down, and he went out and took the reins of the horses of her carriage, which he drove for three revolutions of the wheels, having handed the strap to assist her in mounting. He then went before, and waited outside his gate. When she arrived, he bowed to her as she entered. They ate together of the same animal, and joined in sipping from the cups made of the same melon³;

¹ Thus a religious sanction entered into the idea of marriage.

² The same cup that is mentioned in the last chapter, paragraph 3; the son received it and gave no cup to the father in return. This was its speciality. In the capping ceremonies it was given 'in the guests' place;' in those of marriage, in the son's chamber.

³ Once when I was permitted to witness this part of a marriage ceremony, the bridegroom raised his half of the melon, with the spirit in it, to the bride's lips, and she raised her half to his. Each sipped a little of the spirit.

thus showing that they now formed one body, were of equal rank, and pledged to mutual affection.

3. The respect, the caution, the importance, the attention to secure correctness in all the details, and then (the pledge of) mutual affection,—these were the great points in the ceremony, and served to establish the distinction to be observed between man and woman, and the righteousness to be maintained between husband and wife. From the distinction between man and woman came the righteousness between husband and wife. From that righteousness came the affection between father and son; and from that affection, the rectitude between ruler and minister. Whence it is said, ‘The ceremony of marriage is the root of the other ceremonial observances.’

4. Ceremonies (might be said to) commence with the capping; to have their root in marriage; to be most important in the rites of mourning and sacrifice; to confer the greatest honour in audiences at the royal court and in the interchange of visits at the feudal courts; and to be most promotive of harmony in the country festivals and celebrations of archery. These were the greatest occasions of ceremony, and the principal points in them.

5. Rising early (the morning after marriage), the young wife washed her head and bathed her person, and waited to be presented (to her husband’s parents), which was done by the directrix, as soon as it was bright day. She appeared before them, bearing a basket with dates, chestnuts, and slices of dried spiced meat. The directrix set before her a cup of sweet liquor, and she offered in sacrifice some of the dried meat and also of the liquor, thus

performing the ceremony which declared her their son's wife¹.

6. The father and mother-in-law then entered their apartment, where she set before them a single dressed pig,—thus showing the obedient duty of (their son's) wife¹.

7. Next day, the parents united in entertaining the young wife, and when the ceremonies of their severally pledging her in a single cup, and her pledging them in return, had been performed, they descended by the steps on the west, and she by those on the east,—thus showing that she would take the mother's place in the family¹.

8. Thus the ceremony establishing the young wife in her position; (followed by) that showing her obedient service (of her husband's parents); and both succeeded by that showing how she now occupied the position of continuing the family line:—all served to impress her with a sense of the deferential duty proper to her. When she was thus deferential, she was obedient to her parents-in-law, and harmonious with all the occupants of the women's apartments; she was the fitting partner of her husband, and could carry on all the work in silk and linen, making cloth and silken fabrics, and maintaining a watchful care over the various stores and depositories (of the household).

9. In this way when the deferential obedience of the wife was complete, the internal harmony was

¹ The details of the various usages briefly described in these paragraphs are to be found in the 4th Book of the Î Lî, the 2nd of those on the scholar's marriage ceremonies: paragraphs 1-10; 11-17; 18-20. There were differences in the ceremonies according to the rank of the parties; but all agreed in their general character.

secured; and when the internal harmony was secured, the long continuance of the family could be calculated on. Therefore the ancient kings attached such importance (to the marriage ceremonies).

10. Therefore, anciently, for three months before the marriage of a young lady, if the temple of the high ancestor (of her surname) were still standing (and she had admission to it), she was taught in it, as the public hall (of the members of her surname); if it were no longer standing (for her), she was taught in the public hall of the Head of that branch of the surname to which she belonged;—she was taught there the virtue, the speech, the carriage, and the work of a wife. When the teaching was accomplished, she offered a sacrifice (to the ancestor), using fish for the victim, and soups made of duckweed and pondweed. So was she trained to the obedience of a wife¹.

11. Anciently, the queen of the son of Heaven divided the harem into six palace-halls, (occupied) by the 3 ladies called fû-zăn, the 9 pin, the 27 shih-fû, and the 81 yü-khî. These were instructed in the domestic and private rule which should prevail throughout the kingdom, and how the deferential obedience of the wife should be illustrated; and thus internal harmony was everywhere secured, and families were regulated. (In the same way) the son of Heaven established six official departments, in

¹ There is supposed to be an allusion to this custom in the Shih, I, ii, 4, beginning,

‘She gathers fast the large duckweed,
From valley stream that southward flows;
And for the pondweed to the pools
Left on the plains by floods she goes.’

which were distributed the 3 kung, the 9 *k'ing*, the 27 tâ fû, and the 81 sze of the highest grade. These were instructed in all that concerned the public and external government of the kingdom, and how the lessons for the man should be illustrated; and thus harmony was secured in all external affairs, and the states were properly governed.

It is therefore said, 'From the son of Heaven there were learned the lessons for men; and from the queen, the obedience proper to women.' The son of Heaven directed the course to be pursued by the masculine energies, and the queen regulated the virtues to be cultivated by the feminine receptivities. The son of Heaven guided in all that affected the external administration (of affairs); and the queen, in all that concerned the internal regulation (of the family). The teachings (of the one) and the obedience (inculcated by the other) perfected the manners and ways (of the people); abroad and at home harmony and natural order prevailed; the states and the families were ruled according to their requirements:—this was what is called 'the condition of complete virtue.'

12. Therefore when the lessons for men are not cultivated, the masculine phenomena in nature do not proceed regularly;—as seen in the heavens, we have the sun eclipsed. When the obedience proper to women is not cultivated, the feminine phenomena in nature do not proceed regularly;—as seen in the heavens, we have the moon eclipsed. Hence on an eclipse of the sun, the son of Heaven put on plain white robes, and proceeded to repair what was wrong in the duties of the six official departments, purifying everything that belonged to the masculine

sphere throughout the kingdom; and on an eclipse of the moon, the queen dressed herself in plain white robes, and proceeded to repair what was wrong in the duties of the six palace-halls, purifying everything that belonged to the feminine sphere throughout the kingdom. The son of Heaven is to the queen what the sun is to the moon, or the masculine energy of nature to the feminine. They are necessary to each other, and by their interdependence they fulfil their functions.

13. The son of Heaven attends to the lessons for men;—that is the function of the father. The queen attends to the obedience proper to women;—that is the function of the mother. Therefore it is said, ‘The son of Heaven and the queen are (to the people) what father and mother are.’ Hence for him who is the Heaven(-appointed) king they wear the sackcloth with the jagged edges,—as for a father; and for the queen they wear the sackcloth with the even edges,—as for a mother.

BOOK XLII. HSIANG YIN KIÜ Î

OR

THE MEANING OF THE DRINKING FESTIVITY IN THE DISTRICTS¹.

1. The meaning of the drinking in the country districts may be thus described :—The president on the occasion bows to the (coming) guest as he receives him outside the college gate. They enter and thrice salute each other till they come to the steps. There each thrice yields the precedence to the other, and then they ascend. In this way they carry to the utmost their mutual demonstrations of honour and humility. (The host) washes his hands, rinses the cup, and raises it,—to give the highest idea of purity. They bow on the guest's arrival; they bow as (the cup) is washed; they bow when the cup is received, and when it is presented (in return); they bow when the drinking it is over :—in this way carrying to the utmost their mutual respect.

2. Such giving of honour, such humility, such purity, and such respect belonged to the intercourse of superior men with others. When they gave honour and showed humility, no contentions arose. When they maintained purity and respect, no indifference or rudeness arose. When there was no rudeness or contention, quarrels and disputations were kept at a distance. When men did not quarrel

¹ See the introductory notice, vol. xxvii, page 56.

nor dispute, there came no evils of violence or disorder. It was thus that superior men escaped suffering calamity from other men; and therefore the sages instituted the observances in this ceremony to secure such a result.

3. The chief of the district with the accomplished and virtuous men belonging to it had the vessel of liquor placed between the room (on the east), and the door (leading to the apartments on the west), host and guests sharing it between them. The vessel contained the dark-coloured liquor (of pure water);—showing the value they attached to its simplicity. The viands came forth from the room on the east;—being supplied by the host. All washing took place (in the courtyard) opposite the eastern wing;—showing how the host purified himself and made himself ready to serve the guests.

4. The (principal) guest and the host represented heaven and earth; the attendants of the guest and host respectively represented the forces inherent in nature in their contracting and expanding operations; the three (heads of the) guests (in their threefold division) represented the three (great) luminaries; the precedence thrice yielded (to the guest) represented the three days when the moon is invisible till it begins to reappear; the seating of the parties present (all round or) on the four sides represented the four seasons¹.

¹ P. Callery says:—‘There were at this ceremony, 1. the chief and his assistant; 2. the principal guest who was supposed to represent all the other guests, and who also had his assistant; 3. three guests who formed a second category; 4. finally, the crowd of guests, a number not fixed, to whom no honour was paid directly, since they were held to receive all the honours rendered to

5. The snell and icy wind (that blows between) heaven and earth begins in the south-west and is strongest in the north-west. This is the wind that represents the most commanding severity of heaven and earth;—the wind of their righteous justice. The warm and genial wind (that blows between) heaven and earth begins in the north-east and is strongest in the south-east. This is the wind that represents the abundant virtue of heaven and earth;—the wind of their benevolence. The host, wishing to do honour to his guest, assigns him his seat on the north-west, and that of his attendant on the south-west, that he may there (most conveniently) assist him. The guest (represents) the treatment of others according to justice, and therefore his seat is

the principal guest.' *Khân Hào* quotes an opinion that the principal guest was made to represent heaven, to do him the greater honour; and the host to represent the earth, because he was the entertainer and nourisher; and that their assistants represented the yin and yang, because they assisted their principals as these energies in nature assist heaven and earth.

On 'the three Luminaries,' Callery says:—'Ordinarily the name of "the three Luminaries" belongs to the sun, the moon, and the stars, but par. 16 below does not allow us to take it so here. The commentators say that we are to understand the three most brilliant constellations in the firmament, which they call Hsin, Fâ, and Po-*khân*, corresponding, I believe, in part to Orion, Scorpio, and Argo or the Ship.' So also *Khân Hào's* authority. Hsin is generally understood to be Scorpio (Antares, σ , τ , and two c. 3584 and 3587); Fâ to be ν Orion; and Po-*khân* to be the north polar star.

On the 'thrice-yielded precedence to the guest,' Callery says:—'The comparison is far-fetched; it is intended to say that as the moon would not receive light if the sun did not accord it, so the guest would not receive such honours if the host did not render them.' So the commentators certainly try to explain it.

on the north-west; the host (represents) the treatment of others according to benevolence and a genial kindness, and therefore his seat is on the south-east, and his attendant is seated on the north-east, that he may there (most conveniently) assist him ¹.

6. That intercourse according to benevolence and righteousness being established, so as to show the respective duties of host and guest, and the number of stands and dishes being properly fixed;—all this must be the result of sage intelligence. That intelligence established the arrangements, and each one being carried through with respect, it became a ceremonial usage. That usage proceeding to mark and embody the distinction between old and young, it became a virtue. Virtue is that which is the characteristic of the person. Therefore we have the saying, 'In the learning of antiquity, the methods by which they pursued the course adopted were intended to put men in possession of their proper virtue.' On this account the sages employed their powers (on its lessons) ².

¹ P. Callery observes on this paragraph :—'The meteorological observations on which these statements rest must have been made very long ago in the interior of the country, there where the winds come under the influence of the icy plains of Tartary and the high mountains which separate China from Thibet; for on the sea-coasts of China, exactly the contrary has place. During the winter the north-east monsoon prevails, varying sometimes to the north and sometimes to the east, rarely to the north-west; while during the heats of summer the wind blows from the south-west, bending a little towards the south or towards the east, according as the monsoon is in the period of its increase or decline. It is generally in the course of this monsoon that there takes place the terrible storms known by the name of typhoons.'

² The *K'ien-lung* editors do their best to elucidate this

7. When (the guest) offers in sacrifice some of the things that have been set before him, and some of the liquor, he showed how he respected (the host) for his courtesy; when he proceeded to take some of the lungs in his teeth, he thereby tasted (the host's) courtesy; when he then sipped some of the liquor, that was his last step in acknowledgment thereof. This last act was done at the end of his mat, showing that the mat was spread straight before him, not only for the purpose of eating and drinking, but also for the performance of the (proper) rites. In this was shown how it was the ceremony that was valued, while the wealth was made little account of. Finally, when the host filled their cups from the horn, they drained them at the top of the western steps;—showing how the mat was set not (merely) for the purpose of eating and drinking, and how the idea was that of giving to the ceremony the first place, and to wealth the last. But when the ceremony has the first place, and wealth the last, the people become respectful and yielding, and are not contentious with one another.

8. At the ceremony of drinking in the country districts, those who were sixty years old sat, and those who were (only fifty) stood, and were in waiting to receive any orders and perform any services;—thus illustrating the honour which should be paid to elders.

Before those who were sixty, three dishes were placed; before those of seventy, four; before those of eighty, five; before those of ninety, six:—

difficult and obscure paragraph; but are obliged to quote in the end the judgment of K'ü Hsi that 'it is vague and intractable, and not worth taking much trouble about.'

thus illustrating how the aged should be cherished and nourished.

When the people knew to honour their elders and nourish their aged, then at home they could practise filial piety and fraternal duty. Filial and fraternal at home and abroad, honouring elders and nourishing the aged, then their education was complete, and this led to the peace and tranquillity of the state. What the superior man calls filial piety, does not require that (every) family should be visited and its members daily taught; if (the people) be assembled at the archery meetings in the districts, and taught the usages at the district-drinkings, their conduct is brought to be filial and fraternal.

9. Confucius said, 'When I look on at the festivity in the country districts, I know how easily the Royal way may obtain free course.

10. 'The host in person invites the principal guest and his attendant, and all the other guests follow them of themselves. When they arrive outside the gate, he bows (and welcomes) the chief guest and his attendant, and all the others enter of themselves. In this way the distinction between the noble and the mean is exhibited.

11. 'With the interchange of three bows (the host and guest) arrive at the steps; and after precedence has been thrice yielded to him, the guest ascends. In bowing to him (on the hall), (the host) presents to him the cup, and receives the cup from him in return. The usages between them, now declining, now yielding, the one to the other, are numerous; but the attention paid to the assistant is less. As to the crowd of guests, they ascend, and receive the cup. Kneeling down they offer some of it in sacri-

fice ; they rise and drink it ; and without pledging the host in the return-cup, they descend. In this way the proper distinction is made between the different parties by the multitude or paucity of the observances paid to them.

12. ' The musicians enter, ascend the hall, and sing the three pieces which complete their performance, after which the host offers to them the cup. The organists enter, and (below the hall) play three tunes, which complete their part of the performance, after which the host offers to them (also) the cup. Then they sing and play alternately other three pieces and tunes ; and also thrice again they sing and play in concert. When this is finished, the musicians announce that the music is over, and go out.

' At the same time a person (as instructed by the host) takes up the horn, and one is appointed to superintend the drinking, and see that it proceeds correctly. From this we know how they could be harmonious and joyful, without being disorderly.

13. ' The (principal) guest pledges the host, the host pledges the attendants, the attendants pledge all the guests. Young and old pledge one another according to their age, and the cup circulates on to the keepers of the vases and the cup-washers. From this we know how they could practise brotherly deference to their elders without omitting any one.

14. ' Descending (after this), they take off their shoes ; ascending again, and taking their seats, they take their cups without any limit as to number. But the regulations of the drinking do not allow them to neglect the duties either of the morning or evening. When the guests go out, the host bows to each as he escorts him away. The regulations and

forms are observed to the end; and from this we know how they could enjoy the feast without turbulence or confusion.

15. 'The distinction between the noble and mean thus exhibited; the discrimination in the multitude or paucity of the observances to different parties; the harmony and joy without disorder; the brotherly deference to elders without omitting any; the happy feasting without turbulence or confusion;—the observance of these five things is sufficient to secure the rectification of the person, and the tranquillity of the state. When that one state is tranquil, all under heaven will be the same. Therefore I say that when I look on at the festivity in the country districts, I know how easily the Royal Way may obtain free course¹.'

16. According to the meaning attached to the festivity of drinking in the country districts, the principal guest was made to represent heaven; the host, to represent earth; their attendants respectively to represent the sun and moon; and the three head guests (according to the threefold division of them) to represent the three (great) luminaries. This was the form which the festivity received on its institution in antiquity: the presiding idea was found in heaven and earth; the regulation of that was found in the sun and moon; and the three luminaries were introduced as a third feature. (The

¹ I have supposed that all from paragraph 9 to this is the language of Confucius, and translated in the present tense as he would speak. Possibly, however, after par. 9 the compiler of the Book may be giving his own views of the different parts of the festivity (which would in that case have to be translated in the past tense), and then winds up with therefore 'He—Confucius—said,' &c.

whole represented) the fundamental principles in the conduct of government and instruction.

17. The dogs were boiled on the eastern side (of the courtyard¹);—in reverential acknowledgment of the fact that the vivifying and expanding power in nature issues from the east.

The washings took place at the eastern steps, and the water was kept on the east of the washing-place;—in reverential acknowledgment of the fact that heaven and earth have placed the sea on the left.

The vessel contained the dark-coloured liquid;—teaching the people not to forget the original practice (at ceremonies).

18. The rule was that the (principal) guest should face the south. The quarter of the east suggests the idea of the spring, the name of which (also) denotes the appearance of insects beginning to move:—(there is then at work that mysterious) intelligence which gives birth to all things. The quarter of the south suggests the idea of the summer, the name of which (also) denotes what is great:—what nourishes things, encourages their growth, and makes them great is benevolence. The quarter of the west suggests the idea of the autumn, the name of which also denotes gathering or collecting:—the fruits of the earth are gathered at this season, suggesting the idea of justice in discrimi-

¹ Compare the statement in paragraph 3, that 'the viands come forth from the room on the east.' *K'hsan Hsiang-t'ao* says:—'The dog is a creature that keeps watch, and is skilful in its selection of men;—it will keep away from any one who is not what he should be. On this account the ancients at all their festive occasions of eating and drinking employed it.'

nating and guarding. The quarter of the north suggests the idea of winter, the name of which denotes also what is kept within:—and the being within leads us to think of being stored up. On this account, when the son of Heaven stands up, he keeps (the quarter of the life-giving) intelligence on his left hand, faces (the quarter of) benevolence, has that of justice on his right hand, and that of depositing behind him¹.

19. It was the rule that his attendants should face the east; thus (making) the principal guest to be the chief (party) at the festivity.

¹ The *K'ien-lung* editors say that portions of this paragraph have been lost, and that other parts are out of their proper place; and they suggest the additions and alterations necessary to make it right. It is not worth while, however, to consider their views. No alterations will remedy its incurable defects or reverse the severe judgment passed on it by P. Callery:—‘The method,’ he says, ‘by which the author proceeds is exceedingly eccentric, and partakes at once of the nature of the pun, of allegory, and of mysticism. He begins by basing his comparisons on the resemblance of certain sounds, or the homophony of certain words. Then he seeks to find in the sense, proper to those words that are homophonous or nearly so, connexions with the principal word in the text; and as those connexions are far from being natural or simply plausible, he puts his spirit to the torture, and goes to seek in the mysterious action of nature points of contact of which no one would think. Thus in the sound *k'ün* (春, 蠢) he finds a natural analogy between the slow and gradual movement of a worm without eyes, and the march, equally slow and gradual, of vegetation in spring; in the sounds *hsiâ* and *hiâ* (夏, 假) he finds a direct connexion between greatness and the action which makes plants become great in summer. So in the same way with the other sounds which he deals with. To many Chinese this fashion of reasoning appears to be very profound; but, as I think, it is nothing but a childish play on words and hollow ideas.’

It was the rule that the host should be in the eastern quarter. The eastern quarter suggests the idea of spring, the name of which (also) denotes the appearance of insects beginning to move, and (it is spring) which produces all things. The host makes the festivity; that is, he produces all things.

20. The moon, after three days, completes the period of its dark disk. Three months complete a season. Therefore in this ceremony precedence is thrice yielded to the guest, and in establishing a state three high ministers must be appointed. That the guests are in three divisions, each with its head or leader, indicated the fundamental principles in the administration of government and instruction, and was the third great feature of the ceremony.

BOOK XLIII. SHÊ Î

OR

THE MEANING OF THE CEREMONY OF ARCHERY¹.

1. Anciently it was the rule for the feudal lords, when they would practise archery, first to celebrate the ceremony of the Banquet, and for the Great officers and ordinary officers, when they would shoot, first to celebrate the ceremony of the Drinking in the country districts. The ceremony of the Banquet served to illustrate the relation between ruler and subject; that of the District-drinking, to illustrate the distinction between seniors and juniors.

2. The archers, in advancing, retiring, and all their movements, were required to observe the rules. With minds correct, and straight carriage of the body, they were to hold their bows and arrows skilfully and firmly; and when they did so, they might be expected to hit the mark. In this way (from their archery) their characters could be seen¹.

3. To regulate (the discharging of the arrows), there was,—in the case of the son of Heaven, the playing of the 3âu-yü; in the case of the feudal lords, that of the Lî-shâu; in the case of the dignitaries, the Great officers, that of the 3hâi-pin; and in the case of officers, that of the 3hâi-fân².

¹ See introductory notice, vol. xxvii, pages 56, 57.

² Each archer discharged four arrows at the target. According to the account of the duties of the superintendent of archery in

The 3âu-yü¹ is expressive of joy that every office is (rightly) filled; the Lî-shâu is expressive of the joy at audiences of the court; the 3hâi-pin is expressive of the joy in observing the laws (which have been learned); and the 3hâi-fân is expressive of the joy in being free from all failures in duty. Therefore the son of Heaven regulated his shooting by keeping in his mind the right feeling of all officers; a feudal prince, by keeping in his mind the times of his appearing before the son of Heaven; a dignitary, being a Great officer, by keeping in his mind the observing of the laws (which he had learned); and an officer, by keeping in his mind that he must not fail in the duties of his office.

In this way, when they clearly understood the meaning of those regulating measures, and were thus able to avoid all failure in their services, they were successful in their undertakings, and their character

the K'âu Lî (射人, Book XXX, paragraphs 54-67, especially 57), the 3âu-yü was played or sung nine times; the Lî-shâu seven times; and the two other pieces five times. When the king was shooting therefore, he began to shoot after the fifth performance, and had all the previous time to prepare himself; a prince began to shoot after the third performance; and in the two other cases there was only the time of one performance for preparation.

¹ The 3âu-yü is the last piece in the 2nd Book of the first part of the Book of Poetry; supposed to celebrate the benevolence of the king; here seen in his delight at every office being rightly filled. The Lî-shâu, 'Fox's Head,' or 'Wild Cat's Head,' has not come down to us;—see note 2, page 124. The 3hâi-pin and 3hâi-fân are the fifth and second pieces of the same Book and same part of the Shih as the 3âu-yü. The regulating the discharge of the arrows by the playing of these pieces was part of the moral discipline to which it was sought to make the archery subservient.

and conduct were established. When their characters were established, no such evils as oppression and disorder occurred; and when their undertakings were successful, the states were tranquil and happy. Hence it is said that 'the archery served to show the completeness of (the archer's) virtue.'

4. Therefore, anciently, the son of Heaven chose the feudal lords, the dignitaries who were Great officers, and the officers, from their skill in archery. Archery is specially the business of males, and there were added to it the embellishments of ceremonies and music. Hence among the things which may afford the most complete illustration of ceremonies and music, and the frequent performance of which may serve to establish virtue and good conduct, there is nothing equal to archery: and therefore the ancient kings paid much attention to it.

5. Therefore, anciently, according to the royal institutes, the feudal princes annually presented the officers who had charge of their tribute to the son of Heaven, who made trial of them in the archery-hall. Those of them whose bodily carriage was in conformity with the rules, and whose shooting was in agreement with the music, and who hit the mark most frequently, were allowed to take part at the sacrifices. When his officers had frequently that privilege, their ruler was congratulated; if they frequently failed to obtain it, he was reprimanded. If a prince were frequently so congratulated, he received an increase to his territory; if he were frequently so reprimanded, part of his territory was taken from him. Hence came the saying, 'The archers shoot in the interest of their princes.' Thus, in the states, the rulers and their officers devoted

themselves to archery, and the practice in connexion with it of the ceremonies and music. But when rulers and officers practise ceremonies and music, never has it been known that such practice led to their banishment or ruin.

6. Hence it is said in the ode (now lost),

‘The long-descended lord
Presents your cups of grace.
His chiefs and noble men
Appear, all in their place;
Small officers and Great,
Not one will keep away.
See them before their prince,
All in their full array.
They feast, and then they shoot,
Happy and praised to boot.’

The lines show how when rulers and their officers earnestly devoted themselves together to archery, and the practice in connexion with it of ceremonies and music, they were happy and got renown. It was on this account that the son of Heaven instituted the custom, and the feudal lords diligently attended to it. This was the way in which the son of Heaven cherished the princes, and had no need of weapons of war (in dealing with them); it furnished (also) to the princes an instrument with which they trained themselves to rectitude.

7. (Once), when Confucius was conducting an archery meeting in a vegetable garden at Kio-hsiang, the lookers-on surrounded it like a wall. When the proceedings reached the point when a Master of the Horse should be appointed, he directed 3ze-lû to take his bow and arrows, and go

out to introduce those who wished to shoot, and to say, 'The general of a defeated army, the Great officer of a ruler-less state, and any one who (has schemed to be) the successor and heir of another, will not be allowed to enter, but the rest may all enter.' On this, one half went away, and the other half entered.

After this, (wishing to send the cup round among all the company), he further directed Kung-wang *K'hiu* and Hsü Tien to raise the horns of liquor, and make proclamation. Then Kung-wang *K'hiu* raised his horn, and said, 'Are the young and strong (here) observant of their filial and fraternal duties? Are the old and men of eighty (here) such as love propriety, not following licentious customs, and resolved to maintain their characters to death? (If so), they may occupy the position of guests.' On this, one half (of those who had entered) went away, and the other half remained.

Hsü Tien next raised his horn, and proclaimed, 'Are you fond of learning without being tired? are you fond of the rules of propriety, and unswerving in your adherence to them? Do those of you who are eighty, ninety, or one hundred, expound the way (of virtue) without confusion or error? If so, you can occupy the position of visitors.' Thereupon hardly any remained¹.

8. To shoot means to draw out to the end, and some say to lodge in the exact point. That draw-

¹ The authenticity of what is related in this paragraph, which is not in the expurgated edition of the *Lí Kí*, may be doubted. But however that be, it is evidently intended to be an illustration of what did, or might, take place at meetings for archery in the country. *K'io-hsiang* is understood to be the name of some place in *Lí*.

ing out to the end means every one unfolding his own idea ; hence, with the mind even-balanced and the body correctly poised, (the archer) holds his bow and arrow skilfully and firmly. When he so holds them, he will hit the mark. Hence it is said, 'The father (shoots) at the father-mark ; the son, at the son-mark ; the ruler, at the ruler-mark ; the subject, at the subject-mark.' Thus the archer shoots at the mark of his (ideal) self ; and so the Great archery of the son of Heaven is called shooting at (the mark of) the feudal prince. 'Shooting at the mark of the feudal prince' was shooting to prove himself a prince. He who hit the mark was permitted to be (that is, retain his rank as) a prince ; he who did not hit the mark was not permitted to retain his rank as a prince¹.

9. When the son of Heaven was about to sacrifice, the rule was that he should celebrate the archery at the pool, which name suggested the idea of selecting the officers (by their shooting)². After

¹ In this paragraph we have a remarkable instance of that punning or playing on words or sounds, which Callery has pointed out as a 'puerility' in Chinese writers, and of which we have many examples in the writers of the Han dynasty. The idea in the paragraph is good, that when one realises the ideal of what he is, becoming all he ought to be, he may be said to hit the mark. But to bring out this from the character (射), which is the symbol of shooting with the bow, the author is obliged to give it two names,—yî (射 = 繹, drawing out or unwinding the thread of a cocoon, or clue of silk, to the end) and shê (射 = 舍, a cottage or booth, a place to lodge in). The latter is the proper name for the character in the sense of shooting.

² Here there is another play on names,—jeh, in Pekinese kâi (澤), 'a pond or pool,' suggesting the character 擇, which has the same name, and means 'to choose, select.' There were two

the archery at the pool came that in the archery hall. Those who hit the mark were permitted to take part in the sacrifice; and those who failed were not permitted to do so. (The ruler of those) who did not receive the permission was reprimanded, and had part of his territory taken from him. The ruler of those who were permitted was congratulated, and received an addition to his territory. The advancement appeared in the rank; the disapprobation, in the (loss of) territory.

10. Hence, when a son is born, a bow of mulberry wood, and six arrows of the wild raspberry plant (are placed on the left of the door), for the purpose of shooting at heaven, earth, and the four cardinal points. Heaven, earth, and the four points denote the spheres wherein the business of a man lies. The young man must first give his mind to what is to be his business, and then he may venture to receive emolument, that is, the provision for his food.

11. Archery suggests to us the way of benevolence. (The archer) seeks to be correct in himself, and then discharges his arrow. If it miss the mark, he is not angry with the one who has surpassed himself, but turns round and seeks (for the cause of failure) in himself¹. Confucius said, 'The student of virtue has no contentions. If it be said that he cannot avoid them, shall this be in archery? (But) he bows complaisantly to his competitor, ascends

places for the archery, one called the *K'âi Kung*, 'Palace or Hall by the pool,' and the other, *Shê Kung*, 'Palace or Hall of Archery,' which was, says Callery, 'a vast gallery in the royal college.'

¹ Compare above, page 307, paragraph 40, where we have 'the way of the superior man' instead of 'the way of benevolence, or perfect virtue.'

(the hall), descends (again), and exacts the forfeit of drinking. In his contention, he is still the superior man¹.

12. Confucius said, 'How difficult it is to shoot! How difficult it is to listen (to the music)! To shoot exactly in harmony with the note (given) by the music, and to shoot without missing the bull's-eye on the target :—it is only the archer of superior virtue who can do this! How shall a man of inferior character be able to hit the mark? It is said in the Book of Poetry (II, viii, ode 6, 1),

“Now shoot,” he says, “and show your skill.”

The other answers, “Shoot I will,

And hit the mark ;—and when you miss,

Pray you the penal cup to kiss.”’

‘To pray’ is to ask. The archer seeks to hit that he may decline the cup. The liquor in the cup is designed (properly) to nourish the aged, or the sick. When the archer seeks to hit that he may decline the cup, that is declining what should serve to nourish (those that need it).

¹ See Confucian Analects, III, vii.

BOOK XLIV. YEN Î

OR

THE MEANING OF THE BANQUET¹.

1. Anciently, among the officers of the kings of *K'au*, there was one called the *shû-jze*. He was charged with the care of the sons of the feudal lords, the high dignitaries who were the Great officers, and (other) officers,—the eldest sons who occupied the next place to their fathers. He managed (the issuing) to them of (all) cautions and orders; superintended their instruction in all they had to learn and (the art of self-)government; arranged them in their different classes; and saw that they occupied their correct positions. If there were any grand solemnity (being transacted) in the kingdom, he conducted them—these sons of the state—and placed them under the eldest son, the heir-apparent, who made what use of them he thought fit. If any military operations were being undertaken, he provided for them their carriages and coats of mail, assembled for them the companies of a hundred men and of five men (of which they should have charge), and appointed their inferior officers, thus training them in the art of war:—they were not under the jurisdiction of the minister of War. In all (other) governmental business of the state, these sons of it were left free, their fathers' eldest sons, without public occupation,

¹ See introductory notice, vol. xxvii, pages 57, 58.

and were made to attend to the cultivation of virtuous ways. In spring, (the shû-jze) assembled them in the college; and in autumn, in the archery (hall), that he might examine into their proficiency, and advanced or degraded them accordingly.

2. The meaning of the ceremony of the banquet at the feudal courts (may be thus described):—The ruler stood on the south-east of (his own) steps on the east, having his face towards the south, fronting the ministers or dignitaries who were nearest to him. They and all the (other) Great officers came forward a little, taking each his proper station. The ruler's mat is placed at the top of the eastern steps:—there is the station of the host. The ruler alone goes up and stands on his mat; with his face to the west he stands there by himself:—showing that no one presumes to place himself on a par with him.

3. Guests and host having been arranged, according to the rules for the ceremony of drinking in the country districts, (the ruler) makes his chief cook act for him in presenting (the cup):—a minister may not presume to take on himself any usage proper to the ruler. None of the (three) kung and no high minister has the place of a guest; but the Great officers are among the guests,—because of the doubts that might arise, and to show the jealousy (which such great men in that position might create).

When the guests have entered to the middle of the courtyard, the ruler descends a step and bows to them:—thus courteously receiving them.

4. The ruler sends the cup round among the guests in order; and when he has given a special cup to

any, they all descend, and bow twice, laying at the same time their heads to the ground; after which they ascend, and complete their bowing:—thus showing the observance due from subjects. The ruler responds to them, for every act of courtesy must be responded to:—illustrating the observances due from the ruler and superiors. When ministers and inferiors do their utmost to perform service for the state, the ruler must recompense them with rank and emoluments. Hence all officers and inferiors endeavour with their utmost strength and ability to establish their merit, and thus the state is kept in tranquillity, and the ruler's mind is at rest.

(The principle) that every act of courtesy must be responded to, showed that rulers do not receive anything from their inferiors without sufficient ground for doing so. The ruler must illustrate the path of rectitude in his conduct of the people; and when the people follow that path and do good service (for the state), then he may take from them a tenth part (of their revenues). In this way he has enough, and his subjects do not suffer want. Thus harmony and affection prevail between high and low, and they have no mutual dissatisfactions. Such harmony and rest are the result of the ceremonial usages. This is the great idea in the relation between ruler and subject, between high and low:—hence it is said that the object of the banquet was to illustrate the idea of justice between ruler and subject.

5. The mats were arranged so that the dignitaries of smaller rank occupied the place next (in honour) to those of higher; the Great officers, the place next to the lower dignitaries. The officers and sons of

concubines¹ (also) took their places below in their regular order. The cup being presented to the ruler, he begins the general pledging, and offers the cup to the high dignitaries². They continue the ceremony, and offer the cup to the Great officers, who offer it in turn to the (other) officers, and these finally offer it to the sons of concubines. The stands and dishes, with the flesh of the animals³, and the savoury viands, were all proportioned to the differences of rank in the guests:—and thus the distinction was shown between the noble and the mean.

¹ This is a common meaning of the phrase *shû-jze*. We cannot suppose that there is a reference to the officer so called in paragraph 1. He was of too high a rank to be placed after the officers, who ranked below the Great officers. Nor can we suppose that it denotes here 'the sons of the state' under his charge.

² The ruler did this by his deputy, the chief cook, who officiated for him on the occasion. All the different offerings are said to have been made by him indeed; but that is not the natural interpretation of the text.

³ *Khân Hâu* says these were dogs; see above, page 443, paragraph 17.

BOOK XLV. PHING 1

OR

THE MEANING OF THE INTERCHANGE OF MISSIONS BETWEEN DIFFERENT COURTS¹.

1. According to the ceremonies in missions, a duke of the highest grade sent seven attendants with (his representative); a marquis or earl, five; and a count or baron, three. The difference in number served to show the difference in rank of their principals².

2. The messages (between the visitor and the host) were passed through all the attendants, from one to another. A superior man, where he wishes to do honour, will not venture to communicate directly and in person. This was a high tribute of respect.

3. The message was transmitted (only) after the messenger had thrice declined to receive (the courtesies offered to him at the gate); he entered the gate of the ancestral temple after thrice in the same way trying to avoid doing so; thrice he exchanged bows with his conductor before they arrived at the steps; and thrice he yielded the precedence offered to him before he ascended the hall:—so did he carry to

¹ See introductory notice, vol. xxvii, pages 58, 59.

² If the ruler went in person on the mission, he had in every case, according to his rank, two attendants more than the number specified for his representative.

the utmost his giving of honour and yielding courtesy.

4. The ruler sent an officer to meet (the messenger) at the border (of the state), and a Great officer to offer him the customary presents and congratulations (after the toils of the journey) in the suburb (near the capital); he himself met him and bowed to him inside the great gate, and then received him in the ancestral temple; with his face to the north he bowed to him when the presents (which he brought) were presented, and bowed again (when his message was delivered), in acknowledgment of its condescension;—in this way did he (on his part) testify his respect.

5. Respectfulness and yielding courtesy mark the intercourse of superior men with one another. Hence, when the feudal lords received one another with such respectfulness and yielding courtesy, they would not attack or encroach on one another.

6. A high minister is employed as principal usher (for the messenger), a Great officer as the next, and (ordinary) officers acted as their attendants. (When he had delivered his message), the ruler himself showed him courtesy, (and presented to him the cup of new liquor). He had his private interviews (with the dignitaries and Great officers of the court), and also with the ruler¹. (After this), supplies of animals, slaughtered and living, were sent (to his hotel). (When he was about to take his departure), the jade-symbols (by which he was accredited) were returned to him, and the return

¹ At these interviews, after he had discharged his mission and presented the gifts from his ruler, he presented other gifts on his own account.

gifts (of silk and other things) presented at the same time. He had been entertained and feasted. All these observances served to illustrate the idea underlying the relations between ruler and minister in receiving visitors and guests¹.

7. Therefore it was a statute made by the son of Heaven for the feudal lords, that every year they should interchange a small mission, and every three years a great one:—thus stimulating one another to the exercise of courtesy. If the messenger committed any error in the exchange of his mission, the ruler, his host, did not personally entertain and feast him:—thereby making him ashamed, and stimulating him.

When the princes thus stimulated one another to the observance of the ceremonial usages, they did not make any attacks on one another, and in their states there was no oppression or encroachment. In this way the son of Heaven cherished and nourished them; there was no occasion for any appeal to arms, and they were furnished with an instrument to maintain themselves in rectitude.

8. (The commissioners) carried with them their jade-symbols, the sceptre and half-sceptre:—showing the importance of the ceremony. On the completion of their mission, these were returned to them:—showing the small importance to be attached to their value, and the great importance of the ceremony. When the princes thus stimulated one another, to set light by the value of the articles, and recognise the importance of the ceremony, the people learned to be yielding and courteous.

¹ The entertainment took place in the open court; the banquet in the banquetting chamber.

9. The prince of the state to which the mission was sent treated his guests in this way:—Till their departure from their coming, they were supplied from the three stores (provided for such purposes). Living animals were sent to them at their lodging. A provision of five sets of the three animals for slaughter was made inside. Thirty loads of rice, the same number of grain with the straw, and twice as many of fodder and firewood were provided outside. There were five pairs of birds that went in flocks every day. All the attendants had cattle supplied to them for their food. There was one meal (a day in the court), and two (spare) entertainments (in the temple). The banquets and occasional bounties were without any definite number. With such generosity was the importance of the ceremony indicated¹.

10. They could not always be so profuse as this in antiquity in the use of their wealth; but their employment of it thus liberally (in connexion with these missions) showed how they were prepared to devote it to the maintenance of the ceremonies. When they expended it as they did on the ceremonies, then in the states ruler and minister did not encroach on one another's rights and possessions, and different states did not attack one another. It was on this account that the kings made their statute about these missions, and the feudal lords did their utmost to fulfil it².

¹ The particulars here briefly mentioned and many others are to be found in great detail in the 8th division of the *Î Li*, Books 15-18, which are on the subject of these missions.

² About twenty years ago, when I had occasion to accompany a mandarin from Canton to a disturbed district in the interior, he

11. The archery in connexion with these missions was a very great institution. With the early dawn they commenced it, and it was nearly midday before the whole of the ceremonies were concluded :— it required men of great vigour and strength to go through with it.

And further, when such men were about to engage in it, though the liquor might be clear and they were thirsty, they did not venture to drink of it; though the stalks of flesh were dry (and ready to their hand), and they were hungry, they did not venture to eat of them; at the close of the day, when they were tired, they continued to maintain a grave and correct deportment. So they carried out all the details of the ceremonies; so they maintained correctly the relation between ruler and subject, affection between father and son, and harmony between seniors and juniors. All this it is difficult for the generality of men to do, but it was done by those superior men; and on this account they were called men possessed of great ability in action. The ascribing to them such ability in action implied their possession of the sense of righteousness; and their possession of that sense implied that they were valiant and daring. The

introduced one day in conversation the subject of these missions, saying that they must have been a great drain on the revenues of the ancient states, and that in the same way in the present day the provincial administrations were burdened with many outlays which should be borne by the imperial treasury. As resident ambassadors from foreign nations had then begun to be talked about, he asked whether China would have to pay their expenses, or the countries which they represented would do so, and was greatly relieved when I told him that each nation would pay the expenses of its embassy.

most valuable quality in a man who is bold and daring is that he can thereby establish his sense of righteousness; the most valuable quality in him who establishes that sense is that he can thereby show his great ability in action; the most valuable quality in him who has that ability is that he can carry all ceremonies into practice. In this way, the most valuable quality in valiant daring is that its possessor dares to carry into practice the rules of ceremony and righteousness.

It follows from this that such men, bold and daring, full of vigour and strength, when the kingdom was at peace, employed their gifts in the exercise of propriety and righteousness; and, when there was trouble in the kingdom, employed them in the battle-field and in gaining victory. When they employed them to conquer in battle, no enemies could resist them; when they employed them in the exercise of propriety and righteousness, then obedience and good order prevailed. No enemies abroad, and obedience and good order at home:—this was called the perfect condition for a state. But when men, so endowed, did not use their valour and strength in the service of propriety and righteousness, and to secure victory, but in strifes and contentions, then they were styled men of turbulence or disorder. Punishments were put in requisition throughout the kingdom, and the (first) use of them was to deal with those same men, and take them off. In this way (again), the people became obedient and there was good order, and the state was tranquil and happy.

12. 3ze-kung asked Confucius, saying, 'Allow me to ask the reason why the superior man sets

a high value on jade, and but little on soapstone ? Is it because jade is rare, and the soapstone plentiful ?'

13. Confucius replied, 'It is not because the soapstone is plentiful that he thinks but little of it, and because jade is rare that he sets a high value on it. Anciently superior men found the likeness of all excellent qualities in jade. Soft, smooth, and glossy, it appeared to them like benevolence ; fine, compact, and strong,—like intelligence ; angular, but not sharp and cutting,—like righteousness ; hanging down (in beads) as if it would fall to the ground,—like (the humility of) propriety ; when struck, yielding a note, clear and prolonged, yet terminating abruptly,—like music ; its flaws not concealing its beauty, nor its beauty concealing its flaws,—like loyalty ; with an internal radiance issuing from it on every side,—like good faith ; bright as a brilliant rainbow,—like heaven ; exquisite and mysterious, appearing in the hills and streams,—like the earth ; standing out conspicuous in the symbols of rank,—like virtue ; esteemed by all under the sky,—like the path of truth and duty. As is said in the ode (I, xi, ode 3, 1),

“Such my lord's car. He rises in my mind,
Lovely and bland, like jade of richest kind.”

This is why the superior man esteems it so highly !'

BOOK XLVI. SANG FÛ SZE K'IH

OR

THE FOUR PRINCIPLES UNDERLYING THE DRESS OF MOURNING¹.

1. All ceremonial usages looked at in their great characteristics are the embodiment of (the ideas suggested by) heaven and earth; take their laws from the (changes of the) four seasons; imitate the (operation of the) contracting and developing movements in nature; and are conformed to the feelings of men. It is on this account that they are called the Rules of Propriety; and when any one finds fault with them, he only shows his ignorance of their origin.

2. Those usages are different in their applications to felicitous and unfortunate occurrences; in which they should not come into collision with one another:—this is derived from (their pattern as given by) the contracting and developing movements in nature.

3. The mourning dress has its four definite fashions and styles, the changes in which are always according to what is right:—this is derived from the (changes of the) four seasons.

Now, affection predominates; now, nice distinctions; now, defined regulations; and now, the consideration of circumstances:—all these are

¹ See the introductory notice, vol. xxvii, pp. 59, 60.

derived from the human feelings. In affection we have benevolence; in nice distinctions, righteousness; in defined regulations, propriety; and in the consideration of circumstances, knowledge. Benevolence, righteousness, propriety, and knowledge;—these make up the characteristic attributes of humanity.

4. Where the affection has been great, the mourning worn is deep. On this account the sackcloth with jagged edges is worn for the father for three years:—the regulation is determined by affection.

5. In the regulation (of the mourning) within the family circle, the affection throws the (duty of public) righteousness into the shade¹. In the regulation (of that which is) beyond that circle, the (duty of public) righteousness cuts the (mourning of) affection short¹. The service due to a father is employed in serving a ruler, and the reverence is the same for both:—this is the greatest instance of (the conviction of the duty of) righteousness, in all the esteem shown to nobility and the honour done to the honourable. Hence the sackcloth with jagged edges is worn (also) for the ruler for three years:—the regulation is determined by righteousness.

6. The eating after three days; the washing the head after three months; the sacrifice and change of dress at the end of the first year; the not carrying the emaciation to such an extent as to affect life:—these regulations were to avoid doing harm to the living

¹ A son, on his father's death, is exempted from official duties for a time; but this exemption is suspended on occasions of pressing exigency.

(by the mourning) for the dead. Not protracting the mourning rites beyond three years ; not mending even the coarsest sackcloth ; making no addition to the mound (raised at first) over the grave ; fixing the day for the sacrifice at the end of the second year ; playing (at first, on the conclusion of the rites) on a plain, unvarnished lute :—all these things were to make the people aware of the termination (of the several rites), and constituted the defined regulations.

The service due to a father is employed in serving a mother, and the love is the same for both. (But) in the sky there are not two suns, nor in a land two kings, nor in a state two rulers, nor in a family two equally honourable :—one (principle) regulates (all) these conditions. Hence, while the father is alive, the sackcloth with even edges is worn (for a mother), (and only) for a year,—showing that there are not (in the family) two equally honourable.

7. What is meant by the use of the staff ? It is (a symbol of) rank. On the third day it is given to the son ; on the fifth day, to Great officers ; and on the seventh day, to ordinary officers ;—(at the mourning rites for a ruler). Some say that it is given to them as the presiding mourners ; and others, that it is to support them in their distress.

A daughter (not yet fully grown) and a son (while but a lad), do not carry a staff ;—(being supposed) not to be capable of (extreme) distress.

When all the array of officers is complete, and all things are provided, and (the mourner) cannot speak (his directions), and things must (still) proceed, he is assisted to rise. If he be able to speak, and things will proceed (as he directs), he rises by the help of

the staff. Where (the mourner) has himself to take part in what is to be done, he will have his face grimed (as if black with sorrow). Women who are bald do not use the coiffure; hunchbacks do not unbare their arms; the lame do not leap; and the old and ill do not give up the use of liquor and flesh. All these are cases regulated by the consideration of circumstances.

8. After the occurrence of the death, the (wailing for) three days, which left no leisure for anything else; the not taking off (the headband or girdle) for three months; the grief and lamentation for a whole year; and the sorrow on to the three years:—(in all these things) there was a gradual diminution of the (manifestation of) affection. The sages, in accordance with that diminution of the natural feeling, made their various definite regulations.

9. It was on this account that the mourning rites were limited to three years. The worthiest were not permitted to go beyond this period, nor those who were inferior to them to fall short of it. This was the proper and invariable time for those rites, what the (sage) kings always carried into practice.

When it is said in the Shû (Part IV, Book VIII, i, 1), that Káo Jung, while occupying the mourning shed, for three years did not speak, this expresses approval of that sovereign. But the kings all observed this rule;—why is the approval only expressed in connexion with him? It may be replied, 'This Káo Jung was Wû Ting.' Wû Ting was a worthy sovereign of Yin. He had come to the throne in the due order of succession, and was thus loving and good in his observance of the mourning rites. At this time Yin, which had been

decaying, revived again ; ceremonial usages, which had been neglected, came again into use. On this account the approval of him was expressed, and therefore it was recorded in the Shû, and he was styled Kâo (The Exalted), and designated Kâo Jung (The Exalted and Honoured Sovereign). (The rule was that), during the three years' mourning, a ruler should not speak ; and that the Shû says, ' Kâo Jung, while he occupied the mourning shed, for the three years did not speak,' was an illustration of this. When it is said (in the Hsiâo King, chapter 18th), ' They speak, but without elegance of phrase,' the reference is to ministers and inferior (officers).

10. According to the usages, when wearing the sackcloth with jagged edges (for a father), (a son) indicated that he heard what was said to him, but did not reply in words ; when wearing that with even edges (for a mother), he replied, but did not speak (of anything else) ; when wearing the mourning of nine months, he might speak (of other things), but did not enter into any discussion ; when wearing that of five months, or of three, he might discuss, but did not show pleasure in doing so.

11. At the mourning rites for a parent, (the son) wore the cap of sackcloth, with strings of cords, and sandals of straw ; after the third day, he (began to) take gruel ; after the third month, he washed his head ; at the end of the year, in the thirteenth month, he put on the mourning silk and cap proper after the first year ; and when the three years were completed, he offered the auspicious sacrifice.

12. When one has completed these three regulated periods, the most animated with the sentiment

of benevolence (or humanity) can perceive the affection (underlying the usages); he who has (most) knowledge can perceive the nice distinctions pervading them; and he who has (most) strength can perceive the (force of) will (required for their discharge). The propriety that regulates them, and the righteousness that maintains their correctness, may be examined by filial sons, deferential younger brothers, and pure-minded virgins.

INDEX

TO THE

TEXTS OF CONFUCIANISM,

PARTS I, II, III, IV,

VOLUMES III, XVI, XXVII, XXVIII.

INDEX OF SUBJECTS.

The references refer to the parts and the pages.

- Ability and character necessary to official employment, Part i, pages 221-5; iii, 322-4.
- Acts and character, of Yáo, i, 31-6; of Shun, as Yáo's vice-gerent, i, 38-41; as sovereign, i, 42-5.
- Administration of government, royal regulations for, iii, 209-48; in the twelve months of the year, iii, 249-310; of justice, and how tempered, i, 43, 48-9, 254-64; iii, 235-8.
- Admonitions, of Yü to Shun, i, 58-61; of Í Yin to Thái Kiã, 92-103; to the prince of Khang, 170-1; to prince Shih, 205-10; to king Kbang, 200-5, 220-5, 404-7; to officers, 407-10; of duke Wü to himself, 413-17.
- Age and the aged, all dynasties honoured in all conditions of life, iv, 229-31; reverence and care of, i, 123, 185, 401; iii, 67-8, 70, 73-4, 240-4, 287-8, 464-70 (delicacies provided for); how shown in walking with, iv, 230; three classes of the aged, see Three.
- Agriculture, references to and descriptions of, i, 32-4, 42-3, 85, 258, 312, 316, 320-3, 331-3, 365, 369-70, 383, 389, 398-9; iii, 227-30, 239, 255, 260, 264, 270-1, 274, 284, 289, 293, 304, 308-9, 431-2.
- Altars, i, 40, 153, 420 (and note); the Great, i, 384 (and note); to the spirits of the land and grain, iv, 235; various, iv, 206-7.
- Ancestral temples and worship, i, 40-1, 44, 51, 92, 95, 126, 130, 134, 304-13, 313-36, 343, 348, 365-8, 370, 374-5, 387, 402-3, 420, 431-2, 477-8, 485-6, 488; iii, 223-5, 369-71, 411-13; iv, 204-6, 309-11.
- Ancients, the, emblematic figures of, i, 58; lessons and examples of, 107, 166, 171, 204, 229, 249, 252, 301. Ancient sayings, i, 271, 408.
- Announcements, or public proclamations, and speeches, at Kan, i, 76-7; of Thang, 84-6; of Kung-hui, 86-9; of king Wü,—the Great Declaration, 124-32, Speech at Mû, 131-2, and The Completion of the War, 133-5;

- of king *Kháng*, 156-61 (the Great Announcement); to prince of *Khang*, 165-71; against drunkenness, 171-81; of the duke of *Shào*, 181-8; of the duke of *Kâu*, 188-95; of king *Kháng*, to the people of *Shang*, 196-200; to his ministers, 226-31; of king *Khang*, 243-8; the speech at *Pi*, 267-70; of the marquis of *Khin*, 270-72.

INDEX OF PROPER NAMES.

Â-hăng, Part i, pages 95, 118, 311.
Called Pão-hăng, i, 118, 207.
I. q. 1 Yin, q. v.

Âi (duke), iii, 159, 187-9, 191, 197; iv, 166, 169, 261, 263, 312, 403, 409.

An (surname), An-jze and An Phing-kung, iii, 174-5, 402; iv, 165.

Black-, the, water, i, 71, 73.

Fâ (name of king Wû, q. v.), i, 126, 132, 135.

Fan, i, 355. (Relative of *Kbung r*), iii, 166, 199; iv, 421.

Fang (constellation), i, 82. (Place), iii, 125. Fang-hsün, i, 32. Fang-kbi, i, 34. Fang-fû, iv, 37.

Fäng (capital of king Wán), i, 133, 183, 246, 394-5. (River), i, 71, 74, 395. (Name of prince), i, 164-71. (Hexagram 55), ii, 183-6, 258-9, 335-6, 438, 443.

Fû (state), i, 423; iv, 282. (Hexagram 24), ii, 107-8, 233, 297-8, 435, 442. Fû-kbái, iii, 178. Fû-kbien, i, 73. Fû-kwan, i, 438. Fû-yen, i, 114.

Han (river), i, 68-9, 73. (State), i, 426. (Hill), i, 386. (Milky way), i, 363, 419.

Häng (river), i, 65. (Mountains), i, 68, 72-3. (Hex. 32), ii, 125-6, 238-9, 307, 436, 442.

Hão, i, 395.

Hâu-kí, i, 320, 341-2, 397-9, 420; iv, 32, 340, 350 (i. q. Kí and Kbi q. v.). Hâu Mû, iii, 152. Hâu-thû, iii, 280; iv, 208. (A domain), i, 75, 134, 165, 189, 244.

Ho (astronomers), i, 32-4, 81. (The Ho, or Yellow river), i, 65, 67, 69, 71, 73-4, 79, 108, 117, 308, 318, 336, 435; ii, 81; iii, 135,

193, 245, 407; iv, 123. (The Ho map), ii, 14-17; iii, 374. (Another river), i, 70. (State), i, 239. Ho-lí, i, 73.

Hsi (astronomers), i, 32-4, 81. Hsi-kih, i, 72. Hsi-kbi, iv, 294. Hsi-sze, i, 346.

Hsiâ (river), i, 381. (Dynasty), i, 23-4, 63, 84-5, 87, 89, 93, 96, 101, 128, 185-7, 197, 199, 214-6, 227, 310, 412. Hsiâ Hâu-shih, iii, 125, 138, 151, 191, 240, 242-3, 341, 438, 464; iv, 34-9, 123. Hsiâ Fû-kbi, iii, 403.

Hsiang, i, 356. (Dukes), iii, 154; 186. (The symbols of the Yi), ii, 12, 360, 381.

Hsião (duke), iii, 318. Hsião Kbi (hex. 9), ii, 76-7, 221-2, 278-9, 433-4, 443. Hsião Kwo (hex. 62), ii, 201-3, 264, 344-5, 384, 438, 443.

Hsieh, i, 42-3, 303, 307, 309; iii, 372; iv, 202, 208.

Hsien (dukes), iii, 126, 165; 182, iv, 252. (Hex. 31), ii, 123-4, 238, 305-6, 436, 442. Hsien Pán-fû, iii, 127-8. Hsien-jze, Hsien-jze So, iii, 150, 152-4, 201; iv, 423.

Hsin (state), i, 381 (note). Hsin-fû, i, 346.

Hsiung-r, i, 73.

Hsü (hex. 5), ii, 67, 218, 273, 433, 443. Hsü Kâu, i, 66. (Region), i, 269; iii, 193. Hsü Yü, iv, 166. Hsü Tien, iv, 450.

Hstian-ming, iii, 296, 302, 306.

Hû (hill), i, 345. (Nobles), i, 212-3, 427. (State), i, 77. (Officer), iii, 143. Hû-khau, i, 64, 72. Hû Tû, iii, 126-7.

Hui, iv, 303 (i. q. Yen Yüan, q. v.). Hui-jze, iii, 143.

Hung Yáo, i, 208.

- Hwâ, i, 70, 73 (Thâi Hwâ), 133.
 Hwâi, i, 66-8, 74, 268, 339-40, 345.
 Hwan (river), i, 71. (Dukes), iii, 186; iii, 323, 420; iv, 168; iv, 10. (Hex. 59), ii, 194-6, 261-2, 341, 384, 438, 442. (Minister), iii, 149. Hwan-tâu, i, 34, 41, 54. The three Hwan, iii, 421.
 Hwang Ti, iii, 280; iv, 123, 201, 209. Hwang-fû, i, 355.
 Hwo, i, 211.
 Î (rivers), i, 66, 74. (Another), 69, 74. (Tribes of the East), i, 150; (nine I), as in iv, 30. (Elementary forms of the Yî), ii, 12. (Prince), i, 79. (An officer), iii, 178. (Hex. 27), ii, 114-5, 235, 301-2, 435, 443. Î-ho, i, 266-7. Î Kih, i, 207. Î Liû, iv, 164. Î-po, iii, 187. Î Yin, i, 92, 95, 97-101, 207 (i. q. A-hăng).
 Kan (place), i, 76. Kan Pan, i, 116, 207.
 Kân (trigram 7), ii, 11, 32, 33, 425-6, 428-30, 432. (Hex. 52), ii, 175-7, 256, 331-2, 437, 441.
 Khan (trig. 6), ii, 11, 32-3, 425-6, 428-9, 431. (Hex. 29), ii, 118-9, 236-7, 303-4, 435, 443.
 Khang (state), i, 164. (King), i, 243, 250, 319; iv, 253. (King of Kêû), iii, 186.
 Kâo, Kâo Yâo, i, 43, 53-8, 61-2, 339. Kâo Sung, i, 118-9; ii, 205; iii, 179; iv, 390, 468 (i. q. Wû-ting, q. v.). Kâo 3ze-kâo, iii, 136.
 Khâu (duke), iii, 193.
 Kâu (hex. 44), ii, 154-5, 250, 321-2, 437, 443. Kâu-mang, iii, 250, 257, 262.
 Ko (marsh), i, 70, 74. (State), i, 88. (Hex. 49), ii, 167-8, 253-4, 328-9, 437, 443.
 Kû (state), i, 310. (Hex. 18), ii, 95-6, 228-9, 290-1, 434, 442. Kû-sâu, i, 52.
 Kung (place), i, 391. Kung-hsi Kêih, iii, 139. Kung-i Kung-ze, iii, 120. Kung Kiang, i, 434. Kung-ken Kiâ, iii, 184. Kung-kung (minister), i, 34, 41, 43; iv, 208 (Kung-kung-shih). Kung-ming Î, iii, 140; iv, 226. Kung-shû; Mô, iii, 151; Wân-ze, iii, 145, 180; Zo, iii, 184;
 Zû-zân, iii, 185. Kung-yang Kiâ, iv, 156.
 Khung (surname). Khung-ze, Confucius, passim in iii, iv. Called also Khung Kêû, iii, 123, 139, 196, 198, 364; iv, 122, 261, 305. Called also Kung-ni and Ni-fû, q. v. Styled also Fû-ze, the Master, and still more often, simply 3ze, the Master. Khung Kwei, iv, 252.

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE.

IN the Preface to the third volume of these 'Sacred Books of the East' (1879), I stated that I proposed giving in due course, in order to exhibit the System of Tâoism, translations of the Tâo Teh King by Lâo-ȳze (sixth century B.C.), the Writings of Kwang-ȳze (between the middle of the fourth and third centuries B.C.), and the Treatise of 'Actions and their Retributions' (of our eleventh century); and perhaps also of one or more of the other characteristic Productions of the System.

The two volumes now submitted to the reader are a fulfilment of the promise made so long ago. They contain versions of the Three Works which were specified, and, in addition, as Appendixes, four other shorter Treatises of Tâoism; Analyses of several of the Books of Kwang-ȳze by Lin Hsi-ȳung; a list of the stories which form so important a part of those Books; two Essays by two of the greatest Scholars of China, written the one in A.D. 586 and illustrating the Tâoistic beliefs of that age, and the other in A.D. 1078 and dealing with the four Books of Kwang-ȳze, whose genuineness is frequently called in question. The concluding Index is confined very much to Proper Names. For Subjects the reader is referred to the Tables of Contents, the Introduction to the Books of Kwang-ȳze (vol. xxxix, pp. 127-163), and the Introductory Notes to the various Appendixes.

The Treatise of Actions and their Retributions exhibits to us the Tâoism of the eleventh century in its moral or ethical aspects; in the two earlier Works we see it rather as a philosophical speculation than as a religion in the ordinary sense of that term. It was not till after the introduction of Buddhism into China in our first century that Tâoism began to organise itself as a

Religion, having its monasteries and nunneries, its images and rituals. While it did so, it maintained the superstitions peculiar to itself:—some, like the cultivation of the Táo as a rule of life favourable to longevity, come down from the earliest times, and others which grew up during the decay of the *Káu* dynasty, and subsequently blossomed;—now in Mystical Speculation; now in the pursuits of Alchemy; now in the search for the pills of Immortality and the Elixir vitae; now in Astrological fancies; now in visions of Spirits and in Magical arts to control them; and finally in the terrors of its Purgatory and everlasting Hell. Its phases have been continually changing, and at present it attracts our notice more as a degraded adjunct of Buddhism than as a development of the speculations of *Lão-ze* and *Kwang-ze*. Up to its contact with Buddhism, it subsisted as an opposition to the Confucian system, which, while admitting the existence and rule of the Supreme Being, bases its teachings on the study of man's nature and the enforcement of the duties binding on all men from the moral and social principles of their constitution.

It is only during the present century that the Texts of Táoism have begun to receive the attention which they deserve. Christianity was introduced into China by Nestorian missionaries in the seventh century; and from the Hsî-an monument, which was erected by their successors in 781, nearly 150 years after their first entrance, we perceive that they were as familiar with the books of *Lão-ze* and *Kwang-ze* as with the Confucian literature of the empire, but that monument is the only memorial of them that remains. In the thirteenth century the Roman Catholic Church sent its earliest missionaries to China, but we hardly know anything of their literary labours.

The great Romish missions which continue to the present day began towards the end of the sixteenth century; and there exists now in the India Office a translation of the Táo Teh King in Latin, which was brought to England

by a Mr. Matthew Raper, and presented by him to the Royal Society, of which he was a Fellow, on January 10th, 1788. The manuscript is in excellent preservation, but we do not know by whom the version was made. It was presented, as stated in the Introduction, p. 12, to Mr. Raper by P. de Grammont, 'Missionarius Apostolicus, ex-Jesuita.' The chief object of the translator or translators was to show that 'the Mysteries of the Most Holy Trinity and of the Incarnate God were anciently known to the Chinese nation.' The version as a whole is of little value. The reader will find, on pp. 115, 116, its explanation of L  o's seventy-second chapter;—the first morsel of it that has appeared in print.

Protestant missions to China commenced in 1807; but it was not till 1868 that the Rev. Dr. Chalmers, a member of one of them, published his 'Speculations on Metaphysics, Polity, and Morality of "The Old Philosopher," Lao-Tsze.' Meanwhile, Abel R  musat had aroused the curiosity of scholars throughout Europe, in 1823, by his 'Memoir on the Life and Opinions of L  o-Tseu, a Chinese Philosopher of the sixth century before our era, who professed the opinions commonly attributed to Pythagoras, to Plato, and to their disciples.' R  musat was followed by one who had received from him his first lessons in Chinese, and had become a truly great Chinese scholar,—the late Stanislas Julien. He published in 1842 'a complete translation for the first time of this memorable Work, which is regarded with reason as the most profound, the most abstract, and the most difficult of all Chinese Literature.' Dr. Chalmers's translation was also complete, but his comments, whether original or from Chinese sources, were much fewer than those supplied by Julien. Two years later, two German versions of the Treatise were published at Leipzig;—by Reinhold von Pl  nckner and Victor von Strauss, differing much from each other, but both marked by originality and ability.

I undertook myself, as stated above, in 1879 to translate for 'The Sacred Books of the East' the Texts of T  oism

which appear in these volumes; and, as I could find time from my labours on 'The Texts of Confucianism,' I had written out more than one version of L  o's work by the end of 1880. Though not satisfied with the result, I felt justified in exhibiting my general views of it in an article in the *British Quarterly Review* of July, 1883.

In 1884 Mr. F. H. Balfour published at Shanghai a version of 'Taoist Texts, Ethical, Political, and Speculative.' His Texts were ten in all, the *T  o Teh King* being the first and longest of them. His version of this differed in many points from all previous versions; and Mr. H. A. Giles, of H. M.'s Consular Service in China, vehemently assailed it and also Dr. Chalmers's translation, in the *China Review* for March and April, 1886. Mr. Giles, indeed, occasionally launched a shaft also at Julien and myself; but his main object in his article was to discredit the genuineness and authenticity of the *T  o Teh King* itself. 'The work,' he says, 'is undoubtedly a forgery. It contains, indeed, much that L  o Tz   did say, but more that he did not.' I replied, so far as was necessary, to Mr. Giles in the same *Review* for January and February, 1888; and a brief summary of my reply is given in the second chapter of the Introduction in this volume. My confidence has never been shaken for a moment in the *T  o Teh King* as a genuine relic of L  o-  ze, one of the most original minds of the Chinese race.

In preparing the version now published, I have used :—

First, 'The Complete Works of the Ten Philosophers;'—a *S  -   u* reprint in 1804 of the best editions of the Philosophers, nearly all belonging more or less to the T  oist school, included in it. It is a fine specimen of Chinese printing, clear and accurate. The Treatise of L  o-  ze of course occupies the first place, as edited by Kwei Y  -kwang (better known as Kwei K  n-shan) of the M  ng dynasty. The Text and Commentary are those of Ho-shang Kung (Intro., p. 7), along with the division of the whole into Parts and eighty-one chapters, and the titles of the several chapters, all attributed to him. Along the top of the page,

there is a large collection of notes from celebrated commentators and writers down to the editor himself.

Second, the Text and Commentary of Wang Pi (called also Fû-sze), who died A.D. 249, at the early age of twenty-four. See Introduction, p. 8.

Third, 'Helps (lit. Wings) to Lâo-îze;' by Jião Hung (called also Zâo-hâu), and prefaced by him in 1587. This is what Julien calls 'the most extensive and most important contribution to the understanding of Lâo-îze, which we yet possess.' Its contents are selected from the ablest writings on the Treatise from Han Fei (Introd., p. 5) downwards, closing in many chapters with the notes made by the compiler himself in the course of his studies. Altogether the book sets before us the substance of the views of sixty-four writers on our short *King*. Julien took the trouble to analyse the list of them, and found it composed of three emperors, twenty professed Tâoists, seven Buddhists, and thirty-four Confucianists or members of the Literati. He says, 'These last constantly explain Lâo-îze according to the ideas peculiar to the School of Confucius, at the risk of misrepresenting him, and with the express intention of throttling his system;' then adding, 'The commentaries written in such a spirit have no interest for persons who wish to enter fully into the thought of Lâo-îze, and obtain a just idea of his doctrine. I have thought it useless, therefore, to specify the names of such commentaries and their authors.'

I have quoted these sentences of Julien, because of a charge brought by Mr. Balfour, in a prefatory note to his own version of the Tâo Teh *King*, against him and other translators. 'One prime defect,' he says, though with some hesitation, 'lies at the root of every translation that has been published hitherto; and this is, that not one seems to have been based solely and entirely on commentaries furnished by members of the Tâoist school. The Confucian element enters largely into all; and here, I think, an injustice has been done to Lâo-îze. To a Confucianist the Tâoist system is in every sense of the word a heresy, and

a commentator holding this opinion is surely not the best expositor. It is as a Grammarian rather than as a Philosopher that a member of the Jû Chiá deals with the *Táo Teh King*; he gives the sense of a passage according to the syntactical construction rather than according to the genius of the philosophy itself; and in attempting to explain the text by his own canons, instead of by the canons of Táoism, he mistakes the superficial and apparently obvious meaning for the hidden and esoteric interpretation.'

Mr. Balfour will hardly repeat his charge of imperfect or erroneous interpretation against Julien; and I believe that it is equally undeserved by most, if not all, of the other translators against whom it is directed. He himself adopted as his guide the 'Explanations of the *Táo Teh King*,' current as the work of Lü Yen (called also Lü 3ü, Lü Tung-pin, and Lü K'ün-yang), a Táoist of the eighth century. Through Mr. Balfour's kindness I have had an opportunity of examining this edition of Láo's Treatise; and I am compelled to agree with the very unfavourable judgment on it pronounced by Mr. Giles as both 'spurious' and 'ridiculous.' All that we are told of Lü Yen is very suspicious; much of it evidently false. The editions of our little book ascribed to him are many. I have for more than twenty years possessed one with the title of 'The Meaning of the *Táo Teh King* Explained by the TRUE Man of K'ün-yang,' being a reprint of 1690, and as different as possible from the work patronised by Mr. Balfour.

Fourth, the *Thái Shang Hwun Hsüan Táo Teh K'ăn King*,—a work of the present dynasty, published at Shanghai, but when produced I do not know. It is certainly of the Lü 3ü type, and is worth purchasing as one of the finest specimens of block-printing. It professes to be the production of 'The Immortals of the Eight Grottoes,' each of whom is styled 'a Divine Ruler (Tí K'ün).' The eighty-one chapters are equally divided for commentary among them, excepting that 'the Divine Ruler, the Universal Refiner,' has the last eleven assigned to him. The Text is everywhere broken up into short clauses, which are explained in

a very few characters by 'God, the True Helper,' the same, I suppose, who is also styled, 'The Divine Ruler, the True Helper,' and comments at length on chapters 31 to 40. I mention these particulars as an illustration of how the ancient Tâoism has become polytheistic and absurd. The name 'God, the True Helper,' is a title, I imagine, given to Lü 3û. With all this nonsense, the composite commentary is a good one, the work, evidently, of one hand. One of several recommendatory Prefaces is ascribed to Wân *Khang*, the god of Literature; and he specially praises the work, as 'explaining the meaning by examination of the Text.'

Fifth, a 'Collection of the Most Important Treatises of the Tâoist Fathers (Tâo 3û *Kăn Kwan Kî Yáo*).' This was reprinted in 1877 at *Khang-kâu* in *Kiang-sû*; beginning with the Tâo Teh King, and ending with the Kan Ying Phien. Between these there are fourteen other Treatises, mostly short, five of them being among Mr. Balfour's 'Tâoist Texts.' The Collection was edited by a Lü Yü; and the Commentary selected by him, in all but the last Treatise, was by a Lî Hsî-yüeh, who appears to have been a recluse in a monastery on a mountain in the department of Pào-ning, *Sze-khwan*, if, indeed, what is said of him be not entirely fabulous.

Sixth, the Commentary on the Tâo Teh King, by Wû *Khăng* (A.D. 1249-1333) of Lin *Khwan*. This has been of the highest service to me. Wû *Khăng* was the greatest of the Yüan scholars. He is one of the Literati quoted from occasionally by 3iáo Hung in his 'Wings;' but by no means so extensively as Julien supposes (*Observations Détachées*, p. xli). My own copy of his work is in the 12th Section of the large Collection of the 'Yüeh-yâ Hall,' published in 1853. Writing of Wû *Khăng* in 1865 (*Proleg. to the Shû*, p. 36), I said that he was 'a bold thinker and a daring critic, handling his text with a freedom which I had not seen in any other Chinese scholar.' The subsequent study of his writings has confirmed me in this opinion of him. Perhaps he might be characterised as an independent, rather than as a bold, thinker, and the daring

of his criticism must not be supposed to be without caution. (See *Intro.*, p. 9.)

The Writings of *Kwang-ze* have been studied by foreigners still less than the *Treatise of Láo-ze*. When I undertook in 1879 to translate them, no version of them had been published. In 1881, however, there appeared at Shanghai Mr. Balfour's 'The Divine Classic of Nan-hua (*Intro.*, pp. 11, 12), being the Works of Chuang Tszé, Táoist Philosopher.' It was a 'bold' undertaking in Mr. Balfour thus to commence his translations of Chinese Books with one of the most difficult of them. I fancy that he was himself convinced of this, and that his undertaking had been 'too bold,' by the criticism to which his work was subjected in the *China Review* by Mr. Giles. Nevertheless, it was no small achievement to be the first to endeavour to lift up the veil from *Kwang-ze*. Even a first translation, though imperfect, is not without benefit to others who come after, and are able to do better. In preparing the draft of my own version, which draft was finished in April, 1887, I made frequent reference to the volume of Mr. Balfour.

Having exposed the errors of Mr. Balfour, Mr. Giles proceeded to make a version of his own, which was published last year in London, with the title of 'CHUANG Tzŭ, Mystic, Moralist, and Social Reformer.' It was not, however, till I was well through with the revision of my draft version, that I supplied myself with a copy of his volume. I did not doubt that Mr. Giles's translation would be well and tersely done, and I preferred to do my own work independently and without the help which he would have afforded me. In carrying my sheets through the press, I have often paused over my rendering of a passage to compare it with his; and I have pleasure in acknowledging the merits of his version. The careful and competent reader will see and form his own judgment on passages and points where we differ.

Before describing the editions of *Kwang-ze* which I

have consulted, I must not omit to mention Professor Gabelentz's 'Treatise on the Speech or Style of *Kwang-ze*,' as 'a Contribution to Chinese Grammar,' published at Leipzig in 1888. It has been a satisfaction to me to find myself on almost every point of usage in agreement with the views of so able a Chinese scholar.

The works which I employed in preparing my version have been:—

First, 'The True *K'ing* of Nan-hwâ,' in 'The Complete Works of the Ten Philosophers,' which has been described above. The Commentary which it supplies is that of Kwo Hsiang (Introd., pp. 9, 10), with 'The Sounds and Meanings of the Characters' from Lû Teh Ming's 'Explanations of the Terms and Phrases of the Classics,' of our seventh century. As in the case of the Táo Teh *K'ing*, the Ming editor has introduced at the top of his pages a selection of comments and notes from a great variety of scholars down to his own time.

Second, 'Helps (Wings) to *Kwang-ze* by Jiáo Hung,'—a kindred work to the one with a similar title on *Lão-ze*; by the same author, and prefaced by him in 1588. The two works are constructed on the same lines. Jiáo draws his materials from forty-eight authorities, from Kwo Hsiang to himself. He divides the several Books also into paragraphs, more or fewer according to their length, and the variety of subjects in them; and my version follows him in this lead with little or no change. He has two concluding Books; the one containing a collation of various readings, and the other a collection of articles on the history and genius of *Kwang-ze*, and different passages of his Text.

Third, the *Kwang-ze* Hsüeh or '*Kwang-ze* made like Snow,' equivalent to our '*Kwang-ze* Elucidated,' by a Lû Shû-kih of Canton province, written in 1796. The different Books are preceded by a short summary of their subject-matter. The work goes far to fulfil the promise of its title.

Fourth, *Kwang-ze* Yin, meaning 'The Train of

Thought in *Kwang-ze* Traced in its Phraseology.' My copy is a reprint, in 1880, of the Commentary of Lin Hsi-kung, who lived from the Ming into the present dynasty, under the editorship of a Lû K'û-wang of Kiang-sû province. The style is clear and elegant, but rather more concise than that of the preceding work. It leaves out the four disputed Books (XXVIII to XXXI); but all the others are followed by an elaborate discussion of their scope and plan.

Fifth, 'The Nan-hwâ Classic of *Kwang-ze* Explained,' published in 1621, by a Hsüan Ying or Jung (宣穎, 宣穎; the name is printed throughout the book, now in one of these ways, now in the other), called also Mâu-kung. The commentary is carefully executed and ingenious; but my copy of the book is so incorrectly printed that it can only be used with caution. Mr. Balfour appears to have made his version mainly from the same edition of the work; and some of his grossest errors pointed out by Mr. Giles arose from his accepting without question the misprints of his authority.

Sixth, 'Independent Views of *Kwang-ze* (莊子獨見);'—by Hû Wăn-ying, published in 1751. Occasionally, the writer pauses over a passage, which, he thinks, has defied all preceding students, and suggests the right explanation of it, or leaves it as inexplicable.

It only remains for me to refer to the Repertories of 'Elegant Extracts,' called by the Chinese K'û Wăn, which abound in their literature, and where the masterpieces of composition are elucidated with more or less of critical detail and paraphrase. I have consulted nearly a dozen of these collections, and would mention my indebtedness especially to that called Mèi K'wan, which discusses passages from twelve of *Kwang-ze*'s books.

When consulting the editions of Lin Hsi-kung and Lû Shû-kih, the reader is surprised by the frequency with which they refer to the 'old explanations' as 'incomplete and unsatisfactory,' often as 'absurd,' or 'ridiculous,' and he

finds on examination that they do not so express themselves without reason. He is soon convinced that the translation of *Kwang-ze* calls for the exercise of one's individual judgment, and the employment of every method akin to the critical processes by which the meaning in the books of other languages is determined. It was the perception of this which made me prepare in the first place a draft version to familiarise myself with the peculiar style and eccentric thought of the author.

From *Kwang-ze* to the Tractate of 'Actions and their Retributions' the transition is great. Translation in the latter case is as easy as it is difficult in the former. It was Rémusat who in 1816 called attention to the *Kan Ying Phien* in Europe, as he did to the *Tão Teh King* seven years later, and he translated the Text of it with a few Notes and Illustrative Anecdotes. In 1828 Klaproth published a translation of it from the *Man-châu* version; and in 1830 a translation in English appeared in the *Canton Register*, a newspaper published at Macao. In 1828 Julien published what has since been the standard version of it; with an immense amount of additional matter under the title—'Le Livre Des Récompenses et Des Peines, en Chinois et en Français; Accompagné de quatre cent Légendes, Anecdotes et Histoires, qui font connaître les Doctrines, les Croyances et les Mœurs de la Secte des Tão-ssé.'

In writing out my own version I have had before me:—

First, 'The *Thâi Shang Kan Ying Phien*, with Plates and the Description of them;' a popular edition, as profusely furnished with anecdotes and stories as Julien's original, and all pictorially illustrated. The notes, comments, and corresponding sentences from the Confucian Classics are also abundant.

Second, 'The *Thâi Shang Kan Ying Phien*, with explanations collected from the Classics and Histories;'—a Cantonese reprint of an edition prepared in the *Khien-lung* reign by a Hsiâ Kiû-hsiâ.

Third, the edition in the Collection of Tàost Texts described above on p. xvii; by Hsü Hsiù-teh. It is decidedly Tàostic; but without stories or pictures.

Fourth, 'The Thái Shang Kan Ying Phien Kû;' by Hui Tung, of the present dynasty. The Work follows the Commentary of Wú K'ăng on the Tào Teh King in the Collection of the Yüeh-yâ Hall. The preface of the author is dated in 1749. The Commentary, he tells us, was written in consequence of a vow, when his mother was ill, and he was praying for her recovery. It contains many extracts from Ko Hung (Introduction, p. 5, note), to whom he always refers by his nom de plume of Pao-phoh 3ze, or 'Maintainer of Simplicity.' He considers indeed this Tractate to have originated from him.

I have thus set forth all that is necessary to be said here by way of preface. For various information about the Treatises comprised in the Appendixes, the reader is referred to the preliminary notes, which precede the translation of most of them. I have often sorely missed the presence of a competent native scholar who would have assisted me in the quest of references, and in talking over difficult passages. Such a helper would have saved me much time; but the result, I think, would scarcely have appeared in any great alteration of my versions.

THE TEXTS OF TÂOISM.

THE TEXTS OF TÂOISM.

INTRODUCTION.

CHAPTER I.

WAS TÂOISM OLDER THAN LÂO-3ZE?

1. In writing the preface to the third volume of these Sacred Books of the East in 1879, I referred to Lâo-3ze as 'the acknowledged founder' of the system of Tâoism. Prolonged study and research, however, have brought me to the conclusion that there was a Tâoism earlier than his; and that before he wrote his *Tâo Teh King*, the principles taught in it had been promulgated, and the ordering of human conduct and government flowing from them inculcated.

For more than a thousand years 'the Three Religions' has been a stereotyped phrase in China, meaning what we call Confucianism, Tâoism, and Buddhism. The phrase itself simply means 'the Three Teachings,' or systems of instruction, leaving the subject-matter of each 'Teaching' to be learned by inquiry. Of the three, Buddhism is of course the most recent, having been introduced into China only in the first century of our Christian era. Both the others were indigenous to the country, and are traceable to a much greater antiquity, so that it is a question to which the earlier origin should be assigned. The years of Confucius's life lay between B.C. 551 and 478; but his own acknowledgment that he was 'a transmitter and not a maker,' and the testimony of his grandson, that 'he handed down the doctrines of Yâo and Shun (B.C. 2300), and elegantly displayed the regulations

of Wân and Wû (B.C. 1200), taking them as his model,' are well known.

2. Láo-¿ze's birth is said, in the most likely account of it, to have taken place in the third year of king Ting of the Káu dynasty, (B.C.) 604. He was thus rather more than fifty years older than Confucius. The two men seem to have met more than once, and I am inclined to think that the name of Láo-¿ze, as the designation of the other, arose from Confucius's styling him to his disciples 'The Old Philosopher.' They met as Heads of different schools or schemes of thought; but did not touch, so far as we know, on the comparative antiquity of their views. It is a peculiarity of the Táo Teh K'ing that any historical element in

Peculiarity of
the Táo Teh
K'ing.

it is of the vaguest nature possible, and in all its chapters there is not a single proper name.

Yet there are some references to earlier sages whose words the author was copying out, and to 'sentence-makers' whose maxims he was introducing to illustrate his own sentiments¹. In the most distant antiquity he saw a happy society in which his highest ideas of the Táo were realised, and in the seventeenth chapter he tells us that in the earliest times the people did not know that there were their rulers, and when those rulers were most successful in dealing with them, simply said, 'We are what we are of ourselves.' Evidently, men existed to Láo-¿ze at first in a condition of happy innocence,—in what we must call a paradisiacal state, according to his idea of what such a state was likely to be.

When we turn from the treatise of Láo-¿ze to the writings of K'wang-¿ze, the greatest of his followers, we are

¹ The sixth chapter of Láo's treatise, that about 'the Spirit of the Valley,' is referred to in Lich-¿ze (I, 1^b), as being from Hwang Tí, from which the commentator Tú Táo-¿ien (about A.D. 1300) takes occasion to say: 'From which we know that Láo-¿ze was accustomed to quote in his treatise passages from earlier records,—as when he refers to the remarks of "some sage," of "some ancient," of "the sentence-makers," and of "some writer on war." In all these cases he is clearly introducing the words of earlier wise men. The case is like that of Confucius when he said, "I am a transmitter and not a maker," &c.' Found in Biáo Hung, in loc.

not left in doubt as to his belief in an early state of paradisiacal Tâoism. Hwang Tî, the first year of whose reign is placed in B.C. 2697, is often introduced as a seeker of the Tâo, and is occasionally condemned as having been one of the first to disturb its rule in men's minds and break up 'the State of Perfect Unity.' He mentions several sovereigns of whom we can hardly find a trace in the records of history as having ruled in the primeval period, and gives us more than one description of the condition of the world during that happy time ¹.

I do not think that *Kwang-ze* had any historical evidence for the statements which he makes about those early days, the men who flourished in them, and their ways. His narratives are for the most part fictions, in which the names and incidents are of his own devising. They are no more true as matters of fact than the accounts of the characters in Bunyan's *Pilgrim's Progress* are true, with reference to any particular individuals; but as these last are grandly true of myriads of minds in different ages, so may we read in *Kwang-ze's* stories the thoughts of Tâoistic men beyond the restrictions of place and time. He believed that those thoughts were as old as the men to whom he attributed them. I find in his belief a ground for believing myself that to Tâoism, as well as to Confucianism, we ought to attribute a much earlier origin than the famous men whose names they bear. Perhaps they did not differ so much at first as they came afterwards to do in the hands of Confucius and Lâo-ze, both great thinkers, the one more of a moralist, and the other more of a metaphysician. When and how, if they were ever more akin than they came to be, their divergence took place, are difficult questions on which it may be well to make some remarks after we have tried to set forth the most important principles of Tâoism.

Those principles have to be learned from the treatise of Lâo-ze and the writings of *Kwang-ze*. We can hardly

¹ See in Books IX, X, and XII.

say that the Táoism taught in them is the Táoism now current in China, or that has been current in it for many centuries; but in an inquiry into the nature and origin of religions these are the authorities that must be consulted for Táoism, and whose evidence must be accepted. The treatise, 'Actions and the Responses to them,' will show one of the phases of it at a much later period.

CHAPTER II.

THE TEXTS OF THE TÁO TEH KING AND K'WANG-JZE SHÛ, AS REGARDS THEIR AUTHENTICITY AND GENUINENESS, AND THE ARRANGEMENT OF THEM.

I. 1. I will now state briefly, first, the grounds on which I accept the Táo Teh King as a genuine production of the age to which it has been assigned, and the truth of its authorship by Láo-jze to whom it has been ascribed. It would not have been necessary a few years ago to write as if these points could be called in question, but in 1886 Mr. Herbert A. Giles, of Her Majesty's Consular Service in China, and one of the ablest Chinese scholars living, vehemently called them in question in an article in the China Review for the months of March and April. His strictures have been replied to, and I am not going to revive here the controversy which they produced, but only to state a portion of the evidence which satisfies my own mind on the two points just mentioned.

2. It has been said above that the year B. C. 604 was, probably, that of Láo-jze's birth. The year of his death is not recorded. Sze-mâ K'ien, the first great Chinese historian, who died in about B. C. 85, commences ^{The evidence of Sze-mâ K'ien, the historian.} his 'Biographies' with a short account of Láo-jze. He tells us that the philosopher had been a curator of the Royal Library of K'âu, and that, mourning over the decadence of the dynasty, he wished to withdraw from the world, and proceeded to the pass or defile of Hsien-ku ¹,

¹ In the present district of Ling-páo, Shan K'âu, province of Ho-nan.

leading from China to the west. There he was recognised by the warden of the pass, Yin Hsî (often called Kwan Yin), himself a well-known Tâoist, who insisted on his leaving him a writing before he went into seclusion. Lâo-ze then wrote his views on 'The Tâo and its Characteristics,' in two parts or sections, containing more than 5000 characters, gave the manuscript to the warden, and went his way¹; 'nor is it known where he died.' This account is strange enough, and we need not wonder that it was by and by embellished with many marvels. It contains, however, the definite statements that Lâo-ze wrote the Tâo Teh K'ing in two parts, and consisting of more than 5000 characters. And that K'ien was himself well acquainted with the treatise is apparent from his quotations from it, with, in almost every case, the specification of the author. He thus adduces part of the first chapter, and a large portion of the last chapter but one. His brief references also to Lâo-ze and his writings are numerous.

3. But between Lâo-ze and Sze-mâ K'ien there were many Tâoist writers whose works remain. I may specify of them Lieh-ze (assuming that his chapters, though not composed in their present form by him, may yet be accepted as fair specimens of his teaching); Kwang-ze (of the fourth century B.C. We find him refusing to accept high office from king Wei of K'û, B.C. 339-299); Han Fei, a voluminous author, who died by his own hand in B.C. 230; and Liû An, a scion of the Imperial House of Han, king of Hwâi-nan, and better known to us as Hwâi-nan Ze, who also died by his own hand in B.C. 122. In the books of all these men we find quotations of many passages that are in our treatise. They are expressly said to be, many of them, quotations from Lâo-ze; Han Fei several times all but

Lieh-ze, Han
Fei-ze, and
other Tâoist
authors.

¹ In an ordinary Student's Manual I find a note with reference to this incident to which it may be worth while to give a place here:—The warden, it is said, set before Lâo-ze a dish of tea; and this was the origin of the custom of tea-drinking between host and guest (see the 幼學故事尋源, ch. 7, on Food and Drink).

shows the book beneath his eyes. To show how numerous the quotations by Han Fei and Liû An are, let it be borne in mind that the Tâo Teh King has come down to us as divided into eighty-one short chapters; and that the whole of it is shorter than the shortest of our Gospels. Of the eighty-one chapters, either the whole or portions of seventy-one are found in those two writers. There are other authors not so decidedly Tâoistic, in whom we find quotations from the little book. These quotations are in general wonderfully correct. Various readings indeed there are; but if we were sure that the writers did trust to memory, their differences would only prove that copies of the text had been multiplied from the very first.

In passing on from quotations to the complete text, I will Evidence of Pan Kû. clinch the assertion that *K'ien* was well acquainted with our treatise, by a passage from the History of the Former Han Dynasty (B.C. 206–A.D. 24), which was begun to be compiled by Pan Kû, who died however in 92, and left a portion to be completed by his sister, the famous Pan K'áo. The thirty-second chapter of his Biographies is devoted to Sze-mâ *K'ien*, and towards the end it is said that 'on the subject of the Great Tâo he preferred Hwang and Láo to the six King.' 'Hwang and Láo' must there be the writings of Hwang-Tî and Láo-ze. The association of the two names also illustrates the antiquity claimed for Tâoism, and the subject of note 1, p. 2.

4. We go on from quotations to complete texts, and turn, first, to the catalogue of the Imperial Library of Han, as compiled by Liû Hsin, not later than the commencement of our Christian era. There are entered in it Tâoist works by thirty-seven different authors, containing in all Catalogue of the Imperial Library of Han. 993 chapters or sections (phien). Í Yin, the premier of *K'hang* Thang (B.C. 1766), heads the list with fifty-one sections. There are in it four editions of Láo-ze's work with commentaries:—by a Mr. Lin, in four sections; a Mr. Fû, in thirty-seven sections; a Mr. Hsü, in six sections; and by Liû Hsiang, Hsin's own father, in four sections. All these four works have since perished, but there they were in the Imperial Library before

our era began. *Kwang-ze* is in the same list in fifty-two books or sections, the greater part of which have happily escaped the devouring tooth of time.

We turn now to the twentieth chapter of *K'ien's* Biographies, in which he gives an account of *Yo Í*, the scion of a distinguished family, and who himself played a famous part, both as a politician and military leader, and became prince of *Wang-kú* under the kingdom of *K'ao* in B.C. 279. Among his descendants was a *Yo K'ăn*, who learned in *K'hi* 'the words,' that is, the T'aoistic writings 'of *Hwang-Ti* and *L'ao-ze* from an old man who lived on the *Ho-side*.' The origin of this old man was not known, but *Yo K'ăn* taught what he learned from him to a *Mr. Ko*, who again became preceptor to *Sh'ao Sh'han*, the chief minister of *K'hi*, and afterwards of the new dynasty of *Han*, dying in B.C. 190.

5. Referring now to the catalogue of the Imperial Library of the dynasty of *Sui* (A.D. 589-618), we find that

The catalogue it contained many editions of *L'ao's* treatise of the *Sui* dynasty. with commentaries. The first mentioned is 'The *T'ao Teh King*,' with the commentary of the old man of the *Ho-side*, in the time of the emperor *W'ăn* of *Han* (B.C. 179-142). It is added in a note that the dynasty of *Liang* (A.D. 502-556) had possessed the edition of 'the old man of the *Ho-side*, of the time of the Warring States; but that with some other texts and commentaries it had disappeared.' I find it difficult to believe that there had been two old men of the *Ho-side*¹, both teachers of T'aoism and commentators on our *King*, but I am willing to content myself with the more recent work, and accept the copy that has been current—say from B.C. 150, when *Sze-m'ă K'ien* could have been little more than a boy. T'aoism was a favourite study with many of the *Han* emperors and their ladies. *Hw'ai-nan Ze*, of whose many quotations from

¹ The earlier old man of the *Ho-side* is styled in Chinese 河上丈人; the other 河上公; but the designations have the same meaning. Some critical objections to the genuineness of the latter's commentary on the ground of the style are without foundation.

the text of *Lão I* have spoken, was an uncle of the emperor *Wăn*. To the emperor *King* (B.C. 156-143), the son of *Wăn*, there is attributed the designation of *Lão's* treatise as a *King*, a work of standard authority. At the beginning of his reign, we are told, some one was commending to him four works, among which were those of *Lão-je* and *Kwang-je*. Deeming that the work of *Hwang-je* and *Lão-je* was of a deeper character than the others, he ordered that it should be called a *King*, established a board for the study of *Táoism*, and issued an edict that the book should be learned and recited at court, and throughout the country¹. Thenceforth it was so styled. We find *Hwang-fû Mî* (A.D. 215-282) referring to it as the *Táo Teh King*.

The second place in the *Sui* catalogue is given to the text and commentary of *Wang Pi* or *Wang Fû-sze*, an

The work of Wang Pi. extraordinary scholar who died in A.D. 249, at the early age of twenty-four. This work has always been much prized. It was its text which *Lû Teh-ming* used in his 'Explanation of the Terms and Phrases of the Classics,' in the seventh century. Among the editions of it which I possess is that printed in 1794 with the imperial moveable metal types.

I need not speak of editions or commentaries subsequent to *Wang Pi's*. They soon begin to be many, and are only not so numerous as those of the *Confucian Classics*.

6. All the editions of the book are divided into two parts, the former called *Táo*, and the latter *Teh*, meaning the Qualities or Characteristics of the *Táo*, but this distinction of subjects is by no means uniformly adhered to.

Divisions into parts, chapters; and number of characters in the text.

I referred already to the division of the whole into eighty-one short chapters (37 + 44), which is by common tradition attributed to *Ho-shang Kung*, or 'The old man of the *Ho-side*.' Another very early commentator, called *Yen Jun* or *Yen Kün-phing*, made a division into seventy-two chapters (40 + 32), under the influence, no doubt, of some

¹ See *Sião Hung's Wings or Helps*, ch. v, p. 11^a.

mystical considerations. His predecessor, perhaps, had no better reason for his eighty-one; but the names of his chapters were, for the most part, happily chosen, and have been preserved. Wû *Khǎng* arranged the two parts in sixty-seven chapters (31 + 36). It is a mistake, however, to suppose, as even Mr. Wylie with all his general accuracy did¹, that Wû 'curtails the ordinary text to some extent.' He does not curtail, but only re-arranges according to his fashion, uniting some of Ho-shang Kung's chapters in one, and sometimes altering the order of their clauses.

Sze-mâ *Khien* tells us that, as the treatise came from Láo-ze, it contained more than 5000 characters; that is, as one critic says, 'more than 5000 and fewer than 6000.' Ho-shang Kung's text has 5350, and one copy 5590; Wang P's, 5683, and one copy 5610. Two other early texts have been counted, giving 5720 and 5635 characters respectively. The brevity arises from the terse conciseness of the style, owing mainly to the absence of the embellishment of particles, which forms so striking a peculiarity in the composition of Mencius and *Kwang-ze*.

In passing on to speak, secondly and more briefly, of the far more voluminous writings of *Kwang-ze*, I may say that I do not know of any other book of so ancient a date as the *Táo Teh King*, of which the authenticity of the origin and genuineness of the text can claim to be so well substantiated.

II. 7. In the catalogue of the Han Library we have the entry of '*Kwang-ze* in fifty-two books or sections.' By

The Books of the time of the Sui dynasty, the editions of *Kwang-ze*. his work amounted to nearly a score. The earliest commentary that has come down to us goes by the name of Kwo Hsiang's. He was an officer and scholar of the Jin dynasty, who died about the year 312. Another officer, also of Jin, called Hsiang Hsiù, of rather an earlier date, had undertaken the same task, but left it incomplete; and his manuscripts coming (not, as it appears, by

¹ Notes on Chinese Literature, p. 173.

any fraud) into Kwo's hands, he altered and completed them as suited his own views, and then gave them to the public. In the short account of Kwo, given in the twentieth chapter of the Biographies of the 3in history, it is said that several tens of commentators had laboured unsatisfactorily on *Kwang's* writings before Hsiang Hsiû took them in hand. As the joint result of the labours of the two men, however, we have only thirty-three of the fifty-two sections mentioned in the Han catalogue. It is in vain that I have tried to discover how and when the other nineteen sections were lost. In one of the earliest commentaries on the *Tâo Teh King*, that by Yen 3un, we have several quotations from *Kwang-3ze* which bear evidently the stamp of his handiwork, and are not in the current Books; but they would not altogether make up a single section. We have only to be thankful that so large a proportion of the original work has been preserved. Sû Shih (3ze-kan, and Tung-pho), it is well known, called in question the genuineness of Books 28 to 31¹. Books 15 and 16 have also been challenged, and a paragraph here and there in one or other of the Books. The various readings, according to a collation given by 3iâo Hung, are few.

8. There can be no doubt that the Books of *Kwang-3ze* were hailed by all the friends of Tâoism. It has been mentioned above that the names 'Hwang-Ti' and 'Lâo-3ze' were associated together as denoting the masters of Tâoism, and the phrase, 'the words of Hwang-Ti and Lâo-3ze,' came to be no more than a name for the *Tâo Teh King*. Gradually the two names were contracted into 'Hwang Lâo,' as in the passage quoted on p. 6 from Pan Kû. After the Han dynasty, the name Hwang gave place to *Kwang*, and the names *Lâo Kwang*, and, sometimes inverted, *Kwang Lâo*, were employed to denote the system or the texts of Tâoism. In the account, for instance, of *Ki*

Importance to
Tâoism of the
Books of
Kwang-3ze.

¹ A brother of Shih, Sû Kêh (3ze-yû and Ying-pin), wrote a remarkable commentary on the *Tâo Teh King*; but it was Shih who first discredited those four Books, in his Inscription for the temple of *Kwang-3ze*, prepared in 1078.

Khang, in the nineteenth chapter of the Biographies of Jin, we have a typical Tâoist brought before us. When grown up, 'he loved Lâo and Kwang;' and a visitor, to produce the most favourable impression on him, says, 'Lâo-ze and Kwang Kâu are my masters.'

9. The thirty-three Books of Kwang-ze are divided into three Parts, called Nêi, or 'the Inner;' Wâi, or 'the Outer;' and Jâ, 'the Miscellaneous.' The first Part comprises seven Books; the second, fifteen; and the third, eleven. 'Inner' may be understood as equivalent to esoteric or More Im-

portant. The titles of the several Books are significant, and each expresses the subject or theme of its Book. They are believed to have been prefixed by Kwang-ze himself, and that no alteration could be made in the composition but for the worse. 'Outer' is understood in the sense of supplementary or subsidiary. The fifteen Books so called are 'Wings' to the previous seven. Their titles were not given by the author, and are not significant of the Tâoistic truth which all the paragraphs unite, or should unite, in illustrating; they are merely some name or phrase taken from the commencement of the first paragraph in each Book,—like the names of the Books of the Confucian Analects, or of the Hebrew Pentateuch. The fixing them originally is generally supposed to have been the work of Kwo Hsiang. The eleven Miscellaneous Books are also supplementary to those of the first Part, and it is not easy to see why a difference was made between them and the fifteen that precede.

10. Kwang-ze's writings have long been current under the name of Nan Hwa Kân King. He was a native of the duchy of Sung, born in what was then called the district of Măng, and belonged to the state or kingdom of Liang or Wei. As he grew up, he filled some official post in the city of Zhî-yüan,—the site of which it is not easy to determine with certainty. In A.D. 742, the name of his birth-place was changed (but only for a time) to Nan-hwa, and an imperial order was issued that Kwang-ze should thence-

The general title
of Kwang-ze's
works.

forth be styled 'The True Man of Nan-hwa,' and his Book, 'The True Book of Nan-hwa'.¹ To be 'a True Man' is the highest Táoistic achievement of a man, and our author thus canonised communicates his glory to his Book.

CHAPTER III.

WHAT IS THE MEANING OF THE NAME TÁO? AND THE CHIEF POINTS OF BELIEF IN TÁOISM.

1. The first translation of the *Táo Teh King* into a Western language was executed in Latin by some of the Roman Catholic missionaries, and a copy of Meaning of the name Táo. it was brought to England by a Mr. Matthew Raper, F.R.S., and presented by him to the Society at a meeting on the 10th January, 1788,—being the gift to him of P. Jos. de Grammont, 'Missionarius Apostolicus, ex-Jesuita.' In this version *Táo* is taken in the sense of *Ratio*, or the Supreme Reason of the Divine Being, the Creator and Governor.

M. Abel Rémusat, the first Professor of Chinese in Paris, does not seem to have been aware of the existence of the above version in London, but his attention was attracted to *Láo's* treatise about 1820, and, in 1823, he wrote of the character *Táo*, 'Ce mot me semble ne pas pouvoir être bien traduit, si ce n'est par le mot *λόγος* dans le triple sens de souverain Être, de raison, et de parole.'

Rémusat's successor in the chair of Chinese, the late Stanislas Julien, published in 1842 a translation of the whole treatise. Having concluded from an examination of it, and the earliest Táoist writers, such as *Kwang-ze*, *Ho-kwan Ze*, and *Ho-shang Kung*, that the *Táo* was devoid of action, of thought, of judgment, and of intelligence, he concluded that it was impossible to understand by it 'the Primordial Reason, or the Sublime Intelligence which created, and which governs the world,' and to

¹ See the *Khang-hsf Thesaurus* (佩文韻府), under 華.

this he subjoined the following note:—‘*Quelque étrange que puisse paraître cette idée de Lâo-ze, elle n’est pas sans exemple dans l’histoire de la philosophie. Le mot nature n’a-t-il pas été employé par certains philosophes, que la religion et la raison condamnent, pour désigner une cause première, également dépourvue de pensée et d’intelligence?*’ Julien himself did not doubt that Lâo’s idea of the character was that it primarily and properly meant ‘a way,’ and hence he translated the title *Tâo Teh King* by ‘*Le Livre de la Voie et de la Vertu*,’ transferring at the same time the name *Tâo* to the text of his version.

The first English writer who endeavoured to give a distinct account of *Tâoism* was the late Archdeacon Hardwick, while he held the office of Christian Advocate in the University of Cambridge. In his ‘*Christ and other Masters*’ (vol. ii, p. 67), when treating of the religions of China, he says, ‘I feel disposed to argue that the centre of the system founded by Lâo-ze had been awarded to some energy or power resembling the “Nature” of modern speculators. The indefinite expression *Tâo* was adopted to denominate an abstract cause, or the initial principle of life and order, to which worshippers were able to assign the attributes of immateriality, eternity, immensity, invisibility.’

It was, probably, Julien’s reference in his note to the use of the term *nature*, which suggested to Hardwick his analogy between Lâo-ze’s *Tâo*, and ‘the Nature of modern speculation.’ Canon Farrar has said, ‘We have long personified under the name of Nature the sum total of God’s laws as observed in the physical world; and now the notion of Nature as a distinct, living, independent entity seems to be ineradicable alike from our literature and our systems of philosophy¹.’ But it seems to me that this metaphorical or mythological use of the word *nature* for the Cause and Ruler of it, implies the previous notion of Him, that is, of God, in the mind. Does not this clearly appear in the words of Seneca?—‘*Vis illum (h.e. Jovem Deum) naturam*

¹ *Language and Languages*, pp. 184, 185.

vocare, non peccabis:—hic est ex quo nata sunt omnia, cujus spiritu vivimus¹.

In his translation of the Works of *Kwang-ze* in 1881, Mr. Balfour adopted Nature as the ordinary rendering of the Chinese Tâo. He says, 'When the word is translated Way, it means the Way of Nature,—her processes, her methods, and her laws; when translated Reason, it is the same as li,—the power that works in all created things, producing, preserving, and life-giving,—the intelligent principle of the world; when translated Doctrine, it refers to the True doctrine respecting the laws and mysteries of Nature.' He calls attention also to the point that 'he uses NATURE in the sense of *Natura naturans*, while the Chinese expression *wan wû* (= all things) denotes *Natura naturata*.' But this really comes to the metaphorical use of nature which has been touched upon above. It can claim as its patrons great names like those of Aquinas, Giordano Bruno, and Spinoza, but I have never been able to see that its barbarous phraseology makes it more than a figure of speech².

The term Nature, however, is so handy, and often fits so appropriately into a version, that if Tâo had ever such a signification I should not hesitate to employ it as freely as Mr. Balfour has done; but as it has not that signification, to try to put a non-natural meaning into it, only perplexes the mind, and obscures the idea of Lâo-ze.

Mr. Balfour himself says (p. xviii), 'The primary signification of Tâo is simply "road."' Beyond question this meaning underlies the use of it by the great master of Tâoism and by *Kwang-ze*³. Let the reader refer to the version of the twenty-fifth chapter of Lâo's treatise, and to

¹ Natur. Quaest. lib. II, cap. xlv.

² Martineau's 'Types of Ethical Theory,' I, p. 286, and his whole 'Conjectural History of Spinoza's Thought.'

³ 道 is equivalent to the Greek *ἡ ὁδός*, the way. Where this name for the Christian system occurs in our Revised Version of the New Testament in the Acts of the Apostles, the literal rendering is adhered to, Way being printed with a capital W. See Acts ix. 2; xix. 9, 23; xxii. 4; xxiv. 14, 22.

the notes subjoined to it. There Tâo appears as the spontaneously operating cause of all movement in the phenomena of the universe; and the nearest the writer can come to a name for it is 'the Great Tâo.' Having established this name, he subsequently uses it repeatedly; see chh. xxxiv and liii. In the third paragraph of his twentieth chapter, K'wang-ze uses a synonymous phrase instead of Lâo's 'Great Tâo,' calling it the 'Great Thû,' about which there can be no dispute, as meaning 'the Great Path,' 'Way,' or 'Course¹.' In the last paragraph of his twenty-fifth Book, K'wang-ze again sets forth the metaphorical origin of the name Tâo. 'Tâo,' he says, 'cannot be regarded as having a positive existence; existences cannot be regarded as non-existent. The name Tâo is a metaphor used for the purpose of description. To say that it exercises some causation, or that it does nothing, is speaking of it from the phase of a thing;—how can such language serve as a designation of it in its greatness? If words were sufficient for the purpose, we might in a day's time exhaust the subject of the Tâo. Words not being sufficient, we may talk about it the whole day, and the subject of discourse will only have been a thing. Tâo is the extreme to which things conduct us. Neither speech nor silence is sufficient to convey the notion of it. When we neither speak nor refrain from speech, our speculations about it reach their highest point.'

The Tâo therefore is a phenomenon; not a positive being, but a mode of being. Lâo's idea of it may become plainer as we proceed to other points of his system. In the meantime, the best way of dealing with it in translating is to transfer it to the version, instead of trying to introduce an English equivalent for it.

2. Next in importance to Tâo is the name Thien, meaning at first the vaulted sky or the open firmament of heaven. In the Confucian Classics, and in the speech of the Chinese

¹ 大塗. The Khang-hsi dictionary defines thû by lû, road or way. Medhurst gives 'road.' Unfortunately, both Morrison and Williams overlooked this definition of the character. Giles has also a note in loc., showing how this synonym settles the original meaning of Tâo in the sense of 'road.'

people, this name is used metaphorically as it is by ourselves for the Supreme Being, with reference especially to His will and rule. So it was that the idea of God arose among the Chinese fathers; so it was that they proceeded to fashion a name for God, calling Him Tî, and Shang Tî, 'the Ruler,' and 'the Supreme Ruler.' The Táoist fathers found this among their people; but in their idea of the Táo they had already a Supreme Concept which superseded the necessity of any other. The name Tî for God only occurs once in the Táo Teh King; in the well-known passage of the fourth chapter, where, speaking of the Táo, Láo-¿ze says, 'I do not know whose Son it is; it might seem to be before God.'

Nor is the name Thien very common. We have the phrase, 'Heaven and Earth,' used for the two great constituents of the kosmos, owing their origin to the Táo, and also for a sort of binomial power, acting in harmony with the Táo, covering, protecting, nurturing, and maturing all things. Never once is Thien used in the sense of God, the Supreme Being. In its peculiarly Táoistic employment, it is more an adjective than a noun. 'The Táo of Heaven' means the Táo that is Heavenly, the course that is quiet and undemonstrative, that is free from motive and effort, such as is seen in the processes of nature, grandly proceeding and successful without any striving or crying. The Táo of man, not dominated by this Táo, is contrary to it, and shows will, purpose, and effort, till, submitting to it, it becomes 'the Táo or Way of the Sages,' which in all its action has no striving.

The characteristics both of Heaven and man are dealt with more fully by Kwang than by Láo. In the conclusion of his eleventh Book, for instance, he says:—'What do we mean by Táo? There is the Táo (or Way) of Heaven, and there is the Táo of man. Acting without action, and yet attracting all honour, is the Way of Heaven. Doing and being embarrassed thereby is the Way of man. The Way of Heaven should play the part of lord; the Way of man, the part of minister. The two are far apart, and should be distinguished from each other.'

In his next Book (par. 2), *Kwang-ze* tells us what he intends by 'Heaven:—' 'Acting without action,—this is what is called Heaven.' Heaven thus takes its law from the Táo. 'The oldest sages and sovereigns attained to do the same,'—it was for all men to aim at the same achievement. As they were successful, 'vacancy, stillness, placidity, tastelessness, quietude, silence, and non-action' would be found to be their characteristics, and they would go on to the perfection of the Táo¹.

The employment of Thien by the Confucianists, as of Heaven by ourselves, must be distinguished therefore from the Táoistic use of the name to denote the quiet but mighty influence of the impersonal Táo; and to translate it by 'God' only obscures the meaning of the Táoist writers. This has been done by Mr. Giles in his version of *Kwang-ze*, which is otherwise for the most part so good. Everywhere on his pages there appears the great name 'God';—a blot on his translation more painful to my eyes and ears than the use of 'Nature' for Táo by Mr. Balfour. I know that Mr. Giles's plan in translating is to use strictly English equivalents for all kinds of Chinese terms². The plan is good where there are in the two languages such strict equivalents; but in the case before us there is no ground for its application. The exact English equivalent for the Chinese thien is our heaven. The Confucianists often used thien metaphorically for the personal Being whom they denominated Tî (God) and Shang Tî (the Supreme God), and a translator may occasionally, in working on books of Confucian literature, employ our name God for it. But neither Láo nor *Kwang* ever attached anything like our idea of God to it; and when one, in working on books of early Táoist literature, translates thien by God, such a rendering must fail to produce in an English reader a correct apprehension of the meaning.

There is also in *Kwang-ze* a peculiar usage of the name Thien. He applies it to the Beings whom he introduces as

¹ The Táo Teh King, ch. 25, and *Kwang-ze*, XIII, par. 1.

² See 'Strange Stories from a Chinese Studio,' vol. i, p. 1, note 2.

Peculiar usage
of Thien in
Kwang-ze. Masters of the Tâo, generally with mystical appellations in order to set forth his own views. Two instances from Book XI will suffice in illustration of this. In par. 4, Hwang-Ti does reverence to his instructor Kwang *Khăng-ze*¹, saying, 'In Kwang *Khăng-ze* we have an example of what is called Heaven,' which Mr. Giles renders 'Kwang *Khăng Ze* is surely God.' In par. 5, again, the mystical Yün-kiang is made to say to the equally fabulous and mystical Hung-mung, 'O Heaven, have you forgotten me?' and, farther on, 'O Heaven, you have conferred on me (the knowledge of) your operation, and revealed to me the mystery of it;' in both which passages Mr. Giles renders thien by 'your Holiness.'

But Mr. Giles seems to agree with me that the old Tâoists had no idea of a personal God, when they wrote of Thien or Heaven. On his sixty-eighth page, near the beginning of Book VI, we meet with the following sentence, having every appearance of being translated from the Chinese text:—'God is a principle which exists by virtue of its own intrinsicity, and operates without self-manifestation.' By an inadvertence he has introduced his own definition of 'God' as if it were *Kwang-ze*'s; and though I can find no characters in the text of which I can suppose that he intends it to be the translation, it is valuable as helping us to understand the meaning to be attached to the Great Name in his volume.

I have referred above (p. 16) to the only passage in Lâo's treatise, where he uses the name Tî or God in its highest sense, saying that 'the Tâo might seem to have been before Him.' He might well say so, for in his first chapter he describes the Tâo, '(conceived of as) having no name, as the Originator of heaven and

¹ Kwang *Khăng-ze* heads the list of characters in Ko Hung's 'History of Spirit-like Immortals (神仙傳),' written in our fourth century. 'He was,' it is said, 'an Immortal of old, who lives on the hill of M'ung-thung in a grotto of rocks.'

earth, and (conceived of as) having a name, as the Mother of all things.' The reader will also find the same predicates of the Tão at greater length in his fifty-first chapter.

The character Tî is also of rare occurrence in *Kwang-ze*, excepting as applied to the five ancient Tîs. In Bk. III, par. 4, and in one other place, we find it indicating the Supreme Being, but the usage is ascribed to the ancients. In Bk. XV, par. 3, in a description of the human SPIRIT, its name is said to be 'Thung Tî,' which Mr. Giles renders 'Of God;' Mr. Balfour, 'One with God;' while my own version is 'The Divinity in Man.' In Bk. XII, par. 6, we have the expression 'the place of God;' in Mr. Giles, 'the kingdom of God;' in Mr. Balfour, 'the home of God.' In this and the former instance, the character seems to be used with the ancient meaning which had entered into the folklore of the people. But in Bk. VI, par. 7, there is a passage which shows clearly the relative position of Tão and Tî in the Tãoistic system; and having called attention to it, I will go on to other points. Let the reader mark well the following predicates of the Tão:—'Before there were heaven and earth, from of old, there It was, securely existing. From It came the mysterious existence of spirits; from It the mysterious existence of Tî (God). It produced heaven, It produced earth¹.' This says more than the utterance of Lâu,—that 'the Tão seemed to be before God;'—does it not say that Tão was before God, and that He was what He is by virtue of Its operation?

3. Among the various personal names given to the Tão are those of 3ão Hwâ, 'Maker and Transformer,' and 3ão Wû Kê, 'Maker of things.' Instances of both these names are found in Bk. VI, parr. 9, 10. 'Creator' and 'God' have both been employed for them; but there is no idea of Creation in Tãoism.

Again and again *Kwang-ze* entertains the question of

¹ For this sentence we find in Mr. Balfour:—'Spirits of the dead, receiving It, become divine; the very gods themselves owe their divinity to its influence; and by it both Heaven and Earth were produced.' The version of it by Mr. Giles is too condensed:—'Spiritual beings drew their spirituality therefrom, while the universe became what we see it now.'

how it was at the first beginning of things. Different views are stated. In Bk. II, par. 4, he says:—‘Among the men of old their knowledge reached the extreme point. What was that extreme point?’

‘Some held that at first there was not anything. This is the extreme point,—the utmost limit to which nothing can be added.

‘A second class held that there was something, but without any responsive recognition of it (on the part of man).

‘A third class held that there was such recognition, but there had not begun to be any expression of different opinions about it. It was through the definite expression of different opinions about it that there ensued injury to the (doctrine of the) Tâo¹.’

The first of these three views was that which *Kwang-ze* himself preferred. The most condensed expression of it is given in Bk. XII, par. 8:—‘In the Grand Beginning of all things there was nothing in all the vacancy of space; there was nothing that could be named². It was in this state that there arose the first existence; the first existence, but still without bodily shape. From this things could be produced, (receiving) what we call their several characters. That which had no bodily shape was divided, and then without intermission there was what we call the process of conferring. (The two processes) continued to operate, and things were produced. As they were completed, there appeared the distinguishing lines of each, which we call the bodily shape. That shape was the body preserving in it the spirit, and each had its peculiar manifestation which we call its nature.’

Such was the genesis of things; the formation of heaven

¹ Compare also Bk. XXII, parr. 7, 8, and XXIII, par. 10.

² Mr. Balfour had given for this sentence:—‘In the beginning of all things there was not even nothing. There were no names; these arose afterwards.’ In his critique on Mr. Balfour’s version in 1882, Mr. Giles proposed:—‘At the beginning of all things there was nothing; but this nothing had no name.’ He now in his own version gives for it, ‘At the beginning of the beginning, even nothing did not exist. Then came the period of the nameless;’—an improvement, certainly, on the other; but which can hardly be accepted as the correct version of the text.

and earth and all that in them is, under the guidance of the Táo. It was an evolution and not a creation. How the Táo itself came,—I do not say into existence, but into operation,—neither Láo nor Kwang ever thought of saying anything about. We have seen that it is nothing material¹. It acted spontaneously of itself. Its sudden appearance in the field of non-existence, Producer, Transformer, Beautifier, surpasses my comprehension. To Láo it seemed to be before God. I am compelled to accept the existence of God, as the ultimate Fact, bowing before it with reverence, and not attempting to explain it, the one mystery, the sole mystery of the universe.

4. 'The bodily shape was the body preserving in it the spirit, and each had its peculiar manifestation which we call its nature.' So it is said in the passage quoted above from Kwang-ze's twelfth Book, and the language shows

how Táoism, in a loose and indefinite way,
 Man is composed of body and spirit, considered man to be composed of body and spirit, associated together, yet not necessarily

dependent on each other. Little is found bearing on this tenet in the Táo Teh King. The concluding sentence of ch. 33, 'He who dies and yet does not perish, has longevity,' is of doubtful acceptance. More pertinent is the description of life as 'a coming forth,' and of death as 'an entering²;' but Kwang-ze expounds more fully, though after all unsatisfactorily, the teaching of their system on the subject.

At the conclusion of his third Book, writing of the death of Láo-ze, he says, 'When the master came, it was at the proper time; when he went away, it was the simple sequence (of his coming). Quiet acquiescence in what happens at its proper time, and quietly submitting (to its sequence), afford no occasion for grief or for joy. The ancients described (death) as the loosening of the cord on which God suspended (the life). What we can point to are the faggots that have been consumed; but the fire is transmitted elsewhere, and we know not that it is over and ended.'

¹ The Táo Teh King, ch. 14; et al.

² Ch. 50.

It is, however, in connexion with the death of his own wife, as related in the eighteenth Book, that his views most fully—I do not say ‘clearly’—appear. We are told that when that event took place, his friend Hui-ze went to condole with him, and found him squatted on the ground, drumming on the vessel (of ice), and singing. His friend said to him, ‘When a wife has lived with her husband, brought up children, and then dies in her old age, not to wail for her is enough. When you go on to drum on the vessel and sing, is it not an excessive (and strange) demonstration?’ Kwang-ze replied, ‘It is not so. When she first died, was it possible for me to be singular, and not affected by the event? But I reflected on the commencement of her being, when she had not yet been born to life. Not only had she no life, but she had no bodily form. Not only had she no bodily form, but she had no breath. Suddenly in this chaotic condition there ensued a change, and there was breath; another change, and there was the bodily form; a further change, and she was born to life; a change now again, and she is dead. The relation between those changes is like the procession of the four seasons,—spring, autumn, winter, and summer. There she lies with her face up, sleeping in the Great Chamber¹; and if I were to fall sobbing and going on to wail for her, I should think I did not understand what was appointed for all. I therefore restrained myself.’

The next paragraph of the same Book contains another story about two ancient men, both deformed, who, when looking at the graves on Kwán-lun, begin to feel in their own frames the symptoms of approaching dissolution. One says to the other, ‘Do you dread it?’ and gets the reply, ‘No. Why should I dread it? Life is a borrowed thing. The living frame thus borrowed is but so much dust. Life and death are like day and night.’

In every birth, it would thus appear, there is, somehow, a repetition of what it is said, as we have seen, took place at ‘the Grand Beginning of all things,’ when out of the

¹ That is, between heaven and earth.

primal nothingness, the T'ao somehow appeared, and there was developed through its operation the world of things,—material things and the material body of man, which enshrines or enshrouds an immaterial spirit. This returns to the T'ao that gave it, and may be regarded indeed as that T'ao operating in the body during the time of life, and in due time receives a new embodiment.

In these notions of T'aoism there was a preparation for the appreciation by its followers of the Buddhistic system when it came to be introduced into the country, and which forms a close connexion between the two at the present day, T'aoism itself constantly becoming less definite and influential on the minds of the Chinese people. The Book which tells us of the death of *K'wang-ze's* wife concludes with a narrative about *Lieh-ze* and an old bleached skull¹, and to this is appended a passage about the metamorphoses of things, ending with the statement that 'the panther produces the horse, and the horse the man, who then again enters into the great machinery (of evolution), from which all things come forth (at birth) and into which they re-enter (at death).' Such representations need not be characterised.

5. K'ü Hsi, 'the prince of Literature,' described the main object of T'aoism to be 'the preservation of the breath of life;' and Liü Mî, probably of our thirteenth century², in his 'Dispassionate Comparison of the Three Religions,' declares that 'its chief achievement is the prolongation of longevity.' Such is the account of T'aoism ordinarily given by Confucian and Buddhist writers, but our authorities, L'ao and K'wang, hardly bear out this representation of it as true of their time. There are chapters of the T'ao Teh King which

¹ Quoted in the Amplification of the Sixteen Precepts or Maxims of the second emperor of the present dynasty by his son. The words are from Dr. Milne's version of 'the Sacred Edict,' p. 137.

² In his Index to the Tripitaka, Mr. Bunyio Nanjio (p. 359) assigns Liü Mî and his work to the Yüan dynasty. In a copy of the work in my possession they are assigned to that of Sung. The author, no doubt, lived under both dynasties,—from the Sung into the Yüan.

presuppose a peculiar management of the breath, but the treatise is singularly free from anything to justify what Mr. Balfour well calls 'the antics of the Kung-fû, or system of mystic and recondite calisthenics¹.' Láo insists, however, on the Táo as conducive to long life, and in *Kwang-ze* we have references to it as a discipline of longevity, though even he mentions rather with disapproval 'those who kept blowing and breathing with open mouth, inhaling and exhaling the breath, expelling the old and taking in new; passing their time like the (dormant) bear, and stretching and twisting (their necks) like birds.' He says that 'all this simply shows their desire for longevity, and is what the scholars who manage the breath, and men who nourish the body and wish to live as long as Phăng-ü, are fond of doing².' My own opinion is that the methods of the Táo were first cultivated for the sake of the longevity which they were thought to promote, and that Láo, discountenancing such a use of them, endeavoured to give the doctrine a higher character; and this view is favoured by passages in *Kwang-ze*. In the seventh paragraph, for instance, of his Book VI, speaking of parties who had obtained the Táo, he begins with a prehistoric sovereign, who 'got it and by it adjusted heaven and earth.' Among his other instances is Phăng-ü, who got it in the time of Shun, and lived on to the time of the five leading princes of Kâu, —a longevity of more than 1800 years, greater than that ascribed to Methuselah! In the paragraph that follows there appears a Nü Yü, who is addressed by another famous Táoist in the words, 'You are old, Sir, while your complexion is like that of a child;—how is it so?' and the reply is, 'I became acquainted with the Táo.'

I will adduce only one more passage of *Kwang*. In his eleventh Book, and the fourth paragraph, he tells us of interviews between Hwang-Ti, in the nineteenth year of his reign, which would be B. C. 2679, and his instructor Kwang Khăng-ze. The Táoist sage is not readily prevailed on

¹ See note on p. 187 of his *Kwang-ze*.

² See Bk. XV, par. 1.

to unfold the treasures of his knowledge to the sovereign, but at last his reluctance is overcome, and he says to him, 'Come, and I will tell you about the Perfect Táo. Its essence is surrounded with the deepest obscurity; its highest reach is in darkness and silence. There is nothing to be seen, nothing to be heard. When it holds the spirit in its arms in stillness, then the bodily form will of itself become correct. You must be still, you must be pure; not subjecting your body to toil, not agitating your vital force:—then you may live for long. When your eyes see nothing, your ears hear nothing, and your mind knows nothing, your spirit will keep your body, and the body will live long. Watch over what is within you; shut up the avenues that connect you with what is external;—much knowledge is pernicious. I will proceed with you to the summit of the Grand Brilliance, where we come to the bright and expanding (element); I will enter with you the gate of the dark and depressing element. There heaven and earth have their Controllers; there the Yin and Yang have their Repositories. Watch over and keep your body, and all things will of themselves give it vigour. I maintain the (original) unity (of these elements). In this way I have cultivated myself for 1200 years, and my bodily form knows no decay.' Add 1200 to 2679, and we obtain 3879 as the year B.C. of Kwang K'ang-ze's birth!

6. Láo-ze describes some other and kindred results of cultivating the Táo in terms which are sufficiently startling, and which it is difficult to accept. In his Startling results of the Táo. fiftieth chapter he says, 'He who is skilful in managing his life travels on land without having to shun rhinoceros or tiger, and enters a host without having to avoid buff coat or sharp weapon. The rhinoceros finds no place in him into which to thrust its horn, nor the tiger a place in which to fix its claws, nor the weapon a place to admit its point. And for what reason? Because there is in him no place of death.' To the same effect he says in his fifty-fifth chapter, 'He who has in himself abundantly the attributes (of the Táo) is like an infant. Poisonous

insects will not sting him ; fierce beasts will not seize him ; birds of prey will not strike him.'

Such assertions startle us by their contrariety to our observation and experience, but so does most of the teaching of Tâoism. What can seem more absurd than the declaration that 'the Tâo does nothing, and so there is nothing that it does not do?' And yet this is one of the fundamental axioms of the system. The thirty-seventh chapter, which enunciates it, goes on to say, 'If princes and kings were able to maintain (the Tâo), all things would of themselves be transformed by them.' This principle, if we can call it so, is generalised in the fortieth, one of the shortest chapters, and partly in rhyme :—

'The movement of the Tâo
By contraries proceeds ;
And weakness marks the course
Of Tâo's mighty deeds.

All things under heaven sprang from it as existing (and named) ; that existence sprang from it as non-existent (and not named).'

Ho-shang Kung, or whoever gave their names to the chapters of the Tâo Teh K'ing, styles this fortieth chapter 'Dispensing with the use (of means).' If the wish to use means arise in the mind, the nature of the Tâo as 'the Nameless Simplicity' has been vitiated ; and this nature is celebrated in lines like those just quoted :—

'Simplicity without a name
Is free from all external aim.
With no desire, at rest and still,
All things go right, as of their will.'

I do not cull any passages from *Kwang-ze* to illustrate these points. In his eleventh Book his subject is Government by 'Let-a-be and the exercise of Forbearance.'

7. This Tâo ruled men at first, and then the world was in a paradisiacal state. Neither of our authorities tells us how long this condition lasted, but as Lâo observes in his eighteenth chapter, 'the Tâo ceased to be observed.' *Kwang-ze*, however, gives us

more than one description of what he considered the paradisiacal state was. He calls it 'the age of Perfect Virtue.' In the thirteenth paragraph of his twelfth Book he says, 'In this age, they attached no value to wisdom, nor employed men of ability. Superiors were (but) as the higher branches of a tree; and the people were like the deer of the wild. They were upright and correct, without knowing that to be so was Righteousness; they loved one another, without knowing that to do so was Benevolence; they were honest and leal-hearted, without knowing that it was Loyalty; they fulfilled their engagements, without knowing that to do so was Good Faith; in their movements they employed the services of one another, without thinking that they were conferring or receiving any gift. Therefore their actions left no trace, and there was no record of their affairs.'

Again, in the fourth paragraph of his tenth Book, addressing an imaginary interlocutor, he says, 'Are you, Sir, unacquainted with the age of Perfect Virtue?' He then gives the names of twelve sovereigns who ruled in it, of the greater number of whom we have no other means of knowing anything, and goes on:—'In their times the people used knotted cords in carrying on their business. They thought their (simple) food pleasant, and their (plain) clothing beautiful. They were happy in their (simple) manners, and felt at rest in their (poor) dwellings. (The people of) neighbouring states might be able to descry one another; the voices of their cocks and dogs might be heard from one to the other; they might not die till they were old; and yet all their life they would have no communication together. In those times perfect good order prevailed.'

One other description of the primeval state is still more interesting. It is in the second paragraph of Bk. IX:—'The people had their regular and constant nature:—they wove and made themselves clothes; they tilled the ground and got food. This was their common faculty. They were all one in this, and did not form themselves into separate classes; so were they constituted and left to their natural tendencies. Therefore in the age of Perfect Virtue men walked along with slow and grave step, and with their

looks steadily directed forwards. On the hills there were no footpaths nor excavated passages; on the lakes there were no boats nor dams. All creatures lived in companies, and their places of settlement were made near to one another. Birds and beasts multiplied to flocks and herds; the grass and trees grew luxuriant and long. The birds and beasts might be led about without feeling the constraint; the nest of the magpie might be climbed to, and peeped into. Yes, in the age of Perfect Virtue, men lived in common with birds and beasts, and were on terms of equality with all creatures, as forming one family;—how could they know among themselves the distinctions of superior men and small men? Equally without knowledge, they did not leave the path of their natural virtue; equally free from desires, they were in the state of pure simplicity. In that pure simplicity, their nature was what it ought to be.'

Such were the earliest Chinese of whom *K'wang-ze* could venture to give any account. If ever their ancestors had been in a ruder or savage condition, it must have been at a much antecedent time. These had long passed out of such a state; they were tillers of the ground, and acquainted with the use of the loom. They lived in happy relations with one another, and in kindly harmony with the tribes of inferior creatures. But there is not the slightest allusion to any sentiment of piety as animating them individually, or to any ceremony of religion as observed by them in common. This surely is a remarkable feature in their condition. I call attention to it, but I do not dwell upon it.

8. But by the time of *Lão* and *K'wang* the cultivation of the *Tão* had fallen into disuse. The simplicity of life which it demanded, with its freedom from all disturbing speculation and action, was no longer to be found in individuals or in government. It was the general decay of manners and of social order which unsettled the mind of *Lão*, made him resign his position as a curator of the Royal Library, and determine to withdraw from China and hide himself

The decay of the
Tão before the
growth of
knowledge.

among the rude peoples beyond it. The cause of the deterioration of the Táo and of all the evils of the nation was attributed to the ever-growing pursuit of knowledge, and of what we call the arts of culture. It had commenced very long before;—in the time of Hwang-Ti, *Kwang* says in one place¹; and in another he carries it still higher to Sui-zăn and Fu-hsî². There had been indeed, all along the line of history, a groping for the rules of life, as indicated by the constitution of man's nature. The results were embodied in the ancient literature which was the life-long study of Confucius. He had gathered up that literature; he recognised the nature of man as the gift of Heaven or God. The monitions of God as given in the convictions of man's mind supplied him with a Táo or Path of duty very different from the Táo or Mysterious Way of Láo. All this was gall and wormwood to the dreaming librarian or brooding recluse, and made him say, 'If we could renounce our sageness and discard our wisdom, it would be better for the people a hundredfold. If we could renounce our benevolence and discard our righteousness, the people would again become filial and kindly. If we could renounce our artful contrivances and discard our (scheming for) gain, there would be no thieves nor robbers³.'

We can laugh at this. Táoism was wrong in its opposition to the increase of knowledge. Man exists under a law of progress. In pursuing it there are demanded discretion and justice. Moral ends must rule over material ends, and advance in virtue be ranked higher than advance in science. So have good and evil, truth and error, to fight out the battle on the field of the world, and in all the range of time; but there is no standing still for the individual or for society. Even Confucius taught his countrymen to set too high a value on the examples of antiquity. The school of Láo-ze fixing themselves in an unknown region beyond antiquity,—a prehistoric time between 'the Grand Beginning of all things' out of nothing, and the unknown commencement of societies of men,—has made no advance

¹ Bk. XI, par. 5.

² Bk. XVI, par. 2.

³ Táo Teh K'ing, ch. 19.

but rather retrograded, and is represented by the still more degenerate Tâoism of the present day.

There is a short parabolic story of *Kwang-ze*, intended to represent the antagonism between Tâoism and knowledge, which has always struck me as curious. The last paragraph of his seventh Book is this:—‘The Ruler (or god Tî) of the Southern Ocean was Shû (that is, Heedless); the Ruler of the Northern Ocean was Hû (that is, Hasty); and the Ruler of the Centre was Hwun-tun (that is, Chaos). Shû and Hû were continually meeting in the land of Hwun-tun, who treated them very well. They consulted together how they might repay his kindness, and said, “Men have all seven orifices for the purposes of seeing, hearing, eating, and breathing, while this (poor) Ruler alone has not one. Let us try and make them for him.” Accordingly they dug one orifice in him every day; and at the end of seven days Chaos died.’

So it was that Chaos passed away before Light. So did the nameless Simplicity of the Tâo disappear before Knowledge. But it was better that the Chaos should give place to the Kosmos. ‘Heedless’ and ‘Hasty’ did a good deed.

9. I have thus set forth eight characteristics of the Tâoistic system, having respect mostly to what is peculiar and mystical in it. I will now conclude my exhibition of it by

The practical
lessons of
Lâo-ze.

bringing together under one head the practical lessons of its author for men individually, and for the administration of government.

The praise of whatever excellence these possess belongs to Lâo himself: *Kwang-ze* devotes himself mainly to the illustration of the abstruse and difficult points.

First, it does not surprise us that in his rules for individual man, Lâo should place Humility in the foremost place. A favourite illustration with him of the Tâo is water. In his

Humility.

eighth chapter he says:—‘The highest excellence is like that of water. The excellence of water appears in its benefiting all things, and in its occupying, without striving to the contrary, the low ground which all men dislike. Hence (its way) is near to that of the Tâo.’ To the same effect in the seventy-eighth

chapter:—‘There is nothing in the world more soft and weak than water, and yet for attacking things that are firm and strong there is nothing that can take precedence of it. Every one in the world knows that the soft overcomes the hard, and the weak the strong; but no one is able to carry it out in practice.’

In his sixty-seventh chapter L  o associates with Humility two other virtues, and calls them his three Precious Things or

L  o’s three Jewels. They are Gentleness, Economy, and Jewels. Shrinking from taking precedence of others.

‘With that Gentleness,’ he says, ‘I can be bold; with that Economy I can be liberal; Shrinking from taking precedence of others, I can become a vessel of the highest honour.’

And in his sixty-third chapter, he rises to a still loftier height of morality. He says, ‘(It is the way of the T  o) to act without (thinking of) acting, to conduct affairs without (feeling) the trouble of them; to taste without discern-

ing any flavour, to consider the small as great, and the few as many, and to recompense injury with kindness.’

Rendering good
for evil.

Here is the grand Christian precept, ‘Render to no man evil for evil. If thine enemy hunger, feed him; if he thirst, give him drink. Be not overcome with evil, but overcome evil with good.’ We know that the maxim made some noise in its author’s lifetime; that the disciples of Confucius consulted him about it, and that he was unable to receive it¹. It comes in with less important matters by virtue of the T  oistic ‘rule of contraries.’ I have been surprised to find what little reference to it I have met with in the course of my Chinese reading. I do not think that Kwang-  ze takes notice of it to illustrate it after his fashion. There, however, it is in the T  o Teh King. The fruit of it has yet to be developed.

Second, L  o laid down the same rule for the policy of the state as for the life of the individual. He says in his sixty-first chapter, ‘What makes a state great is its being like a low-lying, down-flowing stream;—it becomes the

¹ Confucian Analects, XIV, 36.

centre to which tend all (the small states) under heaven.' He then uses an illustration which will produce a smile :— 'Take the case of all females. The female always overcomes the male by her stillness. Stillness may be considered (a sort of) abasement.' Resuming his subject, he adds, 'Thus it is that a great state, by condescending to small states, gains them for itself; and that small states, by abasing themselves to a great state, win it over to them. In the one case the abasement tends to gaining adherents; in the other case, to procuring favour. The great state only wishes to unite men together and nourish them; a small state only wishes to be received by, and to serve, the other. Each gets what it desires, but the great state must learn to abase itself.'

'All very well in theory,' some one will exclaim, 'but, the world has not seen it yet reduced to practice.' So it is. The fact is deplorable. No one saw the misery arising from it, and exposed its unreasonableness more unsparingly, than *K'wang-ze*. But it was all in vain in his time, as it has been in all the centuries that have since rolled their course. Philosophy, philanthropy, and religion have still to toil on, 'faint, yet pursuing,' believing that the time will yet come when humility and love shall secure the reign of peace and good will among the nations of men.

While enjoining humility, *Lão* protested against war. In his thirty-first chapter he says, 'Arms, however beautiful, are instruments of evil omen; hateful, it may be said, to all creatures. They who have the *Táo* do not like to employ them.' Perhaps in his sixty-ninth chapter he allows defensive war, but he adds, 'There is no calamity greater than that of lightly engaging in war. To do that is near losing the gentleness which is so precious. Thus it is that when weapons are (actually) crossed, he who deplors the (situation) conquers.'

There are some other points in the practical lessons of *Táoism* to which I should like to call the attention of the reader, but I must refer him for them to the chapters of the *Táo Teh King*, and the Books of *K'wang-ze*. Its salient features have been set forth somewhat fully. Not-

withstanding the scorn poured so freely on Confucius by Kwang-ze and other Tâoist writers, he proved in the course of time too strong for Lâo as the teacher of their people. The entrance of Buddhism, moreover, into the country in our first century, was very injurious to Tâoism, which still exists, but is only the shadow of its former self. It is tolerated by the government, but not patronised as it was when emperors and empresses seemed to think more of it than of Confucianism. It is by the spread of knowledge, which it has always opposed, that its overthrow and disappearance will be brought about ere long.

CHAPTER IV.

ACCOUNTS OF LÂO-3ZE AND KWANG-3ZE GIVEN BY SZE-MÂ KHIEN.

It seems desirable, before passing from Lâo and Kwang in this Introduction, to give a place in it to what is said about them by Sze-mâ K'ien. I have said that not a single proper name occurs in the Tâo Teh King. There is hardly an historical allusion in it. Only one chapter, the twentieth, has somewhat of an autobiographical character. It tells us, however, of no incidents of his life. He appears alone in the world through his cultivation of the Tâo, melancholy and misunderstood, yet binding that Tâo more closely to his bosom.

The Books of Kwang-ze are of a different nature, abounding in pictures of Tâoist life, in anecdotes and narratives, graphic, argumentative, often satirical. But they are not historical. Confucius and many of his disciples, Lâo and members of his school, heroes and sages of antiquity, and men of his own day, move across his pages; but the incidents in connexion with which they are introduced are probably fictitious, and devised by him 'to point his moral or adorn his tale.' His names of individuals and places are often like those of Bunyan in his Pilgrim's Progress or his Holy War, emblematic of their characters and the doctrines which he employs

them to illustrate. He often comes on the stage himself, and there is an air of verisimilitude in his descriptions, possibly also a certain amount of fact about them; but we cannot appeal to them as historical testimony. It is only to Sze-má *K'ien* that we can go for this; he always writes in the spirit of an historian; but what he has to tell us of the two men is not much.

And first, as to his account of Láo-ze. When he wrote, about the beginning of the first century B.C., the Taoist master was already known as Láo-ze. *K'ien*, however, tells us that his surname was Lî, and his name *R*, meaning 'Ear,' which gave place after his death to Tan, meaning 'Long-eared,' from which we may conclude that he was named from some peculiarity in the form of his ears. He was a native of the state of *K'û*, which had then extended far beyond its original limits, and his birth-place was in the present province of Ho-nan or of An-hui. He was a curator in the Royal Library; and when Confucius visited the capital in the year B.C. 517, the two men met. *K'ien* says that Confucius's visit to Lo-yang was that he might question Láo on the subject of ceremonies. He might have other objects in mind as well; but however that was, the two met. Lî said to Khung, 'The men about whom you talk are dead, and their bones are mouldered to dust; only their words are left. Moreover, when the superior man gets his opportunity, he mounts aloft; but when the time is against him, he is carried along by the force of circumstances¹. I have heard that a good merchant, though he have rich treasures safely stored, appears as if he were poor; and that the superior man, though his virtue be complete, is yet to outward seeming stupid. Put away your proud air and many desires, your insinuating habit and wild will. They are of no advantage to you;—this is all I have to tell you.' Confucius is made to say to his disciples after the interview: 'I know how

¹ Julien translates this by 'il erre à l'aventure.' In 1861 I rendered it, 'He moves as if his feet were entangled.' To one critic it suggests the idea of a bundle or wisp of brushwood rolled about over the ground by the wind.

birds can fly, fishes swim, and animals run. But the runner may be snared, the swimmer hooked, and the flyer shot by the arrow. But there is the dragon:—I cannot tell how he mounts on the wind through the clouds, and rises to heaven. To-day I have seen Láo-ze, and can only compare him to the dragon.'

In this speech of Confucius we have, I believe, the origin of the name Láo-ze, as applied to the master of Táoism. Its meaning is 'The Old Philosopher,' or 'The Old Gentleman'¹. Confucius might well so style Lî R. At the time of this interview he was himself in his thirty-fifth year, and the other was in his eighty-eighth. K'ien adds, 'Láo-ze cultivated the Táo and its attributes, the chief aim of his studies being how to keep himself concealed and remain unknown. He continued to reside at (the capital of) Káu, but after a long time, seeing the decay of the dynasty, he left it and went away to the barrier-gate, leading out of the kingdom on the north-west. Yin Hsí, the warden of the gate, said to him, "You are about to withdraw yourself out of sight. Let me insist on your (first) composing for me a book." On this, Láo-ze wrote a book in two parts, setting forth his views on the Táo and its attributes, in more than 5000 characters. He then went away, and it is not known where he died. He was a superior man, who liked to keep himself unknown.'

K'ien finally traces Láo's descendants down to the first century B.C., and concludes by saying, 'Those who attach themselves to the doctrine of Láo-ze condemn that of the Literati, and the Literati on their part condemn Láo-ze, verifying the saying, "Parties whose principles are different cannot take counsel together." Lî R taught that by doing nothing others are as a matter of course trans-

¹ The characters may mean 'the old boy,' and so understood have given rise to various fabulous legends; that his mother had carried him in her womb for seventy-two years (some say, for eighty-one), and that when born the child had the white hair of an old man. Julien has translated the fabulous legend of Ko Hung of our fourth century about him. By that time the legends of Buddhism about Sâkyamuni had become current in China, and were copied and applied to Láo-ze by his followers. Looking at the meaning of the two names, I am surprised no one has characterized Láo-ze as the Chinese Seneca.

formed, and that rectification in the same way ensues from being pure and still.'

This morsel is all that we have of historical narrative about Láo-ze. The account of the writing of the Táo Teh King at the request of the warden of the barrier-gate has a doubtful and legendary appearance. Otherwise, the record is free from anything to raise suspicion about it. It says nothing about previous existences of Láo, and nothing of his travelling to the west, and learning there the doctrines which are embodied in his work. He goes through the pass out of the domain of Káu, and died no one knowing where.

It is difficult, however, to reconcile this last statement with a narrative in the end of Kwang-ze's third Book. There we see Láo-ze dead, and a crowd of mourners wailing round the corpse, and giving extraordinary demonstrations of grief, which offend a disciple of a higher order, who has gone to the house to offer his condolences on the occasion. But for the peculiar nature of most of Kwang's narratives, we should say, in opposition to K'ien, that the place and time of Láo's death were well known. Possibly, however, Kwang-ze may have invented the whole story, to give him the opportunity of setting forth what, according to his ideal of it, the life of a Táolist master should be, and how even Láo-ze himself fell short of it.

Second, K'ien's account of Kwang-ze is still more brief. He was a native, he tells us, of the territory of Mǎng, which belonged to the kingdom of Liang or Wei, and held an office, he does not say what, in the city of K'hi-yüan. Kwang was thus of the same part of China as Láo-ze, and probably grew up familiar with all his speculations and lessons. He lived during the reigns of the kings Hui of Liang, Hsüan of K'hi, and Wei of K'ü. We cannot be wrong therefore in assigning his period to the latter half of the third, and earlier part of the fourth century B.C. He was thus a contemporary of Mencius. They visited at the same courts, and yet neither ever mentions the other. They were the two ablest debaters of their day, and fond of exposing what they deemed heresy. But it would only be

a matter of useless speculation to try to account for their never having come into argumentative collision.

K'ien says: 'Kwang had made himself well acquainted with all the literature of his time, but preferred the views of Lâo-ze, and ranked himself among his followers, so that of the more than ten myriads of characters contained in his published writings the greater part are occupied with metaphorical illustrations of Lâo's doctrines. He made "The Old Fisherman," "The Robber *Kih*," and "The Cutting open Satchels," to satirize and expose the disciples of Confucius, and clearly exhibit the sentiments of Lâo. Such names and characters as "Wei-lêi Hsü" and "Khang-sang Ze" are fictitious, and the pieces where they occur are not to be understood as narratives of real events¹.

'But Kwang was an admirable writer and skilful composer, and by his instances and truthful descriptions hit and exposed the Mohists and Literati. The ablest scholars of his day could not escape his satire nor reply to it, while he allowed and enjoyed himself with his sparkling, dashing style; and thus it was that the greatest men, even kings and princes, could not use him for their purposes.

'King Wei of *K'û*, having heard of the ability of Kwang *K'û*, sent messengers with large gifts to bring him to his court, and promising also that he would make him his chief minister. Kwang-ze, however, only laughed and said to them, "A thousand ounces of silver are a great gain to me, and to be a high noble and minister is a most honourable position. But have you not seen the victim-ox for the border sacrifice? It is carefully fed for several years, and robed with rich embroidery that it may be fit to enter the Grand Temple. When the time comes for it to do so, it would prefer to be a little pig, but it cannot get to be so. Go away quickly, and do not soil me with your presence.

¹ Khang-sang Ze is evidently the Käng-sang *K'û* of Kwang's Book XXIII. Wei-lêi Hsü is supposed by Sze-mâ K'ang of the Tang dynasty, who called himself the Lesser Sze-mâ, to be the name of a Book; one, in that case, of the lost books of Kwang. But as we find the 'Hill of Wei-lêi' mentioned in Bk. XXIII as the scene of Käng-sang *K'û*'s Tâoistic labours and success, I suppose that *K'ien*'s reference is to that. The names are quoted by him from memory, or might be insisted on as instances of different readings.

I had rather amuse and enjoy myself in the midst of a filthy ditch than be subject to the rules and restrictions in the court of a sovereign. I have determined never to take office, but prefer the enjoyment of my own free will.”

K'hen concludes his account of *K'wang-ze* with the above story, condensed by him, probably, from two of *K'wang's* own narratives, in par. 11 of Bk. XVII, and 13 of XXXII, to the injury of them both. Paragraph 14 of XXXII brings before us one of the last scenes of *K'wang-ze's* life, and we may doubt whether it should be received as from his own pencil. It is interesting in itself, however, and I introduce it here: ‘When *K'wang-ze* was about to die, his disciples signified their wish to give him a grand burial. “I shall have heaven and earth,” he said, “for my coffin and its shell; the sun and moon for my two round symbols of jade; the stars and constellations for my pearls and jewels;—will not the provisions for my interment be complete? What would you add to them?” The disciples replied, “We are afraid that the crows and kites will eat our master.” *K'wang-ze* rejoined, “Above, the crows and kites will eat me; below, the mole-cricket and ants will eat me; to take from those and give to these would only show your partiality.”’

Such were among the last words of *K'wang-ze*. His end was not so impressive as that of Confucius; but it was in keeping with the general magniloquence and strong assertion of independence that marked all his course.

CHAPTER V.

ON THE TRACTATE OF ACTIONS AND THEIR RETRIBUTIONS.

1. The contrast is great between the style of the *Tao Teh King* and the Books of *K'wang-ze* and that of the *Kan Ying Phien*, a translation of which is now submitted as a specimen of the Texts of Taoism. The works of *Lao* and *K'wang* stand alone in the literature of the system. What

Peculiar style
and nature of
the *Kan Ying*
Phien.

it was before Láo cannot be ascertained, and in his chapters it comes before us not as a religion, but as a subject of philosophical speculation, together with some practical applications of it insisted on by Láo himself. The brilliant pages of *K'wang-ze* contain little more than his ingenious defence of his master's speculations, and an aggregate of illustrative narratives sparkling with the charms of his composition, but in themselves for the most part unbelievable, often grotesque and absurd. This treatise, on the other hand, is more of what we understand by a sermon or popular tract. It eschews all difficult discussion, and sets forth a variety of traits of character and actions which are good, and a still greater variety of others which are bad, exhorting to the cultivation and performance of the former, and warning against the latter. It describes at the outset the machinery to secure the record of men's doings, and the infliction of the certain retribution, and concludes with insisting on the wisdom of repentance and reformation. At the same time it does not carry its idea of retribution beyond death, but declares that if the reward or punishment is not completed in the present life, the remainder will be received by the posterity of the good-doer and of the offender.

A place is given to the treatise among the Texts of Táoism in 'The Sacred Books of the East,' because of its popularity in China. 'The various editions of it,' as observed by Mr. Wylie, 'are innumerable; it has appeared from time to time in almost every conceivable size, shape, and style of execution. Many commentaries have been written upon it, and it is frequently published with a collection of several hundred anecdotes, along with pictorial illustrations, to illustrate every paragraph seriatim. It is deemed a great act of merit to aid by voluntary contribution towards the gratuitous distribution of this work¹.'

2. The author of the treatise is not known, but, as Mr. Wylie also observes, it appears to have been written during the Sung dynasty. The earliest mention of it which I have met with is in the continua-

The origin of
the treatise.

¹ Notes on Chinese Literature, p. 179.

tion of Ma-twan Lin's encyclopedic work by Wang *K'hi*, first published in 1586, the fourteenth year of the fourteenth emperor of the Ming dynasty. In Wang's supplement to his predecessor's account of Taoist works, the sixth notice is of 'a commentary on the *Thâi Shang Kan Ying Phien* by a *Lî K'hang-ling*,' and immediately before it is a commentary on the short but well-known *Yin Fû King* by a *Lû Tien*, who lived 1042-1102. Immediately after it other works of the eleventh century are mentioned. To that same century therefore we may reasonably refer the origin of the *Kan Ying Phien*.

As to the meaning of the title, the only difficulty is with the two commencing characters *Thâi Shang*. Julien left

The meaning of them untranslated, with the note, however, the title. that they were 'l'abréviation de *Thâi Shang*

Lão K'ün, expression honorifique par laquelle les Tào-sze désignent *Lão-ze*, le fondateur de leur secte¹. This is the interpretation commonly given of the phrase, and it is hardly worth while to indicate any doubt of its correctness; but if the characters were taken, as I believe they were, from the beginning of the seventeenth chapter of the *Tào Teh King*, I should prefer to understand them of the highest and oldest form of the Taoistic teaching².

3. I quoted on page 13 the view of Hardwick, the Christian Advocate of Cambridge, that 'the indefinite expression

¹ See 'Le Livre des Récompense et des Peines en Chinois et en François' (London, 1835).

² The designation of *Lão-ze* as *Thâi Shang Lão K'ün* originated probably in the Tang dynasty. It is on record that in 666 *K'ao Jung*, the third emperor, went to *Lão-ze's* temple at *Po K'âu* (the place of *Lão's* birth, and still called by the same name, in the department of *F'ang-yang* in *An-hui*), and conferred on him the title of *Thâi Shang Yüan Yüan Hwang T'î*, 'The Great God, the Mysterious Originator, the Most High.' 'Then,' says Mayers, *Manual*, p. 113, 'for the first time he was ranked among the gods as "Great Supreme, the Emperor (or Imperial God) of the Dark First Cause."' The whole entry is

至亳州尊老君爲太上元(或玄)元皇帝.
Later on, in 1014, we find *K'ao Jung*, the fourth Sung emperor, also visiting *Po K'âu*, and in *Lão's* temple, which has by this time become 'the Palace of Grand Purity,' enlarging his title to *Thâi Shang Lão K'ün Hwun Yüan Shang Teh Hwang T'î*, 'The Most High, the Ruler *Lão*, the Great God of Grand Virtue at the Chaotic Origin.' But such titles are not easily translated.

Tào was adopted to denominate an abstract Cause, or the initial principle of life and order, to Taoism a religion? which worshippers were able to assign the attributes of immateriality, eternity, immensity, invisibility.' His selection of the term worshippers in this passage was unfortunate. Neither Lâu nor Kwang says anything about the worship of the Tào, about priests or monks, about temples or rituals. How could they do so, seeing that Tào was not to them the name of a personal Being, nor 'Heaven' a metaphorical term equivalent to the Confucian Tî, 'Ruler,' or Shang Tî, 'Supreme Ruler.' With this agnosticism as to God, and their belief that by a certain management and discipline of the breath life might be prolonged indefinitely, I do not see how anything of an organised religion was possible for the old Tàoists.

The Tàoist proclivities of the founder of the *K'in* dynasty are well known. If his life had been prolonged, and the dynasty become consolidated, there might have arisen such a religion in connexion with Tàoism, for we have a record that he, as head of the Empire, had eight spirits¹ to which he offered sacrifices. *K'in*, however, soon passed away; what remained in permanency from it was only the abolition of the feudal kingdom.

4. We cannot here attempt to relate in detail the rise and growth of the *K'ang* family in which the headship of Tàoism has been hereditary since our first Christian century, with the exception of one not very long interruption.

The family of *K'ang*. One of the earliest members of it, *K'ang* Liang, must have been born not long after the death of *K'wang-ze*, for he joined the party of *Liú*

¹ The eight spirits were:—1. The Lord of Heaven; 2. The Lord of Earth; 3. The Lord of War; 4. The Lord of the Yang operation; 5. The Lord of the Yin operation; 6. The Lord of the Moon; 7. The Lord of the Sun; and 8. The Lord of the Four Seasons. See Mayers's *C. R. Manual*, pp. 327, 328. His authority is the sixth of Sze-mâ *K'ien*'s monographs. *K'ien* seems to say that the worship of these spirits could be traced to *Thâi Kung*, one of the principal ministers of kings *Wân* and *Wû* at the rise of the *K'âu* dynasty in the twelfth century B. C., and to whom in the list of Tàoist writings in the Imperial Library of Han, no fewer than 237 *chien* are ascribed.

Pang, the founder of the dynasty of Han, in B. C. 208, and by his wisdom and bravery contributed greatly to his success over the adherents of *K'in*, and other contenders for the sovereignty of the empire. Abandoning then a political career, he spent the latter years of his life in a vain quest for the elixir of life.

Among Liang's descendants in our first century was a *Kang Tào-ling*, who, eschewing a career in the service of the state, devoted himself to the pursuits of alchemy, and at last succeeded in compounding the grand elixir or pill, and at the age of 123 was released from the trammels of the mortal body, and entered on the enjoyment of immortality, leaving to his descendants his books, talismans and charms, his sword, mighty against spirits, and his seal. *Tào-ling* stands out, in *Tâoist* accounts, as the first patriarch of the system, with the title of *Thien Shih*, 'Master or Preceptor of Heaven.' *Hsüan Jung* of the *Thang* dynasty in 748, confirmed the dignity and title in the family; and in 1016 the *Sung* emperor *K'ân Jung* invested its representative with large tracts of land near the *Lung-hû* mountain in *K'iang-hsi*. The present patriarch—for I suppose the same man is still alive—made a journey from his residence not many years ago, and was interviewed by several foreigners in Shanghai. The succession is said to be perpetuated by the transmigration of the soul of *Kang Tào-ling* into some infant or youthful member of the family; whose heirship is supernaturally revealed as soon as the miracle is effected¹.

This superstitious notion shows the influence of Buddhism on *Tâoism*. It has been seen from the eighteenth of the Books of *K'wang-ze* what affinities there were between *Tâoism* and the Indian system; and there can be no doubt that the introduction of the latter into China did more than anything else to affect the development of the *Tâoistic* system. As early as the time of Confucius there were recluses in the country, men who had withdrawn from the world, disgusted with its

Influence of
Buddhism on
Tâoism.

¹ See Mayers's C. R. Manual, Part I, article 35.

vanities and in despair from its disorders. Lâo would appear to have himself contemplated this course. When their representatives of our early centuries saw the Buddhists among them with their images, monasteries, and nunneries, their ritual and discipline, they proceeded to organise themselves after a similar fashion. They built monasteries and nunneries, framed images, composed liturgies, and adopted a peculiar mode of tying up their hair. The 'Three Precious Ones' of Buddhism, emblematic to the initiated of Intelligence personified in Buddha, the Law, and the Community or Church, but to the mass of the worshippers merely three great idols, styled by them Buddha Past, Present, and To Come: these appeared in Tâoism as the 'Three Pure Ones,' also represented by three great images, each of which receives the title of 'His Celestial Eminence,' and is styled the 'Most High God (Shang Tî).' The first of them is a deification of Chaos, the second, of Lâo-ze, and the third of I know not whom or what; perhaps of the Tâo.

But those Three Pure Ones have been very much cast into the shade, as the objects of popular worship and veneration, by Yü Hwang Tî or Yü Hwang Shang Tî. This personage appears to have been a member of the Kang clan, held to be a magician and venerated from the time of the Thang dynasty, but deified in 1116 by the Sung emperor Hui Jung at the instigation of a charlatan Lin Ling-sû, a renegade Buddhist monk. He is the god in the court of heaven to whom the spirits of the body and of the hearth in our treatise proceed at stated times to report for approval or condemnation the conduct of men.

Since the first publication of the Kan Ying Phien, the tenets of Buddhism have been still further adopted by the teachers of Tâoism, and shaped to suit the nature of their own system. I have observed that the idea of retribution in our treatise does not go beyond the present life; but the manifestoes of Tâoism of more recent times are much occupied with descriptions of the courts of purgatory and threatenings of the everlasting misery of hell to those whom their sufferings in those courts

fail to wean from their wickedness. Those manifestoes are published by the mercy of Yü Hwang Shang Tî that men and women may be led to repent of their faults and make atonement for their crimes. They emanate from the temples of the tutelary deities¹ which are found throughout the empire, and especially in the walled cities, and are under the charge of Tâoist monks. A visitor to one of the larger of these temples may not only see the pictures of the purgatorial courts and other forms of the modern superstitions, but he will find also astrologers, diviners, geomancers, physiognomists, et id genus omne, plying their trades or waiting to be asked to do so, and he will wonder how it has been possible to affiliate such things with the teachings of Lâo-ze.

Other manifestoes of a milder form, and more like our tractate, are also continually being issued as from one or other of what are called the state gods, whose temples are all in the charge of the same monks. In the approximation which has thus been going on of Tâoism to Buddhism, the requirement of celibacy was long resisted by the professors of the former; but recent editions of the Penal Code² contain sundry regulations framed to enforce celibacy, to bind the monks and nuns of both systems to the observance of the Confucian maxims concerning filial piety, and the sacrificial worship of the dead; and also to restrict the multiplication of monasteries and nunneries. Neither Lâo nor Kwang was a celibate or recommended celibacy. The present patriarch, as a married man, would seem to be able still to resist the law.

¹ Called *K'zăng Hwang Miào*, 'Wall and Moat Temples,' Palladia of the city.

² See Dr. Eitel's third edition of his 'Three Lectures on Buddhism,' pp. 36-45 (Hongkong: Lane, Crawford & Co., 1884). The edition of the Penal Code to which he refers is of 1879.

THE TÂO TEH KING,

OR

THE TÂO

AND ITS CHARACTERISTICS.

THE WRITINGS OF KWANG-3ZE.

INTRODUCTION.

BRIEF NOTICES OF THE DIFFERENT BOOKS.

BOOK I. HSIÄO-YÄO YÛ.

The three characters which form the title of this Book have all of them the ideagram 𢀏 (*Ko*), which gives the idea, as the Shwo Wăn explains it, of 'now walking, now halting.' We might render the title by 'Sauntering or Rambling at Ease;' but it is the untroubled enjoyment of the mind which the author has in view. And this enjoyment is secured by the *Tâo*, though that character does not once occur in the Book. *Kwang-3ze* illustrates his thesis first by the cases of creatures, the largest and the smallest, showing that however different they may be in size, they should not pass judgment on one another, but may equally find their happiness in the *Tâo*. From this he advances to men, and from the cases of *Yung-3ze* and *Lieh-3ze* proceeds to that of one who finds his enjoyment in himself, independent of every other being or instrumentality; and we have the three important definitions of the accomplished *Tâoist*, as 'the Perfect Man,' 'the Spirit-like Man,' and 'the Sagely Man.' Those definitions are then illustrated;—the third in *Yáo* and *Hsü Yû*, and the second in the conversation between *K'ien Wû* and *Lien Shû*. The description given in this conversation of the spirit-like man is very startling, and contains statements that are true only of Him who is a 'Spirit,' 'the Blessed and only Potentate,' 'Who covereth Himself with light as with a garment, Who stretcheth out the heavens as a curtain,

Who layeth the beams of His chambers in the waters, Who maketh the clouds His chariot, Who walketh on the wings of the wind,' 'Who rideth on a cherub,' 'Who inhabiteth eternity.' The most imaginative and metaphorical expressions in the *Táo Teh King* about the power of the possessor of the *Táo* are tame, compared with the language of our author. I call attention to it here, as he often uses the same extravagant style. There follows an illustration of 'the Perfect Man,' which is comparatively feeble, and part of it, so far as I can see, inappropriate, though Lin Hsí-kung says that all other interpretations of the sentences are ridiculous.

In the seventh and last paragraph we have two illustrations that nothing is really useless, if only used *Táo-istically*; 'to the same effect,' says 3iáo Hung, 'as Confucius in the *Analects*, XVII, ii.' They hang loosely, however, from what precedes.

An old view of the Book was that *Kwang-ze* intended himself by the great phăng, 'which,' says Lû Shû-ñih, 'is wide of the mark.'

BOOK II. *KHÎ WŨ LUN*.

Mr. Balfour has translated this title by 'Essay on the Uniformity of All Things;' and, the subject of the Book being thus misconceived, his translation of it could not fail to be very incorrect. The Chinese critics, I may say without exception, construe the title as I have done. The second and third characters, *Wŭ Lun*, are taken together, and mean 'Discussions about Things,' equivalent to our 'Controversies.' They are under the government of the first character *Khî*, used as a verb, with the signification of 'Harmonising,' or 'Adjusting.' Let me illustrate this by condensing a passage from the 'Supplementary Commentary of a Mr. Kang, a sub-secretary of the Imperial Chancery,' of the Ming dynasty (張學士補註). He says, 'What *Kwang-ze* calls "Discussions about Things" has reference to the various branches of the numerous schools, each of which has its own views, conflicting with

the views of the others.' He goes on to show that if they would only adopt the method pointed out by *K'wang-ze*, 'their controversies would be adjusted (物論齊)' now using the first *K'î* in the passive voice.

This then was the theme of our author in this Book. It must be left for the reader to discover from the translation how he pursues it. I pointed out a peculiarity in the former Book, that though the idea of the *Táo* underlies it all, the term itself is never allowed to appear. Not only does the same idea underlie this Book, but the name is frequently employed. The *Táo* is the panacea for the evils of controversy, the solvent through the use of which the different views of men may be made to disappear.

That the *Táo* is not a Personal name in the conception of *K'wang-ze* is seen in several passages. We have not to go beyond the phenomena of nature to discover the reason of their being what they are; nor have we to go beyond the bigoted egoism and vaingloriousness of controversialists to find the explanation of their discussions, various as these are, and confounding like the sounds of the wind among the trees of a forest. To man, neither in nature nor in the sphere of knowledge, is there any other 'Heaven' but what belongs to his own mind. That is his only 'True Ruler.' If there be any other, we do not see His form, nor any traces of His acting. Things come about in their proper course. We cannot advance any proof of Creation. Whether we assume that there was something 'in the beginning' or nothing, we are equally landed in contradiction and absurdity. Let us stop at the limit of what we know, and not try to advance a step beyond it.

Towards the end of the Book our author's agnosticism seems to reach its farthest point. All human experience is spoken of as a dream or as 'illusion.' He who calls another a dreamer does not know that he is not dreaming himself. One and another commentator discover in such utterances something very like the Buddhist doctrine that all life is but so much illusion (象). This notion has its consummation in the story with which the Book concludes.

Kwang-ze had dreamt that he was a butterfly. When he awoke, and was himself again, he did not know whether he, *Kwang Kâu*, had been dreaming that he was a butterfly, or was now a butterfly dreaming that it was *Kwang Kâu*. And yet he adds that there must be a difference between *Kâu* and a butterfly, but he does not say what that difference is. But had he ever dreamt that he was a butterfly, so as to lose the consciousness of his personal identity as *Kwang Kâu*? I do not think so. One may, perhaps, lose that consciousness in the state of insanity; but the language of Young is not sufficiently guarded when he writes of

‘Dreams, where thought, in fancy’s maze, runs mad.’

When dreaming, our thoughts are not conditioned by the categories of time and space; but the conviction of our identity is never lost.

BOOK III. YANG SHANG K’Ü.

‘The Lord of Life’ is the *Tâo*. It is to this that we are indebted for the origin of life and for the preservation of it. Though not a Personal Being, it is here spoken of as if it were,—‘the Lord of Life;’ just as in the preceding Book it is made to appear as ‘a True Governor,’ and ‘a True Ruler.’ But how can we nourish the *Tâo*? The reply is, By avoiding all striving to do so; by a passionless, unstraining performance of what we have to do in our position in life; simply allowing the *Tâo* to guide and nourish us, without doing anything to please ourselves or to counteract the tendency of our being to decay and death.

Par. 1 exhibits the injury arising from not thus nourishing the life, and sets forth the rule we are to pursue.

Par. 2 illustrates the observance of the rule by the perfect skill with which the cook of the ruler *Wăn-hui* of Wei cut up the oxen for his employer without trouble to himself, or injury to his knife.

Par. 3 illustrates the result of a neglect of one of the cautions in par. 1 to a certain master of the Left, who had brought on himself dismemberment in the loss of one of his feet.

Par. 4 shows how even Láo-ze had failed in nourishing 'the Lord of Life' by neglecting the other caution, and allowing in his good-doing an admixture of human feeling, which produced in his disciples a regard for him that was inconsistent with the nature of the Táo, and made them wail for him excessively on his death. This is the most remarkable portion of the Book, and it is followed by a sentence which implies that the existence of man's spirit continues after death has taken place. His body is intended by the 'faggots' that are consumed by the fire. That fire represents the spirit which may be transferred elsewhere.

Some commentators dwell on the analogy between this and the Buddhistic transrotation of births; which latter teaching, however, they do not seem to understand. Others say that 'the nourishment of the Lord of Life' is simply acting as Yü did when he conveyed away the flooded waters 'by doing that which gave him no trouble;'—see Mencius, IV, ii, 26.

In Kwang-ze there are various other stories of the same character as that about king Wán-hui's cook,—e.g. XIX, 3 and XXII, 9. They are instances of the dexterity acquired by habit, and should hardly be pressed into the service of the doctrine of the Táo.

BOOK IV. ZÂN KIEN SHIH.

A man has his place among other men in the world; he is a member, while he lives, of the body of humanity. And as he has his place in society, so also he has his special duties to discharge, according to his position, and his relation to others. Táoist writers refer to this Book as a proof of the practical character of the writings of Kwang-ze.

They are right to a certain extent in doing so; but the cases of relationship which are exhibited and prescribed for are of so peculiar a character, that the Book is of little value as a directory of human conduct and duty. In the first two paragraphs we have the case of Yen Hui, who wishes to go to Wei, and try to reform the character and government of its oppressive ruler; in the third and fourth, that of the duke of Sheh, who has been entrusted by the king of *K'û* with a difficult mission to the court of *K'û*, which is occasioning him much anxiety and apprehension; and in the fifth, that of a Yen Ho, who is about to undertake the office of teacher to the son of duke Ling of Wei, a young man with a very bad natural disposition. The other four paragraphs do not seem to come in naturally after these three cases, being occupied with two immense and wonderful trees, the case of a poor deformed cripple, and the lecture for the benefit of Confucius by 'the madman of *K'û*.' In all these last paragraphs, the theme is the usefulness, to the party himself at least, of being of no use.

Confucius is the principal speaker in the first four paragraphs. In what he says to Yen Hui and the duke of Sheh there is much that is shrewd and good; but we prefer the practical style of his teachings, as related by his own disciples in the Confucian Analects. Possibly, it was the object of *Kwang-ze* to exhibit his teaching, as containing, without his being aware of it, much of the mystical character of the Tâoistic system. His conversation with the duke of Sheh, however, is less obnoxious to this charge than what he is made to say to Yen Hui. The adviser of Yen Ho is a *K'ü Po-yü*, a disciple of Confucius, who still has a place in the sage's temples.

In the conclusion, the Tâoism of our author comes out in contrast with the methods of Confucius. His object in the whole treatise, perhaps, was to show how 'the doing nothing, and yet thereby doing everything,' was the method to be pursued in all the intercourses of society.

BOOK V. TEH KHUNG FŪ.

The fū (符) consisted in the earliest times of two slips of bamboo made with certain marks, so as to fit to each other exactly, and held by the two parties to any agreement or covenant. By the production and comparison of the slips, the parties verified their mutual relation; and the claim of the one and the obligation of the other were sufficiently established. 'Seal' seems the best translation of the character in this title.

By 'virtue' (德) we must understand the characteristics of the Tào. Where those existed in their full proportions in any individual, there was sure to be the evidence or proof of them in the influence which he exerted in all his intercourse with other men; and the illustration of this is the subject of this Book, in all its five paragraphs. That influence is the 'Seal' set on him, proving him to be a true child of the Tào.

The heroes, as I may call them, of the first three paragraphs are all men who had lost their feet, having been reduced to that condition as a punishment, just or unjust, of certain offences; and those of the last two are distinguished by their extraordinary ugliness or disgusting deformity. But neither the loss of their feet nor their deformities trouble the serenity of their own minds, or interfere with the effects of their teaching and character upon others; so superior is their virtue to the deficiencies in their outward appearance.

Various brief descriptions of the Tào are interspersed in the Book. The most remarkable of them are those in par. 1, where it appears as 'that in which there is no element of falsehood,' and as 'the author of all the Changes or Transformations' in the world. The sentences where these occur are thus translated by Mr. Balfour:—'He seeks to know Him in whom is nothing false. He would not be affected by the instability of creation; even if his life were involved in the general destruction, he would yet hold firmly to his faith (in God).' And he observes in a

note, that the first short sentence 'is explained by the commentators as referring to *Kăn 3âi* (眞宰), the term used by the Tâoist school for God.' But we met with that name and synonyms of it in Book II, par. 2, as appellations of the Tâo, coupled with the denial of its personality. *Kăn 3âi*, 'the True Governor or Lord,' may be used as a designation for god or God, but the Tâoist school denies the existence of a Personal Being, to whom we are accustomed to apply that name.

Hui-ze, the sophist and friend of *Kwang-ze*, is introduced in the conclusion as disputing with him the propriety of his representing the Master of the Tâo as being still 'a man;' and is beaten down by him with a repetition of his assertions, and a reference to some of Hui-ze's well-known peculiarities. What would *Kwang-ze* have said, if his opponent had affirmed that his instances were all imaginary, and that no man had ever appeared who could appeal to his possession of such a 'seal' to his virtues and influence as he described?

Lû Fang-wǎng compares with the tenor of this Book what we find in Mencius, VII, i, 21, about the nature of the superior man. The analogy between them, however, is very faint and incomplete.

BOOK VI. TÂ 3UNG SHIH.

So I translate the title of this Book, taking 3ung as a verb, and 3ung Shih as = 'The Master who is Honoured.' Some critics take 3ung in the sense of 'Originator,' in which it is employed in the Tâo Teh King, lxx, 2. Whichever rendering be adopted, there is no doubt that the title is intended to be a designation of the Tâo; and no one of our author's Books is more important for the understanding of his system of thought.

The key to it is found in the first of its fifteen paragraphs. There are in man two elements;—the Heavenly or Tâoistic, and the human. The disciple of the Tâo, recognising them both, cultivates what he knows as a man

so as to become entirely conformed to the action of the Tâo, and submissive in all the most painful experiences in his lot, which is entirely ordered by it. A seal will be set on the wisdom of this course hereafter, when he has completed the period of his existence on earth, and returns to the state of non-existence, from which the Tâo called him to be born as a man. In the meantime he may attain to be the True man possessing the True knowledge.

Our author then proceeds to give his readers in five paragraphs his idea of the True Man. Mr. Balfour says that this name is to be understood 'in the esoteric sense, the partaking of the essence of divinity,' and he translates it by 'the Divine Man.' But we have no right to introduce here the terms 'divine' and 'divinity.' Nan-hwâi (VII, 5 b) gives a short definition of the name which is more to the point:—'What we call "the True Man" is one whose nature is in agreement with the Tâo (所謂真人者性合于道也;)' and the commentator adds in a note, 'Such men as Fû-hsî, Hwang-Ti, and Lâo Tan.' The Khang-hsî dictionary commences its account of the character 眞 or 'True' by a definition of the True Man taken from the Shwo Wăn as a 仙人, 'a recluse of the mountain, whose bodily form has been changed, and who ascends to heaven;' but when that earliest dictionary was made, Tâoism had entered into a new phase, different from what it had in the time of our author. The most prominent characteristic of the True Man is that he is free from all exercise of thought and purpose, a being entirely passive in the hands of the Tâo. In par. 3 seven men are mentioned, good and worthy men, but inferior to the True.

Having said what he had to say of the True Man, Kwang-ze comes in the seventh paragraph to speak directly of the Tâo itself, and describes it with many wonderful predicates which exalt it above our idea of God;—a concept and not a personality. He concludes by mentioning a number of ancient personages who had got the Tâo, and by it wrought wonders, beginning with a Shih-wei, who preceded Fû-hsî, and ending with Fû Yüeh, the minister of

Wù-ting, in the fourteenth century B.C., and who finally became a star in the eastern portion of the zodiac. Phăng 3û is also mentioned as living, through his possession of the Táo, from the twenty-third century B.C. to the seventh or later. The sun and moon and the constellation of the Great Bear are also mentioned as its possessors, and the fabulous Being called the Mother of the Western King. The whole passage is perplexing to the reader to the last degree.

The remaining paragraphs are mostly occupied with instances of learning the Táo, and of its effects in making men superior to the infirmities of age and the most terrible deformities of person and calamities of penury; as 'Tranquillity' under all that might seem most calculated to disturb it. Very strange is the attempt at the conclusion of par. 8 apparently to trace the genesis of the knowledge of the Táo. Confucius is introduced repeatedly as the expounder of Táoism, and made to praise it as the *ne plus ultra* of human attainment.

BOOK VII. YING TÎ WANG.

The first of the three characters in this title renders the translation of it somewhat perplexing. Ying has different meanings according as it is read in the first tone or in the third. In the first tone it is the symbol of what is right, or should be; in the third tone of answering or responding to. I prefer to take it here in the first tone. As Kwo Hsiang says, 'One who is free from mind or purpose of his own, and loves men to become transformed of themselves, is fit to be a Ruler or a King,' and as 3hui K'wan, another early commentator, says, 'He whose teaching is that which is without words, and makes men in the world act as if they were oxen or horses, is fit to be a Ruler or a King.' This then is the object of the Book—to describe that government which exhibits the Táo equally in the rulers and the ruled, the world of men all happy and good without purpose or effort.

It consists of seven paragraphs. The first shows us the model ruler in him of the line of Thái, whom I have not

succeeded in identifying. The second shows us men under such a rule, uncontrolled and safe like the bird that flies high beyond the reach of the archer, and the mouse secure in its deep hole from its pursuers. The teacher in this portion is *K'ieh-yü*, known in the Confucian school as 'the madman of *K'ü*,' and he delivers his lesson in opposition to the heresy of a *Z'äh-kung Shih*, or 'Noon Beginning.' In the third paragraph the speakers are 'a nameless man,' and a *Thien Kän*, or 'Heaven Root.' In the fourth paragraph *Lão-ze* himself appears upon the stage, and lectures a *Yang Ze-kü*, the *Yang K'ü* of Mencius. He concludes by saying that 'where the intelligent kings took their stand could not be fathomed, and they found their enjoyment in (the realm of) nonentity.'

The fifth paragraph is longer, and tells us of the defeat of a wizard, a physiognomist in *K'äng*, by *Hü-ze*, the master of the philosopher *Lieh-ze*, who is thereby delivered from the glamour which the cheat was throwing round him. I confess to not being able to understand the various processes by which *Hü-ze* foils the wizard and makes him run away. The whole story is told, and at greater length, in the second book of the collection ascribed to *Lieh-ze*, and the curious student may like to look at the translation of that work by Mr. Ernst Faber (*Der Naturalismus bei den alten Chinesen sowohl nach der Seite des Pantheismus als des Sensualismus, oder die Sämmtlichen Werke des Philosophen Licius, 1877*). The effect of the wizard's defeat on *Lieh-ze* was great. He returned in great humility to his house, and did not go out of it for three years. He did the cooking for his wife, and fed the pigs as if he were feeding men. He returned to pure simplicity, and therein continued to the end of his life. But I do not see the connexion between this narrative and the government of the Rulers and Kings.

The sixth paragraph is a homily by our author himself on 'non-action.' It contains a good simile, comparing the mind of the perfect man to a mirror, which reflects faithfully what comes before it, but does not retain any image of it, when the mind is gone.

The last paragraph is an ingenious and interesting allegory relating how the gods of the southern and northern seas brought Chaos to an end by boring holes in him. Thereby they destroyed the primal simplicity, and according to Tâoism did Chaos an injury! On the whole I do not think that this Book, with which the more finished essays of *Kwang-ze* come to an end, is so successful as those that precede it.

BOOK VIII. PHIEN MÂU.

This Book brings us to the Second Part of the writings of our author, embracing in all fifteen Books. Of the most important difference between the Books of the First and the other Parts some account has been given in the Introductory Chapter. We have here to do only with the different character of their titles. Those of the seven preceding Books are so many theses, and are believed to have been prefixed to them by *Kwang-ze* himself; those of this Book and the others that follow are believed to have been prefixed by *Kwo Hsiang*, and consist of two or three characters taken from the beginning, or near the beginning of the several Books, after the fashion of the names of the Books in the Confucian Analects, in the works of Mencius, and in our Hebrew Scriptures. Books VIII to XIII are considered to be supplementary to VII by *Aû-yang Hsiû*.

The title of this eighth Book, *Phien Mâu*, has been rendered by Mr. Balfour, after Dr. Williams, 'Double Thumbs.' But the *Mâu*, which may mean either the Thumb or the Great Toe, must be taken in the latter sense, being distinguished in this paragraph and elsewhere from *Kih*, 'a finger,' and expressly specified also as belonging to the foot. The character *phien*, as used here, is defined in the *Khang-hsi* dictionary as 'anything additional growing out as an appendage or excrescence, a growing out at the side.' This would seem to justify the translation of it by 'double.' But in paragraph 3, while the extra finger increases the number of the fingers, this growth on the foot is represented as diminishing the number of the toes. I must consider

the *phien* therefore as descriptive of an appendage by which the great toe was united to one or all of the other toes, and can think of no better rendering of the title than what I have given. It is told in the 30 *Kwan* (twenty-third year of duke Hsî) that the famous duke Wăn of 3in had *phien hsieh*, that is, that his ribs presented the appearance of forming one bone. So much for the title.

The subject-matter of the Book seems strange to us;—that, according to the *Tâo*, benevolence and righteousness are not natural growths of humanity, but excrescences on it, like the extra finger on the hand, and the membranous web of the toes. The weakness of the *Tâoistic* system begins to appear. *Kwang-ze's* arguments in support of his position must be pronounced very feeble. The ancient *Shun* is introduced as the first who called in the two great virtues to distort and vex the world, keeping society for more than a thousand years in a state of uneasy excitement. Of course he assumes that prior to *Shun*, he does not say for how long a time (and in other places he makes decay to have begun earlier), the world had been in a state of paradisiacal innocence and simplicity, under the guidance of the *Tâo*, untroubled by any consideration of what was right and what was wrong, men passively allowing their nature to have its quiet development, and happy in that condition. All culture of art or music is wrong, and so it is wrong and injurious to be striving to manifest benevolence and to maintain righteousness.

He especially singles out two men, one of the twelfth century B.C., the famous *Po-î*, who died of hunger rather than acknowledge the dynasty of *Kâu*; and one of a more recent age, the robber *Shih*, a great leader of brigands, who brought himself by his deeds to an untimely end; and he sees nothing to choose between them. We must give our judgment for the teaching of Confucianism in preference to that of *Tâoism*, if our author can be regarded as a fair expositor of the latter. He is ingenious in his statements and illustrations, but he was, like his master *Lão-ze*, only a dreamer.

BOOK IX. MÂ THÎ.

‘Horses’ and ‘Hoofs’ are the first two characters of the Text, standing there in the relation of regent and regimen. The account of the teaching of the Book given by Lin Hsî-kung is so concise that I will avail myself of it. He says:—

‘Governing men is like governing horses. They may be governed in such a way as shall be injurious to them, just as Po-lão governed the horse;—contrary to its true nature. His method was not different from that of the (first) potter and carpenter in dealing with clay and wood;—contrary to the nature of those substances. Notwithstanding this, one age after another has celebrated the skill of those parties;—not knowing what it is that constitutes the good and skilful government of men. Such government simply requires that men be made to fulfil their regular constant nature,—the qualities which they all possess in common, with which they are constituted by Heaven, and then be left to themselves. It was this which constituted the age of perfect virtue; but when the sages insisted on the practice of benevolence, righteousness, ceremonies, and music, then the people began to be without that perfect virtue. Not that they were in themselves different from what they had been, but those practices do not really belong to their regular nature; they arose from their neglecting the characteristics of the Tâo, and abandoning their natural constitution;—it was the case of the skilful artisan cutting and hacking his raw materials in order to form vessels from them. There is no ground for doubting that Po-lão’s management of horses gave them that knowledge with which they went on to play the part of thieves, or that it was the sages’ government of the people which made them devote themselves to the pursuit of gain;—it is impossible to deny the error of those sages.

‘There is but one idea in the Book from the beginning to the end;—it is an amplification of the expression in the preceding Book that “all men have their regular and con-

stant constitution," and is the most easily construed of all *Kwang-ze's* compositions. In consequence, however, of the wonderful touches of his pencil in describing the sympathy between men and other creatures in their primal state, some have imagined that there is a waste and embellishment of language, and doubted whether the Book is really his own, but thought it was written by some one in imitation of his style. I apprehend that no other hand would easily have attained to such a mastery of that style.'

There is no possibility of adjudicating definitely on the suspicion of the genuineness of the Book thus expressed in *Hsi-kung's* concluding remarks. The same suspicion arose in my own mind in the process of translation. My surprise continues that our author did not perceive the absurdity of his notions of the primal state of men, and of his condemnation of the sages.

BOOK X. *KHÜ KHIEH.*

It is observed by the commentator *Kwei Kăn-khüan* that one idea runs through this Book:—that the most sage and wise men have ministered to theft and robbery, and that, if there were an end of sageness and wisdom, the world would be at rest. Between it and the previous Book there is a general agreement in argument and object, but in this the author expresses himself with greater vehemence, and almost goes to excess in his denunciation of the institutions of the sages.

The reader will agree with these accounts of the Book. *Kwang-ze* at times becomes weak in his attempts to establish his points. To my mind the most interesting portions of this Book and the last one are the full statements which we have in them of the happy state of men when the *Tão* maintained its undisputed sway in the world, and the names of many of the early *Tãoistic* sovereigns. How can we suppose that anything would be gained by a return to the condition of primitive innocence and simplicity? The antagonism between *Tãoism* and *Confucianism* comes out in this Book very decidedly.

The title of the Book is taken from two characters in the first clause of the first paragraph.

BOOK XI. 3ÂI YŪ.

The two characters of the title are taken from the first sentence of the Text, but they express the subject of the Book more fully than the other titles in this Part do, and almost entitle it to a place in Part I. It is not easy to translate them, and Mr. Balfour renders them by 'Leniency towards Faults,' probably construing 3Âi as equivalent to our preposition 'in,' which it often is. But K'wang-ze uses both 3Âi and YŪ as verbs, or blends them together, the chief force of the binomial compound being derived from the significance of the 3Âi. 3Âi is defined by 3hun (存), which gives the idea of 'preserving' or 'keeping intact,' and YŪ by Khwan (寬), 'being indulgent' or 'forbearing.' The two characters are afterwards exchanged for other two, wŭ wei (無爲), 'doing nothing,' 'inaction,' a grand characteristic of the Táo.

The following summary of the Book is taken from Hsüan Ying's explanations of our author:—'The two characters 3Âi YŪ express the subject-matter of the Book, and "governing" points out the opposite error as the disease into which men are prone to fall. Let men be, and the tendencies of their nature will be at rest, and there will be no necessity for governing the world. Try to govern it, and the world will be full of trouble; and men will not be able to rest in the tendencies of their nature. These are the subjects of the first two paragraphs.

'In the third paragraph we have the erroneous view of 3hui K'ü that by government it was possible to make men's minds good. He did not know that governing was a disturbing meddling with the minds of men; and how Láo-ze set forth the evil of such government, going on till it be irretrievable. This long paragraph vigorously attacks the injury done by governing.

'In the fourth paragraph, when Hwang-Ti questions

Kwang *K'ăng-jze*, the latter sets aside his inquiry about the government of the world, and tells him about the government of himself; and in the fifth, when Yün *Kiang* asks Hung Mung about governing men, the latter tells him about the nourishing of the heart. These two great paragraphs set forth clearly the subtlest points in the policy of Let-a-be. Truly it is not an empty name.

'In the two last paragraphs, Kwang in his own words and way sets forth, now by affirmation, and now by negation, the meaning of all that precedes.'

This summary of the Book will assist the reader in understanding it. For other remarks that will be helpful, I must refer him to the notes appended to the Text. The Book is not easy to understand or to translate; and a remark found in the *K'ia-k'ing* edition of 'the Ten Philosophers,' by Lû Hsiû-fû, who died in 1279, was welcome to me, 'If you cannot understand one or two sentences of Kwang-jze, it does not matter.'

BOOK XII. THIEN TĪ.

The first two characters of the Book are adopted as its name;—Thien Tĭ, 'Heaven and Earth.' These are employed, not so much as the two greatest material forms in the universe, but as the Great Powers whose influences extend to all below and upon them. Silently and effectively, with entire spontaneity, their influence goes forth, and a rule and pattern is thus given to those on whom the business of the government of the world devolves. The one character 'Heaven' is employed throughout the Book as the denomination of this purposeless spontaneity which yet is so powerful.

Lû Shû-*zh* says:—'This Book also sets forth clearly how the rulers of the world ought simply to act in accordance with the spontaneity of the virtue of Heaven; abjuring sageness and putting away knowledge; and doing nothing:—in this way the Táo or proper Method of Government will be attained to. As to the coercive methods of Mo Tĭ

and Hui-ze, they only serve to distress those who follow them.'

This object of the Book appears, more or less distinctly, in most of the illustrative paragraphs; though, as has been pointed out in the notes upon it, several of them must be considered to be spurious. Paragraphs 6, 7, and 11 are thus called in question, and, as most readers will feel, with reason. From 13 to the end, the paragraphs are held to be one long paragraph where *Kwang-ze* introduces his own reflections in an unusual style; but the genuineness of the whole, so far as I have observed, has not been called in question.

BOOK XIII. THIEN TÂO.

'Thien Tâo,' the first two characters of the first paragraph, and prefixed to the Book as the name of it, are best translated by 'The Way of Heaven,' meaning the noiseless spontaneity, which characterises all the operations of nature, proceeding silently, yet 'perfecting all things.' As the rulers of the world attain to this same way in their government, and the sages among men attain to it in their teachings, both government and doctrine arrive at a corresponding perfection. 'The joy of Heaven' and 'the joy of Men' are both realised. There ought to be no purpose or will in the universe. 'Vacancy, stillness, placidity, tastelessness, quietude, silence, and non-action; this is the perfection of the Tâo and its characteristics.'

Our author dwells especially on doing-nothing or non-action as the subject-matter of the Book. But as the world is full of doing, he endeavours to make a distinction between the Ruling Powers and those subordinate to and employed by them, to whom doing or action and purpose, though still without the thought of self, are necessary; and by this distinction he seems to me to give up the peculiarity of his system, so that some of the critics, especially *Aû-yang Hsiû*, are obliged to confess that these portions of the Book are unlike the writing of *Kwang-ze*. Still the antagonism of Tâoism to Confucianism is very apparent

throughout. Of the illustrative paragraphs, the seventh, relating the churlish behaviour of Láo-ze to Confucius, and the way in which he subsequently argues with him and snubs him, is very amusing. The eighth paragraph, relating the interview between Láo and Shih-kháng *Khi*, is very strange. The allusions in it to certain incidents and peculiarities in Láo's domestic life make us wish that we had fuller accounts of his history; and the way in which he rates his disciple shows him as a master of the language of abuse.

The concluding paragraph about duke Hwan of *Khi* is interesting, but I can only dimly perceive its bearing on the argument of the Book.

BOOK XIV. THIEN YÜN.

The contrast between the movement of the heavens (天運), and the resting of the earth (地處), requires the translation of the characters of the title by 'The Revolution of Heaven.' But that idea does not enter largely into the subject-matter of the Book. 'The whole,' says Hsüan Ying, 'consists of eight paragraphs, the first three of which show that under the sky there is nothing which is not dominated by the Táo, with which the Tis and the Kings have only to act in accordance; while the last five set forth how the Táo is not to be found in the material forms and changes of things, but in a spirit-like energy working imperceptibly, developing and controlling all phenomena.'

I have endeavoured in the notes on the former three paragraphs to make their meaning less obscure and unconnected than it is on a first perusal. The five illustrative paragraphs are, we may assume, all of them factitious, and can hardly be received as genuine productions of *Kwang-ze*. In the sixth paragraph, or at least a part of it, Lin Hsi-zung acknowledges the hand of the forger, and not less unworthy of credence are in my opinion the rest of it and much of the other four paragraphs. If they may be

taken as from the hand of our author himself, he was too much devoted to his own system to hold the balance of judgment evenly between Láo and Khung.

BOOK XV. KHO Í.

I can think of no better translation for 刻意, the two first characters of the Book, and which appear as its title, than our 'Ingrained Ideas;' notions, that is, held as firmly as if they were cut into the substance of the mind. They do not belong to the whole Book, however, but only to the first member of the first paragraph. That paragraph describes six classes of men, only the last of which are the right followers of the Táo;—the Sages, from the Táoistic point of view, who again are in the last sentence of the last paragraph identified with 'the True Men' described at length in the sixth Book. The fifth member of this first paragraph is interesting as showing how there was a class of Táoists who cultivated the system with a view to obtain longevity by their practices in the management of the breath; yet our author does not accord to them his full approbation, while at the same time the higher Táoism appears in the last paragraph, as promoting longevity without the management of the breath. *K'ü* Po-hsiü, in his commentary on *K'wang-ze*, which was published in 1210, gives Po-í and Shü-k'hi as instances of the first class spoken of here; Confucius and Mencius, of the second; Í Yin and Fú Yüeh, of the third; *K'áo Fú* and Hsü Yü, as instances of the fourth. Of the fifth class he gives no example, but that of Phăng 3ü mentioned in it.

That which distinguishes the genuine sage, the True Man of Táoism, is his pure simplicity in pursuing the Way, as it is seen in the operation of Heaven and Earth, and nourishing his spirit accordingly, till there ensues an ethereal amalgamation between his Way and the orderly operation of Heaven. This subject is pursued to the end of the Book. The most remarkable predicate of the spirit so trained is that in the third paragraph,—that 'Its name is the

same as Tî or God ;' on which none of the critics has been able to throw any satisfactory light. Balfour's version is:—'Its name is called "One with God ;"' Giles's, 'Its name is then "Of God,"' the 'then' being in consequence of his view that the subject is 'man's spiritual existence before he is born into the world of mortals.' My own view of the meaning appears in my version.

Lin Hsi-kung, however, calls the genuineness of the whole Book into question, and thinks it may have proceeded from the same hand as Book XIII. They have certainly one peculiarity in common ;—many references to sayings which cannot be traced, but are introduced by the formula of quotation, 'Therefore, it is said.'

BOOK XVI. SHAN HSING.

'Rectifying or Correcting the Nature' is the meaning of the title, and expresses sufficiently well the subject-matter of the Book. It was written to expose the 'vulgar' learning of the time as contrary to the principles of the true Tâoism, that learning being, according to Lû Shû-kih, 'the teachings of Hui-ze and Kung-sun Lung.' It is to be wished that we had fuller accounts of these. But see in Book XXXIII.

Many of the critics are fond of comparing the Book with the 21st chapter of the 7th Book of Mencius, part I,—where that philosopher sets forth 'Man's own nature as the most important thing to him, and the source of his true enjoyment,' which no one can read without admiration. But we have more sympathy with Mencius's fundamental views about our human nature, than with those of Kwang-ze and his Tâoism. Lin Hsi-kung is rather inclined to doubt the genuineness of the Book. Though he admires its composition, and admits the close and compact sequence of its sentences, there is yet something about it that does not smack of Kwang-ze's style. Rather there seems to me to underlie it the antagonism of Lâo and Kwang to the learning of the Confucian school. The only characteristic

of our author which I miss, is the illustrative stories of which he is generally so profuse. In this the Book agrees with the preceding.

BOOK XVII. *K'HIÛ SHUI.*

K'hiÛ Shui, or 'Autumn Waters,' the first two characters of the first paragraph of this Book, are adopted as its title. Its subject, in that paragraph, however, is not so much the waters of autumn, as the greatness of the T'ao in its spontaneity, when it has obtained complete dominion over man. No illustration of the T'ao is so great a favourite with L'ao-ze as water, but he loved to set it forth in its quiet, onward movement, always seeking the lowest place, and always exercising a beneficent influence. But water is here before *K'wang-ze* in its mightiest volume,—the inundated Ho and the all but boundless magnitude of the ocean ; and as he takes occasion from those phenomena to deliver his lessons, I translate the title by 'The Floods of Autumn.'

To adopt the account of the Book given by L'ü Sh'ü-kih :—'This Book,' he says, 'shows how its spontaneity is the greatest characteristic of the T'ao, and the chief thing inculcated in it is that we must not allow the human element to extinguish in our constitution the Heavenly.'

'First, using the illustrations of the Ho and the Sea, our author gives us to see the Five T'is and the Kings of the Three dynasties as only exhibiting the T'ao in a small degree, while its great development is not to be found in outward form and appliances so that it cannot be described in words, and it is difficult to find its point of commencement, which indeed appears to be impracticable, while still by doing nothing the human may be united with the Heavenly, and men may bring back their True condition. By means of the conversations between the guardian spirit of the Ho and Zo (the god) of the Sea this subject is exhaustively treated.

'Next (in paragraph 8), the *khwei*, the millepede, and other subjects illustrate how the mind is spirit-like in its spontaneity and doing nothing. The case of Confucius (in par. 9) shows the same spontaneity, transforming violence.

Kung-sun Lung (in par. 10), refusing to comply with that spontaneity, and seeking victory by his sophistical reasonings, shows his wisdom to be only like the folly of the frog in the well. The remaining three paragraphs bring before us *Kwang-ze* by the spontaneity of his *Tâo*, now superior to the allurements of rank ; then, like the phoenix flying aloft, as enjoying himself in perfect ease ; and finally, as like the fishes, in the happiness of his self-possession.' Such is a brief outline of this interesting chapter. Many of the critics would expunge the ninth and tenth paragraphs as unworthy of *Kwang-ze*, the former as misrepresenting Confucius, the latter as extolling himself. I think they may both be allowed to stand as from his pencil.

BOOK XVIII. *KIH LO*.

The title of this Book, *Kih Lo*, or 'Perfect Enjoyment,' may also be received as describing the subject-matter of it. But the author does not tell us distinctly what he means by 'Perfect Enjoyment.' It seems to involve two elements,—freedom from trouble and distress, and freedom from the fear of death. What men seek for as their chief good would only be to him burdens. He does not indeed altogether condemn them, but his own quest is the better and more excellent way. His own enjoyment is to be obtained by means of doing nothing ; that is, by the *Tâo* ; of which passionless and purposeless action is a chief characteristic ; and is at the same time the most effective action, as is illustrated in the operation of heaven and earth.

Such is the substance of the first paragraph. The second is interesting as showing how his principle controlled *Kwang-ze* on the death of his wife. Paragraph 3 shows us two professors of *Tâoism* delivered by it from the fear of their own death. Paragraph 4 brings our author before us talking to a skull, and then the skull's appearance to him in a dream and telling him of the happiness of the state after death. Paragraph 5 is occupied with Confucius and his favourite disciple Yen Hui. It stands by itself, unconnected with the rest of the Book, and its

genuineness is denied by some commentators. The last paragraph, found in an enlarged form in the Books ascribed to Lieh-ze, has as little to do as the fifth with the general theme of the Book, and is a strange anticipation in China of the transrotation or transformation system of Buddhism.

Indeed, after reading this Book, we cease to wonder that Táoism and Buddhism should in many practices come so near each other.

BOOK XIX. TÂ SHĀNG.

I have been inclined to translate the title of this Book by 'The Fuller Understanding of Life,' with reference to what is said in the second Book on 'The Nourishment of the Lord of Life.' There the Life before the mind of the writer is that of the Body; here he extends his view also to the Life of the Spirit. The one subject is not kept, however, with sufficient distinctness apart from the other, and the profusion of illustrations, taken, most of them, from the works of Lieh-ze, is perplexing.

To use the words of Lû Shû-kih:—'This Book shows how he who would skilfully nourish his life, must maintain his spirit complete, and become one with Heaven. These two ideas preside in it throughout. In par. 2, the words of the Warden Yin show that the spirit kept complete is beyond the reach of harm. In 3, the illustration of the hunchback shows how the will must be maintained free from all confusion. In 4, that of the ferryman shows that to the completeness of the spirit there is required the disregard of life or death. In 5 and 6, the words of Thien Khâi-kih convey a warning against injuring the life by the indulgence of sensual desires. In 7, the sight of a sprite by duke Hwan unsettles his spirit. In 8, the gamecock is trained so as to preserve the spirit unagitated. In 9, we see the man in the water of the cataract resting calmly in his appointed lot. In 10, we have the maker of the bell-stand completing his work as he did in accordance with the mind of Heaven. All these instances show how the

spirit is nourished. The reckless charioteering of Tung Yê in par. 11, not stopping when the strength of his horses was exhausted, and the false pretext of Sun Hsiû, clear as at noon-day, are instances of a different kind; while in the skilful Shui, hardly needing the application of his mind, and fully enjoying himself in all things, his movements testify of his harmony with Heaven, and his spiritual completeness.'

BOOK XX. SHAN MÛ.

It requires a little effort to perceive that Shan Mû, the title of this Book, does not belong to it as a whole, but only to the first of its nine paragraphs. That speaks of a large tree which our author once saw on a mountain. The other paragraphs have nothing to do with mountain trees, large or small. As the last Book might be considered to be supplementary to 'the Nourishment of Life,' discussed in Book III, so this is taken as having the same relation to Book IV, which treats of 'Man in the World, associated with other men.' It shows by its various narratives, some of which are full of interest, how by a strict observance of the principles and lessons of the Táo a man may preserve his life and be happy, may do the right thing and enjoy himself and obtain the approbation of others in the various circumstances in which he may be placed. The themes both of Books I and IV blend together in it. Paragraph 8 has more the character of an apologue than most of Kwang-ze's stories.

BOOK XXI. THIEN 3ZE-FANG.

Thien 3ze-fang is merely the name of one of the men who appear in the first paragraph. That he was a historical character is learned from the 'Plans of the Warring States,' XIV, art. 6, where we find him at the court of the marquis Wăn of Wei (B. C. 424-387), acting as counsellor to that ruler. Thien was his surname; 3ze-fang his designa-

tion, and Wû-k'ai his name. He has nothing to do with any of the paragraphs but the first.

It is not easy to reduce all the narratives or stories in the Book to one category. The fifth, seventh, and eighth, indeed, are generally rejected as spurious, or unworthy of our author; and the sixth and ninth are trivial, though the ninth bears all the marks of his graphic style. Paragraphs 3 and 4 are both long and important. A common idea in them and in 1, 2, and 10 seems to be that the presence and power of the Tâo cannot be communicated by words, and are independent of outward condition and circumstances.

BOOK XXII. KIH PEI YÜ.

With this Book the Second Part of *Kwang-ze's* Essays or Treatises ends. 'All the Books in it,' says Lû Shû-k'ih, 'show the opposition of Tâoism to the pursuit of knowledge as enjoined in the Confucian and other schools; and this Book may be regarded as the deepest, most vehement, and clearest of them all.' The concluding sentences of the last paragraph and Lâo-ze's advice to Confucius in par. 5, to 'sternly repress his knowledge,' may be referred to as illustrating the correctness of Lû's remark.

Book seventeenth is commonly considered to be the most eloquent of *Kwang-ze's* Treatises, but this twenty-second Book is not inferior to it in eloquence, and it is more characteristic of his method of argument. The way in which he runs riot in the names with which he personifies the attributes of the Tâo, is a remarkable instance of the subtle manner in which he often brings out his ideas; and in no other Book does he set forth more emphatically what his own idea of the Tâo was, though the student often fails to be certain that he has exactly caught the meaning.

The title, let it be observed, belongs only to the first paragraph. The *Kih* in it must be taken in the sense of 'knowledge,' and not of 'wisdom.'

BOOK XXIII. KǎNG-SANG KĤŪ.

It is not at all certain that there ever was such a personage as Kǎng-sang KĤŪ, who gives its name to the Book. In his brief memoir of Kwang-ze, Sze-mâ KĤien spells, as we should say, the first character of the surname differently, and for the Kǎng (庚), employs Khang (亢), adding his own opinion, that there was nothing in reality corresponding to the account given of the characters in this and some other Books. They would be therefore the inventions of Kwang-ze, devised by him to serve his purpose in setting forth the teaching of Láo-ze. It may have been so, but the value of the Book would hardly be thereby affected.

Lû Shû-kih gives the following very brief account of the contents. Borrowing the language of Mencius concerning Yen Hui and two other disciples of Confucius as compared with the sage, he says, 'Kǎng-sang KĤŪ had all the members of Láo-ze, but in small proportions. To outward appearance he was above such as abjure sagehood and put knowledge away, but still he was unable to transform Nan-yung KĤŪ, whom therefore he sent to Láo-ze; and he announced to him the doctrine of the Tâo that everything was done by doing nothing.'

The reader will see that this is a very incomplete summary of the contents of the Book. We find in it the Tâoistic ideal of the 'Perfect Man,' and the discipline both of body and mind through the depths of the system by means of which it is possible for a disciple to become such.

BOOK XXIV. HSÜ WŪ-KWEI.

This Book is named from the first three characters in it, the surname and name of Hsü WŪ-kwei, who plays the most important part in the first two paragraphs, and does not further appear. He comes before us as a well-known recluse of Wei, who visits the court to offer his counsels to the marquis of the state. But whether there ever was such

a man, or whether he was only a creation of *K'wang-ze*, we cannot, so far as I know, tell.

Scattered throughout the Book are the lessons so common with our author against sagehood and knowledge, and on the quality of doing nothing and thereby securing the doing of everything. The concluding chapter is one of the finest descriptions in the whole Work of the Táo and of the Táoistic idea of Heaven. 'There are in the Book,' says Lú Fang, 'many dark and mysterious expressions. It is not to be read hastily; but the more it is studied, the more flavour will there be found in it.'

BOOK XXV. 3EH-YANG.

This Book is named from the first two characters in it,— '3eh-yang,' which again are the designation of a gentleman of Lú, called Phǎng Yang, who comes before us in *K'ú*, seeking for an introduction to the king of that state, with the view, we may suppose, of giving him good counsel. Whether he ever got the introduction which he desired we do not know. The mention of him only serves to bring in three other individuals, all belonging to *K'ú*, and the characters of two of them; but we hear no more of 3eh-yang. The second and third paragraphs are, probably, sequels to the first, but his name does not appear.

The paragraphs from 4 to 9 have more or less interest in themselves; but it is not easy to trace in them any sequence of thought. The tenth and eleventh are more important. The former deals with 'the Talk of the Hamlets and Villages,' the common sentiments of men, which, correct and just in themselves, are not to be accepted as a sufficient expression of the Táo; the latter sets forth how the name Táo itself is only a metaphorical term, used for the purpose of description; as if the Táo were a thing, and not capable, therefore, from its material derivation of giving adequate expression to our highest notion of what it is.

'The Book,' says Lú Shû-kih, 'illustrates how the Great Táo cannot be described by any name; that men ought to

stop where they do not really know, and not try to find it in any phenomenon, or in any event or thing. They must forget both speech and silence, and then they may approximate to the idea of the Great Tâo.'

BOOK XXVI. WÂI WÛ.

The first two characters of the first paragraph are again adopted as the title of the Book,—Wâi Wû, 'External Things;' and the lesson supposed to be taught in it is that expressed in the first sentence, that the influence of external things on character and condition cannot be determined beforehand. It may be good, it may be evil. Mr. Balfour has translated the two characters by 'External Advantages.' Hû Wăn-ying interprets them of 'External Disadvantages.' The things may in fact be either of these. What seems useless may be productive of the greatest services; and what men deem most advantageous may turn out to be most hurtful to them.

What really belongs to man is the Tâo. That is his own, sufficient for his happiness, and cannot be taken from him, if he prize it and cultivate it. But if he neglect it, and yield to external influences unfavourable to it, he may become bad, and suffer all that is most hateful to him and injurious.

Readers must judge for themselves of the way in which the subject is illustrated in the various paragraphs. Some of the stories are pertinent enough; others are wide of the mark. The second, third, and fourth paragraphs are generally held to be spurious, 'poor in composition, and not at all to the point.' If my note on the 'six faculties of perception' in par. 9 be correct, we must admit in it a Buddhistic hand, modifying the conceptions of Kwang-ze after he had passed away.

BOOK XXVII. YÜ YEN.

Yü Yen, 'Metaphorical Words,' stand at the commencement of the Book, and have been adopted as its name.

They might be employed to denote its first paragraph, but are not applicable to the Book as a whole. Nor let the reader expect to find even here any disquisition on the nature of the metaphor as a figure of speech. Translated literally, 'Yü Yen' are 'Lodged Words,' that is, Ideas that receive their meaning or character from their environment, the narrative or description in which they are deposited.

Kwang-ze wished, I suppose, to give some description of the style in which he himself wrote:—now metaphorical, now abounding in quotations, and throughout moulded by his Taoistic views. This last seems to be the meaning of his *Kih Yen*,—literally, 'Cup, or Goblet, Words,' that is, words, common as the water constantly supplied in the cup, but all moulded by the Taoist principle, the element of and from Heaven blended in man's constitution and that should direct and guide his conduct. The best help in the interpretation of the paragraph is derived from a study of the difficult second Book, as suggested in the notes.

Of the five paragraphs that follow the first, the second relates to the change of views, which, it is said, took place in Confucius; the third, to the change of feeling in *Žǎng-ze* in his poverty and prosperity; the fourth, to changes of character produced in his disciple by the teachings of Tung-kwo *Žze-khi*; the fifth, to the changes in the appearance of the shadow produced by the ever-changing substance; and the sixth, to the change of spirit and manner produced in Yang *Kü* by the stern lesson of *Lão-ze*.

Various other lessons, more or less appropriate and important, are interspersed.

Some critics argue that this Book must have originally been one with the thirty-second, which was made into two by the insertion between its Parts of the four spurious intervening Books, but this is uncertain and unlikely.

BOOK XXVIII. ZANG WANG.

Zang Wang, explaining the characters as I have done,

fairly indicates the subject-matter of the Book. Not that we have a king in every illustration, but the personages adduced are always men of worth, who decline the throne, or gift, or distinction of whatever nature, proffered to them, and feel that they have something better to live for.

A persuasion, however, is widely spread, that this Book and the three that follow are all spurious. The first critic of note to challenge their genuineness was Sû Shih (better known as Sû Tung-pho, A.D. 1036-1101); and now, some of the best editors, such as Lin Hsî-kung, do not admit them into their texts, while others who are not bold enough to exclude them altogether, do not think it worth their while to discuss them seriously. Hû Wăn-ying, for instance, says, 'Their style is poor and mean, and they are, without doubt, forgeries. I will not therefore trouble myself with comments of praise or blame upon them. The reader may accept or reject them at his pleasure.'

But something may be said for them. Sze-mâ *K'ien* seems to have been acquainted with them all. In his short biographical notice of *K'wang-ze*, he says, 'He made the Old Fisherman, the Robber *Kih*, and the Cutting Open Satchels, to defame and calumniate the disciples of Confucius.' *K'ien* does not indeed mention our present Book along with XXX and XXXI, but it is less open to objection on the ground he mentions than they are. I think if it had stood alone, it would not have been condemned.

BOOK XXIX. T'AO *K'ih*.

It has been seen above that Sze-mâ *K'ien* expressly ascribes the Book called 'the Robber *Kih*' to *K'wang-ze*. *K'ien* refers also in another place to *Kih*, adducing the facts of his history in contrast with those about Confucius' favourite disciple Yen Hui as inexplicable on the supposition of a just and wise Providence. We must conclude therefore that the Book existed in *K'ien*'s time, and that he had read it. On the other hand it has been shown that Confucius could not have been on terms

of friendship with Liû-hsiâ Kî, and all that is related of his brother the robber wants substantiation. That such a man ever existed appears to me very doubtful. Are we to put down the whole of the first paragraph then as a *jeu d'esprit* on the part of Kwang-ze, intended to throw ridicule on Confucius and what our author considered his pedantic ways? It certainly does so, and we are amused to hear the sage outcrowded by the robber.

In the other two paragraphs we have good instances of Kwang-ze's 'metaphorical expressions,' his coinage of names for his personages, more or less ingeniously indicating their characters; but in such cases the element of time or chronology does not enter; and it is the anachronism of the first paragraph which constitutes its chief difficulty.

The name of 'Robber Kih' may be said to be a coinage; and that a famous robber was popularly indicated by the name appears from its use by Mencius (III, ii, ch. 10, 3), to explain which the commentators have invented the story of a robber so-called in the time of Hwang-Ti, in the twenty-seventh century B.C.! Was there really such a legend? and did Kwang-ze take advantage of it to apply the name to a notorious and disreputable brother of Liû-hsiâ Kî? Still there remain the anachronisms in the paragraph which have been pointed out. On the whole we must come to a conclusion rather unfavourable to the genuineness of the Book. But it must have been forged at a very early time, and we have no idea by whom.

BOOK XXX. YÜEH KIEN.

We need not suppose that anything ever occurred in Kwang-ze's experience such as is described here. The whole narrative is metaphorical; and that he himself is made to play the part in it which he describes, only shows how the style of writing in which he indulged was ingrained into the texture of his mind. We do not know that there ever was a ruler of Kào who indulged in the love of the

sword-fight, and kept about him a crowd of vulgar bravoës such as the story describes. We may be assured that our author never wore the bravo's dress or girt on him the bravo's sword. The whole is a metaphorical representation of the way in which a besotted ruler might be brought to a feeling of his degradation, and recalled to a sense of his duty and the way in which he might fulfil it. The narrative is full of interest and force. I do not feel any great difficulty in accepting it as the genuine composition of *Kwang-ze*. Who but himself could have composed it? Was it a good-humoured caricature of him by an able Confucian writer to repay him for the ridicule he was fond of casting on the sage?

BOOK XXXI. YÜ-FŮ.

'The Old Fisherman' is the fourth of the Books in the collection of the writings of *Kwang-ze* to which, since the time of Sû Shih, the epithet of 'spurious' has been attached by many. My own opinion, however, has been already intimated that the suspicions of the genuineness of those Books have been entertained on insufficient grounds; and so far as 'the Old Fisherman' is concerned, I am glad that it has come down to us, spurious or genuine. There may be a certain coarseness in 'the Robber Kih,' which makes us despise Confucius or laugh at him; but the satire in this Book is delicate, and we do not like the sage the less when he walks up the bank from the stream where he has been lectured by the fisherman. The pictures of him and his disciples in the forest, reading and singing on the Apricot Terrace, and of the old man slowly impelling his skiff to the land and then as quietly impelling it away till it is lost among the reeds, are delicious; there is nothing finer of its kind in the volume. What hand but that of *Kwang-ze*, so light in its touch and yet so strong, both incisive and decisive, could have delineated them?

BOOK XXXII. LIEH YÜ-KHÂU.

Lieh Yü-khâu, the surname and name of Lieh-ze, with which the first paragraph commences, have become current as the name of the Book, though they have nothing to do with any but that one paragraph, which is found also in the second Book of the writings ascribed to Lieh-ze. There are some variations in the two Texts, but they are so slight that we cannot look on them as proofs that the two passages are narratives of independent origin.

Various difficulties surround the questions of the existence of Lieh-ze, and of the work which bears his name. They will be found distinctly and dispassionately stated and discussed in the 146th chapter of the Catalogue of the *K'ien-lung* Imperial Library. The writers seem to me to make it out that there was such a man, but they do not make it clear when he lived, or how his writings assumed their present form. There is a statement of Liú Hsiang that he lived in the time of duke Mû of *K'ang* (B.C. 627-606); but in that case he must have been earlier than Láo-ze himself, whom he very frequently quotes. The writers think that Liú's 'Mû of *K'ang*' should be Mû of Lú (B.C. 409-377), which would make him not much anterior to Mencius and *K'wang-ze*; but this is merely an ingenious conjecture. As to the composition of his chapters, they are evidently not at first hand from Lieh, but by some one of his disciples; whether they were current in *K'wang-ze*'s days, and he made use of various passages from them, or those passages were *K'wang-ze*'s originally, and taken from him by the followers of Lieh-ze and added to what fragments they had of their master's teaching;—these are points which must be left undetermined.

Whether the narrative about Lieh be from *K'wang-ze* or not, its bearing on his character is not readily apprehended; but, as we study it, we seem to understand that his master Wû-šan condemned him as not having fully attained to the *Táo*, but owing his influence with others

mainly to the manifestation of his merely human qualities. And this is the lesson which our author keeps before him, more or less distinctly, in all his paragraphs. As Lû Shû-kih says:—

‘This Book also sets forth Doing Nothing as the essential condition of the Tâo. Lieh-ze, frightened at the respect shown to him by the soup-vendors, and yet by his human doings drawing men to him, disowns the rule of the heavenly; Hwan of K’ang, thinking himself different from other men, does not know that Heaven recompenses men according to their employment of the heavenly in them; the resting of the sages in their proper rest shows how the ancients pursued the heavenly and not the human; the one who learned to slay the Dragon, but afterwards did not exercise his skill, begins with the human, but afterwards goes on to the heavenly; in those who do not rest in the heavenly, and perish by the inward war, we see how the small men do not know the secret of the Great Repose; Zhào Shang, glorying in the carriages which he had acquired, is still farther removed from the heavenly; when Yen Ho shows that the sage, in imparting his instructions, did not follow the example of Heaven in diffusing its benefits, we learn that it is only the Doing Nothing of the True Man which is in agreement with Heaven; the difficulty of knowing the mind of man, and the various methods required to test it, show the readiness with which, when not under the rule of Heaven, it seems to go after what is right, and the greater readiness with which it again revolts from it; in Khao-fû, the Correct, we have one indifferent to the distinctions of rank, and from him we advance to the man who understands the great condition appointed for him, and is a follower of Heaven; then comes he who plays the thief under the chin of the Black Dragon, running the greatest risks on a mere peradventure of success, a resolute opponent of Heaven; and finally we have Kwang-ze despising the ornaments of the sacrificial ox, looking in the same way at the worms beneath and the kites overhead, and regarding himself as quite independent

of them, thus giving us an example of the embodiment of the spiritual, and of harmony with Heaven.'

So does this ingenious commentator endeavour to exhibit the one idea in the Book, and show the unity of its different paragraphs.

BOOK XXXIII. THIEN HSIÂ.

The Thien Hsiâ with which this Book commences is in regimen, and cannot be translated, so as to give an adequate idea of the scope of the Book, or even of the first paragraph to which it belongs. The phrase itself means literally 'under heaven or the sky,' and is used as a denomination of 'the kingdom,' and, even more widely, of 'the world' or 'all men.' 'Historical Phases of Tâoist Teaching' would be nearly descriptive of the subject-matter of the Book; but may be objected to on two grounds:—first, that a chronological method is not observed, and next, that the concluding paragraph can hardly be said to relate to Tâoism at all, but to the sophistical teachers, which abounded in the age of *Kwang-ze*.

Par. 1 sketches with a light hand the nature of Tâoism and the forms which it assumed from the earliest times to the era of Confucius, as imperfectly represented by him and his school.

Par. 2 introduces us to the system of Mo Ti and his school as an erroneous form of Tâoism, and departing, as it continued, farther and farther from the old model.

Par. 3 deals with a modification of Mohism, advocated by scholars who are hardly heard of elsewhere.

Par. 4 treats of a further modification of this modified Mohism, held by scholars 'whose Tâo was not the true Tâo, and whose "right" was really "wrong."'

Par. 5 goes back to the era of *Lão-ze*, and mentions him and Kwan Yin, as the men who gave to the system of Tâo a grand development.

Par. 6 sets forth *Kwang-ze* as following in their steps and going beyond them, the brightest luminary of the system.

Par. 7 leaves Táoism, and brings up Hui Shih and other sophists.

Whether the Book should be received as from *K'wang-ze* himself or from some early editor of his writings is 'a vexed question.' If it did come from his pencil, he certainly had a good opinion of himself. It is hard for a foreign student at this distant time to be called on for an opinion on the one side or the other.

THE WRITINGS OF KWANG-3ZE.

BOOK I.

PART I. SECTION I.

Hsiào-yâo Yû, or 'Enjoyment in Untroubled Ease¹.'

1. In the Northern Ocean there is a fish, the name of which is Khwăn²,—I do not know how many lî in size. It changes into a bird with the name of Phăng, the back of which is (also)—I do not know how many lî in extent. When this bird rouses itself and flies, its wings are like clouds all round the sky. When the sea is moved (so as to bear it along), it prepares to remove to the Southern Ocean. The Southern Ocean is the Pool of Heaven.

¹ See notice on pp. 127, 128, on the Title and Subject-matter of the Book.

² The khwăn and the phăng are both fabulous creatures, far transcending in size the dimensions ascribed by the wildest fancy of the West to the kraken and the roc. Kwang-ze represents them as so huge by way of contrast to the small creatures which he is intending to introduce ;—to show that size has nothing to do with the Tâo, and the perfect enjoyment which the possession of it affords. The passage is a good specimen of the Yü Yen (寓言), metaphorical or parabolical narratives or stories, which are the chief characteristic of our author's writings ; but the reader must keep in mind that the idea or lesson in its 'lodging' is generally of a Tâoistic nature.

There is the (book called) *K'hi Hsieh*¹,—a record of marvels. We have in it these words:—‘When the phăng is removing to the Southern Ocean it flaps (its wings) on the water for 3000 li. Then it ascends on a whirlwind 90,000 li, and it rests only at the end of six months.’ (But similar to this is the movement of the breezes which we call) the horses of the fields, of the dust (which quivers in the sunbeams), and of living things as they are blown against one another by the air². Is its azure the proper colour of the sky? Or is it occasioned by its distance and illimitable extent? If one were looking down (from above), the very same appearance would just meet his view.

2. And moreover, (to speak of) the accumulation of water;—if it be not great, it will not have strength to support a large boat. Upset a cup of water in a cavity, and a straw will float on it as if it were a boat. Place a cup in it, and it will stick fast;—the water is shallow and the boat is large. (So it is with) the accumulation of wind; if it be not great, it will not have strength to support great wings. Therefore (the phăng ascended to) the height of 90,000 li, and there was such a mass of wind beneath it; thenceforth the accumulation of wind was sufficient. As it seemed to bear the blue sky on its back, and there was nothing to obstruct or arrest its course, it could pursue its way to the South.

¹ There may have been a book with this title, to which *Kwang-3ze* appeals, as if feeling that what he had said needed to be substantiated.

² This seems to be interjected as an afterthought, suggesting to the reader that the phăng, soaring along at such a height, was only an exaggerated form of the common phenomena with which he was familiar.

A cicada and a little dove laughed at it, saying, 'We make an effort and fly towards an elm or sapanwood tree; and sometimes before we reach it, we can do no more but drop to the ground. Of what use is it for this (creature) to rise 90,000 lî, and make for the South?' He who goes to the grassy suburbs¹, returning to the third meal (of the day), will have his belly as full as when he set out; he who goes to a distance of 100 lî will have to pound his grain where he stops for the night; he who goes a thousand lî, will have to carry with him provisions for three months. What should these two small creatures know about the matter? The knowledge of that which is small does not reach to that which is great; (the experience of) a few years does not reach to that of many. How do we know that it is so? The mushroom of a morning does not know (what takes place between) the beginning and end of a month; the short-lived cicada does not know (what takes place between) the spring and autumn. These are instances of a short term of life. In the south of *K'û*² there is the (tree) called Ming-ling³, whose spring is 500 years, and its autumn the same; in high antiquity there was that called *Tâ-k'ûn*⁴,

¹ In Chinese, Mang 3hang; but this is not the name of any particular place. The phrase denotes the grassy suburbs (from their green colour), not far from any city or town.

² The great state of the South, having its capital Ying in the present Hû-pei, and afterwards the chief competitor with *K'ûn* for the sovereignty of the kingdom.

³ Taken by some as the name of a tortoise.

⁴ This and the Ming-ling tree, as well as the mushroom mentioned above, together with the *khwăn* and *phăng*, are all mentioned in the fifth Book of the writings of Lieh-3ze, referred to in the next paragraph.

whose spring was 8000 years, and its autumn the same. And Phăng 3û¹ is the one man renowned to the present day for his length of life :—if all men were (to wish) to match him, would they not be miserable ?

3. In the questions put by Thang² to Kî we have similar statements :—‘ In the bare and barren north there is the dark and vast ocean,—the Pool of Heaven. In it there is a fish, several thousand li in breadth, while no one knows its length. Its name is the khwăn. There is (also) a bird named the phăng; its back is like the Thái mountain, while its wings are like clouds all round the sky. On a whirlwind it mounts upwards as on the whorls of a goat’s horn for 90,000 li, till, far removed from the cloudy vapours, it bears on its back the blue sky, and then it shapes its course for the South, and proceeds to the ocean there.’ A quail by the side of a marsh laughed at it, and said, ‘ Where is it going to ? I spring up with a bound, and come down again when I have reached but a few fathoms, and then fly about among the brushwood and bushes; and

¹ Or ‘ the patriarch Phăng.’ Confucius compared himself to him (*Analects*, VII, 1);—‘ our old Phăng;’ and Kû Hsî thinks he was a worthy officer of the Shang dynasty. Whoever he was, the legends about him are a mass of Táoistic fables. At the end of the Shang dynasty (B.C. 1123) he was more than 767 years old, and still in unabated vigour. We read of his losing 49 wives and 54 sons; and that he still left two sons, Wû and Î, who died in Fû-kien, and gave their names to the Wû-î, or Bû-î hills, from which we get our Bohea tea! See Mayers’ ‘ *Chinese Reader’s Manual*,’ p. 175.

² The founder of the Shang dynasty (B.C. 1766–1754). In Lieh-ze his interlocutor is called Hsiâ Ko, and 3ze-kî.

this is the perfection of flying. Where is that creature going to?' This shows the difference between the small and the great.

Thus it is that men, whose wisdom is sufficient for the duties of some one office, or whose conduct will secure harmony in some one district, or whose virtue is befitting a ruler so that they could efficiently govern some one state, are sure to look on themselves in this manner (like the quail), and yet Yung-ze¹ of Sung¹ would have smiled and laughed at them. (This Yung-ze), though the whole world should have praised him, would not for that have stimulated himself to greater endeavour, and though the whole world should have condemned him, would not have exercised any more repression of his course; so fixed was he in the difference between the internal (judgment of himself) and the external (judgment of others), so distinctly had he marked out the bounding limit of glory and disgrace. Here, however, he stopped. His place in the world indeed had become indifferent to him, but still he had not planted himself firmly (in the right position).

There was Lieh-ze², who rode on the wind and pursued his way, with an admirable indifference (to

¹ We can hardly tell who this Yung-ze was. Sung was a duchy, comprehending portions of the present provinces of Honan, An-hui, and Kiang-sû.

² See note on the title of Book XXXII. Whether there ever was a personage called Lieh-ze or Lieh Yü-khâu, and what is the real character of the writings that go under his name, are questions that cannot be more than thus alluded to in a note. He is often introduced by Kwang-ze, and many narratives are common to their books. Here he comes before us, not as a thinker and writer, but as a semi-supernatural being, who has only not yet attained to the highest consummations of the Tâo.

all external things), returning, however, after fifteen days, (to his place). In regard to the things that (are supposed to) contribute to happiness, he was free from all endeavours to obtain them; but though he had not to walk, there was still something for which he had to wait. But suppose one who mounts on (the ether of) heaven and earth in its normal operation, and drives along the six elemental energies of the changing (seasons), thus enjoying himself in the illimitable,—what has he to wait for¹? Therefore it is said, ‘The Perfect man has no (thought of) self; the Spirit-like man, none of merit; the Sagely-minded man, none of fame¹.’

4. Yâo², proposing to resign the throne to Hsü Yü³, said, ‘When the sun and moon have come forth, if the torches have not been put out, would it not be difficult for them to give light? When the seasonal rains are coming down, if we still keep watering the ground, will not our toil be labour lost for all the good it will do? Do you, Master, stand forth (as sovereign), and the kingdom will (at once) be well governed. If I still (continue to) preside over it, I must look on myself as vainly occupying the place;—I beg to resign the throne to you.’ Hsü

¹ The description of a master of the Tâo, exalted by it, unless the predicates about him be nothing but the ravings of a wild extravagance, above mere mortal man. In the conclusion, however, he is presented under three different phrases, which the reader will do well to keep in mind.

² The great sovereign with whom the documents of the Shü K'ing commence:—B. C. 2357–2257.

³ A counsellor of Yâo, who is once mentioned by Sze-mâ K'ien in his account of Po-î,—in the first Book of his Biographies (列傳). Hsü Yü is here the instance of ‘the Sagely man,’ with whom the desire of a name or fame has no influence.

Yü said, 'You, Sir, govern the kingdom, and the kingdom is well governed. If I in these circumstances take your place, shall I not be doing so for the sake of the name? But the name is but the guest of the reality;—shall I be playing the part of the guest? The tailor-bird makes its nest in the deep forest, but only uses a single branch; the mole¹ drinks from the Ho, but only takes what fills its belly. Return and rest in being ruler,—I will have nothing to do with the throne. Though the cook were not attending to his kitchen, the representative of the dead and the officer of prayer would not leave their cups and stands to take his place.'

5. *K'ien Wû*² asked *Lien Shû*³, saying, 'I heard *K'ieh-yü*³ talking words which were great, but had nothing corresponding to them (in reality);—once gone, they could not be brought back. I was frightened by them;—they were like the Milky Way⁴ which cannot be traced to its beginning or end. They had no connexion with one another, and were not akin to the experiences of men.' 'What were his words?' asked *Lien Shû*, and the other replied, (He said) that 'Far away on the hill of *Kû-shih*⁵ there dwelt a Spirit-like man whose flesh and skin

¹ Some say the tapir.

² Known to us only through *K'wang-ze*.

³ 'The madman of *K'û*' of the *Analects*, XVIII, 5, who eschews intercourse with Confucius. See *Hwang-fû Mi*'s account of him, under the surname and name of *Lû Thung*, in his *Notices of Eminent Tâoists*, I, 25.

⁴ Literally, 'the Ho and the Han;,' but the name of those rivers combined was used to denote 'the Milky Way.'

⁵ See the *Khang-hsi* Thesaurus under the character 射. All which is said about the hill is that it was 'in the North Sea.'

were (smooth) as ice and (white) as snow; that his manner was elegant and delicate as that of a virgin; that he did not eat any of the five grains, but inhaled the wind and drank the dew; that he mounted on the clouds, drove along the flying dragons, rambling and enjoying himself beyond the four seas; that by the concentration of his spirit-like powers he could save men from disease and pestilence, and secure every year a plentiful harvest.' These words appeared to me wild and incoherent and I did not believe them. 'So it is,' said Lien Shû. 'The blind have no perception of the beauty of elegant figures, nor the deaf of the sound of bells and drums. But is it only the bodily senses of which deafness and blindness can be predicated? There is also a similar defect in the intelligence; and of this your words supply an illustration in yourself. That man, with those attributes, though all things were one mass of confusion, and he heard in that condition the whole world crying out to him to be rectified, would not have to address himself laboriously to the task, as if it were his business to rectify the world. Nothing could hurt that man; the greatest floods, reaching to the sky, could not drown him, nor would he feel the fervour of the greatest heats melting metals and stones till they flowed, and scorching all the ground and hills. From the dust and chaff of himself, he could still mould and fashion Yâos and Shuns¹;—how should he be willing to occupy himself with things²?'

¹ Shun was the successor of Yâo in the ancient kingdom.

² All this description is to give us an idea of the 'Spirit-like man.' We have in it the results of the Tâo in its fullest embodiment.

6. A man of Sung, who dealt in the ceremonial caps (of Yin)¹, went with them to Yüeh², the people of which cut off their hair and tattooed their bodies, so that they had no use for them. Yáo ruled the people of the kingdom, and maintained a perfect government within the four seas. Having gone to see the four (Perfect) Ones³ on the distant hill of Kû-shih, when (he returned to his capital) on the south of the Făn water⁴, his throne appeared no more to his deep-sunk oblivious eyes⁵.

7. Hui-ze⁶ told K'wang-ze, saying, 'The king of Wei⁷ sent me some seeds of a large calabash, which I sowed. The fruit, when fully grown, could contain five piculs (of anything). I used it to contain water,

¹ See the Lî K'î, IX, iii, 3.

² A state, part of the present province of K'ieh-kiang.

³ Said to have been Hsü Yü mentioned above, with Nieh K'üeh, Wang Í, and Phí-î, who will by and by come before us.

⁴ A river in Shan-hsí, on which was the capital of Yáo ;—a tributary of the Ho.

⁵ This paragraph is intended to give us an idea of 'the Perfect man,' who has no thought of himself. The description, however, is brief and tame, compared with the accounts of Hsü Yü and of 'the Spirit-like man.'

⁶ Or Hui Shih, the chief minister of 'king Hui of Liang (or Wei), (B. C. 370-333),' with an interview between whom and Mencius the works of that philosopher commence. He was a friend of K'wang-ze, and an eccentric thinker; and in Book XXXIII there is a long account of several of his views. I do not think that the conversations about 'the great calabash' and 'the great tree' really took place; K'wang-ze probably invented them, to illustrate his point that size had nothing to do with the Táo, and that things which seemed useless were not really so when rightly used.

⁷ Called also Liang from the name of its capital. Wei was one of the three states (subsequently kingdoms), into which the great fief of Yin was divided about B. C. 400.

but it was so heavy that I could not lift it by myself. I cut it in two to make the parts into drinking vessels; but the dried shells were too wide and unstable and would not hold (the liquor); nothing but large useless things! Because of their uselessness I knocked them to pieces.' Kwang-ze replied, 'You were indeed stupid, my master, in the use of what was large. There was a man of Sung who was skilful at making a salve which kept the hands from getting chapped; and (his family) for generations had made the bleaching of cocoon-silk their business. A stranger heard of it, and proposed to buy the art of the preparation for a hundred ounces of silver. The kindred all came together, and considered the proposal. "We have," said they, "been bleaching cocoon-silk for generations, and have only gained a little money. Now in one morning we can sell to this man our art for a hundred ounces;—let him have it." The stranger accordingly got it and went away with it to give counsel to the king of Wû¹, who was then engaged in hostilities with Yüeh. The king gave him the command of his fleet, and in the winter he had an engagement with that of Yüeh, on which he inflicted a great defeat², and was invested with a portion of territory taken from Yüeh. The keeping the hands from getting chapped was the same in both cases; but in the one case it led to the investiture (of the possessor of the salve), and

¹ A great and ancient state on the sea-board, north of Yüeh. The name remains in the district of Wû-kiang in the prefecture of Sû-kâu.

² The salve gave the troops of Wû a great advantage in a war on the Kiang, especially in winter.

in the other it had only enabled its owners to continue their bleaching. The difference of result was owing to the different use made of the art. Now you, Sir, had calabashes large enough to hold five piculs;—why did you not think of making large bottle-gourds of them, by means of which you could have floated over rivers and lakes, instead of giving yourself the sorrow of finding that they were useless for holding anything. Your mind, my master, would seem to have been closed against all intelligence !

Hui-ze said to Kwang-ze, 'I have a large tree, which men call the *Ailantus*¹. Its trunk swells out to a large size, but is not fit for a carpenter to apply his line to it; its smaller branches are knotted and crooked, so that the disk and square cannot be used on them. Though planted on the wayside, a builder would not turn his head to look at it. Now your words, Sir, are great, but of no use;—all unite in putting them away from them.' Kwang-ze replied, 'Have you never seen a wild cat or a weasel? There it lies, crouching and low, till the wanderer approaches; east and west it leaps about, avoiding neither what is high nor what is low, till it is caught in a trap, or dies in a net. Again there is the Yak², so large that it is like a cloud hanging in the sky. It is large indeed, but it cannot catch mice. You, Sir, have a large tree and are troubled because it is of no use;—why do you not plant it in a tract where there is nothing else, or in a wide and barren wild?

¹ The *Ailantus glandulosa*, common in the north of China, called 'the fetid tree,' from the odour of its leaves.

² The *bos grunniens* of Thibet, the long tail of which is in great demand for making standards and chowries.

There you might saunter idly by its side, or in the enjoyment of untroubled ease sleep beneath it. Neither bill nor axe would shorten its existence; there would be nothing to injure it. What is there in its uselessness to cause you distress ?'

BOOK II.

PART I. SECTION II.

Khî Wû Lun, or 'The Adjustment of Controversies¹.'

1. Nan-kwo *3ze-khî*² was seated, leaning forward on his stool. He was looking up to heaven and breathed gently, seeming to be in a trance, and to have lost all consciousness of any companion. (His disciple), Yen *Khǎng 3ze-yû*³, who was in attendance and standing before him, said, 'What is this? Can the body be made to become thus like a withered tree, and the mind to become like slaked lime? His appearance as he leans forward on the stool to-day is such as I never saw him have before in the same position.' *3ze-khî* said, 'Yen, you do well to ask such a question, I had just now lost myself⁴; but how should you understand it? You

¹ See pp. 128-130.

² Nan-kwo, 'the southern suburb,' had probably been the quarter where *3ze-khî* had resided, and is used as his surname. He is introduced several times by *Kwang-3ze* in his writings:—Books IV, 7; XXVII, 4, and perhaps elsewhere.

³ We have the surname of this disciple, Yen (顏); his name, Yen (偃); his honorary or posthumous epithet (*Khǎng*); and his ordinary appellation, *3ze-yû*. The use of the epithet shows that he and his master had lived before our author.

⁴ 'He had lost himself;' that is, he had become unconscious of all around him, and even of himself, as if he were about to enter

may have heard the notes¹ of Man, but have not heard those of Earth; you may have heard the notes of Earth, but have not heard those of Heaven.'

3ze-yû said, 'I venture to ask from you a description of all these.' The reply was, 'When the breath of the Great Mass (of nature) comes strongly, it is called Wind. Sometimes it does not come so; but when it does, then from a myriad apertures there issues its excited noise;—have you not heard it in a prolonged gale? Take the projecting bluff of a mountain forest;—in the great trees, a hundred spans round, the apertures and cavities are like the nostrils, or the mouth, or the ears; now square, now round like a cup or a mortar; here like a wet footprint, and there like a large puddle. (The sounds issuing from them are like) those of fretted water, of the arrowy whizz, of the stern command, of the inhaling of the breath, of the shout, of the gruff note, of the deep wail, of the sad and piping note. The first notes are slight, and those that follow deeper, but in harmony with them. Gentle winds produce a small response; violent winds a great one. When the fierce gusts have passed away, all the apertures

into the state of 'an Immortal,' a mild form of the Buddhistic samâdhi. But his attitude and appearance were intended by Kwang-3ze to indicate what should be the mental condition in reference to the inquiry pursued in the Book;—a condition, it appears to me, of agnosticism. See the account of Lâo-3ze in a similar trance in Book XXI, par. 4.

¹ The Chinese term here (lâi) denotes a reed or pipe, with three holes, by a combination of which there was formed the rudimentary or reed organ. Our author uses it for the sounds or notes heard in nature, various as the various opinions of men in their discussions about things.

are empty (and still);—have you not seen this in the bending and quivering of the branches and leaves ?’

3ze-yû said, ‘The notes of Earth then are simply those which come from its myriad apertures; and the notes of Man may just be compared to those which (are brought from the tubes of) bamboo;—allow me to ask about the notes of Heaven¹.’ 3ze-khi replied, ‘When (the wind) blows, (the sounds from) the myriad apertures are different, and (its cessation) makes them stop of themselves. Both of these things arise from (the wind and the apertures) themselves:—should there be any other agency that excites them ?’

2. Great knowledge is wide and comprehensive; small knowledge is partial and restricted. Great speech is exact and complete; small speech is (merely) so much talk². When we sleep, the soul communicates with (what is external to us); when we awake, the body is set free. Our intercourse with others then leads to various activity, and daily there is the striving of mind with mind. There are hesitations; deep difficulties; reservations; small apprehensions causing restless distress, and great

¹ The sounds of Earth have been described fully and graphically. Of the sounds of Man very little is said, but they form the subject of the next paragraph. Nothing is said in answer to the disciple’s inquiry about the notes of Heaven. It is intimated, however, that there is no necessity to introduce any foreign Influence or Power like Heaven in connexion with the notes of Earth. The term Heaven, indeed, is about to pass with our author into a mere synonym of Tâo, the natural ‘course’ of the phenomena of men and things.

² Words are the ‘sounds’ of Man; and knowledge is the ‘wind’ by which they are excited.

apprehensions producing endless fears. Where their utterances are like arrows from a bow, we have those who feel it their charge to pronounce what is right and what is wrong ; where they are given out like the conditions of a covenant, we have those who maintain their views, determined to overcome. (The weakness of their arguments), like the decay (of things) in autumn and winter, shows the failing (of the minds of some) from day to day ; or it is like their water which, once voided, cannot be gathered up again. Then their ideas seem as if fast bound with cords, showing that the mind is become like an old and dry moat, and that it is nigh to death, and cannot be restored to vigour and brightness.

Joy and anger, sadness and pleasure, anticipation and regret, fickleness and fixedness, vehemence and indolence, eagerness and tardiness ;—(all these moods), like music from an empty tube, or mushrooms from the warm moisture, day and night succeed to one another and come before us, and we do not know whence they sprout. Let us stop ! Let us stop ! Can we expect to find out suddenly how they are produced ?

If there were not (the views of) another, I should not have mine ; if there were not I (with my views), his would be uncalled for :—this is nearly a true statement of the case, but we do not know what it is that makes it be so. It might seem as if there would be a true Governor¹ concerned in it, but we do not find

¹ 'A true Governor' would be a good enough translation for 'the true God.' But Kwang-3ze did not admit any supernatural Power or Being as working in man. His true Governor was the Táo ; and this will be increasingly evident as we proceed with the study of his Books.

any trace (of his presence and acting). That such an One could act so I believe; but we do not see His form. He has affections, but He has no form.

Given the body, with its hundred parts, its nine openings, and its six viscera, all complete in their places, which do I love the most? Do you love them all equally? or do you love some more than others? Is it not the case that they all perform the part of your servants and waiting women? All of them being such, are they not incompetent to rule one another? or do they take it in turns to be now ruler and now servants? There must be a true Ruler (among them)¹ whether by searching you can find out His character or not, there is neither advantage nor hurt, so far as the truth of His operation is concerned. When once we have received the bodily form complete, its parts do not fail to perform their functions till the end comes. In conflict with things or in harmony with them, they pursue their course to the end, with the speed of a galloping horse which cannot be stopped;—is it not sad? To be constantly toiling all one's lifetime, without seeing the fruit of one's labour, and to be weary and worn out with his labour, without knowing where he is going to:—is it not a deplorable case? Men may say, 'But it is not death;' yet of what advantage is this? When the body is decomposed, the mind will be the same along with it:—must not the case be pronounced very deplorable²? Is the life

¹ The name 'Ruler' is different from 'Governor' above; but they both indicate the same concept in the author's mind.

² The proper reply to this would be that the mind is not dissolved with the body; and K'wang-ze's real opinion, as we shall find, was that life and death were but phases in the phenomenal

of man indeed enveloped in such darkness? Is it I alone to whom it appears so? And does it not appear to be so to other men?

3. If we were to follow the judgments of the pre-determined mind, who would be left alone and without a teacher¹? Not only would it be so with those who know the sequences (of knowledge and feeling) and make their own selection among them, but it would be so as well with the stupid and unthinking. For one who has not this determined mind, to have his affirmations and negations is like the case described in the saying, 'He went to Yüeh to-day, and arrived at it yesterday².' It would be making what was not a fact to be a fact. But even the spirit-like Yü³ could not have known how to do this, and how should one like me be able to do it?

But speech is not like the blowing (of the wind); the speaker has (a meaning in) his words. If, however, what he says, be indeterminate (as from a mind not made up), does he then really speak or not? He thinks that his words are different from the chirpings of fledgelings; but is there any distinction between them or not? But how can the Táo be so obscured, that there should be 'a True' and 'a False' in it? How can speech be so obscured that there should be 'the Right' and 'the Wrong' about them? Where shall the Táo go to that it will not

development. But the course of his argument suggests to us the question here, 'Is life worth living?'

¹ This 'teacher' is 'the Táo.'

² Expressing the absurdity of the case. This is one of the sayings of Hui-ze;—see Book XXXIII, par. 7.

³ The successor and counsellor of Shun, who coped with and remedied the flood of Yáo.

be found? Where shall speech be found that it will be inappropriate? Táo becomes obscured through the small comprehension (of the mind), and speech comes to be obscure through the vain-gloriousness (of the speaker). So it is that we have the contentions between the Literati¹ and the Mohists², the one side affirming what the other denies, and vice versâ. If we would decide on their several affirmations and denials, no plan is like bringing the (proper) light (of the mind)³ to bear on them.

All subjects may be looked at from (two points of view),—from that and from this. If I look at a thing from another's point of view, I do not see it; only as I know it myself, do I know it. Hence it is said, 'That view comes from this; and this view is a consequence of that: '—which is the theory that that view and this—(the opposite views)—produce each the other⁴. Although it be so, there is affirmed now life and now death; now death and now life; now the admissibility of a thing and now its inadmissibility; now its inadmissibility and now its admissibility. (The disputants) now affirm and now deny; now deny and now affirm. Therefore the sagely man does not pursue this method, but views things in the light of (his) Heaven⁵ (-ly nature), and hence forms his judgment of what is right.

¹ The followers of Confucius.

² The disciples of Mih-ze, or Mih Tî, the heresiarch, whom Mencius attacked so fiercely;—see Mencius, V, 1, 5, et al. His era must be assigned between Confucius and Mencius.

³ That is, the perfect mind, the principle of the Táo.

⁴ As taught by Hui-ze;—see XXXIII, 7; but it is doubtful if the quotation from Hui's teaching be complete.

⁵ Equivalent to the Táo. See on the use in Láo-ze and Kwang-ze of the term 'Heaven,' in the Introduction, pp. 16-18.

This view is the same as that, and that view is the same as this. But that view involves both a right and a wrong; and this view involves also a right and a wrong:—are there indeed, or are there not the two views, that and this? They have not found their point of correspondency which is called the pivot of the Tâo. As soon as one finds this pivot, he stands in the centre of the ring (of thought), where he can respond without end to the changing views;—without end to those affirming, and without end to those denying. Therefore I said, ‘There is nothing like the proper light (of the mind).’

4. By means of a finger (of my own) to illustrate that the finger (of another) is not a finger is not so good a plan as to illustrate that it is not so by means of what is (acknowledged to be) not a finger; and by means of (what I call) a horse to illustrate that (what another calls) a horse is not so, is not so good a plan as to illustrate that it is not a horse, by means of what is (acknowledged to be) not a horse¹. (All things in) heaven and earth may be (dealt with as) a finger; (each of) their myriads may be (dealt with as) a horse. Does a thing seem so to me? (I say that) it is so. Does it seem not so to me? (I say that) it is not so. A path is formed by (constant)

¹ The language of our author here is understood to have reference to the views of Kung-sun Lung, a contemporary of Hui-ze, and a sophist like him. One of his treatises or arguments had the title of ‘The White Horse,’ and another that of ‘Pointing to Things.’ If these had been preserved, we might have seen more clearly the appropriateness of the text here. But the illustration of the monkeys and their actions shows us the scope of the whole paragraph to be that controversialists, whose views are substantially the same, may yet differ, and that with heat, in words.

treading on the ground. A thing is called by its name through the (constant) application of the name to it. How is it so? It is so because it is so. How is it not so? It is not so, because it is not so. Everything has its inherent character and its proper capability. There is nothing which has not these. Therefore, this being so, if we take a stalk of grain¹ and a (large) pillar, a loathsome (leper) and (a beauty like) Hsî Shih², things large and things insecure, things crafty and things strange;—they may in the light of the Táo all be reduced to the same category (of opinion about them).

It was separation that led to completion; from completion ensued dissolution. But all things, without regard to their completion and dissolution, may again be comprehended in their unity;—it is only the far reaching in thought who know how to comprehend them in this unity. This being so, let us give up our devotion to our own views, and occupy ourselves with the ordinary views. These ordinary views are grounded on the use of things. (The study of that) use leads to the comprehensive judgment, and that judgment secures the success (of the inquiry). That success gained, we are near (to the object of our search), and there we stop. When we stop, and yet we do not know how it is so, we have what is called the Táo.

When we toil our spirits and intelligence, obstin-

¹ The character in the text means both 'a stalk of grain' and 'a horizontal beam.' Each meaning has its advocates here.

² A famous beauty, a courtesan presented by the king of Yüeh to his enemy, the king of Wû, and who hastened on his progress to ruin and death, she herself perishing at the same time.

ately determined (to establish our own view), and do not know the agreement (which underlies it and the views of others), we have what is called 'In the morning three.' What is meant by that 'In the morning three?' A keeper of monkeys, in giving them out their acorns, (once) said, 'In the morning I will give you three (measures) and in the evening four.' This made them all angry, and he said, 'Very well. In the morning I will give you four and in the evening three.' His two proposals were substantially the same, but the result of the one was to make the creatures angry, and of the other to make them pleased:—an illustration of the point I am insisting on. Therefore the sagely man brings together a dispute in its affirmations and denials, and rests in the equal fashioning of Heaven¹. Both sides of the question are admissible.

5. Among the men of old their knowledge reached the extreme point. What was that extreme point? Some held that at first there was not anything. This is the extreme point, the utmost point to which nothing can be added². A second class held that there was something, but without any responsive recognition³ of it (on the part of men).

A third class held that there was such recognition, but there had not begun to be any expression of different opinions about it.

¹ Literally, 'the Heaven-Mould or Moulder,'—another name for the T'ao, by which all things are fashioned.

² See the same passage in Book XXIII, par. 10:

³ The ordinary reading here is fäng (封), 'a boundary' or 'distinctive limit.' Lin Hsî-kung adopts the reading 對, 'a response,' and I have followed him.

It was through the definite expression of different opinions about it that there ensued injury to (the doctrine of) the Táo. It was this injury to the (doctrine of the) Táo which led to the formation of (partial) preferences. Was it indeed after such preferences were formed that the injury came? or did the injury precede the rise of such preferences? If the injury arose after their formation, *K'áo's* method of playing on the lute was natural. If the injury arose before their formation, there would have been no such playing on the lute as *K'áo's*¹.

K'áo Wăn's playing on the lute, *Shih Kwang's* indicating time with his staff, and *Hui-ze's* (giving his views), while leaning against a dryandra tree (were all extraordinary). The knowledge of the three men (in their several arts) was nearly perfect, and therefore they practised them to the end of their lives. They loved them because they were different from those of others. They loved them and wished to make them known to others. But as they could not be made clear, though they tried to make them so, they ended with the obscure (discussions) about 'the hard' and 'the white.' And their sons², moreover, with all the threads of their fathers' compositions, yet to the end of their lives accomplished nothing. If they, proceeding in this way, could be said to have succeeded, then am I also successful;

¹ *K'áo Wăn* and *Shih Kwang* were both musicians of the state of *Šin*. *Shih*, which appears as *Kwang's* surname, was his denomination as 'music-master.' It is difficult to understand the reason why *Kwang-ze* introduces these men and their ways, or how it helps his argument.

² Perhaps we should read here 'son,' with special reference to the son of *Hui-ze*.

if they cannot be pronounced successful, neither I nor any other can succeed.

Therefore the scintillations of light from the midst of confusion and perplexity are indeed valued by the sagely man ; but not to use one's own views and to take his position on the ordinary views is what is called using the (proper) light.

6. But here now are some other sayings¹ :—I do not know whether they are of the same character as those which I have already given, or of a different character. Whether they be of the same character or not when looked at along with them, they have a character of their own, which cannot be distinguished from the others. But though this be the case, let me try to explain myself.

There was a beginning. There was a beginning before that beginning². There was a beginning previous to that beginning before there was the beginning.

There was existence ; there had been no existence. There was no existence before the beginning of that no existence². There was no existence previous to the no existence before there was the beginning of the no existence. If suddenly there was non-existence, we do not know whether it was really anything existing, or really not existing. Now I have said what I have said, but I do not know whether what I have said be really anything to the point or not.

¹ Referring, I think, to those below commencing ' There was a beginning.'

² That is, looking at things from the standpoint of an original non-existence, and discarding all considerations of space and time.

Under heaven there is nothing greater than the tip of an autumn down, and the Thâi mountain is small. There is no one more long-lived than a child which dies prematurely, and Phăng 3û did not live out his time. Heaven, Earth, and I were produced together, and all things and I are one. Since they are one, can there be speech about them? But since they are spoken of as one, must there not be room for speech? One and Speech are two; two and one are three. Going on from this (in our enumeration), the most skilful reckoner cannot reach (the end of the necessary numbers), and how much less can ordinary people do so! Therefore from non-existence we proceed to existence till we arrive at three; proceeding from existence to existence, to how many should we reach? Let us abjure such procedure, and simply rest here¹.

7. The Tào at first met with no responsive recognition. Speech at first had no constant forms of expression. Because of this there came the demarcations (of different views). Let me describe those demarcations :—they are the Left and the Right²; the Relations and their Obligations³; Classifications⁴

¹ On this concluding clause, 3iào Hung says :—‘ Avoiding such procedure, there will be no affirmations and denials (no contraries). The phrase 因是已 occurs in the Book several times, and interpreters have missed its meaning from not observing that 是已 serve merely as a final particle, and often have the 因 added to them, without affecting its meaning.’ See also Wang Yin on the usages of 因 in the 皇清經解, ch. 1208, art. 6.

² That is, direct opposites.

³ Literally, ‘ righteousneses; ’ the proper way of dealing with the relations.

⁴ Literally, ‘ separations.’

and their Distinctions ; Emulations and Contentions. These are what are called 'the Eight Qualities.' Outside the limits of the world of men¹, the sage occupies his thoughts, but does not discuss about anything; inside those limits he occupies his thoughts, but does not pass any judgments. In the *Khun K'hiu*², which embraces the history of the former kings, the sage indicates his judgments, but does not argue (in vindication of them). Thus it is that he separates his characters from one another without appearing to do so, and argues without the form of argument. How does he do so? The sage cherishes his views in his own breast, while men generally state theirs argumentatively, to show them to others. Hence we have the saying, 'Disputation is a proof of not seeing clearly.'

The Great Tâo³ does not admit of being praised. The Great Argument does not require words. Great Benevolence is not (officiously) benevolent. Great Disinterestedness does not vaunt its humility. Great Courage is not seen in stubborn bravery.

The Tâo that is displayed is not the Tâo. Words that are argumentative do not reach the point. Benevolence that is constantly exercised does not accomplish its object. Disinterestedness that vaunts its purity is not genuine. Courage that is most stub-

¹ Literally, 'the six conjunctions,' meaning the four cardinal points of space, with the zenith and nadir ; sometimes a name for the universe of space. Here we must restrict the meaning as I have done.

² 'The Spring and Autumn ;'—Confucius's Annals of Lû, here complimented by *Kwang-3ze*. See in Mencius, IV, ii, 21.

³ Compare the Tâo Teh K'ing, ch. 25, et al.

born is ineffectual. These five seem to be round (and complete), but they tend to become square (and immovable)¹. Therefore the knowledge that stops at what it does not know is the greatest. Who knows the argument that needs no words, and the Way that is not to be trodden²?

He who is able to know this has what is called 'The Heavenly Treasure-house'³. He may pour into it without its being filled; he may pour from it without its being exhausted; and all the while he does not know whence (the supply) comes. This is what is called 'The Store of Light'³.

Therefore of old Yáo asked Shun, saying, 'I wish to smite (the rulers of) Jung, Kwei, and Hsü-áo⁴. Even when standing in my court, I cannot get them out of my mind. How is it so?' Shun replied, 'Those three rulers live (in their little states) as if they were among the mugwort and other brushwood;—how is it that you cannot get them out of your mind? Formerly, ten suns came out together, and all things were illuminated by them;—how much should (your) virtue exceed (all) suns!'

8. Nieh K'üeh⁵ asked Wang Î⁵, saying, 'Do you know, Sir, what all creatures agree in approving and

¹ Compare the use of 方 in the Shû K'ing, I, iii, 11.

² The classic of Láo, in chaps. 1, 2.

³ Names for the Táo.

⁴ Three small states. Is Yáo's wish to smite an instance of the 'quality' of 'emulation' or jealousy?

⁵ Both Taoistic worthies of the time of Yáo, supposed to have been two of the Perfect Ones whom Yáo visited on the distant hill of K'ü-shih (I, par. 6). According to Hwang Mí, Wang Î was the teacher of Nieh K'üeh, and he again of Hsü Yü.

affirming?' 'How should I know it?' was the reply. 'Do you know what it is that you do not know?' asked the other again, and he got the same reply. He asked a third time,—'Then are all creatures thus without knowledge?' and Wang Í answered as before, (adding however), 'Notwithstanding, I will try and explain my meaning. How do you know that when I say "I know it," I really (am showing that) I do not know it, and that when I say "I do not know it," I really am showing that I do know it¹.' And let me ask you some questions:—'If a man sleep in a damp place, he will have a pain in his loins, and half his body will be as if it were dead; but will it be so with an eel? If he be living in a tree, he will be frightened and all in a tremble; but will it be so with a monkey? And does any one of the three know his right place? Men eat animals that have been fed on grain and grass; deer feed on the thick-set grass; centipedes enjoy small snakes; owls and crows delight in mice; but does any one of the four know the right taste? The dog-headed monkey finds its mate in the female gibbon; the elk and the axis deer cohabit; and the eel enjoys itself with other fishes. Máo 3hiang² and Lì Kî² were accounted by men to be most beautiful, but when fishes saw them, they dived deep in the water from them; when birds, they flew from them aloft; and

¹ Compare par. 1 of Book XXII.

² Two famous beauties;—the former, a contemporary of Hsî Shih (par. 4, note 2), and like her also, of the state of Yüeh; the latter, the daughter of a barbarian chief among the Western Jung. She was captured by duke Hsien of 3in, in B. C. 672. He subsequently made her his wife,—to the great injury of his family and state.

when deer saw them, they separated and fled away¹. But did any of these four know which in the world is the right female attraction? As I look at the matter, the first principles of benevolence and righteousness and the paths of approval and disapproval are inextricably mixed and confused together:—how is it possible that I should know how to discriminate among them?’

Nieh *Khüeh* said (further), ‘Since you, Sir, do not know what is advantageous and what is hurtful, is the Perfect man also in the same way without the knowledge of them?’ Wang Î replied, ‘The Perfect man is spirit-like. Great lakes might be boiling about him, and he would not feel their heat; the Ho and the Han might be frozen up, and he would not feel the cold; the hurrying thunderbolts might split the mountains, and the wind shake the ocean, without being able to make him afraid. Being such, he mounts on the clouds of the air, rides on the sun and moon, and rambles at ease beyond the four seas. Neither death nor life makes any change in him, and how much less should the considerations of advantage and injury do so²!’

9. *Khü* 3hiào-3ze³ asked *Khang-wû* 3ze³, saying,

¹ Not thinking them beautiful, as men did, but frightened and repelled by them.

² Compare Book I, pars. 3 and 5.

³ We know nothing of the former of these men, but what is mentioned here; the other appears also in Book XXV, 6, q. v. If ‘the master’ that immediately follows be Confucius they must have been contemporary with him. The *Khiû* in *Khang-wû*’s reply would seem to make it certain ‘the master’ was Confucius, but the oldest critics, and some modern ones as well, think that *Khang-wû*’s name was also *Khiû*. But this view is attended with more

‘I heard the Master (speaking of such language as the following):—“The sagely man does not occupy himself with worldly affairs. He does not put himself in the way of what is profitable, nor try to avoid what is hurtful; he has no pleasure in seeking (for anything from any one); he does not care to be found in (any established) Way; he speaks without speaking; he does not speak when he speaks; thus finding his enjoyment outside the dust and dirt (of the world).” The Master considered all this to be a shoreless flow of mere words, and I consider it to describe the course of the Mysterious Way.—What do you, Sir, think of it?’ *Khang-wû 3ze* replied, ‘The hearing of such words would have perplexed even Hwang-Tî, and how should *K’hiû* be competent to understand them? And you, moreover, are too hasty in forming your estimate (of their meaning). You see the egg, and (immediately) look out for the cock (that is to be hatched from it); you see the bow, and (immediately) look out for the dove (that is to be brought down by it) being roasted. I will try to explain the thing to you in a rough way; do you in the same way listen to me.

‘How could any one stand by the side of the sun and moon, and hold under his arm all space and all time? (Such language only means that the sagely man) keeps his mouth shut, and puts aside questions that are uncertain and dark; making his inferior capacities unite with him in honouring (the One Lord). Men in general bustle about and toil; the

difficulties than the other. By the clause interjected in the translation after the first ‘Master,’ I have avoided the incongruity of ascribing the long description of Tâoism to Confucius.

sagely man seems stupid and to know nothing¹. He blends ten thousand years together in the one (conception of time); the myriad things all pursue their spontaneous course, and they are all before him as doing so.

‘How do I know that the love of life is not a delusion? and that the dislike of death is not like a young person’s losing his way, and not knowing that he is (really) going home? *Lî Kî*² was a daughter of the border Warden of *Âi*. When (the ruler of) the state of *Ûin* first got possession of her, she wept till the tears wetted all the front of her dress. But when she came to the place of the king³, shared with him his luxurious couch, and ate his grain-and-grass-fed meat, then she regretted that she had wept. How do I know that the dead do not repent of their former craving for life?

‘Those who dream of (the pleasures of) drinking may in the morning wail and weep; those who dream of wailing and weeping may in the morning be going out to hunt. When they were dreaming they did not know it was a dream; in their dream they may even have tried to interpret it⁴; but when they awoke they knew that it was a dream. And

¹ Compare *Lão-ze*’s account of himself in his *Work*, ch. 20.

² See note 2 on page 191. The lady is there said to have been the daughter of a barbarian chief; here she appears as the child of the border Warden of *Âi*. But her maiden surname of *Kî* (姬) shows her father must have been a scion of the royal family of *Kâu*. Had he forsaken his wardenship, and joined one of the *Tî* tribes, which had adopted him as its chief?

³ *Ûin* was only a marquise. How does *Kwang-ze* speak of its ruler as ‘a king?’

⁴ This could not be; a man does not come to himself in his dream, and in that state try to interpret it.

there is the great awaking, after which we shall know that this life was a great dream¹. All the while, the stupid think they are awake, and with nice discrimination insist on their knowledge; now playing the part of rulers, and now of grooms. Bigoted was that *K'hiû*! He and you are both dreaming. I who say that you are dreaming am dreaming myself. These words seem very strange; but if after ten thousand ages we once meet with a great sage who knows how to explain them, it will be as if we met him (unexpectedly) some morning or evening.

10. 'Since you made me enter into this discussion with you, if you have got the better of me and not I of you, are you indeed right, and I indeed wrong? If I have got the better of you and not you of me, am I indeed right and you indeed wrong? Is the one of us right and the other wrong? are we both right or both wrong? Since we cannot come to a mutual and common understanding, men will certainly continue in darkness on the subject.

'Whom shall I employ to adjudicate in the matter? If I employ one who agrees with you, how can he, agreeing with you, do so correctly? And the same may be said, if I employ one who agrees with me. It will be the same if I employ one who differs from us both or one who agrees with us both. In this way I and you and those others would all not be able to come to a mutual understanding; and shall we then wait for that (great sage)? (We need not do so.) To wait on others to learn how conflicting opinions are changed is simply like not so

¹ Compare XVIII, par. 4.

waiting at all. The harmonising of them is to be found in the invisible operation of Heaven, and by following this on into the unlimited past. It is by this method that we can complete our years (without our minds being disturbed)¹.

‘What is meant by harmonising (conflicting opinions) in the invisible operation of Heaven? There is the affirmation and the denial of it; and there is the assertion of an opinion and the rejection of it. If the affirmation be according to the reality of the fact, it is certainly different from the denial of it:—there can be no dispute about that. If the assertion of an opinion be correct, it is certainly different from its rejection:—neither can there be any dispute about that. Let us forget the lapse of time; let us forget the conflict of opinions. Let us make our appeal to the Infinite, and take up our position there².’

II. The Penumbra asked the Shadow³, saying, ‘Formerly you were walking on, and now you have stopped; formerly you were sitting, and now you have risen up:—how is it that you are so without stability?’ The Shadow replied, ‘I wait for the movements of something else to do what I do, and that something else on which I wait waits further

¹ See this passage again in Book XXVII, par. 1, where the phrase which I have called here ‘the invisible operation of Heaven,’ is said to be the same as ‘the Heavenly Mould or Moulder,’ that is, the Heavenly Fashioner, one of the Tàoistic names for the Tào.

² That is, all things being traced up to the unity of the Tào, we have found the pivot to which all conflicting opinions, all affirmations, all denials, all positions and negatives converge, and bring to bear on them the proper light of the mind. Compare paragraph 3.

³ A story to the same effect as this here, with some textual variations, occurs in Book XXVII, immediately after par. 1 referred to above.

on another to do as it does¹. My waiting,—is it for the scales of a snake, or the wings of a cicada²? How should I know why I do one thing, or do not do another³?

‘Formerly, I, *Kwang Kâu*, dreamt that I was a butterfly, a butterfly flying about, feeling that it was enjoying itself. I did not know that it was *Kâu*. Suddenly I awoke, and was myself again, the veritable *Kâu*. I did not know whether it had formerly been *Kâu* dreaming that he was a butterfly, or it was now a butterfly dreaming that it was *Kâu*. But between *Kâu* and a butterfly there must be a difference⁴. This is a case of what is called the Transformation of Things⁴.’

¹ The mind cannot rest in second causes, and the first cause, if there be one, is inscrutable.

² Even these must wait for the will of the creature; but the case of the shadow is still more remarkable.

³ I have put this interrogatively, as being more graphic, and because of the particle 耶, which is generally, though not necessarily, interrogative.

⁴ Hsüan Ying, in his remarks on these two sentences, brings out the force of the story very successfully:—‘Looking at them in their ordinary appearance, there was necessarily a difference between them, but in the delusion of the dream each of them appeared the other, and they could not distinguish themselves! *Kâu* could be a butterfly, and the butterfly could be *Kâu*;—we may see that in the world all traces of that and this may pass away, as they come under the influence of transformations.’ For the phrase, ‘the transformation of things,’ see in Book XI, par. 5, et al. But the Tâoism here can hardly be distinguished from the Buddhism that holds that all human experience is merely so much *mâya* or illusion.

BOOK III.

PART I. SECTION III.

Yang Shang *K'ü*, or 'Nourishing the Lord of Life'.¹

1. There is a limit to our life, but to knowledge there is no limit. With what is limited to pursue after what is unlimited is a perilous thing; and when, knowing this, we still seek the increase of our knowledge, the peril cannot be averted². There should not be the practice of what is good with any thought of the fame (which it will bring), nor of what is evil with any approximation to the punishment (which it will incur)³:—an accordance with the Central Element (of our nature)⁴ is the regular way to preserve the body, to maintain the life, to nourish our parents, and to complete our term of years.

2. His cook⁵ was cutting up an ox for the ruler Wăn-hui⁵. Whenever he applied his hand, leaned forward with his shoulder, planted his foot, and em-

¹ See pp. 130, 131.

² Under what is said about knowledge here there lies the objection of Tâoists to the Confucian pursuit of knowledge as the means for the right conduct of life, instead of the quiet simplicity and self-suppression of their own system.

³ This is the key to the three paragraphs that follow. But the text of it is not easily construed. The 'doing good' and the 'doing evil' are to be lightly understood.

⁴ A name for the Tâo.

⁵ 'The ruler Wăn-hui' is understood to be 'king Hui of Liang (or Wei),' with the account of an interview between whom and Mencius the works of that philosopher commence.

ployed the pressure of his knee, in the audible ripping off of the skin, and slicing operation of the knife, the sounds were all in regular cadence. Movements and sounds proceeded as in the dance of 'the Mulberry Forest'¹ and the blended notes of 'the King Shâu'. The ruler said, 'Ah! Admirable! That your art should have become so perfect!' (Having finished his operation), the cook laid down his knife, and replied to the remark, 'What your servant loves is the method of the Tào, something in advance of any art. When I first began to cut up an ox, I saw nothing but the (entire) carcass. After three years I ceased to see it as a whole. Now I deal with it in a spirit-like manner, and do not look at it with my eyes. The use of my senses is discarded, and my spirit acts as it wills. Observing the natural lines, (my knife) slips through the great crevices and slides through the great cavities, taking advantage of the facilities thus presented. My art avoids the membranous ligatures, and much more the great bones.

'A good cook changes his knife every year;—(it may have been injured) in cutting; an ordinary cook changes his every month;—(it may have been) broken. Now my knife has been in use for nineteen years; it has cut up several thousand oxen, and yet its edge is as sharp as if it had newly come from the whetstone. There are the interstices of the joints, and the edge of the knife has no (appreciable) thickness; when that which is so thin enters where the interstice is, how easily it moves along! The

¹ Two pieces of music, ascribed to K'äng Thang and Hwang-Ti.

blade has more than room enough. Nevertheless, whenever I come to a complicated joint, and see that there will be some difficulty, I proceed anxiously and with caution, not allowing my eyes to wander from the place, and moving my hand slowly. Then by a very slight movement of the knife, the part is quickly separated, and drops like (a clod of) earth to the ground. Then standing up with the knife in my hand, I look all round, and in a leisurely manner, with an air of satisfaction, wipe it clean, and put it in its sheath.' The ruler Wăn-hui said, 'Excellent! I have heard the words of my cook, and learned from them the nourishment of (our) life.'

3. When Kung-wăn Hsien¹ saw the Master of the Left, he was startled, and said, 'What sort of man is this? How is it he has but one foot? Is it from Heaven? or from Man?' Then he added², 'It must be from Heaven, and not from Man. Heaven's making of this man caused him to have but one foot. In the person of man, each foot has its marrow. By this I know that his peculiarity is from Heaven, and not from Man. A pheasant of the marshes has to take ten steps to pick up a mouthful of food, and thirty steps to get a drink, but it does not seek to be nourished in a coop. Though its spirit would (there) enjoy a royal abundance, it does not think (such confinement) good.'

¹ There was a family in Wei with the double surname Kung-wăn. This would be a scion of it.

² This is Hsien still speaking. We have to understand his reasoning *ad sensum* and not *ad verbum*. The master of the Left had done 'evil,' so as to incur the punishment from which he suffered; and had shown himself less wise than a pheasant.

4. When Láo Tan died¹, *K'hin Shih*² went to condole (with his son), but after crying out three times, he came out. The disciples³ said to him, 'Were you not a friend of the Master?' 'I was,' he replied, and they said, 'Is it proper then to offer your condolences merely as you have done?' He said, 'It is. At first I thought he was the man of men, and now I do not think so. When I entered a little ago and expressed my condolences, there were the old men wailing as if they had lost a son, and the young men wailing as if they had lost their mother. In his attracting and uniting them to himself in such a way there must have been that which made them involuntarily express their words (of condolence), and involuntarily wail, as they were doing. And this was a hiding from himself of his Heaven (-nature), and an excessive indulgence of his (human) feelings;—a forgetting of what he had received (in being born); what the ancients called the punishment due to neglecting the Heaven (-nature)⁴. When the Master came⁵, it was at the proper time; when he went away, it was the simple sequence (of his coming). Quiet acquiescence in what happens at its proper time, and quietly submitting (to its ceasing) afford no occasion for grief or for joy⁶. The ancients described (death) as the loosening of the

¹ Then the account that Láo-ze went westwards, and that nothing is known as to where he died, must be without foundation.

² Nothing more is known of this person.

³ Probably the disciples of Láo-ze.

⁴ Láo had gone to an excess in his 'doing good,' as if he were seeking reputation.

⁵ Into the world.

⁶ See *Kwang-ze's* remarks and demeanour on the death of his wife, in Book XVIII.

cord on which God suspended (the life)¹. What we can point to are the faggots that have been consumed; but the fire is transmitted (elsewhere), and we know not that it is over and ended².

¹ This short sentence is remarkable by the use of the character Tî (帝), 'God,' in it, a usage here ascribed to the ancients.

² The concluding sentence might stand as a short paragraph by itself. The 'faggots' are understood to represent the body, and the 'fire' the animating spirit. The body perishes at death as the faggots are consumed by the fire. But the fire may be transmitted to other faggots, and so the spirit may migrate, and be existing elsewhere.

BOOK IV.

PART I. SECTION IV.

Zăn Kien Shih, or 'Man in the World, Associated with other Men¹.'

1. Yen Hui² went to see *Kung-nî*³, and asked leave to take his departure. 'Where are you going to?' asked the Master. 'I will go to Wei⁴' was the reply. 'And with what object?' 'I have heard that the ruler of Wei⁵ is in the vigour of his years, and consults none but himself as to his course. He deals with his state as if it were a light matter, and has no perception of his errors. He thinks lightly of his people's dying; the dead are lying all over the country as if no smaller space could contain them; on the plains⁶ and about the marshes, they are as thick as heaps of fuel. The people know not where to turn to. I have heard you, Master, say, "Leave the state that is well

¹ See pp. 131, 132.

² The favourite disciple of Confucius, styled also *Ze-yüan*.

³ Of course, Confucius;—his designation or married name.

⁴ A feudal state, embracing portions of the present provinces of Ho-nan, Kih-lî, and Shan-tung. There was another state, which we must also call Wei in English, though the Chinese characters of them are different;—one of the fragments of the great state of Jin, more to the west.

⁵ At this time the marquis Yüan, known to us by his posthumous title of duke Ling;—see Book XXV, 9.

⁶ Adopting Lin's reading of 平 instead of the common 平.

governed; go to the state where disorder prevails¹." At the door of a physician there are many who are ill. I wish through what I have heard (from you) to think out some methods (of dealing with Wei), if peradventure the evils of the state may be cured.'

Kung-ni said, 'Alas! The risk is that you will go only to suffer in the punishment (of yourself)! The right method (in such a case) will not admit of any admixture. With such admixture, the one method will become many methods. Their multiplication will embarrass you. That embarrassment will make you anxious. However anxious you may be, you will not save (yourself). The perfect men of old first had (what they wanted to do) in themselves, and afterwards they found (the response to it) in others. If what they wanted in themselves was not fixed, what leisure had they to go and interfere with the proceedings of any tyrannous man?

'Moreover, do you know how virtue is liable to be dissipated, and how wisdom proceeds to display itself? Virtue is dissipated in (the pursuit of) the name for it, and wisdom seeks to display itself in the striving with others. In the pursuit of the name men overthrow one another; wisdom becomes a weapon of contention. Both these things are instruments of evil, and should not be allowed to have free course in one's conduct. Supposing one's virtue to be great and his sincerity firm, if he do not comprehend the spirit of those (whom he wishes to influence); and supposing he is free from the

¹ Compare in the Analects, VIII, xiii, 2, where a different lesson is given; but Confucius may at another time have spoken as Hui says.

disposition to strive for reputation, if he do not comprehend their minds;—when in such a case he forcibly insists on benevolence and righteousness, setting them forth in the strongest and most direct language, before the tyrant, then he, hating (his reprover's) possession of those excellences, will put him down as doing him injury. He who injures others is sure to be injured by them in return. You indeed will hardly escape being injured by the man (to whom you go)!

‘Further, if perchance he takes pleasure in men of worth and hates those of an opposite character, what is the use of your seeking to make yourself out to be different (from such men about him)? Before you have begun to announce (your views), he, as king and ruler, will take advantage of you, and immediately contend with you for victory. Your eyes will be dazed and full of perplexity; you will try to look pleased with him; you will frame your words with care; your demeanour will be conformed to his; you will confirm him in his views. In this way you will be adding fire to fire, and water to water, increasing, as we may express it, the evils (which you deplore). To these signs of deferring to him at the first there will be no end. You will be in danger, seeing he does not believe you, of making your words more strong; and you are sure to die at the hands of such a tyrant.

‘And formerly *Kieh*¹ killed *Kwan Lung-fang*², and *Kâu*³ killed the prince *Pi-kan*⁴. Both of

¹ The tyrant with whom the dynasty of Hsiâ ended.

² A worthy minister of *Kieh*.

³ The tyrant with whom the dynasty of Shang or Yin ended.

⁴ A half-brother of *Kâu*, the tyrant of the Yin dynasty.

these cultivated their persons, bending down in sympathy with the lower people to comfort them suffering (as they did) from their oppressors, and on their account opposing their superiors. On this account, because they so ordered their conduct, their rulers compassed their destruction:—such regard had they for their own fame. (Again), Yáo anciently attacked (the states of) ʒhung-kih¹ and Hsü-áo¹, and Yü attacked the ruler of Hû¹. Those states were left empty, and with no one to continue their population, the people being exterminated. They had engaged in war without ceasing; their craving for whatever they could get was insatiable. And this (ruler of Wei) is, like them, one who craves after fame and greater substance;—have you not heard it? Those sages were not able to overcome the thirst for fame and substance;—how much less will you be able to do so! Nevertheless you must have some ground (for the course which you wish to take); pray try and tell it to me.’

Yen Hui said, ‘May I go, doing so in uprightness and humility, using also every endeavour to be uniform (in my plans of operation)?’ ‘No, indeed!’ was the reply. ‘How can you do so? This man makes a display² of being filled to overflowing (with virtue), and has great self-conceit. His feelings are not to be determined from his countenance. Ordinary men do not (venture to) oppose him, and he proceeds from the way in which he affects them

¹ See in par. 7, Book II, where Hsü-áo is mentioned, though not ʒhung-kih. See the Shû, III, ii.

² I take 陽 here as = 佯;—a meaning given in the Khang-hsi dictionary.

to seek still more the satisfaction of his own mind. He may be described as unaffected by the (small lessons of) virtue brought to bear on him from day to day; and how much less will he be so by your great lessons? He will be obstinate, and refuse to be converted. He may outwardly agree with you, but inwardly there will be no self-condemnation;—how can you (go to him in this way and be successful)?

(Yen Hui) rejoined, 'Well then; while inwardly maintaining my straightforward intention, I will outwardly seem to bend to him. I will deliver (my lessons), and substantiate them by appealing to antiquity. Inwardly maintaining my straightforward intention, I shall be a co-worker with Heaven. When I thus speak of being a co-worker with Heaven, it is because I know that (the sovereign, whom we style) the son of Heaven, and myself, are equally regarded by Heaven as Its sons. And should I then, as if my words were only my own, be seeking to find whether men approved of them, or disapproved of them? In this way men will pronounce me a (sincere and simple¹) boy. This is what is called being a co-worker with Heaven.

'Outwardly bending (to the ruler), I shall be a co-worker with other men. To carry (the memorandum tablet to court)², to kneel, and to bend the body reverentially:—these are the observances of ministers. They all employ them, and should I presume not to do so? Doing what other men do, they would have no occasion to blame me. This

¹ Entirely unsophisticated, governed by the Tâo.

² See the *Lî K'î*, XI, ii, 16, 17.

is what is called being a fellow-worker with other men.

‘Fully declaring my sentiments and substantiating them by appealing to antiquity, I shall be a co-worker with the ancients. Although the words in which I convey my lessons may really be condemnatory (of the ruler), they will be those of antiquity, and not my own. In this way, though straightforward, I shall be free from blame. This is what is called being a co-worker with antiquity. May I go to Wei in this way, and be successful?’ ‘No indeed!’ said *Kung-ni*. ‘How can you do so? You have too many plans of proceeding, and have not spied out (the ruler’s character). Though you firmly adhere to your plans, you may be held free from transgression, but this will be all the result. How can you (in this way) produce the transformation (which you desire)? All this only shows (in you) the mind of a teacher!’

2. Yen Hui said, ‘I can go no farther; I venture to ask the method from you.’ *Kung-ni* replied, ‘It is fasting¹, (as) I will tell you. (But) when you have the method, will you find it easy to practise it? He who thinks it easy will be disapproved of by the bright Heaven.’ Hui said, ‘My family is poor. For months together we have no spirituous drink, nor do we taste the proscribed food or any strong-smelling vegetables²;—can this be regarded as fasting?’ The reply was, ‘It is the fasting appropriate to sacrificing, but it is not the fasting

¹ The term is emphatic, as Confucius goes on to explain.

² Such as onions and garlic, with horse, dog, cow, goose, and pigeon.

of the mind.' 'I venture to ask what that fasting of the mind is,' said Hui, and *K'ung-ni* answered, 'Maintain a perfect unity in every movement of your will. You will not wait for the hearing of your ears about it, but for the hearing of your mind. You will not wait even for the hearing of your mind, but for the hearing of the spirit¹. Let the hearing (of the ears) rest with the ears. Let the mind rest in the verification (of the rightness of what is in the will). But the spirit is free from all pre-occupation and so waits for (the appearance of) things. Where the (proper) course is², there is freedom from all pre-occupation;—such freedom is the fasting of the mind.' Hui said³, 'Before it was possible for me to employ (this method), there I was, the Hui that I am; now, that I can employ it, the Hui that I was has passed away. Can I be said to have obtained this freedom from pre-occupation?' The Master replied, 'Entirely. I tell you that you can enter and be at ease in the enclosure (where he is), and not come into collision with the reputation (which belongs to him). If he listen to your counsels, let him hear your notes; if he will not listen, be silent. Open no (other) door; employ no other medicine; dwell with him (as with a friend) in the same apartment, and as if you had no other option, and you will not be far from success in your object. Not to move a step is easy; to walk without treading on the ground is difficult. In acting after the manner of men, it is easy to fall

¹ The character in the text for 'spirit' here is 氣, 'the breath.'

² The Táo.

³ 'Said;' probably, after having made trial of this fasting.

into hypocrisy; in acting after the manner of Heaven, it is difficult to play the hypocrite. I have heard of flying with wings; I have not heard of flying without them. I have heard of the knowledge of the wise; I have not heard of the knowledge of the unwise. Look at that aperture (left in the wall);—the empty apartment is filled with light through it. Felicitous influences rest (in the mind thus emblemed), as in their proper resting place. Even when they do not so rest, we have what is called (the body) seated and (the mind) galloping abroad. The information that comes through the ears and eyes is comprehended internally, and the knowledge of the mind becomes something external:—(when this is the case), the spiritual intelligences will come, and take up their dwelling with us, and how much more will other men do so! All things thus undergo a transforming influence. This was the hinge on which Yü and Shun moved; it was this which Fû-hsî¹ and Kî-khü² practised all their lives: how much more should other men follow the same rule!’

3. 3ze-káo³, duke of Sheh, being about to proceed on a mission to K’hi, asked Kung-nî, saying, ‘The king is sending me, Kû-liang³, on a mission which

¹ Often spoken of as Fo-hî, the founder of the Chinese kingdom. His place in chronology should be assigned to him more than b.c. 3000 rather than under that date.

² A predecessor of Fû-hsî, a sovereign of the ancient paradisiacal time.

³ The name of Sheh remains in Sheh-hsien, a district of the department Nan-yang, Ho-nan. Its governor, who is the subject of this narrative, was a Shǎn Kû-liang, styled 3ze-káo. He was

is very important. *K'hi* will probably treat me as his commissioner with great respect, but it will not be in a hurry (to attend to the business). Even an ordinary man cannot be readily moved (to action), and how much less the prince of a state! I am very full of apprehension. You, Sir, once said to me that of all things, great or small, there were few which, if not conducted in the proper way¹, could be brought to a happy conclusion; that, if the thing were not successful, there was sure to be the evil of being dealt with after the manner of men²; that, if it were successful, there was sure to be the evil of constant anxiety³; and that, whether it succeeded or not, it was only the virtuous man who could secure its not being followed by evil. In my diet I take what is coarse, and do not seek delicacies,—a man whose cookery does not require him to be using cooling drinks. This morning I received my charge, and in the evening I am drinking iced water;—am I not feeling the internal heat (and discomfort)? Such is my state before I have actually engaged in the affair;—I am already suffering from conflicting anxieties. And if the thing do not succeed, (the king) is sure to deal with me after the manner of men. The evil is twofold; as a minister, I am not able to bear the burden (of the mission). Can

not a duke, but as the counts of *K'hi* had usurped the name of king, they gave high-sounding names to all their ministers and officers.

¹ Or, 'according to the Tâo.'

² As a criminal; punished by his sovereign.

³ Anxiety 'night and day,' or 'cold and hot' fits of trouble;—a peculiar usage of Yin Yang.

you, Sir, tell me something (to help me in the case)?'

Kung-nî replied, 'In all things under heaven there are two great cautionary considerations:—the one is the requirement implanted (in the nature)¹; the other is the conviction of what is right. The love of a son for his parents is the implanted requirement, and can never be separated from his heart; the service of his ruler by a minister is what is right, and from its obligation there is no escaping anywhere between heaven and earth. These are what are called the great cautionary considerations. Therefore a son finds his rest in serving his parents without reference to or choice of place; and this is the height of filial duty. In the same way a subject finds his rest in serving his ruler, without reference to or choice of the business; and this is the fullest discharge of loyalty. When men are simply obeying (the dictates of) their hearts, the considerations of grief and joy are not readily set before them. They know that there is no alternative to their acting as they do, and rest in it as what is appointed; and this is the highest achievement of virtue. He who is in the position of a minister or of a son has indeed to do what he cannot but do. Occupied with the details of the business (in hand), and forgetful of his own person, what leisure has he to think of his pleasure in living or his dislike of death? You, my master, may well proceed on your mission.

'But let me repeat to you what I have heard :—In

¹ The Ming of the text here is that in the first sentence of the *Kung Yung*.

all intercourse (between states), if they are near to each other, there should be mutual friendliness, verified by deeds; if they are far apart, there must be sincere adherence to truth in their messages. Those messages will be transmitted by internuncios. But to convey messages which express the complacency or the dissatisfaction of the two parties is the most difficult thing in the world. If they be those of mutual complacency, there is sure to be an overflow of expressions of satisfaction; if of mutual dissatisfaction, an overflow of expressions of dislike. But all extravagance leads to reckless language, and such language fails to command belief. When this distrust arises, woe to the internuncio! Hence the Rules for Speech¹ say, "Transmit the message exactly as it stands; do not transmit it with any overflow of language; so is (the internuncio) likely to keep himself whole."

4. 'Moreover, skilful wrestlers begin with open trials of strength, but always end with masked attempts (to gain the victory); as their excitement grows excessive, they display much wonderful dexterity. Parties drinking according to the rules at first observe good order, but always end with disorder; as their excitement grows excessive, their fun becomes uproarious². In all things it is so. People are at first sincere, but always end with becoming rude; at the commencement things are treated as trivial,

¹ Probably a Collection of Directions current at the time; and which led to the name of Yang Hsiung's Treatise with the same name in our first century.

² See the Shih, II, vii, 6.

but as the end draws near, they assume great proportions. Words are (like) the waves acted on by the wind; the real point of the matters (discussed by them) is lost. The wind and waves are easily set in motion; the success of the matter of which the real point is lost is easily put in peril. Hence quarrels are occasioned by nothing so much as by artful words and one-sided speeches. The breath comes angrily, as when a beast, driven to death, wildly bellows forth its rage. On this animosities arise on both sides. Hasty examination (of the case) eagerly proceeds, and revengeful thoughts arise in their minds;—they do not know how. Since they do not know how such thoughts arise, who knows how they will end? Hence the Rules for Speech¹ say, “Let not an internuncius depart from his instructions. Let him not urge on a settlement. If he go beyond the regular rules, he will complicate matters. Departing from his instructions and urging on a settlement imperils negotiations. A good settlement is proved by its lasting long, and a bad settlement cannot be altered;—ought he not to be careful?”

‘Further still, let your mind find its enjoyment in the circumstances of your position; nourish the central course which you pursue, by a reference to your unavoidable obligations. This is the highest object for you to pursue; what else can you do to fulfil the charge (of your father and ruler)². The best thing you can do is to be prepared to sacrifice your life; and this is the most difficult thing to do.’

¹ See above, on preceding page.

² Not meaning the king of *K'û*; but the *T'ao*, whose will was to be found in his nature and the conditions of his lot.

5. Yen Ho¹, being about to undertake the office of Teacher of the eldest son of duke Ling of Wei, consulted *K'ü Po-yü*². 'Here,' said he, 'is this (young) man, whose natural disposition is as bad as it could be. If I allow him to proceed in a bad way, it will be at the peril of our state; if I insist on his proceeding in a right way, it will be at the peril of my own person. His wisdom is just sufficient to know the errors of other men, but he does not know how he errs himself. What am I to do in such a case?' *K'ü Po-yü* replied, 'Good indeed is your question! Be on your guard; be careful; see that you keep yourself correct! Your best plan will be, with your person to seek association with him, and with your mind to try to be in harmony with him; and yet there are dangers connected with both of these things. While seeking to keep near to him, do not enter into his pursuits; while cultivating a harmony of mind with him, do not show how superior you are to him. If in your personal association you enter into his pursuits, you will fall with him and be ruined, you will tumble down with a crash. If in maintaining a harmony with his mind, you show how different you are from him, he will think you do so for the reputation and the name, and regard you as a creature of evil omen³. If you find him to be a mere boy, be you with him as another boy; if you find him one of those who will not have their ground marked out in the ordinary way, do you humour

¹ A member of the Yen family of Lû. We shall meet with him again in Books XIX, XXVIII, and XXXII.

² A minister of Wei; a friend and favourite of Confucius.

³ Compare in the *K'ung Yung*, ii, ch. 24.

him in this characteristic¹; if you find him to be free from lofty airs, show yourself to be the same;—(ever) leading him on so as to keep him free from faults.

‘Do you not know (the fate of) the praying mantis? It angrily stretches out its arms, to arrest the progress of the carriage, unconscious of its inability for such a task, but showing how much it thinks of its own powers. Be on your guard; be careful. If you cherish a boastful confidence in your own excellence, and place yourself in collision with him, you are likely to incur the fate (of the mantis).

‘Do you not know how those who keep tigers proceed? They do not dare to supply them with living creatures, because of the rage which their killing of them will excite. They do not (even) dare to give them their food whole, because of the rage which their rending of it will excite. They watch till their hunger is appeased, (dealing with them) from their knowledge of their natural ferocity. Tigers are different from men, but they fawn on those who feed them, and do so in accordance with their nature. When any of these are killed by them, it is because they have gone against that nature.

‘Those again who are fond of horses preserve their dung in baskets, and their urine in jars. If mosquitoes and gadflies light on them, and the grooms brush them suddenly away, the horses break their bits, injure (the ornaments on) their heads, and smash those on their breasts. The more care that is taken of them, the more does their fond-

¹ Equivalent to ‘Do not cross him in his peculiarities.’

ness (for their attendants) disappear. Ought not caution to be exercised (in the management of them)?'

6. A (master) mechanic, called Shih, on his way to *K'hi*, came to *K'hi-yüan*¹, where he saw an oak-tree, which was used as the altar for the spirits of the land. It was so large that an ox standing behind it could not be seen. It measured a hundred spans round, and rose up eighty cubits on the hill before it threw out any branches, after which there were ten or so, from each of which a boat could be hollowed out. People came to see it in crowds as in a market place, but the mechanic did not look round at it, but held on his way without stopping. One of his workmen, however, looked long and admiringly at it, and then ran on to his master, and said to him, 'Since I followed you with my axe and bill, I have never seen such a beautiful mass of timber as this. Why would you, Sir, not look round at it, but went on without stopping?' 'Have done,' said Mr. Shih, 'and do not speak about it. It is quite useless. A boat made from its wood would sink; a coffin or shell would quickly rot; an article of furniture would soon go to pieces; a door would be covered with the exuding sap; a pillar would be riddled by insects; the material of it is good for nothing, and hence it is that it has attained to so great an age².'

¹ The name of a place; of a road; of a bend in the road; of a hill. All these accounts of the name are found in different editions of our author, showing that the locality had not been identified.

² No one has thought it worth cutting down.

When Mr. Shih was returning, the altar-oak appeared to him in a dream, and said, 'What other tree will you compare with me? Will you compare me to one of your ornamental trees? There are hawthorns, pear-trees, orange-trees, pummelo-trees, gourds and other low fruit-bearing plants. When their fruits are ripe, they are knocked down from them, and thrown among the dirt¹. The large branches are broken, and the smaller are torn away. So it is that their productive ability makes their lives bitter to them; they do not complete their natural term of existence, but come to a premature end in the middle of their time, bringing on themselves the destructive treatment which they ordinarily receive. It is so with all things. I have sought to discover how it was that I was so useless;—I had long done so, till (the effort) nearly caused my death; and now I have learned it:—it has been of the greatest use to me. Suppose that I had possessed useful properties, should I have become of the great size that I am? And moreover you and I are both things;—how should one thing thus pass its judgment on another? how is it that you a useless man know all this about me a useless tree?' When Mr. Shih awoke, he kept thinking about his dream, but the workman said, 'Being so taken with its uselessness, how is it that it yet acts here as the altar for the spirits of the land?' 'Be still,' was the master's reply, 'and do not say a word. It simply happened to grow here; and thus those who do not know it do not speak ill of it as an evil thing. If it were not used as the altar, would it be in danger of

¹ This is the indignity intended.

being cut down? Moreover, the reason of its being preserved is different from that of the preservation of things generally; is not your explaining it from the sentiment which you have expressed wide of the mark?’

7. Nan-po 3ze-*khi*¹ in rambling about the Heights of Shang², saw a large and extraordinary tree. The teams of a thousand chariots might be sheltered under it, and its shade would cover them all! 3ze-*khi* said, ‘What a tree is this! It must contain an extraordinary amount of timber! When he looked up, however, at its smaller branches, they were so twisted and crooked that they could not be made into rafters and beams; when he looked down to its root, its stem was divided into so many rounded portions that neither coffin nor shell could be made from them. He licked one of its leaves, and his mouth felt torn and wounded. The smell of it would make a man frantic, as if intoxicated, for more than three whole days together. ‘This, indeed,’ said he, ‘is a tree good for nothing, and it is thus that it has attained to such a size. Ah! and spirit-like men acknowledge this worthlessness (and its result)³.’

In Sung there is the district of *King-shih*⁴, in which catalpae, cypresses, and mulberry trees grow well. Those of them which are a span or two or rather more in circumference⁵ are cut down by persons who want to make posts to which to tie their

¹ Probably the Nan-kwo 3ze-*khi* at the beginning of the second Book.

² In the present department of Kwei-teh, Ho-nan.

³ A difficult sentence to construe.

⁴ In what part of the duchy we do not know.

⁵ See Mencius, VI, i, 13.

monkeys; those which are three or four spans round are cut down by persons who want beams for their lofty and famous houses; and those of seven or eight spans are cut down by noblemen and rich merchants who want single planks for the sides of their coffins. The trees in consequence do not complete their natural term of life, and come to a premature end in the middle of their growth under the axe and bill;—this is the evil that befalls them from their supplying good timber.

In the same way the *K'ieh*¹ (book) specifies oxen that have white foreheads, pigs that have turned-up snouts, and men that are suffering from piles, and forbids their being sacrificed to the Ho. The wizards know them by these peculiarities and consider them to be inauspicious, but spirit-like men consider them on this account to be very fortunate.

8. There was the deformed object Shû². His chin seemed to hide his navel; his shoulders were higher than the crown of his head; the knot of his hair pointed to the sky; his five viscera were all compressed into the upper part of his body, and his two thigh bones were like ribs. By sharpening needles and washing clothes he was able to make a living. By sifting rice and cleaning it, he was able to support ten individuals. When the government was calling out soldiers, this poor Shû would bare his arms among the others; when it had any great service to be undertaken, because of his constant ailments, none of the work was assigned to him; when it was

¹ Probably the name of an old work on sacrifices. But was there ever a time in China when human sacrifices were offered to the Ho, or on any altar?

² One of *Kwang-ze's* creations.

giving out grain to the sick, he received three *kung*, and ten bundles of firewood. If this poor man, so deformed in body, was still able to support himself, and complete his term of life, how much more may they do so, whose deformity is that of their faculties¹!

9. When Confucius went to *K'û*², *K'ieh-yû*, the madman of *K'û*³, as he was wandering about, passed by his door, and said, 'O Phoenix, O Phoenix, how is your virtue degenerated! The future is not to be waited for; the past is not to be sought again! When good order prevails in the world, the sage tries to accomplish all his service; when disorder prevails, he may preserve his life; at the present time, it is enough if he simply escape being punished. Happiness is lighter than a feather, but no one knows how to support it; calamity is heavier than the earth, and yet no one knows how to avoid it. Give over! give over approaching men with the lessons of your virtue! You are in peril! you are in peril, hurrying on where you have marked out the ground against your advance! I avoid publicity, I avoid publicity, that my path may not be injured. I pursue my course, now going backwards, now crookedly, that my feet may not be hurt⁴.

¹ The deficiency of their faculties—here mental faculties—would assimilate them to the useless trees in the last two paragraphs, whose uselessness only proved useful to them.

² The great state of the south, having its capital in the present Hû-peï.

³ See the Analects, XVIII, v.

⁴ The madman would seem to contrast his own course with that of Confucius; but the meaning is very uncertain, and the text cannot be discussed fully in these short notes. There is a jingle

‘The mountain by its trees weakens itself¹. The grease which ministers to the fire fries itself. The cinnamon tree can be eaten, and therefore it is cut down. The varnish tree is useful, and therefore incisions are made in it. All men know the advantage of being useful, but no one knows the advantage of being useless.’

of rhyme also in the sentence, and some critics find something like this in them :

‘Ye ferns, ye thorny ferns, O injure not my way!
To save my feet, I backward turn, or winding stray!’

¹ Literally, ‘robs itself;’—exhausts its moisture or productive strength.

BOOK V.

PART I. SECTION V.

Teh *Khung Fû*, or 'The Seal of Virtue Complete¹.'

1. In *Lû*² there was a Wang *Thâi*³ who had lost both his feet⁴; while his disciples who followed and went about with him were as numerous as those of *Kung-nî*. *Khang Kî*⁵ asked *Kung-nî* about him, saying, 'Though Wang *Thâi* is a cripple, the disciples who follow him about divide *Lû* equally with you, Master. When he stands, he does not teach them; when he sits, he does not discourse to them. But they go to him empty, and come back full. Is there indeed such a thing as instruction without words⁶? and while the body is imperfect, may the mind be complete? What sort of man is he?'

Kung-nî replied, 'This master is a sage. I have

¹ See pp. 133, 134.

² The native state of Confucius, part of the present Shan-tung.

³ A *Tâoist* of complete virtue; but probably there was not really such a person. Our author fabricates him according to his fashion.

⁴ The character *uh* (兀) does not say that he had lost both his feet, but I suppose that such is the meaning, because of what is said of Toeless below that 'he walked on his heels to see Confucius.' The feet must have been amputated, or mutilated rather (justly or unjustly), as a punishment; but *Kwang-ze* wished to say nothing on that point.

⁵ Perhaps a disciple of Confucius;—not elsewhere mentioned as such.

⁶ See the *Tâu Teh King*, ch. 2.

only been too late in going to him. I will make him my teacher; and how much more should those do so who are not equal to me! Why should only the state of Lû follow him? I will lead on all under heaven with me to do so.' *Khang Kî* rejoined, 'He is a man who has lost his feet, and yet he is known as the venerable Wang¹;—he must be very different from ordinary men. What is the peculiar way in which he employs his mind?' The reply was, 'Death and life are great considerations, but they could work no change in him. Though heaven and earth were to be overturned and fall, they would occasion him no loss. His judgment is fixed regarding that in which there is no element of falsehood²; and, while other things change, he changes not. The transformations of things are to him the developments prescribed for them, and he keeps fast hold of the author of them².'

Khang Kî said, 'What do you mean?' 'When we look at things,' said *Kung-nî*, 'as they differ, we see them to be different, (as for instance) the liver and the gall, or *Khû* and *Yüeh*; when we look at them, as they agree, we see them all to be a unity. So it is with this (Wang Thái). He takes no knowledge of the things for which his ears and eyes are the appropriate organs, but his mind delights itself in the harmony of (all excellent) qualities. He looks at the unity which belongs to things, and does not perceive where they have suffered loss. He looks

¹ Literally, 'the Senior;' often rendered 'Teacher.'

² 'That in which there is no element of falsehood' is the *Táo*, which also is the 'Author' of all the changes that take place in time and space. See the Introductory Note on the title and subject of the Book.

on the loss of his feet as only the loss of so much earth.'

Khang Kî said, 'He is entirely occupied with his (proper) self¹. By his knowledge he has discovered (the nature of) his mind, and to that he holds as what is unchangeable¹; but how is it that men make so much of him?' The reply was, 'Men do not look into running water as a mirror, but into still water;—it is only the still water that can arrest them all, and keep them (in the contemplation of their real selves). Of things which are what they are by the influence of the earth, it is only the pine and cypress which are the best instances;—in winter as in summer brightly green². Of those which were what they were by the influence of Heaven³, the most correct examples were Yáo and Shun; fortunate in (thus) maintaining their own life correct, and so as to correct the lives of others.

'As a verification of the (power of) the original endowment, when it has been preserved, take the result of fearlessness,—how the heroic spirit of a single brave soldier has been thrown into an army of nine hosts⁴. If a man only seeking for fame and able in this way to secure it can produce such an effect, how much more (may we look for a greater

¹ Wang Thái saw all things in the Táo, and the Táo in all things. Comp. Book XI, par. 7, et al.

² Notwithstanding his being a cripple. He forgets that circumstance himself, and all others forget it, constrained and won by his embodiment of the Táo. What follows is an illustration of this, exaggerated indeed, but not so extravagantly as in many other passages.

³ In the Táoistic meaning of the term.

⁴ The royal army consisted of six hosts; that of a great feudal prince of three. 'Nine hosts'=a very great army.

result) from one whose rule is over heaven and earth, and holds all things in his treasury, who simply has his lodging in the six members¹ of his body, whom his ears and eyes serve but as conveying emblematic images of things, who comprehends all his knowledge in a unity, and whose mind never dies! If such a man were to choose a day on which he would ascend far on high, men would (seek to) follow him there. But how should he be willing to occupy himself with other men?'

2. Shăn-thû *Kiá*² was (another) man who had lost his feet. Along with *3ze-khân*³ of *K'ang*³ he studied under the master Po-hwăn *Wû-zăn*⁴. *3ze-khân* said to him (one day), 'If I go out first, do you remain behind; and if you go out first, I will remain behind.' Next day they were again sitting together on the same mat in the hall, when *3ze-khân* spoke the same words to him, adding, 'Now I am about to go out; will you stay behind or not? Moreover, when you see one of official rank (like myself), you do not try to get out of his way;—do you consider yourself equal to one of official rank?' Shăn-thû *Kiá* replied, 'In our Master's school is there indeed such recognition required of official rank? You are one, Sir, whose pleasure is in your official rank, and would therefore take precedence of other men. I

¹ The arms, legs, head, and trunk.

² Another cripple introduced by our author to serve his purpose.

³ Kung-sun *K'hião*; a good and able minister of *K'ang*, an earldom forming part of the present Ho-nan. He was a contemporary of Confucius, who wept when he heard of his death in B.C. 522. He was a scion of the ruling house, which again was a branch of the royal family of *K'âu*.

⁴ A Taoist teacher. See XXI, par. 9; XXXII, par. 1.

have heard that when a mirror is bright, the dust does not rest on it; when dust rests on it the mirror is not bright. When one dwells long with a man of ability and virtue, he comes to be without error. There now is our teacher whom you have chosen to make you greater than you are; and when you still talk in this way, are you not in error?' 3ze-khân rejoined, 'A (shattered) object as you are, you would still strive to make yourself out as good as Yáo! If I may form an estimate of your virtue, might it not be sufficient to lead you to the examination of yourself?' The other said, 'Most criminals, in describing their offences, would make it out that they ought not to have lost (their feet) for them; few would describe them so as to make it appear that they should not have preserved their feet. They are only the virtuous who know that such a calamity was unavoidable, and therefore rest in it as what was appointed for them. When men stand before (an archer like) Í¹ with his bent bow, if they are in the middle of his field, that is the place where they should be hit; and if they be not hit, that also was appointed. There are many with their feet entire who laugh at me because I have lost my feet, which makes me feel vexed and angry. But when I go to our teacher, I throw off that feeling, and return (to a better mood);—he has washed, without my knowing it, the other from me by (his instructions in) what is good. I have attended him now for nineteen years, and have not known that I am without my feet. Now, you, Sir, and I have for the object of our study the

¹ A famous archer of antiquity in the twenty-second century B.C., or perhaps earlier.

(virtue) which is internal, and not an adjunct of the body, and yet you are continually directing your attention to my external body;—are you not wrong in this?’ *Ze-khân* felt uneasy, altered his manner and looks, and said, ‘You need not, Sir, say anything more about it.’

3. In *Lû* there was a cripple, called *Shû-shan* the Toeless¹, who came on his heels to see *Kung-nî*. *Kung-nî* said to him, ‘By your want of circumspection in the past, Sir, you have incurred such a calamity;—of what use is your coming to me now?’ Toeless said, ‘Through my ignorance of my proper business and taking too little care of my body, I came to lose my feet. But now I am come to you, still possessing what is more honourable than my feet, and which therefore I am anxious to preserve entire. There is nothing which Heaven does not cover, and nothing which Earth does not sustain; you, Master, were regarded by me as doing the part of Heaven and Earth;—how could I know that you would receive me in such a way?’ Confucius rejoined, ‘I am but a poor creature. But why, my master, do you not come inside, where I will try to tell you what I have learned?’ When Toeless had gone out, Confucius said, ‘Be stimulated to effort, my disciples. This toeless cripple is still anxious to learn to make up for the evil of his former conduct;—how much more should those be so whose conduct has been unchallenged!’

Mr. Toeless, however, told *Lão Tan* (of the inter-

¹ ‘Toeless’ is a sort of nickname. *Shû-shan* or *Shû hill* was, probably, where he dwelt:—‘Toeless of *Shû hill*.’

view), saying, 'Khung *K'hiû*, I apprehend, has not yet attained to be a Perfect man. What has he to do with keeping a crowd of disciples around him? He is seeking to have the reputation of being an extraordinary and marvellous man, and does not know that the Perfect man considers this to be as handcuffs and fetters to him.' Lâu Tan said, 'Why did you not simply lead him to see the unity of life and death, and that the admissible and inadmissible belong to one category, so freeing him from his fetters? Would this be possible?' Toeless said, 'It is the punishment inflicted on him by Heaven ¹. How can he be freed from it?'

4. Duke Âi of Lû² asked *Kung-nî*, saying, 'There was an ugly man in Wei, called Âi-thâi Tho³. His father-in-law, who lived with him, thought so much of him that he could not be away from him. His wife, when she saw him (ugly as he was), represented to her parents, saying, "I had more than ten times rather be his concubine than the wife of any other man⁴." He was never heard to take the lead in discussion, but always seemed to be of the same opinion with others. He had not the position of a ruler, so as to be able to save men from death. He had no revenues, so as to be able to satisfy men's craving for food. He was ugly enough, moreover, to scare

¹ 'Heaven' here is a synonym of *Tâo*. Perhaps the meaning is 'unavoidable'; it is so in the *Tâoistic* order of things.

² It was in the sixteenth year of duke Âi that Confucius died. Âi was marquis of Lû from B.C. 494 to 468.

³ The account of Âi-thâi Tho is of course *Kwang-ze's* own fabrication. Âi-thâi is understood to be descriptive of his ugliness, and Tho to be his name.

⁴ Perhaps this was spoken by his wife before their marriage.

the whole world. He agreed with men instead of trying to lead them to adopt his views; his knowledge did not go beyond his immediate neighbourhood¹. And yet his father-in-law and his wife were of one mind about him in his presence (as I have said);—he must have been different from other men. I called him, and saw him. Certainly he was ugly enough to scare the whole world. He had not lived with me, however, for many months, when I was drawn to the man; and before he had been with me a full year, I had confidence in him. The state being without a chief minister, I (was minded) to commit the government to him. He responded to my proposal sorrowfully, and looked undecided as if he would fain have declined it. I was ashamed of myself (as inferior to him), but finally gave the government into his hands. In a little time, however, he left me and went away. I was sorry and felt that I had sustained a loss, and as if there were no other to share the pleasures of the kingdom with me. What sort of man was he?’

Kung-ni said, ‘Once when I was sent on a mission to *Khû*, I saw some pigs sucking at their dead mother. After a little they looked with rapid glances, when they all left her, and ran away. They felt that she did not see them, and that she was no longer like themselves. What they had loved in their mother was not her bodily figure, but what had given animation to her figure. When a man dies in battle, they do not at his interment employ the usual appendages

¹ One sees dimly the applicability of this illustration to the case in hand. What made *Âi-thâi Tho* so much esteemed was his mental power, quite independent of his ugly person.

of plumes¹: as to supplying shoes to one who has lost his feet, there is no reason why he should care for them;—in neither case is there the proper reason for their use¹. The members of the royal harem do not pare their nails nor pierce their ears²; when a man is newly married, he remains (for a time) absent from his official duties, and unoccupied with them². That their bodies might be perfect was sufficient to make them thus dealt with;—how much greater results should be expected from men whose mental gifts are perfect! This Âi-thâi Tho was believed by men, though he did not speak a word; and was loved by them, though he did no special service for them. He made men appoint him to the government of their states, afraid only that he would not accept the appointment. He must have been a man whose powers³ were perfect, though his realisation of them³ was not manifested in his person.'

Duke Âi said, 'What is meant by saying that his powers were complete?' Kung-nî replied, 'Death and life, preservation and ruin, failure and success, poverty and wealth, superiority and inferiority, blame and praise, hunger and thirst, cold and heat;—these are the changes of circumstances, the operation of our appointed lot. Day and night they succeed to one another before us, but there is no wisdom

¹ See the *Lî Kî*, VIII, i, 7; but the applicability of these two illustrations is not so clear.

² These two have force as in 'reasoning from the less to the greater.' With the latter of the two compare the mosaical provision in Deuteronomy xxiv. 5.

³ 'Powers' are the capacities of the nature,—the gift of the Táo. 'Virtue' is the realisation or carrying out of those capacities.

able to discover to what they owe their origination. They are not sufficient therefore to disturb the harmony (of the nature), and are not allowed to enter into the treasury of intelligence. To cause this harmony and satisfaction ever to be diffused, while the feeling of pleasure is not lost from the mind; to allow no break to arise in this state day or night, so that it is always spring-time¹ in his relations with external things; in all his experiences to realise in his mind what is appropriate to each season (of the year)²:—these are the characteristics of him whose powers are perfect.'

'And what do you mean by the realisation of these powers not being manifested in the person?' (pursued further the duke). The reply was, 'There is nothing so level as the surface of a pool of still water. It may serve as an example of what I mean. All within its circuit is preserved (in peace), and there comes to it no agitation from without. The virtuous efficacy is the perfect cultivation of the harmony (of the nature). Though the realisation of this be not manifested in the person, things cannot separate themselves (from its influence).'

Some days afterwards duke Âi told this conversation to Min-ze³, saying, 'Formerly it seemed to me the work of the sovereign to stand in court with his face to the south, to rule the kingdom, and to pay good heed to the accounts of the people concerned, lest any should come to a (miserable) death;—this

¹ Specially the season of complacent enjoyment.

² So, in Lin Hsi-kung; but the meaning has to be forced out of the text.

³ The disciple Min Sun or Min Ze-khien.

I considered to be the sum (of his duty). Now that I have heard that description of the Perfect man, I fear that my idea is not the real one, and that, by employing myself too lightly, I may cause the ruin of my state. I and Khung *K'hiu* are not on the footing of ruler and subject, but on that of a virtuous friendship.'

5. A person who had no lips, whose legs were bent so that he could only walk on his toes, and who was (otherwise) deformed ¹, addressed his counsels to duke Ling of Wei, who was so pleased with him, that he looked on a perfectly formed man as having a lean and small neck in comparison with him. Another who had a large goitre like an earthenware jar ¹ addressed his counsels to duke Hwan of *K'hi* ², who was so pleased with him that he looked on a perfectly formed man as having a neck lean and small in comparison with him ³. So it is that when one's virtue is extraordinary, (any deficiency in) his bodily form may be forgotten. When men do not forget what is (easily) forgotten, and forget what is not (easily) forgotten, we have a case of real oblivion. Therefore the sagely man has that in which his mind finds its enjoyment, and (looks on) wisdom as (but) the shoots from an old stump; agreements with others are to him but so much glue; kindnesses are

¹ These two men are undoubtedly inventions of *K'wang-3ze*. They are brought before us, not by surnames and names, but by their several deformities.

² The first of the five presiding chiefs; marquis of *K'hi* from B.C. 685 to 643.

³ Lin Hsi-kung wonders whether the story of the man who was so taken with the charms of a one-eyed courtesan, that he thought other women all had an eye too many, was taken from this!

(but the arts of) intercourse; and great skill is (but as) merchants' wares. The sagely man lays no plans;—of what use would wisdom be to him? He has no cutting and hacking to do;—of what use would glue be to him? He has lost nothing;—of what use would arts of intercourse be to him? He has no goods to dispose of;—what need has he to play the merchant? (The want of) these four things are the nourishment of (his) Heavenly (nature); that nourishment is its Heavenly food. Since he receives this food from Heaven, what need has he for anything of man's (devising)? He has the bodily form of man, but not the passions and desires of (other) men. He has the form of man, and therefore he is a man. Being without the passions and desires of men, their approvings and disapprovings are not to be found in him. How insignificant and small is (the body) by which he belongs to humanity! How grand and great is he in the unique perfection of his Heavenly (nature)!

Hui-ze said to Kwang-ze, 'Can a man indeed be without desires and passions?' The reply was, 'He can.' 'But on what grounds do you call him a man, who is thus without passions and desires?' Kwang-ze said, 'The T'ao¹ gives him his personal appearance (and powers); Heaven² gives him his bodily form; how should we not call him a man?' Hui-ze rejoined, 'Since you call him a man, how

¹ Lû Shû-ñih maintains here that 'the T'ao' and 'Heaven' have the same meaning; nor does he make any distinction between mào (貌), 'the personal appearance,' and hsing (形), 'the figure,' or 'bodily form.'

² Compare in the T'ao Teh King expressions in li, 2, and lv, 5.

can he be without passions and desires?' The reply was, 'You are misunderstanding what I mean by passions and desires. What I mean when I say that he is without these is, that this man does not by his likings and dislikings do any inward harm to his body;—he always pursues his course without effort, and does not (try to) increase his (store of) life.' Hui-3ze rejoined, 'If there were not that increasing of (the amount) of life, how would he get his body¹?' Kwang-3ze said, 'The T'ao gives him his personal appearance (and powers); Heaven gives him his bodily form; and he does not by his likings and dislikings do any internal harm to his body. But now you, Sir, deal with your spirit as if it were something external to you, and subject your vital powers to toil. You sing (your ditties), leaning against a tree; you go to sleep, grasping the stump of a rotten dryandra tree. Heaven selected for you the bodily form (of a man), and you babble about what is strong and what is white².'

¹ Apparently a gross meaning attached by Hui-3ze to Kwang-3ze's words.

² Kwang-3ze beats down his opponent, and contemptuously refers to some of his well-known peculiarities;—as in II, par. 5, XXXIII, par. 7, and elsewhere.

BOOK VI.

PART I. SECTION VI.

Tâ Jung Shih, or 'The Great and Most
Honoured Master¹.'

1. He who knows the part which the Heavenly² (in him) plays, and knows (also) that which the Human² (in him ought to) play, has reached the perfection (of knowledge). He who knows the part which the Heavenly plays (knows) that it is naturally born with him; he who knows the part which the Human ought to play (proceeds) with the knowledge which he possesses to nourish it in the direction of what he does not (yet) know³:—to complete one's natural term of years and not come to an untimely end in the middle of his course is the fulness of knowledge. Although it be so, there is an evil (attending this condition). Such knowledge still awaits the confirmation of it as correct; it does so because it is not yet determined⁴. How do we know that what

¹ See pp. 134-136.

² Both 'Heaven' and 'Man' here are used in the Tâoistic sense;—the meaning which the terms commonly have both with Lâo and Kwang.

³ The middle member of this sentence is said to be the practical outcome of all that is said in the Book; conducting the student of the Tâo to an unquestioning submission to the experiences in his lot, which are beyond his comprehension, and approaching nearly to what we understand by the Christian virtue of Faith.

⁴ That is, there may be the conflict, to the end of life, between

we call the Heavenly (in us) is not the Human? and that what we call the Human is not the Heavenly? There must be the True man¹, and then there is the True knowledge.

2. What is meant by 'the True Man²?' The True men of old did not reject (the views of) the few; they did not seek to accomplish (their ends) like heroes (before others); they did not lay plans to attain those ends³. Being such, though they might make mistakes, they had no occasion for repentance; though they might succeed, they had no self-complacency. Being such, they could ascend the loftiest heights without fear; they could pass through water without being made wet by it; they could go into fire without being burnt; so it was

faith and fact, so graphically exhibited in the Book of Job, and compendiously described in the seventy-third Psalm.

¹ Here we meet with the True Man, a Master of the T'ao. He is the same as the Perfect Man, the Spirit-like Man, and the Sagely Man (see pp. 127, 128), and the designation is sometimes interchanged in the five paragraphs that follow with 'the Sagely Man.' Mr. Balfour says here that this name 'is used in the esoteric sense,—“partaking of the essence of divinity;”' and he accordingly translates 真人 by 'the divine man.' But he might as well translate any one of the other three names in the same way. The Shwo Wăn dictionary defines the name by 仙人, 'a recluse of the mountain, whose bodily form has been changed, and who ascends to heaven;' but when this account was made, T'aoism had entered into a new phase, different from what it had in the time of our author.

² In this description of 'the True Man,' and in what follows, there is what is grotesque and what is exaggerated (see note on the title of the first Book, p. 127). The most prominent characteristic of him was his perfect comprehension of the T'ao and participation of it.

³ 士 has here the sense of 事.

that by their knowledge they ascended to and reached the Tâo¹.

The True men of old did not dream when they slept, had no anxiety when they awoke, and did not care that their food should be pleasant. Their breathing came deep and silently. The breathing of the true man comes (even) from his heels, while men generally breathe (only) from their throats. When men are defeated in argument, their words come from their gullets as if they were vomiting. Where lusts and desires are deep, the springs of the Heavenly are shallow.

The True men of old knew nothing of the love of life or of the hatred of death. Entrance into life occasioned them no joy; the exit from it awakened no resistance. Composedly they went and came. They did not forget what their beginning had been, and they did not inquire into what their end would be. They accepted (their life) and rejoiced in it; they forgot (all fear of death), and returned (to their state before life)¹. Thus there was in them what is called the want of any mind to resist the Tâo, and of all attempts by means of the Human to assist the Heavenly. Such were they who are called the True men.

3. Being such, their minds were free from all thought²; their demeanour was still and unmoved;

¹ Was not this the state of non-existence? We cannot say of Pantâoism. However we may describe that, the Tâo operates in nature, but is not identical with it.

² 心忘 appears in the common editions as 心志, which must have got into the text at a very early time. 'The mind forgetting,' or 'free from all thought and purpose,' appears every-

their foreheads beamed simplicity. Whatever coldness came from them was like that of autumn; whatever warmth came from them was like that of spring. Their joy and anger assimilated to what we see in the four seasons. They did in regard to all things what was suitable, and no one could know how far their action would go. Therefore the sagely man might, in his conduct of war, destroy a state without losing the hearts of the people¹; his benefits and favours might extend to a myriad generations without his being a lover of men. Hence he who tries to share his joys with others is not a sagely man; he who manifests affection is not benevolent; he who observes times and seasons (to regulate his conduct) is not a man of wisdom; he to whom profit and injury are not the same is not a superior man; he who acts for the sake of the name of doing so, and loses his (proper) self is not the (right) scholar; and he who throws away his person in a way which is not the true (way) cannot command the service of others. Such men as Hû Pû-*k'ieh*, Wû Kwang, Po-*i*, Shû-*k'hi*, the count of *K'î*, Hsü-yü, *K'î* Thâ, and Shân-thû Tî, all did service for other men, and sought to secure for them what they desired, not seeking their own pleasure².

where in the Book as a characteristic of the True Man. Not a few critics contend that it was this, and not the Tâo of which it is a quality, that Kwang-3ze intended by the 'Master' in the title.

¹ Such antithetic statements are startling, but they are common with both Lâo-3ze and our author.

² The seven men mentioned here are all adduced, I must suppose, as instances of good and worthy men, but still inferior to the True Man. Of Hû Pû-*k'ieh* all that we are told is that he was 'an ancient worthy.' One account of Wû Kwang is that he was of the time of Hwang-Tî, with ears seven inches long; another, that he

4. The True men of old presented the aspect of judging others aright, but without being partisans; of feeling their own insufficiency, but being without flattery or cringing. Their peculiarities were natural to them, but they were not obstinately attached to them; their humility was evident, but there was nothing of unreality or display about it. Their placidity and satisfaction had the appearance of joy; their every movement seemed to be a necessity to them. Their accumulated attractiveness drew men's looks to them; their blandness fixed men's attachment to their virtue. They seemed to accommodate themselves to the (manners of their age), but with a certain severity; their haughty indifference was beyond its control. Unceasing seemed their endeavours to keep (their mouths) shut; when they looked down, they had forgotten what they wished to say.

They considered punishments to be the substance (of government, and they never incurred it); ceremonies to be its supporting wings (and they always observed them); wisdom (to indicate) the time (for action, and they always selected it); and virtue to be accordance (with others), and they were all-accordant. Considering punishments to be the substance (of government), yet their generosity appeared in the (manner of their) infliction of death. Considering ceremonies to be its supporting wings, they pursued

was of the time of Thang, of the Shang dynasty. Po-î and Shû-khî are known to us from the Analects; and also the count of K'hi, whose name, it is said, was Hsü-yü. I can find nothing about K'î Thâ;—his name in *Siào Hung's* text is 紀他沱. Shân-thû Tî was of the Yin dynasty, a contemporary of Thang. He drowned himself in the Ho. Most of these are referred to in other places.

by means of them their course in the world. Considering wisdom to indicate the time (for action), they felt it necessary to employ it in (the direction of) affairs. Considering virtue to be accordance (with others), they sought to ascend its height along with all who had feet (to climb it). (Such were they), and yet men really thought that they did what they did by earnest effort¹.

5. In this way they were one and the same in all their likings and dislikings. Where they liked, they were the same; where they did not like, they were the same. In the former case where they liked, they were fellow-workers with the Heavenly (in them); in the latter where they disliked, they were co-workers with the Human in them. The one of these elements (in their nature) did not overcome the other. Such were those who are called the True men.

Death and life are ordained, just as we have the constant succession of night and day;—in both cases from Heaven. Men have no power to do anything in reference to them;—such is the constitution of things². There are those who specially regard Heaven³ as their father, and they still love It (distant as It is)³;—how much more should they love

¹ All this paragraph is taken as illustrative of the True man's freedom from thought or purpose in his course.

² See note 3 on par. 1, p. 236.

³ Love is due to a parent, and so such persons should love Heaven. There is in the text here, I think, an unconscious reference to the earliest time, before the views of the earliest Chinese diverged to Theism and Tâoism. We cannot translate the 身 here.

That which stands out (Superior and Alone)¹! Some specially regard their ruler as superior to themselves, and will give their bodies to die for him;—how much more should they do so for That which is their true (Ruler)¹! When the springs are dried up, the fishes collect together on the land. Than that they should moisten one another there by the damp about them, and keep one another wet by their slime, it would be better for them to forget one another in the rivers and lakes². And when men praise Yáo and condemn Kieh, it would be better to forget them both, and seek the renovation of the Táo.

6. There is the great Mass (of nature);—I find the support of my body on it; my life is spent in toil on it; my old age seeks ease on it; at death I find rest in it;—what makes my life a good makes my death also a good³. If you hide away a boat in the ravine of a hill, and hide away the hill in a lake, you will say that (the boat) is secure; but at midnight there shall come a strong man and carry it off on his back, while you in the dark know nothing about it. You may hide away anything, whether small or great, in the most suitable place, and yet it shall disappear from it. But if you could hide the world in the world⁴, so that there was nowhere to which it could be removed, this would be the grand reality of the

¹ The great and most honoured Master,—the Táo.

² This sentence contrasts the cramping effect on the mind of Confucianism with the freedom given by the doctrine of the Táo.

³ The Táo does this. The whole paragraph is an amplification of the view given in the preceding note.

⁴ The Táo cannot be taken away. It is with its possessor, an 'ever-during thing.'

ever-during Thing¹. When the body of man comes from its special mould², there is even then occasion for joy; but this body undergoes a myriad transformations, and does not immediately reach its perfection;—does it not thus afford occasion for joys incalculable? Therefore the sagely man enjoys himself in that from which there is no possibility of separation, and by which all things are preserved. He considers early death or old age, his beginning and his ending, all to be good, and in this other men imitate him;—how much more will they do so in regard to That Itself on which all things depend, and from which every transformation arises!

7. This is the Táo;—there is in It emotion and sincerity, but It does nothing and has no bodily form³. It may be handed down (by the teacher), but may not be received (by his scholars). It may be apprehended (by the mind), but It cannot be seen. It has Its root and ground (of existence) in Itself. Before there were heaven and earth, from of old, there It was, securely existing. From It came the mysterious existences of spirits, from It the mysterious existence of God⁴. It produced heaven; It produced earth. It was before the Thâi-kî⁵, and

¹ See p. 242, note 4.

² Adopting the reading of 範 for 犯, supplied by Hwái-nan Sze.

³ Our author has done with 'the True Man,' and now brings in the Táo itself as his subject. Compare the predicates of It here with Bk. II, par. 2. But there are other, and perhaps higher, things said of it here.

⁴ Men at a very early time came to believe in the existence of their spirits after death, and in the existence of a Supreme Ruler or God. It was to the Táo that those concepts were owing.

⁵ The primal ether out of which all things were fashioned by the interaction of the Yin and Yang. This was something like the

yet could not be considered high¹; It was below all space, and yet could not be considered deep¹. It was produced before heaven and earth, and yet could not be considered to have existed long¹; It was older than the highest antiquity, and yet could not be considered old¹.

Shih-wei got It², and by It adjusted heaven and earth. Fû-hsi got It, and by It penetrated to the mystery of the maternity of the primary matter. The Wei-tâu³ got It, and from all antiquity has made no eccentric movement. The Sun and Moon got It, and from all antiquity have not intermitted (their bright shining). Khan-pei got It, and by It became lord of Khwăn-lun⁴. Făng-t⁵ got It, and by It enjoyed himself in the Great River. K'ien Wû⁶ got It, and by It dwelt on mount Thâi. Hwang-Ti⁷ got It, and by It ascended the cloudy sky. Kwan-hsü⁸

current idea of protoplasm; but while protoplasm lies down in the lower parts of the earth, the Thâi-k'î was imagined to be in the higher regions of space.

¹ The T'ao is independent both of space and time.

² A prehistoric sovereign.

³ A name for the constellation of the Great Bear.

⁴ Name of the spirit of the Khwăn-lun mountains in Thibet, the fairy-land of T'aoist writers, very much in T'aoism what mount Sumêru is in Buddhism.

⁵ The spirit presiding over the Yellow River;—see Mayers's Manual, pp. 54, 55.

⁶ Appears here as the spirit of mount Thâi, the great eastern mountain; we met with him in I, 5, but simply as one of Kwang-ze's fictitious personages.

⁷ Appears before in Bk. II; the first of Sze-mâ K'ien's 'Five T'is'; no doubt a very early sovereign, to whom many important discoveries and inventions are ascribed; is placed by many at the head of T'aoism itself.

⁸ The second of the 'Five T'is'; a grandson of Hwang-Ti. I do not know what to say of his 'Dark Palace.'

got It, and by It dwelt in the Dark Palace. Yü-khiang¹ got It, and by It was set on the North Pole. Hsi Wang-mû² got It, and by It had her seat in (the palace of) Shão-kwang. No one knows Its beginning; no one knows Its end. Phăng 3û got It, and lived on from the time of the lord of Yü to that of the Five Chiefs³. Fû Yüeh⁴ got It, and by It became chief minister to Wû-ting⁴, (who thus) in a trice became master of the kingdom. (After his death), Fû Yüeh mounted to the eastern portion of the Milky Way, where, riding on Sagittarius and Scorpio, he took his place among the stars.

8. Nan-po 3ze-khwei⁵ asked Nü Yü⁶, saying, 'You are old, Sir, while your complexion is like that of a child;—how is it so?' The reply was, 'I have become acquainted with the Táo.' The other said, 'Can I learn the Táo?' Nü Yü said, 'No. How can you? You, Sir, are not the man to do so. There was Pû-liang Í⁷ who had the abilities of a sagely man, but not the Táo, while I had the Táo, but not the abilities. I wished, however, to teach him, if, peradventure, he might

¹ The Spirit of the Northern regions, with a man's face, and a bird's body, &c.

² A queen of the Genii on mount Khwăn-lun. See Mayers's Manual, pp. 178, 179.

³ Phăng 3û has been before us in Bk. I. Shun is intended by 'the Lord of Yü.' The five Chiefs;—see Mencius, VI, ii, 7.

⁴ See the Shû, IV, viii; but we have nothing there of course about the Milky Way and the stars.—This passage certainly lessens our confidence in Kwang-3ze's statements.

⁵ Perhaps the same as Nan-po 3ze-khi in Bk. IV, par. 7.

⁶ Must have been a great Táoist. Nothing more can be said of him or her.

⁷ Only mentioned here.

become the sagely man indeed. If he should not do so, it was easy (I thought) for one possessing the Tâo of the sagely man to communicate it to another possessing his abilities. Accordingly, I proceeded to do so, but with deliberation¹. After three days, he was able to banish from his mind all worldly (matters). This accomplished, I continued my intercourse with him in the same way; and in seven days he was able to banish from his mind all thought of men and things. This accomplished, and my instructions continued, after nine days, he was able to count his life as foreign to himself. This accomplished, his mind was afterwards clear as the morning; and after this he was able to see his own individuality². That individuality perceived, he was able to banish all thought of Past or Present. Freed from this, he was able to penetrate to (the truth that there is no difference between) life and death;—(how) the destruction of life is not dying, and the communication of other life is not living. (The Tâo) is a thing which accompanies all other things and meets them, which is present when they are overthrown and when they obtain their completion. Its name is Tranquillity amid all Disturbances, meaning that such Disturbances lead to Its Perfection³.

‘And how did you, being alone (without any teacher), learn all this?’ ‘I learned it,’ was the reply, ‘from the son of Fû-mo⁴; he learned it from

¹ So the 守 is explained.

² Standing by himself, as it were face to face with the Tâo.

³ Amid all changes, in life and death, the possessor of the Tâo has peace.

⁴ Meaning writings; literally, ‘the son of the assisting pigment.’

the grandson of Lo-sung; he learned it from Shan-ming; he learned it from Nieh-hsü; he, from Hsü-yî; he, from Wû-âo; he, from Hsüan-ming; he, from 3han-lião; and he learned it from Î-shih.'

9. 3ze-sze¹, 3ze-yü¹, 3ze-lî¹, and 3ze-lâi¹, these four men, were talking together, when some one said, 'Who can suppose the head to be made from nothing, the spine from life, and the rump-bone from death? Who knows how death and birth, living on and disappearing, compose the one body? —I would be friends with him².' The four men looked at one another and laughed, but no one seized with his mind the drift of the questions. All, however, were friends together.

Not long after 3ze-yü fell ill, and 3ze-sze went to inquire for him. 'How great,' said (the sufferer), 'is the Creator³! That He should have made me the deformed object that I am!' He was a crooked hunchback; his five viscera were squeezed into the

We are not to suppose that by this and the other names that follow individuals are intended. Kwang-3ze seems to have wished to give, in his own fashion, some notion of the genesis of the idea of the Tão from the first speculations about the origin of things.

¹ We need not suppose that these are the names of real men. They are brought on the stage by our author to serve his purpose. Hwâi-nan makes the name of the first to have been 3ze-shui (子水).

² Compare the same representation in Bk. XXIII, par. 10. Kû Teh-kih says on it here, 'The head, the spine, the rump-bone mean simply the head and tail, the beginning and end. All things begin from nothing and end in nothing. Their birth and their death are only the creations of our thought, the going and coming of the primary ether. When we have penetrated to the non-reality of life and death, what remains of the body of so many feet?'

³ The 'Creator' or 'Maker' (造物者) is the Tão.

upper part of his body; his chin bent over his navel; his shoulder was higher than his crown; on his crown was an ulcer pointing to the sky; his breath came and went in gasps¹:—yet he was easy in his mind, and made no trouble of his condition. He limped to a well, looked at himself in it, and said, 'Alas that the Creator should have made me the deformed object that I am!' 3ze said, 'Do you dislike your condition?' He replied, 'No, why should I dislike it? If He were to transform my left arm into a cock, I should be watching with it the time of the night; if He were to transform my right arm into a cross-bow, I should then be looking for a hsiào to (bring down and) roast; if He were to transform my rump-bone into a wheel, and my spirit into a horse, I should then be mounting it, and would not change it for another steed. Moreover, when we have got (what we are to do), there is the time (of life) in which to do it; when we lose that (at death), submission (is what is required). When we rest in what the time requires, and manifest that submission, neither joy nor sorrow can find entrance (to the mind)². This would be what the ancients called loosing the cord by which (the life) is suspended. But one hung up cannot loose himself;—he is held fast by his bonds³. And that creatures cannot overcome

¹ Compare this description of 3ze-yü's deformity with that of the poor Shû, in IV, 8.

² Such is the submission to one's lot produced by the teaching of Taoism.

³ Compare the same phraseology in III, par. 4, near the end. In correcting Mr. Balfour's mistranslation of the text, Mr. Giles himself falls into a mistranslation through not observing that the 解

Heaven (the inevitable) is a long-acknowledged fact;—why should I hate my condition?’

10. Before long 3ze-lâi fell ill, and lay gasping at the point of death, while his wife and children stood around him wailing¹. 3ze-lî went to ask for him, and said to them, ‘Hush! Get out of the way! Do not disturb him as he is passing through his change.’ Then, leaning against the door, he said (to the dying man), ‘Great indeed is the Creator! What will He now make you to become? Where will He take you to? Will He make you the liver of a rat, or the arm of an insect²?’ 3ze-lâi replied, ‘Wherever a parent tells a son to go, east, west, south, or north, he simply follows the command. The Yin and Yang are more to a man than his parents are. If they are hastening my death, and I do not quietly submit to them, I shall be obstinate and rebellious. There is the great Mass (of nature);—I find the support of my body in it; my life is spent in toil on it; my old age seeks ease on it; at death I find rest on it:—what has made my life a good will make my death also a good.

‘Here now is a great founder, casting his metal. If the metal were to leap up (in the pot), and say, “I must be made into a (sword like the) Mo-yeh³,”

is passive, having the 懸 that precedes as its subject (observe the force of the 也 after 解 in the best editions), and not active, or governing the 懸 that follows.

¹ Compare the account of the scene at Lâo-3ze’s death, in III, par. 4.

² Here comes in the belief in transformation.

³ The name of a famous sword, made for Ho-lü, the king of

the great founder would be sure to regard it as uncanny. So, again, when a form is being fashioned in the mould of the womb, if it were to say, "I must become a man; I must become a man," the Creator would be sure to regard it as uncanny. When we once understand that heaven and earth are a great melting-pot, and the Creator a great founder, where can we have to go to that shall not be right for us? We are born as from a quiet sleep, and we die to a calm awaking.'

II. 3ze-sang Hù¹, Măng 3ze-fan¹, and 3ze-khin Kang¹, these three men, were friends together. (One of them said), 'Who can associate together without any (thought of) such association, or act together without any (evidence of) such co-operation? Who can mount up into the sky and enjoy himself amidst the mists, disporting beyond the utmost limits (of things)², and forgetting all others as if this were living, and would have no end?' The three men looked at one another and laughed, not perceiving the drift of the questions; and they continued to associate together as friends.

Suddenly, after a time³, 3ze-sang Hù died. Before he was buried, Confucius heard of the event, and

Wû (B. C. 514-494). See the account of the forging of it in the **東周列國志**, ch. 74. The mention of it would seem to indicate that 3ze-lâi and the other three men were of the time of Confucius.

¹ These three men were undoubtedly of the time of Confucius, and some would identify them with the 3ze-sang Po-3ze of Ana. VI, 1, Măng Kih-fan of VI, 13, and the Lâo of IX, vi, 4. This is very unlikely. They were Taoists.

² Or, 'without end.'

³ Or, 'Some time went by silently, and.'

sent 3ze-kung to go and see if he could render any assistance. One of the survivors had composed a ditty, and the other was playing on his lute. Then they sang together in unison,

‘Ah! come, Sang Hû! ah! come, Sang Hû!

Your being true you’ve got again,

While we, as men, still here remain

Ohone¹!’

3ze-kung hastened forward to them, and said, ‘I venture to ask whether it be according to the rules to be singing thus in the presence of the corpse?’ The two men looked at each other, and laughed, saying, ‘What does this man know about the idea that underlies (our) rules?’ 3ze-kung returned to Confucius, and reported to him, saying, ‘What sort of men are those? They had made none of the usual preparations², and treated the body as a thing foreign to them. They were singing in the presence of the corpse, and there was no change in their countenances. I cannot describe them;—what sort of men are they?’ Confucius replied, ‘Those men occupy and enjoy themselves in what is outside the (common) ways (of the world), while I occupy and enjoy myself in what lies within those ways. There is no common ground for those of such different ways; and when I sent you to condole with those men, I was acting stupidly. They, moreover, make man to be the fellow of the

¹ In accordance with the ancient and modern practice in China of calling the dead back. But these were doing so in a song to the lute.

² Or, ‘they do not regulate their doings (in the usual way).’

Creator, and seek their enjoyment in the formless condition of heaven and earth. They consider life to be an appendage attached, an excrescence annexed to them, and death to be a separation of the appendage and a dispersion of the contents of the excrescence. With these views, how should they know wherein death and life are to be found, or what is first and what is last? They borrow different substances, and pretend that the common form of the body is composed of them¹. They dismiss the thought of (its inward constituents like) the liver and gall, and (its outward constituents), the ears and eyes. Again and again they end and they begin, having no knowledge of first principles. They occupy themselves ignorantly and vaguely with what (they say) lies outside the dust and dirt (of the world), and seek their enjoyment in the business of doing nothing. How should they confusedly address themselves to the ceremonies practised by the common people, and exhibit themselves as doing so to the ears and eyes of the multitude?’

3ze-kung said, ‘Yes, but why do you, Master, act according to the (common) ways (of the world)?’ The reply was, ‘I am in this under the condemning sentence of Heaven². Nevertheless, I will share

¹ The idea that the body is composed of the elements of earth, wind or air, fire, and water.

² A strange description of himself by the sage. Literally, ‘I am (one of) the people killed and exposed to public view by Heaven;’ referring, perhaps, to the description of a living man as ‘suspended by a string from God.’ Confucius was content to accept his life, and used it in pursuing the path of duty, according to his conception of it, without aiming at the transcendental method of the Táoists. I can attach no other or better meaning to the expression.

with you (what I have attained to).’ 3ze-kung rejoined, ‘I venture to ask the method which you pursue;’ and Confucius said, ‘Fishes breed and grow in the water; man developes in the Táo. Growing in the water, the fishes cleave the pools, and their nourishment is supplied to them. Developing in the Táo, men do nothing, and the enjoyment of their life is secured. Hence it is said, “Fishes forget one another in the rivers and lakes; men forget one another in the arts of the Táo.”’

3ze-kung said, ‘I venture to ask about the man who stands aloof from others¹.’ The reply was, ‘He stands aloof from other men, but he is in accord with Heaven! Hence it is said, “The small man of Heaven is the superior man among men; the superior man among men is the small man of Heaven²!”’

12. Yen Hui asked Kung-nî, saying, ‘When the mother of Măng-sun 3hâi³ died, in all his wailing for her he did not shed a tear; in the core of his heart he felt no distress; during all the mourning rites, he exhibited no sorrow. Without these three things, he (was considered to have) discharged his mourning well;—is it that in the state of Lû one who has not the reality may yet get the reputation of having it? I think the matter very strange.’ Kung-nî

¹ Misled by the text of Hsüang Ying, Mr. Balfour here reads 畸 instead of 畸.

² Here, however, he aptly compares with the language of Christ in Matthew vii. 28.—Kwang-ze seems to make Confucius praise the system of Táoism as better than his own!

³ Must have been a member of the Măng or Măng-sun family of Lû, to a branch of which Mencius belonged.

said, 'That Mǎng-sun carried out (his views) to the utmost. He was advanced in knowledge; but (in this case) it was not possible for him to appear to be negligent (in his ceremonial observances)¹, but he succeeded in being really so to himself. Mǎng-sun does not know either what purposes life serves, or what death serves; he does not know which should be first sought, and which last². If he is to be transformed into something else, he will simply await the transformation which he does not yet know. This is all he does. And moreover, when one is about to undergo his change, how does he know that it has not taken place? And when he is not about to undergo his change, how does he know that it has taken place³? Take the case of me and you:—are we in a dream from which we have not begun to awake⁴?

'Moreover, Mǎng-sun presented in his body the appearance of being agitated, but in his mind he was conscious of no loss. The death was to him like the issuing from one's dwelling at dawn, and no (more terrible) reality. He was more awake than others were. When they wailed, he also wailed, having in himself the reason why he did so. And we all have our individuality which makes us what we are as compared together; but how do we know that we

¹ The people set such store by the mourning rites, that Mǎng-sun felt he must present the appearance of observing them. This would seem to show that Tāoism arose after the earlier views of the Chinese.

² I adopt here, with many of the critics, the reading of 孰 instead of the more common 就.

³ This is to me very obscure.

⁴ Are such dreams possible? See what I have said on II, par. 9.

determine in any case correctly that individuality? Moreover you dream that you are a bird, and seem to be soaring to the sky; or that you are a fish, and seem to be diving in the deep. But you do not know whether we that are now speaking are awake or in a dream¹. It is not the meeting with what is pleasurable that produces the smile; it is not the smile suddenly produced that produces the arrangement (of the person). When one rests in what has been arranged, and puts away all thought of the transformation, he is in unity with the mysterious Heaven.'

13. Î-ŕ 3ze² having gone to see Hsü Yû, the latter said to him, 'What benefit have you received from Yáo?' The reply was, 'Yáo says to me, You must yourself labour at benevolence and righteousness, and be able to tell clearly which is right and which wrong (in conflicting statements).' Hsü Yû rejoined, 'Why then have you come to me? Since Yáo has put on you the brand of his benevolence and righteousness, and cut off your nose with his right and wrong³, how will you be able to wander in the way of aimless enjoyment, of unregulated contemplation, and the ever-changing forms (of dispute)?' Î-ŕ 3ze said, 'That may be; but I should

¹ This also is obscure; but Confucius is again made to praise the Táoistic system.

² Î-ŕ is said by Lî Î to have been 'a worthy scholar;' but Î-ŕ is an old name for the swallow, and there is a legend of a being of this name appearing to king Mû, and then flying away as a swallow;—see the Khang-hsî Thesaurus under 而. The personage is entirely fabulous.

³ Dismembered or disfigured you.

like to skirt along its hedges.' 'But,' said the other, 'it cannot be. Eyes without pupils can see nothing of the beauty of the eyebrows, eyes, and other features; the blind have nothing to do with the green, yellow, and variegated colours of the sacrificial robes.' Î-r 3ze rejoined, 'Yet, when Wû-kwang¹ lost his beauty, Kû-liang¹ his strength, and Hwang-Tî his wisdom, they all (recovered them)² under the moulding (of your system);—how do you know that the Maker will not obliterate the marks of my branding, and supply my dismemberment, so that, again perfect in my form, I may follow you as my teacher?' Hsü Yû said, 'Ah! that cannot yet be known. I will tell you the rudiments. O my Master! O my Master! He gives to all things their blended qualities, and does not count it any righteousness; His favours reach to all generations, and He does not count it any benevolence; He is more ancient than the highest antiquity, and does not count Himself old; He overspreads heaven and supports the earth; He carves and fashions all bodily forms, and does not consider it any act of skill;—this is He in whom I find my enjoyment.'

14. Yen Hui said, 'I am making progress.' Kung-nî replied, 'What do you mean?' 'I have ceased to think of benevolence and righteousness,' was the reply. 'Very well; but that is not enough.'

Another day, Hui again saw Kung-nî, and said, 'I am making progress.' 'What do you mean?'

¹ Names of parties, of whom we know nothing. It is implied, we must suppose, that they had suffered as is said by their own inadvertence.

² We must suppose that they had done so.

'I have lost all thought of ceremonies and music.'
'Very well, but that is not enough.'

A third day, Hui again saw (the Master), and said, 'I am making progress.' 'What do you mean?' 'I sit and forget everything¹.' Kung-ni changed countenance, and said, 'What do you mean by saying that you sit and forget (everything)?' Yen Hui replied, 'My connexion with the body and its parts is dissolved; my perceptive organs are discarded. Thus leaving my material form, and bidding farewell to my knowledge, I am become one with the Great Pervader². This I call sitting and forgetting all things.' Kung-ni said, 'One (with that Pervader), you are free from all likings; so transformed, you are become impermanent. You have, indeed, become superior to me! I must ask leave to follow in your steps³.'

15. 3ze-yü⁴ and 3ze-sang⁴ were friends. (Once), when it had rained continuously for ten days, 3ze-yü said, 'I fear that 3ze-sang may be in distress.' So he wrapped up some rice, and went to give it to him to eat. When he came to 3ze-sang's door, there issued from it sounds between singing and wailing;

¹ 'I sit and forget;'—generally thus supplemented (無所不忘). Hui proceeds to set forth the meaning he himself attached to the phrase.

² Another denomination, I think, of the Táo. The 大通 is also explained as meaning, 'the great void in which there is no obstruction (太虛之無碍).'

³ Here is another testimony, adduced by our author, of Confucius's appreciation of Táoism; to which the sage would, no doubt, have taken exception.

⁴ Two of the men in pars. 9, 10.

a lute was struck, and there came the words, 'O Father! O Mother! O Heaven! O Men!' The voice could not sustain itself, and the line was hurriedly pronounced. 3ze-yü entered and said, 'Why are you singing, Sir, this line of poetry in such a way?' The other replied, 'I was thinking, and thinking in vain, how it was that I was brought to such extremity. Would my parents have wished me to be so poor? Heaven overspreads all without any partial feeling, and so does Earth sustain all;—would Heaven and Earth make me so poor with any unkindly feeling? I was trying to find out who had done it, and I could not do so. But here I am in this extremity!—it is what was appointed for me¹!'

¹ Here is the highest issue of Tâoism;—unquestioning submission to what is beyond our knowledge and control.

BOOK VII.

PART I. SECTION VII.

Ying Tî Wang¹, or 'The Normal Course for Rulers and Kings¹.'

I. Nieh *K'üeh*² put four questions to Wang Î², not one of which did he know (how to answer). On this Nieh *K'üeh* leaped up, and in great delight walked away and informed Phû-tze³ of it, who said to him, 'Do you (only) now know it?' He of the line of Yü⁴ was not equal to him of the line of Thái⁵. He of Yü still kept in himself (the idea of) benevolence by which to constrain (the submission of) men; and he did win men, but he had not begun to proceed by what did not belong to him as a man. He of the line of Thái would sleep tranquilly, and awake in contented simplicity. He would consider himself now (merely) as a horse, and now (merely) as an ox⁶. His knowledge was real and untroubled

¹ See pp. 136-138.

² See p. 190, note 5.

³ An ancient Tãoist, of the time of Shun. So, Hwang-fû Mî, who adds that Shun served him as his master when he was eight years old. I suppose the name indicates that his clothes were made of rushes.

⁴ Shun. See p. 245, note 3.

⁵ An ancient sovereign, earlier, no doubt, than Fû-hsî; but nothing is known of him.

⁶ He thought nothing about his being, as a man, superior to the lower creatures. Shun in governing employed his acquired knowledge; Thái had not begun to do so.

by doubts; and his virtue was very true :—he had not begun to proceed by what belonged to him as a man.

2. *Kien Wû*¹ went to see the mad (recluse), *K'ieh-yü*², who said to him, 'What did *Zäh-kung Shih*³ tell you?' The reply was, 'He told me that when rulers gave forth their regulations according to their own views and enacted righteous measures, no one would venture not to obey them, and all would be transformed.' *K'ieh-yü* said, 'That is but the hypocrisy of virtue. For the right ordering of the world it would be like trying to wade through the sea and dig through the Ho, or employing a musquito to carry a mountain on its back. And when a sage is governing, does he govern men's outward actions? He is (himself) correct, and so (his government) goes on ;—this is the simple and certain way by which he secures the success of his affairs. Think of the bird which flies high, to avoid being hurt by the dart on the string of the archer, and the little mouse which makes its hole deep under *Shän-k'ü*⁴ to avoid the danger of being smoked or dug out ;—are (rulers) less knowing than these two little creatures?'

3. *Thien Kăn*⁵, rambling on the south of (mount) *Yin*⁶, came to the neighbourhood of the *Lião-water*.

¹ See p. 170, note 2.

² See p. 170, note 3.

³ A name ;—'a worthy,' it is said.

⁴ Name of some hill, or height.

⁵ A name ('Root of the sky'), but probably mythical. There is a star so called.

⁶ Probably the name of a mountain, though this meaning of *Yin* is not given in the dictionary.

Happening there to meet with the man whose name is not known¹, he put a question to him, saying, 'I beg to ask what should be done² in order to (carry on) the government of the world.' The nameless man said, 'Go away; you are a rude borderer. Why do you put to me a question for which you are unprepared³? I would simply play the part of the Maker of (all) things⁴. When wearied, I would mount on the bird of the light and empty air, proceed beyond the six cardinal points, and wander in the region of non-entity, to dwell in the wilderness of desert space. What method have you, moreover, for the government of the world that you (thus) agitate my mind?' (Thien Kăn), however, again asked the question, and the nameless man said, 'Let your mind find its enjoyment in pure simplicity; blend yourself with (the primary) ether in idle indifference; allow all things to take their natural course; and admit no personal or selfish consideration:—do this and the world will be governed.'

4. Yang 3ze-kü⁵, having an interview with Láo Tan, said to him, 'Here is a man, alert and vigorous

¹ Or, 'a nameless man.' We cannot tell whether Kwang-3ze had any particular Being, so named, in view or not.

² The objectionable point in the question is the supposition that 'doing' was necessary in the case.

³ Or, 'I am unprepared.' But as Thien Kăn repeats the question, it seems better to supply the second pronoun. He had thought on the subject.

⁴ See the same phraseology in VI, par. 11. What follows is merely our author's way of describing the non-action of the Táo.

⁵ The Yang K'ü, whom Mencius attacked so fiercely. He was, perhaps, a contemporary and disciple of Láo-3ze.

in responding to all matters¹, clear-sighted and widely intelligent, and an unwearied student of the Táo;—can he be compared to one of the intelligent kings?' The reply was, 'Such a man is to one of the intelligent kings but as the bustling underling of a court who toils his body and distresses his mind with his various contrivances². And moreover, it is the beauty of the skins of the tiger and leopard which makes men hunt them; the agility of the monkey, or (the sagacity of) the dog that catches the yak, which make men lead them in strings; but can one similarly endowed be compared to the intelligent kings?'

Yang 3ze-kü looked discomposed and said, 'I venture to ask you what the government of the intelligent kings is.' Láo Tan replied, 'In the governing of the intelligent kings, their services overspread all under the sky, but they did not seem to consider it as proceeding from themselves; their transforming influence reached to all things, but the people did not refer it to them with hope. No one could tell the name of their agency, but they made men and things be joyful in themselves. Where they took their stand could not be fathomed, and they found their enjoyment in (the realm of) nonentity.'

5. In Kǎng there was a mysterious wizard³ called

¹ The 嚮 may be taken as = 向, in which case we must understand a 道 as its object; or as = 響, 'an echo,' indicating the quickness of the man's response to things.

² Compare the language of Láo Tan, in Bk. XII, par. 8, near the beginning.

³ 巫 is generally feminine, meaning 'a witch.' We must take

Ki-hsien, He knew all about the deaths and births of men, their preservation and ruin, their misery and happiness, and whether their lives would be long or short, foretelling the year, the month, the decade and the day like a spirit. When the people of K'ang saw him, they all ran out of his way. Lieh-ze went to see him, and was fascinated¹ by him. Returning, he told Hû-ze of his interview, and said, 'I considered your doctrine, my master, to be perfect, but I have found another which is superior to it.' Hû-ze² replied, 'I have communicated to you but the outward letter of my doctrine, and have not communicated its reality and spirit; and do you think that you are in possession of it? However many hens there be, if there be not the cock among them, how should they lay (real) eggs³? When you confront the world with your doctrine, you are sure to show in your countenance (all that is in your mind)⁴, and so enable (this) man to succeed in interpreting your physiognomy. Try and come to me with him, that I may show myself to him.'

On the morrow, accordingly, Lieh-ze came with the man and saw Hû-ze. When they went out, the

it here as masculine (= 覡). The general meaning of the character is 'magical,' the antics of such performers to bring down the spirits.

¹ Literally, 'intoxicated.'

² The teacher in T'aoism of Lieh-ze, called also Hû K'üi, with the name Lin (林). See the remarks on the whole paragraph in the Introductory Notice of the Book.

³ 'The hens' signify the letter of the doctrine; 'the cock,' its spirit; 'the eggs,' a real knowledge of it.

⁴ 信 is here in the first tone, and read as 伸, meaning 'to stretch,' 'to set forth.'

wizard said, 'Alas! your master is a dead man. He will not live;—not for ten days more! I saw something strange about him;—I saw the ashes (of his life) all slaked with water!' When Lieh-ze re-entered, he wept till the front of his jacket was wet with his tears, and told Hû-ze what the man had said. Hû-ze said, 'I showed myself to him with the forms of (vegetation beneath) the earth. There were the sprouts indeed, but without (any appearance of) growth or regularity:—he seemed to see me with the springs of my (vital) power closed up. Try and come to me with him again.'

Next day, accordingly, Lieh-ze brought the man again and saw Hû-ze. When they went out, the man said, 'It is a fortunate thing for your master that he met with me. He will get better; he has all the signs of living! I saw the balance (of the springs of life) that had been stopped (inclining in his favour).' Lieh-ze went in, and reported these words to his master, who said, 'I showed myself to him after the pattern of the earth (beneath the) sky. Neither semblance nor reality entered (into my exhibition), but the springs (of life) were issuing from beneath my feet;—he seemed to see me with the springs of vigorous action in full play. Try and come with him again.'

Next day Lieh-ze came with the man again, and again saw Hû-ze with him. When they went out, the wizard said, 'Your master is never the same. I cannot understand his physiognomy. Let him try to steady himself, and I will again view him.' Lieh-ze went in and reported this to Hû-ze, who said, 'This time I showed myself to him after the pattern of the grand harmony (of the two elemental

forces), with the superiority inclining to neither. He seemed to see me with the springs of (vital) power in equal balance. Where the water wheels about from (the movements of) a dugong¹, there is an abyss; where it does so from the arresting (of its course), there is an abyss; where it does so, and the water keeps flowing on, there is an abyss. There are nine abysses with their several names, and I have only exhibited three of them. Try and come with him again.'

Next day they came, and they again saw Hû-ze. But before he had settled himself in his position, the wizard lost himself and ran away. 'Pursue him,' said Hû-ze, and Lieh-ze did so, but could not come up with him. He returned, and told Hû-ze, saying, 'There is an end of him; he is lost; I could not find him.' Hû-ze rejoined, 'I was showing him myself after the pattern of what was before I began to come from my author. I confronted him with pure vacancy, and an easy indifference. He did not know what I meant to represent. Now he thought it was the idea of exhausted strength, and now that of an onward flow, and therefore he ran away.'

After this, Lieh-ze considered that he had not yet begun to learn (his master's doctrine). He returned to his house, and for three years did not go out. He did the cooking for his wife. He fed the pigs as if he were feeding men. He took no part

¹ One of the dugong. It has various names in Chinese, one being 人魚, 'the Man-Fish,' from a fancied resemblance of its head and face to a human being;—the origin perhaps of the idea of the mermaid.

or interest in occurring affairs. He put away the carving and sculpture about him, and returned to pure simplicity. Like a clod of earth he stood there in his bodily presence. Amid all distractions he was (silent) and shut up in himself. And in this way he continued to the end of his life.

6. Non-action (makes its exemplifier) the lord of all fame; non-action (serves him as) the treasury of all plans; non-action (fits him for) the burden of all offices; non-action (makes him) the lord of all wisdom¹. The range of his action is inexhaustible, but there is nowhere any trace of his presence. He fulfils all that he has received from Heaven², but he does not see that he was the recipient of anything. A pure vacancy (of all purpose) is what characterises him. When the perfect man employs his mind, it is a mirror. It conducts nothing and anticipates nothing; it responds to (what is before it), but does not retain it. Thus he is able to deal successfully with all things, and injures none.

7. The Ruler³ of the Southern Ocean was Shû⁴, the

¹ The four members of this sentence occasion the translator no small trouble. They are constructed on the same lines, and seem to me to be indicative and not imperative. Lin Hsi-kung observes that all the explanations that had been offered of them were inappropriate. My own version is substantially in accordance with his interpretations. The chief difficulty is with the first member, which seems anti-Tâoistic; but our author is not speaking of the purpose of any actor, but of the result of his non-action. 尸 is to be taken in the sense of 主, 'lord,' 'exercising lordship.' The 其 in the third sentence indicates a person or persons in the author's mind in what precedes.

² = the Heavenly or self-determining nature.

³ Perhaps 'god' would be a better translation.

⁴ Meaning 'Heedless.'

Ruler of the Northern Ocean was Hû¹, and the Ruler of the Centre was Chaos. Shû and Hû were continually meeting in the land of Chaos, who treated them very well. They consulted together how they might repay his kindness, and said, 'Men all have seven orifices for the purpose of seeing, hearing, eating, and breathing, while this (poor) Ruler alone has not one. Let us try and make them for him.' Accordingly they dug one orifice in him every day; and at the end of seven days Chaos died².

¹ Meaning 'Sudden.'

² The little allegory is ingenious and amusing. 'It indicates,' says Lin, 'how action (the opposite of non-inaction) injures the first condition of things.' More especially it is in harmony with the Tâoistic opposition to the use of knowledge in government. One critic says that an 'alas!' might well follow the concluding 'died.' But surely it was better that Chaos should give place to another state. 'Heedless' and 'Sudden' did not do a bad work.

BOOK VIII.

PART II. SECTION I.

Phien Mâu, or 'Webbed Toes'¹

1. A ligament uniting the big toe with the other toes and an extra finger may be natural² growths, but they are more than is good for use. Excrescences on the person and hanging tumours are growths from the body, but they are unnatural additions to it. There are many arts of benevolence and righteousness, and the exercise of them is distributed among the five viscera³; but this is not the correct method according to the characteristics of the Tâo. Thus it is that the addition to the foot is but the attachment to it of so much useless flesh, and the addition to the hand is but the planting on it of a useless finger. (So it is that) the connecting (the virtues) with the five viscera renders, by excess or restraint, the action of benevolence and righteousness bad, and leads to many arts as in the employment of (great) powers of hearing or of vision.

2. Therefore an extraordinary power of vision

¹ See pp. 138, 139.

² 'Come out from the nature,' but 'nature' must be taken here as in the translation. The character is not Tâo.

³ The five viscera are the heart, the liver, the stomach, the lungs, and the kidneys. To the liver are assigned the element 'wood,' and the virtue of benevolence; to the lungs, the element 'metal,' and the virtue of righteousness.

leads to the confusion of the five colours¹ and an excessive use of ornament. (Its possessor), in the resplendence of his green and yellow, white and black, black and green, will not stop till he has become a *Lî K'û*². An extraordinary power of hearing leads to a confusion of the five notes³, and an excessive use of the six musical accords⁴. (Its possessor), in bringing out the tones from the instruments of metal, stone, silk, and bamboo, aided by the *Hwang-kung*⁴ and *Tâ-lü*⁴ (tubes), will not stop till he has become a *Shih Khwang*⁵. (So), excessive benevolence eagerly brings out virtues and restrains its (proper) nature, that (its possessor) may acquire a famous reputation, and cause all the organs and drums in the world to celebrate an unattainable condition; and he will not stop till he has become a *3ǎng* (*Shǎn*)⁶ or a *Shih* (*3hiû*)⁷. An ex-

¹ Black, red, azure (green, blue, or black), white, and yellow.

² The same as the *Lî Lâu* of Mencius (IV, i, 1),—of the time of *Hwang-Tî*. It is not easy to construe the text here, and in the analogous sentences below. *Hsüan Ying*, having read on to the 煌煌 as the uninterrupted predicate of the sharp seer, says, 'Is not this a proof of the extraordinary gift?' What follows would be, 'But it was exemplified in *Lî K'û*.' The meaning that is given in the version was the first that occurred to myself.

³ The five notes of the Chinese musical scale.

⁴ There are twelve of these musical notes, determined by the twelve regulating tubes; six, represented here by *Hwang-kung*, the name of the first tube, giving the sharp notes; and six, represented by *Tâ-lü*, giving the flat notes.

⁵ See in II, par. 5.

⁶ The famous *3ǎng-3ze*, or *3ǎng Shǎn*, one of Confucius's ablest disciples.

⁷ An officer of Wei in the sixth century B. C. He belonged to a family of historiographers, and hence the surname *Shih* (史). Confucius mentions him in the most honourable terms in the

traordinary faculty in debating leads to the piling up of arguments like a builder with his bricks, or a net-maker with his string. (Its possessor) cunningly contrives his sentences and enjoys himself in discussing what hardness is and what whiteness is, where views agree and where they differ, and pressing on, though weary, with short steps, with (a multitude of) useless words to make good his opinion; nor will he stop till he has become a Yang (*K'ü*)¹ or Mo (*Ti*)¹. But in all these cases the parties, with their redundant and divergent methods, do not proceed by that which is the correct path for all under the sky. That which is the perfectly correct path is not to lose the real character of the nature with which we are endowed. Hence the union (of parts) should not be considered redundancy, nor their divergence superfluity; what is long should not be considered too long, nor what is short too short: A duck's legs, for instance, are short, but if we try to lengthen them, it occasions pain; and a crane's legs are long, but if we try to cut off a portion of them, it produces grief. Where a part is by nature long, we are not to amputate, or where it is by nature short, we are not to lengthen it. There is no occasion to try to remove any trouble that it may cause.

3. The presumption is that benevolence and righteousness are not constituents of humanity; for to how much anxiety does the exercise of them give rise! Moreover when another toe is united to the

Analect XV, vi, by the name Shih Yü. 'Righteousness' was his great attribute.

¹ The two heresiarchs so much denounced by Mencius. Both have appeared in previous Books.

great toe, to divide the membrane makes you weep; and when there is an extra finger, to gnaw it off makes you cry out. In the one case there is a member too many, and in the other a member too few; but the anxiety and pain which they cause is the same. The benevolent men of the present age look at the evils of the world, as with eyes full of dust, and are filled with sorrow by them, while those who are not benevolent, having violently altered the character of their proper nature, greedily pursue after riches and honours. The presumption therefore is that benevolence and righteousness are contrary to the nature of man:—how full of trouble and contention has the world been ever since the three dynasties¹ began!

And moreover, in employing the hook and line, the compass and square, to give things their correct form you must cut away portions of what naturally belongs to them; in employing strings and fastenings, glue and varnish to make things firm, you must violently interfere with their qualities. The bendings and stoppings in ceremonies and music, and the factitious expression in the countenance of benevolence and righteousness, in order to comfort the minds of men:—these all show a failure in observing the regular principles (of the human constitution). All men are furnished with such regular principles; and according to them what is bent is not made so by the hook, nor what is straight by the line, nor what is round by the compass, nor what is square by the carpenter's square. Nor is adhesion effected by

¹ Those of Hsiâ, Shang, and K'âu;—from the twenty-third century B. C. to our author's own time.

the use of glue and varnish, nor are things bound together by means of strings and bands. Thus it is that all in the world are produced what they are by a certain guidance, while they do not know how they are produced so; and they equally attain their several ends while they do not know how it is that they do so. Anciently it was so, and it is so now; and this constitution of things should not be made of none effect. Why then should benevolence and righteousness be employed as connecting (links), or as glue and varnish, strings and bands, and the enjoyment arising from the Táo and its characteristics be attributed to them?—it is a deception practised upon the world. Where the deception is small, there will be a change in the direction (of the objects pursued); where it is great, there will be a change of the nature itself. How do I know that it is so? Since he of the line of Yü called in his benevolence and righteousness to distort and vex the world, the world has not ceased to hurry about to execute their commands;—has not this been by means of benevolence and righteousness to change (men's views) of their nature?

4. I will therefore try and discuss this matter. From the commencement of the three dynasties downwards, nowhere has there been a man who has not under (the influence of external) things altered (the course of) his nature. Small men for the sake of gain have sacrificed their persons; scholars for the sake of fame have done so; great officers, for the sake of their families; and sagely men, for the sake of the kingdom. These several classes, with different occupations, and different repu-

tations, have agreed in doing injury to their nature and sacrificing their persons. Take the case of a male and female slave¹;—they have to feed the sheep together, but they both lose their sheep. Ask the one what he was doing, and you will find that he was holding his bamboo tablets and reading. Ask the other, and you will find that she was amusing herself with some game². They were differently occupied, but they equally lose their sheep. (So), Po-i³ died at the foot of Shâu-yang⁴ to maintain his fame, and the robber K'ih⁵ died on the top of Tung-ling⁶ in his eagerness for gain. Their deaths were occasioned by different causes, but they equally shortened their lives and did violence to their nature;—why must we approve of Po-i, and condemn the robber K'ih? In cases of such sacrifice all over the world, when one makes it for the sake of benevolence and righteousness, the common people style him 'a superior man,' but when another does it for the sake of goods and riches, they style him 'a small man.' The action of sacrificing is the same, and yet we have 'the superior man' and 'the small man!' In the matter of destroying his life, and doing injury to his nature, the robber K'ih simply did the same as Po-i;—why must we make the distinction of 'superior man' and 'small man' between them?

¹ See the Khang-hsî dictionary under the character 臧.

² Playing at some game with dice.

³ See VI, par. 3.

⁴ A mountain in the present Shan-hsî, probably in the department of Phû-lâu.

⁵ A strange character, but not historical, represented as a brother of Liû-hsiâ Hui. See Bk. XXIX.

⁶ 'The Eastern Height,'= the Thâi mountain in the present Shan-tung.

5. Moreover, those who devote their nature to (the pursuit) of benevolence and righteousness, though they should attain to be like ǰǎng (Shǎn) and Shih (ǰhiû), I do not pronounce to be good; those who devote it to (the study of) the five flavours, though they attain to be like Shû¹, I do not pronounce to be good; those who devote it to the (discrimination of the) five notes, though they attain to be like Shih Khwang, I do not pronounce to be quick of hearing; those who devote it to the (appreciation of the) five colours, though they attain to be like Li K'û, I do not pronounce to be clear of vision. When I pronounce men to be good, I am not speaking of their benevolence and righteousness;—the goodness is simply (their possession of) the qualities (of the Tâo). When I pronounce them to be good, I am not speaking of what are called benevolence and righteousness; but simply of their allowing the nature with which they are endowed to have its free course. When I pronounce men to be quick of hearing, I do not mean that they hearken to anything else, but that they hearken to themselves; when I pronounce them to be clear of vision, I do not mean that they look to anything else, but that they look to themselves. Now those who do not see themselves but see other things, who do not get possession of themselves but get possession of other things, get possession of what belongs to others, and not of what is their own; and they reach forth to what attracts others, and not to that in themselves which should attract them. But

¹ Different from Yih-ya, the famous cook of duke Hwan of K'hi. This is said to have been of the time of Hwang-Ti. But there are different readings of the name.

thus reaching forth to what attracts others and not to what should attract them in themselves, be they like the robber *K'ih* or like *Po-i*, they equally err in the way of excess or of perversity. What I am ashamed of is erring in the characteristics of the *T'ao*, and therefore, in the higher sphere, I do not dare to insist on the practice of benevolence and righteousness, and, in the lower, I do not dare to allow myself either in the exercise of excess or perversity.

BOOK IX.

PART II. SECTION II.

Mâ Thî, or 'Horses's Hoofs'¹.

1. Horses can with their hoofs tread on the hoarfrost and snow, and with their hair withstand the wind and cold; they feed on the grass and drink water; they prance with their legs and leap:—this is the true nature of horses. Though there were made for them grand towers² and large dormitories, they would prefer not to use them. But when Po-lão³ (arose and) said, 'I know well how to manage horses,' (men proceeded)⁴ to singe and mark them, to clip their hair, to pare their hoofs, to halter their heads, to bridle them and hobble them, and to confine them in stables and corrals. (When subjected to this treatment), two or three in every ten of them died. (Men proceeded further) to subject them to hunger and thirst, to gallop them and race them,

¹ See pp. 140, 141.

² Literally, 'righteous towers;' but 義 is very variously applied, and there are other readings. Compare the name of ling thâi, given by the people to the tower built by king Wăn; Shih, III, i, 8.

³ A mythical being, the first tamer of horses. The name is given to a star, where he is supposed to have his seat as superintendent of the horses of heaven. It became a designation of Sun Yang, a famous charioteer of the later period of the Kâu dynasty, but it could not be he whom Kwang-ze had in view.

⁴ Po-lão set the example of dealing with horses as now described; but the supplement which I have introduced seems to bring out better our author's meaning.

and to make them go together in regular order. In front were the evils of the bit and ornamented breastbands, and behind were the terrors of the whip and switch. (When so treated), more than half of them died.

The (first) potter said, 'I know well how to deal with clay;' and (men proceeded) to mould it into circles as exact as if made by the compass, and into squares as exact as if formed by the measuring square. The (first) carpenter said, 'I know well how to deal with wood;' and (men proceeded) to make it bent as if by the application of the hook, and straight as if by the application of the plumb-line. But is it the nature of clay and wood to require the application of the compass and square, of the hook and line? And yet age after age men have praised Po-lão, saying, 'He knew well how to manage horses,' and also the (first) potter and carpenter, saying, 'They knew well how to deal with clay and wood.' This is just the error committed by the governors of the world.

2. According to my idea, those who know well to govern mankind would not act so. The people had their regular and constant nature¹:—they wove and made themselves clothes; they tilled the ground and got food². This was their common faculty. They were all one in this, and did not form themselves into separate classes; so were they constituted and left to their natural tendencies³. Therefore in the

¹ Compare the same language in the previous Book, par. 3.

² But the weaver's or agriculturist's art has no more title to be called primitive than the potter's or carpenter's.

³ A difficult expression; but the translation, probably, gives its

age of perfect virtue men walked along with slow and grave step, and with their looks steadily directed forwards. At that time, on the hills there were no foot-paths, nor excavated passages; on the lakes there were no boats nor dams; all creatures lived in companies; and the places of their settlement were made close to one another. Birds and beasts multiplied to flocks and herds; the grass and trees grew luxuriant and long. In this condition the birds and beasts might be led about without feeling the constraint; the nest of the magpie might be climbed to, and peeped into. Yes, in the age of perfect virtue, men lived in common with birds and beasts, and were on terms of equality with all creatures, as forming one family;—how could they know among themselves the distinctions of superior men and small men? Equally without knowledge, they did not leave (the path of) their natural virtue; equally free from desires, they were in the state of pure simplicity. In that state of pure simplicity, the nature of the people was what it ought to be. But when the sagely men appeared, limping and wheeling about in (the exercise of) benevolence, pressing along and standing on tiptoe in the doing of righteousness, then men universally began to be perplexed. (Those sages also) went to excess in their performances of music, and in their gesticulations in the practice of ceremonies, and then men began to be separated from one another. If the raw materials

true significance. 'Heaven' here is synonymous with 'the Táo'; but its use shows how readily the minds, even of Láo and Kwang, had recourse to the earliest term by which the Chinese fathers had expressed their recognition of a Supreme and Controlling Power and Government.

had not been cut and hacked, who could have made a sacrificial vase from them? If the natural jade had not been broken and injured, who could have made the handles for the libation-cups from it? If the attributes of the Táo had not been disallowed, how should they have preferred benevolence and righteousness? If the instincts of the nature had not been departed from, how should ceremonies and music have come into use? If the five colours had not been confused, how should the ornamental figures have been formed? If the five notes had not been confused, how should they have supplemented them by the musical accords? The cutting and hacking of the raw materials to form vessels was the crime of the skilful workman; the injury done to the characteristics of the Táo in order to the practice of benevolence and righteousness was the error of the sagely men.

3. Horses, when living in the open country, eat the grass, and drink water; when pleased, they intertwine their necks and rub one another; when enraged, they turn back to back and kick one another;—this is all that they know to do. But if we put the yoke on their necks, with the moon-like frontlet displayed on all their foreheads, then they know to look slily askance, to curve their necks, to rush viciously, trying to get the bit out of their mouths, and to filch the reins (from their driver);—this knowledge of the horse and its ability thus to act the part of a thief is the crime of Po-lão. In the time of (the Tí) Ho-hsü¹, the people occupied

¹ An ancient sovereign; but nothing more definite can be said about him. Most of the critics identify him with Shǎn-năng, the

their dwellings without knowing what they were doing, and walked out without knowing where they were going. They filled their mouths with food and were glad; they slapped their stomachs to express their satisfaction. This was all the ability which they possessed. But when the sagely men appeared, with their bendings and stoppings in ceremonies and music to adjust the persons of all, and hanging up their benevolence and righteousness to excite the endeavours of all to reach them, in order to comfort their minds, then the people began to stump and limp about in their love of knowledge, and strove with one another in their pursuit of gain, so that there was no stopping them:—this was the error of those sagely men.

Father of Husbandry, who occupies the place in chronological tables after Fû-hsî, between him and Hwang-Tî. In the Tables of the Dynastic Histories, published in 1817, he is placed seventh in the list of fifteen reigns, which are placed without any specification of their length between Fû-hsî and Shân-năng. The name is written as 合胥 and 赫胥.

BOOK X.

PART II. SECTION III.

Khü Khieh, or 'Cutting open Satchels¹.'

1. In taking precautions against thieves who cut open satchels, search bags, and break open boxes, people are sure to cord and fasten them well, and to employ strong bonds and clasps; and in this they are ordinarily said to show their wisdom. When a great thief comes, however, he shoulders the box, lifts up the satchel, carries off the bag, and runs away with them, afraid only that the cords, bonds, and clasps may not be secure; and in this case what was called the wisdom (of the owners) proves to be nothing but a collecting of the things for the great thief. Let me try and set this matter forth. Do not those who are vulgarly called wise prove to be collectors for the great thieves? And do not those who are called sages prove to be but guardians in the interest of the great thieves?

How do I know that the case is so? Formerly, in the state of *Khi*, the neighbouring towns could see one another; their cocks and dogs never ceased to answer the crowing and barking of other cocks and dogs (between them). The nets were set (in the water and on the land); and the ploughs and hoes were employed over more than a space of two thousand li square. All within its four boundaries, the

¹ See pp. 141, 142.

establishment of the ancestral temples and of the altars of the land and grain, and the ordering of the hamlets and houses, and of every corner in the districts, large, medium, and small, were in all particulars according to the rules of the sages¹. So it was; but yet one morning, Thien *Khăng-ze*² killed the ruler of *Khi*, and stole his state. And was it only the state that he stole? Along with it he stole also the regulations of the sages and wise men (observed in it). And so, though he got the name of being a thief and a robber, yet he himself continued to live as securely as Yâo and Shun had done. Small states did not dare to find fault with him; great states did not dare to take him off; for twelve generations (his descendants) have possessed the state of *Khi*³. Thus do we not have a case in which not only did (the party) steal the state of *Khi*,

¹ The meaning is plain; but to introduce the various geographical terms would make the translation cumbrous. The concluding 曲 is perplexing.

² This event is mentioned in the Analects, XIV, xxii, where the perpetrator of the murder is called *Khăn Khăng-ze*, and *Khăn Hăng*. Hăng was his name, and *Khăng* the honorary title given to him after his death. The family to which he belonged had originally taken refuge in *Khi* from the state of *Khăn* in B. C. 672. Why and when its chiefs adopted the surname Thien instead of *Khăn* is not well known. The murder took place in 482. Hăng did not immediately usurp the marquisate; but he and his successors disposed of it at their pleasure among the representatives of the old House till 386, when Thien Ho was recognised by the king of *Kâu* as the marquis; and his next successor but one took the title of king.

³ The kingdom of *Khi* came to an end in B. C. 221, the first year of the dynasty of *K'in*, after it had lasted through five reigns. How *Kwang-ze* made out his 'twelve generations' we cannot tell. There may be an interpolation in his text made in the time of *K'in*, or subsequently.

but at the same time the regulations of its sages and wise men, which thereby served to guard the person of him, thief and robber as he was ?

2. Let me try to set forth this subject (still further). Have not there been among those vulgarly styled the wisest, such as have collected (their wealth) for the great chief? and among those styled the most sage such as have guarded it for him? How do I know that it has been so? Formerly, Lung-fāng¹ was beheaded; Pí-kan² had his heart torn out; K'hang Hung³ was ripped open; and 3ze-hsü⁴ was reduced to pulp (in the K'iang). Worthy as those four men were, they did not escape such dreadful deaths. The followers of the robber K'ih⁵ asked him, saying, 'Has the robber also any method or principle (in his proceedings)?' He replied, 'What profession is there which has not its principles? That the robber in his recklessness comes to the conclusion that there are valuable deposits in an apartment shows his sageness; that he is the first to enter it shows his bravery; that he is the last to quit it shows his righteousness; that he knows whether (the robbery) may be attempted or not shows his wisdom; and that he makes an equal

¹ See on Book IV, par. 1.

² See on Book IV, par. 1.

³ A historiographer of K'au, with whom Confucius is said to have studied music. He was weakly and unjustly put to death, as here described by king K'ang, in B. C. 492.

⁴ Wú 3ze-hsü, the hero of revenge, who fled from K'au to Wú, which he long served. He was driven at last to commit suicide, and his body was then put into a leathern wine-sack, and thrown into the K'iang near the present Sû-k'au;—about B. C. 475.

⁵ See on Book VIII, par. 4.

division of the plunder shows his benevolence. Without all these five qualities no one in the world has ever attained to become a great robber.' Looking at the subject in this way, we see that good men do not arise without having the principles of the sages, and that *Kih* could not have pursued his course without the same principles. But the good men in the world are few, and those who are not good are many;—it follows that the sages benefit the world in a few instances and injure it in many. Hence it is that we have the sayings, 'When the lips are gone the teeth are cold¹;' 'The poor wine of *Lû* gave occasion to the siege of *Han-tan*²;' 'When sages are born great robbers arise³.' When the stream is dried, the valley is empty; when the mound is levelled, the deep pool (beside it) is filled up. When the sages have died, the great robbers will not arise; the world would be at peace, and there would be no more troubles. While the sagely men have not died, great robbers will not cease to appear. The more right that is attached to (the views of) the sagely men for the government of the world, the more advantage will accrue to (such men as) the robber *Kih*. If we make for men pecks and bushels

¹ This is an instance of cause and effect naturally happening.

² At a meeting of the princes, presided over by king *Hsüan* of *Khû* (B.C. 369–340), the ruler of *Lû* brought very poor wine for the king, which was presented to him as wine of *Kão*, in consequence of a grudge against that kingdom by his officer of wines. In consequence of this king *Hsüan* ordered siege to be laid to *Han-tan*, the capital of *Kão*. This is an instance of cause and effect occurring irregularly.

³ There seems to be no connexion of cause and effect here; but *Kwang-ze* goes on in his own way to make out that there is such a connexion.

to measure (their wares), even by means of those pecks and bushels should we be teaching them to steal¹; if we make for them weights and steelyards to weigh (their wares), even by means of those weights and steelyards shall we be teaching them to steal. If we make for them tallies and seals to secure their good faith, even by means of those tallies and seals shall we be teaching them to steal. If we make for them benevolence and righteousness to make their doings correct, even by means of benevolence and righteousness shall we be teaching them to steal. How do I know that it is so? Here is one who steals a hook (for his girdle);—he is put to death for it: here is another who steals a state;—he becomes its prince. But it is at the gates of the princes that we find benevolence and righteousness (most strongly) professed;—is not this stealing benevolence and righteousness, sageness and wisdom? Thus they hasten to become great robbers, carry off principedoms, and steal benevolence and righteousness, with all the gains springing from the use of pecks and bushels, weights and steelyards, tallies and seals:—even the rewards of carriages and coronets have no power to influence (to a different course), and the terrors of the axe have no power to restrain in such cases. The giving of so great gain to robbers (like) *K'ih*, and making it impossible to restrain them;—this is the error committed by the sages.

3. In accordance with this it is said, 'Fish should

¹ The verb 'to steal' is here used transitively, and with a hiphil force.

not be taken from (the protection of) the deep waters; the agencies for the profit of a state should not be shown to men¹. But those sages (and their teachings) are the agencies for the profit of the world, and should not be exhibited to it. Therefore if an end were put to sageness and wisdom put away, the great robbers would cease to arise. If jade were put away and pearls broken to bits, the small thieves would not appear. If tallies were burned and seals broken in pieces, the people would become simple and unsophisticated. If pecks were destroyed and steelyards snapped in two, the people would have no wrangling. If the rules of the sages were entirely set aside in the world, a beginning might be made of reasoning with the people. If the six musical accords were reduced to a state of utter confusion, organs and lutes all burned, and the ears of the (musicians like the) blind Khwang² stopped up, all men would begin to possess and employ their (natural) power of hearing. If elegant ornaments were abolished, the five embellishing colours disused, and the eyes of (men like) Li K'ü³ glued up, all men would begin to possess and employ their (natural) power of vision. If the hook and line were destroyed, the compass and square thrown away, and the fingers of men (like) the artful K'zui⁴ smashed, all men would begin to possess and employ their (natural) skill;—as it is said, 'The greatest art is

¹ See the T'ao Teh King, ch. 36. Our author's use of it throws light on its meaning.

² Note 1, p. 186.

³ Note 2, p. 269.

⁴ A skilful maker of arrows of the time of Y'ao,—the Kung-kung of the Sh'ü, II, i, 21; V, xxii, 19.

like stupidity¹. If conduct such as that of 3ǎng (Shǎn)² and Shih (*K'hiû*)³ were discarded, the mouths of Yang (*K'û*)⁴ and Mo (Tî) gagged, and benevolence and righteousness seized and thrown aside, the virtue of all men would begin to display its mysterious excellence. When men possessed and employed their (natural) power of vision, there would be no distortion in the world. When they possessed and employed their (natural) power of hearing, there would be no distractions in the world. When they possessed and employed their (natural) faculty of knowledge, there would be no delusions in the world. When they possessed and employed their (natural) virtue, there would be no depravity in the world. Men like 3ǎng (Shǎn), Shih (*K'hiû*), Yang (*K'û*), Mo (Tî), Shih Khwang (the musician), the artist *K'kui*, and Li *K'û*, all display their qualities outwardly, and set the world in a blaze (of admiration) and confound it;—a method which is of no use!

4. Are you, Sir, unacquainted with the age of perfect virtue? Anciently there were Yung-*k'hang*, Tâ-thing, Po-hwang, Kang-yang, Li-lû, Li-*k'hiû*, Hsien-yüan, Ho-hsü, 3un-lû, *K'û-yung*, Fû-hsî, and Shǎn-nǎng⁵. In their times the people made

¹ The Táo Teh *King*, ch. 45.

² Note 6, p. 269.

³ Note 7, p. 269.

⁴ Note 5, p. 261.

⁵ Of the twelve names mentioned here the reader is probably familiar with those of Fû-hsî and Shǎn-nǎng, the first and second of the Tî in chronology. Hsien-yüan is another name for Hwang-Tî, the third of them. *K'û-yung* was, perhaps, a minister of Hwang-Tî. Ho-hsü has occurred before in Book IV. Of the other seven, five occur among the fifteen sovereigns placed in the 'Compendium

knots on cords in carrying on their affairs. They thought their (simple) food pleasant, and their (plain) clothing beautiful. They were happy in their (simple) manners, and felt at rest in their (poor) dwellings. (The people of) neighbouring states might be able to descry one another; the voices of their cocks and dogs might be heard (all the way) from one to the other; they might not die till they were old; and yet all their life they would have no communication together¹. In those times perfect good order prevailed.

Now-a-days, however, such is the state of things that you shall see the people stretching out their necks, and standing on tiptoe, while they say, 'In such and such a place there is a wise and able man.' Then they carry with them whatever dry provisions they may have left, and hurry towards it, abandoning their parents in their homes, and neglecting the service of their rulers abroad. Their footsteps may be traced in lines from one state to another, and the ruts of their chariot-wheels also for more than a thousand li. This is owing to the error of their superiors in their (inordinate) fondness for knowledge. When those superiors do really love knowledge, but do not follow the (proper) course, the whole world is thrown into great confusion.

How do I know that the case is so? The knowledge shown in the (making of) bows, cross-bows, hand-nets, stringed arrows, and contrivances with springs is great, but the birds are troubled by them

of History' between Fû-hsî and Shăn-năng. The remaining two may be found, I suppose, in the Lû Shih of Lo Pî.

¹ See the eightieth chapter of the Táo Teh King.

above; the knowledge shown in the hooks, baits, various kinds of nets, and bamboo traps is great, but the fishes are disturbed by them in the waters; the knowledge shown in the arrangements for setting nets, and the nets and snares themselves, is great, but the animals are disturbed by them in the marshy grounds. (So), the versatility shown in artful deceptions becoming more and more pernicious, in ingenious discussions as to what is hard and what is white, and in attempts to disperse the dust and reconcile different views, is great, but the common people are perplexed by all the sophistry. Hence there is great disorder continually in the world, and the guilt of it is due to that fondness for knowledge. Thus it is that all men know to seek for the knowledge that they have not attained to; and do not know to seek for that which they already have (in themselves); and that they know to condemn what they do not approve (in others), and do not know to condemn what they have allowed in themselves;—it is this which occasions the great confusion and disorder. It is just as if, above, the brightness of the sun and moon were darkened; as if, beneath, the productive vigour of the hills and streams were dried up; and as if, between, the operation of the four seasons were brought to an end:—in which case there would not be a single weak and wriggling insect, nor any plant that grows up, which would not lose its proper nature. Great indeed is the disorder produced in the world by the love of knowledge. From the time of the three dynasties downwards it has been so. The plain and honest-minded people are neglected, and the plausible representations of restless spirits

received with pleasure; the quiet and unexciting method of non-action is put away, and pleasure taken in ideas garrulously expressed. It is this garrulity of speech which puts the world in disorder.

BOOK XI.

PART II. SECTION IV.

3âi Yû, or 'Letting Be, and Exercising Forbearance'¹

1. I have heard of letting the world be, and exercising forbearance; I have not heard of governing the world. Letting be is from the fear that men, (when interfered with), will carry their nature beyond its normal condition; exercising forbearance is from the fear that men, (when not so dealt with), will alter the characteristics of their nature. When all men do not carry their nature beyond its normal condition, nor alter its characteristics, the good government of the world is secured.

Formerly, Yâo's government of the world made men look joyful; but when they have this joy in their nature, there is a want of its (proper) placidity. The government of the world by Kieh, (on the contrary), made men look distressed; but when their nature shows the symptoms of distress, there is a want of its (proper) contentment. The want of placidity and the want of contentment are contrary to the character (of the nature); and where this obtains, it is impossible that any man or state should anywhere abide long. Are men exceedingly joyful?—the Yang or element of expansion in them is too much developed. Are they exceedingly

¹ See pp. 142, 143.

irritated?—the Yin or opposite element is too much developed. When those elements thus predominate in men, (it is as if¹) the four seasons were not to come (at their proper times), and the harmony of cold and heat were not to be maintained;—would there not result injury to the bodies of men? Men's joy and dissatisfaction are made to arise where they ought not to do so; their movements are all uncertain; they lose the mastery of their thoughts; they stop short midway, and do not finish what they have begun. In this state of things the world begins to have lofty aims, and jealous dislikes, ambitious courses, and fierce animosities, and then we have actions like those of the robber *Kih*, or of *ǰǎng* (*Shǎn*) and *Shih* (*ǰhiû*)². If now the whole world were taken to reward the good it would not suffice, nor would it be possible with it to punish the bad. Thus the world, great as it is, not sufficing for rewards and punishments, from the time of the three dynasties downwards, there has been nothing but bustle and excitement. Always occupied with rewards and punishments, what leisure have men had to rest in the instincts of the nature with which they are endowed?

2. Moreover, delight in the power of vision leads

¹ I supply the 'it is as if,' after the example of the critic *Lû Shû-kih*, who here introduces a 猶 in his commentary (猶四時之氣乖其序云云). What the text seems to state as a fact is only an illustration. Compare the concluding paragraphs in all the Sections and Parts of the fourth Book of the *Lî Kî*.

² Our moral instincts protest against Tâoism which thus places in the same category such sovereigns as *Yáo* and *Kieh*, and such men as the brigand *Kih* and *ǰǎng* and *Shih*.

to excess in the pursuit of (ornamental) colours; delight in the power of hearing, to excess in seeking (the pleasures of) sound; delight in benevolence tends to disorder that virtue (as proper to the nature); delight in righteousness sets the man in opposition to what is right in reason; delight in (the practice of) ceremonies is helpful to artful forms; delight in music leads to voluptuous airs; delight in sageness is helpful to ingenious contrivances; delight in knowledge contributes to fault-finding. If all men were to rest in the instincts of their nature, to keep or to extinguish these eight delights might be a matter of indifference; but if they will not rest in those instincts, then those eight delights begin to be imperfectly and unevenly developed or violently suppressed, and the world is thrown into disorder. But when men begin to honour them, and to long for them, how great is the deception practised on the world! And not only, when (a performance of them) is once over, do they not have done with them, but they prepare themselves (as) with fasting to describe them, they seem to kneel reverentially when they bring them forward, and they go through them with the excitements of music and singing; and then what can be done (to remedy the evil of them)? Therefore the superior man, who feels himself constrained to engage in the administration of the world will find it his best way to do nothing¹. In (that policy of) doing nothing, he can rest in the instincts of the nature with which he is endowed. Hence he who will administer (the government of) the world

¹ Here is the Tâoistic meaning of the title of this Book.

honouring it as he honours his own person, may have that government committed to him, and he who will administer it loving it as he loves his own person, may have it entrusted to him¹. Therefore, if the superior man will keep (the faculties lodged in) his five viscera unemployed, and not display his powers of seeing and hearing, while he is motionless as a representative of the dead, his dragon-like presence will be seen; while he is profoundly silent, the thunder (of his words) will resound; while his movements are (unseen) like those of a spirit, all heavenly influences will follow them; while he is (thus) unconcerned and does nothing, his genial influence will attract and gather all things round him:—what leisure has he to do anything more for the government of the world?

3. *Žhui K'ü*² asked Láo Tan, saying, 'If you do not govern the world, how can you make men's minds good?' The reply was, 'Take care how you meddle with and disturb men's minds. The mind, if pushed about, gets depressed; if helped forward, it gets exalted. Now exalted, now depressed, here it appears as a prisoner, and there as a wrathful fury. (At one time) it becomes pliable and soft, yielding to what is hard and strong; (at another), it is sharp as the sharpest corner, fit to carve or chisel (stone or jade). Now it is hot as a scorching fire, and anon it is cold as ice. It is so swift that while one is bending down and lifting up his head, it shall twice

¹ A quotation, but without any indication that it is so, from the *Táo Teh King*, ch. 13.

² Probably an imaginary personage.

have put forth a soothing hand beyond the four seas. Resting, it is still as a deep abyss; moving, it is like one of the bodies in the sky; in its resolute haughtiness, it refuses to be bound;—such is the mind of man ¹ !'

Anciently, Hwang-Tî was the first to meddle with and disturb the mind of man with his benevolence and righteousness ². After him, Yáo and Shun wore their thighs bare and the hair off the calves of their legs, in their labours to nourish the bodies of the people. They toiled painfully with all the powers in their five viscera at the practice of their benevolence and righteousness; they tasked their blood and breath to make out a code of laws;—and after all they were unsuccessful. On this Yáo sent away Hwan Táu to *Khung* hill, and (the Chiefs of) the Three Miáo to San-wei, and banished the Minister of Works to the Dark Capital; so unequal had they been to cope with the world ³. Then we are carried on to the kings of the Three (dynasties), when the world was in a state of great distraction. Of the lowest type of character there were *Kieh* and *Kih*; of a higher type there were *3ǎng* (Shǎn) and *Shih* (*3hiú*). At the same time there arose the classes of

¹ I must suppose that the words of Láo-3ze stop here, and that what follows is from *Kwang-3ze* himself, down to the end of the paragraph. We cannot have Láo-3ze referring to men later than himself, and quoting from his own Book.

² Hitherto Yáo and Shun have appeared as the first disturbers of the rule of the Táo by their benevolence and righteousness. Here that innovation is carried further back to Hwang-Tî.

³ See these parties, and the way they were dealt with, in the *Shû* King, Part II, Book I, 3. The punishment of them is there ascribed to Shun; but Yáo was still alive, and Shun was acting as his viceroy.

the Literati and the Mohists. Hereupon, complacency in, and hatred of, one another produced mutual suspicions; the stupid and the wise imposed on one another; the good and the bad condemned one another; the boastful and the sincere interchanged their recriminations;—and the world fell into decay. Views as to what was greatly virtuous did not agree, and the nature with its endowments became as if shrivelled by fire or carried away by a flood. All were eager for knowledge, and the people were exhausted with their searchings (after what was good). On this the axe and the saw were brought into play; guilt was determined as by the plumb-line and death inflicted; the hammer and gouge did their work. The world fell into great disorder, and presented the appearance of a jagged mountain ridge. The crime to which all was due was the meddling with and disturbing men's minds. The effect was that men of ability and worth lay concealed at the foot of the crags of mount Thâi, and princes of ten thousand chariots were anxious and terrified in their ancestral temples. In the present age those who have been put to death in various ways lie thick as if pillowed on each other; those who are wearing the cangue press on each other (on the roads); those who are suffering the bastinado can see each other (all over the land). And now the Literati and the Mohists begin to stand, on tiptoe and with bare arms, among the fettered and manacled crowd! Ah! extreme is their shamelessness, and their failure to see the disgrace! Strange that we should be slow to recognise their sageness and wisdom in the bars of the cangue, and their benevolence and righteousness in the rivets of the fetters and handcuffs! How do we know that

3ǎng and Shih are not the whizzing arrows of *Kieh* and *Kih*¹? Therefore it is said, 'Abolish sageness and cast away knowledge, and the world will be brought to a state of great order².'

4. Hwang-Tî had been on the throne for nineteen years³, and his ordinances were in operation all through the kingdom, when he heard that Kwang *Khǎng-ze*⁴ was living on the summit of *Khung-thung*⁵, and went to see him. 'I have heard,' he said, 'that you, Sir, are well acquainted with the perfect *Táo*. I venture to ask you what is the essential thing in it. I wish to take the subtlest influences of heaven and earth, and assist with them the (growth of the) five cereals for the (better) nourishment of the people. I also wish to direct the (operation of the) Yin and Yang, so as to secure the comfort of all living beings. How shall I proceed to accomplish those objects?' Kwang *Khǎng-ze* replied, 'What you wish to ask about is the original substance of all things⁶; what you

¹ Compare this picture of the times after Yáo and Shun with that given by Mencius in III, ii, ch. 9 et al. But the conclusions arrived at as to the causes and cure of their evils by him and our author are very different.

² A quotation, with the regular formula, from the *Táo Teh King*, ch. 19, with some variation of the text.

³ ? in B. C. 2678.

⁴ Another imaginary personage; apparently, a personification of the *Táo*. Some say he was *Láo-ze*,—in one of his early states of existence; others that he was 'a True Man,' the teacher of Hwang-Tî. See Ko Hung's 'Immortals,' I, i.

⁵ Equally imaginary is the mountain *Khung-thung*. Some critics find a place for it in the province of Ho-nan; the majority say it is the highest point in the constellation of the Great Bear.

⁶ The original ether, undivided, out of which all things were formed.

wish to have the direction of is that substance as it was shattered and divided¹. According to your government of the world, the vapours of the clouds, before they were collected, would descend in rain; the herbs and trees would shed their leaves before they became yellow; and the light of the sun and moon would hasten to extinction. Your mind is that of a flatterer with his plausible words;—it is not fit that I should tell you the perfect Tâo.’

Hwang-Tî withdrew, gave up (his government of) the kingdom, built himself a solitary apartment, spread in it a mat of the white mào grass, dwelt in it unoccupied for three months, and then went again to seek an interview with (the recluse). Kwang K’hăng-ze was then lying down with his head to the south. Hwang-Tî, with an air of deferential submission, went forward on his knees, twice bowed low with his face to the ground, and asked him, saying, ‘I have heard that you, Sir, are well acquainted with the perfect Tâo;—I venture to ask how I should rule my body, in order that it may continue for a long time.’ Kwang K’hăng-ze hastily rose, and said, ‘A good question! Come and I will tell you the perfect Tâo. Its essence is (surrounded with) the deepest obscurity; its highest reach is in darkness and silence. There is nothing to be seen; nothing to be heard. When it holds the spirit in its arms in stillness, then the bodily form of itself will become correct. You must be still; you must be pure; not subjecting your body to toil, not agitating your vital force;—then you may live for long. When

¹ The same ether, now in motion, now at rest, divided into the Yin and Yang.

your eyes see nothing, your ears hear nothing, and your mind knows nothing, your spirit will keep your body, and the body will live long. Watch over what is within you, shut up the avenues that connect you with what is external;—much knowledge is pernicious. I (will) proceed with you to the summit of the Grand Brilliance, where we come to the source of the bright and expanding (element); I will enter with you the gate of the Deepest Obscurity, where we come to the source of the dark and repressing (element). There heaven and earth have their controllers; there the Yin and Yang have their Repositories. Watch over and keep your body, and all things will of themselves give it vigour. I maintain the (original) unity (of these elements), and dwell in the harmony of them. In this way I have cultivated myself for one thousand and two hundred years, and my bodily form has undergone no decay¹.

Hwang-Tî twice bowed low with his head to the ground, and said, 'In Kwang *Khăng-ze* we have an example of what is called Heaven².' The other said, 'Come, and I will tell you:—(The perfect Tâo) is something inexhaustible, and yet men all think it has an end; it is something unfathomable, and yet men all think its extreme limit can be reached. He who attains to my Tâo, if he be in a high position, will be one of the August ones, and in a low position, will be a king. He who fails in attaining it, in his highest attainment will see the light, but will

¹ It seems very clear here that the earliest Tâoism taught that the cultivation of the Tâo tended to prolong and preserve the bodily life.

² A remarkable, but not a singular, instance of *Kwang-ze*'s application of the name 'Heaven.'

descend and be of the Earth. At present all things are produced from the Earth and return to the Earth. Therefore I will leave you, and enter the gate of the Unending, to enjoy myself in the fields of the Illimitable. I will blend my light with that of the sun and moon, and will endure while heaven and earth endure. If men agree with my views, I will be unconscious of it; if they keep far apart from them, I will be unconscious of it; they may all die, and I will abide alone¹!

5. Yün K'iang², rambling to the east, having been borne along on a gentle breeze³, suddenly encountered Hung Mung², who was rambling about, slapping his buttocks⁴ and hopping like a bird. Amazed at the sight, Yün K'iang stood reverentially, and said to the other, 'Venerable Sir, who are you? and why are you doing this?' Hung Mung went on slapping his buttocks and hopping like a bird, but replied, 'I am enjoying myself.' Yün K'iang said, 'I

¹ A very difficult sentence, in interpreting which there are great differences among the critics.

² I have preferred to retain Yün K'iang and Hung Mung as if they were the surnames and names of two personages here introduced. Mr. Balfour renders them by 'The Spirit of the Clouds,' and 'Mists of Chaos.' The Spirits of heaven or the sky have still their place in the Sacrificial Canon of China, as 'the Cloud-Master, the Rain-Master, the Baron of the Winds, and the Thunder Master.' Hung Mung, again, is a name for 'the Great Ether,' or, as Dr. Medhurst calls it, 'the Primitive Chaos.'

³ Literally, 'passing by a branch of Fû-yâo;' but we find fû-yâo in Book I, meaning 'a whirlwind.' The term 'branch' has made some critics explain it here as 'the name of a tree,' which is inadmissible. I have translated according to the view of Lû Shû-ñih.

⁴ Or 'stomach,'—according to another reading.

wish to ask you a question.' Hung Mung lifted up his head, looked at the stranger, and said, 'Pooh!' Yün K'iang, however, continued, 'The breath of heaven is out of harmony; the breath of earth is bound up; the six elemental influences¹ do not act in concord; the four seasons do not observe their proper times. Now I wish to blend together the essential qualities of those six influences in order to nourish all living things;—how shall I go about it?' Hung Mung slapped his buttocks, hopped about, and shook his head, saying, 'I do not know; I do not know!'

Yün K'iang could not pursue his question; but three years afterwards, when (again) rambling in the east, as he was passing by the wild of Sung, he happened to meet Hung Mung. Delighted with the rencontre, he hastened to him, and said, 'Have you forgotten me, O Heaven? Have you forgotten me, O Heaven²?' At the same time, he bowed twice with his head to the ground, wishing to receive his instructions. Hung Mung said, 'Wandering listlessly about, I know not what I seek; carried on by a wild impulse, I know not where I am going. I wander about in the strange manner (which you have seen), and see that nothing proceeds without method and order³;—what more should I know?' Yün K'iang replied, 'I also seem carried on by an aimless influence, and yet the people follow me wherever I go. I cannot help their doing so. But now as they thus

¹ Probably, the yin, the yang, wind, rain, darkness, and light;—see *Mayers*, p. 323.

² See *Introduction*, pp. 17, 18.

³ Compare in *Book XXIII*, par. 1.

imitate me, I wish to hear a word from you (in the case).' The other said, 'What disturbs the regular method of Heaven, comes into collision with the nature of things, prevents the accomplishment of the mysterious (operation of) Heaven, scatters the herds of animals, makes the birds all sing at night, is calamitous to vegetation, and disastrous to all insects;—all this is owing, I conceive, to the error of governing men.' 'What then,' said Yün Kiang, 'shall I do?' 'Ah,' said the other, 'you will only injure them! I will leave you in my dancing way, and return to my place.' Yün Kiang rejoined, 'It has been a difficult thing to get this meeting with you, O Heaven! I should like to hear from you a word (more).' Hung Mung said, 'Ah! your mind (needs to be) nourished. Do you only take the position of doing nothing, and things will of themselves become transformed. Neglect your body; cast out from you your power of hearing and sight; forget what you have in common with things; cultivate a grand similarity with the chaos of the plastic ether; unloose your mind; set your spirit free; be still as if you had no soul. Of all the multitude of things every one returns to its root. Every one returns to its root, and does not know (that it is doing so). They all are as in the state of chaos, and during all their existence they do not leave it¹. If

¹ They never show any will of their own.—On the names Yün Kiang and Hung Mung, Lû Shû-kih makes the following remarks:—'These were not men, and yet they are introduced here as questioning and answering each other; showing us that our author frames and employs his surnames and names to serve his own purpose. Those names and the speeches made by the parties are all from him. We must believe that he introduces Confucius, Yáo, and Shun just in the same way.'

they knew (that they were returning to their root), they would be (consciously) leaving it. They do not ask its name; they do not seek to spy out their nature; and thus it is that things come to life of themselves.'

Yün *K'iang* said, 'Heaven, you have conferred on me (the knowledge of) your operation, and revealed to me the mystery of it. All my life I had been seeking for it, and now I have obtained it.' He then bowed twice, with his head to the ground, arose, took his leave, and walked away.

6. The ordinary men of the world¹ all rejoice in men's agreeing with themselves, and dislike men's being different from themselves. This rejoicing and this dislike arise from their being bent on making themselves distinguished above all others. But have they who have this object at heart so risen out above all others? They depend on them to rest quietly (in the position which they desire), and their knowledge is not equal to the multitude of the arts of all those others²! When they wish again to administer a state for its ruler, they proceed to employ all the methods which the kings of the three dynasties considered profitable without seeing the evils of such a course. This is to make the state depend on the peradventure of their luck. But how seldom it is that that peradventure does not issue in the ruin of the state! Not once in ten thousand instances will such men preserve a state. Not once will they succeed, and in more than ten thousand cases will they

¹ Meaning eccentric thinkers not Táoists, like Hui-3ze, Kung-sun Lung, and others.

² The construing and connexion of this sentence are puzzling.

ruin it. Alas that the possessors of territory,—(the rulers of states),—should not know the danger (of employing such men)! Now the possessors of territory possess the greatest of (all) things. Possessing the greatest of all things,—(possessing, that is, men),—they should not try to deal with them as (simply) things. And it is he who is not a thing (himself) that is therefore able to deal with (all) things as they severally require. When (a ruler) clearly understands that he who should so deal with all things is not a thing himself, will he only rule the kingdom? He will go out and in throughout the universe (at his pleasure); he will roam over the nine regions¹, alone in going, alone in coming. Him we call the sole possessor (of this ability); and the sole possessor (of this ability) is what is called the noblest of all.

The teaching of (this) great man goes forth as the shadow from the substance, as the echo responds to the sound. When questioned, he responds, exhausting (from his own stores) all that is in the (enquirer's) mind, as if front to front with all under heaven. His resting-place gives forth no sound; his sphere of activity has no restriction of place. He conducts every one to his proper goal, proceeding to it and bringing him back to it as by his own movement. His movements have no trace; his going forth and his re-enterings have no deviation; his course is like that of the sun without beginning (or ending).

¹ 'The nine regions' generally means the nine provinces into which the Great Yü divided the kingdom. As our author is here describing the grand Tâoist ruler after his fashion in his relation to the universe, we must give the phrase a wider meaning; but I have not met with any attempt to define it.

If you would praise or discourse about his personality, he is united with the great community of existences. He belongs to that great community, and has no individual self. Having no individual self, how should he have anything that can be called his? If you look at those who have what they call their own, they are the superior men of former times; if you look at him who has nothing of the kind, he is the friend of heaven and earth.

7. Mean, and yet demanding to be allowed their free course;—such are Things. Low, and yet requiring to be relied on;—such are the People. Hidden (as to their issues), and yet requiring to be done;—such are Affairs. Coarse, and yet necessary to be set forth;—such are Laws. Remote, and yet necessary to have dwelling (in one's self);—such is Righteousness. Near, and yet necessary to be widely extended;—such is Benevolence. Restrictive, and yet necessary to be multiplied;—such are Ceremonies. Lodged in the centre, and yet requiring to be exalted;—such is Virtue. Always One, and yet requiring to be modified;—such is the Táo. Spirit-like, and yet requiring to be exercised;—such is Heaven¹.

Therefore the sages contemplated Heaven, but did not assist It. They tried to perfect their virtue, but did not allow it to embarrass them. They proceeded according to the Táo, but did not lay any plans. They associated benevolence (with all their doings), but did not rely on it. They pursued right-

¹ All these sentences are understood to show that even in the non-action of the Master of the Táo there are still things he must do.

eousness extensively, but did not try to accumulate it. They responded to ceremonies, but did not conceal (their opinion as to the troublesomeness of them). They engaged in affairs as they occurred, and did not decline them. They strove to render their laws uniform, but (feared that confusion) might arise from them. They relied upon the people, and did not set light by them. They depended on things as their instruments, and did not discard them¹.

They did not think things equal to what they employed them for, but yet they did not see that they could do without employing them. Those who do not understand Heaven are not pure in their virtue. Those who do not comprehend the Tâo have no course which they can pursue successfully. Alas for them who do not clearly understand the Tâo!

What is it that we call the Tâo²? There is the Tâo, or Way of Heaven; and there is the Tâo, or Way of Man. Doing nothing and yet attracting all honour is the Way of Heaven; Doing and being embarrassed thereby is the Way of Man. It is the Way of Heaven that plays the part of the Lord; it is the Way of Man that plays the part of the Servant. The Way of Heaven and the Way of Man are far apart. They should be clearly distinguished from each other.

¹ Antithetic to the previous sentences, and showing that what such a Master does does not interfere with his non-action.

² This question and what follows shows clearly enough that, even with *Kwang-ze*, the character Tâo (道) retained its proper meaning of the Way or Course.

BOOK XII.

PART II. SECTION V.

Thien Tî, or 'Heaven and Earth'¹.

1. Notwithstanding the greatness of heaven and earth, their transforming power proceeds from one lathe; notwithstanding the number of the myriad things, the government of them is one and the same; notwithstanding the multitude of mankind, the lord of them is their (one) ruler². The ruler's (course) should proceed from the qualities (of the Tâo) and be perfected by Heaven³, when it is so, it is called 'Mysterious and Sublime.' The ancients ruled the world by doing nothing;—simply by this attribute of Heaven⁴.

If we look at their words⁵ in the light of the Tâo, (we see that) the appellation for the ruler of the

¹ See pp. 143, 144.

² Implying that that ruler, 'the Son of Heaven,' is only one.

³ 'Heaven' is here defined as meaning 'Non-action, what is of itself (無爲自然);' the teh (德) is the virtue, or qualities of the Tâo;—see the first paragraph of the next Book.

⁴ This sentence gives the thesis, or subject-matter of the whole Book, which the author never loses sight of.

⁵ Perhaps we should translate here, 'They looked at their words,' referring to 'the ancient rulers.' So Gabelentz construes:—'Dem Tâo gemäss betrachteten sie die reden.' The meaning that I have given is substantially the same. The term 'words' occasions a difficulty. I understand it here, with most of the critics, as 稱名之言, 'the words of appellation.'

world¹ was correctly assigned; if we look in the same light at the distinctions which they instituted, (we see that) the separation of ruler and ministers was right; if we look at the abilities which they called forth in the same light, (we see that the duties of) all the offices were well performed; and if we look generally in the same way at all things, (we see that) their response (to this rule) was complete². Therefore that which pervades (the action of) Heaven and Earth is (this one) attribute; that which operates in all things is (this one) course; that by which their superiors govern the people is the business (of the various departments); and that by which aptitude is given to ability is skill. The skill was manifested in all the (departments of) business; those departments were all administered in righteousness; the righteousness was (the outflow of) the natural virtue; the virtue was manifested according to the Tâo; and the Tâo was according to (the pattern of) Heaven.

Hence it is said³, 'The ancients who had the nourishment of the world wished for nothing and the world had enough; they did nothing and all things were transformed; their stillness was abysmal, and the people were all composed.' The Record says⁴, 'When the one (Tâo) pervades it, all business

¹ Meaning, probably, his appellation as Thien 3ze, 'the Son of Heaven.'

² That is, 'they responded to the Tâo,' without any constraint but the example of their rulers.

³ Here there would seem to be a quotation which I have not been able to trace to its source.

⁴ This 'Record' is attributed to Lâo-ze; but we know nothing of it. In illustration of the sentiment in the sentence, the critics

is completed. When the mind gets to be free from all aim, even the Spirits submit.'

2. The Master said¹, 'It is the Tâo that over-spreads and sustains all things. How great It is in Its overflowing influence! The Superior man ought by all means to remove from his mind (all that is contrary to It). Acting without action is what is called Heaven(-like). Speech coming forth of itself is what is called (a mark of) the (true) Virtue. Loving men and benefiting things is what is called Benevolence. Seeing wherein things that are different yet agree is what is called being Great. Conduct free from the ambition of being distinguished above others is what is called being Generous. The possession in himself of a myriad points of difference is what is called being Rich. Therefore to hold fast the natural attributes is what is called the Guiding Line (of government)²; the perfecting of those attributes is what is called its Establishment; accordance with the Tâo is what is called being Complete; and not allowing anything external to affect the will is what is called being Perfect. When the Superior man understands these ten things, he keeps all matters as it were sheathed in himself, showing the greatness of his mind; and through the outflow of his doings, all things move (and come to him). Being such, he lets the gold lie hid in the hill, and the pearls in the deep; he considers not

refer to par. 34 in the fourth Appendix to the Yî King; but it is not to the point.

¹ Who is 'the Master' here? Confucius? or Lâo-ze? I think the latter, though sometimes even our author thus denominates Confucius;—see par. 9.

² ? the Tâo.

property or money to be any gain; he keeps aloof from riches and honours; he rejoices not in long life, and grieves not for early death; he does not account prosperity a glory, nor is ashamed of indigence; he would not grasp at the gain of the whole world to be held as his own private portion; he would not desire to rule over the whole world as his own private distinction. His distinction is in understanding that all things belong to the one treasury, and that death and life should be viewed in the same way¹.

3. The Master said, 'How still and deep is the place where the Tâo resides! How limpid is its purity! Metal and stone without It would give forth no sound. They have indeed the (power of) sound (in them), but if they be not struck, they do not emit it. Who can determine (the qualities that are in) all things?

'The man of kingly qualities holds on his way unoccupied, and is ashamed to busy himself with (the conduct of) affairs. He establishes himself in (what is) the root and source (of his capacity), and his wisdom grows to be spirit-like. In this way his attributes become more and more great, and when his mind goes forth, whatever things come in his way, it lays hold of them (and deals with them). Thus, if there were not the Tâo, the bodily form would not have life, and its life, without the attributes (of the Tâo), would not be manifested. Is not he who preserves the body and gives the fullest development to the life, who establishes the attri-

¹ Balfour :—'The difference between life and death exists no more;' Gabelentz :—'Sterben und Leben haben gleiche Erscheinung.'

butes of the Tâo and clearly displays It, possessed of kingly qualities? How majestic is he in his sudden issuings forth, and in his unexpected movements, when all things follow him!—This we call the man whose qualities fit him to rule.

‘He sees where there is the deepest obscurity; he hears where there is no sound. In the midst of the deepest obscurity, he alone sees and can distinguish (various objects); in the midst of a soundless (abyss), he alone can hear a harmony (of notes). Therefore where one deep is succeeded by a greater, he can people all with things; where one mysterious range is followed by another that is more so, he can lay hold of the subtlest character of each. In this way in his intercourse with all things, while he is farthest from having anything, he can yet give to them what they seek; while he is always hurrying forth, he yet returns to his resting-place; now large, now small; now long, now short; now distant, now near¹.’

4. Hwang-Ti, enjoying himself on the north of the Red-water, ascended to the height of the Khwăn-lun (mountain), and having looked towards the south, was returning home, when he lost his dark-coloured pearl². He employed Wisdom to search for it, but he could not find it. He employed (the clear-sighted) Li Kû to search for it, but he

¹ I can hardly follow the reasoning of Kwang-3ze here. The whole of the paragraph is obscure. I have translated the two concluding characters 修遠, as if they were 遠近, after the example of Lin Hsî-yî, whose edition of Kwang-3ze was first published in 1261.

² Meaning the Tâo. This is not to be got or learned by wisdom, or perspicacity, or man's reasoning. It is instinctive to man, as the Heavenly gift or Truth (天真).

could not find it. He employed (the vehement debater) *K'ieh K'âu*¹ to search for it, but he could not find it. He then employed Purposeless¹, who found it; on which Hwang-Ti said, 'How strange that it was Purposeless who was able to find it!'

5. The teacher of Yáo was Hsü Yü²; of Hsü Yü, Nieh K'üeh²; of Nieh K'üeh, Wang Í²; of Wang Í, Phei-í². Yáo asked Hsü Yü, saying, 'Is Nieh K'üeh fit to be the correlate of Heaven³? (If you think he is), I will avail myself of the services of Wang Í to constrain him (to take my place).' Hsü Yü replied, 'Such a measure would be hazardous, and full of peril to the kingdom! The character of Nieh K'üeh is this;—he is acute, perspicacious, shrewd and knowing, ready in reply, sharp in retort, and hasty; his natural (endowments) surpass those of other men, but by his human qualities he seeks to obtain the Heavenly gift; he exercises his discrimination in suppressing his errors, but he does not know what is the source from which his errors arise. Make him the correlate of Heaven! He would employ the human qualities, so that no regard would be paid to the Heavenly gift. Moreover, he would assign different functions to the different parts of the one person⁴.

¹ The meaning of the characters shows what is the idea emblemated by this name; and so with Hsiang Wang,—'a Semblance,' and 'Nonentity'; = 'Mindless,' 'Purposeless.'

² All these names have occurred, excepting that of Phei-í, who heads Hwang-fü Mí's list of eminent Taoists. We shall meet with him again. He is to be distinguished from Phü-í.

³ 'Match Heaven;' that is, be sovereign below, as Heaven above ruled all.

⁴ We are referred for the meaning of this characteristic to 肝膽楚越, in Bk. V, par. 1.

Moreover, honour would be given to knowledge, and he would have his plans take effect with the speed of fire. Moreover, he would be the slave of everything he initiated. Moreover, he would be embarrassed by things. Moreover, he would be looking all round for the response of things (to his measures). Moreover, he would be responding to the opinion of the multitude as to what was right. Moreover, he would be changing as things changed, and would not begin to have any principle of constancy. How can such a man be fit to be the correlate of Heaven? Nevertheless, as there are the smaller branches of a family and the common ancestor of all its branches, he might be the father of a branch, but not the father of the fathers of all the branches¹. Such government (as he would conduct) would lead to disorder. It would be calamity in one in the position of a minister, and ruin if he were in the position of the sovereign.'

6. Yáo was looking about him at Hwâ², the border-warden of which said, 'Ha! the sage! Let me ask blessings on the sage! May he live long!'

¹ That is, Nieh might be a minister, but could not be the sovereign. The phraseology is based on the rules for the rise of sub-surnames in the same clan, and the consequent division of clans under different ancestors;—see the *Lí K'í*, Bk. XIII, i, 10-14, and XIV, 8.

² 'Hwâ' is evidently intended for the name of a place, but where it was can hardly be determined. The genuineness of the whole paragraph is called in question; and I pass it by, merely calling attention to what the border-warden is made to say about the close of the life of the sage (Táoist), who after living a thousand years, ascends among the Immortals (僊 = 仙), and arrives at the place of God, and is free from the three evils of disease, old age, and death; or as some say, after the Buddhists, water, fire, and wind!

Yâo said, 'Hush!' but the other went on, 'May the sage become rich!' Yâo (again) said, 'Hush!' but (the warden) continued, 'May the sage have many sons!' When Yâo repeated his 'Hush,' the warden said, 'Long life, riches, and many sons are what men wish for;—how is it that you alone do not wish for them?' Yâo replied, 'Many sons bring many fears; riches bring many troubles; and long life gives rise to many obloquies. These three things do not help to nourish virtue; and therefore I wish to decline them.' The warden rejoined, 'At first I considered you to be a sage; now I see in you only a Superior man. Heaven, in producing the myriads of the people, is sure to have appointed for them their several offices. If you had many sons, and gave them (all their) offices, what would you have to fear? If you had riches, and made other men share them with you, what trouble would you have? The sage finds his dwelling like the quail (without any choice of its own), and is fed like the fledgling; he is like the bird which passes on (through the air), and leaves no trace (of its flight). When good order prevails in the world, he shares in the general prosperity. When there is no such order, he cultivates his virtue, and seeks to be unoccupied. After a thousand years, tired of the world, he leaves it, and ascends among the immortals. He mounts on the white clouds, and arrives at the place of God. The three forms of evil do not reach him, his person is always free from misfortune;—what obloquy has he to incur?'

With this the border-warden left him. Yâo followed him, saying, 'I beg to ask—;' but the other said, 'Begone!'

7. When Yáo was ruling the world, Po-*khǎng* 3ze-káo¹ was appointed by him prince of one of the states. From Yáo (afterwards) the throne passed to Shun, and from Shun (again) to Yü; and (then) Po-*khǎng* 3ze-káo resigned his principality and began to cultivate the ground. Yü went to see him, and found him ploughing in the open country. Hurrying to him, and bowing low in acknowledgment of his superiority, Yü then stood up, and asked him, saying, 'Formerly, when Yáo was ruling the world, you, Sir, were appointed prince of a state. He gave his sovereignty to Shun, and Shun gave his to me, when you, Sir, resigned your dignity, and are (now) ploughing (here);—I venture to ask the reason of your conduct.' 3ze-káo said, 'When Yáo ruled the world, the people stimulated one another (to what was right) without his offering them rewards, and stood in awe (of doing wrong) without his threatening them with punishments. Now you employ both rewards and punishments, and the people notwithstanding are not good. Their virtue will from this time decay; punishments will from this time prevail; the disorder of future ages will from this time begin. Why do you, my master, not go away, and not interrupt my work?' With this he resumed his ploughing with his head bent down, and did not (again) look round.

8. In the Grand Beginning (of all things) there was nothing in all the vacancy of space; there was nothing that could be named². It was in this state

¹ Some legends say that this Po-*khǎng* 3ze-káo was a pre-incarnation of Láo-3ze; but this paragraph is like the last, and cannot be received as genuine.

² This sentence is differently understood, according as it is

that there arose the first existence¹;—the first existence, but still without bodily shape. From this things could then be produced, (receiving) what we call their proper character². That which had no bodily shape was divided³; and then without intermission there was what we call the process of conferring⁴. (The two processes) continuing in operation, things were produced. As things were completed, there were produced the distinguishing lines of each, which we call the bodily shape. That shape was the body preserving in it the spirit⁵, and each had its peculiar manifestation, which we call its Nature. When the Nature has been cultivated, it returns to its proper character; and when that has been fully reached, there is the same condition as at the Beginning. That sameness is pure vacancy, and the vacancy is great. It is like the closing of the beak and silencing the singing (of a bird). That closing and silencing is like the union of heaven and earth (at the beginning)⁶. The union, effected, as it

punctuated;—有無無, 有無名, or 有無, 無有無名. Each punctuation has its advocates. For myself, I can only adopt the former; the other is contrary to my idea of Chinese composition. If the author had wished to be understood so, he would have written differently, as, for instance, 無未有名.

¹ Probably, the primary ether, what is called the *Thâi K'ih*.

² This sentence is anticipatory.

³ Into what we call the yin and the yang;—the same ether, now at rest, now in motion.

⁴ The conferring of something more than what was material. By whom or what? By Heaven; the Tâoist understanding by that term the Tâo.

⁵ So then, man consists of the material body and the immaterial spirit.

⁶ The potential heaven and earth, not yet fashioned from the primal ether.

is, might seem to indicate stupidity or darkness, but it is what we call the 'mysterious quality' (existing at the beginning); it is the same as the Grand Submission (to the Natural Course).

9. The Master¹ asked Láo Tan, saying, 'Some men regulate the Táo (as by a law), which they have only to follow;—(a thing, they say,) is admissible or it is inadmissible; it is so, or it is not so. (They are like) the sophists who say that they can distinguish what is hard and what is white as clearly as if the objects were houses suspended in the sky. Can such men be said to be sages²? ' The reply was, 'They are like the busy underlings of a court, who toil their bodies and distress their minds with their various artifices;—dogs, (employed) to their sorrow to catch the yak, or monkeys³ that are brought from their forests (for their tricksiness). *K'hiù*, I tell you this;—it is what you cannot hear, and what you cannot speak of:—Of those who have their heads and feet, and yet have neither minds nor ears, there are multitudes; while of those who have their bodies, and at the same time preserve that which has no bodily form or shape, there are really none. It is not in their movements or stoppages, their dying or living, their falling and rising again, that this is to be found. The regulation of the course lies in (their dealing with) the human element in them. When they have forgotten external things,

¹ This 'Master' is without doubt Confucius.

² The meaning and point of Confucius's question are not clear. Did he mean to object to Láo-tze that all his disquisitions about the Táo as the one thing to be studied and followed were unnecessary?

³ Compare in Bk. VII, par. 4.

and have also forgotten the heavenly element in them, they may be named men who have forgotten themselves. The man who has forgotten himself is he of whom it is said that he has become identified with Heaven¹.

10. At an interview with *K'î K'hêh*², *Kiang-lü Mien*² said to him, 'Our ruler of Lû asked to receive my instructions. I declined, on the ground that I had not received any message³ for him. Afterwards, however, I told him (my thoughts). I do not know whether (what I said) was right or not, and I beg to repeat it to you. I said to him, "You must strive to be courteous and to exercise self-restraint; you must distinguish the public-spirited and loyal, and repress the cringing and selfish;—who among the people will in that case dare not to be in harmony with you?"' *K'î K'hêh* laughed quietly and said, 'Your words, my master, as a description of the right course for a Tî or King, were like the threatening movement of its arms by a mantis which would thereby stop the advance of a carriage;—inadequate to accomplish your object. And moreover, if he guided himself by your directions, it would be as if he were to increase the dangerous height of his towers

¹ Their action is like that of Heaven, silent but most effective, without motive from within or without, simply from the impulse of the Táo.

² These two men are only known by the mention of them here. They must have been officers of Lû, *K'î K'hêh* a member of the great *K'î* or *K'î-sun* family of that state. He would appear also to have been the teacher of the other; if, indeed, they were real personages, and not merely the production of *K'wang-ze's* imagination.

³ That is any lessons or instructions from you, my master, which I should communicate to him.

and add to the number of his valuables collected in them;—the multitudes (of the people) would leave their (old) ways, and bend their steps in the same direction.'

K'iang-lü Mien was awe-struck, and said in his fright, 'I am startled by your words, Master, nevertheless, I should like to hear you describe the influence (which a ruler should exert).' The other said, 'If a great sage ruled the kingdom, he would stimulate the minds of the people, and cause them to carry out his instructions fully, and change their manners; he would take their minds which had become evil and violent and extinguish them, carrying them all forward to act in accordance with the (good) will belonging to them as individuals, as if they did it of themselves from their nature, while they knew not what it was that made them do so. Would such an one be willing to look up to Yáo and Shun in their instruction of the people as his elder brothers? He would treat them as his juniors, belonging himself to the period of the original plastic ether¹. His wish would be that all should agree with the virtue (of that early period), and quietly rest in it.'

11. 3ze-kung had been rambling in the south in *K'ü*, and was returning to 3in. As he passed (a place) on the north of the Han, he saw an old man who was going to work on his vegetable garden. He had dug his channels, gone to the well, and was bringing from it in his arms a jar of water to pour into them. Toiling away, he expended a great deal

¹ The Chinese phrase here is explained by Dr. Williams :—
'A vivifying influence, a vapour or aura producing things.'

of strength, but the result which he accomplished was very small. 3ze-kung said to him, 'There is a contrivance here, by means of which a hundred plots of ground may be irrigated in one day. With the expenditure of a very little strength, the result accomplished is great. Would you, Master, not like (to try it)?' The gardener looked up at him, and said, 'How does it work?' 3ze-kung said, 'It is a lever made of wood, heavy behind, and light in front. It raises the water as quickly as you could do with your hand, or as it bubbles over from a boiler. Its name is a shadoof.' The gardener put on an angry look, laughed, and said, 'I have heard from my teacher that, where there are ingenious contrivances, there are sure to be subtle doings; and that, where there are subtle doings, there is sure to be a scheming mind. But, when there is a scheming mind in the breast, its pure simplicity is impaired. When this pure simplicity is impaired, the spirit becomes unsettled, and the unsettled spirit is not the proper residence of the Táo. It is not that I do not know (the contrivance which you mention), but I should be ashamed to use it.'

(At these words) 3ze-kung looked blank and ashamed; he hung down his head, and made no reply. After an interval, the gardener said to him, 'Who are you, Sir?' 'A disciple of Khung K'hiú,' was the reply. The other continued, 'Are you not the scholar whose great learning makes you comparable to a sage, who make it your boast that you surpass all others, who sing melancholy ditties all by yourself, thus purchasing a famous reputation throughout the kingdom? If you would (only) forget the energy of your spirit, and neglect the care of

your body, you might approximate (to the Tâo). But while you cannot regulate yourself, what leisure have you to be regulating the world? Go on your way, Sir, and do not interrupt my work.'

3ze-kung shrunk back abashed, and turned pale. He was perturbed, and lost his self-possession, nor did he recover it, till he had walked a distance of thirty li. His disciples then said, 'Who was that man? Why, Master, when you saw him, did you change your bearing, and become pale, so that you have been all day without returning to yourself?' He replied to them, 'Formerly I thought that there was but one man¹ in the world, and did not know that there was this man. I have heard the Master say that to seek for the means of conducting his undertakings so that his success in carrying them out may be complete, and how by the employment of a little strength great results may be obtained, is the way of the sage. Now (I perceive that) it is not so at all. They who hold fast and cleave to the Tâo are complete in the qualities belonging to it. Complete in those qualities, they are complete in their bodies. Complete in their bodies, they are complete in their spirits. To be complete in spirit is the way of the sage. (Such men) live in the world in closest union with the people, going along with them, but they do not know where they are going. Vast and complete is their simplicity! Success, gain, and ingenious contrivances, and artful cleverness, indicate (in their opinion) a forgetfulness of the (proper) mind of man. These men will not go where their mind does not carry them, and will do

¹ Confucius.

nothing of which their mind does not approve. Though all the world should praise them, they would (only) get what they think should be loftily disregarded; and though all the world should blame them, they would but lose (what they think) fortuitous and not to be received;—the world's blame and praise can do them neither benefit nor injury. Such men may be described as possessing all the attributes (of the Tâo), while I can only be called one of those who are like the waves carried about by the wind.' When he returned to Lû, (3ze-kung) reported the interview and conversation to Confucius, who said, 'The man makes a pretence of cultivating the arts of the Embryonic Age¹. He knows the first thing, but not the sequel to it. He regulates what is internal in himself, but not what is external to himself. If he had intelligence enough to be entirely unsophisticated, and by doing nothing to seek to return to the normal simplicity, embodying (the instincts of) his nature, and keeping his spirit (as it were) in his arms, so enjoying himself in the common ways, you might then indeed be afraid of him! But what should you and I find in the arts of the embryonic time, worth our knowing?'

12. *Kun Mâng*², on his way to the ocean, met with *Yüan Fung*² on the shore of the eastern sea, and

¹ The 'arts of the Embryonic Age' suggests the idea of the earliest men in their struggles for support; not the Tâo of Heaven in its formation of the universe. But the whole of the paragraph, not in itself uninteresting, is believed to be a spurious introduction, and not the production of *Kwang-3ze*.

² These are not names of men, but like *Yün Kiang* and *Hung Mung* in the fifth paragraph of the last Book. By *Kun Mâng*, it is said, we are to understand 'the great primal ether,' and by *Yüan*

was asked by him where he was going. 'I am going,' he replied, 'to the ocean;' and the other again asked, 'What for?' *Kun Mâng* said, 'Such is the nature of the ocean that the waters which flow into it can never fill it, nor those which flow from it exhaust it. I will enjoy myself, rambling by it.' *Yüan Fung* replied, 'Have you no thoughts about mankind¹? I should like to hear from you about sagely government.' *Kun Mâng* said, 'Under the government of sages, all offices are distributed according to the fitness of their nature; all appointments are made according to the ability of the men; whatever is done is after a complete survey of all circumstances; actions and words proceed from the inner impulse, and the whole world is transformed. Wherever their hands are pointed and their looks directed, from all quarters the people are all sure to come (to do what they desire):—this is what is called government by sages.'

'I should like to hear about (the government of) the kindly, virtuous men²,' (continued *Yüan Fung*). The reply was, 'Under the government of the virtuous, when quietly occupying (their place), they have no thought, and, when they act, they have no anxiety; they do not keep stored (in their minds) what is right and what is wrong, what is good and

Fung, 'the east wind.' Why these should discourse together as they are here made to do, only *Kwang-3ze* himself could tell.

¹ Literally, 'men with their cross eyes;' an appellation for mankind, men having their eyes set across their face more on the same plane than other animals;—an extraordinary application of the characters,' says *Lin Hsî-kung*.

² The text is simply 'virtuous men;' but the reply justifies us in giving the meaning as 'kindly' as well. 德 has often this signification.

what is bad. They share their benefits among all within the four seas, and this produces what is called (the state of) satisfaction; they dispense their gifts to all, and this produces what is called (the state of) rest. (The people) grieve (on their death) like babies who have lost their mothers, and are perplexed like travellers who have lost their way. They have a superabundance of wealth and all necessities, and they know not whence it comes; they have a sufficiency of food and drink, and they know not from whom they get it:—such are the appearances (under the government) of the kindly and virtuous.'

'I should like to hear about (the government of) the spirit-like men,' (continued Yüan Fung once more).

The reply was, 'Men of the highest spirit-like qualities mount up on the light, and (the limitations of) the body vanish. This we call being bright and ethereal. They carry out to the utmost the powers with which they are endowed, and have not a single attribute unexhausted. Their joy is that of heaven and earth, and all embarrassments of affairs melt away and disappear; all things return to their proper nature:—and this is what is called (the state of) chaotic obscurity¹.'

13. Măn Wû-kwei² and *K'ih-kang* Man-k'hi² had been looking at the army of king Wû, when the latter said, 'It is because he was not born in the time of the Lord of Yü³, that therefore he is in-

¹ When no human element had come in to mar the development of the Táo.

² If these be the names of real personages, they must have been of the time of king Wû, about B. C. 1122.

³ Generally understood to mean 'He is not equal to the Lord of

volved in this trouble (of war).' Mǎn Wû-kwei replied, 'Was it when the kingdom was in good order, that the Lord of Yü governed it? or was it after it had become disordered that he governed it?' The other said, 'That the kingdom be in a condition of good order, is what (all) desire, and (in that case) what necessity would there be to say anything about the Lord of Yü? He had medicine for sores; false hair for the bald; and healing for those who were ill:—he was like the filial son carrying in the medicine to cure his kind father, with every sign of distress in his countenance. A sage would be ashamed (of such a thing)¹.

'In the age of perfect virtue they attached no value to wisdom, nor employed men of ability. Superiors were (but) as the higher branches of a tree; and the people were like the deer of the wild. They were upright and correct, without knowing that to be so was Righteousness; they loved one another, without knowing that to do so was Benevolence; they were honest and leal-hearted, without knowing that it was Loyalty; they fulfilled their engagements, without knowing that to do so was Good Faith; in their simple movements they employed the services of one another, without thinking that they were conferring or receiving any gift. Therefore their actions left no trace, and there was no record of their affairs.'

14. The filial son who does not flatter his father,

Yü,' or Shun. The meaning which I have given is that propounded by Hû Wan-ying, and seems to agree better with the general purport of the paragraph.

¹ Ashamed that he had not been able to keep his father from getting sick, and requiring to be thus attended to.

and the loyal minister who does not fawn on his ruler, are the highest examples of a minister and a son. When a son assents to all that his father says, and approves of all that his father does, common opinion pronounces him an unworthy son; when a minister assents to all that his ruler says, and approves of all that his ruler does, common opinion pronounces him an unworthy minister. Nor does any one reflect that this view is necessarily correct¹. But when common opinion (itself) affirms anything and men therefore assent to it, or counts anything good and men also approve of it, then it is not said that they are mere consenters and flatterers;—is common opinion then more authoritative than a father, or more to be honoured than a ruler? Tell a man that he is merely following (the opinions) of another, or that he is a flatterer of others, and at once he flushes with anger. And yet all his life he is merely following others, and flattering them. His illustrations are made to agree with theirs; his phrases are glossed:—to win the approbation of the multitudes. From first to last, from beginning to end, he finds no fault with their views. He will let his robes hang down², display the colours on them, and arrange his movements and bearing, so as to win the favour of his age, and yet not call himself a flatterer. He is but a follower of those others, approving and dis-

¹ We can hardly tell whether this paragraph should be understood as a continuation of *K'ih-tang's* remarks, or as from *Kwang-ze* himself. The meaning here is that every one feels that this opinion is right, without pausing to reason about it.

² See the *Yi King*, Appendix III, ii, 15, where this letting his robes hang down is attributed to Shun. Ought we to infer from this that in this paragraph we have *K'ih-tang* still speaking about and against the common opinion of Shun's superiority to king Wü?

approving as they do, and yet he will not say that he is one of them. This is the height of stupidity.

He who knows his stupidity is not very stupid; he who knows that he is under a delusion is not greatly deluded. He who is greatly deluded will never shake the delusion off; he who is very stupid will all his life not become intelligent. If three men be walking together, and (only) one of them be under a delusion (as to their way), they may yet reach their goal, the deluded being the fewer; but if two of them be under the delusion, they will not do so, the deluded being the majority. At the present time, when the whole world is under a delusion, though I pray men to go in the right direction, I cannot make them do so;—is it not a sad case?

Grand music does not penetrate the ears of villagers; but if they hear 'The Breaking of the Willow,' or 'The Bright Flowers¹,' they will roar with laughter. So it is that lofty words do not remain in the minds of the multitude, and that perfect words are not heard, because the vulgar words predominate. By two earthenware instruments the (music of) a bell will be confused, and the pleasure that it would afford cannot be obtained. At the present time the whole world is under a delusion, and though I wish to go in a certain direction, how can I succeed in doing so? Knowing that I cannot do so, if I were to try to force my way, that would be another delusion. Therefore my best course is to let my purpose go, and no more pursue it. If I do not pursue it, whom shall I have to share in my sorrow²?

¹ The names of two songs, favourites with the common people.

² I shall only feel the more that I am alone without any to sympathise with me, and be the more sad.

If an ugly man¹ have a son born to him at midnight, he hastens with a light to look at it. Very eagerly he does so, only afraid that it may be like himself.

15². From a tree a hundred years old a portion shall be cut and fashioned into a sacrificial vase, with the bull figured on it, which is ornamented further with green and yellow, while the rest (of that portion) is cut away and thrown into a ditch. If now we compare the sacrificial vase with what was thrown into the ditch, there will be a difference between them as respects their beauty and ugliness; but they both agree in having lost the (proper) nature of the wood. So in respect of their practice of righteousness there is a difference between (the robber) *Kih* on the one hand, and *ǰǎng* (*Shǎn*) or *Shih* (*ǰhiú*) on the other; but they all agree in having lost (the proper qualities of) their nature.

Now there are five things which produce (in men) the loss of their (proper) nature. The first is (their fondness for) the five colours which disorder the eye, and take from it its (proper) clearness of vision; the second is (their fondness for) the five notes (of music), which disorder the ear and take from it its

¹ 厲人 should perhaps be translated 'a leper.' The illustration is edited by *Kiáo Hung* and others as a paragraph by itself. They cannot tell whether it be intended to end the paragraph that precedes or to introduce the one that follows.

² This paragraph must be our author's own. *Kih-kang*, of the time of king *Wú*, could not be criticising the schemes of life propounded by *Mo* and *Yang*, whose views were so much later in time. It breathes the animosity of *Láo* and *Kwang* against all schemes of learning and culture, as contrary to the simplicity of life according to the *Táo*.

(proper) power of hearing; the third is (their fondness for) the five odours which penetrate the nostrils, and produce a feeling of distress all over the forehead; the fourth is (their fondness for) the five flavours, which deaden the mouth, and pervert its sense of taste; the fifth is their preferences and dislikes, which unsettle the mind, and cause the nature to go flying about. These five things are all injurious to the life; and now Yang and Mo begin to stretch forward from their different standpoints, each thinking that he has hit on (the proper course for men).

But the courses they have hit on are not what I call the proper course. What they have hit on (only) leads to distress;—can they have hit on what is the right thing? If they have, we may say that the dove in a cage has found the right thing for it. Moreover, those preferences and dislikes, that (fondness for) music and colours, serve but to pile up fuel (in their breasts); while their caps of leather, the bonnet with kingfishers' plumes, the memorandum tablets which they carry, and their long girdles, serve but as restraints on their persons. Thus inwardly stuffed full as a hole for fuel, and outwardly fast bound with cords, when they look quietly round from out of their bondage, and think they have got all they could desire, they are no better than criminals whose arms are tied together, and their fingers subjected to the screw, or than tigers and leopards in sacks or cages, and yet thinking that they have got (all they could wish).

BOOK XIII.

PART II. SECTION VI.

Thien Táo, or 'The Way of Heaven'.¹

1. The Way of Heaven operates (unceasingly), and leaves no accumulation² (of its influence) in any particular place, so that all things are brought to perfection by it; so does the Way of the Tís operate, and all under the sky turn to them (as their directors); so also does the Way of the Sages operate, and all within the seas submit to them. Those who clearly understand (the Way of) Heaven, who are in sympathy with (that of) the sages, and familiar through the universe and in the four quarters (of the earth) with the work of the Tís and the kings, yet act spontaneously from themselves:—with the appearance of being ignorant they are yet entirely still.

The stillness of the sages does not belong to them as a consequence of their skilful ability³; all things are not able to disturb their minds;—it is on this account that they are still. When water is still, its clearness shows the beard and eyebrows (of him

¹ See pp. 144, 145.

² That is, its operation is universal. The Chinese critics generally explain 'accumulation' here by 'rest,' which is not quite the idea.

³ Such is the meaning here of the 善, as in the Táo Teh King, chaps. 2, 8, and often.

who looks into it). It is a perfect Level¹, and the greatest artificer takes his rule from it. Such is the clearness of still water, and how much greater is that of the human Spirit! The still mind of the sage is the mirror of heaven and earth, the glass of all things.

Vacancy, stillness, placidity, tastelessness, quietude, silence, and non-action ;—this is the Level of heaven and earth, and the perfection of the Tão and its characteristics². Therefore the Tis, Kings, and Sages found in this their resting-place³. Resting here, they were vacant ; from their vacancy came fullness ; from their fullness came the nice distinctions (of things). From their vacancy came stillness ; that stillness was followed by movement ; their movements were successful. From their stillness came their non-action. Doing-nothing, they devolved the cares of office on their employés. Doing-nothing was accompanied by the feeling of satisfaction. Where there is that feeling of satisfaction, anxieties and troubles find no place ; and the years of life are many.

Vacancy, stillness, placidity, tastelessness, quietude, silence, and doing-nothing are the root of all things. When this is understood, we find such a ruler on the throne as Yáo, and such a minister as Shun. When with this a high position is occupied, we find the attributes of the Tis and kings,—the sons of Heaven ; with this in a low position, we find the mysterious

¹ 準 here, is contracted in many editions into 准, which some have mistaken for 淮.

² Such are the natural characteristics of the Tãoistic mind.

³ Implying cessation from all thought and purpose.

sages, the uncrowned kings, with their ways. With this retiring (from public life), and enjoying themselves at leisure, we find the scholars who dwell by the rivers and seas, among the hills and forests, all submissive to it; with this coming forward to active life and comforting their age, their merit is great, and their fame is distinguished;—and all the world becomes united in one.

2. (Such men) by their stillness become sages; and by their movement, kings. Doing-nothing, they are honoured; in their plain simplicity, no one in the world can strive with them (for the palm of) excellence. The clear understanding of the virtue of Heaven and Earth is what is called 'The Great Root,' and 'The Great Origin; '—they who have it are in harmony with Heaven, and so they produce all equable arrangements in the world;—they are those who are in harmony with men. Being in harmony with men is called the Joy of men; being in harmony with Heaven is called the Joy of Heaven. *Kwang-ze* said, 'My Master! my Master! He shall hash and blend all things in mass without being cruel; he shall dispense his favours to all ages without being benevolent. He is older than the highest antiquity, and yet is not old. He overspreads the heavens and sustains the earth; from him is the carving of all forms without any artful skill¹! This is what is called the Joy of Heaven. Hence it is said, "Those who know the Joy of Heaven during their life, act like Heaven, and at death undergo transformation like (other) things²; in their stillness

¹ Compare in Bk. VI, pars. 13 and 7.

² They do not cease to be, but only become transformed or changed.

they possess the quality of the Yin, and in their movement they flow abroad as the Yang. Therefore he who knows the Joy of Heaven has no murmuring against Heaven, nor any fault-finding with men; and suffers no embarrassment from things, nor any reproof from ghosts. Hence it is said, 'His movements are those of Heaven; his stillness is that of Earth; his whole mind is fixed, and he rules over the world. The spirits of his dead do not come to scare him; he is not worn out by their souls. His words proceeding from his vacancy and stillness, yet reach to heaven and earth, and show a communication with all things:—this is what is called the Joy of Heaven. This Joy of Heaven forms the mind of the sage whereby he nurtures all under the sky¹.'''

3. It was the Way² of the Tis and Kings to regard Heaven and Earth as their Author, the Tão and its characteristics as their Lord, and Doing-nothing as their constant rule. Doing-nothing, they could use the whole world in their service and might have done more; acting, they were not sufficient for the service required of them by the world. Hence the men of old held non-inaction in honour. When superiors do nothing and their inferiors also do nothing, inferiors and superiors possess the same virtue; and when inferiors and superiors possess the same virtue, there are none to act as ministers. When inferiors act, and their superiors also act, then superiors and inferiors possess the same Tão; and when superiors and inferiors possess the same

¹ I suppose that from 'It is said' to this is all quotation, but from what book we do not know.

² 'The virtue,' or attribute; = the way.

Tão, there is none to preside as Lord. But that the superiors do nothing and yet thereby use the world in their service, and that the inferiors, while acting, be employed in the service of the world, is an unchangeable principle. Therefore the ancient kings who presided over the world, though their knowledge embraced (all the operations of) Heaven and Earth, took no thought of their own about them; though their nice discrimination appreciated the fine fashioning of all things, they said not a word about it; though their power comprehended all within the seas, they did nothing themselves. Heaven produces nothing, yet all things experience their transformations; Earth effects no growth, yet all things receive their nurture; the Tis and Kings did nothing, yet all the world testified their effective services. Hence it is said, 'There is nothing more spirit-like than Heaven; there is nothing richer than Earth; there are none greater than the Tis and Kings.' Hence it is said (further), 'The attributes of the Tis and kings corresponded to those of Heaven and Earth.' It was thus that they availed themselves of (the operations of) Heaven and Earth, carried all things on unceasingly (in their courses), and employed the various classes of men in their service.

4. Originating belongs to those in the higher position; details (of work) to those who are in the lower. The compendious decision belongs to the lord; the minutiae of execution, to his ministers. The direction of the three hosts¹ and their men with the five weapons² is but a trifling quality; rewards

¹ 'Three hosts' constituted the military force of one of the largest states.

² The bow, the club, the spear, the lance, the javelin. Other

and penalties with their advantages and sufferings, and the inflictions of the five punishments¹ are but trivial elements of instruction; ceremonies, laws, measures, and numbers, with all the minutiae of jurisprudence², are small matters in government; the notes of bells and drums, and the display of plumes and flags are the slightest things in music, and the various grades of the mourning garments are the most unimportant manifestations of grief. These five unimportant adjuncts required the operation of the excited spirit and the employment of the arts of the mind, to bring them into use. The men of old had them indeed, but they did not give them the first place.

The ruler precedes, and the minister follows; the father precedes, and the son follows; the elder brother precedes, and the younger follows; the senior precedes, and the junior follows; the male precedes, and the female follows; the husband precedes, and the wife follows.

This precedence of the more honourable and sequence of the meaner is seen in the (relative) action of heaven and earth, and hence the sages took them as their pattern. The more honourable position of heaven and the lower one of earth are equivalent to a designation of their spirit-like and intelligent qualities. The precedence of spring and summer and the sequence of autumn and winter mark the

enumerations of them are given. See the 'Officers of *Kâu*,' Bk. XXXII.

¹ Branding, cutting off the nose, cutting off the feet, castration, death.

² I read here 刑 (not 形) 名.

order of the four seasons. In the transformations and growth of all things, every bud and feature has its proper form ; and in this we have their gradual maturing and decay, the constant flow of transformation and change. Thus since Heaven and Earth, which are most spirit-like, are distinguished as more honourable and less, and by precedence and sequence, how much more must we look for this in the ways of men ! In the ancestral temple it is to kinship that honour is given ; in court, to rank ; in the neighbourhoods and districts, to age ; in the conduct of affairs, to wisdom ; such is the order in those great ways. If we speak of the course (to be pursued in them), and do not observe their order, we violate their course. If we speak of the course, and do not observe it, why do we apply that name to it ?

5. Therefore the ancients who clearly understood the great Tâo first sought to apprehend what was meant by Heaven¹, and the Tâo and its characteristics came next. When this was apprehended, then came Benevolence and Righteousness. When these were apprehended, then came the Distinction of duties and the observance of them. This accomplished, there came objects and their names. After objects and their names, came the employment of men according to their qualities: on this there followed the examination of the men and of their work. This led to the approval or disapproval of them, which again was succeeded by the apportioning of rewards and penalties. After this the stupid and the intelligent understood what was required of them, and the honourable and the mean occupied their several posi-

¹ The meaning, probably, is 'spontaneity.'

tions. The good and the able, and those inferior to them, sincerely did their best. Their ability was distributed; the duties implied in their official names were fulfilled. In this way did they serve their superiors, nourish their inferiors, regulate things, and cultivate their persons. They did not call their knowledge and schemes into requisition; they were required to fall back upon (the method of) Heaven:—this was what is called the Perfection of the Rule of Great Peace. Hence it is said in the Book ¹, ‘There are objects and there are their names.’ Objects and their names the ancients had; but they did not put them in the foremost place.

When the ancients spoke of the Great Tâo, it was only after four other steps that they gave a place to ‘Objects and their Names,’ and after eight steps that they gave a place to ‘Rewards and Penalties.’ If they had all at once spoken of ‘Objects and their Names,’ they would have shown an ignorance of what is the Root (of government); if they had all at once spoken of ‘Rewards and Penalties,’ they would have shown an ignorance of the first steps of it. Those whose words are thus an inversion of the (proper) course, or in opposition to it, are (only fit to be) ruled by others;—how can they rule others? To speak all at once of ‘Objects and their Names,’ and of ‘Rewards and Penalties,’ only shows that the speaker knows the instruments of government, but does not know the method of it, is fit to be used as an instrument in the world, but not fit to use others as his instruments:—he is what we call a mere sophist, a man of one small idea.

¹ We cannot tell what book or books.

Ceremonies, laws, numbers, measures, with all the minutiae of jurisprudence, the ancients had ; but it is by these that inferiors serve their superiors ; it is not by them that those superiors nourish the world.

6. Anciently, Shun asked Yâo, saying, 'In what way does your Majesty by the Grace of Heaven¹ exercise your mind?' The reply was, 'I simply show no arrogance towards the helpless ; I do not neglect the poor people ; I grieve for those who die ; I love their infant children ; and I compassionate their widows.' Shun rejoined, 'Admirable, as far as it goes ; but it is not what is Great.' 'How then,' asked Yâo, 'do you think I should do?' Shun replied, 'When (a sovereign) possesses the virtue of Heaven, then when he shows himself in action, it is in stillness. The sun and moon (simply) shine, and the four seasons pursue their courses. So it is with the regular phenomena of day and night, and with the movement of the clouds by which the rain is distributed.' Yâo said, 'Then I have only been persistently troubling myself ! What you wish is to be in harmony with Heaven, while I wish to be in harmony with men.' Now (the Way of) Heaven and Earth was much thought of of old, and Hwang-Ti, Yâo, and Shun united in admiring it. Hence the kings of the world of old did nothing, but tried to imitate that Way.

7. Confucius went to the west to deposit (some) writings in the library of K'âu², when 3ze-lû coun-

¹ So, in the 'Spring and Autumn' Chronicle, the rightful reigning sovereign is ordinarily designated, 'Heaven's King.' It is not a Tâoistic mode of speaking of him.

² It is supposed that Confucius, disappointed by his want of

sold him, saying, 'I have heard that the officer in charge of this *K'ang*¹ Repository of *K'au* was one *L'ao Tan*, who has given up his office, and is living in his own house. As you, Master, wish to deposit these writings here, why not go to him, and obtain his help (to accomplish your object)².' Confucius said, 'Good;' and he went and saw *L'ao Tan*, who refused his assistance. On this he proceeded to give an abstract of the Twelve Classics³ to bring the other over to his views⁴. *L'ao Tan*, however, interrupted him while he was speaking, and said, 'This is too vague; let me hear the substance of them in brief.' Confucius said, 'The substance of them is occupied with Benevolence and Righteousness.' The other said, 'Let me ask whether you consider Benevolence and Righteousness to constitute the nature of man?' 'I do,' was the answer. 'If the superior man be not benevolent, he will not fulfil his character; if he be not righteous, he might as well not have been born. Benevolence and Righteousness are truly the nature of man.' *L'ao Tan* continued, 'Let me ask you what you mean by Benevolence and Righteousness.' Confucius said, 'To be in one's inmost heart in kindly sympathy

success, wished to deposit the writings or books which he prized so much in the Royal Library, that they might not be lost, and be available for some future teacher, more fortunate than himself.

¹ The name of the Royal Library (徵); meaning, perhaps, 'Approved.'

² That is, help him to get his books deposited in the Library.

³ Meaning, perhaps, the 'Spring and Autumn,' containing a chronicle of twelve marquises of *L'û*. We know of no collection in the time of Confucius which could be styled the 'Twelve Classics.'

⁴ 說 is to be read shui.

with all things; to love all men; and to allow no selfish thoughts;—this is the nature of Benevolence and Righteousness.’ Lâu Tan exclaimed, ‘Ah! you almost show your inferiority by such words! “To love all men!” is not that vague and extravagant? “To be seeking to allow no selfish thoughts!”—that is selfishness¹! If you, Master, wish men not to be without their (proper) shepherding, think of Heaven and Earth, which certainly pursue their invariable course; think of the sun and moon, which surely maintain their brightness; think of the stars in the zodiac, which preserve their order and courses; think of birds and beasts, which do not fail to collect together in their flocks and herds; and think of the trees, which do not fail to stand up (in their places). Do you, Master, imitate this way and carry it into practice; hurry on, following this course, and you will reach your end. Why must you further be vehement in putting forward your Benevolence and Righteousness, as if you were beating a drum, and seeking a fugitive son, (only making him run away the more)? Ah! Master, you are introducing disorder into the nature of man!’

8. Shih-khăng K’hi², having an interview with Lâu-tze, asked him, saying, ‘I heard, Master, that you were a sage, and I came here, wishing to see you, without grudging the length of the journey. During the stages of the hundred days, the soles of my feet became quite callous, but I did not dare to stop and rest. Now I perceive that you are not

¹ The unselfishness was not spontaneous.

² We know nothing of this personage, but what is related here; nor does the whole paragraph serve to advance the argument of the Book.

a sage. Because there was some rice left about the holes of the rats, you sent away your younger sister, which was unkind; when your food, whether raw or cooked, remains before you not all consumed, you keep on hoarding it up to any extent¹. Lâu-ze looked indifferent, and gave him no answer.

Next day *Khi* again saw Lâu-ze, and said, 'Yesterday I taunted you; but to-day I have gone back to a better mood of mind. What is the cause (of the change)²?' Lâu-ze replied, 'I consider that I have freed myself from the trammels of claiming to be artfully knowing, spirit-like, and sage. Yesterday if you had called me an ox, you might have done so; or if you had called me a horse, you might have done so³. If there be a reality (corresponding to men's ideas), and men give it a name, which another will not receive, he will in the sequel suffer the more. My manner was what I constantly observe;—I did not put it on for the occasion.'

Shih-khăng *Khi* sidled away out of Lâu's shadow; then he retraced his steps, advanced forward, and asked how he should cultivate himself. The reply was, 'Your demeanour is repelling; you stare with your eyes; your forehead is broad and yet tapering; you bark and growl with your mouth; your appearance is severe and pretentious; you are like a horse held by its tether, you would move, but are restrained, and (if let go) would start off like an

¹ These seem strange charges to bring against Lâu-ze, and no light is thrown on them from other sources.

² The change had been produced by the demeanour of Lâu-ze; the other could not tell how. Other explanations of the question are given by some of the critics.

³ Compare in the first paragraph of Book VII.

arrow from a bow; you examine all the minutiae of a thing; your wisdom is artful, and yet you try to look at ease. All these are to be considered proofs of your want of sincerity. If on the borders one were to be found with them, he would be named a Thief.'

9. The Master¹ said, 'The Táo does not exhaust itself in what is greatest, nor is it ever absent from what is least; and therefore it is to be found complete and diffused in all things. How wide is its universal comprehension! How deep is its unfathomableness! The embodiment of its attributes in benevolence and righteousness is but a small result of its spirit-like (working); but it is only the perfect man who can determine this. The perfect man has (the charge of) the world;—is not the charge great? and yet it is not sufficient to embarrass him. He wields the handle of power over the whole world, and yet it is nothing to him. His discrimination detects everything false, and no consideration of gain moves him. He penetrates to the truth of things, and can guard that which is fundamental. So it is that heaven and earth are external to him, and he views all things with indifference, and his spirit is never straitened by them. He has comprehended the Táo, and is in harmony with its characteristics; he pushes back benevolence and righteousness (into their proper place), and deals with ceremonies and music as (simply) guests:—yes, the mind of the perfect man determines all things aright.'

¹ No doubt, Láo-ze. In the 'Complete Works of the Ten Philosophers,' the text is 老子 and not 夫子.

10. What the world thinks the most valuable exhibition of the Tâo is to be found in books. But books are only a collection of words. Words have what is valuable in them;—what is valuable in words is the ideas they convey. But those ideas are a sequence of something else;—and what that something else is cannot be conveyed by words. When the world, because of the value which it attaches to words, commits them to books, that for which it so values them may not deserve to be valued;—because that which it values is not what is really valuable.

Thus it is that what we look at and can see is (only) the outward form and colour, and what we listen to and can hear is (only) names and sounds. Alas! that men of the world should think that form and colour, name and sound, should be sufficient to give them the real nature of the Tâo. The form and colour, the name and sound, are certainly not sufficient to convey its real nature; and so it is that 'the wise do not speak and those who do speak are not wise.' How should the world know that real nature?

Duke Hwan¹, seated above in his hall, was (once) reading a book, and the wheelwright Phien was making a wheel below it². Laying aside his hammer and chisel, Phien went up the steps, and said, 'I venture to ask your Grace what words you are reading?' The duke said, 'The words of the sages.' 'Are those sages alive?' Phien con-

¹ No doubt, duke Hwan of K'hi, the first of the five presiding chiefs of the K'au dynasty.

² See in Mencius I, i, vii, 4 a similar reference to the hall and the courtyard below it.

tinued. 'They are dead,' was the reply. 'Then,' said the other, 'what you, my Ruler, are reading are only the dregs and sediments of those old men.' The duke said, 'How should you, a wheelwright, have anything to say about the book which I am reading? If you can explain yourself, very well; if you cannot, you shall die!' The wheelwright said, 'Your servant will look at the thing from the point of view of his own art. In making a wheel, if I proceed gently, that is pleasant enough, but the workmanship is not strong; if I proceed violently, that is toilsome and the joinings do not fit. If the movements of my hand are neither (too) gentle nor (too) violent, the idea in my mind is realised. But I cannot tell (how to do this) by word of mouth;—there is a knack in it. I cannot teach the knack to my son, nor can my son learn it from me. Thus it is that I am in my seventieth year, and am (still) making wheels in my old age¹. But these ancients, and what it was not possible for them to convey, are dead and gone :—so then what you, my Ruler, are reading is but their dregs and sediments!'

¹ Compare the story in Book III about the ruler Wăn-hui and his butcher; and other passages.

BOOK XIV.

PART II. SECTION VII.

Thien Yün, or 'The Revolution of Heaven'.¹

1. How (ceaselessly) heaven revolves! How (constantly) earth abides at rest! And do the sun and moon contend about their (respective) places? Who presides over and directs these (things)? Who binds and connects them together? Who is it that, without trouble or exertion on his part, causes and maintains them? Is it, perhaps, that there is some secret spring, in consequence of which they cannot be but as they are? Or is it, perhaps, that they move and turn as they do, and cannot stop of themselves?

(Then) how the clouds become rain! And how the rain again forms the clouds! Who diffuses them so abundantly? Who is it that, without trouble or exertion on his part, produces this elemental enjoyment, and seems to stimulate it?

The winds rise in the north; one blows to the west, and another to the east; while some rise upwards, uncertain in their direction. By whose breathing are they produced? Who is it that, without any trouble and exertion of his own, effects all their undulations? I venture to ask their cause².

¹ See pp. 145, 146.

² Down to this we have a description of the phenomena of heaven and earth and of nature generally as proceeding regularly

Wû-hsien Thiáo¹ said, 'Come, and I will tell you. To heaven there belong the six Extreme Points, and the five Elements². When the Tîs and Kings acted in accordance with them, there was good government; when they acted contrary to them, there was evil. Observing the things (described) in the nine divisions (of the writing) of Lo³, their government was perfected and their virtue was complete. They inspected and enlightened the kingdom beneath them, and all under the sky acknowledged and sustained them. Such was the condition under the august (sovereigns⁴) and those before them.'

2. Tang⁵, the chief administrator of Shang⁵, asked Kwang-ze about Benevolence⁶, and the answer was, 'Wolves and tigers are benevolent.' 'What do you mean?' said Tang. Kwang-ze replied, 'Father and son (among them) are affectionate to one another. Why should they be considered as not bene-

and noiselessly, without any apparent cause; which is the chief subject of the Book. As the description is not assigned to any one, we must suppose it to be from Kwang-ze himself; and that it is he who asks the question in the last three characters.

¹ This is said by the critics to have been a minister of the Shang dynasty, under Thái-mâu in the seventeenth century B.C.; but even Kwang-ze would hardly so violate the unity of time.

² Generally means 'the Five Regular Virtues;' supposed to mean here 'the Five Elements.'

³ Probably the 'Nine Divisions of the Great Plan,' in the Shû King, V, iv, fancied to be derived from the writing, which a tortoise from the Lo river exhibited to the great Yü.

⁴ Possibly Fû-hsî, Shăn Năng, and Hwang-Tî.

⁵ 'Shang' must be taken as the duchy of Sung, assigned by king Wû to the representative of the kings of the dynasty of Shang. 'Tang' would be a principal minister of it in the time of Kwang-ze.

⁶ The chief of all the virtues according to Confucianism.

volent?' 'Allow me to ask about perfect benevolence,' pursued the other. *Kwáng-3ze* said, 'Perfect benevolence¹ does not admit (the feeling) of affection.' The minister said, 'I have heard that, without (the feeling of) affection there is no love, and without love there is not filial duty;—is it permissible to say that the perfectly benevolent are not filial?' *Kwáng-3ze* rejoined, 'That is not the way to put the case. Perfect Benevolence is the very highest thing;—filial duty is by no means sufficient to describe it. The saying which you quote is not to the effect that (such benevolence) transcends filial duty;—it does not refer to such duty at all. One, travelling to the south, comes (at last) to Ying², and there, standing with his face to the north, he does not see mount Ming³. Why does he not see it? Because he is so far from it. Hence it is said, "Filial duty as a part of reverence is easy, but filial duty as a part of love is difficult. If it be easy as a part of love, yet it is difficult to forget⁴ one's parents. It may be easy for me to forget my parents, but it is difficult to make my parents forget me. If it were easy to make my parents forget me, it is difficult for me to forget all men in the world. If it were easy to forget all men in the world, it is difficult to make them all forget me."

'This virtue might make one think light of Yáo and Shun, and not wish to be they⁵. The profit

¹ A denomination here for the Táo, employed by *Kwáng-3ze* for the purpose of his argument.

² The capital of the state of *K'áu* in the south.

³ Name of a hill in the extreme north.

⁴ The Táo requires such forgetfulness on the part of both giver and receiver; it is a part of its 'doing-nothing.'

⁵ I think this is the meaning.

and beneficial influences of it extend to a myriad ages, and no one in the world knows whence they come. How can you simply heave a great sigh, and speak (as you do) of benevolence and filial duty? Filial duty, fraternal respect, benevolence, righteousness, loyalty, sincerity, firmness, and purity;—all these may be pressed into the service of this virtue, but they are far from sufficient to come up to it. Therefore it is said, “To him who has what is most noble¹, all the dignities of a state are as nothing²; to him who has what is the greatest riches, all the wealth of a state is as nothing; to him who has all that he could wish, fame and praise are as nothing.” It is thus that the Tâo admits of no substitute.’

3. Pei-măn *Khăng*³ asked Hwang-Ti, saying, ‘You were celebrating, O Ti, a performance of the music of the Hsien-*khih*⁴, in the open country near the Thung-thing lake. When I heard the first part of it, I was afraid; the next made me weary; and the last perplexed me. I became agitated and unable to speak, and lost my self-possession.’ The Ti said, ‘It was likely that it should so affect you! It was performed with (the instruments of) men, and all attuned according to (the influences of) Heaven. It

¹ The Tâo.

² This free version takes 并 as = 屏. So the Khang-hsi dictionary explains it.

³ Only heard of, so far as I know, in this passage.

⁴ The name of Hwang-Ti’s music; I do not venture to translate it. In his elaborate description of it, our author intended to give an idea of the Tâo, and the effect which the study of it was calculated to produce on the mind; as appears from the concluding sentence of the paragraph.

proceeded according to (the principles of) propriety and righteousness, and was pervaded by (the idea of) the Grand Purity.

‘The Perfect Music first had its response in the affairs of men, and was conformed to the principles of Heaven; it indicated the action of the five virtues, and corresponded to the spontaneity (apparent in nature). After this it showed the blended distinctions of the four seasons, and the grand harmony of all things;—the succession of those seasons one after another, and the production of things in their proper order. Now it swelled, and now it died away, its peaceful and military strains clearly distinguished and given forth. Now it was clear, and now rough, as if the contracting and expanding of the elemental processes blended harmoniously (in its notes). Those notes then flowed away in waves of light, till, as when the hibernating insects first begin to move, I commanded the terrifying crash of thunder. Its end was marked by no formal conclusion, and it began again without any prelude. It seemed to die away, and then it burst into life; it came to a close, and then it rose again. So it went on regularly and inexhaustibly, and without the intervention of any pause:—it was this which made you afraid.

‘In the second part (of the performance), I made it describe the harmony of the Yin and Yang, and threw round it the brilliance of the sun and moon. Its notes were now short and now long, now soft and now hard. Their changes, however, were marked by an unbroken unity, though not dominated by a fixed regularity. They filled every valley and ravine; you might shut up every crevice, and guard your spirit (against their entrance), yet

there was nothing but gave admission to them. Yea, those notes resounded slowly, and might have been pronounced high and clear. Hence the shades of the dead kept in their obscurity; the sun and moon, and all the stars of the zodiac, pursued their several courses. I made (my instruments) leave off, when (the performance) came to an end, and their (echoes) flowed on without stopping. You thought anxiously about it, and were not able to understand it; you looked for it, and were not able to see it; you pursued it, and were not able to reach it. All-amazed, you stood in the way all open around you, and then you leant against an old rotten dryandra-tree and hummed. The power of your eyes was exhausted by what you wished to see; your strength failed in your desire to pursue it, while I myself could not reach it. Your body was but so much empty vacancy while you endeavoured to retain your self-possession¹:—it was that endeavour which made you weary.

‘In the last part (of the performance), I employed notes which did not have that wearying effect. I blended them together as at the command of spontaneity. Hence they came as if following one another in confusion, like a clump of plants springing from one root, or like the music of a forest produced by no visible form. They spread themselves all around without leaving a trace (of their cause); and seemed to issue from deep obscurity where there was no sound. Their movements came from nowhere; their home was in the deep darkness;—

¹ See the usage of the two characters 委蛇 in the Shih King, I, ii, Ode 3.

conditions which some would call death, and some life ; some, the fruit, and some, (merely) the flower. Those notes, moving and flowing on, separating and shifting, and not following any regular sounds, the world might well have doubts about them, and refer them to the judgment of a sage, for the sages understand the nature of this music, and judge in accordance with the prescribed (spontaneity). While the spring of that spontaneity has not been touched, and yet the regulators of the five notes are all prepared ;—this is what is called the music of Heaven, delighting the mind without the use of words. Hence it is said in the eulogy of the Lord of Pião¹, “You listen for it, and do not hear its sound ; you look for it, and do not perceive its form ; it fills heaven and earth ; it envelopes all within the universe.” You wished to hear it, but could not take it in ; and therefore you were perplexed.

‘I performed first the music calculated to awe ; and you were frightened as if by a ghostly visitation. I followed it with that calculated to weary ; and in your weariness you would have withdrawn. I concluded with that calculated to perplex ; and in your perplexity you felt your stupidity. But that stupidity is akin to the Tão ; you may with it convey the Tão in your person, and have it (ever) with you.’

4. When Confucius was travelling in the west in Wei, Yen Yüan asked the music-master *Kin*², say-

¹ Some sovereign of antiquity, of whom it is difficult to find any other mention but this. Even in the *Lû Shih* I have not discovered him. The name is said to be pronounced Pião ; in which case it should consist of three 犬, and not of three 火.

² Only heard of here.

ing, 'How is it, do you think, with the course of the Master?' The music-master replied, 'Alas! it is all over with your Master!' 'How so?' asked Yen Yüan; and the other said, 'Before the grass-dogs¹ are set forth (at the sacrifice), they are deposited in a box or basket, and wrapt up with elegantly embroidered cloths, while the representative of the dead and the officer of prayer prepare themselves by fasting to present them. After they have been set forth, however, passers-by trample on their heads and backs, and the grass-cutters take and burn them in cooking. That is all they are good for. If one should again take them, replace them in the box or basket, wrap them up with embroidered cloths, and then in rambling, or abiding at the spot, should go to sleep under them, if he do not get (evil) dreams, he is sure to be often troubled with the nightmare. Now here is your Master in the same way taking the grass-dogs, presented by the ancient kings, and leading his disciples to wander or abide and sleep under them. Owing to this, the tree (beneath which they were practising ceremonies) in Sung was cut down²; he was obliged to leave Wei³; he was reduced to extremities in Shang³ and Kâu⁴:—were not those experiences like having (evil) dreams? He was kept in a state of siege between K'ăn and 3hâi⁵, so that for seven days he had no cooked food to eat, and was in a situation between life and death:—were not those experiences like the nightmare?

¹ See the Táo Teh K'ing, ch. 5.

² Analects III, xxii.

³ In consequence of the dissoluteness of the court; Analects VI, xxvi; IX, 17.

⁴ Meaning Sung and Wei.

⁵ Analects XI, ii, 1.

‘If you are travelling by water, your best plan is to use a boat; if by land, a carriage. Take a boat, which will go (easily) along on the water, and try to push it along on the land, and all your lifetime it will not go so much as a fathom or two:—are not ancient time and the present time like the water and the dry land? and are not *Kâu* and *Lû* like the boat and the carriage? To seek now to practise (the old ways of) *Kâu* in *Lû* is like pushing along a boat on the dry land. It is only a toilsome labour, and has no success; he who does so is sure to meet with calamity. He has not learned that in handing down the arts (of one time) he is sure to be reduced to extremity in endeavouring to adapt them to the conditions (of another).

‘And have you not seen the working of a shadoof? When (the rope of) it is pulled, it bends down; and when it is let go, it rises up. It is pulled by a man, and does not pull the man; and so, whether it bends down or rises up, it commits no offence against the man. In the same way the rules of propriety, righteousness, laws, and measures of the three Hwangs¹ and five Tis¹ derived their excellence, not from their being the same as those of the present day, but from their (aptitude for) government. We may compare them to haws², pears, oranges,

¹ It is impossible to speak definitely of who these three Hwangs (Augustuses) and five Tis were, or whom the speaker intended by them. The former would seem to lead us to the purely fabulous ages, when twelve (or thirteen) Heavenly Hwangs, eleven Earthly, and nine Human ruled over the young world, for a period of 576,000 years. There is a general agreement of opinion that the five Tis ended with Yâo and Shun.

² See Williams's Dictionary, sub voc. He says it is the Cra-

and pummeloos, which are different in flavour, but all suitable to be eaten. Just so it is that the rules of propriety, righteousness, laws, and measures, change according to the time.

‘If now you take a monkey, and dress it in the robes of the duke of *Kâu*, it will bite and tear them, and will not be satisfied till it has got rid of them altogether. And if you look at the difference between antiquity and the present time it is as great as that between the monkey and the duke of *Kâu*. In the same way, when Hsi Shih¹ was troubled in mind, she would knit her brows and frown on all in her neighbourhood. An ugly woman of the neighbourhood, seeing and admiring her beauty, went home, and also laying her hands on her heart proceeded to stare and frown on all around her. When the rich people of the village saw her, they shut fast their doors and would not go out; when the poor people saw her, they took their wives and children and ran away from her. The woman knew how to admire the frowning beauty, but she did not know how it was that she, though frowning, was beautiful. Alas! it is indeed all over with your Master²!’

5. When Confucius was in his fifty-first year³, he had not heard of the *Táo*, and went south to *Phei*⁴

taegus cuneata and *pinnatifida*, common in China, and much esteemed for its acidity.

¹ A famous beauty,—the concubine of king *Fû-khâi* of *Wû*.

² The comparisons in this paragraph are not complimentary to Confucius. Of course the conversation never took place, and must have been made up to ridicule the views of the sage.

³ This would be in B.C. 503 or 502, and *Lão-ze* would be more than a hundred years old.

⁴ Probably in what is now the district of *Phei*, department of *Hsü-kâu*, *Kiang-sû*.

to see Lâu Tan, who said to him, 'You have come, Sir; have you? I have heard that you are the wisest man of the North; have you also got the Táo?' 'Not yet,' was the reply; and the other went on, 'How have you sought it?' Confucius said, 'I sought it in measures and numbers, and after five years I had not got it.' 'And how then did you seek it?' 'I sought it in the Yin and Yang, and after twelve years I have not found it.' Lâu-ze said, 'Just so! If the Táo could be presented (to another), men would all present it to their rulers; if it could be served up (to others), men would all serve it up to their parents; if it could be told (to others), men would all tell it to their brothers; if it could be given to others, men would all give it to their sons and grandsons. The reason why it cannot be transmitted is no other but this,—that if, within, there be not the presiding principle, it will not remain there, and if, outwardly, there be not the correct obedience, it will not be carried out. When that which is given out from the mind (in possession of it) is not received by the mind without, the sage will not give it out; and when, entering in from without, there is no power in the receiving mind to entertain it, the sage will not permit it to lie hid there¹. Fame is a possession common to all; we should not seek to have much of it. Benevolence and righteousness were as the lodging-houses of the former kings; we should only rest in them for a night, and not occupy them for

¹ That is, the sage will not deposit it, where it will lie hidden;—compare *Analects* XVI, vi.

long. If men see us doing so, they will have much to say against us.

‘The perfect men of old trod the path of benevolence as a path which they borrowed for the occasion, and dwelt in Righteousness as in a lodging which they used for a night. Thus they rambled in the vacancy of Untroubled Ease, found their food in the fields of Indifference, and stood in the gardens which they had not borrowed. Untroubled Ease requires the doing of nothing; Indifference is easily supplied with nourishment; not borrowing needs no outlay. The ancients called this the Enjoyment that Collects the True.

‘Those who think that wealth is the proper thing for them cannot give up their revenues; those who seek distinction cannot give up the thought of fame; those who cleave to power cannot give the handle of it to others. While they hold their grasp of those things, they are afraid (of losing them). When they let them go, they are grieved; and they will not look at a single example, from which they might perceive the (folly) of their restless pursuits:—such men are under the doom of Heaven¹.

‘Hatred and kindness; taking and giving; reproof and instruction; death and life:—these eight things are instruments of rectification, but only those are able to use them who do not obstinately refuse to comply with their great changes. Hence it is said, “Correction is Rectification.” When the minds of

¹ See the same expression used in Book VI, par. 11, used by Confucius of himself. Comparing the two passages together, I must doubt the correctness of my note there (2, p. 252), that ‘Heaven’ is used in the Confucian sense of Tî, or God. The men here pursued and toiled after the pleasures of the world, rather than the quiet satisfactions of the Tâo.

some do not acknowledge this, it is because the gate of Heaven¹ (in them) has not been opened.'

6. At an interview with Lâu Tan, Confucius spoke to him of benevolence and righteousness. Lâu Tan said, 'If you winnow chaff, and the dust gets into your eyes, then the places of heaven and earth and of the four cardinal points are all changed to you. If mosquitoes or gadflies puncture your skin, it will keep you all the night² from sleeping. But this painful iteration of benevolence and righteousness excites my mind and produces in it the greatest confusion. If you, Sir, would cause men not to lose their natural simplicity, and if you would also imitate the wind in its (unconstrained) movements, and stand forth in all the natural attributes belonging to you!—why must you use so much energy, and carry a great drum to seek for the son whom you have lost³? The snow-goose does not bathe every day to make itself white, nor the crow blacken itself every day to make itself black. The natural simplicity of their black and white does not afford any ground for controversy; and the fame and praise which men like to contemplate do not make them greater than they naturally are. When the springs (supplying the pools) are dried up, the fishes huddle together on the dry land. Than that they should moisten one another there by their gasping, and keep one another wet by their milt, it would be better for them to forget one another in the rivers and lakes⁴.'

¹ See Book XXIII, par. 9. The phrase = 靈府.

² The common reading 昔 is a mistake for 夕.

³ Compare the same illustration in the preceding Book, par. 7.

⁴ This illustration is from Book VI, par. 5.

From this interview with Láo Tan, Confucius returned home, and for three days did not speak. His disciples (then) asked him, saying, 'Master, you have seen Láo Tan; in what way might you admonish and correct him?' Confucius said, 'In him (I may say) that I have now seen the dragon. The dragon coils itself up, and there is its body; it unfolds itself and becomes the dragon complete. It rides on the cloudy air, and is nourished by the Yin and Yang. I kept my mouth open, and was unable to shut it;—how could I admonish and correct Láo Tan?'

7. 3ze-kung¹ said, 'So then, can (this) man indeed sit still as a representative of the dead, and then appear as the dragon? Can his voice resound as thunder, when he is profoundly still? Can he exhibit himself in his movements like heaven and earth? May I, 3hze, also get to see him?' Accordingly with a message from Confucius he went to see Láo Tan.

Láo Tan was then about to answer (his salutation) haughtily in the hall, but he said in a low voice, 'My years have rolled on and are passing away, what do you, Sir, wish to admonish me about?' 3ze-kung replied, 'The Three Kings and Five Tîs² ruled

¹ 3ze-kung would seem to have undertaken this expedition to maintain the reputation of the Master and his school;—only to be defeated by Láo-ze more signally than Confucius had been.

² These are different probably, though the text is not quite certain, from the three Hwangs and five Tîs of par. 3. The Hwangs (or August Sovereigns) preceded the Tîs; the Kings (Wangs) came after them. The Three Kings are the three lines of kings commencing with the dynasty of Hsiâ, and following Shun. From the names mentioned by 3ze-kung, we ought certainly so to understand the designation here.

the world not in the same way, but the fame that has accrued to them is the same. How is it that you alone consider that they were not sages?' 'Come forward a little, my son. Why do you say that (their government) was not the same?' 'Yáo,' was the reply, 'gave the kingdom to Shun, and Shun gave it to Yü. Yü had recourse to his strength, and Thang to the force of arms. King Wăn was obedient to Kâu (-hsin), and did not dare to rebel; king Wû rebelled against Kâu, and would not submit to him. And I say that their methods were not the same.' Láo Tan said, 'Come a little more forward, my son, and I will tell you how the Three Hwangs and the Five Tis¹ ruled the world. Hwang-Ti ruled it, so as to make the minds of the people all conformed to the One (simplicity). If the parents of one of them died, and he did not wail, no one blamed him. Yáo ruled it so as to cause the hearts of the people to cherish relative affection. If any, however, made the observances on the death of other members of their kindred less than those for their parents, no one blamed them². Shun ruled it, so as to produce a feeling of rivalry in the minds of the people. Their wives gave birth to their children in the tenth month of their pregnancy, but those children could speak at five months; and before they were three years old, they began to call people by their surnames and names. Then it was that men began to die prematurely. Yü ruled it, so as to cause the minds of the people to become changed. Men's minds became scheming, and they

¹ See note 2, preceding page.

² Referring to some abuses, contrary to the doctrine of relationship.

used their weapons as if they might legitimately do so, (saying that they were) killing thieves and not killing other men. The people formed themselves into different combinations;—so it was throughout the kingdom. Everywhere there was great consternation, and then arose the Literati and (the followers of) Mo (Tt). From them came first the doctrine of the relationships (of society); and what can be said of the now prevailing customs (in the marrying of) wives and daughters? I tell you that the rule of the Three Kings and Five Tis may be called by that name, but nothing can be greater than the disorder which it produced. The wisdom of the Three Kings was opposed to the brightness of the sun and moon above, contrary to the exquisite purity of the hills and streams below, and subversive of the beneficent gifts of the four seasons between. Their wisdom has been more fatal than the sting of a scorpion or the bite of a dangerous beast¹. Unable to rest in the true attributes of their nature and constitution, they still regarded themselves as sages:—was it not a thing to be ashamed of? But they were shameless.’ 3ze-kung stood quite disconcerted and ill at ease.

8. Confucius said to Láo Tan, ‘I have occupied myself with the Shih, the Shû, the Lî, the Yo, the Yî, and the *Khün K’hiû*, those six Books, for what I myself consider a long time², and am thoroughly

¹ What beast is meant here cannot be ascertained from the characters in the text,—鮮規之獸.

² But with the preparation of the *Khün K’hiû* Confucius’s life ended;—it is very plain that no conversation such as *Kwang-3ze* has fabricated here could ever have taken place.

acquainted with their contents. With seventy-two rulers, all offenders against the right, I have discoursed about the ways of the former kings, and set forth the examples of (the dukes of) *Kâu* and *Shão*; and not one of them has adopted (my views) and put them in practice :—how very difficult it is to prevail on such men, and to make clear the path to be pursued !’

Lão-ze replied, ‘It is fortunate that you have not met with a ruler fitted to rule the age. Those six writings are a description of the vestiges left by the former kings, but do not tell how they made such vestiges; and what you, Sir, speak about are still only the vestiges. But vestiges are the prints left by the shoes;—are they the shoes that produced them? A pair of white herons look at each other with pupils that do not move, and impregnation takes place; the male insect emits its buzzing sound in the air above, and the female responds from the air below, and impregnation takes place; the creatures called *lêi* are both male and female, and each individual breeds of itself¹. The nature cannot be altered; the conferred constitution cannot be changed; the march of the seasons cannot be arrested; the *Táo* cannot be stopped. If you get the *Táo*, there is no effect that cannot be produced; if you miss it, there is no effect that can.’

Confucius (after this) did not go out, till at the end of three months he went again to see *Lão Tan*, and said, ‘I have got it. Ravens produce their young by hatching; fishes by the communication of their milt; the small-waisted wasp by transforma-

¹ Where had *Lão-ze* or his author learned his zoology?

tion¹; when a younger brother comes, the elder weeps². Long is it that I have not played my part in harmony with these processes of transformation. But as I did not play my part in harmony with such transformation, how could I transform men?' Láo-ze said, 'You will do. *K'hiû*, you have found the Táo.'

¹ See the Shih King, II, v, Ode II, 3, about the sphex.

² Because, as we say, 'his nose is put out.' But the sentiment, though it is ascribed to Confucius, is rarely according to the fact of the case.

BOOK XV.

PART II. SECTION VIII.

Kho Í, or 'Ingrained Ideas'¹

I. Ingrained ideas and a high estimate of their own conduct; leaving the world, and pursuing uncommon ways; talking loftily and in resentful disparagement of others;—all this is simply symptomatic of arrogance. This is what scholars who betake themselves to the hills and valleys, who are always blaming the world, and who stand aloof like withered trees, or throw themselves into deep pools², are fond of.

Discoursing of benevolence, righteousness, loyalty, and good faith; being humble and frugal, self-forgetful and courteous;—all this is simply symptomatic of (self-)cultivation. This is what scholars who wish to tranquillise the world, teachers and instructors, men who pursue their studies at home and abroad, are fond of.

Discoursing of their great merit and making a great name for themselves; insisting on the ceremonies between ruler and minister; and rectifying the relations between high and low;—all this shows their one object to be the promotion of government. This is what officers of the court, men who honour their lord and would strengthen the state and who

¹ See pp. 146, 147.

² As did Shăn-thû Tî. See in Book VI, par. 3.

would do their utmost to incorporate other states with their own, are fond of.

Resorting to marshes and lakes ; dwelling in solitary places ; occupying themselves with angling and living at ease ;—all this shows their one object to be to do nothing. This is what gentlemen of the rivers and seas, men who avoid the society of the world and desire to live at leisure, are fond of.

Blowing and breathing with open mouth ; inhaling and exhaling the breath ; expelling the old breath and taking in new ; passing their time like the (dormant) bear¹, and stretching and twisting (the neck) like a bird¹ ;—all this simply shows the desire for longevity. This is what the scholars who manipulate their breath, and the men who nourish the body and wish to live as long as Päng 3û, are fond of.

As to those who have a lofty character without any ingrained ideas ; who pursue the path of self-cultivation without benevolence and righteousness ; who succeed in government without great services or fame ; who enjoy their ease without resorting to the rivers and seas ; who attain to longevity without the management (of the breath) ; who forget all things and yet possess all things ; whose placidity is unlimited, while all things to be valued attend them :—such men pursue the way of heaven and earth, and display the characteristics of the sages. Hence it is said², ‘Placidity, indifference, silence, quietude,

¹ This is probably the meaning. The text is simply :—‘Bear-passing, bird-stretching.’

² ‘It is said :’—where? and by whom? These questions we cannot answer. We have met indeed already with the same characteristics of the Táo ; but Kwang-ze is not likely to be quoting

absolute vacancy, and non-action:—these are the qualities which maintain the level of heaven and earth and are the substance of the Tâo and its characteristics.'

2. In accordance with this it is said, 'The sage is entirely restful, and so (his mind) is evenly balanced and at ease. This even balance and ease appears in his placidity and indifference. In this state of even balance and ease, of placidity and indifference, anxieties and evils do not find access to him, no depraving influence can take him by surprise; his virtue is complete, and his spirit continues unimpaired.'

Therefore it is (also) said, 'The life of the sage is (like) the action of Heaven; and his death is the transformation common to (all) things. In his stillness his virtue is the same as that of the Yin, and in movement his diffusiveness is like that of the Yang. He does not take the initiative in producing either happiness or calamity. He responds to the influence acting on him, and moves as he feels the pressure. He rises to act only when he is obliged to do so. He discards wisdom and the memories of the past; he follows the lines of his Heaven (-given nature); and therefore he suffers no calamity from Heaven, no involvement from things, no blame from men, and no reproof from the spirits of the dead¹. His life seems to float along; his death seems to be a resting. He does not indulge any

himself. On the 'It is said,' and the five recurrences of the phrase below, Lû Shû-kih says that Kwang-3ze is quoting from sentences current among the adherents of Tâoism,—the sentence-makers often drawn on by Lâo-3ze; compare the Tâo Teh K'ing, ch. xli.

¹ See Book XIII, par. 2.

anxious doubts ; he does not lay plans beforehand. His light is without display ; his good faith is without previous arrangement. His sleep is untroubled by dreams ; his waking is followed by no sorrows. His spirit is guileless and pure ; his soul is not subject to weariness. Vacant and without self-assertion, placid and indifferent, he agrees with the virtue of Heaven.'

Therefore it is said (further), 'Sadness and pleasure show a depraving element in the virtue (of those who feel them) ; joy and anger show some error in their course ; love and hatred show a failure of their virtue. Hence for the mind to be free from sorrow and pleasure is the perfection of virtue ; to be of one mind that does not change is the perfection of quietude ; to be conscious of no opposition is the perfection of vacancy ; to have no intercourse with (external) things is the perfection of indifference ; and to have no rebellious dissatisfactions is the perfection of purity.'

3. Therefore it is said (still further), 'If the body be toiled, and does not rest, it becomes worn out ; if the spirit be used without cessation, it becomes toiled ; and when toiled, it becomes exhausted. It is the nature of water, when free from admixture, to be clear, and, when not agitated, to be level ; while if obstructed and not allowed to flow, it cannot preserve its clearness ;—being an image of the virtue of Heaven.' Hence it is said (once again), 'To be guileless and pure, and free from all admixture ; to be still and uniform, without undergoing any change ; to be indifferent and do nothing ; to move and yet to act like Heaven :—this is the way to nourish the spirit. Now he who possesses a

sword made at Kan-yüeh¹ preserves it carefully in a box, and does not dare to use it ;—it is considered the perfection of valuable swords. But the human spirit² goes forth in all directions, flowing on without limit, reaching to heaven above, and wreathing round the earth beneath. It transforms and nourishes all things, and cannot be represented by any form. Its name is “the Divinity (in man)³.” It is only the path of pure simplicity which guards and preserves the Spirit. When this path is preserved and not lost, it becomes one with the Spirit ; and in this ethereal amalgamation, it acts in harmony with the orderly operation of Heaven.’

There is the vulgar saying, ‘The multitude of men consider gain to be the most important thing ; pure scholars, fame ; those who are wise and able value their ambition ; the sage prizes essential purity.’ Therefore simplicity is the denomination of that in which there is no admixture ; purity of that in which the spirit is not impaired. It is he who can embody simplicity and purity whom we call the True Man⁴.

¹ Both of the seaboard states of Wû and Yüeh were famous for the swords produced in them. Kan-yüeh appears to have been the name of a valley or place in Wû, famous for the weapons made in it ; unless indeed we should read 于越, instead of 干越, and take 于越 as equivalent to 於越, which is found in the 30 *Khwan* as the name of Yüeh.

² Might be translated ‘the subtle spirit.’

³ A very remarkable use of Tî (帝) for the human spirit in the sense of God. The subject of the clause, let the reader observe, is that spirit, and not the Tâo. See pp. 146, 147, where I have said something about it.

⁴ See the full account of ‘the True Man’ in Book VI.

BOOK XVI.

PART II. SECTION IX.

Shan Hsing, or 'Correcting the Nature'¹.

1. Those who would correct their nature by means of the vulgar learning², seeking to restore it to its original condition, and those who would regulate³ their desires, by the vulgar ways of thinking, seeking thereby to carry their intelligence to perfection, must be pronounced to be deluded and ignorant people. The ancients who regulated the Tâo nourished their faculty of knowledge by their placidity, and all through life abstained from employing that faculty in action;—they must be pronounced to have (thus also) nourished their placidity by their knowledge⁴.

When the faculty of knowledge and the placidity

¹ See pp. 147, 148.

² 'Vulgar' must mean 'common,' and 'the vulgar learning' is the teaching popular in the time of our author, and which he regarded as contrary to the principles of Tâoism, of which he was an adherent. The Chinese critics say that 'vulgar' here is used as the opposite of 'true.'

³ 滑 is generally explained by 亂, 'to confuse,' but I cannot construe the sentence with that meaning of the term. In the Khang-hsî dictionary which I have followed, the character is defined by 治 with special reference to this passage.

⁴ This sentence is the clue to the author's aim in the whole Book. The 'knowledge' is defined by 覺生, 'the faculty of perception and apprehension.'

(thus) blend together, and they nourish each other, then from the nature there come forth harmony and orderly method. The attributes (of the Táo) constitute the harmony; the Táo (itself) secures the orderly method. When the attributes appear in a universal practice of forbearance, we have Benevolence; when the path is all marked by orderly method, we have Righteousness; when the righteousness is clearly manifested, and (all) things are regarded with affection, we have Leal-heartedness; when the (heart's) core is thus (pure) and real, and carried back to its (proper) qualities, we have Music; when this sincerity appears in all the range of the capacity, and its demonstrations are in accordance with what is elegant, we have Ceremony. If Ceremonies and Music are carried out in an imperfect and one-sided manner, the world is thrown into confusion. When men would rectify others, and their own virtue is beclouded, it is not sufficient to extend itself to them. If an attempt be made so to extend it, they also will lose their (proper) nature.

2. The men of old, while the chaotic condition was yet undeveloped¹, shared the placid tranquillity which belonged to the whole world. At that time the Yin and Yang were harmonious and still; their resting and movement proceeded without any disturbance; the four seasons had their definite times; not a single thing received any injury, and no living being came to a premature end. Men might be

¹ These 'men of old' were what we may call 'primeval men';—men in the lowest stage of development; but which our author considered to be the highest or paradisiacal condition of their nature.

possessed of (the faculty of) knowledge, but they had no occasion for its use. This was what is called the state of Perfect Unity. At this time, there was no action on the part of any one, but a constant manifestation of spontaneity.

This condition (of excellence) deteriorated and decayed, till Sui-zăn and Fû-hsî arose and commenced their administration of the world¹; on which came a compliance (with their methods), but the state of unity was lost. The condition going on to deteriorate and decay, Shăn Năng and Hwang-Ti arose, and took the administration of the world, on which (the people) rested (in their methods), but did not themselves comply with them. Still the deterioration and decay continued till the lords of Thang and Yü² began to administer the world. These introduced the method of governing by transformation, resorting to the stream (instead of to the spring)³, thus vitiating the purity and destroying the simplicity (of the nature). They left the Tâo, and substituted the Good for it, and pursued the course of Haphazard Virtue. After this they forsook their nature and followed (the promptings of) their minds. One mind and another associated their knowledge, but were unable to give rest to the world. Then they added to this knowledge (ex-

¹ Kwang-ze gives no hint of how long he considered this highest condition to have lasted. Sui-zăn, 'the man of the Burning Speculum,' 'the Fire-producer,' whom Williams calls 'the Prometheus of China,' appears before Fû-hsî, as the first in the line of the Rulers of the world, who broke up the Primal Unity.

² These were Yáo and Shun, named from the principalities over which their fathers ruled.

³ 'The streams' were the methods of culture that arose after the simple virtues and spontaneity of the Tâo were lost.

ternal and) elegant forms, and went on to make these more and more numerous. The forms extinguished the (primal) simplicity, till the mind was drowned by their multiplicity. After this the people began to be perplexed and disordered, and had no way by which they might return to their true nature, and bring back their original condition.

3. Looking at the subject from this point of view, we see how the world lost ¹ the (proper) course, and how the course (which it took) only led it further astray¹. The world and the Way, when they came together, being (thus) lost to each other, how could the men of the Way make themselves conspicuous in the world? and how could the world rise to an appreciation of the Way?. Since the Way had no means to make itself conspicuous in the world, and the world had no means of rising to an appreciation of the Way, though sagely men might not keep among the hills and forests, their virtue was hidden;—hidden, but not because they themselves sought to hide it.

Those whom the ancients called 'Retired Scholars' did not conceal their persons, and not allow themselves to be seen; they did not shut up their words, and refuse to give utterance to them; they did not hide away their knowledge, and refuse to bring it forth. The conditions laid on them by the times were very much awry. If the conditions of the times had allowed them to act in the world on a great scale, they would have brought back the state of unity without any trace being perceived (of how

¹ It is the same character in the text which I have been obliged to translate thus differently,—喪.

they did so). When those conditions shut them up entirely from such action, they struck their roots deeper (in themselves), were perfectly still and waited. It was thus that they preserved (the Way in) their own persons.

4. The ancients who preserved (the Way in) their own persons did not try by sophistical reasonings to gloss over their knowledge; they did not seek to embrace (everything in) the world in their knowledge, nor to comprehend all the virtues in it. Solitary and trembling they remained where they were, and sought the restoration of their nature. What had they to do with any further action? The Way indeed is not to be pursued, nor (all) its characteristics to be known on a small scale. A little knowledge is injurious to those characteristics; small doings are injurious to the Way;—hence it is said, ‘They simply rectified themselves.’ Complete enjoyment is what is meant by ‘the Attainment of the Aim.’

What was anciently called ‘the Attainment of the Aim’ did not mean the getting of carriages and coronets¹; it simply meant that nothing more was needed for their enjoyment. Now-a-days what is called ‘the Attainment of the Aim’ means the getting of carriages and coronets. But carriages and coronets belong to the body; they do not affect the nature as it is constituted. When such things happen to come, it is but for a time; being but for a time, their coming cannot be obstructed and their going cannot be stopped². Therefore we should not

¹ That is, worldly distinction.

² Because they depend on others. Compare Mencius VI, i, ch. 17, 2.

because of carriages and coronets indulge our aims, nor because of distress and straitness resort to the vulgar (learning and thinking); the one of these conditions and the other may equally conduce to our enjoyment, which is simply to be free from anxiety. If now the departure of what is transient takes away one's enjoyment, this view shows that what enjoyment it had given was worthless. Hence it is said, 'They who lose themselves in their pursuit of things, and lose their nature in their study of what is vulgar, must be pronounced people who turn things upside down.'

BOOK XVII.

PART II. SECTION X.

K'hiû Shui, or 'The Floods of Autumn ¹.'

1. The time of the autumnal floods was come, and the hundred streams were all discharging themselves into the Ho. Its current was greatly swollen ², so that across its channel from bank to bank one could not distinguish an ox from a horse. On this the (Spirit-) earl of the Ho ³ laughed with delight, thinking that all the beauty of the world was to be found in his charge. Along the course of the river he walked east till he came to the North Sea, over which he looked, with his face to the east, without being able to see where its waters began. Then he began to turn his face round, looked across the expanse, (as if he were) confronting Zo ³, and said with a sigh, 'What the vulgar saying expresses about him who has learned a hundred points (of the T'ao), and thinks that there is no one equal to himself, was surely spoken of me. And moreover, I have heard

¹ See pp. 148, 149.

² 涇 here perhaps means 'turbid.' It has nothing to do with the river *King*.

³ See Mayers's Manual, p. 54. Our author adopts the common beliefs or superstitions of his time, and after his fashion puts his own reasonings into the mouths of these mythological personages. It is more difficult to collect the legends about Zo of the sea, or of the Northern Sea. See the *Khang-hsî Thesaurus* under 海若.

parties making little of the knowledge of *Kung-ni* and the righteousness of *Po-î*, and at first I did not believe them. Now I behold the all-but-boundless extent (of your realms). If I had not come to your gate, I should have been in danger (of continuing in my ignorance), and been laughed at for long in the schools of our great System¹.

Zo, (the Spirit-lord) of the Northern Sea, said, 'A frog in a well cannot be talked with about the sea;—he is confined to the limits of his hole. An insect of the summer cannot be talked with about ice;—it knows nothing beyond its own season. A scholar of limited views cannot be talked with about the *Táo*;—he is bound by the teaching (which he has received). Now you have come forth from between your banks, and beheld the great sea. You have come to know your own ignorance and inferiority, and are in the way of being fitted to be talked with about great principles. Of all the waters under heaven there are none so great as the sea. A myriad streams flow into it without ceasing, and yet it is not filled; and afterwards² it discharges them (also) without ceasing, and yet it is not emptied. In spring and in autumn it undergoes no change; it takes no notice of floods or of drought. Its superiority over such streams even as the *Kiang* and the

¹ Thus the Confucian learning and its worthies were to the system of the *Táo* only as the waters of the *Ho* to the great sea.

² I have translated here as if the reading were 尾閭, which is given by Lin Hsi-kung. The correct reading, however, so far as depends on editions and dictionaries, is 尾閭; which is explained in the *Khang-hsi* dictionary as 'a great Rock in *Fû-sang* on the East,' against which the water of the sea collects, and is all evaporated!

Ho cannot be told by measures or numbers ; and that I have never, notwithstanding this, made much of myself, is because I compare my own bodily form with (the greatness of) heaven and earth, and (remember that) I have received my breath from the Yin and Yang. Between heaven and earth I am but as a small stone or a small tree on a great hill. So long as I see myself to be thus small, how should I make much of myself ? I estimate all within the four seas, compared with the space between heaven and earth, to be not so large as that occupied by a pile of stones in a large marsh ! I estimate our Middle States, compared with the space between the four seas, to be smaller than a single little grain of rice in a great granary ! When we would set forth the number of things (in existence), we speak of them as myriads ; and man is only one of them. Men occupy all the nine provinces ; but of all whose life is maintained by grain-food, wherever boats and carriages reach, men form only one portion. Thus, compared with the myriads of things, they are not equal to a single fine hair on the body of a horse. Within this range are comprehended all (the territories) which the five T'is received in succession from one another ; all which the royal founders of the three dynasties contended for ; all which excited the anxiety of Benevolent men ; and all which men in office have toiled for. Po-i was accounted famous for declining (to share in its government), and K'ung-ni was accounted great because of the lessons which he addressed to it. They acted as they did, making much of themselves ;—therein like you who a little time ago did so of yourself because of your (volume of) water !'

2. The earl of the Ho said, 'Well then, may I consider heaven and earth as (the ideal of) what is great, and the point of a hair as that of what is small?' Zo of the Northern Sea replied, 'No. The (different) capacities of things are illimitable; time never stops, (but is always moving on); man's lot is ever changing; the end and the beginning of things never occur (twice) in the same way. Therefore men of great wisdom, looking at things far off or near at hand, do not think them insignificant for being small, nor much of them for being great:—knowing how capacities differ illimitably. They appeal with intelligence to things of ancient and recent occurrence, without being troubled by the remoteness of the former, or standing on tiptoe to lay hold of the latter:—knowing that time never stops in its course. They examine with discrimination (cases of) fulness and of want, not overjoyed by success, nor disheartened by failure:—knowing the inconstancy of man's lot. They know the plain and quiet path (in which things proceed), therefore they are not overjoyed to live, nor count it a calamity to die:—the end and the beginning of things never occurring (twice) in the same way.

'We must reckon that what men know is not so much as what they do not know, and that the time since they were born is not so long as that which elapsed before they were born. When they take that which is most small and try to fill with it the dimensions of what is most great, this leads to error and confusion, and they cannot attain their end. Looking at the subject in this way, how can you know that the point of a hair is sufficient to determine the minuteness of what is most small, or that

heaven and earth are sufficient to complete the dimensions of what is most large ?'

3. The earl of the Ho said, 'The disputers of the world all say, "That which is most minute has no bodily form ; and that which is most great cannot be encompassed ;"—is this really the truth ?' Zo of the Northern Sea replied, 'When from the standpoint of what is small we look at what is great, we do not take it all in ; when from the standpoint of what is great we look at what is small, we do not see it clearly. Now the subtile essence is smallness in its extreme degree ; and the vast mass is greatness in its largest form. Different as they are, each has its suitability,—according to their several conditions. But the subtile and the gross both presuppose that they have a bodily form. Where there is no bodily form, there is no longer a possibility of numerical division ; where it is not possible to encompass a mass, there is no longer a possibility of numerical estimate. What can be discoursed about in words is the grossness of things ; what can be reached in idea is the subtilty of things. What cannot be discoursed about in words, and what cannot be reached by nice discrimination of thought, has nothing to do either with subtilty or grossness.

'Therefore while the actions of the Great Man are not directed to injure men, he does not plume himself on his benevolence and kindness ; while his movements are not made with a view to gain, he does not consider the menials of a family as mean ; while he does not strive after property and wealth, he does not plume himself on declining them ; while he does not borrow the help of others to accomplish his affairs, he does not plume himself on supporting

himself by his own strength, nor does he despise those who in their greed do what is mean; while he differs in his conduct from the vulgar, he does not plume himself on being so different from them; while it is his desire to follow the multitude, he does not despise the glib-tongued flatterers. The rank and emoluments of the world furnish no stimulus to him, nor does he reckon its punishments and shame to be a disgrace. He knows that the right and the wrong can (often) not be distinguished, and that what is small and what is great can (often) not be defined. I have heard it said, "The Man of Tâo does not become distinguished; the greatest virtue is unsuccessful; the Great Man has no thought of self;"—to so great a degree may the lot be restricted.'

4. The earl of the Ho said, 'Whether the subject be what is external in things, or what is internal, how do we come to make a distinction between them as noble and mean, and as great or small?' Zo of the Northern Sea replied, 'When we look at them in the light of the Tâo, they are neither noble nor mean. Looking at them in themselves, each thinks itself noble, and despises others. Looking at them in the light of common opinion, their being noble or mean does not depend on themselves. Looking at them in their differences from one another, if we call those great which are greater than others, there is nothing that is not great, and in the same way there is nothing that is not small. We shall (thus) know that heaven and earth is but (as) a grain of the smallest rice, and that the point of a hair is (as) a mound or a mountain;—such is the view given of them by their relative size. Look-

ing at them from the services they render, allowing to everything the service which it does, there is not one which is not serviceable; and, extending the consideration to what it does not do, there is not one which is not unserviceable. We know (for instance) that East and West are opposed to each other, and yet that the one cannot be without (suggesting the idea of) the other;—(thus) their share of mutual service is determined. Looking at them with respect to their tendencies, if we approve of what they approve, then there is no one who may not be approved of; and, if we condemn what they condemn, there is no one who may not be condemned. There are the cases of Yáo and K'ieh, each of whom approved of his own course, and condemned the other;—such is the view arising from the consideration of tendency and aim.

‘Formerly Yáo and Shun resigned (their thrones), and yet each continued to be Tí; K'ih-khwâi¹ resigned (his marquisate) which led to his ruin. Thang and Wú contended (for the sovereignty), and each became king; the duke of Pâi² contended (for K'û), which led to his extinction. Looking at the subject from these examples of striving by force and of resigning, and from the conduct of Yáo (on the one hand) and of K'ieh (on the other), we see that there is a time for noble acting, and a time for

¹ See Mencius II, ii, ch. 8, and I, ii, chaps. 10, 11, with the notes. 之 is probably a mistake for 子.

² See the last narrative but one in the 30 K'wan, under the sixteenth year of duke Âi of Lû,—the year in which Confucius died. ‘The duke of Pâi’ was merely the chief of a district of K'û; but rebelling against the Ruler of the State, he was defeated, and strangled himself.

mean;—these characteristics are subject to no regular rule.

5. 'A battering ram may be used against the wall of a city, but it cannot be employed to stop up a hole;—the uses of implements are different. The (horses) *K'ih-êi* and *Hwâ-liû*¹ could in one day gallop 1000 *li*, but for catching rats they were not equal to a wild dog or a weasel;—the gifts of creatures are different. The white horned owl collects its fleas in the night-time, and can discern the point of a hair, but in bright day it stares with its eyes and cannot see a mound or a hill;—the natures of creatures are different.

'Hence the sayings, "Shall we not follow and honour the right, and have nothing to do with the wrong? shall we not follow and honour those who secure good government, and have nothing to do with those who produce disorder?" show a want of acquaintance with the principles of Heaven and Earth, and with the different qualities of things. It is like following and honouring Heaven and taking no account of Earth; it is like following and honouring the Yin and taking no account of the Yang. It is clear that such a course cannot be pursued. Yet notwithstanding they go on talking so:—if they are not stupid, they are visionaries. The *Ti* sovereigns resigned their thrones to others in one way, and the rulers of the three dynasties transmitted their thrones to their successors in another. He who acts differently from the requirements of his time and contrary to its custom is called an usurper; he who complies with the time

¹ Two of king Mu's team of eight famous steeds.

and follows the common practice is said to be righteous. Hold your peace, O earl of the Ho. How should you know what constitutes being noble and being mean, or who are the small and who the great?’

6. The earl of the Ho said, ‘Very well. But what am I to do? and what am I not to do? How am I to be guided after all in regard to what I accept or reject, and what I pursue or put away from me?’ Zo of the Northern Sea replied, ‘From the standpoint of the Tâo, what is noble? and what is mean? These expressions are but the different extremes of the average level. Do not keep pertinaciously to your own ideas, which put you in such opposition to the Tâo. What are few? and what are many? These are denominations which we employ in thanking (donors) and dispensing gifts. Do not study to be uniform in doing so;—it only shows how different you are from the Tâo. Be severe and strict, like the ruler of a state who does not selfishly bestow his favours. Be scrupulous, yet gentle, like the tutelary spirit of the land, when sacrifice is offered to him who does not bestow his blessing selfishly. Be large-minded like space, whose four terminating points are illimitable, and form no particular enclosures. Hold all things in your love, favouring and supporting none specially. This is called being without any local or partial regard; all things are equally regarded; there is no long or short among them.

‘There is no end or beginning to the Tâo. Things indeed die and are born, not reaching a perfect state which can be relied on. Now there is emptiness, and now fulness;—they do not continue in one form. The years cannot be reproduced; time

cannot be arrested. Decay and growth, fulness and emptiness, when they end, begin again. It is thus that we describe the method of great righteousness, and discourse about the principle pervading all things. The life of things is like the hurrying and galloping along of a horse. With every movement there is a change; with every moment there is an alteration. What should you be doing? what should you not be doing? You have only to be allowing this course of natural transformation to be going on.'

7. The earl of the Ho said, 'What then is there so valuable in the Táo?' Zo of the Northern Sea replied, 'He who knows the Táo is sure to be well acquainted with the principles (that appear in the procedures of things). Acquainted with (those) principles, he is sure to understand how to regulate his conduct in all varying circumstances. Having that understanding, he will not allow things to injure himself. Fire cannot burn him who is (so) perfect in virtue, nor water drown him; neither cold nor heat can affect him injuriously; neither bird nor beast can hurt him. This does not mean that he is indifferent to these things; it means that he discriminates between where he may safely rest and where he will be in peril; that he is tranquil equally in calamity and happiness; that he is careful what he avoids and what he approaches;—so that nothing can injure him. Hence it is said, "What is heavenly is internal; what is human is external." The virtue (of man) is in what is Heavenly. If you know the operation of what is Heavenly and what is Human, you will have your root in what is Heavenly and your position in Virtue. You will bend or stretch

(only) after the (necessary) hesitation; you will have returned to the essential, and may be pronounced to have reached perfection.'

'What do you mean,' pursued the earl, 'by the Heavenly, and by the Human?' Zo replied, 'Oxen and horses have four feet;—that is what I call their Heavenly (constitution). When horses' heads are haltered, and the noses of oxen are pierced, that is what I call (the doing of) Man. Hence it is said, "Do not by the Human (doing) extinguish the Heavenly (constitution); do not for your (Human) purpose extinguish the appointment (of Heaven); do not bury your (proper) fame in (such) a pursuit of it; carefully guard (the Way) and do not lose it:—this is what I call reverting to your True (Nature)."'

8. The khwei¹ desires to be like² the millipede¹; the millipede to be like the serpent; the serpent like the wind; the wind to be like the eye; and the eye to be like the mind³.

The khwei said to the millipede, 'With my one leg I hop about, and can hardly manage to go along. Now you have a myriad feet which you can employ; how is it that you are so abundantly furnished?' The millipede said, 'It is not so. Have you not seen one ejecting saliva? The largest portion of it is like a pearl, while the smaller portions fall down like a shower of mist in innumer-

¹ The khwei is 'a sort of dragon (it may be, a worm) with one foot.' The hsien has many feet; one account calls it 'a centipede.'

² Such is the meaning of the lin or lien. The best commentators explain it by hsien (羨), 'to covet and desire.'

³ Compare Book I, par. 3, towards the end.

able drops. Now I put in motion the springs set in me by Heaven, without knowing how I do so.'

The millipede said to the serpent, 'I go along by means of my multitude of feet; and yet how is it that I do not go so fast as you who have no feet at all?' The serpent replied, 'How can the method of moving by the springs set in us by Heaven be changed? How could I make use of feet?'

The serpent said to the wind, 'I get along by moving my backbone and ribs, thus appearing to have some (bodily) means of progression. But now you, Sir, rise with a blustering force in the North Sea, and go on in the same way to the South Sea;—seemingly without any such means. How does it take place?' The wind said, 'Yes. With such a blustering force I rise in the North Sea and go on to the South Sea. But you can point to me, and therein are superior to me, as you are also in treading on me. Yet notwithstanding, it is only I who can break great trees, and blow down great houses. Therefore he whom all that are small cannot overcome is a great overcomer. But it is only he who is the sagely man¹ that is the Great Conqueror (of all).'

9. When Confucius was travelling in Khwang²,

¹ The sagely man is 'the True man,' who embodies the Táo. The Táo has given to the khwei, the millipede, the serpent, and it may be said also to the wind, their means of progression and action. Nothing is said of the eye and the mind;—it was not necessary to dwell on the Táo in them.

² See Confucian Analects, IX, v and XI, xxii. Our author's account of this event is his own, constructed by him to convey his own Táoistic lessons.

some people of Sung (once) surrounded him (with a hostile intention) several ranks deep; but he kept singing to his lute without stopping. 3ze-lû came in, and saw him, and said, 'How is it, Master, that you are so pleased?' Confucius said, 'Come here, and I will tell you. I have tried to avoid being reduced to such a strait for a long time; and that I have not escaped shows that it was so appointed for me. I have sought to find a ruler that would employ me for a long time, and that I have not found one, shows the character of the time. Under Yâo and Shun there was no one in the kingdom reduced to straits like mine; and it was not by their sagacity that men succeeded as they did. Under Kieh and Kâu no (good and able man) in the kingdom found his way to employment; and it was not for (want of) sagacity that they failed to do so. It was simply owing to the times and their character.

'People that do business on the water do not shrink from meeting iguanodons and dragons;—that is the courage of fishermen. Those who do business on land do not shrink from meeting rhinoceroses and tigers;—that is the courage of hunters. When men see the sharp weapons crossed before them, and look on death as going home;—that is the courage of the determined soldier. When he knows that his strait is determined for him, and that the employment of him by a ruler depends on the character of the time, and then meeting with great distress is yet not afraid;—that is the courage of the sagely man. Wait, my good Yû, and you will see what there is determined for me in my lot.' A little afterwards, the leader of the armed men approached and took his leave, saying, 'We thought you were

Yang Hû¹, and therefore surrounded you. Now we see our mistake.' (With this) he begged to take his leave, and withdrew.

10. Kung-sun Lung² asked Mâu of Wei³, saying, 'When I was young, I learned the teachings of the former kings; and when I was grown up, I became proficient in the practice of benevolence and righteousness. I brought together the views that agreed and disagreed; I considered the questions about hardness and whiteness⁴; I set forth what was to be affirmed and what was not, and what was allowable and what was not; I studied painfully the various schools of thought, and made myself master of the reasonings of all their masters. I thought that I had reached a good understanding of every subject; but now that I have heard the words of Kwang-ze, they throw me into a flutter of surprise. I do not know whether it be that I do not come up to him in the power of discussion, or that my knowledge is not equal to his. But now I do not feel able to open my mouth, and venture to ask you what course I should pursue.' Kung-ze Mâu leant forward on his stool, drew a long breath, looked up to heaven, smiled, and

¹ No doubt the Yang Ho of Analects XVII, i.

² The grandson (Kung-sun) of one of the rulers of K'iao (one of the three states into which the great state of Jin had been broken up). He has come down to us as a philosophic sophist, whose views it is not easy to define. See Mayers's Manual, p. 288, and Book XXXIII, par. 7.

³ Wei was another of the divisions of Jin, and Mâu was one of the sons of its ruler at this time, a great admirer, evidently, of Kwang-ze, and more than a match for the sophist Lung.

⁴ Holding, it is supposed, that 'the attributes of material objects, such as hardness and colour, are separate existences:'—so Mayers, after Wylie.

said, 'Have you not heard of the frog of the dilapidated well, and how it said to the turtle of the Eastern Sea, "How I enjoy myself? I leap upon the parapet of this well. I enter, and having by means of the projections formed by the fragments of the broken tiles of the lining proceeded to the water, I draw my legs together, keep my chin up, (and strike out). When I have got to the mud, I dive till my feet are lost in it. Then turning round, I see that of the shrimps, crabs, and tadpoles there is not one that can do like me. Moreover, when one has entire command of all the water in the gully, and hesitates to go forward, it is the greatest pleasure to enjoy one's self here in this dilapidated well¹;—why do not you, Master, often come and enter, and see it for yourself?" The turtle of the Eastern Sea (was then proceeding to go forward), but before he had put in his left foot, he found his right knee caught and held fast. On this he hesitated, drew back, and told (the frog) all about the sea, saying, "A distance of a thousand li is not sufficient to express its extent, nor would (a line of) eight thousand cubits be equal to sound its depth. In the time of Yü, for nine years out of ten the flooded land (all drained into it), and its water was not sensibly increased; and in the time of Thang for seven years out of eight there was a drought, but the rocks on the shore (saw) no diminution of the water because of it. Thus it is that no change is produced in its waters by any cause operating for a short time or a long, and that they do not advance nor recede for any addition or subtraction, whether great or small; and this is the great pleasure afforded by the Eastern Sea." When

¹ A passage difficult to construe.

the frog of the dilapidated well heard this, he was amazed and terror-struck, and lost himself in surprise.

‘And moreover, when you, who have not wisdom enough to know where the discussions about what is right and what is wrong should end, still desire to see through the words of *Kwang-ze*, that is like employing a mosquito to carry a mountain on its back, or a millipede¹ to gallop as fast as the Ho runs;—tasks to which both the insects are sure to be unequal. Still further, when you, who have not wisdom enough to know the words employed in discussing very mysterious subjects, yet hasten to show your sharpness of speech on any occasion that may occur, is not this being like the frog of the dilapidated well?

‘And that (*Kwang-ze*) now plants his foot on the Yellow Springs (below the earth), and anon rises to the height of the Empyrean. Without any regard to south and north, with freedom he launches out in every direction, and is lost in the unfathomable. Without any regard to east and west, starting from what is abysmally obscure, he comes back to what is grandly intelligible. (All the while), you, Sir, in amazement, search for his views to examine them, and grope among them for matter for discussion;—this is just like peeping at the heavens through a tube, or aiming at the earth with an awl; are not both the implements too small for the purpose? Go your ways, Sir.

‘And have you not heard of the young learners of

¹ A different character from that for a millipede in the last paragraph;—a Shang *K'ü*, evidently some small insect, but we cannot tell what.

Shâu-ling¹, and how they did in Han-tan? Before they had acquired what they might have done in that capital, they had forgotten what they had learned to do in their old city, and were marched back to it on their hands and knees. If now you do not go away, you will forget your old acquirements, and fail in your profession.'

Kung-sun Lung gaped on the speaker, and could not shut his mouth, and his tongue clave to its roof. He slunk away and ran off.

11. *Kwang-ze* was (once) fishing in the river *Phû*², when the king of *Khû*³ sent two great officers to him, with the message, 'I wish to trouble you with the charge of all within my territories.' *Kwang-ze* kept on holding his rod without looking round, and said, 'I have heard that in *Khû* there is a spirit-like tortoise-shell, the wearer of which died 3000 years ago⁴, and which the king keeps, in his ancestral temple, in a hamper covered with a cloth. Was it better for the tortoise to die, and leave its shell to be thus honoured? Or would it have been better for it to live, and keep on dragging its tail through the mud?' The two officers said, 'It would have been better for it to live, and draw its tail after it over the mud⁵.' 'Go your ways. I will keep on drawing my tail after me through the mud.'

¹ A city of *Káo*, as Han-tan was its capital. Of the incident referred to, I have not been able to learn anything. The 'were marched' gives my idea of what it may have been.

² A river, which still gives its name to *Phû-kâu*, department *Khao-kâu*, Shan-tung.

³ Probably king Wei, B. C. 339-330.

⁴ A good antiquity for *Khû*!

⁵ ? A species of *Testudo* *Serpentina*, such as is often seen on pieces of Japanese lacquer-ware.

12. Hui-ze being a minister of state in Liang¹, Kwang-ze went to see him. Some one had told Hui-ze that Kwang-ze was come with a wish to supersede him in his office, on which he was afraid, and instituted a search for the stranger all over the kingdom for three days and three nights. (After this) Kwang-ze went and saw him, and said, 'There is in the south a bird, called "the Young Phoenix";'—do you know it? Starting from the South Sea, it flies to the Northern; never resting but on the bignonia³, never eating but the fruit of the melia azederach⁴, and never drinking but from the purest springs. An owl, which had got a putrid rat, (once), when a phoenix went passing overhead, looked up to it and gave an angry scream. Do you wish now, in your possession of the kingdom of Liang, to frighten me with a similar scream?'

13. Kwang-ze and Hui-ze were walking on the dam over the Hào⁵, when the former said, 'These thryssas come out, and play about at their ease;—that is the enjoyment of fishes.' The other said, 'You are not a fish; how do you know what

¹ Another name for Wei, so called from its capital;—in the present department of Khâi-făng.

² So the critics explain the name. Williams thinks the bird may be 'the argus pheasant,' or 'a variety of the peacock.' But what the bird was does not affect the meaning of our author's reference to it.

³ One of the Eleococcae, the *Dryandra Cordifolia* of Thunberg.

⁴ All the editions I have seen give 練 here, which makes no sense. The character should doubtless be 棟, with the meaning which I have given; and not 'bamboo,' which is found in the critics. It is also called 'the Pride of India.'

⁵ A river in the department and district of Fung-yang, An-hui.

constitutes the enjoyment of fishes¹?' *Kwang-ze* rejoined, 'You are not I. How do you know that I do not know what constitutes the enjoyment of fishes?' *Hui-ze* said, 'I am not you; and though indeed I do not fully know you, you certainly are not a fish, and (the argument) is complete against your knowing what constitutes the happiness of fishes.' *Kwang-ze* replied, 'Let us keep to your original question. You said to me, "How do you know what constitutes the enjoyment of fishes?" You knew that I knew it, and yet you put your question to me;—well, I know it (from our enjoying ourselves together) over the Hào.'

¹ Surely a captious question. We infer the feelings of other creatures from their demonstrations.

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

THE TEXTS OF TÂOISM.

BOOK XVIII.

PART II. SECTION XI.

K'ih Lo, or 'Perfect Enjoyment'¹.

1. Under the sky is perfect enjoyment to be found or not? Are there any who can preserve themselves alive or not? If there be, what do they do? What do they maintain? What do they avoid? What do they attend to? Where do they resort to? Where do they keep from? What do they delight in? What do they dislike?

What the world honours is riches, dignities, longevity, and being deemed able. What it delights in is rest for the body, rich flavours, fine garments, beautiful colours, and pleasant music. What it looks down on are poverty and mean condition, short life and being deemed feeble². What men consider bitter experiences are that their bodies do not get rest and ease, that their mouths do not get food of rich flavour, that their persons are not finely clothed, that their eyes do not see beautiful colours, and that their ears do not listen to pleasant music. If they do not

¹ See vol. xxxix, pp. 149, 150.

² Of riches, dignities, longevity, and their opposites, enough is said, while the other two qualities are lightly passed over, and referred to only in connexion with 'meritorious officers.' I can only understand them as in the translation.

get these things, they are very sorrowful, and go on to be troubled with fears. Their thoughts are all about the body ;—are they not silly ?

Now the rich embitter their lives by their incessant labours ; they accumulate more wealth than they can use :—while they act thus for the body, they make it external to themselves¹. Those who seek for honours carry their pursuit of them from the day into the night, full of anxiety about their methods whether they are skilful or not :—while they act thus for the body they treat it as if it were indifferent to them². The birth of man is at the same time the birth of his sorrow ; and if he live long he becomes more and more stupid, and the longer is his anxiety that he may not die ; how great is his bitterness !—while he thus acts for his body, it is for a distant result. Meritorious officers are regarded by the world as good ; but (their goodness) is not sufficient to keep their persons alive. I do not know whether the goodness ascribed to them be really good or really not good. If indeed it be considered good, it is not sufficient to preserve their persons alive ; if it be deemed not good, it is sufficient to preserve other men alive. Hence it is said, ‘ When faithful remonstrances are not listened to, (the remonstrant) should sit still, let (his ruler) take his course, and not strive with him.’ Therefore when ʒze-hsü³ strove with (his ruler), he brought on him-

¹ If they did not do so, they would be content when they had enough.

² Wishing to attach it more closely to them.

³ Wû ʒze-hsü, the scourge of Kʒû ; and who perished miserably at last, when the king of Wû would no longer listen to his remonstrances ;—in about B. C. 475.

self the mutilation of his body. If he had not so striven, he would not have acquired his fame :—was such (goodness) really good or was it not ?

As to what the common people now do, and what they find their enjoyment in, I do not know whether the enjoyment be really enjoyment or really not. I see them in their pursuit of it following after all their aims as if with the determination of death, and as if they could not stop in their course ; but what they call enjoyment would not be so to me, while yet I do not say that there is no enjoyment in it. Is there indeed such enjoyment, or is there not ? I consider doing nothing (to obtain it) to be the great enjoyment¹, while ordinarily people consider it to be a great evil. Hence it is said, ' Perfect enjoyment is to be without enjoyment ; the highest praise is to be without praise². ' The right and the wrong (on this point of enjoyment) cannot indeed be determined according to (the view of) the world ; nevertheless, this doing nothing (to obtain it) may determine the right and the wrong. Since perfect enjoyment is (held to be) the keeping the body alive, it is only by this doing nothing that that end is likely to be secured. Allow me to try and explain this (more fully) :—Heaven does nothing, and thence comes its serenity ; Earth does nothing, and thence comes its rest. By the union of these two inactivities, all things are produced. How vast and imperceptible is the process !—they seem to come from

¹ This is the secret of the Táo.

² The last member of this sentence is the reading adopted by Wú K'ang towards the conclusion of the thirty-ninth chapter of the Táo Teh King, instead of the common 致數車無車.

nowhere! How imperceptible and vast!—there is no visible image of it! All things in all their variety grow from this Inaction. Hence it is said, ‘Heaven and Earth do nothing, and yet there is nothing that they do not do¹.’ But what man is there that can attain to this inaction?

2. When *K'wang-tze's* wife died, *Hui-tze* went to condole with him, and, finding him squatted on the ground, drumming on the basin², and singing, said to him, ‘When a wife has lived with her husband, and brought up children, and then dies in her old age, not to wail for her is enough. When you go on to drum on this basin and sing, is it not an excessive (and strange) demonstration?’ *K'wang-tze* replied, ‘It is not so. When she first died, was it possible for me to be singular and not affected by the event? But I reflected on the commencement of her being³. She had not yet been born to life; not only had she no life, but she had no bodily form; not only had she no bodily form, but she had no breath. During the intermingling of the waste and dark chaos³, there ensued a change, and there was breath; another change, and there was the bodily form; another change, and there came birth

¹ Compare similar statements in the *Táo Teh K'ing*, ch. 48, et al.

² The basin or tub, not ‘a basin.’ The reference is, no doubt, to the basin of ice put down near or under the couch on which the body was laid. I suppose that *K'wang-tze* was squatting so as to have this between his legs.

³ Is the writer referring to the primal creation as we may call it, or development of things out of the chaos, or to some analogous process at the birth of his wife? However that be, birth and death appear to him to be merely changes of the same kind in the perpetual process of evolution.

and life. There is now a change again, and she is dead. The relation between these things is like the procession of the four seasons from spring to autumn, from winter to summer. There now she lies with her face up, sleeping in the Great Chamber¹; and if I were to fall sobbing and going on to wail for her, I should think that I did not understand what was appointed (for all). I therefore restrained myself²!'

3. Mr. Deformed³ and Mr. One-foot³ were looking at the mound-graves of the departed in the wild of Khwăn-lun, where Hwang-Ti had entered into his rest. Suddenly a tumour began to grow on their left wrists, which made them look distressed as if they disliked it. The former said to the other, 'Do

¹ Between heaven and earth.

² Was it necessary he should fall singing to his drumming on the basin? But I subjoin a note here, suggested by the paragraph, which might have found, perhaps, a more appropriate place in the notice of this Book in vol. xxxix, pp. 149, 150.

In Sir John F. Davis' 'Description of the Empire of China and its Inhabitants (edition of 1857),' vol. ii, pp. 74-90, we have the amusing story of 'The Philosopher and his Wife.' The philosopher is Kwang-3ze, who plays the part of a magician; and of his wife it might be said, 'Frailty! thy name is woman!' Sir John Davis says, 'The story was translated into French by Père d'Entrecolles, and supplied the materials of Voltaire's *Zadig*.' I have not met in Chinese with Father d'Entrecolles' original. All of *Zadig* which can be supposed to have been borrowed from his translator is only a few sentences. The whole story is inconsistent with the account in paragraph 2 of the death of Kwang-3ze's wife, and with all which we learn from his writings of his character.

³ We know nothing of these parties but what we are told here. They are called Shû, meaning 'uncle,' often equivalent in China to our 'Mr.' The lesson taught by them is that of submission to pain and death as merely phenomena in the sphere of change. For the phraseology of their names, see Bk. III, par. 3, and Bk. IV, par. 8.

you dread it?' 'No,' replied he, 'why should I dread it? Life is a borrowed thing. The living frame thus borrowed is but so much dust. Life and death are like day and night. And you and I were looking at (the graves of) those who have undergone their change. If my change is coming to me, why should I dislike it?'

4. When *Kwang-ze* went to *K'ü*, he saw an empty skull, bleached indeed, but still retaining its shape. Tapping it with his horse-switch, he asked it, saying, 'Did you, Sir, in your greed of life, fail in the lessons of reason, and come to this? Or did you do so, in the service of a perishing state, by the punishment of the axe? Or was it through your evil conduct, reflecting disgrace on your parents and on your wife and children? Or was it through your hard endurances of cold and hunger? Or was it that you had completed your term of life?'

Having given expression to these questions, he took up the skull, and made a pillow of it when he went to sleep. At midnight the skull appeared to him in a dream, and said, 'What you said to me was after the fashion of an orator. All your words were about the entanglements of men in their lifetime. There are none of those things after death. Would you like to hear me, Sir, tell you about death?' 'I should,' said *Kwang-ze*, and the skull resumed: 'In death there are not (the distinctions of) ruler above and minister below. There are none of the phenomena of the four seasons. Tranquil and at ease, our years are those of heaven and earth. No king in his court has greater enjoyment than we have.' *Kwang-ze* did not believe it, and said, 'If I

could get the Ruler of our Destiny¹ to restore your body to life with its bones and flesh and skin, and to give you back your father and mother, your wife and children, and all your village acquaintances, would you wish me to do so?' The skull stared fixedly at him, knitted its brows, and said, 'How should I cast away the enjoyment of my royal court, and undertake again the toils of life among mankind?'

5. When Yen Yüan went eastwards to *K'hi*, Confucius wore a look of sorrow². *Ze-kung* left his mat, and asked him, saying, 'Your humble disciple ventures to ask how it is that the going eastwards of Hui to *K'hi* has given you such a look of sadness.' Confucius said, 'Your question is good. Formerly *Kwan-ze*³ used words of which I very much approve. He said, "A small bag cannot be made to contain what is large; a short rope cannot be used to draw water from a deep well³." So it is, and man's appointed lot is definitely determined, and his body is adapted for definite ends, so that neither the one nor the other can be augmented or diminished. I am afraid that Hui will talk with the marquis of *K'hi* about the ways of Hwang-Ti, Yáo, and Shun, and go on to relate the words of Sui-zǎn and Shǎn Nǎng. The marquis will seek (for the correspondence of what he is told) in himself; and, not finding

¹ I suppose the *Táo*; but none of the commentators, so far as I have seen, say anything about the expression.

² Compare the long discourse of Confucius with Yen Hui, on the latter's proposing to go to Wei, in Bk. IV.

³ *Kwan Í-wú* or *Kwan Kung*, the chief minister of duke Hwan of *K'hi*, whom he is supposed to have in view in his 'small bag and short rope.'

it there, will suspect the speaker; and that speaker, being suspected, will be put to death. And have you not heard this?—Formerly a sea-bird alighted in the suburban country of Lû¹. The marquis went out to meet it, (brought it) to the ancestral temple, and prepared to banquet it there. The *Kiû-shão*² was performed to afford it music; an ox, a sheep, and a pig were killed to supply the food. The bird, however, looked at everything with dim eyes, and was very sad. It did not venture to eat a single bit of flesh, nor to drink a single cupful; and in three days it died.

‘The marquis was trying to nourish the bird with what he used for himself, and not with the nourishment proper for a bird. They who would nourish birds as they ought to be nourished should let them perch in the deep forests, or roam over sandy plains; float on the rivers and lakes; feed on the eels and small fish; wing their flight in regular order and then stop; and be free and at ease in their resting-places. It was a distress to that bird to hear men speak; what did it care for all the noise and hubbub made about it? If the music of the *Kiû-shão*³ or the *Hsien-k’ih*⁴ were performed in the wild of the Thung-thing⁴ lake, birds would fly away, and beasts would run off when they heard it, and fishes would dive down to the bottom of the water; while men, when they hear it, would come all round to-

¹ Perhaps another and more ridiculous version of the story told in ‘the Narratives of the States,’ II, i, art. 7.

² The name of Shun’s music;—see the *Shû* (in vol. iii), par. 2.

³ Called also *Tâ Shão*, in Book XXXIII, par. 2.

⁴ Hwang-Ti’s music;—see Bk. XIV, par. 3.—But the genuineness of the whole paragraph is called in question.

gether, and look on. Fishes live and men die in the water. They are different in constitution, and therefore differ in their likes and dislikes. Hence it was that the ancient sages did not require (from all) the same ability, nor demand the same performances. They gave names according to the reality of what was done, and gave their approbation where it was specially suitable. This was what was called the method of universal adaptation and of sure success.'

6. Lieh-ze (once) upon a journey took a meal by the road-side. There he saw a skull a hundred years old, and, pulling away the bush (under which it lay), he pointed to it and said, 'It is only you and I who know that you are not dead, and that (aforetime) you were not alive. Do you indeed really find (in death) the nourishment (which you like)? Do I really find (in life my proper) enjoyment? The seeds (of things) are multitudinous and minute. On the surface of the water they form a membranous texture. When they reach to where the land and water join they become the (lichens which we call the) clothes of frogs and oysters. Coming to life on mounds and heights, they become the plantain; and, receiving manure, appear as crows' feet. The roots of the crow's foot become grubs, and its leaves, butterflies. This butterfly, known by the name of *hsü*, is changed into an insect, and comes to life under a furnace. Then it has the form of a moth, and is named the *k'ü-to*. The *k'ü-to* after a thousand days becomes a bird, called the *kan-yü-kü*. Its saliva becomes the *s'e-mí*, and this again the *shih-hsí* (or pickle-eater). The *í-lo* is produced from the pickle-eater; the *hwang-kwang* from the

kiû-yû; the mâu-zui from the pû-khwan. The ying-hsî uniting with a bamboo, which has long ceased to put forth sprouts, produces the *kking*-ning; the *kking*-ning, the panther; the panther, the horse; and the horse, the man. Man then again enters into the great Machinery (of Evolution), from which all things come forth (at birth), and which they enter at death¹.

¹ A much larger paragraph from which this must have been abbreviated, or which must have been enlarged from this, is found in the first Book of Lieh-tze's works (pp. 4, 5). In no Buddhist treatise is the transrotation of births more fully, and, I must add, absurdly stated.

BOOK XIX.

PART II. SECTION XII.

Tā Shǎng, or 'The Full Understanding of Life'¹.

1. He who understands the conditions of Life does not strive after what is of no use to life; and he who understands the conditions of Destiny does not strive after what is beyond the reach of knowledge. In nourishing the body it is necessary to have beforehand the things (appropriate to its support)²; but there are cases where there is a superabundance of such things, and yet the body is not nourished³. In order to have life it is necessary that it do not have left the body; but there are cases when the body has not been left by it, and yet the life has perished³.

When life comes, it cannot be declined; when it goes, it cannot be detained. Alas! the men of the world think that to nourish the body is sufficient to preserve life; and when such nourishment is not sufficient to preserve the life, what can be done in the world that will be sufficient? Though (all that men can do) will be insufficient, yet there are things which they feel they ought to do, and they do not try to avoid doing them. For those who wish to

¹ See vol. xxxix, pp. 150, 151.

² Wealth will supply abundantly the things that are necessary and fit for the nourishment of the body, but sudden death may render them unavailing.

³ That is, the higher life of the spirit has perished.

avoid caring for the body, their best plan is to abandon the world. Abandoning the world, they are free from its entanglements. Free from its entanglements, their (minds) are correct and their (temperament) is equable. Thus correct and equable, they succeed in securing a renewal of life, as some have done¹. In securing a renewal of life, they are not far from the True (Secret of their being). But how is it sufficient to abandon worldly affairs? and how is it sufficient to forget the (business of) life? Through the renouncing of (worldly) affairs, the body has no more toil; through forgetting the (business of) life, the vital power suffers no diminution. When the body is completed and the vital power is restored (to its original vigour), the man is one with Heaven. Heaven and Earth are the father and mother of all things. It is by their union that the body is formed; it is by their separation that a (new) beginning is brought about. When the body and vital power suffer no diminution, we have what may be called the transference of power. From the vital force there comes another more vital, and man returns to be the assistant of Heaven.

2. My master² Lieh-*ŋze*² asked Yin, (the warden) of the gate², saying, 'The perfect man walks under

¹ I think I have caught the meaning. The phrase signifying 'the renewal of life' has been used to translate 'being born again' in John's Gospel, ch. 3.

² We find here Lieh-*ŋze* (whose name has already occurred several times) in communication with the warden Yin, who was a contemporary of Láo-*ŋze*, and we must refer him therefore to the sixth century B. C. He could not therefore be contemporary with our author, and yet the three characters of the text mean 'My Master, Lieh-*ŋze*;' and the whole of the paragraph is found in Lieh-*ŋze*'s second Book (4^a-5^a) with a good many variants in the text.

water without encountering any obstruction, treads on fire without being burned, and walks on high above all things without any fear; let me ask how he attains to do this¹?' The warden Yin replied, 'It is by his keeping of the pure breath (of life); it is not to be described as an achievement of his skill or daring. Sit down, and I will explain it to you. Whatever has form, semblance, sound, and colour is a thing; how can one thing come to be different from another? But it is not competent for any of these things to reach to what preceded them all;—they are but (form and) visibility. But (the perfect man) attains to be (as it were) without form, and beyond the capability of being transformed. Now when one attains to this and carries it out to the highest degree, how can other things come into his way to stop him? He will occupy the place assigned to him without going beyond it, and lie concealed in the clue which has no end. He will study with delight the process which gives their beginning and ending to all things. By gathering his nature into a unity, by nourishing his vital power, by concentrating his virtue, he will penetrate to the making of things. In this condition, with his heavenly constitution kept entire, and with no crevice in his spirit, how can things enter (and disturb his serenity)?

'Take the case of a drunken man falling from his carriage;—though he may suffer injury, he will not

The gate was at the passage leading from the Royal Domain of those days into the great feudal territory of Jin;—from the north-west of the present province of Ho-nan into Shen-hsi.

¹ Lieh-ze puts an absurd question to the warden, which is replied to at length, and unsatisfactorily. We need not discuss either the question or the answer in this place.

die. His bones and joints are the same as those of other men, but the injury which he receives is different:—his spirit is entire. He knew nothing about his getting into the carriage, and knew nothing about his falling from it. The thought of death or life, or of any alarm or affright, does not enter his breast; and therefore he encounters danger without any shrinking from it. Completely under the influence of the liquor he has drunk, it is thus with him;—how much more would it be so, if he were under the influence of his Heavenly constitution! The sagely man is kept hid in his Heavenly constitution, and therefore nothing can injure him.

‘A man in the pursuit of vengeance would not break the (sword) *Mo-yê* or *Yü-kiang* (which had done the deed); nor would one, however easily made wrathful, wreak his resentment on the fallen brick. In this way all under heaven there would be peace, without the disorder of assaults and fighting, without the punishments of death and slaughter:—such would be the issue of the course (which I have described). If the disposition that is of human origin be not developed, but that which is the gift of Heaven, the development of the latter will produce goodness, while that of the former would produce hurt. If the latter were not wearied of, and the former not slighted, the people would be brought nearly to their True nature.’

3. When *Kung-nî* was on his way to *K'û*, as he issued from a forest, he saw a hunchback receiving cicadas (on the point of a rod), as if he were picking them up with his hand¹. ‘You are clever!’ said he

¹ This paragraph is also found with variations in *Lieh-ze*,

to the man. 'Is there any method in it?' The hunchback replied, 'There is. For five or six months, I practised with two pellets, till they never fell down, and then I only failed with a small fraction¹ of the cicadas (which I tried to catch). Having succeeded in the same way with three (pellets), I missed only one cicada in ten. Having succeeded with five, I caught the cicadas as if I were gathering them. My body is to me no more than the stump of a broken trunk, and my shoulder no more than the branch of a rotten tree. Great as heaven and earth are, and multitudinous as things are, I take no notice of them, but only of the wings of my cicadas; neither turning nor inclining to one side. I would not for them all exchange the wings of my cicadas;—how should I not succeed in taking them?' Confucius looked round, and said to his disciples, "Where the will is not diverted from its object, the spirit is concentrated;"—this might have been spoken of this hunchback gentleman.'

4. Yen Yüan asked *Kung-nî*, saying, 'When I was crossing the gulf of *Khang-shān*², the ferryman handled the boat like a spirit. I asked him whether such management of a boat could be learned, and he replied, "It may. Good swimmers can learn it quickly; but as for divers, without having seen a boat, they can manage it at once." He did not

Bk. II (9^a). The dexterity of the hunchback in catching the cicadas will remind some readers of the account given by the butcher in Book III of his dexterity in cutting up his oxen.

¹ The names of two small weights, used anciently for 'a fraction,' 'a small proportion.'

² This is another paragraph common both to our author and *Lieh-ze*, but in neither is there any intimation of the place.

directly tell me what I asked ;—I venture to ask you what he meant.' *Kung-nî* replied, 'Good swimmers acquire the ability quickly ;—they forget the water (and its dangers). As to those who are able to dive, and without having seen a boat are able to manage it at once, they look on the watery gulf as if it were a hill-side, and the upsetting of a boat as the going back of a carriage. Such upsets and goings back have occurred before them multitudes of times, and have not seriously affected their minds. Wherever they go, they feel at ease on their occurrence.

'He who is contending for a piece of earthenware puts forth all his skill¹. If the prize be a buckle of brass, he shoots timorously ; if it be for an article of gold, he shoots as if he were blind. The skill of the archer is the same in all the cases ; but (in the two latter cases) he is under the influence of solicitude, and looks on the external prize as most important. All who attach importance to what is external show stupidity in themselves.'

5. *Thien Khái-khî*² was having an interview with duke Wei of *Kâu*², who said to him, 'I have heard that (your master) *Kû Hsin*² has studied the subject of Life. What have you, good Sir, heard from him about it in your intercourse with him?' *Thien Khái-khî* replied, 'In my waiting on him in the courtyard with my broom, what should I have heard from my master?' Duke Wei said, 'Do not put the question off, Mr. *Thien* ; I wish to hear what

¹ I think this is the meaning. 注 is defined by 射而賭物, 'to compete for anything by archery.'

² We have no information about who these personages and the others below were, and I have missed the story, if it be in *Lieh-tze*. The duke, it will be seen, had the appanage of *Kâu*.

you have to say.' Khái-ñih then replied, 'I have heard my master say that they who skilfully nourish their life are like shepherds, who whip up the sheep that they see lagging behind¹.' 'What did he mean?' asked the duke. The reply was, 'In Lû there was a Shan Pão, who lived among the rocks, and drank only water. He would not share with the people in their toils and the benefits springing from them; and though he was now in his seventieth year, he had still the complexion of a child. Unfortunately he encountered a hungry tiger, which killed and ate him. There was also a Kang Î, who hung up a screen at his lofty door, and to whom all the people hurried (to pay their respects)². In his fortieth year, he fell ill of a fever and died. (Of these two men), Pão nourished his inner man, and a tiger ate his outer; while Î nourished his outer man, and disease attacked his inner. Both of them neglected whipping up their lagging sheep.'

Kung-nî said, 'A man should not retire and hide himself; he should not push forward and display himself; he should be like the decayed tree which stands in the centre of the ground. Where these three conditions are fulfilled, the name will reach its greatest height. When people fear the dangers of a path, if one man in ten be killed, then fathers and sons, elder brothers and younger, warn one another that they must not go out on a journey without a large number of retainers;—and is it not a mark of wisdom to do so? But there are dangers which

¹ Pay more attention to any part of their culture which they are neglecting.

² It served its purpose there, but had not been put in its place with any special object.

men incur on the mats of their beds, and in eating and drinking ; and when no warning is given against them ;—is it not a mark of error¹ ?

6. The officer of Prayer² in his dark and square-cut robes goes to the pig-pen, and thus counsels the pigs, 'Why should you shrink from dying? I will for three months feed you on grain. Then for ten days I will fast, and keep vigil for three days, after which I will put down the mats of white grass, and lay your shoulders and rumps on the carved stand ;—will not this suit you?' If he had spoken from the standpoint of the pigs, he would have said, 'The better plan will be to feed us with our bran and chaff, and leave us in our pen.' When consulting for himself, he preferred to enjoy, while he lived, his carriage and cap of office, and after death to be borne to the grave on the ornamented carriage, with the canopy over his coffin. Consulting for the pigs, he did not think of these things, but for himself he would have chosen them. Why did he think so differently (for himself and) for the pigs³?

7. (Once), when duke Hwan⁴ was hunting by a marsh, with Kwan Kung⁵ driving the carriage, he saw a ghost. Laying his hand on that of Kwan

¹ This may seem to nourish the body, but in reality injures the life.

² Who had the charge also of the sacrifices.

³ Lin Hsi-kung says that the story shows the many troubles that arise from not renouncing the world. Ensnared by the world, men sacrifice for it their higher life, and are not so wise as pigs are for their life. The short paragraph bristles with difficulties.

⁴ The first of the leading chieftains among the princes ; B. C. 683-642.

⁵ His chief minister.

Kung, he said to him, 'Do you see anything, Father Kung?' 'Your servant sees nothing,' was the reply. The duke then returned, talking incoherently and becoming ill, so that for several days he did not go out. Among the officers of *K'hi* there was a Hwang-ze Kào-ão¹, who said to the duke, 'Your Grace is injuring yourself; how could a ghost injure you? When a paroxysm of irritation is dispersed, and the breath does not return (to the body), what remains in the body is not sufficient for its wants. When it ascends and does not descend, the patient becomes accessible to gusts of anger. When it descends and does not ascend, he loses his memory of things. When it neither ascends nor descends, but remains about the heart in the centre of the body, it makes him ill.' The duke said, 'Yes, but are there ghostly sprites²?' The officer replied, 'There are. About mountain tarns there is the *Lî*; about furnaces, the *K'chieh*; about the dust-heaps inside the door, the *Lei*-thing. In low-lying places in the north-east, the *Pei*-a and *Wa-lung* leap about, and in similar places in the north-west there dwells the *Yî*-yang. About rivers there is the *Wang*-hsiang; about mounds, the *Hsin*; about hills, the *Khwei*; about wilds, the *Fang*-hwang; about marshes, the *Wei*-tho.' 'Let me ask what is the *Wei*-tho like?' asked the duke. Hwang-ze said, 'It is the size of the

¹ An officer introduced here for the occasion, by surname Hwang, and designation Kào-ão. The 3ze simply = Mr.

² The commentators have a deal to say about the folklore of the various sprites mentioned. 'The whole shows that ghostly sprites are the fruit of a disordered mind.' It is a touch of nature that the prince recovers as soon as he knows that the ghost he had seen was of good presage.

nave of a chariot wheel, and the length of the shaft. It wears a purple robe and a red cap. It dislikes the rumbling noise of chariot wheels, and, when it hears it, it puts both its hands to its head and stands up. He who sees it is likely to become the leader of all the other princes.' Duke Hwan burst out laughing and said, 'This was what I saw.' On this he put his robes and cap to rights, and made Hwang-ze sit with him. Before the day was done, his illness was quite gone, he knew not how.

8. *K'î* Hsing-ze was rearing a fighting-cock for the king¹. Being asked after ten days if the bird were ready, he said, 'Not yet; he is still vain and quarrelsome, and relies on his own vigour.' Being asked the same after other ten days, he said, 'Not yet; he still responds to the crow and the appearance of another bird.' After ten days more, he replied, 'Not yet. He still looks angrily, and is full of spirit.' When a fourth ten days had passed, he replied to the question, 'Nearly so. Though another cock crows, it makes no change in him. To look at him, you would say he was a cock of wood. His quality is complete. No other cock will dare to meet him, but will run from him.'

9. Confucius was looking at the cataract near the gorge of Lü², which fell a height of 240 cubits, and

¹ According to the Lieh-ze version of this story (Bk. II, 17^b), the king was king Hsüan, B.C. 827-782. The trainer's rule seems to have been that his bird should meet its antagonist, with all its vigour complete and undisturbed, and not wishing to fight.

² I think that there are two versions of this story in Lieh-ze. In Bk. VIII (4^b, 5^a), it appears that Confucius was on his way from Wei to Lü, when he stopped his carriage or cart at this spot to view the cataract, and the incident occurred, and he took the opportunity to give the lesson to his disciples.

the spray of which floated a distance of forty li, (producing a turbulence) in which no tortoise, gavia, fish, or turtle could play. He saw, however, an old man swimming about in it, as if he had sustained some great calamity, and wished to end his life. Confucius made his disciples hasten along the stream to rescue the man; and by the time they had gone several hundred paces, he was walking along singing, with his hair dishevelled, and enjoying himself at the foot of the embankment. Confucius followed and asked him, saying, 'I thought you were a sprite; but, when I look closely at you, I see that you are a man. Let me ask if you have any particular way of treading the water.' The man said, 'No, I have no particular way. I began (to learn the art) at the very earliest time; as I grew up, it became my nature to practise it; and my success in it is now as sure as fate. I enter and go down with the water in the very centre of its whirl, and come up again with it when it whirls the other way. I follow the way of the water, and do nothing contrary to it of myself;—this is how I tread it.' Confucius said, 'What do you mean by saying that you began to learn the art at the very earliest time; that as you grew up, it became your nature to practise it, and that your success in it now is as sure as fate?' The man replied, 'I was born among these hills and lived contented among them;—that was why I say that I have trod this water from my earliest time. I grew up by it, and have been happy treading it;—that is why I said that to tread it had become natural to me. I know not how I do it, and yet I do it;—that is why I say that my success is as sure as fate.'

10. *K'ing*, the Worker in Rottlera¹ wood, carved a bell-stand², and when it was completed, all who saw it were astonished as if it were the work of spirits. The marquis of Lû went to see it, and asked by what art he had succeeded in producing it. 'Your subject is but a mechanic,' was the reply; 'what art should I be possessed of? Nevertheless, there is one thing (which I will mention). When your servant had undertaken to make the bell-stand, I did not venture to waste any of my power, and felt it necessary to fast in order to compose my mind. After fasting for three days, I did not presume to think of any congratulation, reward, rank, or emolument (which I might obtain by the execution of my task); after fasting five days, I did not presume to think of the condemnation or commendation (which it would produce), or of the skill or want of skill (which it might display). At the end of the seven days, I had forgotten all about myself;—my four limbs and my whole person. By this time the thought of your Grace's court (for which I was to make the thing) had passed away; everything that could divert my mind from exclusive devotion to the exercise of my skill had disappeared. Then I went into the forest, and looked at the natural forms of the trees. When I saw one of a perfect form, then the figure of the bell-stand rose up to my view, and I applied my hand to the work. Had

¹ The *3ze* or *rottlera* was and is a very famous tree, called 'the king of trees,' from its stately appearance and the excellence of its timber.

² The 'bell-stand' is celebrated in the *Shih King*, III, i, Ode 8. A complete peal consisted of twelve bells, suspended in two tiers one above the other.

I not met with such a tree, I must have abandoned the object; but my Heaven-given faculty and the Heaven-given qualities of the wood were concentrated on it. So it was that my spirit was thus engaged in the production of the bell-stand.'

11. Tung-yê *Kî*¹ was introduced to duke *Kwang*² to exhibit his driving. His horses went forwards and backwards with the straightness of a line, and wheeled to the right and the left with the exactness of a circle. The duke thought that the lines and circles could not be surpassed if they were woven with silken strings, and told him to make a hundred circuits on the same lines. On the road Yen Ho³ met the equipage, and on entering (the palace), and seeing the duke, he said, '*Kî*'s horses will break down,' but the duke was silent, and gave him no reply. After a little the horses did come back, having broken down; and the duke then said, 'How did you know that it would be so?' Yen Ho said, 'The horses were exhausted, and he was still urging them on. It was this which made me say that they would break down.'

12. The artisan Shui⁴ made things round (and square) more exactly than if he had used the circle

¹ *Kî* would be the name of the charioteer, a gentleman of Lû, called Tung-yê, 'eastern country,' I suppose from the situation of his estate.

² Duke *Kwang* would be the marquis Thung of Lû, B.C. 693-662.

³ Yen Ho was probably the chief of the Yen family at the time. A scion of it, Yen Hui, afterwards became the favourite disciple of Confucius. He could hardly be the same Yen Ho who is mentioned in Bk. IV, par. 5. *Kî* has had, and still has, his representatives in every country.

⁴ Shui is mentioned in the Shû King, V, xxii, 19, as a famous maker of arrows. Some carry him back to the time of Shun.

and square. The operation of his fingers on (the forms of) things was like the transformations of them (in nature), and required no application of his mind; and so his Intelligence¹ was entire and encountered no resistance.

13. To be unthought of by the foot that wears it is the fitness of a shoe; to be unthought of by the waist is the fitness of a girdle. When one's wisdom does not think of the right or the wrong (of a question under discussion), that shows the suitability of the mind (for the question); when one is conscious of no inward change, or outward attraction, that shows the mastery of affairs. He who perceives at once the fitness, and never loses the sense of it, has the fitness that forgets all about what is fitting.

14. There was a Sun Hsiù² who went to the door of 3ze-pien *K'ing-ze*, and said to him in a strange perturbed way, 'When I lived in my village, no one took notice of me, but all said that I did not cultivate (my fields); in a time of trouble and attack, no one took notice of me, but all said that I had no courage. But that I did not cultivate my fields, was really because I never met with a good year; and that I did not do service for our ruler, was because I did not meet with the suitable opportunity to do so. I have been sent about my business by the villagers, and am driven away by the registrars of the district;—what is my crime? O Heaven! how is it that I have met with such a fate?'

¹ Literally, 'Tower of Intelligence,'—a Taoistic name for the mind.

² A weakling, of whom we know only what we read here.

Pien-ze¹ said to him, 'Have you not heard how the perfect man deals with himself? He forgets that he has a liver and gall. He takes no thought of his ears and eyes. He seems lost and aimless beyond the dust and dirt of the world, and enjoys himself at ease in occupations untroubled by the affairs of business. He may be described as acting and yet not relying on what he does, as being superior and yet not using his superiority to exercise any control. But now you would make a display of your wisdom to astonish the ignorant; you would cultivate your person to make the inferiority of others more apparent; you seek to shine as if you were carrying the sun and moon in your hands. That you are complete in your bodily frame, and possess all its nine openings; that you have not met with any calamity in the middle of your course, such as deafness, blindness, or lameness, and can still take your place as a man among other men;—in all this you are fortunate. What leisure have you to murmur against Heaven? Go away, Sir.'

Sun-ze on this went out, and Pien-ze went inside. Having sitten down, after a little time he looked up to heaven, and sighed. His disciples asked him why he sighed, and he said to them, 'Hsiû came to me a little while ago, and I told him the characteristics of the perfect man. I am afraid he will be frightened, and get into a state of perplexity.' His disciples said, 'Not so. If what he said was right, and what you

¹ This must have been a man of more note. We find him here with a school of disciples in his house, and sought out for counsel by men like Sun Hsiû.

said was wrong, the wrong will certainly not be able to perplex the right. If what he said was wrong, and what you said was right, it was just because he was perplexed that he came to you. What was your fault in dealing with him as you did?' Pien-ze said, 'Not so. Formerly a bird came, and took up its seat in the suburbs of Lû¹. The ruler of Lû was pleased with it, and provided an ox, a sheep, and a pig to feast it, causing also the Kîû-sháo to be performed to delight it. But the bird began to be sad, looked dazed, and did not venture to eat or drink. This was what is called "Nourishing a bird, as you would nourish yourself." He who would nourish a bird as a bird should be nourished should let it perch in a deep forest, or let it float on a river or lake, or let it find its food naturally and undisturbed on the level dry ground. Now Hsiû (came to me), a man of slender intelligence, and slight information, and I told him of the characteristics of the perfect man, it was like using a carriage and horses to convey a mouse, or trying to delight a quail with the music of bells and drums;—could the creatures help being frightened?'

¹ Compare par. 5, Bk. XVIII.

BOOK XX.

PART II. SECTION XIII.

Shan Mû, or 'The Tree on the Mountain'.¹

1. *Kwang-ze* was walking on a mountain, when he saw a great tree² with huge branches and luxuriant foliage. A wood-cutter was resting by its side, but he would not touch it, and, when asked the reason, said, that it was of no use for anything. *Kwang-ze* then said to his disciples, 'This tree, because its wood is good for nothing, will succeed in living out its natural term of years.' Having left the mountain, the Master lodged in the house of an old friend, who was glad to see him, and ordered his waiting-lad to kill a goose and boil it. The lad said, 'One of our geese can cackle, and the other cannot;—which of them shall I kill?' The host said, 'Kill the one that cannot cackle.'

Next day, his disciples asked *Kwang-ze*, saying, 'Yesterday the tree on the mountain (you said) would live out its years because of the uselessness of its wood, and now our host's goose has died because of its want of power (to cackle);—which of these conditions, Master, would you prefer to be in?' *Kwang-ze* laughed and said, '(If I said that) I would prefer to be in a position between being fit to be useful and wanting that fitness, that would

¹ See vol. xxxix, p. 151.

² Compare the accounts of great trees in I, par.6; IV, par.1; et al.

seem to be the right position, but it would not be so, for it would not put me beyond being involved in trouble; whereas one who takes his seat on the Táo and its Attributes, and there finds his ease and enjoyment, is not exposed to such a contingency. He is above the reach both of praise and of detraction; now he (mounts aloft) like a dragon, now he (keeps beneath) like a snake; he is transformed with the (changing) character of the time, and is not willing to addict himself to any one thing; now in a high position and now in a low, he is in harmony with all his surroundings; he enjoys himself at ease with the Author of all things¹; he treats things as things, and is not a thing to them:—where is his liability to be involved in trouble? This was the method of Shǎn Nǎng and Hwang-Ti. As to those who occupy themselves with the qualities of things, and with the teaching and practice of the human relations, it is not so with them. Union brings on separation; success, overthrow; sharp corners, the use of the file; honour, critical remarks; active exertion, failure; wisdom, scheming; inferiority, being despised:—where is the possibility of unchangeableness in any of these conditions? Remember this, my disciples. Let your abode be here,—in the Táo and its Attributes².

2. Î-lião³, an officer of Shih-nan³, having an in-

¹ The Táo; called 衆父父, in Bk. XII, par. 5.

² But after all it comes to be the same thing in point of fact with those who ground themselves in the Táo, and with others.

³ The Î-lião here was a scion of the ruling House of K'ü, and is mentioned fortunately in the Supplement to the 30-*hwan*, under the very year in which Confucius died (B. C. 479). His residence was in the south of the 'Market Place' of the city where he lived,

terview with the marquis of Lû¹, found him looking sad, and asked him why he was so. The marquis said, 'I have studied the ways of the former kings, and cultivated the inheritance left me by my predecessors. I reverence the spirits of the departed and honour the men of worth, doing this with personal devotion, and without the slightest intermission. Notwithstanding, I do not avoid meeting with calamity, and this it is which makes me sad.' The officer said, 'The arts by which you try to remove calamity are shallow. Think of the close-furred fox and of the elegantly-spotted leopard. They lodge in the forests on the hills, and lurk in their holes among the rocks;—keeping still. At night they go about, and during day remain in their lairs;—so cautious are they. Even if they are suffering from hunger, thirst, and other distresses, they still keep aloof from men, seeking their food about the Kiang and the Ho;—so resolute are they. Still they are not able to escape the danger of the net or the trap; and what fault is it of theirs? It is their skins which occasion them the calamity.

'And is not the state of Lû your lordship's skin? I wish your lordship to rip your skin from your body, to cleanse your heart, to put away your desires, and to enjoy yourself where you will be

which is the meaning of the Shih-nan in the text. The description of his character is that no offer of gain could win him, and no threatening terrify him. We find him here at the court of Lû in friendly conference with the marquis, and trying to persuade him to adopt the ways of Tâoism, which he presents to him under the figure of an allegory, an utopia called 'the State of Established Virtue,' in the south of Yüeh.

¹ Probably known to us as 'duke Âi.'

without the presence of any one. In the southern state of Yüeh, there is a district called "the State of Established Virtue." The people are ignorant and simple; their object is to minimise the thought of self and make their desires few; they labour but do not lay up their gains; they give but do not seek for any return; they do not know what righteousness is required of them in any particular case, nor by what ceremonies their performances should be signalised; acting in a wild and eccentric way as if they were mad, they yet keep to the grand rules of conduct. Their birth is an occasion for joy; their death is followed by the rites of burial. I should wish your lordship to leave your state; to give up your ordinary ways, and to proceed to that country by the directest course.'

The ruler said, 'The way to it is distant and difficult; there are rivers and hills; and as I have neither boat nor carriage, how am I to go?' The officer from Shih-nan rejoined, 'If your lordship abjure your personal state, and give up your wish to remain here, that will serve you for a carriage.' The ruler rejoined, 'The way to it is solitary and distant, and there are no people on it;—whom shall I have as my companions? I have no provisions prepared, and how shall I get food?—how shall I be able to get (to the country)?' The officer said, 'Minimise your lordship's expenditure, and make your wants few, and though you have no provisions prepared, you will find you have enough. Wade through the rivers and float along on the sea, where however you look, you see not the shore, and, the farther you go, you do not see where your journey is to end;—those who escorted you to the shore will

return, and after that you will feel yourself far away. Thus it is that he who owns men (as their ruler) is involved in troubles, and he who is owned by men (as their ruler) suffers from sadness; and hence Yâo would neither own men, nor be owned by them. I wish to remove your trouble, and take away your sadness, and it is only (to be done by inducing you) to enjoy yourself with the Tâo in the land of Great Vacuity.

‘If a man is crossing a river in a boat, and another empty vessel comes into collision with it, even though he be a man of a choleric temper, he will not be angry with it. If there be a person, however, in that boat, he will bawl out to him to haul out of the way. If his shout be not heard, he will repeat it; and if the other do not then hear, he will call out a third time, following up the shout with abusive terms. Formerly he was not angry, but now he is; formerly (he thought) the boat was empty, but now there is a person in it. If a man can empty himself of himself, during his time in the world, who can harm him?’

3. Pei-kung Shê¹ was collecting taxes for duke Ling of Wei, to be employed in making (a peal of) bells. (In connexion with the work) he built an altar outside the gate of the suburban wall; and in three months the bells were completed, even to the suspending of the upper and lower (tiers). The king's son *K'ing-ki*² saw them, and asked what

¹ Pei-kung, ‘Northern Palace,’ must have been the name of Shê's residence, and appears here as if it were his surname.

² A son, probably of king K'ing of K'âu (B.C. 544-529).—On the whole paragraph, see par. 10 of the preceding Book.

arts he had employed in the making of them. Shê replied, 'Besides my undivided attention to them, I did not venture to use any arts. I have heard the saying, "After all the carving and the chiselling, let the object be to return to simplicity." I was as a child who has no knowledge; I was extraordinarily slow and hesitating; they grew like the springing plants of themselves. In escorting those who went and meeting those who came, my object was neither to hinder the comers nor detain the goers. I suffered those who strongly opposed to take their way, and accepted those who did their best to come to terms. I allowed them all to do the utmost they could, and in this way morning and evening I collected the taxes. I did not have the slightest trouble, and how much more will this be the case with those who pursue the Great Way (on a grand scale)!'

4. Confucius was kept (by his enemies) in a state of siege between *K'zăn* and *Zhâi*¹, and for seven days had no food cooked with fire to eat. The *Thâi-kung Zân*² went to condole with him, and said, 'You had nearly met with your death.' 'Yes,' was the reply. 'Do you dislike death?' 'I do.' Then *Zân* continued, 'Let me try and describe a way by which (such a) death may be avoided.—In the eastern sea there are birds which go by the name of *Î-ts*³; they fly low and slowly as if they were deficient in power. They fly as if they were

¹ Compare *Analects* XI, ii.

² We might translate *Thâi-kung* by 'the grand-duke.' We know nothing about him. He tries to convert Confucius to Tâoism just as *Î-liáo* does the marquis of *Lû* in par. 2; and for a time at least, as *K'wang-ze* makes it appear, with more success.

³ Were these *Î-ts* swallows? So some of the critics say.

leading and assisting one another, and they press on one another when they roost. No one ventures to take the lead in going forward, or to be the last in going backwards. In eating no one ventures to take the first mouthful, but prefers the fragments left by others. In this way (the breaks in) their line are not many¹, and men outside them cannot harm them, so that they escape injury.

‘The straight tree is the first to be cut down; the well of sweet water is the first to be exhausted. Your aim is to embellish your wisdom so as to startle the ignorant, and to cultivate your person to show the unsightliness of others. A light shines around you as if you were carrying with you the sun and moon, and thus it is that you do not escape such calamity. Formerly I heard a highly accomplished man say, “Those who boast have no merit. The merit which is deemed complete will begin to decay. The fame which is deemed complete will begin to wane.” Who can rid himself of (the ideas of) merit and fame, and return and put himself on the level of the masses of men? The practice of the Táo flows abroad, but its master does not care to dwell where it can be seen; his attainments in it hold their course, but he does not wish to appear in its display. Always simple and commonplace, he may seem to be bereft of reason. He obliterates the traces of his action, gives up position and power, and aims not at merit and fame. Therefore he does not censure men, and men do not censure him. The perfect man does not seek to be heard of; how is it that you delight in doing so?’

¹ A clause of uncertain meaning.

Confucius said, 'Excellent ;' and thereupon he took leave of his associates, forsook his disciples, retired to the neighbourhood of a great marsh, wore skins and hair cloth, and ate acorns and chestnuts. He went among animals without causing any confusion among their herds, and among birds without troubling their movements. Birds and beasts did not dislike him ; how much less would men do so !

5. Confucius asked 3ze-sang Hû¹, saying, 'I was twice driven from Lû ; the tree was felled over me in Sung ; I was obliged to disappear from Wei ; I was reduced to extreme distress in Shang and Kâu² ; and I was kept in a state of siege between K'ăn and 3hâi. I have encountered these various calamities ; my intimate associates are removed from me more and more ; my followers and friends are more and more dispersed ;—why have all these things befallen me ?' 3ze-sang Hû replied, 'Have you not heard of the flight of Lin Hui of K'ia³ ;—how he abandoned his round jade symbol of rank, worth a thousand pieces of silver, and hurried away with his infant son on his back ? If it be asked, "Was it because of the market value of the child ?" But that value was small (compared with the value of the jade token). If it be asked again, "Was it because of the troubles

¹ Supposed to have been a recluse.

² I do not know the particulars of this distress in Shang and Kâu, or have forgotten them. A still more full recital of the sage's misfortunes occurs in Lieh-ze, VII, 8^a.

³ The text here appears to be somewhat confused. Lin Hui is said to have been a man of the Yin dynasty, and of a state which was called K'ia, and for the verification of such a state I have searched in vain. The explanation of his conduct put here into his mouth is very good.

(of his office)?” But the child would occasion him much more trouble. Why was it then that, abandoning the jade token, worth a thousand pieces of silver, he hurried away with the child on his back? Lin Hui (himself) said, “The union between me and the token rested on the ground of gain; that between me and the child was of Heaven’s appointment.” Where the bond of union is its profitableness, when the pressure of poverty, calamity, distress, and injury come, the parties abandon one another; when it is of Heaven’s appointment, they hold in the same circumstances to one another. Now between abandoning one another, and holding to one another, the difference is great. Moreover, the intercourse of superior men is tasteless as water, while that of mean men is sweet as new wine. But the tastelessness of the superior men leads on to affection, and the sweetness of the mean men to aversion. The union which originates without any cause will end in separation without any cause.’

Confucius said, ‘I have reverently received your instructions.’ And hereupon, with a slow step and an assumed air of ease, he returned to his own house. There he made an end of studying and put away his books. His disciples came no more to make their bow to him (and be taught), but their affection for him increased the more.

Another day Sang Hû said further to him, ‘When Shun was about to die, he charged ¹ Yü, saying, ‘Be

¹ The 真冷 of the text here are allowed on all hands to be spurious, and 其命 have been substituted for them. What follows, however, from Shun to Yü, is far from being clear, in itself, or in its connexion.

upon your guard. (The attraction of) the person is not like that of sympathy; the (power of) affection is not like the leading (of example). Where there is sympathy, there will not be separation; where there is (the leading of) example, there will be no toil. Where there is neither separation nor toil, you will not have to seek the decoration of forms to make the person attractive, and where there is no such need of those forms, there will certainly be none for external things.'

6. *Kwang-ze* in a patched dress of coarse cloth, and having his shoes tied together with strings, was passing by the king of Wei, who said to him, 'How great, Master, is your distress?' *Kwang-ze* replied, 'It is poverty, not distress! While a scholar possesses the Tâo and its Attributes, he cannot be going about in distress. Tattered clothes and shoes tied on the feet are the sign of poverty, and not of distress. This is what we call not meeting with the right time. Has your majesty not seen the climbing monkey? When he is among the plane trees, rottleras, oaks, and camphor trees, he grasps and twists their branches (into a screen), where he reigns quite at his ease, so that not even *Î*¹ or *Phăng Măng*¹ could spy him out. When, however, he finds himself among the prickly mulberry and date trees, and other thorns, he goes cautiously, casts sidelong glances, and takes every trembling movement with apprehension;—it is not that his sinews and bones

¹ *Î*;—see Book V, par. 2. *Phăng Măng* was a contemporary of *Î*, learned archery from him, and then slew him, that he might himself be the foremost archer in the kingdom;—see Mencius IV, ii, 24.

are straitened, and have lost their suppleness, but the situation is unsuitable for him, and he cannot display his agility. And now when I dwell under a benighted ruler, and seditious ministers, how is it possible for me not to be in distress? My case might afford an illustration of the cutting out the heart of Pî-kan¹!

7. When Confucius was reduced to great distress between *Khăn* and *Khài*, and for seven days he had no cooked food to eat, he laid hold of a decayed tree with his left hand, and with his right hand tapped it with a decayed branch, singing all the while the ode of Piáo-shih². He had his instrument, but the notes were not marked on it. There was a noise, but no blended melody. The sound of the wood and the voice of the man came together like the noise of the plough through the ground, yet suitably to the feelings of the disciples around. Yen Hui, who was standing upright, with his hands crossed on his breast, rolled his eyes round to observe him. Kung-ni, fearing that Hui would go to excess in manifesting how he honoured himself, or be plunged in sorrow through his love for him, said to him, 'Hui, not to receive (as evils) the inflictions of Heaven is easy; not to receive (as benefits) the favours of men is difficult. There is no beginning which was not an end. The Human and the Heavenly may be one

¹ 'A spurious paragraph, no doubt.' Lin Hsi-kung thus concludes what he has to say on this paragraph; but it is not without its interest and lessons.

² I do not know who this was, nor what his ode or air was. Lû Teh-ming read the character 焄, and says that Piáo-shih was one of the old royal Tîs who did nothing. In all my texts it is wrongly printed with three 火.

and the same. Who, for instance, is it that is now singing¹?’ Hui said, ‘I venture to ask how not to receive (as evils) the inflictions of Heaven is easy.’ Kung-nî said, ‘Hunger, thirst, cold, and heat, and having one’s progress entirely blocked up;—these are the doings of Heaven and Earth, necessary incidents in the revolutions of things. They are occurrences of which we say that we will pass on (composedly) along with them. The minister of another does not dare to refuse his commands; and if he who is discharging the duty of a minister feels it necessary to act thus, how much more should we wait with ease on the commands of Heaven²!’ ‘What do you mean by saying that not to receive (as benefits) the favours of men is difficult?’ Kung-nî said, ‘As soon as one is employed in office, he gets forward in all directions; rank and emolument come to him together, and without end. But these advantages do not come from one’s self;—it is my appointed lot to have such external good. The superior man is not a robber; the man of worth is no filcher;—if I prefer such things, what am I³? Hence it is said, “There is no bird wiser than the swallow.” Where its eye lights on a place that is not suitable for it, it does not give it a second glance. Though it may drop the food from its

¹ This question arose out of the previous statement that man and Heaven might be one,—acting with the same spontaneity.

² Confucius recognises here, as he often does, a power beyond his own, ‘his appointed lot,’ what we call destiny, to which the Tâo requires submission. This comes very near to our idea of God.

³ Human gifts had such an attraction, that they tended to take from man his heavenly spontaneity; and were to be eschewed, or received only with great caution.

mouth, it abandons it, and hurries off. It is afraid of men, and yet it stealthily takes up its dwelling by his; finding its protection in the altars of the Land and Grain ¹.

'What do you mean by saying that there is no beginning which was not an end?' *Kung-ni* said, 'The change—rise and dissolution—of all things (continually) goes on, but we do not know who it is that maintains and continues the process. How do we know when any one begins? How do we know when he will end? We have simply to wait for it, and nothing more ².'

'And what do you mean by saying that the Human and the Heavenly are one and the same?' *Kung-ni* said, 'Given man, and you have Heaven; given Heaven, and you still have Heaven (and nothing more). That man can not have Heaven is owing to the limitation of his nature ³. The sagely man quietly passes away with his body, and there is an end of it.'

8. As *Kwang Kâu* was rambling in the park of *Tiào-ling* ⁴ he saw a strange bird which came from the south. Its wings were seven cubits in width, and

¹ What is said here about the swallow is quite obscure. *Hsi-kung* says that all the old attempts to explain it are ridiculous, and then propounds an ingenious one of his own; but I will leave the passage with my reader to deal with it as he best can.

² Compare with this how in Book XVIII we find *Kwang-ze* singing by the dead body of his wife.

³ That man is man and not Heaven is simply from the limitation of his nature,—his 'appointed lot.'

⁴ *Tiào-ling* might be translated 'Eagle Mount.' Where it was I do not know; perhaps the name originated with *Kwang-ze*, and thus has become semi-historical.

its eyes were large, an inch in circuit. It touched the forehead of *Kâu* as it passed him, and lighted in a grove of chestnut trees. 'What bird is this?' said he, 'with such great wings not to go on! and with such large eyes not to see me!' He lifted up his skirts, and hurried with his cross-bow, waiting for (an opportunity to shoot) it. (Meanwhile) he saw a cicada, which had just alighted in a beautiful shady spot, and forgot its (care for its) body. (Just then), a preying mantis raised its feelers, and pounced on the cicada, in its eagerness for its prey, (also) forgetting (its care for) its body; while the strange bird took advantage of its opportunity to secure them both, in view of that gain forgetting its true (instinct of preservation)¹. *Kwang Kâu* with an emotion of pity, said, 'Ah! so it is that things bring evil on one another, each of these creatures invited its own calamity.' (With this) he put away his cross-bow, and was hurrying away back, when the forester pursued him with terms of reproach.

When he returned and went into his house, he did not appear in his courtyard² for three months². (When he came out), *Lan 3ü*³ (his disciple) asked him, saying, 'Master, why have you for this some time avoided the courtyard so much?' *Kwang-ze* replied, 'I was guarding my person, and forgot myself; I was looking at turbid water, till I

¹ *Kwang-ze* might now have shot the bird, but we like him the better for letting it alone.

² So then, masters of schools, like *Kwang-ze*, received and taught their disciples in the courtyard of their house;—in China as elsewhere. For three 'months,' it is conjectured, we should read three 'days.'

³ The disciple *Lan 3ü* appears here, but not, so far as I know, elsewhere.

mistook the clear pool. And moreover I have heard the Master say¹, "Going where certain customs prevail, you should follow those customs." I was walking about in the park of Tiáo-ling, and forgot myself. A strange bird brushed past my forehead, and went flying about in the grove of chestnuts, where it forgot the true (art of preserving itself). The forester of the chestnut grove thought that I was a fitting object for his reproach. These are the reasons why I have avoided the courtyard.'

9. Yang-3ze, having gone to Sung, passed the night in a lodging-house, the master of which had two concubines;—one beautiful, the other ugly². The ugly one was honoured, however, and the beautiful one contemned. Yang-3ze asked the reason, and a little boy of the house replied, 'The beauty knows her beauty, and we do not recognise it. The ugly one knows her ugliness, and we do not recognise it.' Yang-3ze said, 'Remember it, my disciples. Act virtuously, and put away the practice of priding yourselves on your virtue. If you do this, where can you go to that you will not be loved³?'

¹ Who was this 'Master?'

² The story here is found in Lieh-3ze II, 15^{a, b}. The Yang-3ze is there Yang K'ü, against whom Mencius so often directed his arguments.

³ See the greater part of this paragraph in Prémare's 'Notitia Linguae Sinicae,' p. 200, with his remarks on the style.

BOOK XXI.

PART II. SECTION XIV.

Thien 3ze-fang¹.

1. Thien 3ze-fang, sitting in attendance on the marquis Wăn of Wei², often quoted (with approbation) the words of *Khi* Kung³. The marquis said, 'Is *Khi* Kung your preceptor?' 3ze-fang replied, 'No. He only belongs to the same neighbourhood. In speaking about the Tâo, his views are often correct, and therefore I quote them as I do.' The marquis went on, 'Then have you no preceptor?' 'I have.' 'And who is he?' 'He is Tung-kwo Shun-ze⁴.' 'And why, my Master, have I never heard you quote his words?' 3ze-fang replied, 'He is a man who satisfies the true (ideal of humanity)⁵; a man in appearance, but (having the mind of) Heaven. Void of any thought of himself, he accommodates himself to others, and nourishes the true ideal that belongs to him. With all his purity, he is forbearing to others. Where they are without the Tâo, he rectifies his demeanour, so that they understand it, and in consequence their own ideas melt

¹ See vol. xxxix, pp. 151, 152.

² B.C. 424-387.

³ Some well-known worthy of Wei.

⁴ A greater worthy still. He must have lived near the outside suburban wall of the capital, and his residence became a sort of surname.

⁵ The Human and the Heavenly were blended in his personality.

away and disappear. How should one like me be fit to quote his words ?'

When 3ze-fang went out, the marquis Wăn continued in a state of dumb amazement all the day. He then called Lung Li-*khăn*, and said to him, 'How far removed from us is the superior man of complete virtue ! Formerly I thought the words of the sages and wise men, and the practice of benevolence and righteousness, to be the utmost we could reach to. Since I have heard about the preceptor of 3ze-fang, my body is all unstrung, and I do not wish to move, and my mouth is closed up, and I do not wish to speak ;—what I have learned has been only a counterfeit of the truth¹. Yes, (the possession of Wei) has been an entanglement to me.'

2. Wăn-po Hsüeh-ze², on his way to *Khî*, stayed some time in *Lû*, where some persons of the state begged to have an interview with him. He refused them, saying, 'I have heard that the superior men of these Middle States³ understand the (subjects of) ceremony and righteousness, but are deplorably ignorant of the minds of men. I do not wish to see them.' He went on to *Khî*; and on his way back (to the south), he again stayed in *Lû*, when the same persons begged as before for an interview. He then said, 'Formerly they asked to see me, and now again they seek an interview. They will afford me

¹ So the Khang-hsî dictionary defines the phrase ;—'a wooden image made of earth,' says *Lû Shû-kih*.

² A Tâoist of note from some region in the south, perhaps from *Khî*, having his own share of the Tâoistic contempt for knowledge and culture.

³ Probably *Lû* and the northern states grouped closely round the royal domain.

some opportunity of bringing out my sentiments.' He went out accordingly and saw the visitors, and came in again with a sigh. Next day the same thing occurred, and his servant said to him, 'How is it that whenever you see those visitors, you are sure to come in again sighing?' 'I told you before,' was the reply, 'that the people of these Middle States understand (the subjects of) ceremony and righteousness, but are deplorably ignorant of the minds of men. Those men who have just seen me, as they came in and went out would describe, one a circle and another a square, and in their easy carriage would be like, one a dragon and another a tiger. They remonstrated with me as sons (with their fathers), and laid down the way for me as fathers (for their sons). It was this which made me sigh.'

Kung-nî saw the man, but did not speak a word to him. *3ze-lû* said, 'You have wished, Sir, to see this *Wăn-po Hsüeh-ze* for a long time; what is the reason that when you have seen him, you have not spoken a word?' *Kung-nî* replied, 'As soon as my eyes lighted on that man, the *Tâo* in him was apparent. The situation did not admit of a word being spoken.'

3. *Yen Yüan* asked *Kung-nî*, saying, 'Master, when you pace quietly along, I also pace along; when you go more quickly, I also do the same; when you gallop, I also gallop; but when you race along and spurn the dust, then I can only stand and look, and keep behind you¹.' The Master said, 'Hui, what do you mean?' The reply was, 'In saying that "when you, Master, pace quietly along, I also pace

¹ They are both supposed to be on horseback.

along," I mean¹ that when you speak, I also speak. By saying, "When you go more quickly, I also do the same," I mean¹ that when you reason, I also reason. By saying, "When you gallop, I also gallop," I mean¹ that when you speak of the Way, I also speak of the Way; but by saying, "When you race along and spurn the dust, then I can only stare, and keep behind you," I am thinking how though you do not speak, yet all men believe you; though you are no partisan, yet all parties approve your catholicity; and though you sound no instrument, yet people all move on harmoniously before you, while (all the while) I do not know how all this comes about; and this is all which my words are intended to express².

Kung-ni said, 'But you must try and search the matter out. Of all causes for sorrow there is none so great as the death of the mind;—the death of man's (body) is only next to it. The sun comes forth in the east, and sets in the extreme west;—all things have their position determined by these two points. All that have eyes and feet wait for this (sun), and then proceed to do what they have to do. When this comes forth, they appear in their places; when it sets, they disappear. It is so with all things. They have that for which they wait, and (on its arrival) they die; they have that for which they wait, and then (again) they live. When once I receive my frame thus completed, I remain unchanged, awaiting the consummation of my course.

¹ In these three cases the 也 of the text should be 者.

² So Hui is made to represent the master as a mental Thaumaturgist, and Confucius is made to try to explain the whole thing to him;—but not to my mind successfully. Still a distinction is maintained between the mind and the body.

I move as acted on by things, day and night without cessation, and I do not know when I will come to an end. Clearly I am here a completed frame, and even one who (fancies that he) knows what is appointed cannot determine it beforehand. I am in this way daily passing on, but all day long I am communicating my views to you; and now, as we are shoulder to shoulder you fail (to understand me);—is it not matter for lamentation? You are able in a measure to set forth what I more clearly set forth; but that is passed away, and you look for it, as if it were still existing, just as if you were looking for a horse in the now empty place where it was formerly exhibited for sale. You have very much forgotten my service to you, and I have very much forgotten wherein I served you. But nevertheless why should you account this such an evil? What you forget is but my old self; that which cannot be forgotten remains with me.'

4. Confucius went to see Láo Tan, and arrived just as he had completed the bathing of his head, and was letting his dishevelled hair get dry. There he was, motionless, and as if there were not another man in the world¹. Confucius waited quietly; and, when in a little time he was introduced, he said, 'Were my eyes dazed? Is it really you? Just now, your body, Sir, was like the stump of a rotten tree. You looked as if you had no thought of anything, as if you had left the society of men, and were standing in the solitude (of yourself).' Láo Tan replied, 'I was enjoying myself in thinking about the commencement

¹ He was in the Táoistic trance, like Nan-kwo 3ze-~~hhi~~, at the beginning of the second Book.

of things¹. 'What do you mean?' 'My mind is so cramped, that I hardly know it; my tongue is so tied that I cannot tell it; but I will try to describe it to you as nearly as I can. When the state of Yin was perfect, all was cold and severe; when the state of Yang was perfect, all was turbulent and agitated. The coldness and severity came forth from Heaven; the turbulence and agitation issued from Earth. The two states communicating together, a harmony ensued and things were produced. Some one regulated and controlled this, but no one has seen his form. Decay and growth; fulness and emptiness; darkness and light; the changes of the sun and the transformations of the moon:—these are brought about from day to day; but no one sees the process of production. Life has its origin from which it springs, and death has its place from which it returns. Beginning and ending go on in mutual contrariety without any determinable commencement, and no one knows how either comes to an end. If we disallow all this, who originates and presides over all these phenomena?'

Confucius said, 'I beg to ask about your enjoyment in these thoughts.' Lâu Tan replied, 'The

¹ This 'commencement of things' was not the equivalent of 'our creation out of nothing,' for Lâu Tan immediately supposes the existence of the primary ether in its twofold state, as Yin and Yang; and also of Heaven and Earth, as a twofold Power working, under some regulation and control, yet invisible; that is, under the Táo. In the same way the process of beginning and ending, growth and decay, life and death go on, no one knows how, or how long. And the contemplation of all this is the cause of unceasing delight to the Perfect man, the possessor of the Táo. Death is a small matter, merely as a change of feature; and Confucius acknowledges his immeasurable inferiority to Lâu-3ze.

comprehension of this is the most admirable and the most enjoyable (of all acquisitions). The getting of the most admirable and the exercise of the thoughts in what is the most enjoyable, constitutes what we call the Perfect man.' Confucius said, 'I should like to hear the method of attaining to it.' The reply was, 'Grass-eating animals do not dislike to change their pastures; creatures born in the water do not dislike to change their waters. They make a small change, but do not lose what is the great and regular requirement (of their nature); joy, anger, sadness, and delight do not enter into their breasts (in connexion with such events). Now the space under the sky is occupied by all things in their unity. When they possess that unity and equally share it, then the four limbs and hundred members of their body are but so much dust and dirt, while death and life, their ending and beginning, are but as the succession of day and night, which cannot disturb their enjoyment; and how much less will they be troubled by gains and losses, by calamity and happiness! Those who renounce the paraphernalia of rank do it as if they were casting away so much mud;—they know that they are themselves more honourable than those paraphernalia. The honour belonging to one's self is not lost by any change (of condition). Moreover, a myriad transformations may take place before the end of them is reached. What is there in all this sufficient to trouble the mind? Those who have attained to the Tâo understand the subject.'

Confucius said, 'O Master, your virtue is equal to that of Heaven and Earth, and still I must borrow

(some of your) perfect words (to aid me) in the cultivation of my mind. Who among the superior men of antiquity could give such expression to them?' Lâo Tan replied, 'Not so. Look at the spring, the water of which rises and overflows;—it does nothing, but it naturally acts so. So with the perfect man and his virtue;—he does not cultivate it, and nothing evades its influence. He is like heaven which is high of itself, like earth which is solid of itself, like the sun and moon which shine of themselves;—what need is there to cultivate it?'

Confucius went out and reported the conversation to Yen Hui, saying, 'In the (knowledge of the) Tâo am I any better than an animalcule in vinegar? But for the Master's lifting the veil from me, I should not have known the grand perfection of Heaven and Earth.'

5. At an interview of *Kwang-ze* with duke Âi¹ of Lû, the duke said, 'There are many of the Learned class in Lû; but few of them can be compared with you, Sir.' *Kwang-ze* replied, 'There are few Learned men in Lû.' 'Everywhere in Lû,' rejoined the duke, 'you see men wearing the dress of the Learned²;—how can you say that they are few?' 'I have heard,' said *Kwang-ze*, 'that those of them who wear round caps know the times of heaven; that those who wear square shoes know the contour of the ground; and that those who saunter about with semicircular stones at their

¹ Duke Âi of Lû died in B.C. 468, a century and more before the birth of *Kwang-ze*. On that, as well as on other grounds, the paragraph cannot be genuine.

² Compare the thirty-eighth Book of the *Lî K'î*, where Confucius denies that there was any dress peculiar to the scholar,

girdle-pendants settle matters in dispute as they come before them. But superior men who are possessed of such knowledge will not be found wearing the dress, and it does not follow that those who wear the dress possess the knowledge. If your Grace think otherwise, why not issue a notification through the state, that it shall be a capital offence to wear the dress without possessing the knowledge.' On this the duke issued such a notification, and in five days, throughout all Lû, there was no one who dared to wear the dress of the Learned. There was only one old man who came and stood in it at the duke's gate. The duke instantly called him in, and questioned him about the affairs of the state, when he talked about a thousand points and ten thousand divergences from them. Kwang-ze said, 'When the state of Lû can thus produce but one man of the Learned class, can he be said to be many?'

6. The ideas of rank and emolument did not enter the mind of Pâi-lî Hsî¹, and so he became a cattle-feeder, and his cattle were all in fine condition. This made duke Mû of K'in forget the meanness of his position, and put the government (of his state) into his hands. Neither life nor death entered into the mind of (Shun), the Lord of Yü, and therefore he was able to influence others².

7. The ruler Yüan³ of Sung wishing to have a map

¹ Pâi-lî Hsî, a remarkable character of the seventh century B.C., who rose to be chief minister to Mû, the earl (or duke) of K'in, the last of the five Leading Princes of the kingdom. Mû died in B.C. 621. Mencius has much to say of Pâi-lî Hsî.

² Shun's parents wished to kill him; but that did not trouble his mind; his filial piety even affected them.

³ His first year as duke of Sung was B.C. 530. The point of the story is not clear.

drawn, the masters of the pencil all came (to undertake the task). Having received his instructions and made their bows, they stood, licking their pencils and preparing their ink. Half their number, however, remained outside. There was one who came late, with an air of indifference, and did not hurry forward. When he had received his instructions and made his bow, he did not keep standing, but proceeded to his shed. The duke sent a man to see him, and there he was, with his upper garment off, sitting cross-legged, and nearly naked. The ruler said, 'He is the man; he is a true draughtsman.'

8. King Wăn was (once) looking about him at 3ang¹, when he saw an old man fishing². But his fishing was no fishing. It was not the fishing of one whose business is fishing. He was always fishing (as if he had no object in the occupation). The king wished to raise him to office, and put the government into his hands, but was afraid that such a step would give dissatisfaction to his great ministers, his uncles, and cousins. He then wished to dismiss the man altogether from his mind, but he could not bear the thought that his people should be without (such a) Heaven (as their Protector). On this, (next) morning, he called together his great officers, and said to them, 'Last night, I dreamt that I saw a good man, with a dark complexion and a

¹ Where 3ang was cannot be told.

² The old fisherman here was, no doubt, the first marquis of *Khî*, after the establishment of the dynasty of *Kâu*, known by various names, as *Lü Shang*, *Thái-kung Wang*, and *Kiang 3ze-yâ*. He did much for the new rule, but his connexion with kings Wăn and Wû is a mass of fables. The fishing as if he were not fishing betokened in him the aimlessness of the *Táo*.

beard, riding on a piebald horse, one half of whose hoofs were red, who commanded me, saying, "Lodge your government in the hands of the old man of 3ang; and perhaps the evils of your people will be cured." The great officers said eagerly, 'It was the king, your father.' King Wăn said, 'Let us then submit the proposal to the tortoise-shell.' They replied, 'It is the order of your father. Let not your majesty think of any other. Why divine about it?' (The king) then met the old man of 3ang, and committed the government to him.

The statutes and laws were not changed by him; not a one-sided order (of his own) was issued; but when the king made a survey of the kingdom after three years, he found that the officers had destroyed the plantations (which harboured banditti), and dispersed their occupiers, that the superintendents of the official departments did not plume themselves on their successes, and that no unusual grain measures were allowed within the different states¹. When the officers had destroyed the dangerous plantations and dispersed their occupants, the highest value was set on the common interests; when the chiefs of departments did not plume themselves on their successes, the highest value was set on the common business; when unusual grain measures did not enter the different states, the different princes had no jealousies. On this king Wăn made the old man his Grand Preceptor, and asked him, with his own face to the north, whether his government might be extended to all the kingdom. The old

¹ That is, that all combinations formed to resist and warp the course of justice had been put an end to.

man looked perplexed and gave no reply, but with aimless look took his leave. In the morning he had issued his orders, and at night he had gone his way; nor was he heard of again all his life. Yen Yüan questioned Confucius, saying, 'Was even king Wăn unequal to determine his course? What had he to do with resorting to a dream?' Kung-nt replied, 'Be silent and do not say a word! King Wăn was complete in everything. What have you to do with criticising him? He only had recourse (to the dream) to meet a moment's difficulty.'

9. Lieh Yü-khâu was exhibiting his archery¹ to Po-hwăn Wû-zăn². Having drawn the bow to its full extent, with a cup of water placed on his elbow, he let fly. As the arrow was discharged, another was put in its place; and as that was sent off, a third was ready on the string. All the while he stood like a statue. Po-hwăn Wû-zăn said, 'That is the shooting of an archer, but not of one who shoots without thinking about his shooting. Let me go up with you to the top of a high mountain, treading with you among the tottering rocks, till we arrive at the brink of a precipice, 800 cubits deep, and (I will then see) if you can shoot.' On this they went up a high mountain, making their way among the tottering rocks, till they came to the brink of a precipice 800 cubits deep. Then Wû-zăn turned round and walked backwards, till his feet were two-

¹ This must be the meaning of the 爲, 'for.' The whole story is found in Lieh-ze, II, p. 5. From Lieh's Book VIII, p. 2, we learn that Lieh-ze's teacher in archery was Yin Hsî, the warden of the pass famous in the history of Láo-ze.

² Mentioned in Book V, par. 2.

thirds of their length outside the edge, and beckoned Yü-khâu to come forward. He, however, had fallen prostrate on the ground, with the sweat pouring down to his heels. Then the other said, 'The Perfect man looks up to the azure sky above, or dives down to the yellow springs beneath, or soars away to the eight ends of the universe, without any change coming over his spirit or his breath. But now the trepidation of your mind appears in your dazed eyes; your inward feeling of peril is extreme!'

10. *Kien Wû* asked *Sun-shû Âo*¹, saying, 'You, Sir, were thrice chief minister, and did not feel elated; you were thrice dismissed from that position, without manifesting any sorrow. At first I was in doubt about you, (but I am not now, since) I see how regularly and quietly the breath comes through your nostrils. How is it that you exercise your mind?' *Sun-shû Âo* replied, 'In what do I surpass other men? When the position came to me, I thought it should not be rejected; when it was taken away, I thought it could not be retained. I considered that the getting or losing it did not make me what I was, and was no occasion for any manifestation of sorrow;—that was all. In what did I surpass other men? And moreover, I did not know whether the honour of it belonged to the dignity, or to myself. If it belonged to the dignity, it was nothing to me; if it belonged to me, it had nothing

¹ *Sun-shû Âo*;—see *Mencius* VI, ii, 15. He was, no doubt, a good and able man, chief minister to king *Kwang* of *Khû*. The legends or edifying stories about him are many; but *Kwang-ze*, I think, is the author of his being thrice raised and thrice dismissed from office.

to do with the dignity. While occupied with these uncertainties, and looking round in all directions, what leisure had I to take knowledge of whether men honoured me or thought me mean ?'

Kung-nî heard of all this, and said, 'The True men of old could not be fully described by the wisest, nor be led into excess by the most beautiful, nor be forced by the most violent robber. Neither *Fû-hsi* nor *Hwang-Ti* could compel them to be their friends. Death and life are indeed great considerations, but they could make no change in their (true) self; and how much less could rank and emolument do so? Being such, their spirits might pass over the *Thâi* mountain and find it no obstacle to them¹; they might enter the greatest gulphs, and not be wet by them; they might occupy the lowest and smallest positions without being distressed by them. Theirs was the fulness of heaven and earth; the more that they gave to others, the more they had.'

The king of *K'û* and the ruler of *Fan*² were sitting together. After a little while, the attendants of the king said, 'Fan has been destroyed three times.' The ruler of Fan rejoined, 'The destruction of Fan has not been sufficient to destroy what we had that was most deserving to be preserved.' Now,

¹ It is difficult to see why this should be predicated of the 'spirits' of the True men.

² Fan was a small state, held at one time by descendants of the famous duke of *K'âu*;—see the *30 K'wan*, I, vii, 6; V, xxiv, 2. But we do not know what had been the relations between the powerful *K'û* and the feeble Fan, which gave rise to and could explain the remarks made at the entertainment, more honourable to Fan than to *K'û*.

if the destruction of Fan had not been sufficient to destroy that which it had most deserving to be preserved, the preservation of *Khû* had not been sufficient to preserve that in it most deserving to be preserved. Looking at the matter from this point of view, Fan had not begun to be destroyed, and *Khû* had not begun to be preserved.

BOOK XXII.

PART II. SECTION XV.

K'ih Pei Yü, or 'Knowledge Rambling in the North¹.'

1. Knowledge² had rambled northwards to the region of the Dark Water³, where he ascended the height of Imperceptible Slope³, when it happened that he met with Dumb Inaction². Knowledge addressed him, saying, 'I wish to ask you some questions:—By what process of thought and anxious consideration do we get to know the Táo? Where should we dwell and what should we do to find our rest in the Táo? From what point should we start and what path should we pursue to make the Táo our own?' He asked these three questions, but Dumb Inaction² gave him no reply. Not only did he not answer, but he did not know how to answer.

Knowledge², disappointed by the fruitlessness of his questions, returned to the south of the Bright

¹ See vol. xxxix, p. 152.

² All these names are metaphorical, having more or less to do with the qualities of the Táo, and are used as the names of personages, devoted to the pursuit of it. It is difficult to translate the name *K'hwang K'ü* (狂屈). An old reading is 諛, which Medhurst explains by 'Bent or Crooked Discourse.' 'Blurter,' though not an elegant English term, seems to express the idea our author would convey by it. Hwang-Ti is different from the other names, but we cannot regard him as here a real personage.

³ These names of places are also metaphorical and Táoistic.

Water¹, and ascended the height of the End of Doubt¹, where he saw Heedless Blurter, to whom he put the same questions, and who replied, 'Ah! I know, and will tell you.' But while he was about to speak, he forgot what he wanted to say.

Knowledge, (again) receiving no answer to his questions, returned to the palace of the Tí², where he saw Hwang-Tí³, and put the questions to him. Hwang-Tí said, 'To exercise no thought and no anxious consideration is the first step towards knowing the Táo; to dwell nowhere and do nothing is the first step towards resting in the Táo; to start from nowhere and pursue no path is the first step towards making the Táo your own.'

Knowledge then asked Hwang-Tí, saying, 'I and you know this; those two did not know it; which of us is right?' The reply was, 'Dumb Inaction³ is truly right; Heedless Blurter has an appearance of being so; I and you are not near being so. (As it is said), "Those who know (the Táo) do not speak of it; those who speak of it do not know it⁴;" and "Hence the sage conveys his instructions without the use of speech⁴." The Táo cannot be made ours by constraint; its characteristics will not come to us (at our call). Benevolence may be practised; Righteousness may be partially attended to; by Ceremonies men impose on one another. Hence it

¹ See note 3, on preceding page.

² Tí might seem to be used here for 'God,' but its juxtaposition with Hwang-Tí is against our translating it so.

³ See note 2, on preceding page.

⁴ See the Táo Teh King, chaps. 56 and 2. Kwang-ze is quoting, no doubt, these two passages, as he vaguely intimates I think by the 夫, with which the sentence commences.

is said, "When the Táo was lost, its Characteristics appeared. When its Characteristics were lost, Benevolence appeared. When Benevolence was lost, Righteousness appeared. When Righteousness was lost, Ceremonies appeared. Ceremonies are but (the unsubstantial) flowers of the Táo, and the commencement of disorder¹." Hence (also it is further said), "He who practises the Táo, daily diminishes his doing. He diminishes it and again diminishes it, till he arrives at doing nothing. Having arrived at this non-inaction, there is nothing that he does not do¹." Here now there is something, a regularly fashioned utensil;—if you wanted to make it return to the original condition of its materials, would it not be difficult to make it do so? Could any but the Great Man accomplish this easily²?

'Life is the follower of death, and death is the predecessor of life; but who knows the Arranger (of this connexion between them)³? The life is due to the collecting of the breath. When that is collected, there is life; when it is dispersed, there is death. Since death and life thus attend on each other, why should I account (either of) them an evil?

'Therefore all things go through one and the same experience. (Life) is accounted beautiful because it is spirit-like and wonderful, and death is accounted ugly because of its foetor and putridity. But the foetid and putrid is transformed again into the spirit-like and wonderful, and the spirit-like and wonderful is transformed again into the foetid and

¹ See the Táo Teh King, chaps. 38 and 48.

² This sentence is metaphorical of the Táo, whose spell is broken by the intrusion of Knowledge.

³ This 'Arranger' is the Táo.

putrid. Hence it is said, "All under the sky there is one breath of life, and therefore the sages prized that unity¹."

Knowledge² said to Hwang-Ti², 'I asked Dumb Inaction², and he did not answer me. Not only did he not answer me, but he did not know how to answer me. I asked Heedless Blurter, and while he wanted to tell me, he yet did not do so. Not only did he not tell me, but while he wanted to tell me, he forgot all about my questions. Now I have asked you, and you knew (all about them);—why (do you say that) you are not near doing so?' Hwang-Ti replied, 'Dumb Inaction² was truly right, because he did not know the thing. Heedless Blurter² was nearly right, because he forgot it. I and you are not nearly right, because we know it.' Heedless Blurter² heard of (all this), and considered that Hwang-Ti² knew how to express himself (on the subject).

2. (The operations of) Heaven and Earth proceed in the most admirable way, but they say nothing about them; the four seasons observe the clearest laws, but they do not discuss them; all things have their complete and distinctive constitutions, but they say nothing about them³.

The sages trace out the admirable operations of Heaven and Earth, and reach to and understand the distinctive constitutions of all things; and thus it is that the Perfect Man (is said to) do nothing and the Greatest Sage to originate nothing, such language showing that they look to Heaven and Earth as

¹ I have not been able to trace this quotation to its source.

² See note 2, p. 57. ³ Compare Analects XVII, xix, 3.

their model¹. Even they, with their spirit-like and most exquisite intelligence, as well as all the tribes that undergo their transformations, the dead and the living, the square and the round, do not understand their root and origin, but nevertheless they all from the oldest time by it preserve their being.

Vast as is the space included within the six cardinal points, it all (and all that it contains) lies within (this twofold root of Heaven and Earth); small as is an autumn hair, it is indebted to this for the completion of its form. All things beneath the sky, now rising, now descending, ever continue the same through this. The Yin and Yang, and the four seasons revolve and move by it, each in its proper order. Now it seems to be lost in obscurity, but it continues; now it seems to glide away, and have no form, but it is still spirit-like. All things are nourished by it, without their knowing it. This is what is called the Root and Origin; by it we may obtain a view of what we mean by Heaven².

3. Nieh K'üeh³ asked about the T'ao from Phei-î³, who replied, 'If you keep your body as it should be, and look only at the one thing, the Harmony of Heaven will come to you. Call in your knowledge, and make your measures uniform, and the spiritual (belonging to you) will come and lodge with you; the Attributes (of the T'ao) will be your beauty, and the T'ao (itself) will be your dwelling-place. You will have the simple look of a new-born calf, and

¹ Compare the T'ao Teh King, ch. 25.

² The binomial 'Heaven and Earth' here gives place to the one term 'Heaven,' which is often a synonym of T'ao.

³ See his character in Book XII, par. 5, where Phei-î also is mentioned.

will not seek to know the cause (of your being what you are).' Phei-t had not finished these words when the other dozed off into a sleep.

Phei-t was greatly pleased, and walked away, singing as he went,

'Like stump of rotten tree his frame,
Like lime when slaked his mind became¹.
Real is his wisdom, solid, true,
Nor cares what's hidden to pursue.
O dim and dark his aimless mind!
No one from him can counsel find.
What sort of man is he?'

4. Shun asked (his attendant) *Khǎng*², saying, 'Can I get the Táo and hold it as mine?' The reply was, 'Your body is not your own to hold;—how then can you get and hold the Táo?' Shun resumed, 'If my body be not mine to possess and hold, who holds it?' *Khǎng* said, 'It is the bodily form entrusted to you by Heaven and Earth. Life is not yours to hold. It is the blended harmony (of the Yin and Yang), entrusted to you by Heaven and Earth. Your nature, constituted as it is, is not yours to hold. It is entrusted to you by Heaven and Earth to act in accordance with it. Your grandsons and sons are not yours to hold. They are the exuviae³ entrusted to you by Heaven and Earth. Therefore when we walk, we should not know where we are going; when we stop and rest, we should not know what to occupy ourselves with;

¹ See the account of Nan-kwo *3ze-khi* in Book II, par. 1.

² Not the name of a man, but an office.

³ The term in the text denotes the cast-off skin or shell of insects, snakes, and crabs. See the account of death and life in par. 1.

when we eat, we should not know the taste of our food;—all is done by the strong Yang influence of Heaven and Earth¹. How then can you get (the Tâo), and hold it as your own?’

5. Confucius asked Lâu Tan, saying, ‘Being at leisure to-day, I venture to ask you about the Perfect Tâo.’ Lâu Tan replied, ‘You must, as by fasting and vigil, clear and purge your mind, wash your spirit white as snow, and sternly repress your knowledge. The subject of the Tâo is deep, and difficult to describe;—I will give you an outline of its simplest attributes.

‘The Luminous was produced from the Obscure; the Multiform from the Unembodied; the Spiritual from the Tâo; and the bodily from the seminal essence. After this all things produced one another from their bodily organisations. Thus it is that those which have nine apertures are born from the womb, and those with eight from eggs². But their coming leaves no trace, and their going no monument; they enter by no door; they dwell in no apartment³:—they are in a vast arena reaching in all directions. They who search for and find (the Tâo) in this are strong in their limbs, sincere and far-reaching in their thinking, acute in their hearing, and clear in their seeing. They exercise their minds without being toiled; they respond to everything aright without regard to place or circumstance. Without this heaven would not be high, nor earth

¹ It is an abstruse point why only the Yang is mentioned here, and described as ‘strong.’

² It is not easy to see the pertinence of this illustration.

³ Hû Wăn-ying says, ‘With this one word our author sweeps away the teaching of Purgatorial Sufferings.’

broad; the sun and moon would not move, and nothing would flourish:—such is the operation of the Tâo.

‘Moreover, the most extensive knowledge does not necessarily know it; reasoning will not make men wise in it;—the sages have decided against both these methods. However you try to add to it, it admits of no increase; however you try to take from it, it admits of no diminution;—this is what the sages maintain about it. How deep it is, like the sea! How grand it is, beginning again when it has come to an end! If it carried along and sustained all things, without being overburdened or weary, that would be like the way of the superior man, merely an external operation; when all things go to it, and find their dependence in it;—this is the true character of the Tâo.

‘Here is a man (born) in one of the middle states¹. He feels himself independent both of the Yin and Yang², and dwells between heaven and earth; only for the present a mere man, but he will return to his original source. Looking at him in his origin, when his life begins, we have (but) a gelatinous substance in which the breath is collecting. Whether his life be long or his death early, how short is the space between them! It is but the name for a moment of time, insufficient to play the part of a good Yâo or a bad Kieh in.

‘The fruits of trees and creeping plants have their distinctive characters, and though the relation-

¹ The commentators suppose that by ‘the man’ here there is intended ‘a sage;’ and they would seem to be correct.

² Compare the second sentence in the Tâo Teh King, ch. 42.

ships of men, according to which they are classified, are troublesome, the sage, when he meets with them, does not set himself in opposition to them, and when he has passed through them, he does not seek to retain them ; he responds to them in their regular harmony according to his virtue ; and even when he accidentally comes across any of them, he does so according to the Táo. It was thus that the Tis flourished, thus that the kings arose.

‘Men’s life between heaven and earth is like a white¹ colt’s passing a crevice, and suddenly disappearing. As with a plunge and an effort they all come forth ; easily and quietly they all enter again. By a transformation they live, and by another transformation they die. Living things are made sad (by death), and mankind grieve for it ; but it is (only) the removal of the bow from its sheath, and the emptying the natural satchel of its contents. There may be some confusion amidst the yielding to the change ; but the intellectual and animal souls are taking their leave, and the body will follow them :—This is the Great Returning home,

‘That the bodily frame came from incorporeity, and will return to the same, is what all men in common know, and what those who are on their way to (know) it need not strive for. This is what the multitudes of men discuss together. Those whose (knowledge) is complete do not discuss it ;—such discussion shows that their (knowledge) is not complete. Even the most clear-sighted do not meet

¹ Why is it the colt here is ‘white?’ Is it to heighten the impression made by his speedy disappearing? or is it merely the adoption of the phrase from the Shih, II, iv, 2?

(with the Táo);—it is better to be silent than to reason about it. The Táo cannot be heard with the ears;—it is better to shut the ears than to try and hear it. This is what is called the Great Attainment.'

6. Tung-kwo 3ze¹ asked Kwang-ze, saying, 'Where is what you call the Táo to be found?' Kwang-ze replied, 'Everywhere.' The other said, 'Specify an instance of it. That will be more satisfactory.' 'It is here in this ant.' 'Give a lower instance.' 'It is in this panic grass.' 'Give me a still lower instance.' 'It is in this earthenware tile.' 'Surely that is the lowest instance?' 'It is in that excrement².' To this Tung-kwo 3ze gave no reply.

Kwang-ze said, 'Your questions, my master, do not touch the fundamental point (of the Táo). They remind me of the questions addressed by the superintendents of the market to the inspector about examining the value of a pig by treading on it, and testing its weight as the foot descends lower and lower on the body³. You should not specify any particular thing. There is not a single thing without (the Táo). So it is with the Perfect Táo. And if we call it the Great (Táo), it is just the same. There are the three terms,—"Complete," "All-embracing," "the Whole." These names are differ-

¹ Perhaps the Tung-kwo Shun-ze of Bk. XXI, par. 1.

² A contemptuous reply, provoked by Tung-kwo's repeated interrogation as to where the Táo was to be found, the only question being as to what it was.

³ We do not know the practices from which our author draws his illustrations here sufficiently to make out his meaning clearly. The signification of the characters 正 and 獲 may be gathered indeed from the Î Lî, Books 7-9; but that is all.

ent, but the reality (sought in them) is the same ; referring to the One thing¹.

‘Suppose we were to try to roam about in the palace of No-where;—when met there, we might discuss (about the subject) without ever coming to an end. Or suppose we were to be together in (the region of) Non-action;—should we say that (the Táo was) Simplicity and Stillness? or Indifference and Purity? or Harmony and Ease? My will would be aimless. If it went nowhere, I should not know where it had got to; if it went and came again, I should not know where it had stopped; if it went on going and coming, I should not know when the process would end. In vague uncertainty should I be in the vastest waste. Though I entered it with the greatest knowledge, I should not know how inexhaustible it was. That which makes things what they are has not the limit which belongs to things, and when we speak of things being limited, we mean that they are so in themselves. (The Táo) is the limit of the unlimited, and the boundlessness of the unbounded.

‘We speak of fulness and emptiness; of withering and decay. It produces fulness and emptiness, but is neither fulness nor emptiness; it produces withering and decay, but is neither withering nor decay. It produces the root and branches, but is neither root nor branch; it produces accumulation and dispersion, but is itself neither accumulated nor dispersed.’

7. A-ho Kan² and Shăn Năng studied together

¹ The meaning of this other illustration is also very obscure to me; and much of what follows to the end of the paragraph.

² We can hardly be said to know anything more of the first and third of these men than what is mentioned here.

under Lǎo-lung K'1. Shǎn Nǎng¹ was leaning forward on his stool, having shut the door and gone to sleep in the day time. At midday A-ho Kan pushed open the door and entered, saying, 'Lǎo-lung is dead.' Shǎn Nǎng leant forward on his stool, laid hold of his staff and rose. Then he laid the staff aside with a clash, laughed and said, 'That Heaven knew how cramped and mean, how arrogant and assuming I was, and therefore he has cast me off, and is dead. Now that there is no Master to correct my heedless words, it is simply for me to die!' Yen Kang, (who had come in) to condole, heard these words, and said, 'It is to him who embodies the Táo that the superior men everywhere cling. Now you who do not understand so much as the tip of an autumn hair of it, not even the ten-thousandth part of the Táo, still know how to keep hidden your heedless words about it and die;—how much more might he who embodied the Táo do so! We look for it, and there is no form; we hearken for it, and there is no sound. When men try to discuss it, we call them dark indeed. When they discuss the Táo, they misrepresent it.'

Hereupon Grand Purity² asked Infinitude², saying, 'Do you know the Táo?' 'I do not know it,' was the reply. He then asked Do-nothing², who replied, 'I know it.' 'Is your knowledge of it de-

¹ Shǎn Nǎng is well known, as coming in the chronological list between Fû-hsî and Hwang-Tî; and we are surprised that a higher place is not given to him among the Táoist patriarchs than our author assigns to him here.

² These names, like those in the first paragraph of the Book, are metaphorical, intended, no doubt, to set forth attributes of the Táo, and to suggest to the reader what it is or what it is not.

terminated by various points?' 'It is.' 'What are they?' Do-nothing¹ said, 'I know that the Táo may be considered noble, and may be considered mean, that it may be bound and compressed, and that it may be dispersed and diffused. These are the marks by which I know it.' Grand Purity took the words of those two, and asked No-beginning¹, saying, 'Such were their replies; which was right? and which was wrong? Infinitude's saying that he did not know it? or Do-nothing's saying that he knew it?' No-beginning said, 'The "I do not know it" was profound, and the "I know it" was shallow. The former had reference to its internal nature; the latter to its external conditions. Grand Purity looked up and sighed, saying, 'Is "not to know it" then to know it? And is "to know it" not to know it? But who knows that he who does not know it (really) knows it?' No-beginning replied, 'The Táo cannot be heard; what can be heard is not It. The Táo cannot be seen; what can be seen is not It. The Táo cannot be expressed in words; what can be expressed in words is not It. Do we know the Formless which gives form to form? In the same way the Táo does not admit of being named.'

No-beginning (further) said, 'If one ask about the Táo and another answer him, neither of them knows it. Even the former who asks has never learned anything about the Táo. He asks what does not admit of being asked, and the latter answers where answer is impossible. When one asks what does not admit of being asked, his questioning is in (dire)

¹ See note 2 on last page.

extremity. When one answers where answer is impossible, he has no internal knowledge of the subject. When people without such internal knowledge wait to be questioned by others in dire extremity, they show that externally they see nothing of space and time, and internally know nothing of the Grand Commencement¹. Therefore they cannot cross over the Khwăn-lun², nor roam in the Grand Void.'

8. Starlight³ asked Non-entity³, saying, 'Master, do you exist? or do you not exist?' He got no answer to his question, however, and looked steadfastly to the appearance of the other, which was that of a deep void. All day long he looked to it, but could see nothing; he listened for it, but could hear nothing; he clutched at it, but got hold of nothing⁴. Starlight then said, 'Perfect! Who can attain to this? I can (conceive the ideas of) existence and non-existence, but I cannot (conceive the ideas of) non-existing non-existence, and still there be a non-existing existence. How is it possible to reach to this?'

9. The forger of swords for the Minister of War had reached the age of eighty, and had not lost a hair's-breadth of his ability⁵. The Minister said to

¹ The first beginning of all things or of anything.

² The Khwăn-lun may be considered the Sacred Mountain of Taoism.

³ The characters Kwang Yáo denote the points of light all over the sky, 'dusted with stars.' I can think of no better translation for them, as personified here, than 'starlight.' 'Non-entity' is a personification of the Táo; as no existing thing, but the idea of the order that pervades and regulates throughout the universe.

⁴ A quotation from the Táo Teh K'ing, ch. 14.

⁵ Compare the case of the butcher in Bk. III, and other similar passages.

him, 'You are indeed skilful, Sir. Have you any method that makes you so?' The man said, 'Your servant has (always) kept to his work. When I was twenty, I was fond of forging swords. I looked at nothing else. I paid no attention to anything but swords. By my constant practice of it, I came to be able to do the work without any thought of what I was doing. By length of time one acquires ability at any art; and how much more one who is ever at work on it! What is there which does not depend on this, and succeed by it?'

10. Zăn K'hiû¹ asked Kung-nî, saying, 'Can it be known how it was before heaven and earth?' The reply was, 'It can. It was the same of old as now.' Zăn K'hiû asked no more and withdrew. Next day, however, he had another interview, and said, 'Yesterday I asked whether it could be known how it was before heaven and earth, and you, Master, said, "It can. As it is now, so it was of old." Yesterday, I seemed to understand you clearly, but to-day it is dark to me. I venture to ask you for an explanation of this.' Kung-nî said, 'Yesterday you seemed to understand me clearly, because your own spiritual nature had anticipated my reply. To-day it seems dark to you, for you are in an unspiritual mood, and are trying to discover the meaning. (In this matter) there is no old time and no present; no beginning and no ending. Could it be that there were grandchildren and children before there were (other) grandchildren and children²?'

¹ One of the disciples of Confucius;—Analects VI, 3.

² Hû Wăn-ying says, 'Before there can be grandsons and sons there must be grandfathers and fathers to transmit them, so before

Zăn K'hiu had not made any reply, when *Kung-ni* went on, 'Let us have done. There can be no answering (on your part). We cannot with life give life to death; we cannot with death give death to life. Do death and life wait (for each other)? There is that which contains them both in its one comprehension¹. Was that which was produced before Heaven and Earth a thing? That which made things and gave to each its character was not itself a thing. Things came forth and could not be before things, as if there had (previously) been things; —as if there had been things (producing one another) without end. The love of the sages for others, and never coming to an end, is an idea taken from this².'

11. Yen Yüan asked *Kung-ni*, saying, 'Master, I have heard you say, "There should be no demonstration of welcoming; there should be no movement to meet;"—I venture to ask in what way this affection of the mind may be shown.' The reply was, 'The ancients, amid (all) external changes, did not change internally; now-a-days men change internally, but take no note of external changes. When one only notes the changes of things, himself continuing one and the same, he does not change. How should there be (a difference between) his changing and not changing? How should he put himself in contact with (and come under the influence of) those external changes? He is sure, however,

there were (the present) heaven and earth, there must have been another heaven and earth.' But I am not sure that he has in this remark exactly caught our author's meaning.

¹ Meaning the *Táo*.

² An obscure remark.

to keep his points of contact with them from being many. The park of Shih-wei¹, the garden of Hwang-Ti, the palace of the Lord of Yü, and the houses of Thang and Wû;—(these all were places in which this was done). But the superior men (so called, of later days), such as the masters of the Literati and of Mohism, were bold to attack each other with their controversies; and how much more so are the men of the present day! Sages in dealing with others do not wound them; and they who do not wound others cannot be wounded by them. Only he whom others do not injure is able to welcome and meet men.

‘Forests and marshes make me joyful and glad; but before the joy is ended, sadness comes and succeeds to it. When sadness and joy come, I cannot prevent their approach; when they go, I cannot retain them. How sad it is that men should only be as lodging-houses for things, (and the emotions which they excite)! They know what they meet, but they do not know what they do not meet; they use what power they have, but they cannot be strong where they are powerless. Such ignorance and powerlessness is what men cannot avoid. That they should try to avoid what they cannot avoid, is not this also sad? Perfect speech is to put speech away; perfect action is to put action away; to digest all knowledge that is known is a thing to be despised.’

¹ This personage has occurred before in Bk. VI, par. 7,—at the head of the most ancient sovereigns, who were in possession of the Táo. His ‘park’ as a place for moral and intellectual inquiry is here mentioned;—so early was there a certain quickening of the mental faculties in China.

BOOK XXIII.

PART III. SECTION I.

Kǎng-sang K'û¹.

1. Among the disciples² of Láo Tan there was a Kǎng-sang K'û, who had got a greater knowledge than the others of his doctrines, and took up his residence with it in the north at the hill of Wei-lêi³. His servants who were pretentious and knowing he sent away, and his concubines who were officious and kindly he kept at a distance; living (only) with those who were boorish and rude, and employing (only) the bustling and ill-mannered⁴. (After three years there was great prosperity⁵ in Wei-lêi, and the people said to one another, 'When Mr. Kǎng-sang first came here, he alarmed us, and we thought him strange; our estimate of him after a short acquaintance was that he could not do us much good; but now that we have known him for years, we find him a more than ordinary benefit. Must he not be near being a sage? Why should you not

¹ See vol. xxxix, p. 153.

² The term in the text commonly denotes 'servants.' It would seem here simply to mean 'disciples.'

³ Assigned variously. Probably the mount Yü in the 'Tribute of Yü,'—a hill in the present department of Tǎng-káu, Shan-tung.

⁴ The same phraseology occurs in Bk. XI, par. 5; and also in the Shih, II, vi, 1, q. v.

⁵ That is, abundant harvests. The 壤 of the common text should, probably, be 穰.

unite in blessing him as the representative of our departed (whom we worship), and raise an altar to him as we do to the spirit of the grain¹?' K'ang-sang heard of it, kept his face indeed to the south², but was dissatisfied.

His disciples thought it strange in him, but he said to them, 'Why, my disciples, should you think this strange in me? When the airs of spring come forth, all vegetation grows; and, when the autumn arrives, all the previous fruits of the earth are matured. Do spring and autumn have these effects without any adequate cause? The processes of the Great T'ao have been in operation. I have heard that the Perfect man dwells idly in his apartment within its surrounding walls³, and the people get wild and crazy, not knowing how they should repair to him. Now these small people of Wei-l'ei in their opinionative way want to present their offerings to me, and place me among such men of ability and virtue. But am I a man to be set up as such a model? It is on this account that I am dissatisfied when I think of the words of L'ao Tan⁴.'

2. His disciples said, 'Not so. In ditches eight cubits wide, or even twice as much, big fishes cannot turn their bodies about, but minnows and eels find them sufficient for them⁵; on hillocks six or

¹ I find it difficult to tell what these people wanted to make of K'ang, further than what he says himself immediately to his disciples. I cannot think that they wished to make him their ruler.

² This is the proper position for the sovereign in his court, and for the sage as the teacher of the world. K'ang accepts it in the latter capacity, but with dissatisfaction.

³ Compare the L'ao K'ang, Bk. XXXVIII, par. 10, et al.

⁴ As if he were one with the T'ao.

⁵ I do not see the appropriateness here of the 制 in the text.

seven cubits high, large beasts cannot conceal themselves, but foxes of evil omen find it a good place for them. And moreover, honour should be paid to the wise, offices given to the able, and preference shown to the good and the beneficial. From of old Yáo and Shun acted thus;—how much more may the people of Wei-lêi do so! O Master, let them have their way!’

Kǎng-sang replied, ‘Come nearer, my little children. If a beast that could hold a carriage in its mouth leave its hill by itself, it will not escape the danger that awaits it from the net; or if a fish that could swallow a boat be left dry by the flowing away of the water, then (even) the ants are able to trouble it. Thus it is that birds and beasts seek to be as high as possible, and fishes and turtles seek to lie as deep as possible. In the same way men who wish to preserve their bodies and lives keep their persons concealed, and they do so in the deepest retirement possible. And moreover, what was there in those sovereigns to entitle them to your laudatory mention? Their sophistical reasonings (resembled) the reckless breaking down of walls and enclosures and planting the wild rubus and wormwood in their place; or making the hair thin before they combed it; or counting the grains of rice before they cooked them¹. They would do such things with careful discrimination; but what was there in them to benefit the world? If you raise the men of talent to office, you will create disorder; making the people strive with one

¹ All these condemnatory descriptions of Yáo and Shun are eminently Taoistic, but so metaphorical that it is not easy to appreciate them.

another for promotion ; if you employ men for their wisdom, the people will rob one another (of their reputation)¹. These various things are insufficient to make the people good and honest. They are very eager for gain ;—a son will kill his father, and a minister his ruler (for it). In broad daylight men will rob, and at midday break through walls. I tell you that the root of the greatest disorder was planted in the times of Yáo and Shun. The branches of it will remain for a thousand ages ; and after a thousand ages men will be found eating one another².

3. (On this) Nan-yung *K'û*³ abruptly sat right up and said, 'What method can an old man like me adopt to become (the Perfect man) that you have described?' Kǎng-sang 3ze said, 'Maintain your body complete ; hold your life in close embrace ; and do not let your thoughts keep working anxiously :—do this for three years, and you may become the man of whom I have spoken.' The other rejoined, 'Eyes are all of the same form, I do not know any difference between them :—yet the blind have no power of vision. Ears are all of the same form ; I do not know any difference between them :—yet the deaf have no power of hearing. Minds are all of the same nature, I do not know any difference between them ;—yet the mad cannot make the minds of other men their own. (My) personality is indeed like (yours), but things seem to separate

¹ Compare the Táo Teh *K'ing*, ch. 3.

² *K'û* is in all this too violent.

³ A disciple of Kǎng-sang *K'û* ;—'a sincere seeker of the Táo, very much to be pitied,' says Lin Hst-ñung.

between us¹. I wish to find in myself what there is in you, but I am not able to do so¹. You have now said to me, "Maintain your body complete; hold your life in close embrace; and do not let your thoughts keep working anxiously." With all my efforts to learn your Way, (your words) reach only my ears.' Käng-sang replied, 'I can say nothing more to you,' and then he added, 'Small flies cannot transform the bean caterpillar²; Yüeh³ fowls cannot hatch the eggs of geese, but Lû fowls³ can. It is not that the nature of these fowls is different; the ability in the one case and inability in the other arise from their different capacities as large and small. My ability is small and not sufficient to transform you. Why should you not go south and see Láo-ze?'

4. Nan-yung K'ü hereupon took with him some rations, and after seven days and seven nights arrived at the abode of Láo-ze, who said to him, 'Are you come from K'ü's?' 'I am,' was the reply. 'And why, Sir, have you come with such a multitude of attendants⁴?' Nan-yung was frightened, and turned his head round to look behind him. Láo-ze said, 'Do you not understand my meaning?' The other held his head down and was ashamed, and then he lifted it up, and sighed, saying, 'I forgot at the moment what I should reply to your

¹ The 辟 in the former of these sentences is difficult. I take it in the sense of 譬, and read it phî.

² Compare the Shih, II, v, Ode 2, 3.

³ I believe the fowls of Shan-tung are still larger than those of Kih-kiang or Fû-kien.

⁴ A good instance of Láo's metaphorical style.

question, and in consequence I have lost what I wished to ask you.' 'What do you mean?' 'If I have not wisdom, men say that I am stupid¹, while if I have it, it occasions distress to myself. If I have not benevolence, then (I am charged) with doing hurt to others, while if I have it, I distress myself. If I have not righteousness, I (am charged with) injuring others, while if I have it, I distress myself. How can I escape from these dilemmas? These are the three perplexities that trouble me; and I wish at the suggestion of *K'û* to ask you about them.' Láo-ze replied, 'A little time ago, when I saw you and looked right into your eyes², I understood you, and now your words confirm the judgment which I formed. You look frightened and amazed. You have lost your parents, and are trying with a pole to find them at the (bottom of) the sea. You have gone astray; you are at your wit's end. You wish to recover your proper nature, and you know not what step to take first to find it. You are to be pitied!'

5. Nan-yung *K'û* asked to be allowed to enter (the establishment), and have an apartment assigned to him³. (There) he sought to realise the qualities which he loved, and put away those which he hated. For ten days he afflicted himself, and then waited again on Láo-ze, who said to him, 'You must purify yourself thoroughly! But from your symptoms of

¹ In the text 朱愚. The 朱 must be an erroneous addition, or probably it is a mistake for the speaker's name 越.

² Literally, 'between the eye-brows and eye-lashes.'

³ Thus we are as it were in the school of Láo-ze, and can see how he deals with his pupils.

distress, and signs of impurity about you, I see there still seem to cling to you things that you dislike. When the fettering influences from without become numerous, and you try to seize them (you will find it a difficult task); the better plan is to bar your inner man against their entrance. And when the similar influences within get intertwined, it is a difficult task to grasp (and hold them in check); the better plan is to bar the outer door against their exit. Even a master of the Táo and its characteristics will not be able to control these two influences together, and how much less can one who is only a student of the Táo do so!' Nan-yung *K'ü* said, 'A certain villager got an illness, and when his neighbours asked about it, he was able to describe the malady, though it was one from which he had not suffered before. When I ask you about the Grand Táo, it seems to me like drinking medicine which (only serves to) increase my illness. I should like to hear from you about the regular method of guarding the life;—that will be sufficient for me.' Láo-ze replied, '(You ask me about) the regular method of guarding the life;—can you hold the One thing fast in your embrace? Can you keep from losing it? Can you know the lucky and the unlucky without having recourse to the tortoise-shell or the divining stalks? Can you rest (where you ought to rest)? Can you stop (when you have got enough)? Can you give over thinking of other men, and seek what you want in yourself (alone)? Can you flee (from the allurements of desire)? Can you maintain an entire simplicity? Can you become a little child? The child will cry all the day, without its throat becoming hoarse;—so perfect is the harmony (of

its physical constitution). It will keep its fingers closed all the day without relaxing their grasp;—such is the concentration of its powers. It will keep its eyes fixed all day, without their moving;—so is it unaffected by what is external to it. It walks it knows not whither; it rests where it is placed, it knows not why; it is calmly indifferent to things, and follows their current. This is the regular method of guarding the life ¹.

6. Nan-yung *K'û* said, 'And are these all the characteristics of the Perfect man?' Lâu-ze replied, 'No. These are what we call the breaking up of the ice, and the dissolving of the cold. The Perfect man, along with other men, gets his food from the earth, and derives his joy from his Heaven (-conferred nature). But he does not like them allow himself to be troubled by the consideration of advantage or injury coming from men and things; he does not like them do strange things, or form plans, or enter on undertakings; he flees from the allurements of desire, and pursues his way with an entire simplicity. Such is the way by which he guards his life.' 'And is this what constitutes his perfection?' 'Not quite. I asked you whether you could become a little child. The little child moves unconscious of what it is doing, and walks unconscious of whither it is going. Its body is like the branch of a rotten tree, and its mind is like slaked lime ². Being such, misery does not come to it, nor happiness. It has

¹ In this long reply there are many evident recognitions of passages in the *Tâu Teh King*;—compare chapters 9, 10, 55, 58.

² See the description of *3ze-khi's* Tâuistic trance at the beginning of the second Book.

neither misery nor happiness;—how can it suffer from the calamities incident to men¹?’

7. ² He whose mind³ is thus grandly fixed emits a Heavenly light. In him who emits this heavenly light men see the (True) man. When a man has cultivated himself (up to this point), thenceforth he remains constant in himself. When he is thus constant in himself, (what is merely) the human element will leave him⁴, but Heaven will help him. Those whom their human element has left we call the people of Heaven⁴. Those whom Heaven helps we call the Sons of Heaven. Those who would by learning attain to this⁵ seek for what they cannot

¹ Nan-yung *K'ü* disappears here. His first master, Käng-sang *K'ü*, disappeared in paragraph 4. The different way in which his name is written by Sze-mâ *K'hien* is mentioned in the brief introductory note on p. 153. It should have been further stated there that in the Fourth Book of Lieh-*zse* (IV, 2^b-3^b) some account of him is given with his name as written by *K'hien*. A great officer of *K'än* is introduced as boasting of him that he was a sage, and, through his mastery of the principles of Láo Tan, could hear with his eyes and see with his ears. Hereupon Khäng-*zhang* is brought to the court of the marquis of Lú to whom he says that the report of him which he had heard was false, adding that he could dispense with the use of his senses altogether, but could not alter their several functions. This being reported to Confucius, he simply laughs at it, but makes no remark.

² I suppose that from this to the end of the Book we have the sentiments of *K'wang-*zse** himself. Whether we consider them his, or the teachings of Láo-*zse* to his visitor, they are among the depths of Taoism, which I will not attempt to elucidate in the notes here.

³ The character which I have translated ‘mind’ here is 宇, meaning ‘the side walls of a house,’ and metaphorically used for ‘the breast,’ as the house of the mind. Hû explains it by 心胸.

⁴ He is emancipated from the human as contrary to the heavenly.

⁵ The Táo.

learn. Those who would by effort attain to this, attempt what effort can never effect. Those who aim by reasoning to reach it reason where reasoning has no place. To know to stop where they cannot arrive by means of knowledge is the highest attainment. Those who cannot do this will be destroyed on the lathe of Heaven.

8. Where things are all adjusted to maintain the body; where a provision against unforeseen dangers is kept up to maintain the life of the mind; where an inward reverence is cherished to be exhibited (in all intercourse) with others;—where this is done, and yet all evils arrive, they are from Heaven, and not from the men themselves. They will not be sufficient to confound the established (virtue of the character), or be admitted into the Tower of Intelligence. That Tower has its Guardian, who acts unconsciously, and whose care will not be effective, if there be any conscious purpose in it¹. If one who has not this entire sincerity in himself make any outward demonstration, every such demonstration will be incorrect. The thing will enter into him, and not let go its hold. Then with every fresh demonstration there will be still greater failure. If he do what is not good in the light of open day, men will have the opportunity of punishing him; if he do it in darkness and secrecy, spirits² will inflict the punishment. Let a man understand this—his relation both to men and spirits, and then he will do what is good in the solitude of himself.

¹ This Guardian of the Mind or Tower of Intelligence is the Táo.

² One of the rare introductions of spiritual agency in the early Táoism.

He whose rule of life is in himself does not act for the sake of a name. He whose rule is outside himself has his will set on extensive acquisition. He who does not act for the sake of a name emits a light even in his ordinary conduct; he whose will is set on extensive acquisition is but a trafficker. Men see how he stands on tiptoe, while he thinks that he is overtopping others. Things enter (and take possession of) him who (tries to) make himself exhaustively (acquainted with them), while when one is indifferent to them, they do not find any lodgment in his person. And how can other men find such lodgment? But when one denies lodgment to men, there are none who feel attachment to him. In this condition he is cut off from other men. There is no weapon more deadly than the will¹;—even Mû-yê² was inferior to it. There is no robber greater than the Yin and Yang, from whom nothing can escape of all between heaven and earth. But it is not the Yin and Yang that play the robber;—it is the mind that causes them to do so.

9. The Táo is to be found in the subdivisions (of its subject); (it is to be found) in that when complete, and when broken up. What I dislike in considering it as subdivided, is that the division leads to the multiplication of it;—and what I dislike in that multiplication is that it leads to the (thought of) effort to secure it. Therefore when (a man)

¹ That is, the will, man's own human element, in opposition to the Heavenly element of the Táo.

² One of the two famous swords made for Ho-lü, the king of Wû. See the account of their making in the seventy-fourth chapter of the 'History of the Various States;' very marvellous, but evidently, and acknowledged to be, fabulous.

comes forth (and is born), if he did not return (to his previous non-existence), we should have (only) seen his ghost; when he comes forth and gets this (return), he dies (as we say). He is extinguished, and yet has a real existence:—(this is another way of saying that in life we have) only man's ghost. By taking the material as an emblem of the immaterial do we arrive at a settlement of the case of man. He comes forth, but from no root; he re-enters, but by no aperture. He has a real existence, but it has nothing to do with place; he has continuance, but it has nothing to do with beginning or end. He has a real existence, but it has nothing to do with place, such is his relation to space; he has continuance, but it has nothing to do with beginning or end, such is his relation to time; he has life; he has death; he comes forth; he enters; but we do not see his form;—all this is what is called the door of Heaven. The door of Heaven is Non-Existence. All things come from non-existence. The (first) existences could not bring themselves into existence; they must have come from non-existence. And non-existence is just the same as non-existing. Herein is the secret of the sages.

10. Among the ancients there were those whose knowledge reached the extreme point. And what was that point? There were some who thought that in the beginning there was nothing. This was the extreme point, the completest reach of their knowledge, to which nothing could be added. Again, there were those who supposed that (in the beginning) there were existences, proceeding to consider life to be a (gradual) perishing, and death a returning (to the original state). And there they stopped,

making, (however), a distinction between life and death. Once again there were those who said, 'In the beginning there was nothing; by and by there was life; and then in a little time life was succeeded by death. We hold that non-existence was the head, life the body, and death the os coccygis. But of those who acknowledge that existence and non-existence, death and life, are all under the One Keeper, we are the friends.' Though those who maintained these three views were different, they were so as the different branches of the same ruling Family (of *K'ü*)¹,—the *K'âos* and the *K'ings*, bearing the surname of the lord whom they honoured as the author of their branch, and the *K'îas* named from their appanage;—(all one, yet seeming) not to be one.

The possession of life is like the soot that collects under a boiler. When that is differently distributed, the life is spoken of as different. But to say that life is different in different lives, and better in one than in another, is an improper mode of speech. And yet there may be something here which we do not know. (As for instance), at the *lâ* sacrifice the paunch and the divided hoofs may be set forth on separate dishes, but they should not be considered as parts of different victims; (and again), when one is inspecting a house, he goes over it all, even the adytum for the shrines of the temple, and visits also the most private apartments; doing this, and setting a different estimate on the different parts.

Let me try and speak of this method of appor-

¹ Both *Lâo* and *K'wang* belonged to *K'ü*, and this illustration was natural to them.

tioning one's approval:—life is the fundamental consideration in it; knowledge is the instructor. From this they multiply their approvals and disapprovals, determining what is merely nominal and what is real. They go on to conclude that to themselves must the appeal be made in everything, and to try to make others adopt them as their model; prepared even to die to make good their views on every point. In this way they consider being employed in office as a mark of wisdom, and not being so employed as a mark of stupidity, success as entitling to fame, and the want of it as disgraceful. The men of the present day who follow this differentiating method are like the cicada and the little dove¹;—there is no difference between them.

11. When one treads on the foot of another in the market-place, he apologises on the ground of the bustle. If an elder tread on his younger brother, he proceeds to comfort him; if a parent tread on a child, he says and does nothing. Hence it is said, 'The greatest politeness is to show no special respect to others; the greatest righteousness is to take no account of things; the greatest wisdom is to lay no plans; the greatest benevolence is to make no demonstration of affection; the greatest good faith is to give no pledge of sincerity.'

Repress the impulses of the will; unravel the errors of the mind; put away the entanglements to virtue; and clear away all that obstructs the free course of the Táo. Honours and riches, distinctions and austerity, fame and profit; these six things produce the impulses of the will. Personal appearance

¹ See in Bk. I, par. 2.

and deportment, the desire of beauty and subtle reasonings, excitement of the breath and cherished thoughts; these six things produce errors of the mind. Hatred and longings, joy and anger, grief and delight; these six things are the entanglements to virtue. Refusals and approachments, receiving and giving, knowledge and ability; these six things obstruct the course of the Táo. When these four conditions, with the six causes of each, do not agitate the breast, the mind is correct. Being correct, it is still; being still, it is pellucid; being pellucid, it is free from pre-occupation; being free from pre-occupation, it is in the state of inaction, in which it accomplishes everything.

The Táo is the object of reverence to all the virtues. Life is what gives opportunity for the display of the virtues. The nature is the substantive character of the life. The movement of the nature is called action. When action becomes hypocritical, we say that it has lost (its proper attribute).

The wise communicate with what is external to them and are always laying plans. This is what with all their wisdom they are not aware of;—they look at things askance. When the action (of the nature) is from external constraint, we have what is called virtue; when it is all one's own, we have what is called government. These two names seem to be opposite to each other, but in reality they are in mutual accord.

12. ¹ was skilful in hitting the minutest mark, but stupid in wishing men to go on praising him without end. The sage is skilful Heavenwards, but stupid

¹ See on V, par. 2.

manwards. It is only the complete man who can be both skilful Heavenwards and good manwards.

Only an insect can play the insect, only an insect show the insect nature. Even the complete man hates the attempt to exemplify the nature of Heaven. He hates the manner in which men do so, and how much more would he hate the doing so by himself before men!

When a bird came in the way of Î, he was sure to obtain it;—such was his mastery with his bow. If all the world were to be made a cage, birds would have nowhere to escape to. Thus it was that Thang caged Î Yin by making him his cook¹, and that duke Mû of K~~h~~in caged Pâi-lî Hsî by giving the skins of five rams for him². But if you try to cage men by anything but what they like, you will never succeed.

A man, one of whose feet has been cut off, discards ornamental (clothes);—his outward appearance will not admit of admiration. A criminal under sentence of death will ascend to any height without fear;—he has ceased to think of life or death.

When one persists in not reciprocating the gifts (of friendship), he forgets all others. Having forgotten all others, he may be considered as a Heaven-like man. Therefore when respect is shown to a man, and it awakens in him no joy, and when contempt awakens no anger, it is only one who shares in the Heaven-like harmony that can be thus. When he would display anger and yet is not angry, the anger comes out in that repression of it. When he would put forth action, and yet does not do so,

¹ See Mencius V, i, 7.

² Mencius V, i, 9.

the action is in that not-acting. Desiring to be quiescent, he must pacify all his emotions ; desiring to be spirit-like, he must act in conformity with his mind. When action is required of him, he wishes that it may be right ; and it then is under an inevitable constraint. Those who act according to that inevitable constraint pursue the way of the sage.

BOOK XXIV.

PART III. SECTION II.

Hsü Wû-kwei¹.

I. Hsü Wû-kwei having obtained through Nü Shang² an introduction to the marquis Wû of Wei³, the marquis, speaking to him with kindly sympathy⁴, said, 'You are ill, Sir; you have suffered from your hard and laborious toils⁴ in the forests, and still you have been willing to come and see poor me⁵.' Hsü Wû-kwei replied, 'It is I who have to comfort your lordship; what occasion have you to comfort me? If your lordship go on to fill up the measure of your sensual desires, and to prolong your likes and dislikes, then the condition of your mental nature will be diseased, and if you discourage and repress those desires, and deny your likings and dislikings, that will be an affliction to your ears and eyes

¹ See vol. xxxix, pp. 153, 154.

² A favourite and minister of the marquis Wû.

³ This was the second marquis of Wei, one of the three principalities into which the great state of Jin had been broken up, and which he ruled as the marquis K'î for sixteen years, B. C. 386-371. His son usurped the title of king, and was the 'king Hui of Liang,' whom Mencius had interviews with. Wû, or 'martial,' was K'î's honorary, posthumous epithet.

⁴ The character (勞) which I thus translate, has two tones, the second and fourth. Here and elsewhere in this paragraph and the next, it is with one exception in the fourth tone, meaning 'to comfort or reward for toils endured.' The one exception is its next occurrence,—'hard and laborious toils.'

⁵ The appropriate and humble designation of himself by the ruler of a state.

(deprived of their accustomed pleasures);—it is for me to comfort your lordship, what occasion have you to comfort me?' The marquis looked contemptuous, and made no reply.

After a little time, Hsü Wû-kwei said, 'Let me tell your lordship something:—I look at dogs and judge of them by their appearance¹. One of the lowest quality seizes his food, satiates himself, and stops;—he has the attributes of a fox. One of a medium quality seems to be looking at the sun. One of the highest quality seems to have forgotten the one thing,—himself. But I judge still better of horses than I do of dogs. When I do so, I find that one goes straight-forward, as if following a line; that another turns off, so as to describe a hook; that a third describes a square as if following the measure so called; and that a fourth describes a circle as exactly as a compass would make it. These are all horses of a state; but they are not equal to a horse of the kingdom. His qualities are complete. Now he looks anxious; now to be losing the way; now to be forgetting himself. Such a horse prances along, or rushes on, spurning the dust and not knowing where he is.' The marquis was greatly pleased and laughed.

When Hsü Wû-kwei came out, Nü Shang said to him, 'How was it, Sir, that you by your counsels produced such an effect on our ruler? In my counsellings of him, now indirectly, taking my subjects from the Books of Poetry, History, Rites, and Music; now directly, from the Metal Tablets², and the six Bow-cases², all calculated for the service (of the

¹ Literally, 'I physiognomise dogs.'

² The names of two Books, or Collections of Tablets, the former

state), and to be of great benefit ;—in these counsellings, repeated times without number, I have never seen the ruler show his teeth in a smile :—by what counsels have you made him so pleased to-day ?’ Hsü Wû-kwei replied, ‘ I only told him how I judged of dogs and horses by looking at their appearance.’ ‘ So ?’ said Nü Shang, and the other rejoined, ‘ Have you not heard of the wanderer ¹ from Yüeh ? when he had been gone from the state several days, he was glad when he saw any one whom he had seen in it ; when he had been gone a month, he was glad when he saw any one whom he had known in it ; and when he had been gone a round year, he was glad when he saw any one who looked like a native of it. The longer he was gone, the more longingly did he think of the people ;—was it not so ? The men who withdraw to empty valleys, where the hellebore bushes stop up the little paths made by the weasels, as they push their way or stand amid the waste, are glad when they seem to hear the sounds of human footsteps ; and how much more would they be so, if it were their brothers and relatives talking and laughing by their side ! How long it is since the words of a True ² man were heard as he talked and laughed by our ruler’s side !’

2. At (another) interview of Hsü Wû-kwei with the marquis Wû, the latter said, ‘ You, Sir, have been dwelling in the forests for a long time, living

containing Registers of the Population, the latter treating of military subjects.

¹ Kwo Hsiang makes this ‘ a banished criminal.’ This is not necessary.

² Wû-kwei then had a high opinion of his own attainments in Tâoism, and a low opinion of Nü Shang and the other courtiers.

on acorns and chestnuts, and satiating yourself with onions and chives, without thinking of poor me. Now (that you are here), is it because you are old? or because you wish to try again the taste of wine and meat? or because (you wish that) I may enjoy the happiness derived from the spirits of the altars of the Land and Grain?' Hsü Wû-kwei replied, 'I was born in a poor and mean condition, and have never presumed to drink of your lordship's wine, or eat of your meat. My object in coming was to comfort your lordship under your troubles.' 'What? comfort me under my troubles?' 'Yes, to comfort both your lordship's spirit and body.' The marquis said, 'What do you mean?' His visitor replied, 'Heaven and Earth have one and the same purpose in the production (of all men). However high one man be exalted, he should not think that he is favourably dealt with; and however low may be the position of another, he should not think that he is unfavourably dealt with. You are indeed the one and only lord of the 10,000 chariots (of your state), but you use your dignity to embitter (the lives of) all the people, and to pamper your ears, eyes, nose, and mouth. But your spirit does not acquiesce in this. The spirit (of man) loves to be in harmony with others and hates selfish indulgence¹. This selfish indulgence is a disease, and therefore I would comfort you under it. How is it that your lordship more than others brings this disease on yourself?' The marquis said, 'I have wished to see you, Sir, for a long time. I want to love my people, and by the exercise of righteous-

¹ Wû-kwei had a high idea of the constitution of human nature.

ness to make an end of war ;—will that be sufficient ?' Hsü Wû-kwei replied, ' By no means. To love the people is the first step to injure them¹. By the exercise of righteousness to make an end of war is the root from which war is produced¹. If your lordship try to accomplish your object in this way, you are not likely to succeed. All attempts to accomplish what we think good (with an ulterior end) is a bad contrivance. Although your lordship practise benevolence and righteousness (as you propose), it will be no better than hypocrisy. You may indeed assume the (outward) form, but successful accomplishment will lead to (inward) contention, and the change thence arising will produce outward fighting. Your lordship also must not mass files of soldiers in the passages of your galleries and towers, nor have footmen and horsemen in the apartments about your altars². Do not let thoughts contrary to your success lie hidden in your mind ; do not think of conquering men by artifice, or by (skilful) plans, or by fighting. If I kill the officers and people of another state, and annex its territory, to satisfy my selfish desires, while in my spirit I do not know whether the fighting be good, where is the victory that I gain ? Your lordship's best plan is to abandon (your purpose). If you will cultivate in your breast the sincere purpose (to love the people), and so respond to the feeling of Heaven and Earth, and not (further) vex yourself, then your people will already have escaped death ;—what

¹ Tâoistic teaching, but questionable.

² We need more information about the customs of the feudal princes fully to understand the language of this sentence.

occasion will your lordship have to make an end of war ?'

3. Hwang-Tî was going to see Tâ-kwei¹ at the hill of K'ü-ghze. Fang Ming was acting as charioteer, and K'hang Yü was occupying the third place in the carriage. Kang Zo and Hsi Phăng went before the horses; and Khwăn Hwun and K'û K'hi followed the carriage. When they arrived at the wild of Hsiang-khăng, the seven sages were all perplexed, and could find no place at which to ask the way. Just then they met with a boy tending some horses, and asked the way of him. 'Do you know,' they said, 'the hill of K'ü-ghze?' and he replied that he did. He also said that he knew where Tâ-kwei was living. 'A strange boy is this!' said Hwang-Tî. 'He not only knows the hill of K'ü-ghze, but he also knows where Tâ-kwei is living. Let me ask him about the government of mankind.' The boy said, 'The administration of the kingdom is like this (which I am doing);—what difficulty should there be in it? When I was young, I enjoyed myself roaming over all within the six confines of the world of space, and then I began to suffer from indistinct sight. A wise elder taught me, saying, "Ride in the chariot of the

¹ Tâ (or Thâi)-kwei (or wei) appears here as the name of a person. It cannot be the name of a hill, as it is said by some to be. The whole paragraph is parabolic or allegorical; and Tâ-kwei is probably a personification of the Great Tâo itself, though no meaning of the character kwei can be adduced to justify this interpretation. The horseherd boy is further supposed to be a personification of the 'Great Simplicity,' which is characteristic of the Tâo, the spontaneity of it, unvexed by the wisdom of man. The lesson of the paragraph is that taught in the eleventh Book, and many other places.

sun, and roam in the wild of Hsiang-K'hang." Now the trouble in my eyes is a little better, and I am again enjoying myself roaming outside the six confines of the world of space. As to the government of the kingdom, it is like this (which I am doing);— what difficulty should there be in it?' Hwang-Ti said, 'The administration of the world is indeed not your business, my son; nevertheless, I beg to ask you about it.' The little lad declined to answer, but on Hwang-Ti putting the question again, he said, 'In what does the governor of the kingdom differ from him who has the tending of horses, and who has only to put away whatever in him would injure the horses?'

Hwang-Ti bowed to him twice with his head to the ground, called him his 'Heavenly Master¹,' and withdrew.

4. If officers of wisdom do not see the changes which their anxious thinking has suggested, they have no joy; if debaters are not able to set forth their views in orderly style, they have no joy; if critical examiners find no subjects on which to exercise their powers of vituperation, they have no joy:— they are all hampered by external restrictions.

Those who try to attract the attention of their age (wish to) rise at court; those who try to win the regard of the people² count holding office a glory; those who possess muscular strength boast of doing what is difficult; those who are bold and daring exert themselves in times of calamity; those who are able

¹ This is the title borne to the present day by the chief or pope of T'aoism, the representative of K'ang T'ao-ling of our first century.

² Taking the initial *kung* in the third tone. If we take it in the first tone, the meaning is different.

swordmen and spearmen delight in fighting; those whose powers are decayed seek to rest in the name (they have gained); those who are skilled in the laws seek to enlarge the scope of government; those who are proficient in ceremonies and music pay careful attention to their deportment; and those who profess benevolence and righteousness value opportunities (for displaying them).

The husbandmen who do not keep their fields well weeded are not equal to their business, nor are traders who do not thrive in the markets. When the common people have their appropriate employment morning and evening, they stimulate one another to diligence; the mechanics who are masters of their implements feel strong for their work. If their wealth does not increase, the greedy are distressed; if their power and influence is not growing, the ambitious are sad.

Such creatures of circumstance and things delight in changes, and if they meet with a time when they can show what they can do, they cannot keep themselves from taking advantage of it. They all pursue their own way like (the seasons of) the year, and do not change as things do. They give the reins to their bodies and natures, and allow themselves to sink beneath (the pressure of) things, and all their lifetime do not come back (to their proper selves):— is it not sad¹?

5. *Kwang-tze* said, 'An archer, without taking aim beforehand, yet may hit the mark. If we say that he is a good archer, and that all the world may

¹ All the parties in this paragraph disallow the great principle of Tâoism, which does everything by doing nothing.

be *Is*¹, is this allowable?' Hui-ze replied, 'It is.' Kwang-ze continued, 'All men do not agree in counting the same thing to be right, but every one maintains his own view to be right; (if we say) that all men may be *Yâos*, is this allowable?' Hui-ze (again) replied, 'It is;' and Kwang-ze went on, 'Very well; there are the literati, the followers of Mo (Ti), of Yang (*Kü*), and of Ping²;—making four (different schools). Including yourself, Master, there are five. Which of your views is really right? Or will you take the position of *Lü Kü*³? One of his disciples said to him, "Master, I have got hold of your method. I can in winter heat the furnace under my tripod, and in summer can produce ice." *Lü Kü* said, "That is only with the Yang element to call out the same, and with the Yin to call out the yin;—that is not my method. I will show you what my method is." On this he tuned two citherns, placing one of them in the hall, and the other in one of the inner apartments. Striking the note *Kung*⁴ in the one, the same note vibrated in the other, and so it was with the note *Kio*⁴; the two instruments being tuned in the same way. But if he had differently tuned them on other strings different

¹ The famous archer of the Hsiâ dynasty, in the twenty-second century B. C.

² The name of Kung-sun Lung, the Lung Li-*hăn* of Bk. XXI, par. I.

³ Only mentioned here. The statement of his disciple and his remark on it are equally obscure, though the latter is partially illustrated from the twenty-third, twenty-fourth, and other hexagrams of the *Yih King*.

⁴ The sounds of the first and third notes of the Chinese musical scale, corresponding to our A and E. I know too little of music myself to pronounce further on *Lü Kü*'s illustration.

from the normal arrangement of the five notes, the five-and-twenty strings would all have vibrated, without any difference of their notes, the note to which he had tuned them ruling and guiding all the others. Is your maintaining your view to be right just like this ?'

Hui-ze replied, 'Here now are the literati, and the followers of Mo, Yang, and Ping. Suppose that they have come to dispute with me. They put forth their conflicting statements; they try vociferously to put me down; but none of them have ever proved me wrong:—what do you say to this?' Kwang-ze said, 'There was a man of *K'hi* who cast away his son in Sung to be a gate-keeper there, and thinking nothing of the mutilation he would incur; the same man, to secure one of his sacrificial vessels or bells, would have it strapped and secured, while to find his son who was lost, he would not go out of the territory of his own state:—so forgetful was he of the relative importance of things. If a man of *K'hi*, going to another state as a lame gate-keeper, at midnight, at a time when no one was nigh, were to fight with his boatman, he would not be able to reach the shore, and he would have done what he could to provoke the boatman's animosity¹.'

6. As Kwang-ze was accompanying a funeral, when passing by the grave of Hui-ze², he looked

¹ The illustrations in this last member of the paragraph are also obscure. Lin Hsi-kung says that all the old explanations of them are defective; his own explanation has failed to make itself clear to me.

² The expression in the last sentence of the paragraph, 'the Master,' makes it certain that this was the grave of Kwang-ze's friend with whom he had had so many conversations and arguments.

round, and said to his attendants, 'On the top of the nose of that man of Ying¹ there is a (little) bit of mud like a fly's wing.' He sent for the artisan Shih to cut it away. Shih whirled his axe so as to produce a wind, which immediately carried off the mud entirely, leaving the nose uninjured, and the (statue of) the man of Ying¹ standing undisturbed. The ruler Yüan of Sung² heard of the feat, called the artisan Shih, and said to him, 'Try and do the same thing on me.' The artisan said, 'Your servant has been able to trim things in that way, but the material on which I have worked has been dead for a long time.' Kwang-3ze said, 'Since the death of the Master, I have had no material to work upon. I have had no one with whom to talk.'

7. Kwan Kung being ill, duke Hwan went to ask for him, and said, 'Your illness, father Kung, is very severe; should you not speak out your mind to me? Should this prove the great illness, to whom will it be best for me to entrust my State?' Kwan Kung said, 'To whom does your grace wish to entrust it?' 'To Pão Shû-yâ³,' was the reply. 'He will not do. He is an admirable officer, pure and incorruptible, but with others who are not like himself he will not associate. And when he once hears

¹ Ying was the capital of K'û. I have seen in China about the graves of wealthy and distinguished men many life-sized statues of men somehow connected with them.

² Yüan is called the 'ruler' of Sung. That duchy was by this time a mere dependency of K'û. The sacrifices of its old ruling House were finally extinguished by K'û in B. C. 206.

³ Pão Shû-yâ had been the life-long friend of the dying premier, and to him in the first place had been owing the elevation of Hwan to the marquise.

of another man's faults, he never forgets them. If you employ him to administer the state, above, he will take the leading of your Grace, and, below, he will come into collision with the people;—in no long time you will be holding him as an offender.' The duke said, 'Who, then, is the man?' The reply was, 'If I must speak, there is Hsí Phǎng¹;—he will do. He is a man who forgets his own high position, and against whom those below him will not revolt. He is ashamed that he is not equal to Hwang-Ti, and pities those who are not equal to himself. Him who imparts of his virtue to others we call a sage; him who imparts of his wealth to others we call a man of worth. He who by his worth would preside over others, never succeeds in winning them; he who with his worth condescends to others, never but succeeds in winning them. Hsí Phǎng has not been (much) heard of in the state; he has not been (much) distinguished in his own clan. But as I must speak, he is the man for you.'

8. The king of Wú, floating about on the *Kiang*, (landed and) ascended the Hill of monkeys, which all, when they saw him, scampered off in terror, and hid themselves among the thick hazels. There was one, however, which, in an unconcerned way, swung about on the branches, displaying its cleverness to the king, who thereon discharged an arrow at it. With a nimble motion it caught the swift arrow, and the king ordered his attendants to hurry forward and shoot it; and thus the monkey was seized and killed. The king then, looking round, said to his friend Yen

¹ For a long time a great officer of *K'hi*, but he died in the same year as Kwan Kung himself.

Pû-t¹, 'This monkey made a display of its artfulness, and trusted in its agility, to show me its arrogance;—this it was which brought it to this fate. Take warning from it. Ah! do not by your looks give yourself haughty airs!' Yen Pû-t¹, when he returned home, put himself under the teaching of Tung Wû¹, to root up² his pride. He put away what he delighted in and abjured distinction. In three years the people of the kingdom spoke of him with admiration.

9. Nan-po 3ze-k³ was seated, leaning forward on his stool, and sighing gently as he looked up to heaven. (Just then) Yen K³h³ang-ze³ came in, and said, when he saw him, 'Master, you surpass all others. Is it right to make your body thus like a mass of withered bones, and your mind like so much slaked lime?' The other said, 'I formerly lived in a grotto on a hill. At that time Thien Ho⁴ once came to see me, and all the multitudes of K³h³ congratulated him thrice (on his having found the proper man). I must first have shown myself, and so it was that he knew me; I must first have been selling (what I had), and so it was that he came to buy. If I had not shown what I possessed, how should he have known it; if I had not been selling (myself), how should he have come to buy me? I pity

¹ We know these names only from their occurrence here. Tung Wû must have been a professor of Tâoism.

² The text here is 助, 'to help'; but it is explained as = 鋤, 'a hoe.' The Khang-hsi dictionary does not give this meaning of the character, but we find it in that of Yen Yüan.

³ See the first paragraph of Bk. II.

⁴ 田禾 must be the 田和 of Sze-mâ K³hien, who became marquis of K³h³ in B. C. 389.

the men who lose themselves¹; I also pity the men who pity others (for not being known); and I also pity the men who pity the men who pity those that pity others. But since then the time is long gone by; (and so I am in the state in which you have found me)².

10. *Kung-ni*, having gone to *K'ü*, the king ordered wine to be presented to him. *Sun Shü-áo*³ stood, holding the goblet in his hand. *Î-lião* of *Shih-nan*³, having received (a cup), poured its contents out as a sacrificial libation, and said, 'The men of old, on such an occasion as this, made some speech.' *Kung-ni* said, 'I have heard of speech without words; but I have never spoken it; I will do so now. *Î-lião* of *Shih-nan* kept (quietly) handling his little spheres,

¹ In seeking for worldly honours.

² That is, I have abjured all desire for worldly honour, and desire attainment in the *Táo* alone.

³ See *Mencius* VI, ii, 15. *Sun Shü-áo* was chief minister to king *K'hwang* who died in B. C. 591, and died, probably, before Confucius was born, and *Î-lião* (p. 28, n. 3) appears in public life only after the death of the sage. The three men could not have appeared together at any time. This account of their doing so was devised by our author as a peg on which to hang his own lessons in the rest of the paragraph. The two historical events referred to I have found it difficult to discover. They are instances of doing nothing, and yet thereby accomplishing what is very great. The action of *Î-lião* in 'quietly handling his balls' recalls my seeing the same thing done by a gentleman at *K'ü-fâu*, the city of Confucius, in 1873. Being left there with a companion, and not knowing how to get to the Grand Canal, many gentlemen came to advise with us how we should proceed. Among them was one who, while tendering his advice, kept rolling about two brass balls in one palm with the fingers of the other hand. When I asked the meaning of his action, I was told, 'To show how he is at his ease and master of the situation.' I mention the circumstance because I have nowhere found the phrase in the text adequately explained.

and the difficulties between the two Houses were resolved; Sun Shû-âo slept undisturbed on his couch, with his (dancer's) feather in his hand, and the men of Ying enrolled themselves for the war. I wish I had a beak three cubits long¹.

In the case of those two (ministers) we have what is called 'The Way that cannot be trodden²;' in (the case of *Kung-ni*) we have what is called 'the Argument without words³.' Therefore when all attributes are comprehended in the unity of the Tâo, and speech stops at the point to which knowledge does not reach, the conduct is complete. But where there is (not)³ the unity of the Tâo, the attributes cannot (always) be the same, and that which is beyond the reach of knowledge cannot be exhibited by any reasoning. There may be as many names as those employed by the Literati and the Mohists, but (the result is) evil. Thus when the sea does not reject the streams that flow into it in their eastward course, we have the perfection of greatness. The sage embraces in his regard both Heaven and Earth; his beneficent influence extends to all under the sky; and we do not know from whom it comes. Therefore though when living one may have no rank, and when dead no honorary epithet; though the reality (of what he is) may not be acknowledged and his name not established; we have in him what is called 'The Great Man.'

A dog is not reckoned good because it barks well; and a man is not reckoned wise because he speaks

¹ This strange wish concludes the speech of Confucius. What follows is from *Kwang-3ze*.

² Compare the opening chapters of the Tâo Teh King.

³ The Tâo is greater than any and all of its attributes.

skilfully;—how much less can he be deemed Great! If one thinks he is Great, he is not fit to be accounted Great;—how much less is he so from the practice of the attributes (of the Tâo)¹! Now none are so grandly complete as Heaven and Earth; but do they seek for anything to make them so grandly complete? He who knows this grand completion does not seek for it; he loses nothing and abandons nothing; he does not change himself from regard to (external) things; he turns in on himself, and finds there an inexhaustible store; he follows antiquity and does not feel about (for its lessons);—such is the perfect sincerity of the Great Man.

11. 3ze-*khi*² had eight sons. Having arranged them before him, he called *Kiû-fang Yăn*³, and said to him, 'Look at the physiognomy of my sons for me;—which will be the fortunate one?' Yăn said, 'Khwăn is the fortunate one.' 3ze-*khi* looked startled, and joyfully said, 'In what way?' Yăn replied, 'Khwăn will share the meals of the ruler of a state to the end of his life.' The father looked uneasy, burst into tears, and said, 'What has my son done that he should come to such a fate?' Yăn replied, 'When one shares the meals of the ruler of a state, blessings reach to all within the three branches of his kindred⁴, and how much more to his father and mother! But you, Master, weep when you hear this;—you oppose (the idea of) such happiness. It is the good fortune of your son, and

¹ See note 3 on previous page.

² This can hardly be any other but Nan-kwo 3ze-*khi*.

³ A famous physiognomist; some say, of horses. Hwâi-nan 3ze calls him *Kiû-fang Káo* (皇).

⁴ See Mayers's Manual, p. 303.

you count it his misfortune.' 3ze-*khi* said, 'O Yǎn, what sufficient ground have you for knowing that this will be Khwǎn's good fortune? (The fortune) that is summed up in wine and flesh affects only the nose and the mouth, but you are not able to know how it will come about. I have never been a shepherd, and yet a ewe lambed in the south-west corner of my house. I have never been fond of hunting, and yet a quail hatched her young in the south-east corner. If these were not prodigies, what can be accounted such? Where I wish to occupy my mind with my son is in (the wide sphere of) heaven and earth; I wish to seek his enjoyment and mine in (the idea of) Heaven, and our support from the Earth. I do not mix myself up with him in the affairs (of the world); nor in forming plans (for his advantage); nor in the practice of what is strange. I pursue with him the perfect virtue of Heaven and Earth, and do not allow ourselves to be troubled by outward things. I seek to be with him in a state of undisturbed indifference, and not to practise what affairs might indicate as likely to be advantageous. And now there is to come to us this vulgar recompense. Whenever there is a strange realisation, there must have been strange conduct. Danger threatens;—not through any sin of me or of my son, but as brought about, I apprehend, by Heaven. It is this which makes me weep!'

Not long after this, 3ze-*khi* sent off Khwǎn to go to Yen¹, when he was made prisoner by some robbers on the way. It would have been difficult to sell him if he were whole and entire, and they thought

¹ The state so called.

their easiest plan was to cut off (one of his) feet first. They did so, and sold him in *K'hi*, where he became Inspector of roads for a Mr. *K'hi*¹. Nevertheless he had flesh to eat till he died.

12. Nieh *K'üeh* met Hsü Yü (on the way), and said to him, 'Where, Sir, are you going to?' 'I am fleeing from Yáo,' was the reply. 'What do you mean?' 'Yáo has become so bent on his benevolence that I am afraid the world will laugh at him, and that in future ages men will be found eating one another². Now the people are collected together without difficulty. Love them, and they respond with affection; benefit them, and they come to you; praise them, and they are stimulated (to please you); make them to experience what they dislike, and they disperse. When the loving and benefiting proceed from benevolence and righteousness, those who forget the benevolence and righteousness, and those who make a profit of them, are the many. In this way the practice of benevolence and righteousness comes to be without sincerity and is like a borrowing of the instruments with which men catch birds³. In all this the one man's seeking to benefit the world by his decisions and enactments (of such a nature) is as if he were to cut through (the nature of all) by one operation;—Yáo knows how wise and superior men can benefit the world, but he does not

¹ One expert supposes the text here to mean 'duke *K'ü*;' but there was no such duke of *K'hi*. The best explanation seems to be that *K'ü* was a rich gentleman, inspector of the roads of *K'hi*, or of the streets of its capital, who bought Khwän to take his duties for him.

² Compare in Bk. XXIII, par. 2.

³ A scheming for one's own advantage.

also know how they injure it. It is only those who stand outside such men that know this ¹.'

There are the pliable and weak; the easy and hasty; the grasping and crooked. Those who are called the pliable and weak learn the words of some one master, to which they freely yield their assent, being secretly pleased with themselves, and thinking that their knowledge is sufficient, while they do not know that they have not yet begun (to understand) a single thing. It is this which makes them so pliable and weak. The easy and hasty are like lice on a pig. The lice select a place where the bristles are more wide apart, and look on it as a great palace or a large park. The slits between the toes, the overlappings of its skin, about its nipples and its thighs,—all these seem to them safe apartments and advantageous places;—they do not know that the butcher one morning, swinging about his arms, will spread the grass, and kindle the fire, so that they and the pig will be roasted together. So do they appear and disappear with the place where they harboured:—this is why they are called the easy and hasty.

Of the grasping and crooked we have an example in Shun. Mutton has no craving for ants, but ants have a craving for mutton, for it is rank. There was a rankness about the conduct of Shun, and the people were pleased with him. Hence when he thrice changed his residence, every one of them became a capital city ². When he came to the wild

¹ I suppose that the words of Hsü Yü stop with this sentence, and that from this to the end of the paragraph we have the sentiments of Kwang-ze himself. The style is his,—graphic but sometimes coarse.

² See note on Mencius V, i, 2, 3.

of Tăng¹, he had 100,000 families about him. Yáo having heard of the virtue and ability of Shun, appointed him to a new and uncultivated territory, saying, 'I look forward to the benefit of his coming here.' When Shun was appointed to this new territory, his years were advanced, and his intelligence was decayed;—and yet he could not find a place of rest or a home. This is an example of being grasping and wayward.

Therefore (in opposition to such) the spirit-like man dislikes the flocking of the multitudes to him. When the multitudes come, they do not agree; and when they do not agree, no benefit results from their coming. Hence there are none whom he brings very near to himself, and none whom he keeps at a great distance. He keeps his virtue in close embrace, and warmly nourishes (the spirit of) harmony, so as to be in accordance with all men. This is called the True man². Even the knowledge of the ant he puts away; his plans are simply those of the fishes³; even the notions of the sheep he discards. His seeing is simply that of the eye; his hearing that of the ear; his mind is governed by its general exercises. Being such, his course is straight and level as if marked out by a line, and its every change is in accordance (with the circumstances of the case).

13. The True men of old waited for the issues of events as the arrangements of Heaven, and did not by their human efforts try to take the place of Heaven. The True men of old (now) looked on

¹ Situation unknown.

² The spirit-like man and the true man are the same.

³ Fishes forget everything in the water.

success as life and on failure as death; and (now) on success as death and on failure as life. The operation of medicines will illustrate this:—there are monk's-bane, the *kieh-kăng*, the tribulus fruit, and china-root; each of these has the time and case for which it is supremely suitable; and all such plants and their suitabilities cannot be mentioned particularly. Kâu-kien¹ took his station on (the hill of) Kwâi-khî with 3,000 men with their buff-coats and shields:—(his minister) Kung knew how the ruined (Yüeh) might still be preserved, but the same man did not know the sad fate in store for himself¹. Hence it is said, 'The eye of the owl has its proper fitness; the leg of the crane has its proper limit, and to cut off any of it would distress (the bird).' Hence (also) it is (further) said, 'When the wind passes over it, the volume of the river is diminished, and so it is when the sun passes over it. But let the wind and sun keep a watch together on the river, and it will not begin to feel that they are doing it any injury;—it relies on its springs and flows on.' Thus, water does its part to the ground with undeviating exactness; and so does the shadow to the substance; and one thing to another. Therefore there is danger from the power of vision in the eyes, of hearing in the ears, and of the inordinate thinking of the mind; yea, there is danger from the exercise of every power of which man's constitution is the depository.

¹ See the account of the struggle between Kâu-kien of Yüeh and Fû-khî of Wû in the eightieth and some following chapters of the 'History of the various States of the Eastern Kâu (Lieh Kwo Kîh).' We have sympathy with Kâu-kien, till his ingratitude to his two great ministers, one of whom was Wăn Kung (the Kung of the text), shows the baseness of his character.

When the danger has come to a head, it cannot be averted, and the calamity is perpetuated, and goes on increasing. The return from this (to a state of security) is the result of (great) effort, and success can be attained only after a long time; and yet men consider (their power of self-determination) as their precious possession:—is it not sad? It is in this way that we have the ruin of states and the slaughtering of the people without end; while no one knows how to ask how it comes about.

14. Therefore, the feet of man on the earth tread but on a small space, but going on to where he has not trod before, he traverses a great distance easily; so his knowledge is but small, but going on to what he does not already know, he comes to know what is meant by Heaven¹. He knows it as The Great Unity; The Great Mystery; The Great Illuminator; The Great Framer; The Great Boundlessness; The Great Truth; The Great Determiner. This makes his knowledge complete. As The Great Unity, he comprehends it; as The Great Mystery, he unfolds it; as the Great Illuminator, he contemplates it; as the Great Framer, it is to him the Cause of all; as the Great Boundlessness, all is to him its embodiment; as The Great Truth, he examines it; as The Great Determiner, he holds it fast.

Thus Heaven is to him all; accordance with it is the brightest intelligence. Obscurity has in this its pivot; in this is the beginning. Such being the

¹ This paragraph grandly sets forth the culmination of all inquiries into the Táo as leading to the knowledge of Heaven; and the means by which it may be attained to.

case, the explanation of it is as if it were no explanation; the knowledge of it is as if it were no knowledge. (At first) he does not know it, but afterwards he comes to know it. In his inquiries, he must not set to himself any limits, and yet he cannot be without a limit. Now ascending, now descending, then slipping from the grasp, (the Táo) is yet a reality, unchanged now as in antiquity, and always without defect:—may it not be called what is capable of the greatest display and expansion? Why should we not inquire into it? Why should we be perplexed about it? With what does not perplex let us explain what perplexes, till we cease to be perplexed. So may we arrive at a great freedom from all perplexity!

BOOK XXV.

PART III. SECTION III.

Jeh-yang¹.

1. Jeh-yang having travelled to *K'ü*, *Î Kieh*² spoke of him to the king, and then, before the king had granted him an interview, (left him, and) returned home. Jeh-yang went to see Wang Kwo³, and said to him, 'Master, why do you not mention me to the king?' Wang Kwo replied, 'I am not so good a person to do that as Kung-yüeh Hsiü⁴.' 'What sort of man is he?' asked the other, and the reply was, 'In winter he spears turtles in the *Kiang*, and in summer he rests in shady places on the mountain. When passers-by ask him (what he is doing there), he says, "This is my abode." Since *Î Kieh* was not able to induce the king to see you, how much less should I, who am not equal to him, be able to do so! *Î Kieh*'s character is this:—he has no (real) virtue, but he has knowledge. If you do not freely yield yourself to him, but employ him to carry on his spirit-like influence (with you), you will certainly get upset and benighted in the region of riches and honours. His help will not be of a virtuous character, but will go to make your virtue

¹ See vol. xxxix, pp. 154, 155.

² A native of *K'ü*, and, probably, a parasite of the court.

³ An officer of *K'ü*, 'a worthy man.'

⁴ A recluse of *K'ü*, but not keeping quite aloof from the court.

less;—it will be like heaping on clothes in spring as a protection against cold, or bringing back the cold winds of winter as a protection against heat (in summer). Now the king of *K'û* is of a domineering presence and stern. He has no forgiveness for offenders, but is merciless as a tiger. It is only a man of subtle speech, or one of correct virtue, who can bend him from his purpose¹.

‘But the sagely man², when he is left in obscurity, causes the members of his family to forget their poverty; and, when he gets forward to a position of influence, causes kings and dukes to forget their rank and emoluments, and transforms them to be humble. With the inferior creatures, he shares their pleasures, and they enjoy themselves the more; with other men, he rejoices in the fellowship of the *Táo*, and preserves it in himself. Therefore though he may not speak, he gives them to drink of the harmony (of his spirit). Standing in association with them, he transforms them till they become in their feeling towards him as sons with a father. His wish is to return to the solitude of his own mind, and this is the effect of his occasional intercourse with them. So far-reaching is his influence on the minds of men; and therefore I said to you, “Wait for Kung-yüeh Hsiü.”’

2. The sage comprehends the connexions between himself and others, and how they all go to constitute him of one body with them, and he does not know how it is so;—he naturally does so. In fulfilling his constitution, as acted on and acting, he

¹ Much of the description of *Î K'ieh* is difficult to construe.

² Kung-yüeh Hsiü.

(simply) follows the direction of Heaven; and it is in consequence of this that men style him (a sage). If he were troubled about (the insufficiency of) his knowledge, what he did would always be but small, and sometimes would be arrested altogether;—how would he in this case be (the sage)? When (the sage) is born with all his excellence, it is other men who see it for him. If they did not tell him, he would not know that he was more excellent than others. And when he knows it, he is as if he did not know it; when he hears it, he is as if he did not hear it. His source of joy in it has no end, and men's admiration of him has no end;—all this takes place naturally¹. The love of the sage for others receives its name from them. If they did not tell him of it, he would not know that he loved them; and when he knows it, he is as if he knew it not; when he hears it, he is as if he heard it not. His love of others never has an end, and their rest in him has also no end:—all this takes place naturally¹.

3. When one sees at a distance his old country and old city, he feels a joyous satisfaction². Though it be full of mounds and an overgrowth of trees and grass, and when he enters it he finds but a tenth part remaining, still he feels that satisfaction. How much more when he sees what he saw, and hears what he heard before! All this is to him like a tower eighty cubits high exhibited in the sight of all men.

¹ That is, 'he does so in the spontaneity of his nature.' The 性 requires the employment of the term 'nature' here, not according to any abstract usage of the term, but meaning the natural constitution. Compare the 性之 in Mencius VII, i, 30.

² So does he rejoice in attaining to the knowledge of his nature.

(The sovereign) Zǎn-hsiang¹ was possessed of that central principle round which all things revolve², and by it he could follow them to their completion. His accompanying them had neither ending nor beginning, and was independent of impulse or time. Daily he witnessed their changes, and himself underwent no change; and why should he not have rested in this? If we (try to) adopt Heaven as our Master, we incapacitate ourselves from doing so. Such endeavour brings us under the power of things. If one acts in this way, what is to be said of him? The sage never thinks of Heaven nor of men. He does not think of taking the initiative, nor of anything external to himself. He moves along with his age, and does not vary or fail. Amid all the completeness of his doings, he is never exhausted. For those who wish to be in accord with him, what other course is there to pursue?

When Thang got one to hold for him the reins of government, namely, Mǎn-yin Tǎng-hǎng³, he employed him as his teacher. He followed his master, but did not allow himself to be hampered by him, and so he succeeded in following things to their completion. The master had the name; but that name was a superfluous addition to his laws, and the twofold character of his government was made apparent⁴. Kung-ní's 'Task your thoughts to the utmost' was his expression of the duties of a

¹ A sage sovereign prior to the three Hwang or August ones.

² See the same phraseology in Book II, par. 3.

³ I have followed Lin Hsî-kung in taking these four characters as the name of one man.

⁴ There was a human element in it instead of the Heavenly only; but some critics think the text here is erroneous or defective.

master. Yung-khăng said, 'Take the days away and there will be no year; without what is internal there will be nothing external¹.'

4. (King) Yung² of Wei made a treaty with the marquis Thien Mâu³ (of *K'hi*), which the latter violated. The king was enraged, and intended to send a man to assassinate him. When the Minister of War⁴ heard of it, he was ashamed, and said (to the king), 'You are a ruler of 10,000 chariots, and by means of a common man would avenge yourself on your enemy. I beg you to give me, Yen, the command of 200,000 soldiers to attack him for you. I will take captive his people and officers, halter (and lead off) his oxen and horses, kindling a fire within him that shall burn to his backbone. I will then storm his capital; and when he shall run away in terror, I will flog his back and break his spine.' *K'î-ze*⁵ heard of this advice, and was ashamed of it, and said (to the king), 'We have been raising the wall (of our capital) to a height of eighty cubits, and the work has been completed. If we now get it thrown down, it will be a painful toil to the convict builders. It is now seven years

¹ Said to have been employed by Hwang-Tî to make the calendar.

² B.C. 370-317.

³ I do not find the name Mâu as belonging to any of the Thien rulers of *K'hi*. The name of the successor of Thien Ho, who has been before us, was 午, Wû, for which 牟, Mâu, may be a mistake; or 'the marquis Mâu' may be a creation of our author.

⁴ Literally, 'the Rhinoceros' Head,' the title of 'the Minister of War' in Wei, who was at this time a Kung-sun Yen. See the memoir of him in Sze-mâ *K'zien*, Book IX of his Biographies.

⁵ I do not know that anything more can be said of *K'î* and *Hwâ* than that they were officers of Wei.

since our troops were called out, and this is the foundation of the royal sway. Yen would introduce disorder;—he should not be listened to.’ Hwâ-ze¹ heard of this advice, and, greatly disapproving of it, said (to the king), ‘He who shows his skill in saying “Attack *K’hi*” would produce disorder; and he who shows his skill in saying “Do not attack it” would also produce disorder. And one who should (merely) say, “The counsellors to attack *K’hi* and not to attack it would both produce disorder,” would himself also lead to the same result.’ The king said, ‘Yes, but what am I to do?’ The reply was, ‘You have only to seek for (the rule of) the T’ao (on the subject).’

Hui-ze, having heard of this counsel, introduced to the king T’ai J’in-zăn², who said, ‘There is the creature called a snail; does your majesty know it?’ ‘I do.’ ‘On the left horn of the snail there is a kingdom which is called Provocation, and on the right horn another which is called Stupidity. These two kingdoms are continually striving about their territories and fighting. The corpses that lie on the ground amount to several myriads. The army of one may be defeated and put to flight, but in fifteen days it will return.’ The king said, ‘Pooh! that is empty talk!’ The other rejoined, ‘Your servant begs to show your majesty its real significance. When your majesty thinks of space—east, west, north, and south, above and beneath—can you set any limit to it?’ ‘It is illimitable,’ said the king; and his visitor went on, ‘Your majesty knows

¹ See note 5 on preceding page.

² Evidently a man of considerable reach of thought.

how to let your mind thus travel through the illimitable, and yet (as compared with this) does it not seem insignificant whether the kingdoms that communicate one with another exist or not?' The king replies, 'It does so;' and Tâi Jîn-zăn said, finally, 'Among those kingdoms, stretching one after another, there is this Wei; in Wei there is this (city of) Liang¹; and in Liang there is your majesty. Can you make any distinction between yourself, and (the king of that kingdom of) Stupidity?' To this the king answered, 'There is no distinction,' and his visitor went out, while the king remained disconcerted and seemed to have lost himself.

When the visitor was gone, Hui-ze came in and saw the king, who said, 'That stranger is a Great man. An (ordinary) sage is not equal to him.' Hui-ze replied, 'If you blow into a flute, there come out its pleasant notes; if you blow into a sword-hilt, there is nothing but a wheezing sound. Yâo and Shun are the subjects of men's praises, but if you speak of them before Tâi Jîn-zăn, there will be but the wheezing sound.'

5. Confucius, having gone to K'û, was lodging in the house of a seller of Congee at Ant-hill. On the roof of a neighbouring house there appeared the husband and his wife, with their servants, male and female². Jze-lû said, 'What are those people doing,

¹ Liang, the capital, came to be used also as the name of the state;—as in Mencius.

² 'They were on the roof, repairing it,' say some. 'They had got on the roof, to get out of the way of Confucius,' say others. The sequel shows that this second interpretation is correct; but we do not see how the taking to the roof facilitated their departure from the house.

collected there as we see them ?' *Kung-nî* replied, 'The man is a disciple of the sages. He is burying himself among the people, and hiding among the fields. Reputation has become little in his eyes, but there is no bound to his cherished aims. Though he may speak with his mouth, he never tells what is in his mind. Moreover, he is at variance with the age, and his mind disdains to associate with it ;—he is one who may be said to lie hid at the bottom of the water on the dry land. Is he not a sort of *Î Lião* of *Shih-nan* ?' *Ûze-lû* asked leave to go and call him, but *Confucius* said, 'Stop. He knows that I understand him well. He knows that I am come to *K'û*, and thinks that I am sure to try and get the king to invite him (to court). He also thinks that I am a man swift to speak. Being such a man, he would feel ashamed to listen to the words of one of voluble and flattering tongue, and how much more to come himself and see his person! And why should we think that he will remain here ?' *Ûze-lû*, however, went to see how it was, but found the house empty.

6. The Border-warden of *K'ang-wû*¹, in questioning *Ûze-lão*², said, 'Let not a ruler in the exercise of his government be (like the farmer) who leaves the clods unbroken, nor, in regulating his people, (like one) who recklessly plucks up the shoots. Formerly, in ploughing my corn-fields, I left the clods unbroken, and my recompense was in the rough unsatisfactory crops ; and in weeding, I destroyed and tore up (many good plants), and my recompense was in the scantiness of my harvests. In subse-

¹ Probably the same as the *K'ang-wû* *Ûze* in Book II, par. 9.

² See *Analects* IX, vi, 4.

quent years I changed my methods, ploughing deeply and carefully covering up the seed; and my harvests were rich and abundant, so that all the year I had more than I could eat.' When *Kwang-ze* heard of his remarks, he said, 'Now-a-days, most men, in attending to their bodies and regulating their minds, correspond to the description of the Border-warden. They hide from themselves their Heaven(-given being); they leave (all care of) their (proper) nature; they extinguish their (proper) feelings; and they leave their spirit to die:—abandoning themselves to what is the general practice. Thus dealing with their nature like the farmer who is negligent of the clods in his soil, the illegitimate results of their likings and dislikings become their nature. The bushy sedges, reeds, and rushes, which seem at first to spring up to support our bodies, gradually eradicate our nature, and it becomes like a mass of running sores, ever liable to flow out, with scabs and ulcers, discharging in flowing matter from the internal heat. So indeed it is!'

7. Po *Kü*¹ was studying with *Lão Tan*, and asked his leave to go and travel everywhere. *Lão Tan* said, 'Nay;—elsewhere it is just as here.' He repeated his request, and then *Lão Tan* said, 'Where would you go first?' 'I would begin with *Kh*,' replied the disciple. 'Having got there, I would go to look at the criminals (who had been executed). With my arms I would raise (one of) them up and set him on his feet, and, taking off my court robes, I would cover him with them, appealing at

¹ We can only say of Po *Kü* that he was a disciple of *Lão-ze*.

the same time to Heaven and bewailing his lot, while I said¹, "My son, my son, you have been one of the first to suffer from the great calamities that afflict the world²." (Láo Tan) said¹, '(It is said), "Do not rob. Do not kill." (But) in the setting up of (the ideas of) glory and disgrace, we see the cause of those evils; in the accumulation of property and wealth, we see the causes of strife and contention. If now you set up the things against which men fret; if you accumulate what produces strife and contention among them; if you put their persons in such a state of distress, that they have no rest or ease, although you may wish that they should not come to the end of those (criminals), can your wish be realised?

'The superior men (and rulers) of old considered that the success (of their government) was to be found in (the state of) the people, and its failure to be sought in themselves; that the right might be with the people, and the wrong in themselves. Thus it was that if but a single person lost his life, they retired and blamed themselves. Now, however, it is not so. (Rulers) conceal what they want done, and hold those who do not know it to be stupid; they require what is very difficult, and condemn those who do not dare to undertake it; they impose heavy burdens, and punish those who are unequal to them; they require men to go far, and put them to death when they cannot accomplish the distance. When the people know that the utmost of their

¹ There are two 曰 here, and the difficulty in translating is to determine the subject of each.

² The 離 of the text here is taken as = 罹.

strength will be insufficient, they follow it up with deceit. When (the rulers) daily exhibit much hypocrisy, how can the officers and people not be hypocritical? Insufficiency of strength produces hypocrisy; insufficiency of knowledge produces deception; insufficiency of means produces robbery. But in this case against whom ought the robbery and theft to be charged?'

8. When *Kü Po-yü* was in his sixtieth year, his views became changed in the course of it¹. He had never before done anything but consider the views which he held to be right, but now he came to condemn them as wrong; he did not know that what he now called right was not what for fifty-nine years he had been calling wrong. All things have the life (which we know), but we do not see its root; they have their goings forth, but we do not know the door by which they depart. Men all honour that which lies within the sphere of their knowledge, but they do not know their dependence on what lies without that sphere which would be their (true) knowledge:—may we not call their case one of great perplexity? Ah! Ah! there is no escaping from this dilemma. So it is! So it is!

9. *Kung-ní* asked the Grand Historiographer² *Tá Tháo*, (along with) *Po Khang-khien* and *Khieh-wei*, saying, 'Duke Ling of Wei was so addicted to

¹ Confucius thought highly of this *Kü Po-yü*, and they were friends (*Analects*, XIV, 26; XV, 6). It would seem from this paragraph that, in his sixtieth year, he adopted the principles of Táoism. Whether he really did so we cannot tell. See also Book IV, par. 5.

² We must translate here in the singular, for in the historiographer's department there were only two officers with the title of 'Grand;' *Po Khang-khien* and *Khieh-wei* would be inferior members of it.

drink, and abandoned to sensuality, that he did not attend to the government of his state. Occupied in his pursuit of hunting with his nets and bows, he kept aloof from the meetings of the princes. In what was it that he showed his title to the epithet of Ling¹? Tá Tháo said, 'It was on account of those very things.' Po *Khang-khien* said, 'Duke Ling had three mistresses with whom he used to bathe in the same tub. (Once, however), when Shih-jhiû came to him with presents from the imperial court, he made his servants support the messenger in bearing the gifts². So dissolute was he in the former case, and when he saw a man of worth, thus reverent was he to him. It was on this account that he was styled "Duke Ling."' *Khih-wei* said, 'When duke Ling died, and they divined about burying him in the old tomb of his House, the answer was unfavourable; when they divined about burying him on Shâ-khiû, the answer was favourable. Accordingly they dug there to the depth of several fathoms, and found a stone coffin. Having washed and inspected it, they discovered an inscription, which said,

"This grave will not be available for your posterity;
Duke Ling will appropriate it for himself."

¹ Ling (靈), as a posthumous epithet, has various meanings, none of them very bad, and some of them very good. Confucius ought to have been able to solve his question himself better than any of the historiographers, but he propounded his doubt to them for reasons which he, no doubt, had.

² We are not to suppose that the royal messenger found him in the tub with his three wives or mistresses. The two incidents mentioned illustrate two different phases of his character, as some of the critics, and even the text itself, clearly indicate.

Thus that epithet of Ling had long been settled for the duke¹. But how should those two be able to know this?’

10. Shào K'ih² asked Thâi-kung Thiào², saying, ‘What do we mean by “The Talk of the Hamlets and Villages?”’ The reply was, ‘Hamlets and Villages are formed by the union—say of ten surnames and a hundred names, and are considered to be (the source of) manners and customs. The differences between them are united to form their common character, and what is common to them is separately apportioned to form the differences. If you point to the various parts which make up the body of a horse, you do not have the horse; but when the horse is before you, and all its various parts stand forth (as forming the animal), you speak of “the horse.” So it is that the mounds and hills are made to be the elevations that they are by accumulations of earth which individually are but low. (So also rivers like) the K'iang and the Ho obtain their greatness by the union of (other smaller) waters with them. And (in the same way) the Great man exhibits the common sentiment of humanity by the union in himself of all its individualities. Hence when ideas come to him from without, though he

¹ This explanation is, of course, absurd.

² These two names are both metaphorical, the former meaning ‘Small Knowledge,’ and the latter, ‘The Grand Public and Just Harmonizer.’ Small Knowledge would look for the T'ao in the ordinary talk of ordinary men. The other teaches him that it is to be found in ‘the Great man,’ blending in himself what is ‘just’ in the sentiments and practice of all men. And so it is to be found in all the phenomena of nature, but it has itself no name, and does nothing.

has his own decided view, he does not hold it with bigotry ; and when he gives out his own decisions, which are correct, the views of others do not oppose them. The four seasons have their different elemental characters, but they are not the partial gifts of Heaven, and so the year completes its course. The five official departments have their different duties, but the ruler does not partially employ any one of them, and so the kingdom is governed. (The gifts of) peace and war (are different), but the Great man does not employ the one to the prejudice of the other, and so the character (of his administration) is perfect. All things have their different constitutions and modes of actions, but the Tào (which directs them) is free from all partiality, and therefore it has no name. Having no name, it therefore does nothing. Doing nothing, there is nothing which it does not do.

‘Each season has its ending and beginning ; each age has its changes and transformations ; misery and happiness regularly alternate. Here our views are thwarted, and yet the result may afterwards have our approval ; there we insist on our own views, and looking at things differently from others, try to correct them, while we are in error ourselves. The case may be compared to that of a great marsh, in which all its various vegetation finds a place, or we may look at it as a great hill, where trees and rocks are found on the same terrace. Such may be a description of what is intended by “The Talk of the Hamlets and Villages.”’

Shào Kih said, ‘Well, is it sufficient to call it (an expression of) the Tào ?’ Thài-kung Thiào said, ‘It is not so. If we reckon up the number of things,

they are not 10,000 merely. When we speak of them as "the Myriad Things," we simply use that large number by way of accommodation to denominate them. In this way Heaven and Earth are the greatest of all things that have form; the Yin and Yang are the greatest of all elemental forces. But the Táo is common to them. Because of their greatness to use the Táo or (Course) as a title and call it "the Great Táo" is allowable. But what comparison can be drawn between it and "the Talk of the Hamlets and Villages?" To argue from this that it is a sufficient expression of the Táo, is like calling a dog and a horse by the same name, while the difference between them is so great.'

11. Sháo Kih said, 'Within the limits of the four cardinal points, and the six boundaries of space, how was it that there commenced the production of all things?' Thái-kung Thiáo replied, 'The Yin and Yang reflected light on each other, covered each other, and regulated each the other; the four seasons gave place to one another, produced one another, and brought one another to an end. Likings and dislikings, the avoidings of this and movements towards that, then arose (in the things thus produced), in their definite distinctness; and from this came the separation and union of the male and female. Then were seen now security and now insecurity, in mutual change; misery and happiness produced each other; gentleness and urgency pressed on each other; the movements of collection and dispersion were established:—these names and processes can be examined, and, however minute, can be recorded. The rules determining the order in which they follow one another, their mutual influence

now acting directly and now revolving, how, when they are exhausted, they revive, and how they end and begin again ; these are the properties belonging to things. Words can describe them and knowledge can reach to them ; but with this ends all that can be said of things. Men who study the Táo do not follow on when these operations end, nor try to search out how they began :—with this all discussion of them stops.’

Sháo K’ih said, ‘*K’i K’án*¹ holds that (the Táo) forbids all action, and *K’ieh-ze*¹ holds that it may perhaps allow of influence. Which of the two is correct in his statements, and which is one-sided in his ruling?’ Thái-kung Thiáo replied, ‘Cocks crow and dogs bark ;—this is what all men know. But men with the greatest wisdom cannot describe in words whence it is that they are formed (with such different voices), nor can they find out by thinking what they wish to do. We may refine on this small point ; till it is so minute that there is no point to operate on, or it may become so great that there is no embracing it. “Some one caused it ;” “No one did it ;” but we are thus debating about things ; and the end is that we shall find we are in error. “Some one caused it ;”—then there was a real Being. “No one did it ;”—then there was mere vacancy. To have a name and a real existence,—that is the condition of a thing. Not to have a name, and not

¹ Two masters of schools of Táoism. Who the former was I do not know ; but Sze-mâ K’ien in the seventy-fourth Book of his Records mentions several Táoist masters, and among them *K’ieh-ze*, a native of *K’hi*, ‘a student of the arts of the Táo and its Characteristics, as taught by Hwang-T’i and Láo-ze, and who also published his views on the subject.’

to have real being;—that is vacancy and no thing. We may speak and we may think about it, but the more we speak, the wider shall we be of the mark. Birth, before it comes, cannot be prevented; death, when it has happened, cannot be traced farther. Death and life are not far apart; but why they have taken place cannot be seen. That some one has caused them, or that there has been no action in the case are but speculations of doubt. When I look for their origin, it goes back into infinity; when I look for their end, it proceeds without termination. Infinite, unceasing, there is no room for words about (the Tâo). To regard it as in the category of things is the origin of the language that it is caused or that it is the result of doing nothing; but it would end as it began with things. The Tâo cannot have a (real) existence; if it has, it cannot be made to appear as if it had not. The name Tâo is a metaphor, used for the purpose of description¹. To say that it causes or does nothing is but to speak of one phase of things, and has nothing to do with the Great Subject. If words were sufficient for the purpose, in a day's time we might exhaust it; since they are not sufficient, we may speak all day, and only exhaust (the subject of) things. The Tâo is the extreme to which things conduct us. Neither speech nor silence is sufficient to convey the notion of it. Neither by speech nor by silence can our thoughts about it have their highest expression.

¹ A very important statement with regard to the meaning of the name Tâo.

BOOK XXVI.

PART III. SECTION IV.

Wâi Wû, or 'What comes from Without'.¹

1. What comes from without cannot be determined beforehand. So it was that Lung-fǎng² was killed; Pi-kan immolated; and the count of K'î (made to feign himself) mad, (while) O-lâi died³, and Kieh and K'âu both perished. Rulers all wish their ministers to be faithful, but that faithfulness may not secure their confidence; hence Wû Yün became a wanderer along the K'iang⁴, and K'hang Hung died in Shû, where (the people) preserved his blood for three years, when it became changed into green jade⁵. Parents all wish their sons to be filial, but that filial duty may not secure their love; hence

¹ See vol. xxxix, p. 155.

² The name of Kwan Lung-fǎng, a great officer of Kieh, the tyrant of Hsiâ;—see Bk. IV, par. 1, et al.

³ A scion of the line of K'hin whose fortunes culminated in Shih Hwang-Tî. O-lâi assisted the tyrant of Shang, and was put to death by king Wû of K'âu.

⁴ The famous Wû 3ze-hstü, the hero of Revenge, who made his escape along the K'iang, in about B. C. 512, to Wû, after the murder of his father and elder brother by the king of K'hiu.

⁵ See Bk. X, par. 2. In the 3o-kwan, under the third year of duke Âi, it is related that the people of K'âu killed K'hang Hung; but nothing is said of this being done in Shû, or of his blood turning to green jade! This we owe to the K'zun K'hiu of Lü.

Hsião-~~ki~~¹ had to endure his sorrow, and ǰǰng Shǎn his grief².

When wood is rubbed against wood, it begins to burn; when metal is subjected to fire, it (melts and) flows. When the Yin and Yang act awry, heaven and earth are greatly perturbed; and on this comes the crash of thunder, and from the rain comes fire, which consumes great locust trees³. (The case of men) is still worse. They are troubled between two pitfalls⁴, from which they cannot escape. Chrysalis-like, they can accomplish nothing. Their minds are as if hung up between heaven and earth. Now comforted, now pitied, they are plunged in difficulties. The ideas of profit and of injury rub against each other, and produce in them a very great fire. The harmony (of the mind) is consumed in the mass of men. Their moonlike intelligence cannot overcome the (inward) fire. They thereupon fall away more and more, and the Course (which they should pursue) is altogether lost.

2. The family of *Kwang Káu* being poor, he went to ask the loan of some rice from the Marquis Superintendent of the Ho⁵, who said, 'Yes, I shall be

¹ Said to have been 'the eldest son of king Wû Ting or Kão Jung of the Yin dynasty. I do not know the events in his experience to which our author must be referring.

² The well-known disciple of Confucius, famous for his filial piety.

³ The lightning accompanying a thunderstorm.

⁴ The ideas of profit and injury immediately mentioned.

⁵ In another version of this story, in Liû Hsiang's *Shwo Yüan*, XI, art. 13, the party applied to is 'duke Wǎn of Wei;' but this does not necessarily conflict with the text. The genuineness of the paragraph is denied by Lin Hsi-kung and others; but I seem to see the hand of *Kwang-ǰze* in it.

getting the (tax-) money from the people (soon), and I will then lend you three hundred ounces of silver;—will that do?’ *Kwang K’au* flushed with anger, and said, ‘On the road yesterday, as I was coming here, I heard some one calling out. On looking round, I saw a goby in the carriage rut, and said to it, “Goby fish, what has brought you here?” The goby said, “I am Minister of Waves in the Eastern Sea. Have you, Sir, a gallon or a pint of water to keep me alive?” I replied, “Yes, I am going south to see the kings of *Wû* and *Yüeh*, and I will then lead a stream from the Western *Kiang* to meet you;—will that do?” The goby flushed with anger, and said, “I have lost my proper element, and I can here do nothing for myself; but if I could get a gallon or a pint of water, I should keep alive. Than do what you propose, you had better soon look for me in a stall of dry fish.”’

3. A son of the duke of *Zăn*¹, having provided himself with a great hook, a powerful black line, and fifty steers to be used as bait, squatted down on (mount) *Kwâi K’i*, and threw the line into the Eastern Sea. Morning after morning he angled thus, and for a whole year caught nothing. At the end of that time, a great fish swallowed the bait, and dived down, dragging the great hook with him. Then it rose to the surface in a flurry, and flapped with its fins, till the white waves rose like hills, and the waters were lashed into fury. The noise was like that of imps and spirits, and spread terror

¹ I suppose this was merely a district of *K’û*, and the duke of it merely the officer in charge of it;—according to the practice of the rulers of *K’û*, after they usurped the title of King.

for a thousand li. The prince having got such a fish, cut it in slices and dried them. From the *Keh* river¹ to the east, and from *Ṣhang-wû*² to the north, there was not one who did not eat his full from that fish; and in subsequent generations, story-tellers of small abilities have all repeated the story to one another with astonishment. (But) if the prince had taken his rod, with a fine line, and gone to pools and ditches, and watched for minnows and gobies, it would have been difficult for him to get a large fish. Those who dress up their small tales to obtain favour with the magistrates are far from being men of great understanding; and therefore one who has not heard the story of this scion of *Zăn* is not fit to take any part in the government of the world;—far is he from being so³.

4. Some literati, students of the Odes and Ceremonies, were breaking open a mound over a grave⁴. The superior among them spoke down to the others, 'Day is breaking in the east; how is the thing going on?' The younger men replied, 'We have not yet opened his jacket and skirt, but there is a pearl in the mouth. As it is said in the Ode,

"The bright, green grain
Is growing on the sides of the mound.

¹ The 制河 of the text = the 浙江, still giving its name to the province so called.

² Where Shun was buried.

³ This last sentence is difficult to construe, and to understand.—The genuineness of this paragraph is also questioned, and the style is inferior to that of the preceding.

⁴ I can conceive of *Kwang-ze* telling this story of some literati who had been acting as resurrectionists, as a joke against their class; but not of his writing it to form a part of his work.

While living, he gave nothing away;
 Why, when dead, should he hold a pearl in his
 mouth¹?"'

Thereupon they took hold of the whiskers and pulled at the beard, while the superior introduced a piece of fine steel into the chin, and gradually separated the jaws, so as not to injure the pearl in the mouth.

5. A disciple of Láo Lái-ze², while he was out gathering firewood, met with Kung-ní. On his return, he told (his master), saying, 'There is a man there, the upper part of whose body is long and the lower part short. He is slightly hump-backed, and his ears are far back. When you look at him, he seems occupied with the cares of all within the four seas; I do not know whose son he is.' Láo Lái-ze said, 'It is K'hiû; call him here;' and when Kung-ní came, he said to him, 'K'hiû, put away your personal conceit, and airs of wisdom, and show yourself to be indeed a superior man.' Kung-ní bowed and was retiring, when he abruptly changed his manner, and asked, 'Will the object I am pursuing be thereby advanced?' Láo Lái-ze replied, 'You cannot bear the sufferings of this one age, and are stubbornly regardless of the

¹ This verse is not found, so far as I know, anywhere else.

² Láo Lái-ze appears here as a contemporary of Confucius, and the master of a Táoistic school, and this also is the view of him which we receive from the accounts in Sze-mâ K'ien and Hwang-fû Mí. Sze-mâ says he published a work in fifteen sections on the usefulness of Táoism. Some have imagined that he was the same as Láo-ze himself, but there does not appear any ground for that opinion. He is one of the twenty-four examples of Filial Piety so celebrated among the Chinese; but I suspect that the accounts of him as such are fabrications. He certainly lectures Confucius here in a manner worthy of Láo Tan.

evils of a myriad ages :—is it that you purposely make yourself thus unhappy? or is it that you have not the ability to comprehend the case? Your obstinate purpose to make men rejoice in a participation of your joy is your life-long shame, the procedure of a mediocre man. You would lead men by your fame; you would bind them to you by your secret art. Than be praising Yáo and condemning Kieh, you had better forget them both, and shut up your tendency to praise. If you reflect on it, it does nothing but injury; your action in it is entirely wrong. The sage is full of anxiety and indecision in undertaking anything, and so he is always successful. But what shall I say of your conduct? To the end it is all affectation.'

6. The ruler Yüan of Sung¹ (once) dreamt at midnight that a man with dishevelled hair peeped in on him at a side door and said, 'I was coming from the abyss of 3âi-lû, commissioned by the Clear Kiang to go to the place of the Earl of the Ho; but the fisherman Yü 3ü has caught me.' When the ruler Yüan awoke, he caused a diviner to divine the meaning (of the dream), and was told, 'This is a marvellous tortoise.' The ruler asked if among the fishermen there was one called Yü 3ü, and being told by his attendants that there was, he gave orders that he should be summoned to court. Accordingly the man next day appeared at court, and the ruler said, 'What have you caught (lately) in fishing?' The reply was, 'I have caught in my net a white tortoise, sieve-like, and five cubits round.' 'Present the prodigy here,' said the ruler; and, when it came, once and

¹ Compare in Bk. XXI, par. 7.

again he wished to kill it, once and again he wished to keep it alive. Doubting in his mind (what to do), he had recourse to divination, and obtained the answer, 'To kill the tortoise for use in divining will be fortunate.' Accordingly they cut the creature open, and perforated its shell in seventy-two places, and there was not a single divining slip which failed¹.

Kung-nt said, 'The spirit-like tortoise could show itself in a dream to the ruler *Yüan*, and yet it could not avoid the net of *Yü 3ü*. Its wisdom could respond on seventy-two perforations without failing in a single divination, and yet it could not avoid the agony of having its bowels all scooped out. We see from this that wisdom is not without its perils, and spirit-like intelligence does not reach to everything. A man may have the greatest wisdom, but there are a myriad men scheming against him. Fishes do not fear the net, though they fear the pelican. Put away your small wisdom, and your great wisdom will be bright; discard your skilfulness, and you will become naturally skilful. A child when it is born needs no great master, and yet it becomes able to speak, living (as it does) among those who are able to speak.'

7. *Hui-ze* said to *Kwang-ze*, 'You speak, Sir, of what is of no use.' The reply was, 'When a man knows what is not useful, you can then begin to speak to him of what is useful. The earth for instance is certainly spacious and great; but what a

¹ The story of this wonderful tortoise is found at much greater length, and with variations, in *Sze-mâ K'ien's* Records, Bk. LXVIII, q. v. The moral of it is given in the concluding remarks from *Confucius*.

man uses of it is only sufficient ground for his feet. If, however, a rent were made by the side of his feet, down to the yellow springs, could the man still make use of it?' Hui-ze said, 'He could not use it,' and K'wang-ze rejoined, 'Then the usefulness of what is of no use is clear ¹.'

8. K'wang-ze said, 'If a man have the power to enjoy himself (in any pursuit), can he be kept from doing so? If he have not the power, can he so enjoy himself? There are those whose aim is bent on concealing themselves, and those who are determined that their doings shall leave no trace. Alas! they both shirk the obligations of perfect knowledge and great virtue. The (latter) fall, and cannot recover themselves; the (former) rush on like fire, and do not consider (what they are doing). Though men may stand to each other in the relation of ruler and minister, that is but for a time. In a changed age, the one of them would not be able to look down on the other. Hence it is said, "The Perfect man leaves no traces of his conduct."

'To honour antiquity and despise the present time is the characteristic of learners ²; but even the disciples of K'ih-wei ³ have to look at the present age; and who can avoid being carried along by its course? It is only the Perfect man who is able to enjoy himself in the world, and not be deflected from the right,

¹ See Bk. I, par. 6, and XXIV, par. 14. The conversations between our author and Hui-ze often turned on this subject.

² Does our author mean by 'learners' the literati, the disciples of Confucius?

³ K'ih-wei,—see Bk. VI, par. 7. Perhaps 'the disciples of K'ih-wei' are those who in our author's time called themselves such, but were not.

to accommodate himself to others and not lose himself. He does not learn their lessons ; he only takes their ideas into consideration, and does not discard them as different from his own.

9. 'It is the penetrating eye that gives clear vision, the acute ear that gives quick hearing, the discriminating nose that gives discernment of odours, the practised mouth that gives the enjoyment of flavours, the active mind that acquires knowledge, and the far-reaching knowledge that constitutes virtue. In no case does the connexion with what is without like to be obstructed ; obstruction produces stoppage ; stoppage, continuing without intermission, arrests all progress ; and with this all injurious effects spring up.

'The knowledge of all creatures depends on their breathing¹. But if their breath be not abundant, it is not the fault of Heaven, which tries to penetrate them with it, day and night without ceasing ; but men notwithstanding shut their pores against it. The womb encloses a large and empty space ; the heart has its spontaneous and enjoyable movements. If their apartment be not roomy, wife and mother-in-law will be bickering ; if the heart have not its spontaneous and enjoyable movements, the six faculties of perception² will be in mutual collision. That

¹ There seems to underlie this statement the Tâoist dogma about the regulation of the 'breath,' as conducive to long life and mental cultivation.

² Probably what in Buddhist literature are called 'the Six Entrances (六入),' what Mayers denominates 'The Six Organs of Admittance, or Bodily Sensations,' the *Shaḍāyatana*, the eye, ear, nose, mouth, body, and mind,—one of the twelve *Nidānas* in the Buddhist system.

the great forests, the heights and hills, are pleasant to men, is because their spirits cannot overcome (those distracting influences). Virtue overflows into (the love of) fame; (the love of) fame overflows into violence; schemes originate in the urgency (of circumstances); (the show of) wisdom comes from rivalry; the fuel (of strife) is produced from the obstinate maintenance (of one's own views); the business of offices should be apportioned in accordance with the approval of all. In spring, when the rain and the sunshine come seasonably, vegetation grows luxuriantly, and sickles and hoes begin to be prepared. More than half of what had fallen down becomes straight, and we do not know how.

10. 'Stillness and silence are helpful to those who are ill; rubbing the corners of the eyes is helpful to the aged; rest serves to calm agitation; but they are the toiled and troubled who have recourse to these things. Those who are at ease, and have not had such experiences, do not care to ask about them. The spirit-like man has had no experience of how it is that the sagely man keeps the world in awe, and so he does not inquire about it; the sagely man has had no experience of how it is that the man of ability and virtue keeps his age in awe, and so he does not inquire about it; the man of ability and virtue has had no experience of how it is that the superior man keeps his state in awe, and so he does not inquire about it. The superior man has had no experience of how it is that the small man keeps himself in agreement with his times that he should inquire about it.'

11. The keeper of the Yen Gate¹, on the death of

¹ The name of one of the gates in the wall of the capital of Sung.

his father, showed so much skill in emaciating his person¹ that he received the rank of 'Pattern for Officers.' Half the people of his neighbourhood (in consequence) carried their emaciation to such a point that they died. When Yâo wished to resign the throne to Hsü Yû, the latter ran away. When Thang offered his to Wû Kwang², Wû Kwang became angry. When Kî Thâ³ heard it, he led his disciples, and withdrew to the river Kho, where the feudal princes came and condoled with him, and after three years, Shăn Thû-tî⁴ threw himself into the water. Fishing-stakes⁵ are employed to catch fish; but when the fish are got, the men forget the stakes. Snares are employed to catch hares, but when the hares are got, men forget the snares. Words are employed to convey ideas; but when the ideas are apprehended, men forget the words. Fain would I talk with such a man who has forgot the words!

¹ The abstinences and privations in mourning were so many that there was a danger of their seriously injuring the health;—which was forbidden.

² See Bk. VI, par. 3; but in the note there, Wû Kwang is said to have been of the time of Hwang-Tî; which is probably an error.

³ See IV, par. 3; but I do not know who Kî Thâ was, nor can I explain what is said of him here.

⁴ See again IV, par. 3.

⁵ According to some, 'baskets.' This illustration is quoted in the Inscription on the Nestorian Monument, II, 7.

BOOK XXVII.

PART III. SECTION V.

Yü Yen, or 'Metaphorical Language'¹.

1. Of my sentences nine in ten are metaphorical ; of my illustrations seven in ten are from valued writers. The rest of my words are like the water that daily fills the cup, tempered and harmonised by the Heavenly element in our nature².

The nine sentences in ten which are metaphorical are borrowed from extraneous things to assist (the comprehension of) my argument. (When it is said, for instance), 'A father does not act the part of matchmaker for his own son,' (the meaning is that) 'it is better for another man to praise the son than for his father to do so.' The use of such metaphorical language is not my fault, but the fault of men (who would not otherwise readily understand me).

Men assent to views which agree with their own, and oppose those which do not so agree. Those which agree with their own they hold to be right, and those which do not so agree they hold to be wrong. The seven out of ten illustrations taken from valued writers are designed to put an end to disputations. Those writers are the men of hoary eld, my predecessors in time. But such as are un-

¹ See vol. xxxix, pp. 155, 156.

² See Bk. II, par. 10.

versed in the warp and woof, the beginning and end of the subject, cannot be set down as of venerable eld, and regarded as the predecessors of others. If men have not that in them which fits them to precede others, they are without the way proper to man, and they who are without the way proper to man can only be pronounced defunct monuments of antiquity.

Words like the water that daily issues from the cup, and are harmonised by the Heavenly Element (of our nature), may be carried on into the region of the unlimited, and employed to the end of our years. But without words there is an agreement (in principle). That agreement is not effected by words, and an agreement in words is not effected by it. Hence it is said, 'Let there be no words.' Speech does not need words. One may speak all his life, and not have spoken a (right) word; and one may not have spoken all his life, and yet all his life been giving utterance to the (right) words. There is that which makes a thing allowable, and that which makes a thing not allowable. There is that which makes a thing right, and that which makes a thing not right. How is a thing right? It is right because it is right. How is a thing wrong? It is wrong because it is wrong. How is a thing allowable? It is allowable because it is so. How is a thing not allowable? It is not allowable because it is not so. Things indeed have what makes them right, and what makes them allowable. There is nothing which has not its condition of right; nothing which has not its condition of allowability. But without the words of the (water-) cup in daily use, and harmonised by the Heavenly Element (in our

nature), what one can continue long in the possession of these characteristics ?

All things are divided into their several classes, and succeed to one another in the same way, though of different bodily forms. They begin and end as in an unbroken ring, though how it is they do so be not apprehended. This is what is called the Lathe of Heaven ; and the Lathe of Heaven is the Heavenly Element in our nature.

2. *Kwang-ze* said to *Hui-ze*, 'When Confucius was in his sixtieth year, in that year his views changed¹. What he had before held to be right, he now ended by holding to be wrong ; and he did not know whether the things which he now pronounced to be right were not those which he had for fifty-nine years held to be wrong.' *Hui-ze* replied, 'Confucius with an earnest will pursued the acquisition of knowledge, and acted accordingly.' *Kwang-ze* rejoined, 'Confucius disowned such a course, and never said that it was his. He said, "Man receives his powers from the Great Source² (of his being), and he should restore them to their (original) intelligence in his life. His singing should be in accordance with the musical tubes, and his speech a model for imitation. When profit and righteousness are set before him, and his liking (for the latter) and dislike (of the

¹ Compare this with the same language about *Kü Po-yü* in Bk. XXV, par. 8. There is no proof to support our author's assertion that the views of Confucius underwent any change.

² 'The Great Source (Root)' here is generally explained by 'the Grand Beginning.' It is not easy to say whether we are to understand an ideal condition of man designed from the first, or the condition of every man as he is born into the world. On the 'powers' received by man, see *Mencius* VI, i, 6.

former), his approval and disapproval, are manifested, that only serves to direct the speech of men (about him). To make men in heart submit, and not dare to stand up in opposition to him; to establish the fixed law for all under heaven:—ah! ah! I have not attained to that.”’

3. *Ǟng-ze* twice took office, and on the two occasions his state of mind was different. He said, ‘While my parents were alive I took office, and though my emolument was only three *fû*¹ (of grain), my mind was happy. Afterwards when I took office, my emolument was three thousand *kung*²; but I could not share it with my parents, and my mind was sad.’ The other disciples asked *Kung-ni*, saying, ‘Such an one as *Shăn* may be pronounced free from all entanglement:—is he to be blamed for feeling as he did³?’ The reply was, ‘But he was subject to entanglement⁴. If he had been free from it, could he have had that sadness? He would have looked on his three *fû* and three thousand *kung* no more than on a heron or a mosquito passing before him.’

4. Yen *Khăng Ǟze-yû* said to Tung-kwo *Ǟze-khi*⁵, ‘When I (had begun to) hear your instructions, the first year, I continued a simple rustic; the second

¹ A *fû* = ten *tâu* and four *shing*, or sixty-four *shing*, the *shing* at present being rather less than an English pint.

² A *kung* = sixty-four *tâu*; but there are various accounts of its size.

³ This sentence is difficult to construe.

⁴ But Confucius could not count his love for his parents an entanglement.

⁵ We must suppose this master to be the same as the Nan-kwo *Ǟze-khi* of Bk. II.

year, I became docile; the third year, I comprehended (your teaching); the fourth year, I was (plastic) as a thing; the fifth year, I made advances; the sixth year, the spirit entered (and dwelt in me); the seventh year, (my nature as designed by) Heaven was perfected; the eighth year, I knew no difference between death and life; the ninth year, I attained to the Great Mystery¹.

‘Life has its work to do, and death ensues, (as if) the common character of each were a thing prescribed. Men consider that their death has its cause; but that life from (the operation of) the Yang has no cause. But is it really so? How does (the Yang) operate in this direction? Why does it not operate there?’

‘Heaven has its places and spaces which can be calculated; (the divisions of) the earth can be assigned by men. But how shall we search for and find out (the conditions of the Great Mystery)? We do not know when and how (life) will end, but how shall we conclude that it is not determined (from without)? and as we do not know when and how it begins, how should we conclude that it is not (so) determined?’

‘In regard to the issues of conduct which we deem appropriate, how should we conclude that there are no spirits presiding over them; and where those issues seem inappropriate, how should we conclude that there are spirits presiding over them?’

¹ In illustration of the text here Lû Shû-kih refers to the use of Miào (妙), in the account of the term ‘Spirit,’ in the fifth Appendix to the Yî, par. 10, as meaning ‘the subtle (presence and operation of God) with all things.’ 3ze-yü’s further exposition of his attainments is difficult to understand fully.

5. The penumbræ (once) asked the shadow¹, saying, 'Formerly you were looking down, and now you are looking up; formerly you had your hair tied up, and now it is dishevelled; formerly you were sitting, and now you have risen up; formerly you were walking, and now you have stopped:—how is all this?' The shadow said, 'Venerable Sirs, how do you ask me about such small matters? These things all belong to me, but I do not know how they do so. I am (like) the shell of a cicada or the cast-off skin of a snake²;—like them, and yet not like them. With light and the sun I make my appearance; with darkness and the night I fade away. Am not I dependent on the substance from which I am thrown? And that substance is itself dependent on something else! When it comes, I come with it; when it goes, I go with it. When it comes under the influence of the strong Yang, I come under the same. Since we are both produced by that strong Yang, what occasion is there for you to question me?'

6. Yang 3ze-kü³ had gone South to Phei⁴, while Láo Tan was travelling in the west in K'zin⁵. (He thereupon) asked (Láo-3ze) to come to the border (of Phei), and went himself to Liang, where he met him. Láo-3ze stood in the middle of the way, and, looking up to heaven, said with a sigh, 'At first I thought that you might be taught, but now I see that you cannot be.' Yang 3ze-kü made no reply;

¹ Compare Bk. II, par. 11.

² Such is the reading of Jiáo Hung.

³ No doubt the Yang K'ü of Lieh-3ze and Mencius.

⁴ See in XIV, 26 b.

⁵ In the borders of Phei; can hardly be the great State.

and when they came to their lodging-house, he brought in water for the master to wash his hands and rinse his mouth, along with a towel and comb. He then took off his shoes outside the door, went forward on his knees, and said, 'Formerly, your disciple wished to ask you, Master, (the reason of what you said); but you were walking, and there was no opportunity, and therefore I did not presume to speak. Now there is an opportunity, and I beg to ask why you spoke as you did.' Láo-ze replied, 'Your eyes are lofty, and you stare;—who would live with you? The purest carries himself as if he were soiled; the most virtuous seems to feel himself defective.' Yang 3ze-kü looked abashed and changed countenance, saying, 'I receive your commands with reverence.'

When he first went to the lodging-house, the people of it met him and went before him. The master of it carried his mat for him, and the mistress brought the towel and comb. The lodgers left their mats, and the cook his fire-place (as he passed them). When he went away, the others in the house would have striven with him about (the places for) their mats¹.

¹ So had his arrogant superciliousness given place to humility.

BOOK XXVIII.

PART III. SECTION VI.

Zang Wang, or 'Kings who have wished to resign the Throne¹.'

1. Yáo proposed to resign the throne to Hsü Yü, who would not accept it. He then offered it to 3ze-káu K'ih-fû², but he said, 'It is not unreasonable to propose that I should occupy the throne, but I happen to be suffering under a painful sorrow and illness. While I am engaged in dealing with it, I have not leisure to govern the kingdom.' Now the throne is the most important of all positions, and yet this man would not occupy it to the injury of his life; how much less would he have allowed any other thing to do so! But only he who does not care to rule the kingdom is fit to be entrusted with it.

Shun proposed to resign the throne to 3ze-káu K'ih-po², who declined in the very same terms as K'ih-fû had done. Now the kingdom is the greatest of all concerns, and yet this man would not give his life in exchange for the throne. This shows how they who possess the Táo differ from common men.

¹ See vol. xxxix, pp. 156, 157.

² We know nothing of this man but what is related here. He is, no doubt, a fictitious character. K'ih-fû and K'ih-po are supposed to be the same individual. See Hwang-fû Mí, I, 7.

Shun proposed to resign the throne to Shan K'üan¹, who said, 'I am a unit in the midst of space and time. In winter I wear skins and furs; in summer, grass-cloth and linen; in spring I plough and sow, my strength being equal to the toil; in autumn I gather in my harvest, and am prepared to cease from labour and eat. At sunrise I get up and work; at sunset I rest. So do I enjoy myself between heaven and earth, and my mind is content:—why should I have anything to do with the throne? Alas! that you, Sir, do not know me better!' Thereupon he declined the proffer, and went away, deep among the hills, no man knew where.

Shun proposed to resign the throne to his friend, a farmer of Shih-hü². The farmer, however, said (to himself), 'How full of vigour does our lord show himself, and how exuberant is his strength! If Shun with all his powers be not equal (to the task of government, how should I be so?).' On this he took his wife on his back, led his son by the hand, and went away to the sea-coast, from which to the end of his life he did not come back.

When Thâi-wang Than-fü³ was dwelling in Pin³, the wild tribes of the North attacked him. He tried to serve them with skins and silks, but they were not satisfied. He tried to serve them with dogs and horses, but they were not satisfied, and then

¹ Nor do we know more of Shan K'üan, though Mî relates a visit of Yâo to him.

² Name of a place; where it was is very uncertain.

³ An ancestor of the House of K'âu, who about B.C. 1325 removed from Pin (in the present small department so called of Shen-hsi), and settled in the district of K'hi-shan, department of Fäng-kiang. He was the grandfather of king Wăn.

with pearls and jade, but they were not satisfied. What they sought was his territory. Thâi-wang Than-fû said (to his people), 'To dwell with the elder brother and cause the younger brother to be killed, or with the father and cause the son to be killed,—this is what I cannot bear to do. Make an effort, my children, to remain here. What difference is there between being my subjects, or the subjects of those wild people? And I have heard that a man does not use that which he employs for nourishing his people to injure them.' Thereupon he took his staff and switch and left, but the people followed him in an unbroken train, and he established a (new) state at the foot of mount *K'hi*¹. Thus Thâi-wang Than-fû might be pronounced one who could give its (due) honour to life. Those who are able to do so, though they may be rich and noble, will not, for that which nourishes them, injure their persons; and though they may be poor and mean, will not, for the sake of gain, involve their bodies (in danger). The men of the present age who occupy high offices and are of honourable rank all lose these (advantages) again, and in the prospect of gain lightly expose their persons to ruin:—is it not a case of delusion?

The people of Yüeh three times in succession killed their ruler, and the prince Sâu², distressed by it, made his escape to the caves of Tan, so that Yüeh was left without a ruler. The people sought

¹ See note 3, p. 150.

² Sze-mâ *K'hiên* takes up the history of Yüeh at a later period, and we have from him no details of this prince Sâu. Tan-hsüeh was the name of a district in the south of Yüeh, in which was a valley with caves containing cinnabar;—the fabled home of the phoenix.

for the prince, but could not find him, till (at last) they followed him to the cave of Tan. The prince was not willing to come out to them, but they smoked him out with moxa, and made him mount the royal chariot. As he took hold of the strap, and mounted the carriage, he looked up to heaven, and called out, 'O Ruler, O Ruler, could you not have spared me this?' Prince Sâu did not dislike being ruler;—he disliked the evil inseparable from being so. It may be said of him that he would not for the sake of a kingdom endanger his life; and this indeed was the reason why the people of Yüeh wanted to get him for their ruler.

2. Han¹ and Wei¹ were contending about some territory which one of them had wrested from the other. 3ze-hwâ 3ze² went to see the marquis K'ao-hsi (of Han)³, and, finding him looking sorrowful, said, 'Suppose now that all the states were to sign an agreement before you to the effect that "Whoever should with his left hand carry off (the territory in dispute) should lose his right hand, and whoever should do so with his right hand should lose his left hand, but that, nevertheless, he who should carry it off was sure to obtain the whole kingdom;" would your lordship feel yourself able to carry it off?' The marquis said, 'I would not carry it off,' and 3ze-hwâ rejoined, 'Very good. Looking at the thing from this point of view, your two arms are of more value to you than the whole kingdom. But

¹ Two of the three states into which the great state of 3in was divided about the beginning of the fifth century B.C.

² A native, we may call him a philosopher, of Wei.

³ Began his rule in B.C. 359.

your body is of more value than your two arms, and Han is of much less value than the whole kingdom. The territory for which you are now contending is further much less important than Han :—your lordship, since you feel so much concern for your body, should not be endangering your life by indulging your sorrow.'

The marquis *K'ao-hsi* said, 'Good! Many have given me their counsel about this matter; but I never heard what you have said.' *3ze-hwâ 3ze* may be said to have known well what was of great importance and what was of little.

3. The ruler of *Lû*, having heard that *Yen Ho*¹ had attained to the *T'ao*, sent a messenger, with a gift of silks, to prepare the way for further communication with him. *Yen Ho* was waiting at the door of a mean house, in a dress of coarse hempen cloth, and himself feeding a cow². When the messenger arrived, *Yen Ho* himself confronted him. 'Is this,' said the messenger, 'the house of *Yen Ho*?' 'It is,' was the reply; and the other was presenting the silks to him, when he said, 'I am afraid you heard (your instructions) wrongly, and that he who sent you will blame you. You had better make sure.' The messenger on this returned, and made sure that he was right; but when he came back, and sought for *Yen Ho*, he was not to be found.

Yes; men like *Yen Ho* do of a truth dislike riches and honours. Hence it is said, 'The true

¹ Perhaps the *Yen Ho* of IV, 5.

² The same thing is often seen at the present day. The party in charge of the cow pours its prepared food down its throat from a joint of bamboo.

object of the Tào is the regulation of the person. Quite subordinate to this is its use in the management of the state and the clan; while the government of the kingdom is but the dust and refuse of it.' From this we may see that the services of the Tis and Kings are but a surplusage of the work of the sages, and do not contribute to complete the person or nourish the life. Yet the superior men of the present age will, most of them, throw away their lives for the sake of their persons, in pursuing their (material) objects;—is it not cause for grief? Whenever a sage is initiating any movement, he is sure to examine the motive which influences him, and what he is about to do. Here, however, is a man, who uses a pearl like that of the marquis of Sui¹ to shoot a bird at a distance of 10,000 feet. All men will laugh at him; and why? Because the thing which he uses is of great value, and what he wishes to get is of little. And is not life of more value than the pearl of the marquis of Sui?

4. 3ze² Lieh-3ze² was reduced to extreme poverty, and his person had a hungry look. A visitor mentioned the case to 3ze-yang, (the premier) of Kǎng, saying, 'Lieh Yü-khâu, I believe, is a scholar who has attained to the Tào. Is it because our ruler does not love (such) scholars, that he should be living in his state in such poverty?' 3ze-yang immediately ordered an officer to send to him a supply of grain.

¹ Sui was a small feudal state, a dependency of Wei. Its name remains in the Sui-kâu, Teh-an department, Hû-pei. The story is that one of its lords having healed a wounded snake, the creature one night brought him a large pearl in its mouth.

² The phraseology is peculiar. See Introductory Note on Bk. XXXII.

When Lieh-ze saw the messenger, he bowed to him twice, and declined the gift, on which the messenger went away. On Lieh-ze's going into the house, his wife looked to him and beat her breast, saying, 'I have heard that the wife and children of a possessor of the Táo all enjoy plenty and ease, but now we look starved. The ruler has seen his error, and sent you a present of food, but you would not receive it; —is it appointed (for us to suffer thus)?' Ze Lieh-ze laughed and said to her, 'The ruler does not himself know me. Because of what some one said to him, he sent me the grain; but if another speak (differently) of me to him, he may look on me as a criminal. This was why I did not receive the grain.'

In the end it did come about, that the people, on an occasion of trouble and disorder, put Ze-yang to death.

5. When king Káo of K'û¹ lost his kingdom, the sheep-butcher Yüeh followed him in his flight. When the king (recovered) his kingdom and returned to it, and was going to reward those who had followed him, on coming to the sheep-butcher Yüeh, that personage said, 'When our Great King lost his kingdom, I lost my sheep-killing. When his majesty got back his kingdom, I also got back my sheep-killing. My income and rank have been recovered; why speak further of rewarding me?' The king, (on hearing of this reply), said, 'Force him (to take the reward);' but Yüeh said, 'It was not through any crime of mine that the king lost his kingdom,

¹ B.C. 515-489. He was driven from his capital by an invasion of Wú, directed by Wú Ze-hsi.

and therefore I did not dare to submit to the death (which would have been mine if I had remained in the capital). And it was not through any service of mine that he recovered his kingdom, and therefore I do not dare to count myself worthy of any reward from him.'

The king (now) asked that the butcher should be introduced to him, but Yüeh said, 'According to the law of *K'ü*, great reward ought to be given to great service, and the recipient then be introduced to the king; but now my wisdom was not sufficient to preserve the kingdom, nor my courage sufficient to die at the hands of the invaders. When the army of *Wü* entered, I was afraid of the danger, and got out of the way of the thieves;—it was not with a distinct purpose (of loyalty) that I followed the king. And now he wishes, in disregard of the law, and violations of the conditions of our social compact, to see me in court;—this is not what I would like to be talked of through the kingdom.' The king said to *3ze-k'ü*, the Minister of War, 'The position of the sheep-butcher Yüeh is low and mean, but his setting forth of what is right is very high; do you ask him for me to accept the place of one of my three most distinguished nobles¹.' (This being communicated to Yüeh), he said, 'I know that the place of such a distinguished noble is nobler than a sheep-butcher's stall, and that the salary of 10,000 *lung* is more than its profits. But how should I, through my greed of rank and emolument, bring on our ruler the name of an unlawful dispensation of his gifts? I dare not

¹ Literally, 'My three banners or flags,' emblems of the favour of the sovereign.

respond to your wishes, but desire to return to my stall as the sheep-butcher.' Accordingly he did not accept (the proffered reward).

6. Yüan Hsien¹ was living in Lû. His house, whose walls were only a few paces round, looked as if it were thatched with a crop of growing grass; its door of brushwood was incomplete, with branches of a mulberry tree for its side-posts; the window of each of its two apartments was formed by an earthenware jar (in the wall), which was stuffed with some coarse serge. It leaked above, and was damp on the ground beneath; but there he sat composedly, playing on his guitar. 3ze-kung, in an inner robe of purple and an outer one of pure white, riding in a carriage drawn by two large horses, the hood of which was too high to get into the lane (leading to the house), went to see him. Yüan Hsien, in a cap made of bark, and slippers without heels, and with a stalk of hellebore for a staff, met him at the door. 'Alas! Master,' said 3ze-kung, 'that you should be in such distress!' Yüan Hsien answered him, 'I have heard that to have no money is to be poor, and that not to be able to carry one's learning into practice is to be distressed. I am poor but not in distress.' 3ze-kung shrank back, and looked ashamed, on which the other laughed and said, 'To act with a view to the world's (praise); to pretend to be public-spirited and yet be a partisan; to learn in order to please men; to teach for the sake of one's own gain; to conceal one's wickedness under the garb of

¹ A disciple of Confucius, called also Yüan Sze;—see Confucian Analects VI, iii, 3. With the description of his house or hut, compare in the Lî K'î, XXVIII, 10.

benevolence and righteousness; and to be fond of the show of chariots and horses:—these are things which Hsien cannot bear to do.'

ǜäng-ze was residing in Wei. He wore a robe quilted with hemp, and had no outer garment; his countenance looked rough and emaciated; his hands and feet were horny and callous; he would be three days without lighting a fire; in ten years he did not have a new suit; if he put his cap on straight, the strings would break; if he drew tight the overlap of his robe, his elbow would be seen; in putting on his shoes, the heels would burst them. Yet dragging his shoes along, he sang the 'Sacrificial Odes of Shang' with a voice that filled heaven and earth as if it came from a bell or a sounding stone. The Son of Heaven could not get him to be a minister; no feudal prince could get him for his friend. So it is that he who is nourishing his mind's aim forgets his body, and he who is nourishing his body discards all thoughts of gain, and he who is carrying out the Tâo forgets his own mind.

Confucius said to Yen Hui, 'Come here, Hui. Your family is poor, and your position is low; why should you not take office?' Hui replied, 'I have no wish to be in office. Outside the suburban district I possess fields to the extent of fifty acres, which are sufficient to supply me with congee; and inside it I have ten acres, which are sufficient to supply me with silk and flax. I find my pleasure in playing on my lute, and your doctrines, Master, which I study, are sufficient for my enjoyment; I do not wish to take office.' Confucius looked sad, changed countenance, and said, 'How good is the mind of Hui! I have heard that he who is con-

tented will not entangle himself with the pursuit of gain, that he who is conscious of having gained (the truth) in himself is not afraid of losing other things, and that he who cultivates the path of inward rectification is not ashamed though he may have no official position. I have long been preaching this; but to-day I see it realised in Hui :—this is what I have gained.'

7. Prince Mâu¹ of *Kung-shan*¹ spoke to *Kan-ze*², saying, 'My body has its place by the streams and near the sea, but my mind dwells at the court of Wei ;—what have you to say to me in the circumstances ?' *Kan-ze* replied, 'Set the proper value on your life. When one sets the proper value on his life, gain seems to him unimportant.' The prince rejoined, 'I know that, but I am not able to overcome (my wishes).' The reply was, 'If you cannot master yourself (in the matter), follow (your inclinations so that) your spirit may not be dissatisfied. When you cannot master yourself, and try to force yourself where your spirit does not follow, this is what is called doing yourself a double injury; and those who so injure themselves are not among the long-lived.'

Mâu of Wei was the son of a lord of ten thousand chariots. For him to live in retirement among crags and caves was more difficult than for a scholar who had not worn the dress of office. Although he

¹ Prince Mâu was a son of the marquis of Wei, and had been appointed to the appanage of *Kung-shan*,—corresponding to part of the present Ting Kâu in Pei Kih-lî.

² A worthy officer or thinker of Wei. One is not sure that his advice was altogether good.

had not attained to the Tâo, he may be said to have had some idea of it.

8. When Confucius was reduced to extreme distress between *Khăn* and *Zhâi*, for seven days he had no cooked meat to eat, but only some soup of coarse vegetables without any rice in it. His countenance wore the appearance of great exhaustion, and yet he kept playing on his lute and singing inside the house. Yen Hui (was outside), selecting the vegetables, while *Ze-lû* and *Ze-kung* were talking together, and said to him, 'The Master has twice been driven from *Lû*; he had to flee from *Wei*; the tree (beneath which he rested) was cut down in *Sung*; he was reduced to extreme distress in *Shang* and *Kâu*; he is held in a state of siege here between *Khăn* and *Zhâi*; any one who kills him will be held guiltless; there is no prohibition against making him a prisoner. And yet he keeps playing and singing, thrumming his lute without ceasing. Can a superior man be without the feeling of shame to such an extent as this?' Yen Hui gave them no reply, but went in and told (their words) to Confucius, who pushed aside his lute, and said, '*Yû* and *Zhze* are small men. Call them here, and I will explain the thing to them.'

When they came in, *Ze-lû* said, 'Your present condition may be called one of extreme distress.' Confucius replied, 'What words are these! When the Superior man has free course with his principles, that is what we call his success; when such course is denied, that is what we call his failure. Now I hold in my embrace the principles of benevolence and righteousness, and with them meet the evils of a disordered age;—where is the proof of my being

in extreme distress? Therefore looking inwards and examining myself, I have no difficulties about my principles; though I encounter such difficulties (as the present), I do not lose my virtue. It is when winter's cold is come, and the hoar-frost and snow are falling, that we know the vegetative power of the pine and cypress. This strait between *Khăn* and *Zhâi* is fortunate for me.' He then took back his lute so that it emitted a twanging sound, and began to play and sing. (At the same time) *3ze-lû*, hurriedly, seized a shield, and began to dance, while *3ze-kung* said, 'I did not know (before) the height of heaven nor the depth of the earth.'

The ancients who had got the *Tâo* were happy when reduced to extremity, and happy when having free course. Their happiness was independent of both these conditions. The *Tâo* and its characteristics!—let them have these and distress and success come to them as cold and heat, as wind and rain in the natural order of things. Thus it was that *Hsü Yû* found pleasure on the north of the river *Ying*, and that the earl of *Kung* enjoyed himself on the top of mount (*Kung*)¹.

9. *Shun* proposed to resign the throne to his friend, the Northerner *Wû-k'ai*², who said, 'A strange man you are, O sovereign! You (first) lived among the channeled fields, and then your

¹ This takes us to the famous *Kung-ho* period (B.C. 842–828), but our author evidently follows the account of it found in the 'Bamboo Books';—see the prolegomena to the *Shû King*, p. 154.

² We found, in Book XXI (see vol. xxxix, p. 133), *Wû-k'ai* as the name of *Thien 3ze-fang*. Here is the same name belonging to a much earlier man, 'a man of the north.'

place was in the palace of Yáo. And not only so:—you now further wish to extend to me the stain of your disgraceful doings. I am ashamed to see you.' And on this he threw himself into the abyss of *K'ing-lăng*¹.

When Thang was about to attack *Kieh*, he took counsel with Pien Sui, who said, 'It is no business of mine.' Thang then said, 'To whom should I apply?' And the other said, 'I do not know.' Thang then took counsel with Wû Kwang, who gave the same answer as Pien Sui; and when asked to whom he should apply, said in the same way, 'I do not know.' 'Suppose,' Thang then said, 'I apply to Í Yin, what do you say about him?' The reply was, 'He has a wonderful power in doing what is disgraceful, and I know nothing more about him!'

Thang thereupon took counsel with Í Yin, attacked *Kieh*, and overcame him, after which he proposed to resign the throne to Pien Sui, who declined it, saying, 'When you were about to attack *Kieh*, and sought counsel from me, you must have supposed me to be prepared to be a robber. Now that you have conquered *Kieh*, and propose to resign the throne to me, you must consider me to be greedy. I have been born in an age of disorder, and a man without principle twice comes, and tries to extend to me the stain of his disgraceful proceedings!—I cannot bear to hear the repetition of his proposals.' With this he threw himself into the *K'âu*² water and died.

¹ At the foot of a hill in the present department of Nan-yang, Ho-nan.

² The reading uncertain.

Thang further made proffer of the throne to Wû Kwang¹, saying, 'The wise man has planned it; the martial man has carried it through; and the benevolent man should occupy it:—this was the method of antiquity. Why should you, Sir, not take the position?' Wû Kwang refused the proffer, saying, 'To depose the sovereign is contrary to right; to kill the people is contrary to benevolence. When another has encountered the risks, if I should accept the gain of his adventure, I should violate my disinterestedness. I have heard it said, "If it be not right for him to do so, one should not accept the emolument; in an age of unprincipled (government), one should not put foot on the soil (of the) country:"—how much less should I accept this position of honour! I cannot bear to see you any longer.' And with this he took a stone on his back, and drowned himself in the Lü water².

10. Formerly, at the rise of the *Kâu* dynasty, there were two brothers who lived in *Kû-kû*³, and were named *Po-i* and *Shû-khi*. They spoke together and said, 'We have heard that in the west there is one who seems to rule according to the Right Way; let us go and see.' (Accordingly) they came to the south of (mount) *K'hi*; and when king Wû heard of them, he sent (his brother) *Shû Tan* to see them, and make a covenant with them, engaging that their wealth should be second (only to that of the king), and that their offices should be of the first rank,

¹ Not elsewhere heard of, save in the same connexion.

² In the west of Lião-tung.

³ A small principality, in the present Lwan-kâu, department of Yung-phing *K'ih-lí*.

and instructing him to bury the covenant with the blood of the victim after they had smeared the corners of their mouths with it¹. The brothers looked at each other and laughed, saying, 'Ah! How strange! This is not what we call the Right Way. Formerly, when Shăn Năng had the kingdom, he offered his sacrifices at the proper seasons and with the utmost reverence, but without praying for any blessing. Towards men he was leal-hearted and sincere, doing his utmost in governing them, but without seeking anything for himself. When it was his pleasure to use administrative measures, he did so; and a sterner rule when he thought that would be better. He did not by the ruin of others establish his own power; he did not exalt himself by bringing others low; he did not, when the time was opportune, seek his own profit. But now *Kâu*, seeing the disorder of Yin, has suddenly taken the government into its hands; with the high it has taken counsel, and with those below employed bribes; it relies on its troops to maintain the terror of its might; it makes covenants over victims to prove its good faith; it vaunts its proceedings to please the masses; it kills and attacks for the sake of gain:—this is simply overthrowing disorder and changing it for tyranny. We have heard that the officers of old, in an age of good government, did not shrink from their duties, and in an age of disorder did not recklessly seek to remain in office. Now the kingdom is in a state of darkness; the virtue of *Kâu* is decayed. Than to join with it and

¹ According to the usual forms in which a covenant was made and established. The translation is free and diffuse.

lay our persons in the dust, it is better for us to abandon it, and maintain the purity of our conduct.'

The two princes then went north to the hill of Shâu-yang¹, where they died of starvation. If men such as they, in the matter of riches and honours, can manage to avoid them, (let them do so); but they must not depend on their lofty virtue to pursue any perverse course, only gratifying their own tendencies, and not doing service in their time:—this was the style of these two princes.

¹ In the present department of Phû-kau, Shan-hsi,

BOOK XXIX.

PART III. SECTION VII.

Táo Kih, or 'The Robber Kih¹.'

1. Confucius was on terms of friendship with Liû-hsiâ Kî², who had a brother named Táo Kih. This Táo Kih had 9,000 followers, who marched at their will through the kingdom, assailing and oppressing the different princes. They dug through walls and broke into houses; they drove away people's cattle and horses; they carried off people's wives and daughters. In their greed to get, they forgot the claims of kinship, and paid no regard to their parents and brethren. They did not sacrifice to their ancestors. Wherever they passed through the country, in the larger states the people guarded their city walls, and in the smaller the people took to their strongholds. All were distressed by them.

Confucius spoke to Liû-hsiâ Kî, saying, 'Fathers should be able to lay down the law to their sons,

¹ See vol. xxxix, pp. 157, 158.

² Better known as Liû-hsiâ Hui, under which designation he is mentioned both in the Confucian Analects and in Mencius, but it is an anachronism to say that Confucius was on terms of friendship with him. He was a scion of the distinguished family of Kan in Lô, and was called Kan Hwo and Kan K'in. We find, in the 30 Kwan, a son of his employed in an important expedition in B.C. 634, so that he, probably, had passed away before Confucius was born in B.C. 551, and must certainly have deceased before the death of 3ze-lû (480), which is mentioned in the Book.

and elder to instruct their younger brothers. If they are unable to do so, they do not fulfil the duties of the relationships which they sustain. You, Sir, are one of the most talented officers of the age, and your younger brother is this Robber Kih. He is a pest in the kingdom, and you are not able to instruct him better; I cannot but be ashamed of you, and I beg to go for you and give him counsel.' Liû-hsiâ Kî replied, 'You say, Sir, that fathers must be able to lay down the law to their sons, and elder to instruct their younger brothers, but if sons will not listen to the orders of their fathers, nor the younger receive the lessons of their elder brothers, though one may have your powers of persuasion, what is to be done? And, moreover, Kih is a man whose mind is like a gushing fountain, and his will like a whirlwind; he is strong enough to resist all enemies, and clever enough to gloss over his wrong-doings. If you agree with him, he is glad; if you oppose him, he is enraged; and he readily meets men with the language of abuse. You must not go to him.'

Confucius, however, did not attend to this advice. With Yen Hui as his charioteer, and 3ze-kung seated on the right, he went to see Tào Kih, whom he found with his followers halted on the south of Thâi-shan, and mincing men's livers, which he gave them to eat. Confucius alighted from his carriage, and went forward, till he saw the usher, to whom he said, 'I, Khung K'hiû of Lû, have heard of the general's lofty righteousness,' bowing twice respectfully to the man as he said so. The usher went in and announced the visitor. But when Tào Kih heard of the arrival, he flew into a great

rage; his eyes became like blazing stars, and his hair rose up and touched his cap. 'Is not this fellow,' said he, 'Khung *K'ziû*, that artful hypocrite of Lû? Tell him from me, "You invent speeches and babble away, appealing without ground to (the examples of) Wăn and Wû. The ornaments on your cap are as many as the branches of a tree, and your girdle is (a piece of skin) from the ribs of a dead ox. The more you talk, the more nonsense you utter. You get your food without (the labour of) ploughing, and your clothes without (that of) weaving. You wag your lips and make your tongue a drum-stick. You arbitrarily decide what is right and what is wrong, thereby leading astray the princes throughout the kingdom, and making its learned scholars not occupy their thoughts with their proper business. You recklessly set up your filial piety and fraternal duty, and curry favour with the feudal princes, the wealthy and the noble. Your offence is great; your crime is very heavy. Take yourself off home at once. If you do not do so, I will take your liver, and add it to the provision for to-day's food."'

But Confucius sent in another message, saying, 'I enjoy the good will of (your brother) *K'î*, and I wish and hope to tread the ground beneath your tent¹. When the usher had communicated this message, Tâo *K'ih* said, 'Make him come forward.' On this Confucius hastened forwards. Declining to take a mat, he drew hastily back, and bowed twice to Tâo *K'ih*, who in a great rage stretched

¹ That is, I wish to have an interview with you, to see and speak to you face to face.

his legs apart, laid his hand on his sword, and with glaring eyes and a voice like the growl of a nursing tigress, said, 'Come forwards, *K'hiû*. If what you say be in accordance with my mind, you shall live; but, if it be contrary to it, you shall die.' Confucius replied, 'I have heard that everywhere under the sky there are three (most excellent) qualities. To be naturally tall and large, to be elegant and handsome without a peer, so that young and old, noble and mean, are pleased to look upon him;—this is the highest of those qualities. To comprehend both heaven and earth in his wisdom, and to be able to speak eloquently on all subjects;—this is the middle one of them. To be brave and courageous, resolute and daring, gathering the multitudes round him, and leading on his troops;—this is the lowest of them. Whoever possesses one of these qualities is fit to stand with his face to the south¹, and style himself a Prince. But you, General, unite in yourself all the three. Your person is eight cubits and two inches in height; there is a brightness about your face and a light in your eyes; your lips look as if stained with vermilion; your teeth are like rows of precious shells; your voice is attuned to the musical tubes, and yet you are named "The Robber *K'ih*." I am ashamed of you, General, and cannot approve of you. If you are inclined to listen to me, I should like to go as your commissioner to Wû and Yüeh in the south; to *K'hi* and Lû in the north; to Sung and Wei in the east; and to Jin and *K'hi* in the west. I will get them to build for you a great city several hundred li in size, to

¹ To take the position of a ruler in his court.

establish under it towns containing several hundred thousands of inhabitants, and honour you there as a feudal lord. The kingdom will see you begin your career afresh; you will cease from your wars and disband your soldiers; you will collect and nourish your brethren, and along with them offer the sacrifices to your ancestors¹:—this will be a course befitting a sage and an officer of ability, and will fulfil the wishes of the whole kingdom.'

'Come forward, *K'hiu*,' said Táo *K'ih*, greatly enraged. 'Those who can be persuaded by considerations of gain, and to whom remonstrances may be addressed with success, are all ignorant, low, and ordinary people. That I am tall and large, elegant and handsome, so that all who see me are pleased with me;—this is an effect of the body left me by my parents. Though you were not to praise me for it, do I not know it myself? And I have heard that he who likes to praise men to their face will also like to speak ill of them behind their back. And when you tell me of a great wall and a multitudinous people, this is to try to persuade me by considerations of gain, and to cocker me as one of the ordinary people. But how could such advantages last for long? Of all great cities there is none so great as the whole kingdom, which was possessed by Yáo and Shun, while their descendants (now) have not so much territory as would admit an awl². Thang and Wû were both set up as the Sons of Heaven, but in after ages (their posterity) were cut

¹ It is said near the beginning that *K'ih* and his followers had ceased to offer such sacrifices;—they had no religion.

² The descendants of those worthies were greatly reduced; but they still had a name and a place.

off and extinguished ;—was not this because the gain of their position was so great a prize¹?

‘And moreover I have heard that anciently birds and beasts were numerous, and men were few, so that they lived in nests in order to avoid the animals. In the daytime they gathered acorns and chestnuts, and in the night they roosted on the trees ; and on account of this they are called the people of the Nest-builder. Anciently the people did not know the use of clothes. In summer they collected great stores of faggots, and in winter kept themselves warm by means of them ; and on account of this they are called the people who knew how to take care of their lives. In the age of Shǎn Nǎng, the people lay down in simple innocence, and rose up in quiet security. They knew their mothers, but did not know their fathers. They dwelt along with the elks and deer. They ploughed and ate ; they wove and made clothes ; they had no idea of injuring one another :—this was the grand time of Perfect virtue². Hwang-Ti, however, was not able to perpetuate this virtuous state. He fought with K’ih-yü³ in the wild of K’o-lü⁴ till the blood flowed over a hundred li. When Yáo and Shun arose, they instituted their crowd of ministers. Thang banished his lord. King Wü killed K’áu. Since that time the strong have oppressed the weak, and the many tyrannised over the few. From Thang and Wü downwards, (the

¹ See note 2, p. 170.

² Compare the description of this primeval time in Book X, par. 4.

³ Commonly spoken of as ‘the first rebel.’ See Mayers’s Manual, p. 36.

⁴ Perhaps in the present Páo-an K’áu, department of Hsüan-hwá, K’ih-li.

rulers) have all been promoters of disorder and confusion. You yourself now cultivate and inculcate the ways of Wăn and Wû; you handle whatever subjects are anywhere discussed for the instruction of future ages. With your peculiar robe and narrow girdle, with your deceitful speech and hypocritical conduct, you delude the lords of the different states, and are seeking for riches and honours. There is no greater robber than you are;—why does not all the world call you the Robber *Khîu*, instead of styling me the Robber *Kih*?

‘You prevailed by your sweet speeches on 3ze-lû, and made him your follower; you made him put away his high cap, lay aside his long sword, and receive your instructions, so that all the world said, “Khung *Khîu* is able to arrest violence and repress the wrong-doer;” but in the end, when 3ze-lû wished to slay the ruler of Wei, and the affair proved unsuccessful, his body was exhibited in pickle over the eastern gate of the capital;—so did your teaching of him come to nothing.

‘Do you call yourself a scholar of talent, a sage? Why, you were twice driven out of Lû; you had to run away from Wei; you were reduced to extremity in *Khî*; you were held in a state of siege between *Khân* and 3hâi; there is no resting-place for your person in the kingdom; your instructions brought 3ze-lû to pickle. Such have been the misfortunes (attending your course). You have done no good either for yourself or for others;—how can your doctrines be worth being thought much of?

‘There is no one whom the world exalts so much as it does Hwang-Tî, and still he was not able to perfect his virtue, but fought in the wilderness of

Ko-lû, till the blood flowed over a hundred li. *Yáo* was not kind to his son¹. *Shun* was not filial². *Yü* was paralysed on one side³. *Thang* banished his sovereign. King *Wû* smote *Káu*. King *Wăn* was imprisoned in *Yü-li*⁴. These are the six men of whom the world thinks the most highly, yet when we accurately consider their history, we see that for the sake of gain they all disallowed their true (nature), and did violence to its proper qualities and tendencies:—their conduct cannot be thought of but with deep shame.

‘Among those whom the world calls men of ability and virtue were (the brothers) *Po-Í* and *Shû-khi*. They declined the rule of *Kû-kû*, and died of starvation on the hill of *Sháu-yang*, leaving their bones and flesh unburied. *Pão 3iáo* vaunted his conduct, and condemned the world, but he died with his arms round a tree⁵. When *Shăn-thû* *Ti*’s remonstrances were not listened to, he fastened a stone on his back, and threw himself into the *Ho*, where he was eaten by the fishes and turtles⁶. *Kieh 3ze-thui* was the most devoted (of followers), and cut a piece from his thigh as food for duke *Wăn*. But when the duke afterwards overlooked him (in

¹ Referring to his setting aside his unworthy son, *Tan-kû*, and giving the throne to *Shun*.

² See in *Mencius*, V, i, 1. 3, 4.

³ This, I think, is the meaning; the fact was highly honourable to *Yü*, and brought on by his devotion to his labours.

⁴ In the present district of *Thang-yin*, department *Khang-teh*, *Ho-nan*. There king *Wăn* pursued his labours on the *Yi* King.

⁵ A recluse of the time of *Confucius*, according to *Han Ying* (I, art. 27). After a dispute with *3ze-kung*, he committed suicide in the way described.

⁶ See art. 26, in the same *Book of Han Ying*.

his distribution of favours), he was angry, and went away, and was burned to death with a tree in his arms¹. Wei Shǎng had made an appointment with a girl to meet him under a bridge; but when she did not come, and the water rose around him, he would not go away, and died with his arms round one of the pillars². (The deaths of) these four men were not different from those of the dog that is torn in pieces, the pig that is borne away by a current, or the beggar (drowned in a ditch) with his alms-gourd in his hand. They were all caught as in a net by their (desire for) fame, not caring to nourish their life to its end, as they were bound to do.

‘Among those whom the world calls faithful ministers there have been none like the prince Pī-kan and Wú 3ze-hsü. But 3ze-hsü’s (dead) body was cast into the Kiang, and the heart of Pī-kan was cut out. These two were what the world calls loyal ministers, but the end has been that everybody laughs at them. Looking at all the above cases, down to those of 3ze-hsü and Pī-kan, there is not one worthy to be honoured; and as to the admonitions which you, K’hiū, wish to impress on me, if you tell me about the state of the dead, I am unable to know anything about it; if you tell me about the things of men (alive), they are only such as I have stated, what I have heard and know all about. I will now tell you, Sir, my views about the condition of man. The eyes wish to look on beauty; the ears to hear music; the mouth to enjoy flavours; the will to be gratified. The greatest longevity man

¹ See Mayers’s Manual, p. 80.

² Supposed to be the same with the Wei-shǎng Káo, mentioned in Analects, V, 23;—see Mayers’s Manual, p. 251.

can reach is a hundred years; a medium longevity is eighty years; the lowest longevity is sixty. Take away sickness, pining, bereavement, mourning, anxieties, and calamities, the times when, in any of these, one can open his mouth and laugh, are only four or five days in a month. Heaven and earth have no limit of duration, but the death of man has its (appointed) time. Take the longest amount of a limited time, and compare it with what is unlimited, its brief existence is not different from the passing of a crevice by one of king Mû's horses¹. Those who cannot gratify their will and natural aims, and nourish their appointed longevity, are all unacquainted with the (right) Way (of life). I cast from me, *K'hiû*, all that you say. Be quick and go. Hurry back and say not a word more. Your Way is only a wild recklessness, deceitful, artful, vain, and hypocritical. It is not available to complete the true (nature of man); it is not worth talking about!

Confucius bowed twice, and hurried away. He went out at the door, and mounted his carriage. Thrice he missed the reins as he tried to take hold of them. His eyes were dazed, and he could not see; and his colour was that of slaked lime. He laid hold of the cross-bar, holding his head down, and unable to draw his breath. When he got back, outside the east gate of (the capital of) Lû, he encountered Liû-hsiâ *Kî*, who said to him, 'Here you are, right in the gate. For some days I have not seen you. Your carriage and horses are travel-stained;—have you not been to see Tão *Kîh*?' Con-

¹ King Mû had eight famous horses, each having its own name. The name of only one—*K'hih-ti*—is given here. See Bk. XVII, par. 5.

fucius looked up to heaven, sighed, and said, 'Yes.' The other went on, 'And did he not set himself in opposition to all your views, as I said he would do?' 'He did. My case has been that of the man who cauterised himself without being ill. I rushed away, stroked the tiger's head, played with his whiskers, and narrowly escaped his mouth.'

2. *3ze-kang*¹ asked *Mân Kâu-teh*², saying, 'Why do you not pursue a (righteous) course? Without such a course you will not be believed in; unless you are believed in, you will not be employed in office; and if not employed in office, you will not acquire gain. Thus, if you look at the matter from the point of reputation, or estimate it from the point of gain, a righteous course is truly the right thing. If you discard the thought of reputation and gain, yet when you think over the thing in your own mind, you will see that the scholar should not be a single day without pursuing a (righteous) course.' *Mân Kâu-teh* said, 'He who has no shame becomes rich, and he in whom many believe becomes illustrious. Thus the greatest fame and gain would seem to spring from being without shame and being believed in. Therefore if you look at the matter from the point of reputation, or estimate it from the point of gain, to be believed in is the right thing. If you discard the thought of fame and gain, and think over the thing in your own mind, you will see that the scholar in the course which he pursues is (simply) holding fast his Heavenly (nature, and gaining nothing).'

¹ We are told (*Analects*, II, 18) that *3ze-kang* 'studied with a view to official emolument.' This is, probably, the reason why he appears as interlocutor in this paragraph.

² A fictitious name, meaning, 'Full of gain recklessly got.'

3ze-kang said, 'Formerly Kieh and Kâu each enjoyed the honour of being the sovereign, and all the wealth of the kingdom was his; but if you now say to a (mere) money-grabber, "Your conduct is like that of Kieh or Kâu," he will look ashamed, and resent the imputation:—(these two sovereigns) are despised by the smallest men. Kung-ní and Mo Tí (on the other hand) were poor, and common men; but if you say to a Prime Minister that his conduct is like that of Kung-ní or Mo Tí, then he will be put out and change countenance, and protest that he is not worthy (to be so spoken of):—(these two philosophers) are held to be truly noble by (all) scholars. Thus it is that the position of sovereign does not necessarily connect with being thought noble, nor the condition of being poor and of common rank with being thought mean. The difference of being thought noble or mean arises from the conduct being good or bad.' Mân Kâu-teh replied, 'Small robbers are put in prison; a great robber becomes a feudal lord; and in the gate of the feudal lord your righteous scholars will be found. For instance, Hsiáo-po¹, the duke Hwan, killed his elder brother, and took his sister-in-law to himself, and yet Kwan Kung became his minister; and Thien K'hang, styled K'hang-ze, killed his ruler, and usurped the state², and yet Confucius received a present of silks from him. In their discussions they would condemn the men, but

¹ The name of duke Hwan.

² Compare the account of the same transaction in Book X, par. 1. See also Analects, XIV, 22. But there is no evidence but rather the contrary, that Confucius ever received a gift from Thien or K'han Hăng.

in their conduct they abased themselves before them. In this way their words and actions must have been at war together in their breasts;—was it not a contradiction and perversity? As it is said in a book, “Who is bad? and who is good? The successful is regarded as the Head, and the unsuccessful as the Tail.”’

3ze-kang said, ‘If you do not follow the usual course of what is held to be right, but observe no distinction between the near and remote degrees of kin, no difference between the noble and the mean, no order between the old and the young, then how shall a separation be made of the fivefold arrangement (of the virtues), and the six parties (in the social organisation)?’ Mân Kâu-teh replied, ‘Yáo killed his eldest son, and Shun banished his half-brother¹:—did they observe the rules about the different degrees of kin? Thang deposed Kieh; king Wû overthrew Kâu:—did they observe the righteousness that should obtain between the noble and the mean? King Kî took the place of his elder brother², and the duke of Kâu killed his³:—did they observe the order that should obtain between the elder and the younger? The Literati make hypocritical speeches; the followers of Mo hold that all should be loved equally:—do we find in them the separation of the fivefold arrangement (of the

¹ Exaggerations or misrepresentations.

² King Kî was the so-called king Kî-lî, the father of king Wân. His elder brother, that the state of Kâu might descend to him, left it, and withdrew south to what was then the wild region of Wû. See Analects, VIII, 1; the Shih King, III, i, Ode 7. 3, 4.

³ Who had joined with Wû-käng, son of the tyrant of Yin, in rebellion, thus threatening the stability of the new dynasty of Kâu.

virtues)¹, and the six parties (in the social organisation)²? And further, you, Sir, are all for reputation, and I am all for gain; but where the actual search for reputation and gain may not be in accordance with principle and will not bear to be examined in the light of the right way, let me and you refer the matter to-morrow³ to the decision of Wû-yo⁴.

(This Wû-yo) said, 'The small man pursues after wealth; the superior man pursues after reputation. The way in which they change their feelings and alter their nature is different; but if they were to cast away what they do, and replace it with doing nothing, they would be the same. Hence it is said, "Do not be a small man;—return and pursue after the Heavenly in you. Do not be a superior man;—follow the rule of the Heavenly in you. Be it crooked, be it straight, view the thing in the light of Heaven as revealed in you. Look all round on every side of it, and as the time indicates, cease your endeavours. Be it right, be it wrong, hold fast the ring in yourself in which all conditions converge. Alone by yourself, carry out your idea; ponder over the right way. Do not turn your course; do not try to complete your righteousness. You will fail in what you do. Do not haste to be rich; do not follow after your perfection. If you do, you will lose the heavenly in you."

¹ Probably what are called 'the five constant virtues.'

² The parties in the 'Three Bonds of Society,' or Three Cardinal Objects of Duty.

³ So Lû Shû-ñih (日 = 明日).

⁴ If we take Wû-yo as a name, which is the simplest construction, we must still recognise its meaning as denoting 'one who is unbound by the conventionalities of opinion.' Much of what he is made to say is in rhyme, and might also be so translated.

‘Pi-kan had his heart cut out; 3ze-hsü had his eyes gouged out:—such were the evil consequences of their loyalty. The upright person¹ bore witness against his father; Wei Shǎng was drowned:—such were the misfortunes of good faith. Pao-3ze stood till he was dried up; Shǎn-3ze would not defend himself²:—such were the injuries brought on by disinterestedness. Confucius did not see his mother³; Khwang-3ze⁴ did not see his father:—such were the failures of the righteous. These are instances handed down from former ages, and talked about in these later times. They show us how superior men, in their determination to be correct in their words and resolute in their conduct, paid the penalty of these misfortunes, and were involved in these distresses.’

3. Mr. Dissatisfied⁵ asked Mr. Know-the-Mean⁵, saying, ‘There is no man after all who does not strive for reputation and pursue after gain. When men are rich, then others go to them. Going to them, they put themselves beneath them. In that position they do honour to them as nobler than themselves. But to

¹ See the Analects, XIII, 18.

² The reading of the name here is not certain. The best identification perhaps is with Shan Shǎng (申生), the eldest son of duke Hsien of Jin, who was put to death on a false charge of having put poison into his father’s food, from which he would not defend himself.

³ A false charge.

⁴ The Khwang K’ang of Mencius, IV, ii, 30, q.v.

⁵ Both of these names are fictitious. About the meaning of the first, there can be no difference of opinion. I have given that of the second according to my understanding of it,—see in the *Lí K’i*, Book XXVIII, section I.

see others taking that position and doing honour to us is the way to prolong life, and to secure the rest of the body and the satisfaction of the mind. You alone, Sir, however, have no idea of this. Is it that your knowledge is deficient? Is it that you have the knowledge, but want the strength to carry it into practice? Or is it that your mind is made up to do what you consider right, and never allow yourself to forget it?' Know-the-Mean replied, 'Here now is this man judging of us, his contemporaries, and living in the same neighbourhood as himself, that we consider ourselves scholars who have abjured all vulgar ways and risen above the world. He is entirely without the thought of submitting to the rule of what is right. He therefore studies ancient times and the present, and the differing questions about the right and wrong, and agrees with the vulgar ideas and influences of the age, abandoning what is most important and discarding what is most honourable, in order to be free to act as he does. But is he not wide of the mark when he thinks that this is the way to promote long life, and to secure the rest of the body and the satisfaction of the mind? He has his painful afflictions and his quiet repose, but he does not inquire how his body is so variously affected; he has his apprehensive terrors, and his happy joys, but he does not inquire how his mind has such different experiences. He knows how to pursue his course, but he does not know why he does so. Even if he had the dignity of the Son of Heaven, and all the wealth of the kingdom were his, he would not be beyond the reach of misfortunes and evils.' Dissatisfied rejoined, 'But riches are in every way advantageous to man.

With them his attainment of the beautiful and mastery of every art become what the perfect man cannot obtain nor the sagely man reach to; his appropriation of the bravery and strength of others enables him to exercise a powerful sway; his availing himself of the wisdom and plans of others makes him be accounted intelligent and discriminating; his taking advantage of the virtues of others makes him be esteemed able and good. Though he may not be the holder of a state, he is looked to with awe as a ruler and father. Moreover, music, beauty, with the pleasures of the taste and of power, are appreciated by men's minds and rejoiced in without any previous learning of them; the body reposes in them without waiting for the example of others. Desire and dislike, avoidance and pursuit, do not require any master;—this is the nature of man. Though the world may condemn one's indulgence of them, who can refrain from it?' Know-the-Mean replied, 'The action of the wise is directed for the good of the people, but they do not go against the (proper) rule and degree. Therefore when they have enough, they do not strive (for more); they have no further object, and so they do not seek for one. When they have not enough, they will seek for it; they will strive for it in every quarter, and yet not think of themselves as greedy. If they have (already) a superfluity, they will decline (any more); they will decline the throne, and yet not think of themselves as disinterested:—the conditions of disinterestedness and greediness are (with them) not from the constraint of anything external. Through their exercise of introspection, their power may be that of the sovereign, but they will not in

their nobility be arrogant to others; their wealth may be that of the whole kingdom, but they will not in their possession of it make a mock of others. They estimate the evils to which they are exposed, and are anxious about the reverses which they may experience. They think how their possessions may be injurious to their nature, and therefore they will decline and not accept them;—but not because they seek for reputation and praise.

‘Yáo and Shun were the sovereigns, and harmony prevailed. It did so, not because of their benevolence towards the people;—they would not, for what was (deemed) admirable, injure their lives. Shan Küan and Hsü Yü might have been the sovereigns, but they would not receive the throne;—not that they declined it without purpose, but they would not by its occupancy injure themselves. These all followed after what was advantageous to them, and declined what was injurious, and all the world celebrates their superiority. Thus, though they enjoy the distinction, they did what they did, not for the sake of the reputation and praise.’

Dissatisfied (continued his argument), saying, ‘In thus thinking it necessary for their reputation, they bitterly distressed their bodies, denied themselves what was pleasant, and restricted themselves to a bare sustenance in order to sustain their life; but so they had life-long distress, and long-continued pressure till their death arrived.’ Know-the-Mean replied, ‘Tranquil ease is happiness; a superfluity is injurious:—so it is with all things, and especially it is so, where the superfluity is of wealth. The ears of the rich are provided with the music of bells, drums, flageolets and flutes; and their mouths are

stuffed with the flesh of fed beasts and with wine of the richest flavour ; so are their desires satisfied, till they forget their proper business :—theirs may be pronounced a condition of disorder. Sunk deeply in their self-sufficiency, they resemble individuals ascending a height with a heavy burden on their backs :—their condition may be pronounced one of bitter suffering. They covet riches, thinking to derive comfort from them ; they covet power, and would fain monopolise it ; when quiet and retired, they are drowned in luxurious indulgence ; their persons seem to shine, and they are full of boasting :—they may be said to be in a state of disease. In their desire to be rich and striving for gain, they fill their stores, and, deaf to all admonition, refuse to desist from their course. They are even more elated, and hold on their way :—their conduct may be pronounced disgraceful. When their wealth is amassed till they cannot use it, they clasp it to their breasts and will not part with it ; when their hearts are distressed with their very fulness, they still seek for more and will not desist :—their condition may be said to be sad. In-doors they are apprehensive of pilfering and begging thieves, and out-of-doors they are afraid of being injured by plundering robbers ; in-doors they have many chambers and partitions, and out-of-doors they do not dare to go alone :—they may be said to be in a state of (constant) alarm.

‘ These six conditions are the most deplorable in the world, but they forget them all, and have lost their faculty of judgment. When the evil comes, though they begged it with all the powers of their nature, and by the sacrifice of all their wealth, they could

not bring back one day of untroubled peace. When they look for their reputation, it is not to be seen; when they seek for their wealth, it is not to be got. To task their thoughts, and destroy their bodies, striving for (such an end as) this;—is it not a case of great delusion?’

BOOK XXX.

PART III. SECTION VIII.

Yüeh Kien, or 'Delight in the Sword-fight'¹.

Formerly, king Wăn of K'ao² delighted in the sword-fight. More than three thousand men, masters of the weapon, appeared as his guests, lining the way on either side of his gate, and fighting together before him day and night. Over a hundred of them would die or be (severely) wounded in the course of a year, but he was never weary of looking on (at their engagements), so fond was he of them. The thing continued for three years, when the kingdom began to decay, and other states to plan measures against it.

The crown-prince Khwei³ was distressed, and laid the case before his attendants, saying, 'If any one can persuade the king, and put an end to these swordsmen, I will give him a thousand ounces of

¹ See vol. xxxix, pp. 158, 159.

² Probably king Hui-wăn (B. C. 298-265) of K'ao, one of the states into which the great state of Jin was subdivided, and which afterwards all claimed the sovereignty of the kingdom. In this Book Kwang-ze appears as a contemporary of king Wăn, which makes the 'formerly' with which the paragraph commences seem strange.

³ Sze-mâ K'ien says nothing of king Wăn's love of the sword-fight, nor of this son Khwei. He says that in 265 Wăn was succeeded by his son Tan (丹), who appears to have been quite young.

silver.' His attendants said, '(Only) *Kwang-ze* is able to do this.' Thereupon the prince sent men with a thousand ounces of silver to offer to *Kwang-ze*, who, however, would not accept them, but went with the messengers. When he saw the prince, he said, 'O prince, what have you to say to *K'âu*, and why would you give me the silver?' The prince replied, 'I have heard that you, master, are sagacious and sage. I sent you respectfully the thousand ounces of silver, as a prelude to the silks and other gifts¹. But as you decline to receive them, how dare I now tell you (what I wished from you)?' *Kwang-ze* rejoined, 'I have heard, O prince, that what you wanted me for was to wean the king from what is his delight. Suppose that in trying to persuade his Majesty I should offend him, and not fulfil your expectation, I shall be punished with death;—and could I then enjoy this silver? Or suppose that I shall succeed in persuading his Majesty, and accomplish what you desire, what is there in the kingdom of *K'áo* that I might ask for which I would not get?'

The crown-prince said, 'Yes; but my (father), the king, will see none but swordsmen.' *Kwang-ze* replied, 'I know; but I am expert in the use of the sword.' 'That is well,' observed the prince; 'but the swordsmen whom his Majesty sees all have their hair in a tangle, with whiskers projecting out. They wear slouching caps with coarse and unornamented tassels, and their coats are cut short behind. They have staring eyes, and talk about the hazards of

¹ This, I think, is the meaning. It may possibly mean 'for presents to your followers in attendance on you.'

their game. The king is delighted with all this; but now you are sure to present yourself to him in your scholar's dress, and this will stand greatly in the way of your success.'

Kwang-tze said, 'I will then, with your leave, get me a swordsman's dress.' This was ready in three days, and when he appeared in it before the prince, the latter went with him to introduce him to the king, who then drew his sword from its scabbard and waited for him. When *Kwang-tze* entered the door of the hall, he did not hurry forward, nor, when he saw the king, did he bow. The king asked him, 'What do you want to teach me, Sir, that you have got the prince to mention you beforehand?' The reply was, 'I have heard that your Majesty is fond of the sword-fight, and therefore I have sought an interview with you on the ground of (my skill in the use of) the sword.' 'What can you do with your sword against an opponent?' 'Let me meet with an opponent every ten paces, my sword would deal with him, so that I should not be stopped in a march of a thousand li.' The king was delighted with him, and said, 'You have not your match in the kingdom.' *Kwang-tze* replied, 'A good swordsman first makes a feint (against his opponent), then seems to give him an advantage, and finally gives his thrust, reaching him before he can return the blow. I should like to have an opportunity to show you my skill.' The king said, 'Stop (for a little), Master. Go to your lodging, and wait for my orders. I will make arrangements for the play, and then call you.'

The king accordingly made trial of his swordsmen for seven days, till more than sixty of them were

killed, or (severely) wounded. He then selected five or six men, and made them bring their swords and take their places beneath the hall, after which he called *Kwang-3ze*, and said to him, 'To-day I am going to make (you and) these men show what you can do with your swords.' 'I have long been looking for the opportunity,' replied *Kwang-3ze*. The king then asked him what would be the length of the sword which he would use; and he said, 'Any length will suit me, but I have three swords, any one of which I will use, as may please your Majesty. Let me first tell you of them, and then go to the arena.' 'I should like to hear about the three swords,' said the king; and *Kwang-3ze* went on, 'There is the sword of the Son of Heaven; the sword of a feudal prince; and the sword of a common man.'

'What about the sword of the Son of Heaven?'

'This sword has *Yen-khi*¹ and *Shih-khang*² for its point; *Khi* and (Mount) *Tai*³ for its edge; *3in* and *Wei* for its back; *Kau* and *Sung* for its hilt; *Han* and *Wei* for its sheath. It is embraced by the wild tribes all around; it is wrapped up in the four seasons; it is bound round by the Sea of *Po*⁴; and its girdle is the enduring hills. It is regulated by the five elements; its wielding is by means of Punishments and Kindness; its unsheathing is like that of

¹ Some noted place in the state of Yen, the capital of which was near the site of the present Peking.

² A wall, north of Yen, built as a barrier of defence against the northern tribes.

³ Mount *Thai*.

⁴ A region lying along the present gulf of *Kih-lí*, between the *Pei-ho* and the *K'ing-ho* in Shan-tung.

the Yin and Yang ; it is held fast in the spring and summer ; it is put in action in the autumn and winter. When it is thrust forward, there is nothing in front of it ; when lifted up, there is nothing above it ; when laid down, there is nothing below it ; when wheeled round, there is nothing left on any side of it ; above, it cleaves the floating clouds ; and below, it penetrates to every division of the earth. Let this sword be once used, and the princes are all reformed, and the whole kingdom submits. This is the sword of the Son of Heaven ¹.

King Wăn looked lost in amazement, and said again, 'And what about the sword of a feudal lord ?' (*Kwang-ze*) replied, 'This sword has wise and brave officers for its point ; pure and disinterested officers for its edge ; able and honourable officers for its back ; loyal and sage officers for its hilt ; valiant and eminent officers for its sheath. When this sword is thrust directly forward, as in the former case, there is nothing in front of it ; when directed upwards, there is nothing above it ; when laid down, there is nothing below it ; when wheeled round, there is nothing on any side of it. Above, its law is taken from the round heaven, and is in accordance with the three luminaries ; below, its law is taken from the square earth, and is in accordance with the four seasons ; between, it is in harmony with the minds of the people, and in all the parts of the state there is peace. Let this sword be once used, and you seem to hear the crash of the thunder-peal. Within

¹ By this sword *Kwang-ze* evidently means the power of the sovereign, supported by the strength of the kingdom, and directed by good government.

the four borders there are none who do not respectfully submit, and obey the orders of the ruler. This is the sword of the feudal lord.'

'And what about the sword of the common man?' asked the king (once more). (*Kwang-ze*) replied, 'The sword of the common man (is wielded by) those who have their hair in a tangle, with whiskers projecting out; who wear slouching caps with coarse and unornamented tassels, and have their coats cut short behind; who have staring eyes, and talk (only) about the hazards (of their game). They hit at one another before you. Above, the sword slashes through the neck; and below, it scoops out the liver and lungs. This is the sword of the common man. (The users of it) are not different from fighting cocks; any morning their lives are brought to an end; they are of no use in the affairs of the state. Your Majesty occupies the seat of the Son of Heaven, and that you should be so fond of the swordsmanship of such common men, is unworthy, as I venture to think, of your Majesty.'

On this the king drew *Kwang-ze* with him, and went up to the top of the hall, where the cook set forth a meal, which the king walked round three times (unable to sit down to it). *Kwang-ze* said to him, 'Sit down quietly, Great King, and calm yourself. I have said all I wished to say about swords.' King Wăn, thereafter, did not quit the palace for three months, and the swordsmen all killed themselves in their own rooms¹.

¹ *Kwang-ze's* parables had had their intended effect. It was not in his mind to do anything for the swordsmen. The commentators say:—'Indignant at not being treated as they had been before, they all killed themselves.'

BOOK XXXI.

PART III. SECTION IX.

Yü-fû, or 'The Old Fisherman'.¹

Confucius, rambling in the forest of 3ze-wei², stopped and sat down by the Apricot altar. The disciples began to read their books, while he proceeded to play on his lute, singing as he did so. He had not half finished his ditty when an old fisherman stepped

¹ See vol. xxxix, p. 159.

² A forest or grove in the neighbourhood of the capital of Lû. 3ze-wei means 'black silken curtains;' and I do not know why the forest was so denominated. That I have correctly determined its position, however, may be inferred from a quotation in the Khang-hsî dictionary under the character thân (= 'altar') to the effect that 'Confucius, leaving (the capital of) Lû by the eastern gate, on passing the old apricot altar, said, "This is the altar reared by 3ang Wăn-kung to solemnise covenants.'" Dr. Morrison under the same thân defines the second phrase—hsing thân—as 'The place where Confucius taught,' which Dr. Williams, under hsing, has amplified into 'The place where Confucius had his school.' But the text does not justify so definite a conclusion. The picture which the Book raises before my mind is that of a forest, with a row or clump of apricot trees, along which was a terrace, having on it the altar of 3ang Wăn-kung, and with a lake or at least a stream near to it, to which the ground sloped down. Here the writer introduces us to the sage and some of his disciples, on one occasion, when they were attracted from their books and music by the appearance of the old fisherman. I visited in 1873, not far from the Confucian cemetery, a ruined building called 'the College of K'û-Sze,' which was pointed out as the site of the School of Confucius. The place would suit all the demands of the situation in this Book.

down from his boat, and came towards them. His beard and eyebrows were turning white; his hair was all uncombed; and his sleeves hung idly down. He walked thus up from the bank, till he got to the dry ground, when he stopped, and, with his left hand holding one of his knees, and the right hand at his chin, listened. When the ditty was finished, he beckoned to 3ze-kung and 3ze-lû, who both responded and went to him. Pointing to Confucius, he said, 'Who is he?' 3ze-lû replied, 'He is the Superior Man of Lû.' 'And of what family is he?' 'He is of the Khung family.' 'And what is the occupation of this Mr. Khung?' To this question 3ze-lû gave no reply, but 3ze-kung replied, 'This scion of the Khung family devotes himself in his own nature to leal-heartedness and sincerity; in his conduct he manifests benevolence and righteousness; he cultivates the ornaments of ceremonies and music; he pays special attention to the relationships of society; above, he would promote loyalty to the hereditary lords; below, he seeks the transformation of all classes of the people; his object being to benefit the kingdom:—this is what Mr. Khung devotes himself to.'

The stranger further asked, 'Is he a ruler possessed of territory?' 'No,' was 3ze-kung's reply. 'Is he the assistant of any prince or king?' 'No;' and on this the other began to laugh and to retrace his steps, saying as he went, 'Yes, benevolence is benevolence! But I am afraid he will not escape (the evils incident to humanity). By embittering his mind and toiling his body, he is imperilling his true (nature)! Alas! how far removed is he from the proper way (of life)!'

3ze-kung returned, and reported (what the man had said) to Confucius, who pushed his lute aside, and arose, saying, 'Is he not a sage?' and down the slope he went in search of him. When he reached the edge of the lake, there was the fisherman with his pole, dragging the boat towards him. Turning round and seeing Confucius, he came back towards him and stood up. Confucius then drew back, bowed to him twice, and went forward. 'What do you want with me, Sir?' asked the stranger. The reply was, 'A little while ago, my Master, you broke off the thread of your remarks and went away. Inferior to you, I do not know what you wished to say, and have ventured here to wait for your instructions, fortunate if I may but hear the sound of your words to complete the assistance that you can give me!' 'Ah!' responded the stranger, 'how great is your love of learning!'

Confucius bowed twice, and then rose up, and said, 'Since I was young, I have cultivated learning till I am now sixty-nine years old; but I have not had an opportunity of hearing the perfect teaching;—dare I but listen to you with a humble and unprejudiced mind?' The stranger replied, 'Like seeks to like, and (birds) of the same note respond to one another;—this is a rule of Heaven. Allow me to explain what I am in possession of, and to pass over (from its standpoint) to the things which occupy you. What you occupy yourself with are the affairs of men. When the sovereign, the feudal lords, the great officers, and the common people, these four classes, do what is correct (in their several positions), we have the beauty of good order; and when they leave their proper duties, there ensues the greatest

disorder. When the officials attend to their duties, and the common people are anxiously concerned about their business, there is no encroachment on one another's rights.

'Fields running to waste; leaking rooms; insufficiency of food and clothing; taxes unprovided for; want of harmony among wives and concubines; and want of order between old and young;—these are the troubles of the common people.

'Incompetency for their charges; inattention to their official business; want of probity in conduct; carelessness and idleness in subordinates; failure of merit and excellence; and uncertainty of rank and emolument:—these are the troubles of great officers.

'No loyal ministers at their courts; the clans in their states rebellious; want of skill in their mechanics; articles of tribute of bad quality; late appearances at court in spring and autumn; and the dissatisfaction of the sovereign:—these are the troubles of the feudal lords.

'Want of harmony between the Yin and Yang; unseasonableness of cold and heat, affecting all things injuriously; oppression and disorder among the feudal princes, their presuming to plunder and attack one another, to the injury of the people; ceremonies and music ill-regulated; the resources for expenditure exhausted or deficient; the social relationships uncared for; and the people abandoned to licentious disorder:—these are the troubles of the Son of Heaven and his ministers.

'Now, Sir, you have not the high rank of a ruler, a feudal lord, or a minister of the royal court, nor are you in the inferior position of a great minister, with his departments of business, and yet you take

it on you to regulate ceremonies and music, and to give special attention to the relationships of society, with a view to transform the various classes of the people :—is it not an excessive multiplication of your business ?

‘And moreover men are liable to eight defects, and (the conduct of) affairs to four evils ; of which we must by all means take account.

‘To take the management of affairs which do not concern him is called monopolising. To bring forward a subject which no one regards is called loquacity. To lead men on by speeches made to please them is called sycophancy. To praise men without regard to right or wrong is called flattery. To be fond of speaking of men’s wickedness is called calumny. To part friends and separate relatives is called mischievousness. To praise a man deceitfully, or in the same way fix on him the character of being bad, is called depravity. Without reference to their being good or bad, to agree with men with double face, in order to steal a knowledge of what they wish, is called being dangerous. Those eight defects produce disorder among other men and injury to one’s self. A superior man will not make a friend of one who has them, nor will an intelligent ruler make him his minister.

‘To speak of what I called the four evils :—To be fond of conducting great affairs, changing and altering what is of long-standing, to obtain for one’s self the reputation of meritorious service, is called ambition ; to claim all wisdom and intrude into affairs, encroaching on the work of others, and representing it as one’s own, is called greediness ; to see his errors without changing them, and to go on

more resolutely in his own way when remonstrated with, is called obstinacy; when another agrees with himself, to approve of him, and, however good he may be, when he disagrees, to disapprove of him, is called boastful conceit. These are the four evils. When one can put away the eight defects, and allow no course to the four evils, he begins to be capable of being taught.'

Confucius looked sorrowful and sighed. (Again) he bowed twice, and then rose up and said, 'I was twice driven from Lû. I had to flee from Wei; the tree under which I rested was cut down in Sung; I was kept in a state of siege between K'zân and Zhâi. I do not know what errors I had committed that I came to be misrepresented on these four occasions (and suffered as I did).' The stranger looked grieved (at these words), changed countenance, and said, 'Very difficult it is, Sir, to make you understand. There was a man who was frightened at his shadow and disliked to see his footsteps, so that he ran to escape from them. But the more frequently he lifted his feet, the more numerous his footprints were; and however fast he ran, his shadow did not leave him. He thought he was going too slow, and ran on with all his speed without stopping, till his strength was exhausted and he died. He did not know that, if he had stayed in a shady place, his shadow would have disappeared, and that if he had remained still, he would have lost his footprints:—his stupidity was excessive! And you, Sir, exercise your judgment on the questions about benevolence and righteousness; you investigate the points where agreement and difference touch; you look at the changes from

movement to rest and from rest to movement ; you have mastered the rules of receiving and giving ; you have defined the feelings of liking and disliking ; you have harmonised the limits of joy and anger :—and yet you have hardly been able to escape (the troubles of which you speak). If you earnestly cultivated your own person, and carefully guarded your (proper) truth, simply rendering to others what was due to them, then you would have escaped such entanglements. But now, when you do not cultivate your own person, and make the cultivation of others your object, are you not occupying yourself with what is external ?’

Confucius with an air of sadness said, ‘ Allow me to ask what it is that you call my proper Truth.’ The stranger replied, ‘ A man’s proper Truth is pure sincerity in its highest degree ;—without this pure sincerity one cannot move others. Hence if one (only) forces himself to wail, however sadly he may do so, it is not (real) sorrow ; if he forces himself to be angry, however he may seem to be severe, he excites no awe ; if he forces himself to show affection, however he may smile, he awakens no harmonious reciprocation. True grief, without a sound, is yet sorrowful ; true anger, without any demonstration, yet awakens awe ; true affection, without a smile, yet produces a harmonious reciprocation. Given this truth within, it exercises a spiritual efficacy without, and this is why we count it so valuable. In our relations with others, it appears according to the requirements of each case :—in the service of parents, as gentle, filial duty ; in the service of rulers, as loyalty and integrity ; in festive drinking, as pleasant enjoyment ; in the performance

of the mourning rites, as sadness and sorrow. In loyalty and integrity, good service is the principal thing ; in festive drinking, the enjoyment ; in the mourning rites, the sorrow ; in the service of parents, the giving them pleasure. The beauty of the service rendered (to a ruler) does not require that it always be performed in one way ; the service of parents so as to give them pleasure takes no account of how it is done ; the festive drinking which ministers enjoyment does not depend on the appliances for it ; the observance of the mourning rites with the proper sorrow asks no questions about the rites themselves. Rites are prescribed for the practice of the common people ; man's proper Truth is what he has received from Heaven, operating spontaneously, and unchangeable. Therefore the sages take their law from Heaven, and prize their (proper) Truth, without submitting to the restrictions of custom. The stupid do the reverse of this. They are unable to take their law from Heaven, and are influenced by other men ; they do not know how to prize the proper Truth (of their nature), but are under the dominion of ordinary things, and change according to the customs (around them) :—always, consequently, incomplete. Alas for you, Sir, that you were early steeped in the hypocrisies of men, and have been so late in hearing about the Great Way !'

(Once more), Confucius bowed twice (to the fisherman), then rose again, and said, 'That I have met you to-day is as if I had the happiness of getting to heaven. If you, Master, are not ashamed, but will let me be as your servant, and continue to teach me, let me venture to ask where your dwelling is. I will

then beg to receive your instructions there, and finish my learning of the Great Way.' The stranger replied, 'I have heard the saying, "If it be one with whom you can walk together, go with him to the subtlest mysteries of the Táo. If it be one with whom you cannot walk together and he do not know the Táo, take care that you do not associate with him, and you will yourself incur no responsibility." Do your utmost, Sir. I must leave you,—I must leave you!' With this he shoved off his boat, and went away among the green reeds.

Yen Yüan (now) returned to the carriage, where 3ze-lû handed to him the strap; but Confucius did not look round, (continuing where he was), till the wavelets were stilled, and he did not hear the sound of the pole, when at last he ventured to (return and) take his seat. 3ze-lû, by his side in the carriage, asked him, saying, 'I have been your servant for a long time, but I have never seen you, Master, treat another with the awe and reverence which you have now shown. I have seen you in the presence of a Lord of ten thousand chariots or a Ruler of a thousand, and they have never received you in a different audience-room, or treated you but with the courtesies due to an equal, while you have still carried yourself with a reserved and haughty air; but to-day this old fisherman has stood erect in front of you with his pole in his hand, while you, bent from your loins in the form of a sounding-stone, would bow twice before you answered him;—was not your reverence of him excessive? Your disciples will all think it strange in you, Master. Why did the old fisherman receive such homage from you?'

Confucius leant forward on the cross-bar of the

carriage, heaved a sigh, and said, 'Difficult indeed is it to change you, O Yû! You have been trained in propriety and righteousness for long, and yet your servile and mean heart has not been taken from you. Come nearer, that I may speak fully to you. If you meet one older than yourself, and do not show him respect, you fail in propriety. If you see a man of superior wisdom and goodness, and do not honour him, you want the great characteristic of humanity. If that (fisherman) did not possess it in the highest degree, how could he make others submit to him? And if their submission to him be not sincere, they do not attain to the truth (of their nature), and inflict a lasting injury on their persons. Alas! there is no greater calamity to man than the want of this characteristic; and you, O Yû, you alone, would take such want on yourself.

'Moreover, the Tâo is the course by which all things should proceed. For things to fail in this is death; to observe it, is life. To oppose it in practice is ruin; to conform it, is success. Therefore wherever the sagely man finds the Tâo, he honours it. And that old fisherman to-day might be said to possess it;—dared I presume not to show him reverence?'

BOOK XXXII.

PART III. SECTION X.

Lieh Yü-khâu¹.

1. Lieh Yü-khâu had started to go to *Khi*, but came back when he was half-way to it. He met Po-hwăn Wû-zăn², who said, 'Why have you come back?' His reply was, 'I was frightened.' 'What frightened you?' 'I went into ten soup-shops³ to get a meal, and in five of them the soup was set before me before (I had paid for it)⁴.' 'But what was there in that to frighten you?' (Lieh-ze) said, 'Though the inward and true purpose be not set forth, the body like a spy gives some bright display of it. And this outward demonstration overawes men's minds, and makes men on light grounds treat one as noble or as aged, from which evil to him will be produced. Now vendors of soup supply their commodity simply as a matter of business, and however much they may dispose of, their profit is but little,

¹ See vol. xxxix, pp. 160-162.

² The same teacher, no doubt, who is mentioned in II, par. 2, and XXI, par. 2, though the Wû in Wû-zăn is here 務, and there 無.

³ Like the tea and congee shanties, I suppose, which a traveller in China finds still on the road-side.

⁴ The meaning is not plain. There must have been something in the respect and generosity of the attendants which made Lieh-ze feel that his manner was inconsistent with his profession of Táoism.

and their power is but slight; and yet they treated me as I have said :—how much more would the lord of ten thousand chariots do so ! His body burdened with (the cares of his) kingdom, and his knowledge overtaken by its affairs, he would entrust those affairs to me, and exact from me the successful conduct (of its government). It was this which frightened me.’ Po-hwăn Wû-zăn replied, ‘Admirable perspicacity ! But if you carry yourself as you do, men will flock to you for protection.’

Not long after, Po-hwăn Wû-zăn went (to visit Lieh-ze), and found the space outside his door full of shoes¹. There he stood with his face to the north, holding his staff upright, and leaning his chin on it till the skin was wrinkled. After standing so for some time, and without saying a word, he was going away, when the door-keeper² went in, and told Lieh-ze. The latter (immediately) took up his shoes, and ran barefoot after the visitor. When he overtook him at the (outer) gate, he said, ‘Since you, Sir, have come, are you going away without giving me some medicine³?’ The other replied, ‘It is of no use. I did tell you that men would flock to you, and they do indeed do so. It is not that you can cause men to flock to you, but you cannot keep them from not so coming ;—of what use is (all my warning)? What influences them and makes them glad is the display of your extraordinary (qualities); but you must also be influ-

¹ See the *Lî Kî* (vol. xxvii, pp. 70, 71). It is still the custom in Japan for visitors to leave their shoes outside, in order not to soil the mats.

² Whose business it was to receive and announce the guests.

³ Good advice.

enced in your turn, and your proper nature be shaken, and no warning can be addressed to you. Those who associate with you do not admonish you of this. The small words which they speak are poison to a man. You perceive it not; you understand it not;—how can you separate yourself from them?

‘The clever toil on, and the wise are sad. Those who are without ability seek for nothing. They eat to the full, and wander idly about. They drift like a vessel loosed from its moorings, and aimlessly wander about¹.’

2. A man of *K'ang*, called Hwan, learned² his books in the neighbourhood of *K'hiu-shih*³, and in no longer time than three years became a Confucian scholar, benefiting the three classes of his kindred⁴ as the Ho extends its enriching influence for nine li. He made his younger brother study (the principles of) Mo⁵, and then they two—the scholar and the Mohist—disputed together (about their respective systems), and the father took the side of the younger⁶. After ten years Hwan killed himself. (By and by) he appeared to his father in a dream, saying, ‘It was I who made your son become a

¹ Was this then Wû-zăn's idea of how the Taoist should carry himself? From ‘those who associate with you’ Wû-zăn's address might be rhymed.

² Read them aloud, and so committed them to memory;—as Chinese schoolboys do still.

³ The name of a place, or, perhaps, of Hwan's schoolmaster.

⁴ Probably, the kindred of his father, mother, and wife;—through his getting office as a scholar.

⁵ Or Mih Tî;—Mencius's heresiarch.

⁶ Literally, ‘of Tî,’ as if that had been the name of the younger brother, as it was that of the heresiarch.

Mohist; why did you not recognise that good service¹? I am become (but) the fruit of a cypress in autumn².’ But the Creator³, in apportioning the awards of men, does not recompense them for their own doings, but recompenses them for the (use of the) Heavenly in them. It was thus that Hwan’s brother was led to learn Mohism. When this Hwan thought that it was he who had made his brother different from what he would have been, and proceeded to despise his father, he was like the people of *K’hi*, who, while they drank from a well, tried to keep one another from it. Hence it is said, ‘Now-a-days all men are Hwans⁴.’ From this we perceive that those who possess the characteristics (of the Tâo) consider that they do not know them; how much more is it so with those who possess the Tâo itself! The ancients called such (as Hwan) ‘men who had escaped the punishment of Heaven.’

3. The sagely man rests in what is his proper rest; he does not rest in what is not so;—the multitude of men rest in what is not their proper rest; they do not rest in their proper rest⁵.

4. *K’wang-ze* said, ‘To know the Tâo is easy; not to say (that you know it) is difficult. To know it and not to speak of it is the way to attain to the

¹ The character for this in the text (良) is explained as meaning ‘a grave,’ with special reference to this passage, in the *Khang-hsi* dictionary.

² The idea of a grave is suggested by the ‘cypress,’ and we need not try to find it in 良.

³ The creator was, in *K’wang-ze*’s mind, the Tâo.

⁴ Arrogating to themselves what was the work of the Tâo.

⁵ The best editions make this sentence a paragraph by itself.

Heavenly; to know and to speak of it, is the way to show the Human. The ancients pursued the Heavenly (belonging to them), and not the Human.'

5. *K'û Phing-man*¹ learned how to slaughter the dragon² from *K'ih-lí Yt*, expending (in doing so) all his wealth of a thousand ounces of silver. In three years he became perfect in the art, but he never exercised his skill.

6. The sage looks on what is deemed necessary as unnecessary, and therefore is not at war³ (in himself). The mass of men deem what is unnecessary to be necessary, and therefore they are often at war (in themselves). Therefore those who pursue this method of (internal) war, resort to it in whatever they seek for. But reliance on such war leads to ruin.

7. The wisdom of the small man does not go beyond (the minutiae of) making presents and writing memoranda, wearying his spirits out in what is trivial and mean. But at the same time he wishes to aid in guiding to (the secret of) the *Táo* and of (all) things in the incorporeity of the Grand Unity. In this way he goes all astray in regard to (the mysteries of) space and time. The fetters of embodied matter keep him from the knowledge of the Grand Beginning. (On the other hand), the perfect man directs the energy of his spirit to what was before the Beginning, and finds pleasure in the mysteriousness

¹ These are names fashioned by our author.

² 'Slaughtering the dragon' means 'learning the *Táo*,' by expending or putting away all doing and knowledge, till one comes to the perfect state of knowing the *Táo* and not speaking of it.

³ Being 'at war' here is not the conflict of arms, but of joy, anger, and desire in one's breast. See *Sião Hung* in loc.

belonging to the region of nothingness. He is like the water which flows on without the obstruction of matter, and expands into the Grand Purity.

Alas for what you do, (O men)! You occupy yourselves with things trivial as a hair, and remain ignorant of the Grand Rest!

8. There was a man of Sung, called ʒhào Shang, who was sent by the king of Sung on a mission to *Khin*. On setting out, he had several carriages with him; and the king (of *Khin*) was so pleased with him that he gave him another hundred. When he returned to Sung, he saw *Kwang-ze*, and said to him, 'To live in a narrow lane of a poor mean hamlet, wearing sandals amid distress of poverty, with a weazen neck and yellow face¹;—that is what I should find it difficult to do. But as soon as I come to an understanding with the Lord of a myriad carriages, to find myself with a retinue of a hundred carriages,—that is wherein I excel.' *Kwang-ze* replied, 'When the king of *Khân* is ill, the doctor whom he calls to open an ulcer or squeeze a boil receives a carriage; and he who licks his piles receives five. The lower the service, the more are the carriages given. Did you, Sir, lick his piles? How else should you have got so many carriages? Begone!'

9. Duke *Âi* of *Lû* asked *Yen Ho*, saying, 'If I employ *Kung-nî* as the support of my government, will the evils of the state be thereby cured?' The

¹ The character for 'face' generally means 'ears;' but the *Khang-hsi* dictionary, with special reference to this paragraph, explains it by 'face.'—The whole paragraph is smart and bitter, but *Lin Hsi-kung* thinks it too coarse to be from *Kwang-ze's* pencil.

reply was, ' (Such a measure) would be perilous ! It would be full of hazard ! *Kung-nî*, moreover, will try to ornament a feather and paint it ; in the conduct of affairs he uses flowery speeches. A (mere) branch is to him more admirable (than the root) ; he can bear to misrepresent their nature in instructing the people, and is not conscious of the unreality of his words. He receives (his inspiration) from his own mind, and rules his course from his own spirit ; —what fitness has he to be set over the people ? Is such a man suitable for you (as your minister) ? Could you give to him the nourishment (of the people) ? You would do so by mistake (but not on purpose, for a time, but not as a permanency). To make the people leave what is real, and learn what is hypocritical—that is not the proper thing to be shown to them ; if you take thought for future ages, your better plan will be to give up (the idea of employing Confucius). What makes government difficult, is the dealing with men without forgetting yourself ; this is not according to the example of Heaven in diffusing its benefits. Merchants and traffickers are not to be ranked (with administrative officers) ; if on an occasion you so rank them, the spirits (of the people) do not acquiesce in your doing so. The instruments of external punishment are made of metal and wood ; those of internal punishment are agitation (of the mind) and (the sense of) transgression. When small men become subject to the external punishment, the (instruments of) metal and wood deal with them ; when they become liable to the internal punishments, the Yin and Yang¹ con-

¹ Compare the use of 'the Yin and the Yang' in XXIII, par. 8.—Yen Ho does not flatter Confucius in his description of him.

sume them. It is only the true man who can escape both from the external and internal punishment.'

10. Confucius said, 'The minds of men are more difficult of approach than (the position defended by) mountains and rivers, and more difficult to know than Heaven itself. Heaven has its periods of spring and autumn, of winter and summer, and of morning and evening; but man's exterior is thickly veiled, and his feelings lie deep. Thus the demeanour of some is honest-like, and yet they go to excess (in what is mean); others are really gifted, and yet look to be without ability; some seem docile and impressible, but yet they have far-reaching schemes; others look firm, and yet may be twisted about; others look slow, and yet they are hasty. In this way those who hasten to do what is right as if they were thirsty will anon hurry away from it as if it were fire. Hence the superior man looks at them when employed at a distance to test their fidelity, and when employed near at hand to test their reverence. By employing them on difficult services, he tests their ability; by questioning them suddenly, he tests their knowledge; by appointing them a fixed time, he tests their good faith; by entrusting them with wealth, he tests their benevolence; by telling them of danger, he tests their self-command in emergencies; by making them drunk, he tests their tendencies¹; by placing them in a variety of society, he tests their chastity:—by these nine tests the inferior man is discovered.'

11. When Khâu-fû, the Correct², received the first

¹ Is this equivalent to the adage 'In vino veritas?'

² A famous ancestor of Confucius in the eighth century B. C.,

grade of official rank, he walked with head bowed down ; on receiving the second, with bent back ; on receiving the third, with body stooping, he ran and hurried along the wall :—who would presume not to take him as a model ? But one of those ordinary men, on receiving his first appointment, goes along with a haughty stride ; on receiving his second, he looks quite elated in his chariot ; and on receiving the third, he calls his uncles by their personal names ;—how very different from Hsü (Yü) in the time (of Yáo of) Thang !

Of all things that injure (men) there is none greater than the practising of virtue with the purpose of the mind, till the mind becomes supercilious. When it becomes so, the mind (only) looks inwards (on itself), and such looking into itself leads to its ruin. This evil quality has five forms, and the chief of them is that which is the central. What do we mean by the central quality ? It is that which appears in a man's loving (only) his own views, and reviling whatever he does not do (himself).

Limiting (men's advance), there are eight extreme conditions ; securing (that advance), there are three things necessary ; and the person has its six repositories. Elegance ; a (fine) beard ; tallness ; size ; strength ; beauty ; bravery ; daring ; and in all these excelling others :—(these are the eight extreme conditions) by which advance is limited. Depending on and copying others ; stooping in order to rise ; and being straitened by the fear of not equalling others :—

before the Khung family fled from Sung. See the account of him, with some verbal alterations, in the 30 *K'wan*, under the seventh year of duke *K'ao*.

these are the three things that lead to advancing. Knowledge seeking to reach to all that is external; bold movement producing many resentments; benevolence and righteousness leading to many requisitions; understanding the phenomena of life in an extraordinary degree; understanding all knowledge so as to possess an approach to it; understanding the great condition appointed for him, and following it, and the smaller conditions, and meeting them as they occur:—(these are the six repositories of the person)¹.

12. There was a man who, having had an interview with the king of Sung, and been presented by him with ten carriages, showed them boastfully to *Kwang-sze*, as if the latter had been a boy. *Kwang-sze* said to him, 'Near the Ho there was a poor man who supported his family by weaving rushes (to form screens). His son, when diving in a deep pool, found a pearl worth a thousand ounces of silver. The father said, "Bring a stone, and break it in pieces. A pearl of this value must have been in a pool nine *k'kung* deep², and under the chin of the Black Dragon. That you were able to get it must have been owing to your finding him asleep. Let him awake, and the consequences to you will not be small!" Now the kingdom of Sung is deeper than any pool of nine *k'kung*, and its king is fiercer than the Black Dragon. That you were able to get the

¹ These eight words are supplied to complete the structure of the paragraph; but I cannot well say what they mean, nor in what way the predicates in the six clauses that precede can be called 'the stores, or repositories of the body or person.'

² = in a pool deeper than any nine pools. Compare the expression 九重天.

chariots must have been owing to your finding him asleep. Let him awake, and you will be ground to powder¹.

13. Some (ruler) having sent a message of invitation to him, *Kwang-ze* replied to the messenger, 'Have you seen, Sir, a sacrificial ox? It is robed with ornamental embroidery, and feasted on fresh grass and beans. But when it is led into the grand ancestral temple, though it wished to be (again) a solitary calf, would that be possible for it²?'

14. When *Kwang-ze* was about to die, his disciples signified their wish to give him a grand burial. 'I shall have heaven and earth,' said he, 'for my coffin and its shell; the sun and moon for my two round symbols of jade; the stars and constellations for my pearls and jewels; and all things assisting as the mourners. Will not the provisions for my burial be complete? What could you add to them?' The disciples replied, 'We are afraid that the crows and kites will eat our master.' *Kwang-ze* rejoined, 'Above, the crows and kites will eat me; below, the mole-cricket and ants will eat me:—to take from those and give to these would only show your partiality³.'

The attempt, with what is not even, to produce what is even will only produce an uneven result; the attempt, with what is uncertain, to make the uncertain certain will leave the uncertainty as it

¹ Compare paragraph 8. But Lin again denies the genuineness of this.

² Compare XVII, par. 11.

³ We do not know whether *Kwang-ze* was buried according to his own ideal or not. In the concluding sentences we have a strange descent from the grandiloquence of what precedes.

was. He who uses only the sight of his eyes is acted on by what he sees ; it is the (intuition of the) spirit, that gives the assurance of certainty. That the sight of the eyes is not equal to that intuition of the spirit is a thing long acknowledged. And yet stupid people rely on what they see, and will have it to be the sentiment of all men ;—all their success being with what is external :—is it not sad ?

BOOK XXXIII.

PART III. SECTION XI.

Thien Hsiâ¹.

1. The methods employed in the regulation of the world² are many; and (the employers of them) think each that the efficiency of his own method leaves nothing to be added to it.

But where is what was called of old 'the method of the Táo²?' We must reply, 'It is everywhere.' But then whence does the spiritual³ in it come down? and whence does the intelligence⁴ in it come forth? There is that which gives birth to the Sage, and that which gives his perfection to the King:—the origin of both is the One⁵.

Not to be separate from his primal source constitutes what we call the Heavenly man; not to be separate from the essential nature thereof constitutes what we call the Spirit-like man; not to be separate from its real truth constitutes what we call the Perfect man⁶.

¹ See vol. xxxix, pp. 162, 163.

² All the methods of educational training and schemes of governmental policy, advocated by 'the hundred schools' of human wisdom in contradistinction from the method or art of the Táo. Fang Shû has little more meaning than our word 'nostrum.'

³ Which forms the sage.

⁴ Which forms the sage king.

⁵ Or, one and the same.

⁶ Compare the three definitions in Book I, par. 3.

To regard Heaven as his primal Source, Its Attributes as the Root (of his nature), and the Tâo as the Gate (by which he enters into this inheritance), (knowing also) the prognostics given in change and transformation, constitutes what we call the Sagely man¹.

To regard benevolence as (the source of all) kindness, righteousness as (the source of all) distinctions, propriety as (the rule of) all conduct, and music as (the idea of) all harmony, thus diffusing a fragrance of gentleness and goodness, constitutes what we call the Superior man².

To regard laws as assigning the different (social) conditions, their names as the outward expression (of the social duties), the comparison of subjects as supplying the grounds of evidence, investigation as conducting to certainty, so that things can be numbered as first, second, third, fourth (and so on):—(this is the basis of government). Its hundred offices are thus arranged; business has its regular course; the great matters of clothes and food are provided for; cattle are fattened and looked after; the (government) stores are filled; the old and weak, orphans and solitaries, receive anxious consideration:—in all these ways is provision made for the nourishment of the people.

How complete was (the operation of the Tâo) in the men of old! It made them the equals of spiritual beings, and subtle and all-embracing as heaven and earth. They nourished all things, and produced

¹ Here we have five definitions of the 'Man of Tâo.'

² Still within the circle of the Tâo, but inferior to the five above.

harmony all under heaven. Their beneficent influence reached to all classes of the people. They understood all fundamental principles, and followed them out to their graduated issues; in all the six directions went their penetration, and in the four quarters all things were open to them. Great and small, fine and coarse;—all felt their presence and operation. Their intelligence, as seen in all their regulations, was handed down from age to age in their old laws, and much of it was still to be found in the Historians. What of it was in the Shih, the Shû, the Lî, and the Yo, might be learned from the scholars of 3âu¹ and Lû¹, and the girdled members of the various courts. The Shih describes what should be the aim of the mind; the Shû, the course of events; the Lî is intended to direct the conduct; the Yo, to set forth harmony; the Yî, to show the action of the Yin and Yang; and the *Khun Khiú*, to display names and the duties belonging to them.

Some of the regulations (of these men of old), scattered all under heaven, and established in our Middle states, are (also) occasionally mentioned and described in the writings of the different schools.

There ensued great disorder in the world, and sages and worthies no longer shed their light on it. The Táo and its characteristics ceased to be regarded as uniform. Many in different places got

¹ These scholars were pre-eminently Confucius and Mencius. In this brief phrase is the one recognition, by our author, of the existence and work of Mencius, who was 'the scholar of 3âu.' But one is not prepared for the comparatively favourable judgment passed on those scholars, and on what we call the Confucian classics. The reading 3âu has not been challenged, and can only be understood of Mencius.

one glimpse of it, and plumed themselves on possessing it as a whole. They might be compared to the ear, the eye, the nose, or the mouth. Each sense has its own faculty, but their different faculties cannot be interchanged. So it was with the many branches of the various schools. Each had its peculiar excellence, and there was the time for the use of it; but notwithstanding no one covered or extended over the whole (range of truth). The case was that of the scholar of a corner who passes his judgment on all the beautiful in heaven and earth, discriminates the principles that underlie all things, and attempts to estimate the success arrived at by the ancients. Seldom is it that such an one can embrace all the beautiful in heaven and earth, or rightly estimate the ways of the spiritual and intelligent; and thus it was that the Táo, which inwardly forms the sage and externally the king¹, became obscured and lost its clearness, became repressed and lost its development. Every one in the world did whatever he wished, and was the rule to himself. Alas! the various schools held on their several ways, and could not come back to the same point, nor agree together. The students of that later age unfortunately did not see the undivided purity of heaven and earth, and the great scheme of truth held by the ancients. The system of the Táo was about to be torn in fragments all under the sky.

2. To leave no example of extravagance to future generations; to show no wastefulness in the use of

¹ Compare 'the spiritual' and 'the intelligence' near the commencement, and the notes 3 and 4.

anything; to make no display in the degree of their (ceremonial) observances; to keep themselves (in their expenditure) under the restraint of strict and exact rule, so as to be prepared for occurring emergencies;—such regulations formed part of the system of the Tâo in antiquity, and were appreciated by Mo Tî, and (his disciple) *K'hin Hwa-lî*¹. When they heard of such ways, they were delighted with them; but they enjoined them in excess, and followed them themselves too strictly. (Mo) made the treatise 'Against Music,' and enjoined the subject of another, called 'Economy in Expenditure,' on his followers. He would have no singing in life, and no wearing of mourning on occasions of death. He inculcated Universal Love, and a Common Participation in all advantages, and condemned Fighting. His doctrine did not admit of Anger. He was fond also of Learning, and with it all strove not to appear different from others. Yet he did not agree with the former kings, but attacked the ceremonies and music of the ancients.

Hwang-Tî had his Hsien-*k'ih*; Yâo, his Tâ Kang; Shun, his Tâ Shâo; Yü, his Tâ Hsiâ; Thang, his Tâ Hû; king Wăn, his music of the Phi-yung²; and king Wû and the duke of Kâu made the Wû.

¹ Thus Mohism appears as an imperfect Taoism. Mo (or Meh) Tî was a great officer of the state of Sung, of the period between Confucius and Mencius. He left many treatises behind him, of which only a few, but the most important, survive. *K'hin Hwa-lî* seems to have been his chief disciple. He says, in one place, '*K'hin Hwa-lî* and my other disciples,—300 men.'

² The name of the great hall built by king Wăn, and still applied to the examination hall of the Han-lin graduates in Peking.

In the mourning rites of the ancients, the noble and mean had their several observances, the high and low their different degrees. The coffin of the Son of Heaven was sevenfold; of a feudal lord, fivefold; of a great officer, threefold; of other officers, twofold. But now Mo-ze alone, would have no singing during life, and no wearing of mourning after death. As the rule for all, he would have a coffin of elaeococca wood, three inches thick, and without any enclosing shell. The teaching of such lessons cannot be regarded as affording a proof of his love for men; his practising them in his own case would certainly show that he did not love himself; but this has not been sufficient to overthrow the views of Mo-ze. Notwithstanding, men will sing, and he condemns singing; men will wail, and he condemns wailing; men will express their joy, and he condemns such expression:—is this truly in accordance with man's nature? Through life toil, and at death niggardliness:—his way is one of great unkindliness. Causing men sorrow and melancholy, and difficult to be carried into practice, I fear it cannot be regarded as the way of a sage. Contrary to the minds of men everywhere, men will not endure it. Though Mo-ze himself might be able to endure it, how can the aversion of the world to it be overcome? The world averse to it, it must be far from the way of the (ancient) kings.

Mo-ze, in praise of his views, said, 'Anciently, when Yü was draining off the waters of the flood, he set free the channels of the *Kiang* and the *Ho*, and opened communications with them from the

What the special music made for it by Wăn was called, I do not know.

regions of the four Î and the nine provinces. The famous hills with which he dealt were 300, the branch streams were 3000, and the smaller ones innumerable. With his own hands he carried the sack and wielded the spade, till he had united all the streams of the country (conducting them to the sea). There was no hair left on his legs from the knee to the ankle. He bathed his hair in the violent wind, and combed it in the pelting rain, thus marking out the myriad states. Yü was a great sage, and thus he toiled in the service of the world.' The effect of this is that in this later time most of the Mohists wear skins and dolychos cloth, with shoes of wood or twisted hemp, not stopping day or night, but considering such toiling on their part as their highest achievement. They say that he who cannot do this is acting contrary to the way of Yü, and not fit to be a Mohist.

The disciples of *K'in* of Hsiang-lî¹, the followers of the various feudal lords²; and Mohists of the south, such as Khû Hu³, *Ki K'ih*³, and Täng Ling-ze³, all repeated the texts of Mo, but they differed in the objections which they offered to them, and in their deceitful glosses they called one another Mohists of different schools. They had their disputations, turning on 'what was hard,' and 'what was white,' what constituted 'sameness' and what 'difference,' and their expressions about the difference between 'the odd' and 'the even,' with which they answered one another. They regarded

¹ Some say this *K'in* was the preceptor of Mo Tî.

² Easily translated; but the statement has not been historically illustrated.

³ Known only by the mention of them here.

their most distinguished member as a sage, and wished to make him their chief, hoping that he would be handed down as such to future ages. To the present day these controversies are not determined.

The idea of Mo Tî and *K'in* Hwa-lî was good, but their practice was wrong. They would have made the Mohists of future ages feel it necessary to toil themselves, till there was not a hair on their legs, and still be urging one another on; (thus producing a condition) superior indeed to disorder, but inferior to the result of good government. Nevertheless, Mo-ze was indeed one of the best men in the world, which you may search without finding his equal. Decayed and worn (his person) might be, but he is not to be rejected,—a scholar of ability indeed!

3. To keep from being entangled by prevailing customs; to shun all ornamental attractions in one's self; not to be reckless in his conduct to others; not to set himself stubbornly against a multitude; to desire the peace and repose of the world in order to preserve the lives of the people; and to cease his action when enough had been obtained for the nourishment of others and himself, showing that this was the aim of his mind;—such a scheme belonged to the system of the Táo in antiquity¹, and it was appreciated by Sung Hsing² and Yin Wăn².

¹ It is difficult to understand the phases of the Táo here referred to.

² Both these men are said to have been of the time of king Hsüan of *K'hi*. In the Catalogue of the Imperial Library of Han, Yin Wăn appears, but not among the Táoist writers, as the author

When they heard of such ways, they were delighted with them. They made the Hwa-shan cap, and wore it as their distinguishing badge¹. In their intercourse with others, whatever their differences might be, they began by being indulgent to them. Their name for 'the Forbearance of the Mind' was 'the Action of the Mind.' By the warmth of affection they sought the harmony of joy, and to blend together all within the four seas; and their wish was to plant this everywhere as the chief thing to be pursued. They endured insult without feeling it a disgrace; they sought to save the people from fighting; they forbade aggression and sought to hush the weapons of strife, to save their age from war. In this way they went everywhere, counselling the high and instructing the low. Though the world might not receive them, they only insisted on their object the more strongly, and would not abandon it. Hence it is said, 'The high and the low might be weary of them, but they were strong to show themselves.'

Notwithstanding all this, they acted too much out of regard to others, and too little for themselves. It was as if they said, 'What we request and wish is simply that there may be set down for us five pints of rice;—that will be enough.' But I fear the Master would not get his fill from this; and the disciples, though famishing, would still have to be mindful of the world, and, never stopping day or night, have to say, 'Is it necessary I should preserve

of 'one Treatise.' He is said also to have been the preceptor of Kung-sun Lung.

¹ I cannot fashion the shape of this cap or of the Hwa mountain in my own mind,—'flat both above and below.'

my life? Shall I scheme how to exalt myself above the master, the saviour of the age?’

It was moreover as if they said, ‘The superior man does not censoriously scrutinize (the faults of others); he does not borrow from others to supersede his own endeavours; when any think that he is of no use to the world, he knows that their intelligence is inferior to his own; he considers the prohibition of aggression and causing the disuse of arms to be an external achievement, and the making his own desires to be few and slight to be the internal triumph.’ Such was their discrimination between the great and the small, the subtle and the coarse; and with the attainment of this they stopped.

4. Public-spirited, and with nothing of the partizan; easy and compliant, without any selfish partialities; capable of being led, without any positive tendencies; following in the wake of others, without any double mind; not looking round because of anxious thoughts; not scheming in the exercise of their wisdom; not choosing between parties, but going along with all;—all such courses belonged to the Tâoists of antiquity, and they were appreciated by Phăng Măng¹, Thien Phien¹, and Shăn Tâo¹. When they heard of such ways, they were delighted with them. They considered that the first thing for them to do was to adjust the controversies about different things. They said, ‘Heaven can cover, but it cannot sustain; Earth can contain, but it can-

¹ Thien Phien is mentioned in the Han Catalogue, among the Tâoist writers, as a native of Kêi, and an author of twenty-five phien. Shăn Tâo also appears among the legal writers, as author of forty-two phien. He is mentioned by Han Fei.

not cover. The Great Tâo embraces all things, but It does not discriminate between them.'

They knew that all things have what they can do and what they cannot do. Hence it is said, 'If you select, you do not reach all; if you teach some things, you must omit the others; but the Tâo neglects none.' Therefore Shân Tâo discarded his knowledge and also all thought of himself, acting only where he had no alternative, and pursued it as his course to be indifferent and pure in his dealings with others. He said that the best knowledge was to have no knowledge, and that if we had a little knowledge it was likely to prove a dangerous thing. Conscious of his unfitness, he undertook no charge, and laughed at those who valued ability and virtue. Remiss and evasive, he did nothing, and disallowed the greatest sages which the world had known. Now with a hammer, now with his hand, smoothing all corners, and breaking all bonds, he accommodated himself to all conditions. He disregarded right and wrong, his only concern being to avoid trouble; he learned nothing from the wise and thoughtful, and took no note of the succession of events, thinking only of carrying himself with a lofty disregard of everything. He went where he was pushed, and followed where he was led, like a whirling wind, like a feather tossed about, like the revolutions of a grindstone.

What was the reason that he appeared thus complete, doing nothing wrong? that, whether in motion or at rest, he committed no error, and could be charged with no transgression? Creatures that have no knowledge are free from the troubles that arise from self-assertion and the entanglements that spring from the use of knowledge. Moving and at

rest, they do not depart from their proper course, and all their life long they do not receive any praise. Hence (Shăn Táo) said, 'Let me come to be like a creature without knowledge. Of what use are the (teachings of the) sages and worthies?' But a clod of earth never fails in the course (proper for it), and men of spirit and eminence laughed together at him, and said, 'The way of Shăn Táo does not describe the conduct of living men; that it should be predicable only of the dead is strange indeed!'

It was just the same with Thien Phien. He learned under Phăng Măng, but it was as if he were not taught at all. The master of Phăng Măng said, 'The Táoist professors of old came no farther than to say that nothing was absolutely right and nothing absolutely wrong.' His spirit was like the breath of an opposing wind; how can it be described in words? But he was always contrary to (the views of) other men, which he would not bring together to view, and he did not escape shaving the corners and bonds (of which I have spoken). What he called the Táo was not the true Táo, and what he called the right was really the wrong.

Phăng Măng, Thien Phien, and Shăn Táo did not in fact know the Táo; but nevertheless they had heard in a general way about it.

5. To take the root (from which things spring) as the essential (part), and the things as its coarse (embodiment); to see deficiency in accumulation; and in the solitude of one's individuality to dwell with the spirit-like and intelligent;—such a course belonged to the Táo of antiquity, and it was appre-

ciated by Kwan Yin¹ and Lâo Tan². When they heard of such ways, they were delighted with them. They built their system on the assumption of an eternal non-existence, and made the ruling idea in it that of the Grand Unity. They made weakness and humility their mark of distinction, and considered that by empty vacuity no injury could be sustained, but all things be preserved in their substantiality.

Kwan Yin¹ says, 'To him who does not dwell in himself the forms of things show themselves as they are. His movement is like that of water; his stillness is like that of a mirror; his response is like that of the echo. His tenuity makes him seem to be disappearing altogether; he is still as a clear (lake), harmonious in his association with others, and he counts gain as loss. He does not take precedence of others, but follows them.' Lâo Tan² says, 'He knows his masculine power, but maintains his female weakness,—becoming the channel into which all streams flow. He knows his white purity, but keeps his disgrace,—becoming the valley of the world. Men all prefer to be first; he alone chooses to be last, saying, "I will receive the offscourings of the world." Men all choose fulness; he alone chooses emptiness. He does not store, and therefore he has a superabundance; he looks solitary, but has a multitude around him. In his conducting

¹ Kwan Yin;—see Book XIX, par. 2, and vol. xxxix, p. 35. In the Catalogue of the Han Library there is an entry of a work by Kwan Yin in nine *phien*; and there is still a work current in China, called *Kwan Yin-ze* in one *k'üan*, but it is not generally received as genuine.

² See the account of Lâo-ze in vol. xxxix, pp. 34-36.

of himself he is easy and leisurely and wastes nothing. He does nothing, and laughs at the clever and ingenious. Men all seek for happiness, but he feels complete in his imperfect condition, and says, "Let me only escape blame." He regards what is deepest as his root, and what is most restrictive as his rule; and says, "The strong is broken; the sharp and pointed is blunted¹." He is always generous and forbearing with others, and does not encroach on any man;—this may be pronounced the height (of perfection).'

O Kwan Yin, and Lâu Tan, ye were among the greatest men of antiquity; True men indeed!

6. That the shadowy and still is without bodily form; that change and transformation are ever proceeding, but incapable of being determined. What is death? What is life? What is meant by the union of Heaven and Earth? Does the spiritual intelligence go away? Shadowy, where does it go? Subtle, whither does it proceed? All things being arranged as they are, there is no one place which can be fitly ascribed to it. Such were the questions belonging to the scheme of Tâu in antiquity, and they were appreciated by Kwang Kâu. When he heard of such subjects, he was delighted with them. (He discussed them), using strange and mystical expressions, wild and extravagant words, and phrases to which no definite meaning could be assigned. He constantly indulged his own wayward ideas, but did not make himself a partisan, nor look at them as peculiar to himself. Considering that men were

¹ From the 'Lâu Tan says' down to this, may be said to be all quotation, with more or less exactness, from the Tâu Teh King. See chaps. 28, 22, et al.

sunk in stupidity and could not be talked to in dignified style, he employed the words of the cup of endless application, with important quotations to substantiate the truth, and an abundance of corroborative illustrations. He chiefly cared to occupy himself with the spirit-like operation of heaven and earth, and did not try to rise above the myriads of things. He did not condemn the agreements and differences of others, so that he might live in peace with the prevalent views. Though his writings may seem to be sparkling trifles, there is no harm in amusing one's self with them; though his phraseology be ever-varying, its turns and changes are worth being looked at;—the fulness and completeness of his ideas cannot be exhausted. Above he seeks delight in the Maker; below, he has a friendly regard to those who consider life and death as having neither beginning nor end. As regards his dealing with the Root (origin of all things), he is comprehensive and great, opening up new views, deep, vast, and free. As regards the Author and Master (the Great Táo Itself), he may be pronounced exact and correct, carrying our thoughts to range and play on high. Nevertheless on the subject of transformation, and the emancipation of that from (the thralldom of) things, his principles are inexhaustible, and are not derived from his predecessors. They are subtle and obscure, and cannot be fully explained¹.

¹ The question of the genuineness of this paragraph has been touched on in vol. xxxix, p. 163. Whether from himself or from some disciple, it celebrates Kwang-jze as the chief and most interesting of all ancient Táoist writers.

7. Hui Shih¹ had many ingenious notions. His writings would fill five carriages; but his doctrines were erroneous and contradictory, and his words were wide of their mark. Taking up one thing after another, he would say:—‘That which is so great that there is nothing outside it may be called the Great One; and that which is so small that there is nothing inside it may be called the Small One.’ ‘What has no thickness and will not admit of being repeated is 1000 li in size².’ ‘Heaven may be as low as the earth.’ ‘A mountain may be as level as a marsh.’ ‘The sun in the meridian may be the sun declining.’ ‘A creature may be born to life and may die at the same time.’ ‘(When it is said that) things greatly alike are different from things a little alike, this is what is called making little of agreements and differences; (when it is said that) all things are entirely alike or entirely different, this is what is called making much of agreements and differences.’ ‘The south is unlimited and yet has a limit.’ ‘I proceed to Yueh to-day and came to it yesterday.’ ‘Things which are joined together can be separated.’ ‘I know the centre of the world;—it is north of Yen or south of Yueh.’ ‘If all things be regarded with love, heaven and earth are of one body (with me).’

Hui Shih by such sayings as these made himself

¹ Introduced to us in the first Book of our author, and often mentioned in the intervening Books. He was not a Tâoist, but we are glad to have the account of him here given, as enabling us to understand better the intellectual life of China in Kwang-ze's time.

² It is of little use trying to find the answers to these sayings of Hui Shih and others. They are only riddles or paradoxes.

very conspicuous throughout the kingdom, and was considered an able debater. All other debaters vied with one another and delighted in similar exhibitions. (They would say), 'There are feathers in an egg.' 'A fowl has three feet.' 'The kingdom belongs to Ying.' 'A dog might have been (called) a sheep.' 'A tadpole has a tail.' 'Fire is not hot.' 'A mountain gives forth a voice.' 'A wheel does not tread on the ground.' 'The eye does not see.' 'The finger indicates, but needs not touch, (the object).' 'Where you come to may not be the end.' 'The tortoise is longer than the snake.' 'The carpenter's square is not square.' 'A compass should not itself be round.' 'A chisel does not surround its handle.' 'The shadow of a flying bird does not (itself) move.' 'Swift as the arrowhead is, there is a time when it is neither flying nor at rest.' 'A dog is not a hound.' 'A bay horse and a black ox are three.' 'A white dog is black.' 'A motherless colt never had a mother.' 'If from a stick a foot long you every day take the half of it, in a myriad ages it will not be exhausted.'—It was in this way that the debaters responded to Hui Shih, all their lifetime, without coming to an end.

Hwan Twan¹ and Kung-sun Lung² were true members of this class. By their specious representations they threw a glamour over men's minds and altered their ideas. They vanquished men in argument, but could not subdue their minds, only keeping them in the enclosure of their sophistry. Hui Shih daily used his own knowledge and the arguments of others to propose strange theses to all debaters;—

¹ Elsewhere unknown.

² See Book XVII, par. 10.

such was his practice. At the same time he would talk freely of himself, thinking himself the ablest among them, and saying, 'In heaven or earth who is my match?' Shih maintained indeed his masculine energy, but he had not the art (of controversy).

In the south there was a man of extraordinary views, named Hwang Lião¹, who asked him how it was that the sky did not fall nor the earth sink, and what was the cause of wind, rain, and the thunder's roll and crash. Shih made no attempt to evade the questions, and answered him without any exercise of thought, talking about all things, without pause, on and on without end; yet still thinking that his words were few, and adding to them the strangest observations. He thought that to contradict others was a real triumph, and wished to make himself famous by overcoming them; and on this account he was not liked by the multitude of debaters. He was weak in real attainment, though he might seem strong in comparison with others, and his way was narrow and dark. If we look at Hui Shih's ability from the standpoint of Heaven and Earth, it was only like the restless activity of a mosquito or gadfly; of what service was it to anything? To give its full development to any one capacity is a good thing, and he who does so is in the way to a higher estimation of the Táo; but Hui Shih could find no rest for himself in doing this. He diffused himself over the world of things without satiety, till in the end he had only the reputation of being a skilful debater. Alas! Hui Shih, with

¹ Elsewhere unknown.

all his talents, vast as they were, made nothing out; he pursued all subjects and never came back (with success). It was like silencing an echo by his shouting, or running a race with his shadow. Alas!

THE THÂI-SHANG
TRACTATE OF ACTIONS AND THEIR
RETRIBUTIONS.

THE THÂI-SHANG

TRACTATE OF ACTIONS AND THEIR RETRIBUTIONS¹.

1. The Thâi-Shang (Tractate) says, 'There are no special doors for calamity and happiness (in men's lot); they come as men themselves call them. Their recompenses follow good and evil as the shadow follows the substance².

The Thesis.

2. 'Accordingly, in heaven and earth³ there are spirits that take account of men's transgressions, and, according to the lightness or gravity of their offences, take away from their term of life⁴. When that term is curtailed, men become poor and reduced, and meet with many sorrows and afflictions. All (other) men hate them; punishments and calamities attend them; good luck and occasions for felicitation shun them;

Machinery
to secure
retribution.

¹ See vol. xxxix, pp. 38-40.

² This paragraph, after the first three characters, is found in the 30 *Khwan*, under the tenth and eleventh notices in the twenty-third year of duke Hsiang (B.C. 549),—part of an address to a young nobleman by the officer Min 3ze-mâ. The only difference in the two texts is in one character which does not affect the meaning. Thus the text of this Tâoist treatise is taken from a source which cannot be regarded as Tâoistic.

³ This seems equivalent to 'all through space.'

⁴ The swan in the text here seems to mean 'the whole of the allotted term of life.' Further on, the same character has the special meaning of 'a period of a hundred days.'

evil stars send down misfortunes on them¹. When their term of life is exhausted they die.

'There also are the Spirit-rulers in the three pairs of the Thái stars of the Northern Bushel² over men's heads, which record their acts of guilt and wickedness, and take away (from their term of life) periods of twelve years or of a hundred days.

'There also are the three Spirits of the recumbent body which reside within a man's person³. As each kǎng-shǎn⁴ day comes round, they forthwith ascend to the court of Heaven, and report men's deeds of guilt and transgression. On the last day of the moon, the spirit of the Hearth does the same⁵.

'In the case of every man's transgressions, when they are great, twelve years are taken from his term of life; when they are small, a hundred days.

'Transgressions, great and small, are seen in several hundred things. He who wishes to seek for long life⁶ must first avoid these.

¹ This and other passages show how Tâoism pressed astrology into its service.

² The Northern Peck or Bushel is the Chinese name of our constellation of the Great Bear, 'the Chariot of the Supreme Ruler.' The three pairs of stars, ι, κ; λ, μ; ν, ξ, are called the upper, middle, and lower Thái, or 'their three Eminences:'—see Reeves's *Names of Stars and Constellations*, appended to Morrison's *Dictionary*, part ii, vol. i.

³ The Khang-hsî Dictionary simply explains san shîh as 'the name of a spirit;' but the phrase is evidently plural. The names and places of the three spirits are given, and given differently. Why should we look for anything definite and satisfactory in a notion which is merely an absurd superstition?

⁴ Kǎng-shǎn is the name of the fifty-seventh term of the cycle, indicating every fifty-seventh day, or year. Here it indicates the day.

⁵ The name of this spirit of the fire-place is given by commentators with many absurd details which need not be touched on.

⁶ Long life is still the great quest of the Tâoist.

3. 'Is his way right, he should go forward in it; is it wrong, he should withdraw from it.

'He will not tread in devious by-ways; he will not impose on himself in any secret apartment. He will

The way of
a good man.

amass virtue and accumulate deeds of merit. He will feel kindly towards (all) creatures¹. He will be loyal, filial, loving to his younger brothers, and submissive to his elder. He will make himself correct and (so) transform others. He will pity orphans, and compassionate widows; he will respect the old and cherish the young. Even the insect tribes, grass, and trees he should not hurt.

'He ought to pity the malignant tendencies of others; to rejoice over their excellences; to help them in their straits; to rescue them from their perils; to regard their gains as if they were his own, and their losses in the same way; not to publish their shortcomings; not to vaunt his own superiorities; to put a stop to what is evil, and exalt and display what is good; to yield much, and take little for himself; to receive insult without resenting it, and honour with an appearance of apprehension; to bestow favours without seeking for a return, and give to others without any subsequent regret:—this is what is called a good man. All other men respect him; Heaven in its course protects him; happiness and emolument follow him; all evil things keep far from him; the spiritual Intelligences defend him; what he does is sure to succeed²;

¹ In its widest meaning:—Men, creatures, and all living things.

² Here are the happy issues of doing good in addition to long life;—compare the *Táo Teh King*, ch. 50, et al.

he may hope to become Immaterial and Immortal¹.

He who would seek to become an Immortal of Heaven¹ ought to give the proof of 1300 good deeds; and he who would seek to become an Immortal of Earth¹ should give the proof of three hundred.

Happy issues
of his course.

4. 'But if the movements (of a man's heart) are contrary to righteousness, and the (actions of his) conduct are in opposition to reason; if he regard his wickedness as a proof of his ability, and can bear to do what is cruel and injurious; if he secretly harms the honest and good; if he treats with clandestine slight his ruler or parents; if he is disrespectful to his elders and teachers²; if he disregards the authority of those whom he should serve; if he deceives the simple; if he calumniates his fellow-learners; if he vent baseless slanders, practise deception and hypocrisy,

The way of
a bad man.

¹ Here there appears the influence of Buddhism on the doctrine of the Tâo. The *Rîshis* of Buddhism are denoted in Chinese by Hsien Zân (仙人), which, for want of a better term, we translate by 'Immortals.' The famous Nâgârjuna, the fourteenth Buddhist patriarch, counts ten classes of these *Rîshis*, and ascribes to them only a temporary exemption for a million years from transmigration, but Chinese Buddhists and Tâoists view them as absolutely immortal, and distinguish five classes:—first, Deva *Rîshis*, or Heavenly Hsien, residing on the seven concentric rocks round Meru; second, Purusha, or Spirit-like Hsien, roaming through the air; third, Nara, or Human Hsien, dwelling among men; fourth, Bhûmi, or Earth Hsien, residing on earth in caves; and fifth, Preta, or Demon Hsien, roving demons. See Eitel's Handbook to Chinese Buddhism, second edition, p. 130. In this place three out of the five classes are specified, each having its own price in good deeds.

² Literally, 'those born before himself,' but generally used as a designation of teachers.

and attack and expose his kindred by consanguinity and affinity; if he is hard, violent, and without humanity; if he is ruthlessly cruel in taking his own way; if his judgments of right and wrong are incorrect; and his likings and aversions are in despite of what is proper; if he oppresses inferiors, and claims merit (for doing so); courts superiors by gratifying their (evil) desires; receives favours without feeling grateful for them; broods over resentments without ceasing; if he slights and makes no account of Heaven's people¹; if he trouble and throw into disorder the government of the state; bestows rewards on the unrighteous and inflicts punishments on the guiltless; kills men in order to get their wealth, and overthrows men to get their offices; slays those who have surrendered, and massacres those who have made their submission; throws censure on the upright, and overthrows the worthy; maltreats the orphan and oppresses the widow; if he casts the laws aside and receives bribes; holds the right to be wrong and the wrong to be right; enters light offences as heavy; and the sight of an execution makes him more enraged (with the criminal); if he knows his faults and does not change them, or knows what is good and does not do it; throws the guilt of his crimes on others; if he tries to hinder the exercise of an art (for a living); reviles and slanders the sage and worthy; and assails and oppresses (the principles of) reason and virtue²;

¹ A Confucian phrase. See the *Lî K'î*, III, v, 13.

² One is sorry not to see his way to translate here—'Assails and oppresses those who pursue the Táo and its characteristics.' Julien gives for it—'Insulter et traiter avec cruauté ceux qui se livrent à l'étude de la Raison et de la Vertu.' Waters

if he shoots birds and hunts beasts, unearths the burrowing insects and frightens roosting birds, blocks up the dens of animals and overturns nests, hurts the pregnant womb and breaks eggs; if he wishes others to have misfortunes and losses; and defames the merit achieved by others; if he imperils others to secure his own safety; diminishes the property of others to increase his own; exchanges bad things for good¹; and sacrifices the public weal to his private advantage; if he takes credit to himself for the ability of others; conceals the excellences of others; publishes the things discreditable to others; and searches out the private affairs of others; leads others to waste their property and wealth; and causes the separation of near relatives²; encroaches on what others love; and assists others in doing wrong; gives the reins to his will and puts on airs of majesty; puts others to shame in seeking victory for himself; injures or destroys the growing crops of others; and breaks up projected marriages; if becoming rich by improper means makes him proud; and by a peradventure escaping the consequences of his misconduct, he yet feels no shame; if he owns to favours (which he did not confer), and puts off his errors (on others); marries away (his own) calamity to another, and sells (for gain) his own wickedness; purchases for himself empty praise; and keeps hidden dangerous purposes in his heart; detracts from the excel-

has—'Insults and oppresses (those who have attained to the practice of) Truth and Virtue.'

¹ It is a serious mistranslation of this which Mr. Balfour gives:— 'returns evil for good,' as if it were the golden rule in its highest expression.

² Literally, 'separates men's bones and flesh.'

lences of others, and screens his own shortcomings ; if he takes advantage of his dignity to practise intimidation, and indulges his cruelty to kill and wound ; if without cause he (wastes cloth) in clipping and shaping it ; cooks animals for food, when no rites require it ; scatters and throws away the five grains ; and burdens and vexes all living creatures ; if he ruins the families of others, and gets possession of their money and valuables ; admits the water or raises fire in order to injure their dwellings ; if he throws into confusion the established rules in order to defeat the services of others ; and injures the implements of others to deprive them of the things they require to use ; if, seeing others in glory and honour, he wishes them to be banished or degraded ; or seeing them wealthy and prosperous, he wishes them to be broken and scattered ; if he sees a beautiful woman and forms the thought of illicit intercourse with her ; is indebted to men for goods or money, and wishes them to die ; if, when his requests and applications are not complied with, his anger vents itself in imprecations ; if he sees others meeting with misfortune, and begins to speak of their misdeeds ; or seeing them with bodily imperfections he laughs at them ; or when their abilities are worthy of praise, he endeavours to keep them back ; if he buries the image of another to obtain an injurious power over him¹ ; or employs poison to kill trees ; if he is indignant and angry with his instructors ; or opposes and thwarts his

¹ The crimes indicated here are said to have become rife under the Han dynasty, when the arts of sorcery and witchcraft were largely employed to the injury of men.

father and elder brother ; if he takes things by violence or vehemently demands them ; if he loves secretly to pilfer, and openly to snatch ; makes himself rich by plunder and rapine ; or by artifice and deceit seeks for promotion ; if he rewards and punishes unfairly ; if he indulges in idleness and pleasure to excess ; is exacting and oppressive to his inferiors ; and tries to frighten other men ; if he murmurs against Heaven and finds fault with men ; reproaches the wind and reviles the rain ; if he fights and joins in quarrels ; strives and raises litigations ; recklessly hurries to join associate fraternities ; is led by the words of his wife or concubine to disobey the instructions of his parents ; if, on getting what is new, he forgets the old ; and agrees with his mouth, while he dissents in his heart ; if he is covetous and greedy after wealth, and deceives and befools his superiors (to get it) ; if he invents wicked speeches to calumniate and overthrow the innocent ; defames others and calls it being straightforward ; reviles the Spirits and styles himself correct ; if he casts aside what is according to right, and imitates what is against it ; turns his back on his near relatives, and his face to those who are distant ; if he appeals to Heaven and Earth to witness to the mean thoughts of his mind ; or calls in the spiritual Intelligences to mark the filthy affairs of his life ; if he gives and afterwards repents that he has done so ; or borrows and does not return ; if he plans and seeks for what is beyond his lot ; or lays tasks (on people) beyond their strength ; if he indulges his lustful desires without measure ; if there be poison in his heart and mildness in his face ; if he gives others filthy food to eat ; or by corrupt doc-

trines deludes the multitude; if he uses a short cubit, a narrow measure, light weights, and a small pint; mixes spurious articles with the genuine; and (thus) amasses illicit gain; if he degrades (children or others of) decent condition to mean positions; or deceives and ensnares simple people; if he is insatiably covetous and greedy; tries by oaths and imprecations to prove himself correct; and in his liking for drink is rude and disorderly; if he quarrels angrily with his nearest relatives; and as a man he is not loyal and honourable; if a woman is not gentle and obedient; if (the husband) is not harmonious with his wife; if the wife does not reverence her husband; if he is always fond of boasting and bragging; if she is constantly jealous and envious; if he is guilty of improper conduct to his wife or sons; if she fails to behave properly to her parents-in-law; if he treats with slight and disrespect the spirits of his ancestors; if he opposes and rebels against the charge of his sovereign; if he occupies himself in doing what is of no use; and cherishes and keeps concealed a purpose other than what appears; if he utter imprecations against himself and against others (in the assertion of his innocence)¹; or is partial in his likes and dislikes; if he strides over the well or the hearth; leaps over the food, or over a man²; kills newly-born children or brings about abortions³; if he does many actions of secret depravity; if he sings and dances on the

¹ The one illustrative story given by Julien under this clause shows clearly that I have rightly supplemented it. He translates it:—*'Faire des imprécations contre soi-même et contre les autres.'*

² Trifling acts and villainous crimes are here mixed together.

last day of the moon or of the year; bawls out or gets angry on the first day of the moon or in the early dawn; weeps, spits, or urinates, when fronting the north; sighs, sings, or wails, when fronting the fire-place; and moreover, if he takes fire from the hearth to burn incense; or uses dirty firewood to cook with; if he rises at night and shows his person naked; if at the eight terms of the year¹ he inflicts punishments; if he spits at a shooting star; points at a rainbow; suddenly points to the three luminaries; looks long at the sun and moon; in the months of spring burns the thickets in hunting; with his face to the north angrily reviles others; and without reason kills tortoises and smites snakes²:—

‘In the case of crimes such as these, (the Spirits) presiding over the Life, according to their lightness or gravity, take away the culprit’s periods of twelve years or of one hundred days. When his term of life is exhausted, death ensues. If at death there remains guilt unpunished, judgment extends to his posterity³.

¹ The commencements of the four seasons, the equinoxes and solstices.

² Many of the deeds condemned in this long paragraph have a ground of reason for their condemnation; others are merely offences against prevailing superstitions.

³ The principle enunciated here is very ancient in the history of the ethical teaching of China. It appears in one of the Appendixes to the *Yî King* (Sacred Books of the East, vol. xvi, p. 419), ‘The family that accumulates goodness is sure to have superabundant happiness; the family that accumulates evil is sure to have superabundant misery.’ We know also that the same view prevailed in the time of Confucius, though the sage himself does not expressly sanction it. This Tractate does not go for the issues of Retribution beyond the present life.

5. 'Moreover, when parties by wrong and violence take the money of others, an account is taken, and set against its amount, of their wives and children, and all the members of their families, when these gradually die. If they do not die, there are the disasters from water, fire, thieves, and robbers, from losses of property, illnesses, and (evil) tongues to balance the value of their wicked appropriations¹. Further, those who wrongfully kill men are (only) putting their weapons into the hands of others who will in their turn kill them².

Conclusion of
the whole
matter.

'To take to one's self unrighteous wealth is like satisfying one's hunger with putrid food³, or one's thirst with poisoned wine. It gives a temporary relief, indeed, but death also follows it.

'Now when the thought of doing good has arisen in a man's mind, though the good be not yet done, the good Spirits are in attendance on him. Or, if the thought of doing evil has arisen, though the evil be not yet done, the bad Spirits are in attendance on him.

'If one have, indeed, done deeds of wickedness, but afterwards alters his way and repents, resolved not to do anything wicked, but to practise reverently

¹ These sentences are rather weak. Nothing is said of any recompense to the parties who have been robbed. The thief is punished by the death of others, or the loss of property.

² A somewhat perplexing sentence. Julien gives for it:—'*Ceux qui font périr des hommes innocens ressemblent à des ennemis qui échangent leurs armes et se tuent les uns les autres*;' and Watters:—'*Those who put others to death wrongly are like men who exchange arms and slay each other.*'

³ Literally, 'soaked food that has been spoiled by dripping water.'

all that is good, he is sure in the long-run to obtain good fortune :—this is called changing calamity into blessing. Therefore the good man speaks what is good, contemplates what is good, and does what is good ; every day he has these three virtues :—at the end of three years Heaven is sure to send down blessing on him ¹. The bad man speaks what is wicked, contemplates what is wicked, and does what is wicked ; every day he has these three vices :—at the end of three years, Heaven is sure to send down misery on him ¹.—How is it that men will not exert themselves to do what is good ?'

¹ The effect of repentance and reformation is well set forth ; but the specification of three years, as the period within which the recompense or retribution will occur, is again an indication of the weakness in this concluding paragraph.

APPENDIXES.

APPENDIX I.

Khing Kǎng King, or 'The Classic of Purity¹.'

So I must translate the title of this brochure, as it appears in the 'Collection of the Most Important Treatises of the Táoist Fathers' (vol. xxxix, p. xvii), in which alone I have had an opportunity of perusing and studying the Text. The name, as given by Wylie (Notes, p. 178), Balfour (Táoist Texts), and Faber (China Review, vol. xiii, p. 246), is *Khing King King*², and signifies 'The Classic of Purity and Rest.' The difference is in the second character, but both *Khing Kǎng* and *Khing King* are well-known combinations in Táoist writings; and it will be seen, as the translation of the Text is pursued, that neither of them is unsuitable as the title of the little Book.

It is, as Dr. Faber says, one of the 'mystical canons' of Táoism; but the mysticism of Táoism is of a nature peculiar to itself, and different from any mental exercises which have been called by that name in connexion with Christianity or Mohammedanism. It is more vague and shadowy than any theosophy or Sûfism, just as the idea of the Táo differs from the apprehension of a personal God, however uncertain and indefinite that apprehension may be. Mr. Wylie says the work 'treats under very moderate limits of the subjection of the mental faculties.' This indeed is the consummation to which it conducts the student; a

清淨經.

清靜經.

condition corresponding to the nothingness which Láo-ze contended for as antecedent to all positive existence, and out of which he said that all existing being came, though he does not indicate how.

I give to the Treatise the first place among our appendixes here because of the early origin ascribed to it. It is attributed to Ko Yüan (or Hsüan)¹, a Taoist of the Wü dynasty (A. D. 222-277), who is fabled to have attained to the state of an Immortal, and is generally so denominated². He is represented as a worker of miracles; as addicted to intemperance, and very eccentric in his ways. When shipwrecked on one occasion, he emerged from beneath the water with his clothes unwet, and walked freely on its surface. Finally he ascended to the sky in bright day³. All these accounts may safely be put down as the figments of a later time.

It will be seen that the Text ascribes the work to Láo-ze himself, and I find it impossible to accept the account of its origin which is assigned by Lî Hsi-yüeh to Ko Hsüan. As quoted by Lî in the first of some notes subjoined to his Commentary, Ko is made to say, 'When I obtained the true Táo, I had recited this *K'ing* ten thousand times. It is what the Spirits of heaven practise, and had not been communicated to scholars of this lower world. I got it from the Divine Ruler of the eastern Hwa; he received it from the Divine Ruler of the Golden Gate; he received it from the Royal-mother of the West. In all these cases it was transmitted from mouth to mouth, and was not committed to writing. I now, while I am in the world, have written it out in a book. Scholars of the highest order, understanding it, ascend and become officials of Heaven; those of the middle order, cultivating it, are ranked among the Immortals of the Southern Palace; those of the lowest order, possessing it, get long years of life in the world, roam

¹ 葛元 or 葛玄.

² 葛仙公.

³ See the Accounts of Ko in the Biographical Dictionary of Hsiáo K'ih-han (1793), and Wang K'ü's supplement to the great work of Mâ Twan-lin, ch. 242.

through the Three Regions¹, and (finally) ascend to, and enter, the Golden Gate.'

This quotation would seem to be taken from the preface to our little classic by Ho Hsüan. If there were indeed such a preface during the time of the Wû dynasty, the corruption of the old Tâoism must have been rapid. The Hsi Wang-mû, or Royal-mother of the West, is mentioned once in *Kwang-ze* (Bk. VI, par. 7); but no 'Divine Ruler' disfigures his pages. Every reader must feel that in the *Classic of Purity* he has got into a different region of thought from that which he has traversed in the *Tâo Teh King* and in the writings of *Kwang-ze*.

With these remarks I now proceed to the translation and explanation of the text of our *King*.

Ch. 1. 1. Lâo the Master¹ said, The Great² Tâo has no bodily form, but It produced and nourishes heaven and earth³. The Great Tâo has no passions⁴, but It causes the sun and moon to revolve as they do.

The Great² Tâo has no name⁵, but It effects the growth and maintenance of all things³.

I do not know its name, but I make an effort, and call It the Tâo⁶.

¹ The name here is Lâo Kün (老君). I have stated (vol. xxxix, p. 40) that, with the addition of Thâi Shang, this is the common designation of Lâo-ze as the Father of Tâoism and deifying him, and that it originated probably in the Thang dynasty. It might seem to be used simply here by Ko Hsüan with the same high application; and since in his preface he refers to different 'Divine Rulers,' it may be contended that we ought to translate Lâo Kün by 'Lâo the Ruler.' But I am unwilling to think that the deification of Lâo-ze

¹ 'The three regions (三界)' here can hardly be the trilokya of the Buddhists, the ethical categories of desire, form, and formlessness. They are more akin to the Brahmanic bhuvanatraya, the physical or cosmological categories of bhûr or earth, bhuvaḥ or heaven, and svar or atmosphere.

had taken place so early. The earliest occurrence of the combination *Láo Kün* which has attracted my notice is in the history of Khung Yung, a descendant of Confucius in the twentieth generation,—the same who is celebrated in the *San 3ze King*, for his fraternal deference at the age of four, and who met with a violent death in A. D. 208. While still only a boy, wishing to obtain an interview with a representative of the *Láo* family, he sent in this message to him, 'My honoured predecessor and the honoured *Láo*, the predecessor of your *Lî* family, equally virtuous and righteous, were friends and teachers of each other.' The epithet *Kün* is equally applied to Confucius and *Láo-3ze*, and the combination *Láo Kün* implies no exaltation of the latter above the other.

² See *Táo Teh King*, chaps. 18, 25, 53.

³ *T. T. K.*, chaps. 1, 51, et al.

⁴ See *Kwang-3ze*, Bk. II, par. 2. 'Passions,' that is, feelings, affections; as in the first of the thirty-nine Articles.

⁵ *T. T. K.*, chaps. 1, 25, 32, 51.

⁶ *T. T. K.*, ch. 25.

2. Now, the *Táo* (shows itself in two forms); the Pure and the Turbid, and has (the two conditions of) Motion and Rest¹. Heaven is pure and earth is turbid; heaven moves and earth is at rest. The masculine is pure and the feminine is turbid; the masculine moves and the feminine is still². The radical (Purity) descended, and the (turbid) issue flowed abroad; and thus all things were produced¹.

The pure is the source of the turbid, and motion is the foundation of rest.

If man could always be pure and still, heaven and earth would both revert (to non-existence)³.

¹ This paragraph is intended to set forth 'the production of all things;' but it does so in a way that is hardly intelligible. Comparing what is said here with the utterances in the former paragraph, *Táo* would seem to be used in two

senses; first as an Immaterial Power or Force, and next as the Material Substance, out of which all things come. Lî Hsi-yüeh says that in the first member of par. 1 we have 'the Unlimited (or Infinite) producing the Grand (or Primal) Finite.' On the Táo in par. 2 he says nothing. The fact is that the subject of creation in the deepest sense of the name is too high for the human mind.

² Compare T. T. K., ch. 61.

³ I do not understand this, but I cannot translate the Text otherwise. Mr. Balfour has:—'If a man is able to remain pure and motionless, Heaven and Earth will both at once come and dwell in him.' Lî explains thus:—天清地靜一齊返入於無矣. Compare T. T. K., ch. 16, and especially Ho-shang Kung's title to it,—歸根.

3. Now the spirit of man loves Purity, but his mind¹ disturbs it. The mind of man loves stillness, but his desires draw it away¹. If he could always send his desires away, his mind would of itself become still. Let his mind be made clean, and his spirit will of itself become pure.

As a matter of course the six desires² will not arise, and the three poisons³ will be taken away and disappear.

¹ Táoism thus recognises in man the spirit, the mind, and the body.

² 'The six desires' are those which have their inlets in the eyes, ears, nostrils, the tongue, the sense of touch, and the imagination. The two last are expressed in Chinese by shān, 'the body,' and í, 'the idea, or thought.'

³ 'The three poisons' are greed, anger, and stupidity;—see the Khang-hsi Thesaurus, under 毒.

4. The reason why men are not able to attain to this, is because their minds have not been cleansed, and their desires have not been sent away.

If one is able to send the desires away, when he then looks in at his mind, it is no longer his; when he looks out at his body, it is no longer his; and when he looks farther off at external things, they are things which he has nothing to do with.

When he understands these three things, there will appear to him only vacancy. This contemplation of vacancy will awaken the idea of vacuity. Without such vacuity there is no vacancy.

The idea of vacuous space having vanished, that of nothingness itself also disappears; and when the idea of nothingness has disappeared, there ensues serenely the condition of constant stillness.

In this paragraph we have what Mr. Wylie calls 'the subjection of the mental faculties;' and I must confess myself unable to understand what it is. It is probably another way of describing the Táoist trance which we find once and again in *K'wang-¿ze*, 'when the body becomes like a withered tree, and the mind like slaked lime' (Bk. II, par. 1, et al.). But such a sublimation of the being, as the characteristic of its serene stillness and rest, is to me inconceivable.

5. In that condition of rest independently of place how can any desire arise? And when no desire any longer arises, there is the True stillness and rest.

That True (stillness) becomes (a) constant quality, and responds to external things (without error); yea, that True and Constant quality holds possession of the nature.

In such constant response and constant stillness there is the constant Purity and Rest.

He who has this absolute Purity enters gradually into the (inspiration of the) True Táo. And

having entered thereinto, he is styled Possessor of the T'ao.

Although he is styled Possessor of the T'ao, in reality he does not think that he has become possessed of anything. It is as accomplishing the transformation of all living things, that he is styled Possessor of the T'ao.

He who is able to understand this may transmit to others the Sacred T'ao.

This is the consummation of the state of Purity. In explaining the former sentence of the fifth member, Lî Hsî-yüeh uses the characters of T. T. K., ch. 4, 道冲而用之或不盈, with some variation, 一冲而用之, 不自满假.

2. 1. L'ao the Master said, Scholars of the highest class do not strive (for anything); those of the lowest class are fond of striving¹. Those who possess in the highest degree the attributes (of the T'ao) do not show them; those who possess them in a low degree hold them fast (and display them)². Those who so hold them fast and display them are not styled (Possessors of) the T'ao and Its attributes².

¹ Compare the T. T. K., ch. 41, 1.

² Compare the T. T. K., ch. 38, 1.

2. The reason why all men do not obtain the True T'ao is because their minds are perverted. Their minds being perverted, their spirits become perturbed. Their minds being perturbed, they are attracted towards external things. Being attracted towards external things, they begin to seek for them greedily. This greedy quest leads to perplexities and annoyances; and these again result in disordered

thoughts, which cause anxiety and trouble to both body and mind. The parties then meet with foul disgraces, flow wildly on through the phases of life and death, are liable constantly to sink in the sea of bitterness, and for ever lose the True Táo.

3. The True and Abiding Táo! They who understand it naturally obtain it. And they who come to understand the Táo abide in Purity and Stillness.

Our brief Classic thus concludes, and our commentator Lî thus sums up his remarks on it:—‘The men who understand the Táo do so simply by means of the Absolute Purity, and the acquiring this Absolute Purity depends entirely on the Putting away of Desire, which is the urgent practical lesson of the Treatise.’

I quoted in my introductory remarks Lî’s account of the origin of the Classic by its reputed author Ko Hsüan. I will now conclude with the words which he subjoins from ‘a True Man, 3o Hsüan:’—‘Students of the Táo, who keep this Classic in their hands and croon over its contents, will get good Spirits from the ten heavens to watch over and protect their bodies, after which their spirits will be preserved by the seal of jade, and their bodies refined by the elixir of gold. Both body and spirit will become exquisitely ethereal, and be in true union with the Táo!’

Of this ‘True Man, 3o Hsüan,’ I have not been able to ascertain anything. The Divine Ruler of the eastern Hwa, referred to on p. 248, is mentioned in the work of Wang K’i (ch. 241, p. 21^b), but with no definite information about him. The author says his surname was Wang, but he knows neither his name nor when he lived.

APPENDIX II.

Yin Fû King, or 'Classic of the Harmony of the Seen and the Unseen.'

In the *K'ien-lung* Catalogue of the Imperial Library, ch. 146, Part iii, this Book occupies the first place among all Tâoist works, with three notices, which all precede the account of Ho-shang Kung's Commentary on the Tâo Teh King. From the work of Lâo-ze we are conducted along the course of Tâoist literature to the year 1626, when the catalogue of what is called 'the Tâoist Canon'¹ appeared. Ch. 147 then returns to the Yin Fû King, and treats of nine other works upon it, the last being the Commentary of Lî Kwang-lî, one of the principal ministers and great scholars in the time of *K'ien-lung*'s grandfather, known as Khang-hsî from the name of his reign.

In the first of these many notices it is said that the preface of an old copy assigns the composition of the work to Hwang-Tî (in the 27th century B.C.), and says that commentaries on it had been made by Thâi-kung (12th century B.C.), Fan Lî (5th century B.C.), the Recluse of the Kwei Valley (4th century B.C.), Kang Liang (died B.C. 189), Kû Ko Liang (A. D. 181-234), and Lî K'wan of the Thang dynasty (about the middle of our 8th century)². Some writers, going back to the time of Hwang-Tî for the composition of our small classic, attribute it not to that sovereign himself, but to his teacher Kwang K'ăng-ze³;

¹ 道藏目錄詳註.

² See also Mâ Twan-lin's great work, ch. 211, p. 18^a.

³ See Kwang-ze, Bk. XI, par. 4.

and many of them hold that this Kwang *Kháng-jze* was an early incarnation of *Láo-jze* himself, so that the *Yin Fû* might well be placed before the *Táo Teh King*! *Lî Hsi-yüeh* is one of the scholars who adopt this view.

I will not say that under the *Káu* dynasty there was no book called *Yin Fû*, with a commentary ascribed to *Thái-kung*¹, for *Sze-mâ Khien*, in his biography of *Sû Khin* (Bk. lxi), relates how that adventurer obtained 'the *Yin Fû* book of *Káu*,' and a passage in the 'Plans of the Warring States' tells us that the book contained 'the schemes of *Thái-kung*¹.' However this may have been, no such work is now extant. Of all the old commentaries on it mentioned in the *Khien-lung* Catalogue, the only one remaining is the last,—that of *Lî Khwan*; and the account which we have of it is not to be readily accepted and relied on.

The story goes that in A. D. 441 *Khâu Khien-kih*, who had usurped the dignity and title of Patriarch from the *Kang* family, deposited a copy of the *Yin Fû King* in a mountain cave. There it remained for about three centuries and a half, till it was discovered by *Lî Khwan*, a Taoist scholar, not a little damaged by its long exposure. He copied it out as well as he could, but could not understand it, till at last, wandering in the distant West, he met with an old woman, who made the meaning clear to him, at the foot of mount *Lî*; after which he published the Text with a Commentary, and finally died, a wanderer among the hills in quest of the *Táo*; but the place of his death was never known².

The Classic, as it now exists, therefore cannot be traced higher than our eighth century; and many critics hold that, as the commentary was made by *Lî Khwan*, so the text was forged by him. All that *Hsi-yüeh* has to say in reply to this is that, if the classic be the work of *Lî Khwan*, then

¹ See the *Khang-hsî* Thesaurus under the combination *Yin Fû*.

² See the account of *Lî Khwan* in Wang *Khi*'s continuation of *Mâ Twan-lin*'s work, ch. 242; and various items in the *Khien-lung* Catalogue.

he must think of him as another Kwang *Khǎng-ze*; but this is no answer to the charge of forgery.

As to the name of the Treatise, the force of *Fû* has been set forth in vol. xxxix, p. 133, in connexion with the title of *Kwang-ze's* fifth Book. The meaning which I have given of the whole is substantially that of *Lî Hsî-yüeh*, who says that the Yin must be understood as including Yang, and grounds his criticism on the famous dictum in the Great Appendix to the *Yi King* (vol. xvi, p. 355), 'The successive movement of the Yin and Yang (their rest and active operation) constitutes what is called the course (of things).' Mr. Balfour translates the title by 'The Clue to the Unseen,' which is ingenious, but may be misleading. The writer reasons rather from the Unseen to the Seen than from the Seen to the Unseen.

Mr. Wylie gives his view of the object of the Treatise in these words:—'This short Treatise, which is not entirely free from the obscurity of Tâoist mysticism, professes to reconcile the decrees of Heaven with the current of mundane affairs.' To what extent the Book does this, and whether successfully or not, the reader will be able to judge for himself from the translation which will be immediately subjoined. *Lî Hsî-yüeh*, looking at it simply from its practical object, pronounces it '*hsiû lien kîh Shû*, a Book of culture and refining¹.' This language suggests the idea of a Tâoist devotee, who has sublimated himself by the study of this Book till he is ready to pass into the state of an Immortal. I must be permitted to say, however, that the whole Treatise appears to me to have come down to us in a fragmentary condition, with passages that are incapable of any satisfactory explanation.

Ch. 1. 1. If one observes the Way of Heaven¹, and maintains Its doings (as his own)², all that he has to do is accomplished.

¹ Dr. Williams explains '*hsiû lien* (修鍊 or 修煉)' as meaning 'becoming religious, as a recluse or ascetic.'

¹ To explain 'the Way of Heaven,' Lî Hsi-yüeh adduces the last sentence of the T. T. K., ch. 9, 'When the work is done, and one's name has become distinguished, to withdraw into obscurity is the Way of Heaven.'

² To explain 'the doings of Heaven,' he adduces the first paragraph of the symbolism of the first hexagram of the Yî, 'Heaven in its motion gives the idea of strength. In accordance with this, the superior man nerves himself to ceaseless activity.'

2. To Heaven there belong the five (mutual) foes¹, and he who sees them (and understands their operation) apprehends how they produce prosperity. The same five foes are in the mind of man, and when he can set them in action after the manner of Heaven, all space and time are at his disposal, and all things receive their transformations from his person².

¹ The startling name thieves (= foes, robbers) here is understood to mean the 'five elements,' which pervade and indeed make up the whole realm of nature, the heaven of the text including also earth, the other term in the binomial combination of 'heaven and earth.' According to the Taoist teaching, the element of Earth generates Metal, and overcomes Water; Metal generates Water, and overcomes Wood; Water generates Wood, and overcomes Fire; Wood generates Fire, and overcomes Earth. These elements fight and strive together, now overcoming, now overcome, till by such interaction a harmony of their influences arises, and production goes on with vigour and beauty.

² It is more difficult to give an account of the operation of the five elements in the mind of man, though I have seen them distributed among the five viscera, and the five virtues of Benevolence, Righteousness, Propriety, Knowledge, and Faith. Granting, however, their presence and operation in the mind, what shall be said on the two concluding members of the paragraph? There underlies them

the doctrine of the three coordinate Powers;—Heaven, Earth, and Man, which I have never been able to comprehend clearly.

3. The nature of Heaven belongs (also) to Man; the mind of Man is a spring (of power). When the Way of Heaven is established, the (Course of) Man is thereby determined.

These short and enigmatic sentences seem merely to affirm the general subject of the Treatise,—the harmony between the unseen and the seen.

4. When Heaven puts forth its power of putting to death, the stars and constellations lie hidden in darkness. When Earth puts forth its power of putting to death, dragons and serpents appear on the dry ground. When Man puts forth his power of putting to death, Heaven and Earth resume their (proper course). When Heaven and Man exert their powers in concert, all transformations have their commencements determined.

'The power of putting to death here' seems merely to indicate the 'rest' which succeeds to movement. The paragraph is intended to show us the harmony of the Three Powers, but one only sees its meaning darkly. The language of the third sentence about the influence of Man on Heaven and Earth finds its explanation from the phraseology of the *thwan* of the twenty-fourth hexagram of the *Yi* (vol. xvi, pp. 107, 108).

5. The nature (of man) is here clever and there stupid; and the one of these qualities may lie hidden in the other. The abuse of the nine apertures is (chiefly) in the three most important, which may be now in movement and now at rest. When fire arises in wood, the evil, having once begun, is sure to go on to the destruction of the wood. When

calamity arises in a state, if thereafter movement ensue, it is sure to go to ruin.

When one conducts the work of culture and refining wisely we call him a Sage.

The constitution of man is twofold ;—his mental constitution, quiet and restful, and his physical constitution, restless and fond of movement. The nine apertures are the eyes, ears, nostrils, mouth, and the lower parts, and of these the eyes, ears, and mouth are the most important ; but they all need to be kept in subjection and under restraint. If indulged beyond reason, the ruin of themselves and of the mind and body to which they belong is sure to ensue.

2. 1. For Heaven now to give life and now to take it away is the method of the T'ao. Heaven and Earth are the despoilers of all things ; all things are the despoilers of Man ; and Man is the despoiler of all things. When the three despoilers act as they ought to do, as the three Powers, they are at rest. Hence it is said, 'During the time of nourishment, all the members are properly regulated ; when the springs of motion come into play, all transformations quietly take place.'

Compare ch. I, par. 2. The mutual contention of the five elements in nature only conduces to the nourishment of all its parts ; and so man, as one of the three Powers, consumes only to increase his store, and throws down only to build up.

Where the concluding quotation is taken from is not known. Of course any quotation is inconsistent with the idea of the early origin of the Treatise.

2. Men know the mysteriousness of the Spirit's (action), but they do not know how what is not Spiritual comes to be so. The sun and moon have their definite times, and their exact measures as

large and small. The service of the sages here-upon arises, and the spiritual intelligence becomes apparent.

Compare par. 10 in the fifth Appendix to the *Yi King*.

3. The spring by which the despoilers are moved is invisible and unknown to all under the sky. When the superior man has got it, he strengthens his body by it; when the small man has got it, he makes light of his life.

The thing is good in itself, but its effect will be according to the character of its user, and of the use which is made of it.

3. 1. The blind hear well, and the deaf see well. To derive all that is advantageous from one source is ten times better than the employment of a host; to do this thrice in a day and night is a myriad times better.

That the loss of one sense may be in a manner compensated for by the greater cultivation of another,—in the case especially of the two senses specified,—is a fact; but I fail to perceive how this is illustrated by what follows in the rest of the paragraph. The illustration is taken from the seventh of the hexagrams in the *Yi*, but I have not discovered the nexus of it in the text of that classic or in the Appendixes on the *thwan* or *hsiang* of the hexagram.

It must be from this paragraph that the bearing of the *Treatise on the conduct of military operations* has been maintained.

2. The mind is quickened (to activity) by (external) things, and dies through (excessive pursuit of) them. The spring (of the mind's activity) is in the eyes.

Heaven has no (special feeling of) kindness, but so it is that the greatest kindness comes from It.

The crash of thunder and the blustering wind both come without design.

Mr. Balfour translates the first member here by—'The mind is produced from matter and dies with matter; the working faculty is in the eye;' and says that it embodies a bold denial of any future life, or the existence of spirit, apart from matter. The meaning of the Text, however, is only what I have given;—is moral and not metaphysical. The eye is singled out from the three most important apertures of the body in ch. I, par. 5.

The rest of the paragraph has its parallelisms in *Lão-ze* and *Kwang-ze*.

3. Perfect enjoyment is the overflowing satisfaction of the nature. Perfect stillness is the entire disinterestedness of it. When Heaven seems to be most wrapt up in Itself, Its operation is universal in its character.

A sequel to the preceding paragraph. *Lî Hsi-yüeh* observes that the having no feeling of kindness is equivalent to *Lão-ze*'s 'doing nothing.' See the *T. T. K.*, ch. 35, 'The *Táo* does nothing, and so there is nothing which It does not do.'

4. It is by its breath that we control whatever creature we grasp. Life is the root of death, and death is the root of life. Kindness springs from injury, and injury springs from kindness. He who sinks himself in water or enters amidst fire brings destruction on himself.

The first member of this paragraph is very difficult to construe. Mr. Balfour gives for it:—'The Laws affecting the animal creation reside in the Breath or Vital Fluid.' The first character of it properly denotes 'birds.' It is often found with another denoting 'quadrupeds;' and again it is found alone denoting both birds and beasts. It is also interchanged with another of the same name, denoting 'to

seize or grasp,' in which meaning I have taken it ; but the bearing of the saying on the general meaning of the Treatise I have not apprehended.

The next four sayings are illustrations of Láo-¿ze's 'contraries' of Táoism. The final saying is a truism ;— is it introduced here as illustrating that whatever is done with design is contrary to the Táo?

5. The stupid man by studying the phenomena and laws of heaven and earth becomes sage ; I by studying their times and productions become intelligent. He in his stupidity is perplexed about sageness ; I in my freedom from stupidity am the same. He considers his sageness as being an extraordinary attainment ; I do not consider mine so.

Some scholars have expunged this paragraph as not being genuine ; it is certainly difficult to construe and to understand.

6. The method of spontaneity proceeds in stillness, and so it was that heaven, earth, and all things were produced. The method of heaven and earth proceeds gently and gradually, and thus it is that the Yin and Yang overcome (each other by turns). The one takes the place of the other, and so change and transformation proceed accordingly.

K'ü Hsí praises this paragraph as very good, and the use of the character 3in ('proceeds gently and gradually') as exquisite. After all, what do we learn from it? That Creation proceeded without striving or crying? And that the same Creative Power continues to act in the same way?

7. Therefore the sages, knowing that the method of spontaneity cannot be resisted, take action accordingly and regulate it (for the purpose of culture). The way of perfect stillness cannot be subjected to numerical calculations ; but it would seem that there

is a wonderful machinery, by which all the heavenly bodies are produced, the eight diagrams, and the sexagenary cycle; spirit-like springs of power, and hidden ghostlinesses; the arts of the Yin and Yang in the victories of the one over the other:—all these come brightly forward into visibility.

I cannot say that I fully understand this concluding paragraph of the Yin Fû King. One thing is plain from it,—how the Yî King was pressed into the service of the Tāoism that prevailed when it was written. I leave it with the judgment on it, quoted by Lî Hsî-yüeh from a Lû 3hien-hsü. 'The subject-matter of the Yin Fû and Tāo Teh is all intended to set forth the action by contraries of the despoiling powers in nature and society. As to finding in them directions for the government of states, the conduct of war, and the mastery of the kingdom, with such expressions as those about a wonderful machinery by which the heavenly bodies are produced, the eight diagrams, the cycle, spirit-like springs, and hidden ghostlinesses:—they all have a deep meaning, but men do not know it. They who go to the Yin Fû for direction in war and use Lāo-ṣze for guidance in government go far astray from the meaning of both.'

APPENDIX III.

Yü Shû King, or 'The Classic of the Pivot of Jade.'

Mr. Wylie says (Notes, p. 179) that the Pivot of Jade is much used in the ritual services of Tâoism, meaning that it is frequently read in the assemblies of its monks. The object of the Treatise, according to Lî Hsi-yüeh, is 'to teach men to discipline and refine their spirit;' and he illustrates the name by referring to the North Star, which is called 'the Pivot of the Sky,' revolving in its place, and carrying round with it all the other heavenly bodies. So the body of man is carried round his spirit and by it, and when the spirit has been disciplined and refined, till it is freed from every obscuring influence, and becomes solid, soft, and strong as jade, the name, 'the Pivot of Jade,' is appropriate to it.

The name of the Treatise, when given at full length, is—'The True Classic of the Pivot of Jade, delivered by the Heaven-Honoured One, Who produces Universal Transformation by the Sound of His Thunder.' To this personage, as Wylie observes, the Tâoists attribute a fabulous antiquity, but there is little doubt that the author was a Hsüan-yang 3ze, about the time of the Yüan dynasty (A. D. 1280-1367). From the work of Wang K'î (ch. 243), we learn that this Hsüan-yang 3ze was the denomination of Âu-yang Yü-yüen, a scion of the famous Âu-yang family. What he says is to the following effect:—

1. The Heaven-honoured One says, 'All you, Heaven-endowed men, who wish to be instructed \

about the Perfect Táo, the Perfect Táo is very recondite, and by nothing else but Itself can it be described. Since ye wish to hear about it, ye cannot do so by the hearing of the ear :—that which eludes both the ears and eyes is the True Táo ; what can be heard and seen perishes, and only this survives. There is (much) that you have not yet learned, and especially you have not acquired this ! Till you have learned what the ears do not hear, how can the Táo be spoken about at all ?’

‘Heaven-honoured (Thien 3un)’ is a title given by the Táoists to the highest objects of their reverence and worship. Chalmers translates it by ‘Celestial Excellency,’ and observes that it is given to ‘all the Three Pure Ones ;’ but its application is much more extensive, as its use in this Treatise sufficiently proves. No doubt it was first adopted after the example of the Buddhists, by whom Buddha is styled ‘World-honoured,’ or ‘Ever-honoured’ (Shih 3un).

The phrase Thien Zăn, which I have translated here ‘Heaven-endowed Men,’ is common to the three religions of China ; but the meaning of it is very different in each. See the Confucian and the Táoist significations of it in the Khang-hsi Thesaurus, under the phrase. Here it means ‘the men possessed by the Táo ;—Táo-Zăn of the highest class.’ In a Buddhist treatise the meaning would be ‘Ye, devas and men.’

2. The Heaven-honoured One says, ‘Sincerity is the first step towards (the knowledge of) the Táo ; it is by silence that that knowledge is maintained ; it is with gentleness that (the Táo) is employed. The employment of sincerity looks like stupidity ; the employment of silence looks like difficulty of utterance ; the employment of gentleness looks like want of ability. But having attained to this, you may

forget all bodily form ; you may forget your personality ; you may forget that you are forgetting.'

'All this,' says Lî Hst-yüeh, 'is the achievement of vacuity, an illustration of the freedom from purpose which is characteristic of the Táo.' Compare par. 14 in the sixth Book of *Kwang-ïze*.

3. 'He who has taken the first steps towards (the knowledge of) the Táo knows where to stop ; he who maintains the Táo in himself knows how to be diligently vigilant ; he who employs It knows what is most subtle.

'When one knows what is most subtle, the light of intelligence grows (around him) ; when he can know how to be diligently vigilant, his sage wisdom becomes complete ; when he knows where to stop, he is grandly composed and restful.

'When he is grandly composed and restful, his sage wisdom becomes complete ; when his sage wisdom becomes complete, the light of intelligence grows (around him) ; when the light of intelligence grows around him, he is one with the Táo.

'This is the condition which is styled the True Forgetfulness ;—a forgetting which does not forget ; a forgetting of what cannot be forgotten.

'That which cannot be forgotten is the True Táo. The Táo is in heaven and earth, but heaven and earth are not conscious of It. Whether It seem to have feelings or to be without them, It is (always) one and the same.'

4. The Heaven-honoured One says, 'While I am in this world, what shall I do to benefit life ? I occupy myself with this subtle and precious Treatise for the good of you, Heaven-endowed men. Those

who understand it will be allowed to ascend to the happy seats of the Immortals.

‘Students of the Táo believe that there are (the influences of) the ether and of destiny. But the (conditions of) climate being different, the constitutions received by men are naturally different, and hence they are ascribed to the ether. And the (conditions of) wisdom and stupidity being different, their constitutions as fine and coarse are naturally different, and hence they are ascribed to the destiny. The destiny depends on fate; the ether depends on Heaven.

‘The restraints arising from the ether and destiny are the manacles decreed by Heaven. But if one acquire the True Táo, though stupid, he may become wise; though coarse, he may become fine;—if there only be the decree of fate.

‘Stupidity the darkest, and coarseness the densest, are consequences of climate; but the suffering of them and the changing of them may take place, when Heaven and Earth quicken the motive spring. When this is done without the knowledge of men, it is said to take place spontaneously. If it be done with a consciousness of that want of knowledge, it is still said to take place spontaneously. The mystery of spontaneity is greater than that of knowledge; but how it comes to be what it is remains a thing unknown. But as to the Táo, It has not begun to come under the influence of what makes stupid and coarse. Hear this all ye Heaven (-endowed) men; and let all the multitude in all quarters rejoice.’

It may be considered as a proof of the difficulty of the Text that to this long paragraph Lî Hsi-yüeh does not subjoin a single explanatory remark.

APPENDIX IV.

Zăh Yung King, or 'Classic of the Directory for a Day.'

I have nowhere found any mention of the author of this brief composition, or of its date. The use of Buddhistic expressions in it shows that it cannot have had a very early origin. It belongs to the same category of Tăoist writings as the *Kking Kăng King*, which is the first of these appendixes. *Lî Hsi-yüeh* says, 'The Treatise is called "the Directory for a Day," as showing that during all the hours (the *Tăo*) should not be left for a single instant (comp. the words of Confucius at the beginning of the *Kung Yung*). Let the work be done, and there is sure to be the result promised; only there must be the Purity insisted on both of body and mind. In the second paragraph it is said, "During the twelve hours of the day let the thoughts be constantly fixed on absolute Purity;" and in the last paragraph, "During the twelve hours be always pure and undefiled;"—thus showing what the main teaching of the Great Tăoistic system is, and the pre-eminent place which Purity occupies in the "Directory for a Day." The style is so clear and simple that I have left it without note or comment.'

1. As to what should be done in a day, when the eating and drinking has been arranged, let one sit straight with his mouth shut, and not allow a single thought to arise in his mind. Let him forget everything, and keep his spirit with settled purpose. Let

his lips be glued together, and his teeth be firmly pressed against one another. Let him not look at anything with his eyes, nor listen to a single sound with his ears. Let him with all his mind watch over his inward feelings. Let him draw long breaths, and gradually emit them, without a break, now seeming to breathe, and now not. In this way any excitement of the mind will naturally disappear, the water from the kidneys will rise up, the saliva will be produced in the mouth, and the real efficaciousness becomes attached to the body. It is thus that one acquires the way of prolonging life.

2. During the twelve hours of the day let one's thoughts be constantly fixed on absolute Purity. Where one thought (of a contrary kind) does not arise, we have what we call Purity; where nothing (of a contrary kind) enters the Tower of Intelligence (= the mind), we have what we call the Undeified. The body is the house of the breath; the mind is the lodging of the spirit. As the thoughts move, the spirit moves; as the spirit moves, the breath is distributed. As the thoughts rest, the spirit rests; when the spirit rests, the breath is collected.

The true powers of the five elements unite and form the boat-like cup of jade, (after partaking of which), the body seems to be full of delicious harmony. This spreads like the unguent of the chrismal rite on the head. Walking, resting, sitting, sleeping, the man feels his body flexible as the wind, and in his belly a sound like that of thunder. His ears hear the songs of the Immortals, that need no aid from any instrument; vocal without words, and resounding without the drum. The spirit and the breath effect a union and the bloom of

childhood returns. The man beholds scenes unfolded within him; Spirits of themselves speak to him; he sees the things of vacuity, and finds himself dwelling with the Immortals. He makes the Great Elixir, and his spirit goes out and in at its pleasure. He has the longevity of heaven and earth, and the brightness of the sun and moon. He has escaped from the toils of life and death.

Accustomed to the phraseology of the Text all his life, the commentator Lî, as has been seen, did not think it necessary to append here any notes of explanation. A few such notes, however, will be welcome to an English reader. 'The twelve hours of the day:'—a Chinese hour is equal to two of our hours, and their twelve to our twenty-four. The twelve hours are named by the twelve branch terms of the cycle.

'The boat-like cup of jade' seems to be a satisfactory rendering of the Chinese characters *tão kwei* in the Text, which might be translated 'knife, and jade-symbol.' But *tão*, commonly meaning 'knife,' is in the *Shih King* (I, v; VII, 2) used of 'a small boat.' In the *Khang-hsi Thesaurus*, under the phrase, we have the following quotation, as if from *Ko Hung's Biographies of Immortals*:—'*K'zân Hsi*, a native of the territory of *Wû*, was studying the *Tão in Shû*, when the master *Lão* sent a beautiful young lady to him with a tray of gold and a cup of jade filled with medicine, and the message, "This is the mysterious elixir; he who drinks it will not die." And on this he and his wife had each a *tão kwei*.' See the account in *Ko Hung's work*, which is much more diffuse.

In the mention of 'the chrismal rite' there is a reference to what Dr. Williams calls 'a kind of Buddhist baptism or holy unction, by sprinkling, which confers goodness,' 'administered to children, idols, &c.' (See under the characters *kwân* and *ting*.)

3. Do not allow any relaxation of your efforts. During all the hours of the day strive always to be

pure and undefiled. The spirit is the child of the breath ; the breath is the mother of the spirit.

As a fowl embraces its eggs, do you preserve the spirit and nourish the breath. Can you do this without intermission ? Wonderful ! wonderful ! The mystery becomes still deeper !

In the body there are seven precious organs, which serve to enrich the state, to give rest to the people, and to make the vital force of the system full to overflowing. Hence we have the heart, the kidneys, the breath, the blood, the brains, the semen, and the marrow. These are the seven precious organs. They are not dispersed when the body returns (to the dust). Refined by the use of the Great Medicine, the myriad spirits all ascend among the Immortals.

If we were sure that we had exactly hit the meaning and spirit of every part of this paragraph, it would hardly be worth while to give more space to its illustration.

A sufficient number of the best of the Treatises of the later Táoism have been placed before the reader to show him how different they are from the writings of Láo and Kwang, and how inferior to them. It might seem as if Kwang-ze, when he ceased to write, had broken the staff of Táoism and buried it many fathoms in the earth. We can hardly wonder that Confucianists, such as K'ü Hsi, should pronounce, 'What the sect of Táo chiefly attend to is,—the preservation of the breath of life ;' and that Buddhists, such as Liú Mî, should say of it, 'Long life being attained, its goal is reached.'

APPENDIX V.

Analyses by Lin Hsi-kung of several of the Books of *Kwang-ze*.

BOOK I.

The Hsiáo-yáo in the title of this Book denotes the appearance of perfect ease and satisfaction. The Yû, which conveys the idea of wandering or rambling about, is to be understood of the enjoyment of the mind. The three characters describe the chief characteristic of our 'Old Kwang's' life, and therefore he placed the Book at the beginning of his more finished compositions or essays.

But when one wishes to enjoy himself in the fullest and freest way, he must first have before him a view like that of the wide sea or of the expanse of the air, in order that his mind may be free from all restraint, and from the entanglements of the world, and that it may respond in the fitting way to everything coming before it:—it is only what is Great that can enter into this enjoyment. Throughout the whole Book, the word Great has a significant force.

In paragraph 1 we are presented with the illustration of the phăng. Long was the journey which it would undertake, when it contemplated removing to the South. That it required a wind of 90,000 lî to support it, and even then only rested after a flight of six months, was owing to its own Great size, and also because the Southern Ocean was not to be easily reached by a single effort.

What is said, in paragraph 2, about men, when going anywhere, proportioning the provisions which they take

with them to the length of the journey has the same meaning. How should such creatures as the cicada and the little dove be able to know this? Knowledge is great or small, because the years of the parties are many or few:—so it is that one is inferior to another. Have they not heard of the ming-ling and tâ-khūn, which make their spring and autumn for themselves? And so does the phǎng, as we may understand. Its not resting till the end of six months is really not a long time to it. The case of Phǎng 3û is not worth being taken into account.

This description of the greatness of the phǎng is not any fabrication of our author's own, nor any statement peculiar to the K'î Hsieh. The same things are told in the 'Questions of Thang to K'î,' as in paragraph 3.

As to the long journey of the phǎng and the marsh-quail's laughing at it, that is not different from what the other two little creatures said above;—arising simply from the difference between the great and the small. And what difference is there between this and the case of those who enjoy themselves for a season in the world? Yung-ze of Sung is introduced (and immediately dismissed), as not having planted himself in the right position, and not being Great. Then Lieh-ze is brought forward, and dismissed as not being Great, because he had something to wait for. It is only he who rides on the twofold primal ether of the Yin and Yang, driving along with the six elements through all their changes as they wax and wane, and enjoying himself at the gate of death, that can be pronounced Great. This is what is called the Perfect Man; the Spirit-like Man; and the Sage Man.

In illustration of this, as instances of the Great Man, we have, in paragraph 4, Hsü Yû, regardless of the name; the personage on the hill of K'û-shih, in paragraph 5, with no thought of the services he could perform; and Yáo with his deep-sunk eyes, in paragraph 6, no longer thinking much of his throne, and regardless of himself. All these characteristics could be used, and made their possessor great; but let not this lead to a suspicion of greatness as

incompatible with usefulness. As a caution against this, we have, in paragraph 7, the salve to keep the hands from being chapped;—a Great thing when used properly, but of little value when not so used. Let those who exercise their minds look at this:—should they not seek to be useful, and so become Great? We have also the weasel and the yak, the one of which gets into trouble by its being of use, while the other escapes harm by its being of no use. Let those who have work to do in the world look at this. The Great calabash and the Great tree are, each of them, a phăng:—why may we not abandon ourselves to our natural feeling of enjoyment in connexion with them? Let men be satisfied with their Greatness and seek for nothing more.

As to the style of the Book, the sudden statement and the sudden proof; the sudden illustration and the sudden reasoning; the decision, made to appear as no decision; the connexion, now represented as no connexion; the repetition, turning out to be no repetition:—these features come and go on the paragraphs, like the clouds in the open firmament, changing every moment and delightful to behold.

Lû Fang-hû describes it well:—‘The guiding thread in the unspun floss; the snake sleeping in the grass.’

BOOK II.

In writings intended to throw light on the Tào we find many different views, affirmations on one side and denials on the other. These may be called Controversies, and the reason why they are not adjusted is that every one will hold fast to his own view. But every peculiar view arises from the holder's knowledge. Such knowledge, however, tends to the injury of his mind, and serves no purpose, good or bad, in illustrating the nature of the Tào;—it only increases the confusion of controversy. Hence when we wish to adjust controversies, we must use our knowledge well; and to use our knowledge well, we must stop at the point beyond which it does not extend.

In this whole Book knowing and not knowing is the thread that runs through it, (and binds its parts together). The expressions about men's being 'in darkness,' in paragraph 2, and the Tâo's being 'obscure,' in paragraph 3, indicate the want of knowledge; those, also in paragraph 3, about 'the light of the mind,' and 'throwing that light on a subject,' indicate the good use of knowledge; those, in paragraph 5, about 'the scintillations of light from the midst of confusion and perplexity,' and 'the store of light,' in paragraph 7, indicate the stopping at the point to which our knowledge does not extend. And what is to be done when we stop at this point? Nothing more can be done; we have simply, as it is said in paragraph 6, to stop here.

When Nan-kwo 3ze-khi says, in paragraph 1, 'I had lost myself,' he fully expresses the subject-matter of the Book. If we think that the affirmations and denials made by men's minds are fictions, made out from nothing to be something, that is like the myriad different sounds of the wind, suddenly appearing in their innumerable variations. But who is it that produces all these sounds? As is said in paragraph 2, they are 'the sounds of Earth which are really the notes of Heaven.' The minds of men speak from their possession of knowledge. However great or small their words may be, they are all of their own making. A discourse under a thousand Heads with a myriad Particulars, suddenly arising and as suddenly stopping, may suggest the idea of what we call 'a True Ruler.' But the idea is vague, and though our knowledge does not reach to such a subject, men toil their intelligence to the end of their lives, never stopping till both mind and body are exhausted. What is the reason of this? It is because they have their 'minds completely made up (par. 3).'

Now if words were like the chirpings of very young birds that come upon the ear, there would be no difference between them as regards truth or falsehood, right or wrong; but there is some obscuring influence, through which the different views of the Literati and Mohists are produced, with their confusion and uncertainty. All this is because

the parties do not use their knowledge well. In their controversies each looks at the other's view only from his own standpoint, and throwing on the subject from that the light of Heaven, thus emptily replying to one another without end. And is this purposely intended to make a violent end of their disputations? (It is not so), for the Táo is originally one. High and low, beautiful and ugly, ordinary and strange, success and overthrow, have nothing to do with it. The intelligent know this; those who weary their minds in trying to bring about a unity do not know it. At this point the sages throw on the subject the light of Heaven, also wishing to rest in Heaven, and so they come to a natural union:—this is how they use their knowledge well.

And what are we to consider the highest reach of knowledge (see par. 5)? The ancients thought it necessary to place this in the time before anything began to be. A second class would have it that there had (always) been (some) things; and a third class held that between those things (and men) there had been a relativity. Thus it was that gradually there came differences of opinion, in affirmations and denials; and when these once arose, there could not but be the experiences of success and failure.

But any one-sidedness in controversy is not sufficient to be accounted a proof of success or of failure. Not only is the Táo radically one; but those who employ it, however they may seem to differ, will be found to be substantially one and the same. When the sages, in the midst of slippery confusion and doubtful perplexity, yet find the clearness of conviction, is it not because they place the controversies that we speak of among the things that are not to be used?

But if there were no affirmations and denials, there would be no words. And let me think here. Suppose there were no words of controversy, we must not infer from that that there were no words at all. Is this word correct? Then if I also employ it, I form one class with all who do so? Is it not correct? Then if I also deny it, I form another class with those who do the same. Formerly,

when speaking of men's words, I said that they should change places, and look at things from the different stand-points of each other ; so with reference to my own words, my holding my 'Yea,' does not interfere with my changing my place, and taking my position with those who say 'Nay' in the case. If indeed there be no words of affirmation and denial, what words will there be? We must go back to the beginning when there were no words. We must go back still farther,—to the vacuity before the beginning when there were no words. If we try to go back even farther still, then great and small, long life and short life, heaven and earth and all things, fade away, blending together in the One. But that ONE is also a word. In this way we go on without end, wishing to make an end of controversy, and instead of doing that, our endeavour only serves to increase it. The better plan is to stop, as is proposed in a former paragraph, to stop at this point.—Even this word about having no controversy may be spared.

The sage, by avoiding discussion, reasoning, and the drawing of distinctions, while he availed himself of words, yet retained the advantage of eschewing words, and was also afraid of calling the demarcations (of propositions) by their eight qualities (see par. 7). Still, however, the trace of the use of words remained with him. It is not so in the case of the Great Tào and the Great Argument. The Tào (which is displayed) is not the Tào ; the Argument (which is most subtle) does not reach the point ; the degree of Non-action is very great ; but notwithstanding it is difficult to speak of what is entirely empty of purpose. The way by which the knowledge of the ancients reached the highest point was their stopping when their knowledge extended no farther. If they could know what they did not know, it was by means of the Heavenly Treasure-house ; it was thus they could take their place in the centre of the circle, to which all lines converged, and from which all questions could be answered. If they added what they did know to the sum of what they did not know, they then

possessed the Store of Light; and it was thus that they made provision for the scintillations of slippery doubt.

To the same effect was what Shun told Yáo (end of par. 7). As to the referring what is advantageous and what is hurtful, and the mysteries of life and death, to the sphere of the unknown, that is set forth in the conversation between Nieh K'üeh and Wang Í (par. 8).

As to how it is that rulers and grooms, other men and one's self, do not know each other, that is seen in the conversation between K'ü 3hiáo-3ze and K'ang-wú 3ze.

As to what is said about the substance and shadow waiting on each to make their manifestations, and not knowing how they were brought about, and about the dreamer and the man awake doubting about each other, and not knowing how to distinguish between them, we have knowledge stopping at the point to which it does not extend, and gradually entering into the region of transformation.

Is there anything still remaining to be done for the adjustment of controversy? One idea grows up out of another in the Book, and one expression gives rise to another apparently quite different. There is a mutual connexion and reference between its parts. Suddenly the style is difficult as the slope of Yang-k'ang, and vanishes like the path of a bird; suddenly it looks like so many steep cliffs and successive precipices. When ordinary scholars see this and cannot trace the connexion of thought, if they put it on one side, and did not venture to say anything about it, they might be forgiven. But when they dare to follow their prejudices, and to append their licentious explanations, breaking up the connexion of thought, and bringing down to the dust this wonderful composition, the admiration of thousands of years;—ah! when the old Kwang took his pencil in hand, and proceeded to write down his thoughts, why should we be surprised that such men as these cannot easily understand him?

BOOK VI.

'The Great and most Honoured Master' is the Táo. It appears separately in the Heavenly and Human elements (of our constitution), and exists alone and entire in what is beyond death and life; being, as we say, that which nothing can be without. To describe it as that which stands out superior and alone, we use for it the character *Koh* (卓) (par. 5); to describe it as abiding, we call it the True; to describe it as it vanishes from sight, we apply to it the names of Purity, Heaven, and Unity (par. 12).

When men value it, it is possible to get possession of it. But he who wishes to get it must, with the knowledge which he has attained to, proceed to nourish what that knowledge is still ignorant of. When both of these are (as it were) forgotten, and he comes under the transformation of the Táo, he enters into the region in which there is neither life nor death;—to the Human element (in him) he has added the Heavenly.

Now what knowledge does not know is the time of birth and death, and what it does know is what comes after birth and precedes death. It would seem as if this could be nourished by the exercise of thought; but if we do this after birth and before death, we must wait for the time of birth and death to verify it. If we try to do so before that time, then the circumstances of the Human and the Heavenly have not yet become subject to their Ruler. It is this which makes the knowledge difficult, and it is only the True Man with the True Knowledge who has no anxiety about it.

In the position which the True man occupies, he has his adversities and prosperities, his successes and defeats, his gains and his losses, his seasons of security and of unrest,—all the changes of his circumstances; but his mind forgets them all, and this result is due to his possession of both the Knowledge and the Táo.

As to his bodily conditions, he has his sleeping and

awaking, his eating and resting,—his constant experiences; but his mind (also) forgets them all. For the springs of action which move to the touch of Heaven, and the movements of desire are indeed different in men; but when we advance and examine the proper home of the mind, we find no difference between its place and nature at the time of birth and of death, and no complication in these after birth and before death:—so it is that the Mind, the Tào, the Heavenly, and the Human are simply One. Is not the unconsciousness of the mind the way in which the True man exercises his knowledge and nourishes it? Carrying out this unconsciousness, from the mind to the body and from the body to the world, he comprehends the character of the time and the requirements of everything, without any further qualification. Hence, while the mind has not acquired this oblivion, the great work of life always suffers from some defect of the mind, and is not fit to be commended. But let the mind be able to exercise this quality, and it can be carried out with great and successful merit, and its admirable service be completed. This is the mind of the True man, never exercised one-sidedly in the world, and gaining no one-sided victory either Heavenward or Manward.

Given the True Man with the True Knowledge like this, the nature of death and life may begin to be fully described. Death and life are like the night and the dawn;—is there any power that can command them? Men cannot preside over them. This is what knowledge does not extend to; but within the sphere of knowledge, there is that which is dearer than a Father (par. 5), and more to be honoured than a Ruler; the Eminent, the True, and that moreover over which Heaven cannot preside. Valuable therefore is the nourishing of this Knowledge; and what other art in nourishing it is there but the unconsciousness of which we speak? Why do we say so? The body is born, grows old and dies. This is the common lot. However skilful one may be in hiding it away, it is sure to disappear. Men know that the body is not easily got, but

they do not know that what might seem like man's body never comes to an end. Being hidden away in a place from which there is no escape for anything, it does not disappear. This takes place after birth and before death, and may be verified at the times of birth and death; but how much better it is to consider Heaven good, old age good, the beginning good and the end good, than vainly to think that the nourishing of knowledge is making the body good! The doing this is what is called the Tào. And the sage enjoys himself in this; not only because the Tào itself does not disappear, but also because of all who have got it not a single one has ever passed away from notice.

But it is not easy to describe the getting of the Tào. In the case about which Nü Yü told Nan-po 3ze-khwei (par. 8); the talents of a sage and the Tào of a sage came together in the study of it; three, seven, and nine days are mentioned as the time of the several degrees of attainment; the learner went on from banishing all worldly matters from his mind as foreign to himself till he came to the utter disregard of time. In this way was he led from what was external, and brought inwards to himself; then again from the idea of the Tào's being a thing, it was exhibited as Tranquillity amid all Disturbances, and he was carried out of himself till he understood that neither death nor life is more than a phenomenon. The narrator had learned all this from writings and from Lo-sung, searching them, and ever more the more remote they were. Truly great is the difficulty of getting the Tào!

And yet it need not be difficult. It was not so with 3ze-yü (par. 9), in whose words about one arm being transformed into a fowl, and the other into a cross-bow, we see its result, as also in what he said about his rump-bone being transformed into a wheel, his spirit into a horse, and one loosing the cord by which his life is suspended.

(Again) we have a similar accordance (with the Tào) in 3ze-li's question to 3ze-lai (par. 10), about his being made the liver of a rat or the arm of an insect, with the latter's reply and his remark about the furnace of a founder.

These were men who had got the Táo; as also were 3ze-fan and *Khin Kang* (par. 11), men after the Maker's mind, and who enjoyed themselves, disporting in the one vital ether of heaven and earth.

The same may be said of Mǎng-sun 3hái (par. 12). If he had undergone a transformation, he would wait for the future transformation of which he did know. So it was that he obtained the Táo. He and all the others were successful through the use of their mental unconsciousness; and they who pursue this method, must have the idea of I-7 3ze, who wished to have his branding effaced, and his dismemberment removed by hearing the substance of the Táo (par. 13).

Parties who have not lost the consciousness of their minds and wish to do so must become like Yen Hui (par. 14), who separated the connexion between his body and mind, and put away his knowledge, till he became one with the Great Pervader.

Of such as have lost (in part) the consciousness of their minds and wish to do so entirely, we have an instance in 3ze-sang (par. 15), thinking of Heaven and Earth and of his parents as ignorant of his (miserable) condition, and then ascribing it to Destiny. He exhibited the highest obliviousness:—was he not, with the knowledge which he possessed, nourishing that of which he was ignorant? Such were the True Men, and such was the True Knowledge. ✕

In this Book are to be found the roots of the ideas in the other six Books of this Part. In this they all unite. It exhibits the origin of all life, sets forth the reality of all cultivation, and shows the springs of all Making and Transformation, throwing open the door for the Immortals and Buddhas. Here is the wonderful Elixir produced by the pestle of Jade, the touch of which by a finger produces the feathers of Transformation. As to its style, a vast lake of innumerable wavelets, the mingling of a hundred sparkling eddies, a collection of the oldest achievements in composition, a granary filled with all woods;—it is only in the ✕

power of those who admire the leopard's spots to appreciate it!

BOOK IX.

Governing the world is like governing horses. There is the government, but the only effect of it is injury. Po-lão's management of horses (par. 1) in a way contrary to their true nature was in no respect different from the way of the (first) potter and the (first) carpenter in dealing with their clay and wood in opposition to the nature of those substances, yet the world praises them all because of their skill, not knowing wherein the good government of the world consists.

Now the skilful governors of the world simply caused the people to fulfil the conditions of their regular nature (par. 2). It was their gifts which they possessed in common, and their Heaven-inspired instincts, which constituted the (Early) age of Perfect Virtue. When the sages fashioned their benevolence, righteousness, ceremonies, and music, and the people then began to lose their perfect virtue, it was not that they had themselves become different. For benevolence, righteousness, ceremonies, and music, are not endowments forming a part of their regular nature;—they are practised only after men have laid aside the Táo and its characteristics, and abandoned the guidance of their nature and its feelings. This is what we say that the mechanic does when he hacks and cuts the raw materials to form his vessels. Why should we doubt that it was by Po-lão's dealing with horses that they became wise enough to play the part of thieves (par. 3); and that it was by the sages' government of the people that their ability came to be devoted to the pursuit of gain? The error of the sages in this cannot be denied.

From beginning to end this Book is occupied with one idea. The great point in it grew out of the statement in paragraph 3 of the previous Book, that 'all men are furnished with certain regular principles,' and it is the easiest to construe of all Kwang-ze's compositions; but

the general style and illustrations are full of sparkling vigour. Some have thought that, where the ideas are so few, there is a waste of words about them, and they doubt therefore that the Book was written by some one imitating *Kwang-ze*; but I apprehend no other hand could have shown such a mastery of his style.

BOOK XI.

That the world is not well governed is because there are those who try to govern it. When they try to govern it, they cannot but be 'doing' (to that end). Unable to keep from this 'doing,' they cause the world to be happy or to be miserable, both of which things the instincts of man's nature refuse to accept. Although the arts of governing are many, they only cause and increase disorder. Why so? Because they interfere with men's minds.

Now when men are made to be miserable or happy, they come to have great joy or great dissatisfaction. The condition ministers to the expansive or the opposite element (in nature), and the four seasons, the cold and the heat, all lose their regularity. This causes men everywhere in a contentious spirit to indulge their nature to excess, bringing about a change of its attributes, and originating the practice of good and evil. All unite in bringing this state about; and in the end all receive its consequences. Hence such men as *Kih* the robber, *Žǎng Shǎn*, and *Shih Žhúi* ought not to be found in a well-governed age. But those who governed the world went on to distinguish between the good and the bad, and occupied themselves with rewarding and punishing. When they wished men to rest in the requirements of their nature, was it not difficult for them to realise the wish?

And how much more was it so when they went on in addition to insist on acute hearing and clear vision, on benevolence, righteousness, ceremonies, music, sageness, and knowledge (par. 2)! They did not know that these eight things were certainly of no use to the world, but injurious to it. Led astray by them, and not perceiving

this, they continued to practise them, and to do this every day more and more. This is what we see indeed in the ordinary men of the world, but not what we should have expected from superior men. The Superior man does nothing, and rests in the instincts of his nature. He values and loves his own person, which fits him to be entrusted with the charge of the world, and thereupon we see things becoming transformed of themselves. Yes, we see indeed that men's minds are not to be interfered with (par. 3).

Let me try to attest this from (the example of) the ancient Tîs and Kings. These in their interference with the minds of men, began with their inculcation of benevolence and righteousness, proceeded to their distinctions of what was right and wrong, and ended with their punishments and penalties. Their government of the world ended with the disordering of it. And the result can be seen, the Literati and the Mohists still thinking how they can remedy them.

But let us ask who it really was that brought things to this pass. The answer is supplied to us in the words of Láo Tan (see T. T. K., ch. 19), 'Abolish sageness and cast away wisdom, and the world will be brought to a state of good order.' But the issue does not commence with the state of the world. When Kwang K'ǎng-¿ze replied to Hwang-Tî's questions, he said (par. 4), 'Watch over your body, and increase the vigour of things. Maintain the unity, and dwell in the harmony.' What he said, about the rain descending before the clouds collected, about the trees shedding their leaves before they were yellow, about the light (of the sun and moon) hastening to extinction, about Hwang-Tî's mind being that of a flatterer of which he would make no account, and about how he should do nothing but rest in the instincts of his nature, and not interfere with the minds of men:—all these are expressions bearing on the value and love which should be given to the body. And the lesson in his words does not end with the watching over the body.

There are the words addressed by Hung Mung to Yün

K'iang, 'Nourish in your mind a great agreement (with the primal ether). (Things) return to their root, and do not know (that they are doing so). As to what you say, that "the mysterious operations of Heaven are not accomplished, that the birds all sing at night, that vegetation withers under calamity, and that insects are all overtaken by disaster:—about all these things there is no occasion for anxiety." While you do nothing, rest in the promptings of your human nature, and do not interfere with the minds of men;—such is the genial influence that attracts and gathers all things round itself (par. 2).'

But the Superior man's letting the world have its own course in this generous way;—this is what the ordinary men of the world cannot fathom. When such men speak about governing, they examine carefully between others and themselves, and are very earnest to distinguish between differing and agreeing. Their only quest is to find how they may overcome others, and the end is that they are always overcome by others. They do not know that in order to reduce others to the level of things, there must be those who cannot be reduced by others to that level. Those are said to be the sole possessors of the power (par. 6).

The teaching of the Great man, however, is not of this nature. He responds to others according to their qualities, without any selfish purpose. Although he is the sole possessor of the power, that power comes to be nothing in his view. Between having and not having there is to him no difference in the use. Doing nothing, and yet sometimes obliged to act, he forthwith does so; when he acts, yet no one sees that he has acted, and it is the same as if he did not act. So it is according to the Táo; but therein there are both the Heavenly and the Human elements. In accordance with this there are (in actual government) the Lord and the Minister (par. 7). When one discerns this, and knows which element is to be preferred, convinced that it is doing nothing which is valuable, what difficulty has he in governing the world?

The thread of connexion running through this Book is 'Doing Nothing.' Whether it speaks of the promptings of the nature or of the minds of men, it shows how in regard to both there must be this 'doing nothing.' In the end, with much repetition it distinguishes and discusses, showing that what doing there may be in doing nothing need not trouble us, and is not the same as the 'Extinction' of the Buddhists. There is not much difference between the teaching of this Book, and what we read in the Confucian Analects, 'He did nothing and yet governed efficiently (Bk. XV, ch. iv).' This is an instance of the light thrown by our 'old *Kwang*' on the *King*, and shows how an understanding may take place between him and our Literati.

In the style there are so many changes and transformations, so many pauses and rests as in music, conflicting discussions, and subtle disquisitions, the pencil's point now hidden in smoke and now among the clouds, the author's mind teeming with his creations, that no one who has not made himself familiar with a myriad volumes should presume to look and pronounce on this Book.

BOOK XX.

The afflictions of men in the world are great, because their attainments in the *Tao* and Its Attributes are shallow. The *Tao* with Its Attributes is the Author of all things. To follow It in Its transformings according to the time is not like occupying one's self with the qualities of things, and with the practice and teaching of the human relations, which only serve to bring on disaster and blame. He who seeks his enjoyment in It, however, must begin by emptying himself. Hence we have, 'Rip your skin from your body, cleanse your heart, and put away your desires (par. 2);' then afterwards 'you can enjoy yourself in the land of Great Vacuity.' In this way one attains to the status represented by coming across 'an empty vessel' and escapes 'the evils which the close-furred fox and the elegantly-spotted leopard' are preparing for themselves.

These are the ideas in the paragraph about *Î-lião* of

Shih-nan which may help to illustrate, and receive illustration from, what *Kwang-ze* says (par. 1) that 'he would prefer to be in a position between being fit to be useful and wanting that fitness.'

In the case of *Pei-kung Shê* collecting taxes for the making of a peal of bells, we have only the exercise of a small art (par. 3). He could, however, put away all thought of self, and act as the time required. He was 'as a child who has no knowledge,' so slow was he and hesitating in this respect; there escorting those who went, here welcoming those who came. But from all this we may know how far he had advanced (in the knowledge of the *Táo*).

But on consideration I think it was only Confucius of whom this could be spoken. Did not he receive a great share of the world's afflictions (par. 4)? When *Thái-kung Zăn* spoke to him of 'putting away the ideas of merit and fame, and placing himself on the level of the masses of men,' he forthwith put away the idea of himself and complied with the requirements of the time. This was the art by which he enjoyed himself in the *Táo* and Its attributes, and escaped the troubles of the world.

He could put away the idea of self in responding to the world, but he could not do so in determining his associations. In consequence of this, more distant acquaintances did not come to lay further afflictions on him, and his nearer friends perhaps came to cast him off because of those afflictions. What was he to do in these circumstances?

If one be able to comply with the requirements of the time in his relations with men, but cannot do so in his relations to Heaven, then in the world he will indeed do nothing to others contrary to what is right, but he will himself receive treatment contrary to it; and what is to be done in such a case? *Ze-sang Hû* saw the difficulty here and provided for it. What he said about 'a union of Heaven's appointment,' and about 'the intercourse of superior men being tasteless as water,' shows how well he knew the old lessons about a connexion growing out

of external circumstances and one founded in inward feeling. When one has divested himself of the idea of self, there will not again be such an experience as that of Confucius, when his intimate associates were removed from him more and more, and his followers and friends were more and more dispersed.

And Confucius himself spoke of such a case. What he said about its being 'easy not to receive (as evils) the inflictions of Heaven,' and 'difficult not to receive as benefits the favours of men (par. 7),' shows how truly he perceived the connexion between the Heavenly and the Human (in man's constitution), and between 'the beginning and end' of experiences. When one acts entirely according to the requirements of the time, the more he enlarges himself the greater he becomes, and the more he loves himself the more sorrow he incurs. If he do not do so, then we have the case of him who in the prospect of gain forgets the true instinct of his preservation, as shown in the strange bird of the park of Tião-ling (par. 8), and the case of the Beauty of the lodging-house, who by her attempts to show off her superiority made herself contemned. How could such parties so represented occupy themselves with the Táo and Its attributes so as to escape the calamities of life?

This Book sets forth the principles which contribute to the preservation of the body, and keeping harm far off, and may supplement what still needed to be said on this subject in Book IV. The Táo and Its attributes occupy the principal place in it; the emptying of Self, and conforming to the time, are things required by them. The exquisite reasonings and deep meaning of the Book supply excellent rules for getting through the world. Only the sixth paragraph is despicable and unworthy of its place. It is evidently a forgery, and I cannot but blame Kwo 3ze-hsüan for allowing it to remain as the production of K'wang-3ze.

BOOK XXII.

The Táo made Its appearance before Heaven and Earth.
It made things what they are and was Itself no THING,

being what is called their Root and Origin (par. 2). If we consider It something existing, It was not such; if we consider It as something non-existing, that does not fully express the idea of it. The 'I know it (of Hwang-Tî)' is an addition of 'Knowledge' to the idea of it, and (his) 'I will tell you' is the addition of a description of it (par. 1). Therefore he who would embody the Táo can only employ the names of 'Do Nothing' and 'Returning to the Root,' and then go forward to the region of the Unknown and the Indescribable.

Now the Táo originally was a Unity. The collection of the breath, constituting life, and its dispersion, which we call death, proceed naturally. The denominations of the former as 'spirit-like and wonderful' and of the latter as 'foetor and putridity' are the work of man. But those of 'Non-action' and 'Returning to the Root' are intended to do honour to the Unity. Knowledge, Heedless Bluster, and Hwang-Tî, all perceived this, but they also went on to reason about it, showing how not to know is better than to know, and not to talk better than to talk.

As it is said in par. 2, 'the beautiful operations of Heaven and Earth, and the distinctive constitutions of all things,' from the oldest time to the present day, go on and continue without any difference. But who is it that makes them to be what they are? And what expression of doubt or speculation on the point has ever been heard from them? It is plain that the doctrine of the Táo originated with man.

When Phei-î (par. 3) told Nieh K'üeh, 'Keep your body as it should be; look only at the One thing; call in your knowledge; make your measures uniform:'—all this was saying to him that we are to do nothing, and turn to (the Táo as) our Root. When he further says to him, 'You should have the simple look of a new-born calf; and not ask about the cause of your being what you are:'—this is in effect saying that knowledge is in not knowing, and that speech does not require the use of words.

If you suddenly (like Shun in par. 4) think that the Táo

is yours to hold, not only do you not know what the Táo is, but you do not know yourself. How is this? You are but a thing in the Táo. If your life came to you without its being produced by the Táo, you would yourself be a life-producer. But whether one lives to old age or dies prematurely he comes equally to an end. Your life properly was not from yourself, nor is your death your own act. You did not resist (the coming of your life); you do not keep it (against the coming of death); you are about to return to your original source. This simply is what is meant by the Sage's 'Do nothing, and return to your Root.' As to 'the bodily frame coming from incorporeity and its returning to the same (par. 5),' that certainly is a subject beyond the reach of our seeing and hearing; and how can any one say that the Táo is his to hold?

What Láo-ze (says to Confucius in par. 5), and what *K'äng* tells Shun (in par. 4), have not two meanings; but notwithstanding, it should not be said that the Táo is not to be found anywhere (par. 6). Speaking broadly, we may say that its presence is to be seen in an ant, a stalk of panic grass, an earthenware tile, and in excrement. Seeking for it in what is more delicate and recondite, let us take the ideas of fulness and emptiness, of withering and decay; of beginning and end, of accumulation and dispersion. These are all ideas, and not the names of things; and (the Táo) which makes things what they are has not the limit which belongs to things. No wonder that Tung-kwo Ze should have been so perplexed as he was!

Those who think that the Táo has no positive existence (par. 7), speak of it as 'The Mysterious and Obscure,' and then it would seem to be equivalent to the name 'Mystery,' which cannot be rightly applied to it. And those who think that it has a positive existence speak of it as being considered now noble and now mean, now bound and compressed, now dispersed and diffused, and what is One is divided into the noble and the mean, the compressed and the dispersed;—a mode of dealing with it, of which the Táo will not admit. Better is it to say with No-

beginning, 'There should be no asking about the Táo; any question about it should not be replied to.' The opposite of this would imply a knowledge of what is not known, and the use of words which should not be spoken. In accordance with this, when Star-light puts his question to Non-entity, and it is added, 'To conceive the ideas of Existence and Non-existence is not so difficult as to conceive of a Non-existing non-existence,' this is an advance on speaking of (the Táo) as Non-existent; and when the forger of Swords says to the Minister of War that by long practice he came to the exercise of his art as if he took no thought about it (par. 9), this is an advance on speaking of (the Táo) as existent.

The substance of what we know is to this effect:—The Táo was produced before heaven and earth. It made things what they are and is not itself a thing. It cannot be considered as of ancient origin or of recent, standing as it does in no relation to time. It had no beginning and will have no end. Life and death, death and life equally proceed from It. To speak of It as existing or as non-existing is a one-sided presentation of It. Those who have embodied It, amid all external changes, do not change internally. They welcome and meet all men and things, and none can do them any injury (par. 11). Whatever they do not know and are unequal to, they simply let alone. This is the meaning of 'Doing nothing, and turning in everything to the Root.' Where the want of knowledge and of language is the most complete, *Zăn Khiû* (par. 10) and *Yen-jze* (par. 11) apply to *Kung-nî* for his judgment in the case, and the consideration of it comes to an end.

In this Book the mysteries of the Táo are brought to light; one slight turn of expression after another reveals their successive depths, beyond the reach of Reasoning. *Lû Fang-hû* says, 'Master this Book, and the Mahâyâna of the Tripitaka will open to you at the first application of your knife.'—Well does he express himself!

BOOK XXVI.

Those who practise the Táo know that what is external to themselves cannot be relied on, and that what is internal and belonging to themselves, does not receive any injury (par. 1). They are therefore able to enjoy themselves in the world, emptying their minds of all which would interfere with their pursuing their natural course.

What men can themselves control are their minds; external things are all subject to the requirements and commands of the world. Good and evil cannot be prevented from both coming to men, and loyalty and filial duty may find it hard to obtain their proper recompense. From of old it has been so; and the men of the world are often startled to incessant activity with their minds between the thoughts of profit and injury, and are not able to overcome them (par. 1). But do they know that among the enemies (of their serenity) there are none greater than the Yin and Yang? The water and fire of men's minds produce irregularity in their action, and then again overcome it; but after the harmony of the mind has been consumed, there remains in them no more trace of the action of the Táo.

On this account, when *Kung-ní* was obstinately regardless of a myriad generations (in the future), *Lão Lái-ze* still warned him to have done with his self-conceit (par. 5). His reason for doing so was that wisdom had its perils, and even spirit-like intelligence does not reach to everything (par. 6). It was so with the marvellous tortoise, and not with it only. The sage is full of anxiety and indecision (par. 5), and thereby is successful in his undertakings; the man of the greatest knowledge puts away (the idea of) skill, and without any effort shows his skill:—they can both look on what seems to have no use and pronounce it useful, and allow their nature while it is able to enjoy itself to take its course without being anxious about its issue in advantage or injury (par. 1).

And moreover, it is not necessary that they should leave

the world in order to enjoy themselves. There are the distinctions of antiquity and the present day indelibly exhibited in the course of time (par. 8). The way in which the Perfect man enjoys himself is by his passing through the world of men without leaving any trace of himself. His way is free and encounters no obstruction (par. 9); his mind has its spontaneous and enjoyable movements, and so his spirit is sure to overcome all external obstructions. Very different is this from the way of him who is bent on concealing himself, and on extinguishing all traces of his course (par. 8). He will seek his enjoyment in the great forest with its heights and hills, and not be able to endure the trouble of desiring fame, having recourse also to violence, laying plans, seeking to discharge the duties of office so as to secure general approval.

Thus the Perfect man obtains the harmony of his Heaven (-given nature), and his satisfactions spring up, he knows not how, as when the growing grain in spring has been laid by the rains (par. 9). As to the arts of curing illness, giving rest to old age, and restraining hasty measures to remedy the effects of errors, he can put them on one side, and not discuss them; thus playing the part of one who has apprehended the ideas and then forgets the words in which they were conveyed (par. 11). Let him who occupies himself with the Táo beware of 'seeking the fish-baskets and hare-snares,' and falling into such mistakes as are instanced in the cases of emaciation to death, or suicide by drowning.

This Book points out the true form of substances, and gave rise to the talk in subsequent ages about the Khân and Lî hexagrams, and about the lead and quicksilver. Nearly the whole of it has been called in question, and the second, third, and fourth paragraphs are so marked by the shallowness of their style, and the eccentricity of their sentiments, that it may be doubted if they are genuine. I suspect they were written and introduced by some imitator of Kwang-jze, and therefore call attention to them and cast them out of my analysis.

BOOK XXXII.

Lin Hsi-kung omits Books XXVIII, XXIX, XXX, and XXXI from his edition of *Kwang-ze's* Writings. Our Book XXXII, the *Lieh Yü-khâu*, is with him Book XXVIII. He explains and comments on its various paragraphs as he does in the case of all the previous Books. Instead of subjoining an Analysis and Summary of the Contents in his usual way, he contents himself with the following note:—

In the Notice given by *Sû 3ze-kan*¹ of the Sacrificial Hall to *Kwang-ze*, he says that after reading the last paragraph of Book XXVII (the *Yü Yen*, or 'Metaphorical Words'), about Yang 3ze-kü, and how (when he left the inn) the other visitors would have striven with him about the places for their mats, he forthwith discarded the four Books that followed,—the *Zang Wang*, the *Táo Kih*, the *Yüeh Kien*, and the *Yü-fû*; making the *Lieh Yü-khâu* immediately follow that paragraph. Having done so, he fully saw the wisdom of what he had done, and said with a laugh, 'Yes, they do indeed belong to one chapter!'

So did the old scholar see what other eyes for a thousand years had failed to see. No subsequent editor and commentator, however, ventured to take it on him to change the order of the several Books which had been established, following therein the Critical Canon laid down by Confucius about putting aside subjects concerning which doubts are entertained²; but we ought not to pass the question by without remark.

The subject of the last paragraph of the *Lieh Yü-khâu* is *Kwang-ze*, 'when he was about to die.' It clearly

¹ *Sû Shih* (蘇軾), styled 3ze-kan (子瞻) and also, and more frequently, Tung-pho (東坡), one of the most celebrated statesmen and scholars of the eleventh century (1036–1101). The notice of the Sacrificial Hall of *Kwang-ze* was written in 1078. See Appendix viii.

² See the Confucian *Analects* II, xviii:—'Learn much and put aside the points of which you stand in doubt, while you speak cautiously at the same time of the others.'

intimates how he, the man of *K'hi-yüan*, from that time ceased to use his pencil, just as the appearance of the *Lin* (in the *3o-kwan*) did in the case of Confucius. Not a single character therefore should appear as from him after this. We have no occasion therefore to enter into any argument about the *Thien Hsiâ* (Book XXXIII). We may be sure that it was made, not by *Kwang-ze*, but by some editor of his writings. Later writers, indeed, contend vehemently for *Kwang-ze*'s own authorship of it. We can only say, Great is the difficulty in treating of the different views of Scholars¹!

¹ The arguments both of *Sü Shih* and *Lin Hsi-kung* as set forth in this note are far from conclusive.

APPENDIX VI.

List of Narratives, Apologues, and Stories of various kinds in the Writings of *Kwang-ze*.

BOOK I.

Paragraph 1. The enjoyment of the Tào by such vast creatures as the Khwăn and the Phăng.

2. The enjoyment and foolish judgments of smaller creatures. Big trees and Phăng 3û.

3. Questions put by Thang to Kî. The Tào in different men:—Yung-ze; Lieh-ze; and an ideal Tàoist. The Perfect man, the Spirit-like man, and the Sagely-minded man.

4. Yáo wishing to resign the throne to Hsü Yû.

5. Kien Wû and Lien Shû on the ideal Tàoist.

6. A cap-seller of Sung. Yáo after visiting the four Perfect ones.

7. Hui-ze and Kwang-ze:—the great calabashes; the hand-protecting salve; and the great Ailantus tree.

BOOK II.

Par. 1. Nan-kwo 3ze-khî in a trance, and his disciple. The notes of heaven, earth, and man.

4. 'In the morning three:—the monkeys and their acorns.

7. Yáo and Shun,—on the wish of the former to smite some small states.

9. Li Kî before and after her marriage.

10. The penumbra and the shadow. Kwang-ze's dream that he was a butterfly.

BOOK III.

Par. 2. King Wăn-hui and his cook ;—how the latter cut up his oxen.

3. Kung-wăn Hsien and the Master of the Left who had only one foot.

4. The death of Lâu-ze; and adverse judgment on his life.

BOOK IV.

Pars. 1, 2. Yen Hui and Confucius ;—on the proposal of the former to go and convert the ruler of Wei.

3, 4. 3ze-kão and Confucius ;—on the mission of the former from *Khû* to *Khî*.

5. Yen Ho and K'ü Po-yü ;—on the former's undertaking to be tutor to the wayward son of duke Ling of Wei.

6. The master-mechanic and the great tree ;—so large and old through its uselessness.

7. Nan-po 3ze-khî and the great tree, preserved by its uselessness. Trees of Sung cut down because of their good timber. Peculiarities exempting from death as sacrificial victims.

8. The deformed object Shû and his worth.

9. Rencontre between Confucius and the madman of *Khû*.

BOOK V.

Par. 1. Confucius explains the influence of the cripple Wang Thâi over the people of Lû.

2. The fellow-students 3ze-khân and the cripple Shân-thû Kiâ.

3. Confucius and Toeless of Shû-shan. Judgment of Toeless and Lâu-ze on Confucius.

4. Duke Âi of Lû and Confucius ;—on the ugly but most able and fascinating man, Âi-thâi Tho. Admiration for Confucius of duke Âi.

5. The deformed favourites of duke Ling of Wei and duke Hwan of *Khî*. Argument between Kwang-ze and Hui-ze, growing out of the former's account of them.

BOOK VI.

Par. 8. Nan-po 3ze-khwei and the long-lived Nü Yü. How Pù-liang Í learned the Táo.

9. Four Táoists, and the submission of 3ze-yü, one of them, a poor deformed hunchback, to his lot, when he was very ill.

10. The submission of 3ze-lái, another of the four, as his life was ebbing away.

11. Three Táoists, and the ways of two of them on the death of the third. Conversation on the subject between Confucius and 3ze-kung.

12. Confucius and Yen Hui on the mourning of Mǎng-sun 3hái.

13. Í-r 3ze and Hsü Yü. How the Táo will remove the injuries of error, and regenerate the mind.

14. Confucius and Yen Hui. The growth of the latter in Táoism.

15. 3ze-yü and 3ze-sang. The penury of the latter and submission to his fate.

BOOK VII.

Par. 1. Nieh K'üeh, Wang Í, and Phû-î-3ze. That Shun was inferior in his Táoistic attainments to the more ancient sovereign, Thâi.

2. Kien Wû and the recluse K'ieh-yü;—on the ideal of government.

3. Thien Kǎn and a nameless man;—that non-action is the way to govern the world.

4. Yang 3ze-kü and Láo Tan on the nameless government of the Intelligent Kings.

5. Lieh-3ze and his master Hû-3ze. How the latter defeated the wizard of Kǎng.

6. The end of Chaos, wrought by the gods of the southern and northern seas.

BOOK VIII.

Par. 4. How two shepherd slaves lose their sheep in

different ways. The corresponding cases of the righteous Po-î and the robber Kih.

BOOK X.

Par. 1. Murder of the ruler of *Khi* by Thien *Khăng-ze*, and his usurpation of the State.

2. How the best and ablest of men, such as Lung-făng, Pî-kan, *Khang Hung*, and *Ze-hsü*, may come to a disastrous end, and only seem to have served the purposes of such men as the robber *Kih*.

3. Evils resulting from such able men as *Žăng Shăn*, Shih *Khiu*, Yang *Ku*, Mo *Ti*, Shih *Khwang*, *Khui*, and *Lî Ku*.

4. Character of the age of Perfect Virtue, and sovereigns who flourished in it in contrast with the time of *Kwang-ze*.

BOOK XI.

Par. 3. *Žhui Khiu* and *Lăo-ze*. The latter denounces the meddling with the mind which began with *Hwang-Ti*, and the spread of knowledge, as productive of all evil.

4. *Hwang-Ti* and *Kwang Khăng-ze*, his master, who discourses on the mystery of the *Tăo*, and how it promotes long life.

5. *Yün Kiang* and *Hung Mung*, or the Leader of the Clouds and the Great Ether;—the wish of the former to nourish all things, and how they would be transformed by his doing nothing.

BOOK XII.

Par. 4. The loss and recovery by *Yăo* of his dark-coloured Pearl;—the *Tăo*.

5. *Hsü Yü*'s reply to *Yăo* on the character of *Nieh Kueh* and his unfitness to take the place of Sovereign.

6. *Yăo* rejects the good wishes for him of the Border-warden of *Hwă*.

7. *Yü* and *Po-khăng Ze-kăo*. The latter vindicates his resignation of dignity and taking to farming.

9. Confucius and *Lăo-ze*;—on the attitude to the *Tăo* of a great sage and ruler.

10. *K'iang-lü Mien* and *K'î K'hêh*;—on the counsel which the former had given to the ruler of *Lû*.

11. *3ze-kung* and the old gardener;—argument of the latter in favour of the primitive simplicity, and remarks thereon by *Confucius*.

12. *Kun Mâng* and *Yüan Fung*;—on the government of the sage; of the virtuous and kindly man; and of the spirit-like man.

13. *Măn Wû-kwei* and *K'ih-kang Man-k'hi*;—that there had been confusion and disorder before the time of *Shun*; and the character of the age of Perfect Virtue.

BOOK XIII.

Par. 6. *Yáo* and *Shun*;—on the former's method of government.

7. *Confucius*, wishing to deposit some writings in the royal Library, is repulsed by *Láo-ze*. Argument between them on Benevolence and Righteousness in relation to the nature of man.

8. *Shih-k'ang K'hi* and *Láo-ze*;—the strange conferences between them, and the charges brought by the one against the other.

10. Duke *Hwan* and the wheelwright *Phien*;—that the knack of an art cannot be conveyed to another, and the spirit of thought cannot be fully expressed in writing.

BOOK XIV.

Par. 2. *Tang*, a minister of *Shang*, and *Kwang-ze* on the nature of Benevolence.

3. *Pei-măn K'ang* and *Hwang-Ti*;—a description of *Hwang-Ti*'s music, the *Hsien-k'hi*.

4. *Yen Yüan* and *Kin*, the music-master of *Lû*, on the course of *Confucius*;—the opinion of the latter that it had been unsuccessful and was verging to entire failure.

5. *Confucius* and *Láo-ze*. The former has not yet got the *Táo*, and *Láo-ze* explains the reason.

6. *Confucius* and *Láo-ze*. *Confucius* talks of Benevolence

and Righteousness ; and how the tables are turned on him. He is deeply impressed by the other.

7. 3ze-kung, in consequence of the Master's report of his interview, goes also to see Láo-3ze ; and is nonplussed and lectured by him.

8. Confucius sees Láo-3ze again, and tells him how he has profited from his instructions. The other expresses his satisfaction with him.

BOOK XVI.

Par. 2. The state of Perfect Unity, and its gradual Decay.

BOOK XVII.

Pars. 1-7. The Spirit-earl of the Ho and Zo of the Northern Sea ;—on various metaphysical questions growing out of the doctrine of the Táo.

8. The khwei, the millipede, the serpent, the wind, the eye, and the mind ;—how they had their several powers, but did not know how.

9. Confucius in peril in Khwang is yet serene and hopeful.

10. Kung-sun Lung and Máu of Wei. The Frog of the dilapidated well, and the Turtle of the Eastern Sea. The greatness of Kwang-3ze's teachings.

11. Kwang-3ze refuses the invitation of the king of K'û to take office. The wonderful tortoise-shell of the king.

12. Hui-3ze and Kwang-3ze. The young phoenix and the owl.

13. Hui-3ze and Kwang-3ze ;—how Kwang-3ze understood the enjoyment of fishes.

BOOK XVIII.

Par. 2. Hui-3ze and Kwang-3ze ;—vindication by the latter of his behaviour on the death of his wife.

3. Mr. Deformed and Mr. One-foot ;—their submission under pain and in prospect of death.

4. Kwang-3ze and the skull ;—what he said to it, and its appearance to him at night in a dream.

5. The sadness of Confucius on the departure of Yen Hui for *K'hi*; and his defence of it to *3ze-kung*. The appearance of a strange bird in *Lú*, and his moralizings on it.

6. *Lieh-3ze* and the skull. The transmutations of things.

BOOK XIX.

Par. 2. *Lieh-3ze* and *Kwan Yin*;—on the capabilities of the Perfect man.

3. Confucius and the hunchback, who was skilful at catching cicadas with his rod.

4. The boatman on the gulf of *K'ang-shǎn*, and his skill.

5. *Thien Khái-k'ih* and duke *Wei* of *K'áu*;—on the best way to nourish the higher life. How it was illustrated by *Thien's* master, and how enforced by Confucius.

6. The officer of sacrifice and his pigs to be sacrificed.

7. Duke *Hwan* gets ill from seeing a ghostly sprite, and how he was cured.

8. The training of a fighting-cock.

9. Confucius and the swimmer in the gorge of *Lü*.

10. *K'ing*, the worker in rottlera wood, and the bell-frame;—how he succeeded in making it as he did.

11. *Tung-yê K'î* and his chariot-driving;—how his horses broke down.

12. The skill of the artisan *Shui*.

14. The weakling *Sun Hsiû* and the Master *3ze-pien K'ing-3ze*, with his disciples.

BOOK XX.

Par. 1. *K'wang-3ze* and his disciples;—the great tree that was of no use, and the goose that could not cackle.

2. *Î-lião* of *Shih-nan* and the marquis of *Lû*;—how the former presses it on the marquis to go to an Utopia of Táoism in the south, to escape from his trouble and sorrow.

3. *Pei-kung Shê* and prince *K'ing-k'î*;—how the former collected taxes and made a peal of bells.

4. How the *Thái-kung Zǎn* condoled with Confucius on his distresses, and tried to convert him to Táoism.

5. Confucius and 3ze-sang Hû. The Táoistic effect of their conversation on the former. The dying charge of Shun to Yü.

6. Kwang-3ze in rags before the king of Wei. The apologue of the climbing monkey.

7. Confucius and Yen Hui;—on occasion of the perilous situation between *Khăn* and 3hái. Confucius expounds the principles that supported him.

8. Kwang-3ze's experiences in the park of Tiáo-ling;—has the character of an apologue.

9. The Innkeeper's two concubines;—the beauty disliked and the ugly one honoured.

BOOK XXI.

Par. 1. Thien 3ze-fang and the marquis Wăn of Wei.

2. Wăn-po Hsüeh-3ze and the scholars of the Middle States.

3. Confucius and Yen Hui;—on the incomprehensibleness to the latter of the Master's course.

4. Conversation between Confucius and Láo-3ze on the beginning of things.

5. Kwang-3ze and duke Âi of Lû;—on the dress of the scholar.

6. Pâi-lî Hsi.

7. The duke of Sung and his map-drawers.

8. King Wăn and the old fisherman of 3ang. Confucius and Yen Hui on king Wăn's dream about the fisherman.

9. The archery of Lieh-3ze and Po-hwăn Wû-zăn.

10. Kien Wû, and Sun Shû-áo, the True man. Confucius's account of the True man. The king of *Khû* and the ruler of Fan.

BOOK XXII.

Par. 1. Knowledge, Dumb Inaction, Head-strong Stammerer, and Hwang-Tî on the Táo.

3. Nieh *Khüeh* questioning Phei-î about the Táo.

4. Shun and his minister *Khăng*;—that man is not his own.

5. Confucius and Láo Tan ;—on the Perfect Táo.
6. Tung-kwo 3ze's question to Kwang-3ze about where the Táo was to be found, and the reply.
7. Á-ho Kan, Shán Nǎng, Láo-lung K'i, Yen Kang ;—Grand Purity, Infinitude, Do-nothing, and No-beginning :—on what the Táo is.
8. Star-light and Non-entity.
9. The Minister of War and his forger of swords.
10. Zǎn K'hiù and Confucius ;—how it was before heaven and earth.
11. Confucius and Yen Hui :—No demonstration to welcome, no movement to meet.

BOOK XXIII.

- Par. 1. Kǎng-sang K'hiù and the people about Wei-lêi hill.
2. Kǎng-sang K'hiù and his disciples. He repudiates being likened by them to Yáo and Shun.
 3. Kǎng-sang K'hiù and the disciple Nan-yung K'hiù.
 - 4-12. Láo-3ze lessoning Nan-yung K'hiù on the principles of Táoism.

BOOK XXIV.

- Pars. 1, 2. Hsü Wû-kwei, Nü Shang, and the marquis Wû of Wei :—Hsü's discourses to the marquis.
3. Hwang-Ti, with six attending sages, in quest of the Táo, meets with a wise boy herding horses.
 5. Debate between Kwang-3ze and Hui-3ze, illustrating the sophistry of the latter.
 6. The artisan Shih cleans the nose of a statue with the wind of his axe ; but declines to try his ability on a living subject.
 7. Advice of Kwan Kung on his death-bed to duke Hwan of K'hi about his choice of a successor to himself.
 8. The king of Wû and the crafty monkey. His lesson from its death to Yen Pû-i.
 9. Nan-po 3ze-k'hi and his attendant Yen K'hǎng-3ze.

The trance is the highest result of the Táo. Practical lesson to be drawn from it.

10. Confucius at the court of *K'ü* along with Sun Shü-áo and Í-liáo.

11. *Ze-k'hi*, and his eight sons, with the physiognomist *K'ü-fang Yán*.

12. Nieh *K'üeh* meets Hsü Yü fleeing from the court of Yáo.

BOOK XXV.

Par. 1. *Ze-yang* seeking an introduction to the king of *K'ü*. Í Kieh, Wang Kwo, and the recluse Kung-yüeh Hsiü.

3. The ancient sovereign *Zán-hsiang*; Thang, the founder of the Shang dynasty; Confucius; and Yung-*k'hang Ze*.

4. King Yung of Wei and his counsellors:—on his desire and schemes to be revenged on Thien Máu of *K'hi*. Tái *Shin-zán* and his apologue about the horns of a snail.

5. Confucius and the Recluse at Ant-hill in *K'ü*.

6. The Border-warden of *K'ang-wú*'s lessons to *Ze-láo*. Kwang-*ze*'s enforcement of them.

7. *Láo-ze* and his disciple Po K'ü:—that the prohibitions of Law provoke to transgression.

8. The conversion to Taoism of K'ü Po-yü.

9. Confucius and the historiographers;—about the honorary title of duke Ling of Wei.

10. Little Knowledge and the Correct Harmonizer:—on the Talk of the Hamlets and Villages.

11. On the namelessness of the Táo; and that Táo is but a borrowed or metaphorical name.

BOOK XXVI.

Par. 2. Against delaying to do good when it is in one's power to do it. The apologue of Kwang-*ze* meeting with a goby on the road.

3. The big fish caught by the son of the duke of *Zán*.

4. The Resurrectionist Students.

5. How Láo Lái-ze admonished Confucius.
6. The dream of the ruler Yüan of Sung about a tortoise.
7. Hui-ze and Kwang-ze;—on the use of being useless.
11. Illustrations of the evil accruing from going to excess in action, or too suddenly taking action.

BOOK XXVII.

Par. 2. Kwang-ze and Hui-ze on Confucius;—did he change his views in his sixtieth year?

3. Confucius and his other disciples:—on Ǵǵng-ze and his twice taking office with different moods of mind.
4. Yen Kǵǵng Ǵze-yü tells his Master Tung-kwo Ǵze-kǵi of his gradual attainments.
5. The penumbrae and the shadows.
6. Láo-ze's lessoning of Yang Ǵze-kü, and its effects on him.

BOOK XXVIII.

Par. 1. Yáo's proffers of the throne to Hsü Yü and Ǵze-káu Kih-fü. Shun's proffers of it to Ǵze-káu Kih-po, to Shan Küan, and to the farmer of Shih-hü. Thâi-wang Than-fü and the northern tribes. Prince Sâu of Yüeh.

2. Counsel of Ǵze-hwâ Ǵze to the marquis Káo of Han.
3. The ruler of Lû and the Taoist Yen Ho, who hides himself from the advances of the other.
4. Lieh-ze and his wife, on his declining a gift from the ruler of Kǵǵng.
5. The high-minded and resolute sheep-butcher Yüeh, and king Káo of Kǵü.
6. The poor Yüan Hsien and the wealthy Ǵze-kung. Ǵǵng-ze, in extreme poverty, maintaining his high and independent spirit. The satisfaction of Confucius in Yen Hui refusing, though poor, to take any official post.
7. Prince Mâu of Kung-shan, living in retirement, was not far from the Táo.
8. Confucius and the disciples Yen Hui, Ǵze-lü, and Ǵze-kung, during the perilous time between Kǵǵǵn and Ǵhái.

9. Shun and the northerner Wû-k'ai who refuses the throne. Thang, and Pien Sui and Wû Kwang, who both refused it.

10. The case of the brothers Po-i and Shû-k'hi, who refused the proffers of king Wû.

BOOK XXIX.

Par. 1. The visit of Confucius to the robber Kih, and interview between them.

2. 3ze-kang and Mân Kâu-teh (Mr. Full of Gain-recklessly-got) on the pursuit of wealth.

3. Mr. Dissatisfied and Mr. Know-the-Mean;—on the pursuit and effect of riches.

BOOK XXX.

How Kwang-ze dealt with the king of K'ao and his swordsmen, curing the king of his love of the sword-fight. The three Swords.

BOOK XXXI.

Confucius and the Old Fisherman;—including the story of the man who tried to run away from his shadow.

BOOK XXXII.

Par. 1. Lieh-ze and the effect of his over-manifestation of his attractive qualities. Failure of the warnings of his master.

2. The sad fate of Hwan of K'ang, a Confucianist, who resented his father's taking part with his Mohist brother.

5. K'û Phing-man and his slaughtering the dragon.

8. Kwang-ze's rebuke of 3h'ao Shang for pandering to the king of Sung, and thereby getting gifts from him.

9. Description to duke Ai of Lû of Confucius by Yen Ho as unfit to be entrusted with the government.

11. Kh'ao-fû the Correct, and his humility.

12. Kwang-ze's rebuke of the man who boasted of having received chariots from the king of Sung, and comparison of him to the boy who stole a pearl from under the chin of the Black Dragon when he was asleep.

13. *Kwang-ze* declines the offer of official dignity. The apologue of the sacrificial ox.

14. *Kwang-ze*, about to die, opposes the wish of his disciples to give him a grand burial. His own description of what his burial should be.

BOOK XXXIII.

Par. 1. The method of the Táo down to the time of Confucius.

2. The method of Mo Tì and his immediate followers.

3, 4. The method of Mo's later followers.

5. The method of Kwan Yin and Láo-ze.

6. The method of *Kwang-ze*.

7. The ways of Hui Shih, Kung-sun Lung, and other sophists.

APPENDIX VII.

I.

THE STONE TABLET IN THE TEMPLE OF LÂO-3ZE. BY HSIEH TÂO-HĂNG OF THE SUI DYNASTY¹.

1. After the Thái Kî (or Primal Ether) commenced its action, the earliest period of time began to be unfolded.

¹ Hsieh Tâo-hăng 薛道衡, called also Hsüan-k'ing (玄卿), was one of the most famous scholars and able ministers of the Sui dynasty (581-618), and also an eloquent writer. His biography is given at considerable length in the fifty-seventh chapter of the Books of Sui.

For about 200 years after the end of the 3in dynasty, the empire had been in a very divided and distracted state. The period is known as the epoch of 'The Southern and Northern Dynasties,' no fewer than nine or ten of which co-existed, none of them able to assert a universal sway till the rise of Sui. The most powerful of them towards the end of the time was 'The Northern K'au,' in connexion with the Wû-khăng (武成) reign of which (558-561) the name of our Hsieh first appears. In the Wû-phing (武平) reign of 'The Northern K'hi (570-576),' we find him member of a committee for revising the rules of 'The Five Classes of Ceremonial Observances,' and gaining distinction as a poet.

When the emperor Wăn (文帝), by name Yang K'ien (楊堅), a scion of the ruling House of Sui, a small principality in the present Hû-pei, and founder of the dynasty so called, had succeeded in putting down the various conflicting dynasties, and claimed the sovereignty of the empire in 581, Hsieh freely yielded his allegiance to him, and was employed in the conduct of various affairs. The important paper, of the translation of the greater part of which a translation is here attempted, was the outcome of one of them. Wăn Tî regularly observed the Confucian worship of God, but also kept up the ceremonies of Buddhism and T'aoism. Having repaired the dilapidated temple of Lâo-3ze at his birth-place, he required from Hsieh an inscription for the commemorative tablet in it, the composition of which is referred to the year 586, 'the sixth year of Sui's rule over all beneath the sky.'

Hsieh appears to have been a favourite with the emperor Wăn, but when Wăn was succeeded in 605 by his son, known as Yang Tî (煬帝), his relations with

The curtain of the sky was displayed, and the sun and moon were suspended in it; the four-cornered earth was established, and the mountains and streams found their places in it. Then the subtle influences (of the Ether) operated like the heaving of the breath, now subsiding and again expanding; the work of production went on in its seasons above and below; all things were formed as from materials, and were matured and maintained. There were the (multitudes of the) people; there were their rulers and superiors.

2. As to the august sovereigns of the highest antiquity, living as in nests on trees in summer, and in caves in winter, silently and spirit-like they exercised their wisdom. Dwelling like quails, and drinking (the rain and dew) like newly-hatched birds, they had their great ceremonies like the great terms of heaven and earth, not requiring to be regulated by the dishes and stands; and (also) their great music corresponding to the common harmonies of heaven and earth, not needing the guidance of bells and drums.

3. By and by there came the loss of the T'ao, when its Characteristics took its place. They in their turn were lost, and then came Benevolence. Under the Sovereigns and Kings that followed, now more slowly and anon more rapidly, the manners of the people, from being good and simple, became bad and mean. Thereupon came the Literati and the Mohists with their confused contentions; names and

the throne became less happy. Offended by a memorial which Hsieh presented, and the ground of offence in which we entirely fail to perceive, the emperor ordered him to put an end to himself. Hsieh was surprised by the sentence, and hesitated to comply with it, on which an executioner was sent to strangle him. Thus ended the life of Hsieh T'ao-h'ang in his seventieth year. His death was regretted and resented, we are told, by the people generally. A collection of his writings was made in seventy chapters, and was widely read. I do not know to what extent these have been preserved; if many of them have been lost, and the paper, here in part submitted to the reader, were a fair specimen of the others, the loss must be pronounced to be great. Of this paper I have had two copies before me in translating it. One of them is in *Giáo Hung's* 'Wings to Láo-ze;' the other is in 'The Complete Works of the Ten Philosophers.' Errors of the Text occur now in the one copy, now in the other. From the two combined a Text, which must be exactly correct or nearly so, is made out.

rules were everywhere diffused. The 300 rules¹ of ceremony could not control men's natures; the 3000 rules¹ of punishment were not sufficient to put a stop to their treacherous villainies. But he who knows how to cleanse the current of a stream begins by clearing out its source, and he who would straighten the end of a process must commence with making its beginning correct. Is not the Great Tào the Grand Source and the Grand Origin of all things?

4. The Master Lâo was conceived under the influence of a star. Whence he received the breath (of life) we cannot fathom, but he pointed to the (plum-) tree (under which he was born), and adopted it as his surname²; we do not understand² whence came the musical sounds (that were heard), but he kept his marvellous powers concealed in the womb for more than seventy years. When he was born, the hair on his head was already white, and he took the designation of 'The Old Boy' (or Lâo-3ze). In his person, three gateways and two (bony) pillars formed the distinctive marks of his ears and eyes; two of the symbols for five, and ten brilliant marks were left by the wonderful tread of his feet and the grasp of his hands. From the time of Fû-hsi down to that of the Kâu dynasty, in uninterrupted succession, dynasty after dynasty, his person appeared, but with changed names. In the times of kings Wăn and Wû he discharged the duties, (first), of Curator of the Royal Library³, and (next), of the Recorder under the Pillar³. Later on in that dynasty he filled different offices, but did

¹ Compare vol. xxviii, p. 323, par. 38.

² Lî (李), a plum-tree. For this and many of the other prodigies mentioned by Hsieh, see what Julien calls 'The Fabulous Legend of Lâo-3ze,' and has translated in the Introduction to his version of the Tào Teh King. Others of them are found in the Historical, or rather Legendary, Introduction in the 'Collection of Tàoist Treatises,' edited by Lû Yü in 1877.

³ The meaning of the former of these offices may be considered as settled;—see the note in Wang K'ân-k'ai's edition of the 'Historical Records (1870),' under the Biography of Lâo-3ze. The nature of the second office is not so clearly ascertained. It was, I apprehend, more of a literary character than the curatorship.

not change his appearance. As soon as Hsüan Nî¹ saw him, he sighed over him as 'the Dragon,' whose powers are difficult to be known². Yin (Hsî), keeper of the (frontier) gate, keeping his eyes directed to every quarter, recognised 'the True Man' as he was hastening into retirement. (By Yin Hsî he was prevailed on) to put forth his extraordinary ability, and write his Book in two Parts³,—to lead the nature (of man) back to the Tâo, and celebrating the usefulness of 'doing nothing.' The style of it is very condensed, and its reasoning deep and far-reaching. The hexagram which is made up of the 'dragons on the wing'⁴ is not to be compared with it in exquisite subtlety. (The 30 *Kwan*) which ends with the capture of the Lin, does not match it in its brightness and obscurity. If employed to regulate the person, the spirit becomes clear and the will is still. If employed to govern the state, the people return to simplicity, and become sincere and good. When one goes on to refine his body in accordance with it, the traces of material things are rolled away from it; in rainbow-hued robes and mounted on a stork he goes forwards and backwards to the purple palace; on its juice of gold and wine of jade⁵ he feasts in the beautiful and pure capital. He is lustrous as the sun and moon; his ending and beginning are those of heaven and earth. He who crosses its stream, drives away the dust and noise of the world; he who finds its gate, mounts prancing up on the misty clouds. It is not for the ephemeral fly to know the fading and luxuriance of the Tâ-*k*hun⁶, or for a Fäng-î⁷ to fathom the depth of an Arm of the sea. Vast indeed (is the Tâo)! words are not sufficient to describe its excellence and powers!

5. *Kwang Kâu* tells us, that, 'when Lâo Tan died,

¹ Confucius, who was styled after the beginning of our era for several centuries 'Duke Nî, the Illustrious.'

² See vol. xxxix, pp. 34, 35.

³ See vol. xxxix, p. 35.

⁴ The *K'ien* or first of all the hexagrams of the *Yî K'ing*; but the sentence is to be understood of all the hexagrams,—of the *Yî* as a whole.

⁵ Compare Pope's line, 'The juice nectareous, and the balmy dew.'

⁶ Vol. xxxix, p. 166.

⁷ Vol. xxxix, p. 244.

Khin Shih went to condole (with his son), but after crying out three times, immediately left the house¹. This was what is called the punishment for his neglecting his Heaven (-implanted nature), and although it appears as one of the metaphorical illustrations of the supercilious officer, yet there is some little indication in the passage of the reappearance of the snake after casting its exuviae².

[At this point the author leaves the subject of the *Táo* and its prophet, and enters on a long panegyric of the founder of the Sui dynasty and his achievements. This sovereign was the emperor *Wăn* (文帝), the founder of Sui (隋高祖), originally *Yang Kien*, a scion of the House of Sui, a principality whose name remains in *Sui-kâu*, of the department *Teh-an* in *Hû Pei*. He was certainly the ablest man in the China of his day, and deserves a portion of the praise with which Mr. *Hsieh* celebrates him after his extravagant fashion. He claimed the throne from the year 581. While doing honour to Confucianism, he did not neglect the other two religions in the empire, *Táoism* and Buddhism; and having caused the old temple of *Láo-sze* to be repaired in grand style in 586, he commissioned *Hsieh Táo-hăng* to superintend the setting up in it a commemorative Tablet of stone.

I pass over all this, which is related at great length, and proceed to give the inscription. It occupies no fewer than 352 characters in 88 lines, each consisting of four characters. The lines are arranged in what we may call eleven stanzas of equal length, the second, fourth, sixth, and eighth lines of each rhyming together. There is a good deal of art in the metrical composition. In the first six stanzas the rhyming finals are in the even tone and one of the deflected tones alternately. In the last five stanzas this arrangement is reversed. The rhymes in 7, 9, and 11 are deflected, and in 8 and 10 even. The measure of four characters is the most common in the *Shih King* or Ancient Book of Poetry.

¹ Vol. xxxix, p. 201.

² Referring, I suppose, to the illustration of the fire and the faggots.

It continued to be a favourite down to the Thang dynasty, after which it fell very much into disuse. Through the many assonances of the Chinese characters, and the attention paid to the tones, we have in Chinese composition much of the art of rhyming, but comparatively little of the genius of poetry.]

II.

THE INSCRIPTION.

- St. 1. Back in the depths of ancient time ;
 Remote, before the Tîs began ;
 Four equal sides defined the earth,
 And pillars eight the heaven sustained.
 All living things in classes came,
 The valleys wide, and mighty streams.
 The Perfect Tâo, with movement wise,
 Unseen, Its work did naturally.
- St. 2. Its power the elements¹ all felt ;
 The incipient germs of things² appeared.
 Shepherd and Lord established were,
 And in their hands the ivory bonds³.
 The Tîs must blush before the Hwangs⁴;
 The Wangs must blush before the Tîs⁴.
 More distant grew Tâo's highest gifts,
 And simple ways more rare became.
- St. 3. The still placidity was gone,
 And all the old harmonious ways.
 Men talents prized, and varnished wit ;
 The laws displayed proved but a net.

¹ 'The five essences ;' meaning, I think, the subtle power and operation of the five elements.

² So Williams, under Wei (微). See also the Khang-hsi Thesaurus under the phrase 三微.

³ 'Bonds' with written characters on them superseded the 'knotted cords' of the primitive age. That the material of the bonds should be, as here represented, slips of ivory, would seem to anticipate the progress of society.

⁴ The Hwangs (皇) preceded the Tîs in the Tâoistic genesis of history ; and as being more simple were Tâoistically superior to them ; so it was with the Tîs and the Wangs or Kings.

Wine-cups and stands the board adorned,
And shields and spears the country filled.
The close-meshed nets the fishes scared:
And numerous bows the birds alarmed.

St. 4. Then did the True Man¹ get his birth,
As 'neath the Bear the star shone down².
All dragon gifts his person graced;
Like the stork's plumage was his hair.
The complicated he resolved³, the sharp made blunt³,
The mean rejected, and the generous chose;
In brightness like the sun and moon,
And lasting as the heaven and earth³.

St. 5. Small to him seemed the mountains five⁴,
And narrow seemed the regions nine⁴;
About he went with lofty tread,
And in short time he rambled far.
In carriage by black oxen drawn⁵,
Around the purple air was bright.
Grottoes then oped to him their sombre gates,
And thence, unseen, his spirit power flowed forth.

St. 6. The village near the stream of Ko⁶
Traces of him will still retain⁶;
But now, as in the days of old,
With changed times the world is changed.

¹ This of course was Lâo-3ze.

² See above, p. 313, par. 4.

³ In the *Tào Teh King*, p. 50, par. 2, and p. 52, par. 1. The reading of line 7 is different in my two authorities: — in the one 日角月角; in the other 乃前月角. I suppose the correct reading should be— 日前月角, and have given what I think is the meaning.

⁴ Two well-known numerical categories. See Mayers's *Manual*, pp. 320, 321, and p. 340.

⁵ So it was, according to the story, that Lâo-3ze drew near to the barrier gate, when he wished to leave China.

⁶ The Ko is a river flowing from Ho-nan into An-hui, and falling into the Hwâi, not far from the district city of Hwâi-yüan. It enters the one province from the other in the small department of Po (亳州), in which, according to a Chinese map in my possession, Lâo-3ze was born. The *Khang-hsi Thesaurus* also gives a passage to the effect that the temple of his mother was hereabouts, at a bend in the Ko.

His stately temple fell to ruin ;
 His altar empty was and still ;
 By the nine wells dryandras grew¹,
 And the twin tablets were but heaps of stone.

St. 7. But when our emperor was called to rule,
 All spirit-like and sage was he.
 Earth's bells reverberated loud,
 And light fell on the heavenly mirror down.
 The universe in brightness shone,
 And portents all were swept away ;
 (All souls), or bright or dark², revered,
 And spirits came to take from him their law.

St. 8. From desert sands³ and where the great trees grow³,
 From phoenix caves, and from the dragon woods,
 All different creatures came sincere ;
 Men of all regions gave their hearts to him.
 Their largest vessels brought their gifts,
 And kings their rarest things described ;
 Black clouds a thousand notes sent forth ;
 And in the fragrant winds were citherns heard⁴.

St. 9. Through his transforming power, the tripods were
 made sure ;
 And families became polite and courteous.

¹ The nine wells, or bubbling springs, near the village where Láo was born, are mentioned by various writers ; but I fail to see how the growth of the trees about them indicated the ruin of his temple.

² I have introduced the 'all souls' in this line, because of the 鬼 in the second character. Williams defines the first character, yao (曜), as 'the effulgence of the sun,' and of 'heavenly bodies generally ;' the second (魄) is well known as meaning 'the animal soul,' and 'the dark disk of the moon.' The Thesaurus, however, explains the two characters together as a name for the pole star (北辰 ; see Analects I, i) ; and perhaps I had better have followed this meaning.

³ The 'desert sands' were, no doubt, what we call 'the desert of Gobi.' The trees referred to were 'in the extreme East.' The combination phan-mû is not described more particularly.

⁴ This and the three preceding lines are not a little dark.

Ever kept he in mind (the sage) beneath the Pillar¹,
 Still emulous of the sovereigns most ancient².
 So has he built this pure temple,
 And planned its stately structure;
 Pleasant, with hills and meadows around,
 And lofty pavilion with its distant prospect.

St. 10. Its beams are of plum-tree, its ridge-pole of cassia;
 A balustrade winds round it; many are its pillars;
 About them spreads and rolls the fragrant smoke³;
 Cool and pure are the breezes and mists.
 The Immortal officers come to their places⁴;
 The Plumaged guests are found in its court⁴,
 Numerous and at their ease,
 They send down blessing, bright and efficacious.

St. 11. Most spirit-like, unfathomable,
 (Tâo's) principles abide, with their symbolism at-
 tached⁵.
 Loud is Its note, but never sound emits⁶,
 Yet always it awakes the highest echoes.
 From far and near men praise It;
 In the shades, and in the realms of light, they look
 up for Its aid;
 Reverently have we graven and gilt this stone
 And made our lasting proclamation thereby to heaven
 and earth.

¹ 'The (sage) beneath the Pillar' must be Lâo-ze. See above in the Introductory notice, p. 313.

² See the note on the meaning of the epithet 太上, vol. xxxix, p. 40.

³ 'The smoke,' I suppose, 'of the incense, and from the offerings.'

⁴ Tâoist monks are called 'Plumaged or Feathered Scholars (羽士),' from the idea that by their discipline and pills, they can emancipate themselves from the trammels of the material body, and ascend (fly up) to heaven. Arrived there, as Immortals or Hsien (仙), it further appears they were constituted into a hierarchy or society, of which some of them were 'officers,' higher in rank than others.

⁵ An allusion to the text of the hexagrams of the Yî K'ing, where the explanations of them by king Wăn,—his thwan, are followed by the symbolism of their different lines by the duke of K'âu,—his hsiang.

⁶ See the Tâo Teh K'ing, ch. xli, par. 2.

APPENDIX VIII.

RECORD FOR THE SACRIFICIAL HALL OF KWANG-3ZE.

BY SÔ SHIH¹.

1. *Kwang-3ze* was a native (of the territory) of Măng and an officer in (the city of) *Khi-yüan*. He had been dead for more than a thousand years, and no one had up to this time sacrificed to him in Măng. It was Wang King, the assistant Secretary of the Prefect, who superintended the erection of a Sacrificial Hall (to *Kwang-3ze*), and (when the building was finished) he applied to me for

¹ The elder of two brothers, both famous as scholars, poets, and administrators in the history of their country, and sons of a father hardly less distinguished. The father (A. D. 1009-1066) was named Sû Hsün (蘇洵), with the designation of Ming-yun (明允), and the two names of locality, Láo-khwan (老泉) and Mei-shân (眉山). Of the two brothers the elder (1036-1101), author of the notice here adduced, was the more celebrated. His name was Shih (軾), and his designation 3ze-kân (子瞻); but he is more frequently styled Tung-pho (東坡), from the situation of a house which he occupied at one time. His life was marked by several vicissitudes of the imperial favour which was shown to him and of the disgrace to which he was repeatedly subjected. He was versed in all Chinese literature, but the sincerity of his Confucianism has not been called in question. His brother (1039-1112), by name K'eh (轍), by designation 3ze-yü (子由), and by locality Ying-pin (穎濱), has left us a commentary on the T'ao Teh K'ing, nearly the whole of which is given by 3iao Hung, under the several chapters. It seems to have been K'eh's object to find a substantial unity under the different forms of Confucian, Buddhistic, and T'aoist thought.

The short essay, for it is more an essay than 'a record,' which is here translated is appended by 3iao Hung to his 'Wings to *Kwang-3ze*.' It is hardly worthy of Shih's reputation.

a composition which might serve as a record of the event ; (which I made as follows) :—

2. According to the Historical Records (of Sze-mâ *K'ien*), Kwang-ze lived in the time of the kings Hui of Liang (B.C. 370–333 [?])¹ and Hsüan of *K'hi* (B.C. 332–314). There was no subject of study to which he did not direct his attention, but his preference was for the views of Lâo-ze ; and thus it was that of the books which he wrote, containing in all more than ten myriad characters, the greater part are metaphorical illustrations of those views. He made 'The Old Fisherman,' 'The Robber *Kih*,' and 'The Cutting Open Satchels,' to deride the followers of Confucius, and to set forth the principles of Lâo-ze. (So writes Sze-mâ *K'ien*, but) his view is that of one who had only a superficial knowledge of Kwang-ze. My idea is that Kwang wished to support the principles of Khung-ze, though we must not imitate him in the method which he took to do so. (I will illustrate my meaning by a case of a different kind):—A prince of *K'hi*² was once hurrying away from the city in disguise³, when the gate-keeper refused to let him pass through. On this his servant threatened the prince with a switch, and reviled him, saying, 'Slave, you have no strength !' On seeing this, the gate-keeper allowed them to go out. The thing certainly took place in an irregular way, and the prince escaped by an inversion of what was right ;—he seemed openly to put himself in opposition, while he was secretly maintaining and supporting. If we think that his servant did not love the prince, our judgment will be wrong ; if we think that his action was a model for imitation in serving a prince, in that also we shall be wrong. In the same way the words of Kwang-ze are thrown out in a contradictory manner, with which the tenor of his writing does not agree. The correct interpre-

¹ Compare vol. xxxix, pp. 36, 37, 39. Sze-mâ *K'ien* enters king Hui's death in this year. The 'Bamboo Books' place it sixteen years later, see 'The General Mirror of History,' under the thirty-fifth year of king Hsien of *K'au*.

² I suppose this incident is an invention of Sû Shih's own. I have not met with it anywhere else. In *Siào*'s text for the 'in disguise' of the translation, however, there is an error. He gives 徽服 instead of 微服.

tation of them shows them to be far from any wish to defame Khung-ze.

3. And there is that in the style which slightly indicates his real meaning. (In his last Book for instance), when discussing the historical phases of Taoism, he exhibits them from Mo Ti, *K'in Hwâ-li*, Phăng Măng, Shăn Táo, Thien Pien, Kwan Yin, and Láo Tan, down even to himself, and brings them all together as constituting one school, but Confucius is not among them¹. So great and peculiar is the honour which he does to him!

4. I have had my doubts, however, about 'The Robber *K'ih* (Bk. XXIX),' and 'The Old Fisherman (Bk. XXXI),' for they do seem to be really defamatory of Confucius. And as to 'The Kings who have wished to Resign the Throne (Bk. XXVIII)' and 'The Delight in the Sword-fight (Bk. XXX);' they are written in a low and vulgar style, and have nothing to do with the doctrine of the Táo. Looking at the thing and reflecting on it, there occurred to me the paragraph at the end of Book XXVII ('Metaphorical Language'). It tells us that 'when Yang Ze-kü had gone as far as *K'in*, he met with Láo-ze, who said to him, "Your eyes are lofty, and you stare; who would live with you? The purest carries himself as if he were defiled, and the most virtuous seems to feel himself defective." Yang Ze-kü looked abashed and changed countenance. When he first went to his lodging-house, the people in it met him and went before him. The master of it carried his mat for him, and the mistress brought to him the towel and comb. The lodgers left their mats and the cook his fire-place, as he went past them. When he went away, the others in the house would have striven with him about (the places for) their mats.'

After reading this paragraph, I passed over the four intermediate Books,—the Zang Wang, the Yüeh Kien, the Yü Fû, and the Táo K'ih, and joined it on to the first paragraph of the Lieh Yü-khâu (Book XXXII). I then read how Lieh-ze had started to go to *K'hi* but came back

¹ See Book XXXII, pars. 2, 3, 4, 5, 6.

when he had got half-way to it. (When asked why he had done so), he replied, 'I was frightened, I went into ten soup-shops to get a meal, and in five of them the soup was set before me before I had paid for it.' Comparing this with the paragraph about Yang 3ze-kü, the light flashed on me. I laughed and said, 'They certainly belong to one chapter!'

The words of *Kwang-3ze* were not ended; and some other stupid person copied in (these other four Books) of his own among them. We should have our wits about us, and mark the difference between them. The division of paragraphs and the titles of the Books did not proceed from *Kwang-3ze* himself, but were introduced by custom in the course of time¹.

Recorded on the 19th day of the 11th month of the first year of the period Yüan Fǎng (1078-1085).

¹ Few of my readers, I apprehend, will appreciate this article, which is to me more a *jeu d'esprit* than 'a record.' It is strange that so slight and fantastic a piece should have had the effect attributed to it of making the four Books which they call in question be generally held by scholars of the present dynasty to be apocryphal, but still Sū Shih avows in it his belief in Book XXXIII. Compare the quotation from Lin Hsi-kung on pp. 296, 297.

INDEX

TO

VOLUMES XXXIX (i), XL (ii).

- Â-ho Kan (ancient Tâoist), Part ii, page 67.
 Âi (duke of Lû), i, 229, 231, 232; ii, 49, 207.
 Ailantus, the, i, 174.
 Âi-thâi Tho (the ugly man), i, 229.
 Balfour, F. H., i, pp. xiv, xv, xviii, xx, 14, 17, 19, 20, 24, 128, 135, 138, 142, 155, 237, 248, 300, 310; ii, 240, 247, 251, 257, 262.
 Chalmers, Dr. J., i, pp. xiii, xiv, 64, 91, 93, 104, 107, 123, 124.
 Davis, Sir J. F., ii, 5.
 Edkins, Dr. J., i, 58.
 Eitel, Dr. E. J., i, 44.
 Faber, Mr. E., i, 137; ii, 247.
 Fan (a state), ii, 55, 56.
 Fân (the river), i, 172.
 Fan Lî (minister of Yüeh), ii, 255.
 Fang-hwang (name of desert-sprite), ii, 19.
 Fâng-î (spirit-lord of the Ho), i, 244.
 Fang Ming (charioteer of Hwang-Tî), ii, 96.
 Fei-yo (a chapter of Mo Tî), ii, 216.
 Fû-hsî (the ancient sovereign), i, 210, 244, 370; ii, 55.
 Fû-mo (= writings), i, 246.
 Fû-yào (a whirlwind), i, 165, 167, 300.
 Fû Yüeh (the minister of Wû-ting), i, 245.
 Gabelentz, Prof. G., i, p. xix, 57, 307, 310.
 Giles, H. A., i, pp. xiv, xviii, xx, 4, 15, 17, 18, 19, 248, 249, et al.
 Han (state), ii, 152, 153, 189.
 Han (river). In phrase Ho Han (= Milky Way), i, 170.
 Han Fei (the author), i, 5, 6, 69, 81, 97, 98, 102, 103, 104, 107, 109, 113.
 Han-tan (capital of Kào), i, 284, 390.
 Han Ying (the writer), i, 89, 90, 92.
 Hào (river), i, 391, 392.
 Hardwick, Archdeacon, i, 13, 40, 41.
 Ho (river), i, 389; ii, 132, 173, 211.
 Ho Han, see Han. Kiang Ho, see Kiang.
 Ho-hsü (prehistoric sovereign), i, 279.
 Ho-kwan Ze (the author), i, 12.
 Ho-po (the spirit-ruler of the Ho), i, 374, 377, 378, 379, 382, 383.
 Ho-shang Kung (the author), i, 7, 8, 12, 46, 75, 77, 81, 83, 87, 97, 98, 99, 101, 111, 117, 119, 123.
 Hsî Kiang (the Western Kiang), ii, 133.
 Hsî Phăng (a minister of Kêi), ii, 102.
 Hsî-phăng (an attendant of Hwang-Tî), ii, 96.
 Hsî Shih (the Beauty), i, 354.
 Hsî Wang-mü (queen of the Genii), i, 245; ii, 248, 249.
 Hsiang Hsü (the commentator), i, 10.
 Hsiang-kbăng (name of a desert), ii, 96, 97.
 Hsiang-lî Kbin (a Mohist), ii, 220.
 Hsiang-wang (= Mr. Purposeless), i, 312.
 Hsiao-kî (son of Kào Jung of Yin), ii, 132.
 Hsiao-po (name of duke Hwan of Kêi), ii, 177.
 Hsieh Tào-hăng (minister and scholar of Sui dynasty), ii, 311, 312.

- Hsien-*kbi* (Hwang-Ti's music), i, 348; ii, 8, 218.
 Hsien-yüan Shih (Hwang-Ti), i, 287.
 Hsin (the mound-sprite), ii, 19.
 Hsing-than (apricot altar), ii, 192.
 Hsio-*kü* (a kind of dove), i, 166.
 Hsü-*áo* (state), i, 190, 206.
 Hsü Wü-kwei (a recluse), ii, 90, 91, 92, 93, 94.
 Hsü-yi (a mystical name), i, 247.
 Hsü Yü (a contemporary and teacher of Yáo), i, 169, 255, 256, 312; ii, 108, 161, 183, 210.
 Hsü-yü (name of count of *Ki*), i, 239.
 Hsüan-ming (name of Profundity), i, 247.
 Hsüan Shui (the dark river, metaphorical), ii, 57.
 Hsüan-yang *Ze* (an author), ii, 265.
 Hsüan Ying (editor), i, p. xx, 197, 269.
 Hú (state), i, 206.
 Hú (god of Northern sea), i, 267.
 Hú Pü-*kieh* (ancient worthy), i, 239.
 Hú-*ze* (teacher of Lieh-*ze*), i, 263, 264, 265.
 Hú Wán-ying (editor and commentator), i, p. xx, 325; ii, 63, 71.
 Hui (favourite disciple of Confucius), i, 209. See Yen Yüan.
 Hui-*ze*, or Hui Shih (philosopher, and friend of Kwang-*ze*), i, 172, 174, 186, 234, 235, 391, 392; ii, 4, 137, 144, 229.
 Hwá (a place), i, 313.
 Hwá, Eastern, the (divine ruler of), ii, 248, 254.
 Hwá-*kieh* Shü (a man with one foot), ii, 5.
 Hwá-liü (one of king Mú's famous horses), i, 381.
 Hwá-shan (a hill), ii, 222.
 Hwan (Confucianist of *Käng*), ii, 204, 205.
 Hwan (duke of *Khi*), i, 233, 343; ii, 18, 20, 101, 177.
 Hwan Táu (minister of Yáo), i, 295.
 Hwan Twan (a Taoist sophist), ii, 230.
 Hwang-fü Mí (the writer), i, 8.
 Hwang-kwang (some strange production), ii, 9.
 Hwang-kung (the first of the upper musical Accords), i, 269.
 Hwang Liáo (a sophist), ii, 231.
 Hwang-Ti (the ancient sovereign), i, 193, 244, 256, 295, 297, 298, 299, 311, 338, 348, 370; ii, 7, 28, 55, 58, 60, 73, 96, 97, 171, 172, 218, 255.
 Hwang-*ze* Káo-áo (an officer of *Kbi*), ii, 19.
 Hwun-tun (chaos), i, 267, 322.
 Í (name of a place); may be read Ái, i, 194.
 Í (the ancient archer), i, 227; ii, 36, 99.
 Í (wild tribes so named), ii, 220.
 Í-í (a bird), ii, 32.
 Í Kieh (a parasite of the court of *Kbü*), ii, 114.
 Í-liáo (a scion of the house of *Kbü*), ii, 28, 104, 121.
 Í-lo (some strange growth), ii, 9.
 Í-r *Ze* (a fabulous personage), i, 255, 256.
 Í-shih (name for speculation about the origin of things), i, 247.
 Í Yin (Thang's adviser and minister), i, 6; ii, 162.
 Jesuit translation of the Táo Teh King, i, pp. xii, xiii, 95, 115.
 Julien, Stanislas (the Sinologue), i, pp. xiii, xv, xvi, xvii, 12, 13, 34, 35, 72, 73, 104, 109, 123, 124; ii, 239, 243, 245.
 Kan Ying Phien (the Treatise), i, p. xi, 38, 40, 43; ii, 235-246.
 Kan-yüeh (a place in Wü, famous for its swords), i, 367.
 Káo Yü (the glossarist), i, 86.
 Káu-*kien* (king of Yüeh), ii, 111.
 Ko (name of the stream, near whose bank Láo-*ze* was born), ii, 317.
 Ko Yüan or Hsüan (a Taoist writer), ii, 248.
 Kú (name for female slave), i, 273.
 Kú-*kü* (ancient state), ii, 163, 173.
 Kú *Kbi* (an attendant of Hwang-Ti), ii, 96.
 Kú-*küeh* (metaphorical name for a height), ii, 58.
 Kumâragîva (Indian Buddhist), i, 76, 90.
 Kung-kung (Yáo's minister of works), i, 295.
 Kung Po (earl of Kung), ii, 161.
 Kung Shan (mount Kung), ii, 161.
 Kung-sun Lung (noble, and sophist

- of Kào), i, 387, 389; ii, 230.
See Ping.
- Kung-ze Mâu (a prince of Wei), i, 387.
- Kung-wân Hsien (a man of Wei), i, 200.
- Kung-yüeh Hsiü (a recluse of Kêü), ii, 114, 115.
- Kwâi-kêü (hill in Yüeh), ii, 111, 133.
- Kwan Lung-fang (minister of Hsiâ), i, 205, 283; ii, 131.
- Kwan-ze (minister of duke Hwan of Kêü), ii, 7; called Kwan Kung, ii, 18, 19, 101, 177; and Kung-fü, ii, 19, 101.
- Kwan Yin (the warden Yin Hsi), i, 5, 35; ii, 12, 13, 226, 227.
- Kwang Kêng-ze (teacher of Hwang-Ti), i, 297, 298, 299; ii, 255, 256, 257.
- Kwang-yào (=starlight), ii, 70.
- Kwei (an ancient state), i, 190.
- Kwei Kû Ze (the famous Recluse), ii, 255.
- Khăng-ghang (? = Kăng-sang Kêü), ii, 82.
- Khan-pei (spirit presiding over Khwân-lun), i, 244.
- Khâu-fü (ancestor of Confucius), ii, 209.
- Khâu Kbien-kh (usurping patriarch of Tâoism), ii, 256.
- Kho (a river), ii, 14.
- Khü Hwo (a Mohist of the South), ii, 220.
- Khung-ze (Confucius), called also Khung Kbiu, Kbiu, Khung-shih, and Kung-ni, i, 34, 35, 203, 204, 208, 221, 223, 224, 228, 229, 230, 233, 250, 251, 253, 256, 257, 320, 322, 338, 339, 351, 354, 355, 357, 358, 360, 361, 362, 375, 376, 385, 386; ii, 7, 14, 15, 16, 20, 21, 32, 34, 35, 37, 38, 39, 44, 45, 46, 47, 48, 49, 53, 55, 63, 71, 72, 104, 105, 117, 120, 121, 166, 167, 168, 169, 172, 177, 180, 192, 193, 194, 197, 198, 199, 207, 208, 209.
- Khung-thung (a mountain), i, 297.
- Khwan (a river), ii, 141. See Kho.
- Khwân (the great fish), i, 164, 167.
- Khwân (a son of Ze-kêü), ii, 106, 107.
- Khwân Hwun (an attendant of Hwang-Ti), ii, 96.
- Khwân-lun (the mountain), i, 244, 311; ii, 5.
- Khwang (music-master of Jin), i, 186, 269, 274, 286.
- Khwang (a district), i, 385.
- Khwang-ze (an old worthy), ii, 180.
- Khwei (prince of Kào), ii, 186.
- Khwei (a hill-sprite), ii, 19.
- Khwei (name of one-footed dragon), i, 384.
- Kan-ze (a worthy of Wei), ii, 159.
- Kân Zân (the True Man, highest master of the Tâo), ii, 110. See especially in Book VI.
- Käng (the state), i, 226, 262, 263; ii, 204.
- Kang Häng (a poet), i, 89.
- Kang Kân (editor of Lieh-ze), i, 117.
- Kang Liang (famous Tâoist), ii, 255.
- Kang Tâo-ling (first Tâoist master), i, 42.
- Käng Zhang (the Kâu library), i, 339.
- Kang Zo (an attendant of Hwang-Ti), ii, 96.
- Kào (the state), ii, 186, 187.
- Kào and Kào Wân (a lutist of Jin), i, 186.
- Kào-hsi (marquis of Han), ii, 152, 153.
- Kào Wang (king of Kêü), ii, 155.
- Kâu (the dynasty), i, 338, 339, 353 (in i, 352, and ii, 34, 189, Kâu must be = Wei); ii, 163, 164.
- Kâu (the tyrant of Yin), i, 205, 359, 386; ii, 131, 171, 173, 177, 178.
- Kâu Kung (the famous duke of Kâu), i, 314; ii, 178, 218; but in ii, 16, another duke.
- Kâu-shui (a river), ii, 162.
- Keh Ho (the Keh Kiang), ii, 134.
- Ki (a wise man in time of Thang), i, 167.
- Ki, meaning king Ki, ii, 178; meaning Liü-hsiâ Hui, ii, 168.
- Ki Hsien (wizard of Käng), i, 263.
- Ki Hsing-ze (a rearer of game-cocks), ii, 20.
- Ki Kân (a Tâoist master), ii, 129.

- Kî Kbeh* (officer of Lû), i, 318.
Kî Kbih (a Mohist of the South), ii, 220.
Kî-kbtu (prehistoric sovereign), i, 210.
Kî Thâ (ancient worthy), i, 239; ii, 141.
Kî-ze (an officer of Wei), ii, 118.
Kî Ze (the count of Wei), i, 239; ii, 131.
Kiâ Yü (Narratives of the School), i, 91.
Kih (the robber so-called), i, 273, 275, 283, 284, 285, 292, 295, 328; ii, 166, 167, 168, 170, 172, 175.
Kih (knowledge personified), i, 311; ii, 57, 58, 60.
Kih-hwo (as a name, Mr. Know-the-Mean), ii, 180, 181, 182, 183.
Kih-kung (as a name), ii, 180.
Kih-khwai (marquis of Yen), i, 380.
Kih-lî Yi (a name), ii, 206.
Kiang (the river), ii, 29, 102, 126, 131, 136 (the Clear Kiang), 174, 219.
Kiang-lü Mien (officer of Lû), i, 318, 319.
Kieh (the tyrant of Hsiâ), i, 205, 242, 291, 295, 380, 386; ii, 131, 162, 177, 178.
Kieh (name of an old book), i, 220.
Kieh-ze (a Taoist master), ii, 129.
Kieh-ze Thui (officer of duke Wân of Jin), ii, 173.
Kieh-yung (name of a book of Mo Ti), ii, 218.
Kien Ho-hâu (a certain marquis in Wei), ii, 132.
Kien Wü (a fabulous Taoistic personage), i, 170, 244, 260; ii, 54.
Kim (music-master of Lû), i, 351.
King (the emperor, of Han), i, 8.
Kiü-fang Yân (a physiognomist), ii, 106, 107.
Kiü-shào (Shun's music), ii, 8.
Ko-lü (Hwang-Ti's battle-field), ii, 171, 173.
Kü Hsi (the philosopher), i, 23, 54, 56, 89, 167; ii, 263, 272.
Kü Hsin (a Taoist master), ii, 16.
Kü-ko Liang (the famous), ii, 255.
Kü-liang (duke of Sheh in Kbtu), i, 210.
Kü-lü (a certain hunchback), ii, 14.
Kü Phing-man (a Taoist), ii, 206.
Kü Sung-zân (officer of prayer in temple), ii, 18.
Kü-yung (prehistoric sovereign), i, 287.
Kü Liang (a strong man), i, 256.
Kü Po-yü (a minister of Wei), i, 215; ii, 124.
Kü-ghze (a hill), ii, 96.
Kun Mang (name for primal ether), i, 322, 323.
Kung (a minister of Yüeh), ii, 111.
Kung Kwo (the Middle States), ii, 43, 216.
Kung-shan (a dependency of Wei), ii, 159.
Kwan-hsü (the ancient sovereign), i, 244.
Kwang-ze and *Kwang Khâu* (our author), i, pp. xi, xviii, xix, xx, xxi, 3, 4, 5, 10, 11, 19, 21, 22, 23, 24, 28, 29, 32, 33, 36, 37, 38, 39, 41, 172, 173, 174, 197, 234, 235, 332, 346, 347, 387, 389, 390, 391, 392; ii, 4, 5, 6, 27, 36, 39, 40, 49, 50, 66, 98, 99, 132, 133, 137, 138, 144, 187, 188, 189, 190, 191, 205, 207, 211, 212, 227.
Kwang Kung (duke of Lû), ii, 23.
Kbâi (or Bhai, the state), i, 352; ii, 32, 34.
Kbân (the state), i, 352; ii, 32, 34, 160, 161, 172, 197.
Kbäng (a minister of Shun), ii, 62.
Kbang Hung (a historiographer and musician of Kâu), i, 283; ii, 131.
Kbang Kî (a disciple of Confucius), i, 223, 224, 225.
Kbang-shân (the name of a gulf), ii, 15.
Kbang-wü (a district), i, 192; ii, 121.
Kbang-yü (an attendant of Hwang-Ti), ii, 96.
Kbî (the state), i, 210, 211, 217, 233, 281, 282; ii, 7, 19, 43, 100, 118, 119, 169, 172, 189, 205.
Kbî Hsieh (an old book), i, 165.
Kbî Kung (a worthy of Wei), ii, 42.
Kbî-shân (early seat of the house of Kâu), ii, 151, 163.
Kbieh Kbâu (=vehement debater), i, 312.
Kbieh-yü (the madman of Kbtu), i, 170, 221, 260.

- Khien-lung*, the catalogue of, ii, 255, 256.
- Kbih-kang* Man-*khî* (a man of king Wû's time), i, 324.
- Kbih-kî* (one of king Mû's steeds), i, 381; ii, 175.
- Kbih Shâu* (title of minister of war), ii, 115.
- Kbih Shui* (the Red-water, metaphorical), i, 311.
- Kbih-wei* (a prehistoric sovereign), i, 244; ii, 73, 138; (also, an assistant historiographer), ii, 124, 125.
- Kbih-yü* (rebel against Hwang-Tî), ii, 171.
- Kbin* (the state and dynasty), ii, 147 (but this is doubtful), 207.
- Kbin Hwâ-lî* (a contemporary and disciple of Mo Tî), ii, 218, 221.
- Kbin Shih* (a Tâoist), i, 201.
- Kbing* (worker in rottlera wood), ii, 22.
- Kbing Käng Kîng* (name of Tâoist Treatise), ii, 247-254.
- Kbing-lang* (name of an abyss), ii, 162.
- Kbiû* (the name of Confucius), i, 193, 195, 251, 252, 317, 360, 362; ii, 7, 104, 168, 170, 172, 174, 175.
- Kbiû-shih* (name of a place), ii, 204.
- Kbo* Shih (=Mr. Provocation), ii, 119.
- Kbû* (the state), i, 221, 224, 230, 319, 390; ii, 6, 14, 55, 56, 98, 100, 104, 120, 155, 156, 169.
- Kbû-kung* (a man of *Kbû*), ii, 108.
- Kbû* *Shiào-ze* (a Tâoist), i, 192.
- Kbû-yüan* (a place in *Kbû*), i, 217.
- Kbui* (ancient artificer), i, 286.
- Kbun Kbiû* (the classic), i, 189, 360; ii, 216.
- Kbung Shan* (a hill), i, 295.
- Lan *ÿü* (disciple of Kwang-ze), ii, 40.
- Lão-ze, Lão Tan, Lão and Tan alone (our Lão-ze), i, pp. xi, xii, xiii, xiv, xv, xvi, xvii, xviii, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 13, 14, 15, 16, 24, 25, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 39, 41, 44, 201, 228, 229, 261, 262, 294, 317, 339, 340, 341, 355, 357, 358, 359, 360, 361, 362; ii, 46, 47, 49, 63, 74, 75, 78, 79, 81, 122, 147, 148, 226, 227.
- Lão Kün (a designation of Lão-ze), i, 40; ii, 249, 250, 253.
- Lão's golden principle, i, 31, 106.

- 3hui Kbû (a contemporary of Lâu-ze), i, 294.
- 3hung-kîh (a state), i, 206; perhaps i. q. 3ung.
- 3hze (name of 3ze-kung, q.v.), ii, 160.
- [3h and Kb are sometimes interchanged in spelling names.]
- Wăn (the king), i, 359; ii, 51, 52, 53, 168, 172, 173. (The famous duke of 3in), ii, 173. (A marquis of Wei), ii, 42, 43. (A king of Kào), ii, 186, 190, 191. (The emperor of Sui), ii, 311, 315.
- Wăn-hui (? king Hui of Liang), i, 198, 200.
- Wăn-po Hstieh-ze (a Taoist of the South), ii, 43, 44.
- Wang I (ancient Taoist), i, 190, 191, 192, 259, 312.
- Wang Kkî (commentator of Mã Twan-lin), i, 40; ii, 265.
- Wang Pî (or Fû-sze, early commentator), i, p. xv, 8, 55, 74, 75, 83, 93, 94, 101, et al.
- Wang Thài (Taoist cripple and teacher), i, 223, 224.
- Wang-ze, Kbing-kî (a prince so named), ii, 31.
- War, against, i, 100, 110, 112.
- Water, as an emblem of the Tào, i, 52, 58, 75, 120.
- Wei (the state 魏), i, 172, 387; ii, 36, 42, 91, 118, 152, 189.
- Wei (the state 衛), i, 203, 229, 351, 352; ii, 31, 34, 158, 169, 172, 197.
- Wei Kung (duke Wei of Kâu), ii, 16.
- Wei Shăng (a foolish ancient), ii, 174, 180.
- Wei-tâu (Ursa Major), i, 244.
- Williams, Dr., i, 319, 353, 370; ii, 192, 257.
- Wû (the state), i, 173; ii, 102, 133; (the dynasty), ii, 248, 249.
- Wû (the king), i, 359, 380; ii, 73, 163, 168, 170, 171, 172, 173, 178, 218. (His music), ii, 218.
- Wû-ào (name for songs), i, 247.
- Wû-hsien Thião (a Taoist of uncertain date), i, 346.
- Wû Kwang (a worthy, in favour of whom Thang wished to resign), i, 239; ii, 141, 162, 163.
- Wû-kài (name of Thien 3ze-fang), ii, 42. Of another, ii, 161.
- Wû-kîh (the toeless), i, 228.
- Wû-kwang (distinguished for beauty), i, 256.
- Wû Kbäng (the commentator), i, p. xvii, 9, 67, 72, 81, 88, 97, 108, 109, et al.
- Wû Kbiung (= Infinity), ii, 69.
- Wû Shih (= Mr. No-beginning), ii, 69.
- Wû-shun (the Lipless), i, 233.
- Wû-ting (a king of Shang), i, 245.
- Wû-yü (= Mr. Discontent), ii, 180, 183.
- Wû-wei (= Mr. Do-nothing), ii, 68, 69.
- Wû-wei Wei (Dumb-Inaction), ii, 57, 58, 60.
- Wû-yo (= Mr. No-agreement), ii, 179.
- Wû-yü (= Mr. Non-existence), ii, 70.
- Wû Yün (i. q. Wû 3ze-hsü), ii, 131, 174.

- Wylie, Mr. A., i, 9, 39; ii, 257, 265, et al.
- Yak (the bosgrunniens of Thibet), i, 174, 317.
- Yang (the emperor of the Sui dynasty), ii, 311.
- Yang (the heresiarch Yang Kû), i, 270, 287; ii, 99, 100.
- Yang Hû (a bad officer), i, 387.
- Yang 3ze-kû (a contemporary of Lâu-3ze; perhaps the same as the above; but the surname Yang is a different character), i, 261; ii, 99, 100. Yang-3ze, ii, 41, 147, 148. This is Yang-kû in Lieh-3ze; but the Yang is that of Yang 3ze-kû.
- Yáo (the ancient sovereign), i, 169, 172, 190, 206, 225, 242, 282, 291, 295, 312, 313, 314, 315, 338, 347, 359, 386; ii, 31, 108, 110, 120, 136, 141, 149, 162, 170, 171, 173, 178, 183.
- Yen (the state so called), ii, 107, 229.
- Yen (name of the above), i, 176.
- Yen (name of minister of War in Wei), ii, 118.
- Yen Ho (a worthy of Lû in Wei, as teacher of its ruler's son), i, 215. (The same, or another of the same name in Lû), ii, 23, 153, 207.
- Yen Kang (attendant at an old Tâoist establishment), ii, 68.
- Yen Kbang 3ze-yü (attendant of Nan-kwo 3ze-kû), i, 176; ii, 103 (Yen Kbang-3ze), 145.
- Yen Kbi (a place in Yen), ii, 189.
- Yen Mân (gate of capital of Sung), ii, 140.
- Yen Pû-i (friend of a king of Wû), ii, 102, 103.
- Yen Shû (a mole), i, 170.
- Yen Yüan, Yen Hui, and Hui alone (Confucius's favourite disciple), i, 203, 206, 207, 208, 209, 253, 256, 257, 351; ii, 7, 15, 44, 49, 53, 72, 158, 159, 160, 167, 200.
- Yi (the classic so called), i, 360; ii, 216.
- Yin (the dynasty), ii, 164. (Also a mountain), i, 260.
- Yin-fân (an imperceptibly sloping hill, metaphorical), ii, 57.
- Yin Wân (Tâoist master), ii, 221.
- Yin and Yang (the constituents of the primal ether, and its operation), i, 249, 291, 292, 297, 299, 349, 365, 369; ii, 61, 64, 84, 99, 132. See also ii, 146, 147, 195, 208, 216.
- Ying (the capital of Kbü), i, 347; ii, 101, 230.
- Ying (a river), ii, 161.
- Yo (the classic so called), ii, 216, 218.
- Yo î (a leading man in the kingdom in third cent. B.C.), i, 7.
- Yo Kban (a descendant of Yo î and pupil of Ho-shang Kung), i, 7.
- Yü (name of 3ze-lû), i, 339; ii, 160, 201.
- Yü Kbao Shih (the Nest-er sovereign), ii, 171.
- Yü-li (where king Wân was confined), ii, 173.
- Yü Piào Shih (ancient sovereign), i, 351.
- Yü Shih (the master of the Right, who had lost a foot), i, 200.
- Yü Tû (the dark capital, in the north), i, 295.
- Yü 3ü kîh shan (a hill in Wû), ii, 102.
- Yü (the Great), i, 181, 206, 210, 315, 359, 388; ii, 35, 173, 218, 220.
- Yü Hwang-Ti, or Yü Hwang Shang Ti (great Tâoist deity), i, 43, 44.
- Yü-kbiang (the spirit of the northern regions), i, 245.
- Yü Shih, Yü-yü, and Yü alone (names for Shun), i, 245, 259, 272, 370; ii, 50.
- Yü Shû Kîng (the Treatise so called), ii, 265-268.
- Yü 3ü (a fisherman), ii, 136, 137.
- Yüan Hsien (disciple of Confucius), ii, 157.
- Yüan Kün (a ruler of Sung), ii, 50, 101, 136, 137.
- Yüeh (the state), i, 172, 173, 181, 224; ii, 93, 133, 151, 152, 169, 229.
- Yüeh (a sheep-butcher of Kbü), ii, 155, 156.
- Yung (a king of Wei), ii, 118.
- Yung-kbang Shih (a minister of Hwang-Ti), ii, 118.
- Zâh-kung Shih (a teacher of Confucius's time), i, 260.

-
- Zăh Kung King (the Treatise so called), ii, 269-272.
- Zăn (name of a region in the South; probably a district of *Kbû*), ii, 133, 134. In ii, 32, the Zăn in *Thâi-kung Zăn* may indicate a different quarter, or the Zăn there may be simply a name.
- Zăn-hsiang (a prehistoric sovereign), ii, 117.
- Zăn *Kbiû* (disciple of Confucius), ii, 71, 72.
- Zo (Spirit-lord of the Northern sea), i, 374, 375, 377, 378, 379, 382, 383, 384.
- Zû and Zû-*kê* (Literati, = Confucianists), i, 182, 296, 360; ii, 73, 100.

SACRED BOOKS OF THE EAST

TRANSLATED BY

VARIOUS ORIENTAL SCHOLARS

AND EDITED BY

F. MAX MÜLLER.

* * *This Series is published with the sanction and co-operation of the Secretary of State for India in Council.*

REPORT presented to the ACADEMIE DES INSCRIPTIONS, May 11, 1883, by M. ERNEST RENAN.

‘M. Renan présente trois nouveaux volumes de la grande collection des “Livres sacrés de l’Orient” (Sacred Books of the East), que dirige à Oxford, avec une si vaste érudition et une critique si sûre, le savant associé de l’Académie des Inscriptions, M. Max Müller. . . La première série de ce beau recueil, composée de 24 volumes, est presque achevée. M. Max Müller se propose d’en publier

une seconde, dont l’intérêt historique et religieux ne sera pas moindre. M. Max Müller a su se procurer la collaboration des savans les plus éminens d’Europe et d’Asie. L’Université d’Oxford, que cette grande publication honore au plus haut degré, doit tenir à continuer dans les plus larges proportions une œuvre aussi philologiquement conçue que savamment exécutée.’

EXTRACT from the QUARTERLY REVIEW.

‘We rejoice to notice that a second series of these translations has been announced and has actually begun to appear. The stones, at least, out of which a stately edifice may hereafter arise, are here being brought together. Prof. Max Müller has deserved well of scientific history. Not a few minds owe to his enticing words their first attraction to this branch of study. But no work of his, not even the

great edition of the Rig-Veda, can compare in importance or in usefulness with this English translation of the Sacred Books of the East, which has been devised by his foresight, successfully brought so far by his persuasive and organising power, and will, we trust, by the assistance of the distinguished scholars he has gathered round him, be carried in due time to a happy completion.’

Professor E. HARDY, Inaugural Lecture in the University of Freiburg, 1887.

‘Die allgemeine vergleichende Religionswissenschaft datirt von jenem grossartigen, in seiner Art einzig dastehenden Unternehmen, zu welchem auf Anregung Max Müllers im Jahre 1874 auf dem

internationalen Orientalistencongress in London der Grundstein gelegt worden war, die Übersetzung der heiligen Bücher des Ostens’ (*the Sacred Books of the East*).

The Hon. ALBERT S. G. CANNING, ‘Words on Existing Religions.’

‘The recent publication of the “Sacred Books of the East” in English is surely

a great event in the annals of theological literature.’

Oxford

AT THE CLARENDON PRESS

LONDON: HENRY FROWDE

OXFORD UNIVERSITY PRESS WAREHOUSE, AMEN CORNER, E.C.

FIRST SERIES.

VOL. I. The Upanishads.

Translated by F. MAX MÜLLER. Part I. The *Khândogya-upanishad*, The *Talavakâra-upanishad*, The *Aitareya-âranyaka*, The *Kaushîtaki-brâhmana-upanishad*, and The *Vâgasaneyi-samhitâ-upanishad*. 8vo, cloth, 10s. 6d.

The Upanishads contain the philosophy of the Veda. They have become the foundation of the later Vedânta doctrines, and indirectly of Buddhism. Schopenhauer, speaking of the Upanishads, says : ' In the whole world there is no study so beneficial and so elevating as that of the Upanishads. It has been the solace of my life, it will be the solace of my death.'

[See also Vol. XV.]

VOL. II. The Sacred Laws of the Âryas,

As taught in the Schools of Âpastamba, Gautama, Vâsishtha, and Baudhâya. Translated by GEORG BÜHLER. Part I. Âpastamba and Gautama. 8vo, cloth, 10s. 6d.

The Sacred Laws of the Âryas contain the original treatises on which the Laws of Manu and other lawgivers were founded.

[See also Vol. XIV.]

VOL. III. The Sacred Books of China.

The Texts of Confucianism. Translated by JAMES LEGGE. Part I. The *Shû King*, The Religious Portions of the *Shih King*, and The *Hsiâo King*. 8vo, cloth, 12s. 6d.

Confucius was a collector of ancient traditions, not the founder of a new religion. As he lived in the sixth and fifth centuries B. C. his works are of unique interest for the study of Ethology.

[See also Vols. XVI, XXVII, XXVIII, XXXIX, and XL.]

VOL. IV. The Zend-Avesta.

Translated by JAMES DARMESTER. Part I. The *Vendîdâd*. 8vo, cloth, 10s. 6d.

The Zend-Avesta contains the relics of what was the religion of Cyrus, Darius, and Xerxes, and, but for the battle of Marathon,

might have become the religion of Europe. It forms to the present day the sacred book of the Parsis, the so-called fire-worshippers. Two more volumes will complete the translation of all that is left us of Zoroaster's religion.

[See also Vols. XXIII and XXXI.]

VOL. V. Pahlavi Texts.

Translated by E. W. WEST. Part I. The Bundahis, Bahman Yast, and Shâyast lâ-shâyast. 8vo, cloth, 12s. 6d.

The Pahlavi Texts comprise the theological literature of the revival of Zoroaster's religion, beginning with the Sassanian dynasty. They are important for a study of Gnosticism.

VOLS. VI AND IX. The Qur'ân.

Parts I and II. Translated by E. H. PALMER. 8vo, cloth, 21s.

This translation, carried out according to his own peculiar views of the origin of the Qur'ân, was the last great work of E. H. Palmer, before he was murdered in Egypt.

VOL. VII. The Institutes of Vishnu.

Translated by JULIUS JOLLY. 8vo, cloth, 10s. 6d.

A collection of legal aphorisms, closely connected with one of the oldest Vedic schools, the Kathas, but considerably added to in later time. Of importance for a critical study of the Laws of Manu.

VOL. VIII. The Bhagavadgîtâ, with The Sanatsugâtîya, and The Anugîtâ.

Translated by KÂSHINÂTH TRIMBAK TELANG. 8vo, cloth, 10s. 6d.

The earliest philosophical and religious poem of India. It has been paraphrased in Arnold's 'Song Celestial.'

VOL. X. The Dhammapada,

Translated from Pâli by F. MAX MÜLLER; and

The Sutta-Nipâta,

Translated from Pâli by V. FAUSBÖLL; being Canonical Books of the Buddhists. 8vo, cloth, 10s. 6d.

The Dhammapada contains the quintessence of Buddhist morality. The Sutta-Nipâta gives the authentic teaching of Buddha on some of the fundamental principles of religion.

VOL. XI. Buddhist Suttas.

Translated from Pāli by T. W. RHYS DAVIDS. 1. The Mahā-parinibbāna Suttanta; 2. The Dhamma-ṅkka-ppavattana Sutta. 3. The Tevigga Suttanta; 4. The Ākaṅkheyya Sutta; 5. The Ketokhila Sutta; 6. The Mahā-sudassana Suttanta; 7. The Sabbāsava Sutta. 8vo, cloth, 10s. 6d.

A collection of the most important religious, moral, and philosophical discourses taken from the sacred canon of the Buddhists.

VOL. XII. The Satapatha-Brāhmaṇa, according to the Text of the Mādhyandina School.

Translated by JULIUS EGGELING. Part I. Books I and II. 8vo, cloth, 12s. 6d.

A minute account of the sacrificial ceremonies of the Vedic age. It contains the earliest account of the Deluge in India.

[See also Vols. XXVI, XLI.]

VOL. XIII. Vinaya Texts.

Translated from the Pāli by T. W. RHYS DAVIDS and HERMANN OLDENBERG. Part I. The Pātimokkha. The Mahāvagga, I-IV. 8vo, cloth, 10s. 6d.

The Vinaya Texts give for the first time a translation of the moral code of the Buddhist religion as settled in the third century B.C.

[See also Vols. XVII and XX.]

VOL. XIV. The Sacred Laws of the Āryas,

As taught in the Schools of Āpastamba, Gautama, Vāsishṭha, and Baudhāyana. Translated by GEORG BÜHLER. Part II. Vāsishṭha and Baudhāyana. 8vo, cloth, 10s. 6d.

VOL. XV. The Upanishads.

Translated by F. MAX MÜLLER. Part II. The Katha-upanishad, The Mundaka-upanishad, The Taittirīyaka-upanishad, The Brhadāranyaka-upanishad, The Svetāsvatara-upanishad, The Prasāna-upanishad, and The Maitrāyana-brāhmaṇa-upanishad. 8vo, cloth, 10s. 6d.

VOL. XVI. The Sacred Books of China.

The Texts of Confucianism. Translated by JAMES LEGGE. Part II. The Yî King. 8vo, cloth, 10s. 6d.

[See also Vols. XXVII, XXVIII.]

VOL. XVII. Vinaya Texts.

Translated from the Pāli by T. W. RHYS DAVIDS and HERMANN OLDENBERG. Part II. The Mahāvagga, V-X. The Kullavagga, I-III. 8vo, cloth, 10s. 6d.

VOL. XVIII. Pahlavi Texts.

Translated by E. W. WEST. Part II. The Dâdistân-i Dînik and The Epistles of Mânûskîhar. 8vo, cloth, 12s. 6d.

VOL. XIX. The Fo-sho-hing-tsan-king.

A Life of Buddha by Arvaghosha Bodhisattva, translated from Sanskrit into Chinese by Dharmaraksha, A.D. 420, and from Chinese into English by SAMUEL BEAL. 8vo, cloth, 10s. 6d.

This life of Buddha was translated from Sanskrit into Chinese, A.D. 420. It contains many legends, some of which show a certain similarity to the Evangelium infantiae, &c.

VOL. XX. Vinaya Texts.

Translated from the Pâli by T. W. RHYS DAVIDS and HERMANN OLDENBERG. Part III. The Kullavagga, IV-XII. 8vo, cloth, 10s. 6d.

VOL. XXI. The Saddharma-pundarîka ; or, The Lotus of the True Law.

Translated by H. KERN. 8vo, cloth, 12s. 6d.

'The Lotus of the true Law,' a canonical book of the Northern Buddhists, translated from Sanskrit. There is a Chinese translation of this book which was finished as early as the year 286 A.D.

VOL. XXII. Gaina-Sûtras.

Translated from Prâkrit by HERMANN JACOBI. Part I. The Âkârânga-Sûtra and The Kalpa-Sûtra. 8vo, cloth, 10s. 6d.

The religion of the Gainas was founded by a contemporary of Buddha. It still counts numerous adherents in India, while there are no Buddhists left in India proper.

Part II, in preparation.

VOL. XXIII. The Zend-Avesta.

Translated by JAMES DARMESTETER. Part II. The Strôzahs, Yasts, and Nyâyis. 8vo, cloth, 10s. 6d.

VOL. XXIV. Pahlavi Texts.

Translated by E. W. WEST. Part III. Dînâ-i Mainôg-Khiraz, Sikand-gûmânîk Vigâr, and Sad Dar. 8vo, cloth, 10s. 6d.

SECOND SERIES.

VOL. XXV. Manu.

Translated by GEORG BÜHLER. 8vo, cloth, 21s.
This translation is founded on that of Sir William Jones, which has been carefully revised and corrected with the help of seven native Commentaries. An Appendix contains all the quotations from Manu which are found in the Hindu Law-books, translated for the use of the Law Courts in India. Another Appendix gives a synopsis of parallel passages from the six Dharma-sûtras, the other Smritis, the Upanishads, the Mahâbhârata, &c.

VOL. XXVI. The Satapatha-Brâhmana.

Translated by JULIUS EGGELING. Part II. Books III and IV.
8vo, cloth, 12s. 6d.

VOLS. XXVII AND XXVIII. The Sacred Books of China.

The Texts of Confucianism. Translated by JAMES LEGGE. Parts III and IV. The *Lî Kî*, or Collection of Treatises on the Rules of Propriety, or Ceremonial Usages. 8vo, cloth, 25s.

VOL. XXIX. The *Grihya-Sûtras*, Rules of Vedic Domestic Ceremonies.

Part I. Sâṅkhâyaṇa, Ârvalâyaṇa, Pâraskara, Khâdira. Translated by HERMANN OLDENBERG. 8vo, cloth, 12s. 6d.

These rules of Domestic Ceremonies describe the home life of the ancient Âryas with a completeness and accuracy unmatched in any other literature. Some of these rules have been incorporated in the ancient Law-books.
